Courses

PSYC 4033. Educational Psychology (Irregular). 3 Hours.
Psychological theories and concepts applied to the educational process. Investigates the learner and instructional variables in a wide range of educational settings. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 4053. Psychological Tests (Irregular). 3 Hours.
Nature and theory of individual and group tests of intelligence, personality, interests, and attitudes. Prerequisite: Nine hours of psychology, including a C or better in PSYC 2013.

PSYC 4063. Psychology of Personality (Irregular). 3 Hours.
Theories and representative research concerning the development and nature of the normal personality. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 4073. Psychology of Learning (Sp). 3 Hours.
Theories and representative research on basic principles of learning and memory in both animals and humans. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 4123. Perception (Irregular). 3 Hours.
Theories and representative research in the areas of sensation and perception. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 4183. Behavioral Neuroscience (Fa). 3 Hours.
Examination of the biological basis of behavior. Surveys the anatomy, physiology, and pharmacology of the mammalian brain and examines brain mechanisms underlying a wide range of behaviors and cognitive processes. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 4193. Comparative Psychology (Sp). 3 Hours.
Analysis of animal behavior from an evolutionary perspective, with emphasis on the role of the environment and interactions with other animals in shaping the evolution of behavior within a species, and the evolution of differences in behavior between species. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 5013. Advanced Developmental Psychology (Sp). 3 Hours.
Critical examination of the research relevant to the psychological factors influencing the growth processes of the individual from birth to maturity.

PSYC 5023. Neuropsychological Assessment (Irregular). 3 Hours.
Introduction to the principles, techniques, and tools of assessment in clinical neuropsychology. Includes training in the interpretation, integration, and reporting of results. Prerequisite: PSYC 5043 and enrollment in the Psychology graduate program.

PSYC 5033. Psychopathology Theory & Assessment (Fa). 3 Hours.
Psychological and somatic factors contributing to pathological behavior. Interrelations of these factors will be analyzed in terms of how they lead to differential abnormal states. Includes guidelines for using structured interviews in the diagnosis and clinical assessment of major psychological disorders. Prerequisite: PSYC 3023 and enrollment in the Graduate Program in Psychology, or instructor consent.

PSYC 5043. Assessment of Intellectual and Cognitive Abilities (Fa). 3 Hours.
Training in the theory, administration and interpretation of individual tests of intelligence and mental ability. Prerequisite: PSYC 4053 and enrollment in the Psychology Graduate Program.

PSYC 5063. Advanced Social Psychology (Sp). 3 Hours.
Theory, methodology, and contemporary research in the major areas of social psychology. Topics include attitude theory and measurement, group processes, social and cultural factors.
PSYC 607V. Clinical Practicum III (Sp, Su, Fa). 1-3 Hour.
Provides supervised experience in the application of the more complex and lesser known psychodiagnostic techniques and training and experience in psychotherapeutic techniques with the more severe functional disorders, with special topics in these domains emphasized across sections. Prerequisite: PSYC 5073; Enrollment in the Psychology graduate program. May be repeated for degree credit.

PSYC 609V. Clinical Graduate Seminar (Sp, Fa). 1-3 Hour.
Provides intensive coverage of specialized clinical topics. Open to all graduate students. May be repeated for up to 9 hours of degree credit.

PSYC 611V. Individual Research (Sp, Su, Fa). 1-18 Hour.
May be repeated for up to 18 hours of degree credit.

PSYC 6133. Advanced Behavioral Neuroscience (Fa). 3 Hours.
Examination of the biological basis of behavior, with emphasis on underlying neural mechanisms.

PSYC 6163. Psychotherapy (Fa). 3 Hours.
A conceptual overview of psychotherapy, with emphasis on a) common mechanisms, and b) cognitive, affective, and interpersonal approaches. Prerequisite: PSYC 5033.

PSYC 6213. Psychotherapy Outcomes (Sp). 3 Hours.
Provides a critical evaluation of theory and research on empirically supported programs and interventions for major psychological disorders. Prerequisite: Enrollment in the Psychology graduate program.

PSYC 6233. Seminar in Developmental Psychology (Odd years, Fa). 3 Hours.
Discussion of selected topics in the area of human development. Emphasis will be on a review of current theory and empirical research. Topics selected for discussion could range from early development (child psychology), to later development (psychology of adulthood and aging-gerontology), to current attempts to integrate the field (life-span developmental psychology).

PSYC 6343. Seminar in Quantitative Methods (Irregular). 3 Hours.
Discussion of selected mathematical approaches to theorizing and research in psychology. Emphasis will be on generalization of a given approach across several content areas of psychology. Hence, while each area must be treated in reasonable depth, current thinking and research spanning more than one content area will be stressed.

PSYC 6373. Seminar in Personality and Social Psychology (Fa). 3 Hours.
Discussion of selected topics in social psychology and personality. Current theoretical positions and recent research findings are emphasized. Topics selected for discussion will be in areas of intrapersonal processes, interpersonal processes, group processes or any of various areas of personality.

PSYC 6413. Seminar in Physiological Psychology (Odd years, Sp). 3 Hours.
Discussion of selected topics in physiological psychology. Emphasis will be on a review of current theory and empirical research. Each offering of the seminar will examine the biological basis of a specific aspect of behavior, utilizing both animal and human data.

PSYC 698V. Field Work (Sp, Su, Fa). 1-3 Hour.
Provides academic credit for field work in multidisciplinary setting, involving supervised experiences in assessment and psychotherapy. May be repeated for degree credit.

PSYC 699V. Clinical Psychology Internship (Sp, Su, Fa). 1-3 Hour.
Supervised experience in a multidisciplinary setting of assessment and psychotherapy. May be repeated for degree credit.

PSYC 700V. Doctoral Dissertation (Sp, Su, Fa). 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.
