General Information

Vision
The University of Arkansas represents the best of public higher education, advancing Arkansas while building a better world.

Mission
The University of Arkansas is determined to build a better world by providing transformational opportunities and skills, promoting an inclusive and diverse culture, nurturing creativity, and solving problems through research and discovery, all in service to Arkansas.

Since 1871, our fundamental purpose as a land-grant institution and state flagship remains unchanged — to serve the state of Arkansas as a partner, resource and catalyst by:

• Providing access to a comprehensive and internationally competitive public education, and fostering student success across a wide spectrum of disciplines.
• Utilizing research, discovery and creative activity to improve the quality of life, develop solutions to the challenges we face and drive the state’s economy.
• Contributing service and expertise through outreach, engagement and collaboration.

Quick Facts
• Location: Fayetteville, Arkansas
• Founded: 1871
• Enrollment: 27,778 (Fall 2018)
• Average ACT: 26
• Average high school GPA: 3.72

Got to the university’s Quick Facts page (https://www.uark.edu/about/quick-facts.php) for more information.

History
Founded in 1871 as a land-grant college and state university, the University of Arkansas established its campus on a hilltop overlooking the Ozark Mountains. There were few facilities and little money that first academic year, but the eight students and three faculty members who gathered for the first classes in January 1872 showed the same dedication to learning and commitment to excellence that has carried the University of Arkansas into the 21st century.

More than 147 years later, the university’s enrollment has passed 27,000, and its students represent all 75 counties of Arkansas, all 50 states and 120 countries. The university is the state’s foremost partner and resource for education and economic development. It serves as the major provider of graduate-level instruction in Arkansas. And its public service activities reach every county in Arkansas, throughout the nation, and around the world. Read a fuller history of the university (https://www.uark.edu/about/history.php).

The University of Arkansas has 10 colleges and schools offering more than 200 academic programs including bachelor’s degrees in 75 areas of study. The university maintains a low student-to-faculty ratio of 19:1 that promotes personal attention and mentoring opportunities. Individual classes may range from a large general-lecture class of more than 400 to a focused special-topics class of 4 or 5 students. U of A students are given the tools and encouragement needed to excel. Over the last 15 years, Arkansas students have become Rhodes, Gates Cambridge, Madison, Marshall, Goldwater, Fulbright, Boren, Gilman and Truman scholars. More than 120 students have received National Science Foundation Graduate Research Fellowships.

Students pursue a broad spectrum of academic programs leading to baccalaureate, master’s, doctoral, and professional degrees, not only in traditional disciplines within arts, humanities, social sciences, and natural sciences, but also in the core professional areas of agricultural, food and life sciences; architecture; business; education; engineering; nursing; human environmental sciences; and law.

Students may also pursue a wide range of graduate degrees, including the Master’s, the Educational Specialist, the Doctor of Education, and the Doctor of Philosophy.

As you make your way around campus, you’re sure to notice something unique about many of the sidewalks. Historic Senior Walk showcases the names of more than 175,000 University of Arkansas graduates, grouped by year of graduation starting with the Class of 1876. A long tradition in both time and mileage, it’s concrete proof of the university’s commitment to students.

You won’t be able to discover everything the university has to offer in a day, but here are a few attractions that you don’t want to miss.

• The Arkansas Union — A primary gathering place for more than 40 years, the Arkansas Union serves as a place for students to attend educational and cultural events, access campus resources, eat, study and just meet friends between classes. The facility offers a food court, fitness center, technology center, bank, post office, Razorback shop, art gallery, theatre and much more.

• Jim and Joyce Faulkner Performing Arts Center — The university’s old Field House, in which such legendary performers as Chuck Berry, Louis Armstrong and Peter, Paul and Mary have performed, was renovated recently into a 600-seat acoustically tuned performance hall. More than 200 musical concerts, operas and theatrical performances occur in the course of each year.

• Chi Omega Greek Theatre — The Chi Omega Greek Theatre, based on the designs of ancient Greece, is a popular place for concerts, pep rallies or just catching some rays between classes. Chi Omega, founded at the U of A in 1895 and now the largest women’s fraternity in the nation, donated the Greek Theatre in 1930.

• Fulbright Peace Fountain and Statue — These two impressive landmarks commemorate the legacy of the late U.S. Senator J. William Fulbright, a graduate and former president of the University of Arkansas. Fulbright famously helped create the Fulbright Scholarship Program, the largest international exchange program of its kind. Internationally renowned architect E. Fay Jones, a U of A graduate and former dean of the School of Architecture, designed the Peace Statue.

• Old Main — This architectural centerpiece of campus opened for classes in 1875, making it the oldest building at the University of Arkansas. Visit the restored classrooms, take a closer look at the inner workings of the tower clock on the fourth floor and enjoy the shade of the trees on the Old Main Lawn.

• The Inn at Carnall Hall — Built in 1905, the first women’s residence hall on campus is now a historic inn. The Inn at Carnall Hall is also home to the award-winning Ella’s Restaurant and Lambeth Lounge, the perfect spot for a little R&R on campus.

• The Fine Arts Center — Designed by renowned architect Edward Durell Stone, the Fine Arts Center at the University of Arkansas was
the first complex to integrate the fine arts — theatre, music and art — in one building with the intention that students from each discipline would be inspired by each other. The center houses the University of Arkansas Theatre, the Fine Arts Gallery and the Stella Boyle Smith Concert Hall.

- Silas Hunt Memorial Sculpture — Near Old Main, you'll find this tribute to the first black student to integrate a major Southern public university since Reconstruction. A veteran of World War II, Hunt was admitted without litigation into the University of Arkansas School of Law in 1948.
- Pi Beta Phi Centennial Gate — A new landmark, the gate serves as a formal entrance to the university’s historic core. The striking entranceway was a gift, commemorating the first 100 years of Pi Beta Phi on campus.
- Il Porcellino — This wild boar statue with fountain is a replica of the original Il Porcellino, in Florence, Italy. The Italian title of the statue means “piglet” and comes from the local Florentine nickname for the statue. One of many Razorback tributes on campus!
- Razorback Stadium/Hall of Champions Museum — Donald W. Reynolds Razorback Stadium is one of the finest collegiate football facilities in the nation and home to the Jerry Jones/Jim Lindsey Hall of Champions Museum, located in the Frank Broyles Athletic Center. Bud Walton Arena houses two more athletic museums.
- Walmart On Campus — The nation’s first Walmart on Campus is also the smallest Walmart in the country. It’s located in the Garland Center, which also includes the U of A Bookstore as well as boutiques, salons and dining options.

The campus features many other landmarks and noteworthy facilities including the Clinton House, the small brick home on campus in which future President Bill Clinton and future Secretary of State Hillary Rodham Clinton lived while both served on the U of A’s law school faculty.

Fayetteville is routinely considered among the country’s finest college towns, and the area is regularly ranked as one of the best places in the United States to live, raise a family, work, play and retire. A thriving city of 77,000, Fayetteville is located in the hilly northwest corner of the state and has been named one of the top 5 cities in America the last two years by U.S. News & World Report.

Quickly gaining recognition as a nationwide center for arts and culture, the region is home to Crystal Bridges Museum of American Art. This world-class museum features a permanent collection of art spanning five centuries, from the Colonial era to the current day. The collection includes several works considered masterpieces. Crystal Bridges also offers miles of wilderness trails and a unique dining experience. If that’s not enough, admission is free. Another major cultural amenity, the Walton Arts Center, is located just two blocks from campus, where Broadway touring shows appear regularly.

Dickson Street, one of the state’s most popular entertainment districts, is also just a short walk from campus. A part of Fayetteville’s downtown historic district, Dickson Street offers a variety of restaurants, boutiques, galleries, and clubs unique to the area. Fayetteville’s historic square, College Avenue and the area around the Northwest Arkansas Mall are also great places for shopping and dining. The Fayetteville Farmers’ Market, an area tradition since 1974, was recently named one of “America’s Favorite Farmers’ Markets.”

Nearby Rogers offers the region’s newest open-air shopping experience with many of the nation’s most popular shops and eateries. And Eureka Springs, a Victorian mountain village known as the “Little Switzerland of the Ozarks,” offers more than 100 specialty shops and 70 restaurants about 45 minutes from campus.

Arkansas is a natural wonder of forests, mountains and lakes framed by picturesque rivers and streams. Some of the nation’s best outdoor amenities and most spectacular hiking trails are within a short drive of campus. Devil’s Den State Park is a short distance south of Fayetteville. Beaver Lake is 30 minutes to the northeast. Hawksbill Crag and the Buffalo National River, America’s first National River and one of the few remaining undammed rivers in the lower 48 states, are an hour’s drive to the east. The Razorback Greenway, a 36-mile bicycle route, runs from campus north to Bella Vista. Even closer to campus, Fayetteville’s Botanical Garden of the Ozarks offers another outdoor option.

Northwest Arkansas is one of the most economically stable regions in the nation and serves as the base of operations for Walmart, Tyson Foods Inc. and J.B. Hunt Transport Services. Because of their presence, many other corporations have established primary or secondary headquarters in the region. Their close proximity to the U of A campus, along with their executives’ and employees’ active involvement in university life, offers students and faculty exceptional opportunities for research partnerships, internships, and post-graduation employment.

The Northwest Arkansas Regional Airport has direct flights to most major metropolitan areas, including Atlanta, Chicago, Cincinnati, Charlotte, Dallas, Denver, Houston, Las Vegas, Los Angeles, Minneapolis, San Francisco, New York, Newark and Orlando; and, Fayetteville is within a day’s drive of several larger metropolitan areas, including Dallas, Kansas City, Little Rock, Memphis, St. Louis and Tulsa.

Board of Trustees

The trustees of the University of Arkansas System are appointed by the governor of Arkansas to 10-year overlapping terms. The board sets policy for the University of Arkansas as well as other universities, colleges and institutes within the system.

John Goodson, chair
John Goodson of Texarkana is a law partner at Keil & Goodson, P.A. He earned his bachelor’s degree in 1987 and law degree in 1989 from the University of Arkansas. His term expires in 2021.

Mark Waldrip, vice chair
Mark Waldrip of Moro is owner of East Arkansas Seeds Inc. and Armor Seed LLC, companies that develop and sell soybeans, wheat, rice and corn. He also owns and manages Waldrip Farms Inc., a several thousand acre family farm. Waldrip is a 1977 graduate of the University of Arkansas. His term expires in 2020.

Morril Harriman, secretary
Morril Harriman of Little Rock has served as Governor Mike Beebe’s chief of staff since Beebe took office in 2007. Prior to that, Harriman served 16 years in the Arkansas Senate. He earned both his bachelor and law degrees from the University of Arkansas. His term expires in 2024.

Kelly Eichler, assistant secretary
Kelly Eichler of Little Rock is the public policy director for Gov. Asa Hutchinson. She previously served as a deputy prosecutor for Pulaski County and on the Arkansas Board of Corrections. She earned a bachelor’s degree from the University of Arkansas and a law degree from the University of Arkansas at Little Rock Bowen School of Law. Her term expires in 2026.

Stephen Broughton
Dr. Stephen Broughton of Pine Bluff is a staff psychiatrist for the Southeast Arkansas Behavioral Health System. Broughton earned his bachelor’s degree from the University of Arkansas at Pine Bluff and completed his medical education at the University of Arkansas for Medical Sciences. His term expires in 2022.

C.C. "Cliff" Gibson III
C.C. "Cliff" Gibson III of Monticello is founder of Gibson and Keith Law Firm and serves as county attorney for Drew County, Ark. The former president of the Monticello Economic Development Commission, Gibson attended the University of Arkansas at Monticello and earned his Juris Doctor at the UALR Bowen School of Law. His term expires in 2023.

Sheffield Nelson
Sheffield Nelson of Little Rock is a retired president and chief executive office of Arkla Gas. He has served on the board of the Arkansas Department of Higher Education and the Arkansas Game and Fish Commission. Nelson earned his undergraduate degree from Arkansas State Teachers College, now the University of Central Arkansas, and his law degree from the University of Arkansas. His term expires in 2025.

Tommy Boyer
Tommy Boyer, of Fayetteville, graduated from the University of Arkansas, Fayetteville in 1964, where he was also an All-American basketball player. He retired from the Eastman Kodak Company in 1989, and founded Micro Images in Amarillo, Texas. Within two years, Micro Images had become the largest Kodak document imaging systems broker and reseller in the United States. Boyer was inducted into the Arkansas Business Hall of Fame in 2013 and the Arkansas Sports Hall of Fame in 2000. His term expires in 2027.

Steve Cox
Steve Cox of Jonesboro graduated from the University of Arkansas in 1982 after having earned All Southwest Conference and All America honors during his football career as a punter and kicker, later playing in the NFL for the Cleveland Browns and Washington Redskins. He rose through the ranks of banking before becoming a managing partner at Rainwater and Cox LLC, which oversees ownership and management of an array of commercial, hotel and agricultural properties. His term expires in 2028.

Ed Fryar
Edward Fryar Jr. of Rogers is a graduate and former professor of the University of Arkansas. He earned degrees in economics and agricultural economics and was a professor of agricultural economics for more than 13 years. He co-founded Ozark Mountain Poultry in Rogers in 2000, which grew from 15 employees to more than 1,800 before selling it in 2018. He was inducted into the Arkansas Agriculture Hall of Fame in 2019. His term expires in 2029.
Administrative Officers

System Administration
President, University of Arkansas System — Donald Bobbitt, B.S., Ph.D.

Chancellor and Vice Chancellors
Chancellor, University of Arkansas — Joseph E. Steinmetz, B.S., M.A., Ph.D.

Provost and Executive Vice Chancellor for Academic Affairs — Jim Coleman, B.S., M.S., M.Phil., Ph.D.

Vice Chancellor for Diversity and Inclusion — Yvette Murphy-Erby, B.A., M.S.W., Ph.D.

Vice Chancellor for Economic Development — Stacy L. Leeds, B.A., M.B.A., LL.M., J.D.

Vice Chancellor for Finance and Administration — Chris McCoy, B.S.Comp.S., M.B.A., M.Eng.

Vice Chancellor for Government and Community Relations — Randy Massanelli, B.S.B.A.

Vice Chancellor for Intercollegiate Athletics — Hunter R. Yurachek, B.S., M.A.

Vice Chancellor for Research and Innovation — Dan Sui, B.S., M.S., Ph.D.

Vice Chancellor for Student Affairs — Charles F. Robinson II, B.A., M.A., Ph.D.

Vice Chancellor for University Advancement — Mark Power, B.A.

Deans and Vice Provosts
Dean of Honors College — Lynda Coon, B.A., M.A., Ph.D.

Dean of Dale Bumpers College of Agricultural, Food and Life Sciences — Deacue Fields III, B.S., M.S., Ph.D.

Dean of Fay Jones School of Architecture and Design — Peter MacKeith, B.A., M.Arch.

Dean of J. William Fulbright College of Arts and Sciences — Todd Shields, B.A., M.A., Ph.D.

Dean of Sam M. Walton College of Business — Matt Waller, B.S., M.S., Ph.D.

Dean of College of Education and Health Professions — Brian Primack, B.A., Ed.M., M.D., M.S., Ph.D.

Dean of College of Engineering — John English, B.S.E.E., M.S.O.R., Ph.D.

Dean of Graduate School and International Education — Kimberly LaScola Needy, B.S.I.E., M.S.I.E., Ph.D.

Dean of School of Law — Margaret Sova McCabe, B.A., J.D.

Dean of Students — Melissa Harwood-Rom, B.A., M.F.A., M.S.Ag.E.

Dean of University Libraries — Dennis T. Clark, B.A., M.L.S.

Dean of Admissions and Vice Provost for Enrollment Services — Suzanne McCray, B.A., M.A., Ph.D.

Vice Provost for Academic Affairs — Terry Martin, B.S.E.E., M.S.E.E., Ph.D.

Vice Provost for Distance Education — Donald Judges, B.A., J.D., Ph.D.

Vice Provost for Faculty Development and Enhancement — Ro Di Brezzo, B.S., M.S., Ph.D.

Vice Provost for Planning — Colleen Briney, B.A., M.S.
University Profile

Vision
The University of Arkansas represents the best of public higher education, advancing Arkansas while building a better world.

Mission
The University of Arkansas is determined to build a better world by providing transformational opportunities and skills, promoting an inclusive and diverse culture, nurturing creativity, and solving problems through research and discovery, all in service to Arkansas.

Since 1871, our fundamental purpose as a land-grant institution and state flagship remains unchanged — to serve the state of Arkansas as a partner, resource and catalyst by:

- Providing access to a comprehensive and internationally competitive public education, and fostering student success across a wide spectrum of disciplines.
- Utilizing research, discovery and creative activity to improve the quality of life, develop solutions to the challenges we face and drive the state’s economy.
- Contributing service and expertise through outreach, engagement and collaboration.

History
Founded as a land-grant college and state university in 1871, the University of Arkansas opened its doors to students on January 22, 1872. Under the Morrill Land-Grant College Act of 1862, federal land sales provided funds for the new university, which was charged with teaching “agricultural and the mechanic arts,” “scientific and classical studies,” and “military tactics” to Arkansas scholars.

Statewide elections, held to establish bonds to help finance the university, eventually determined the school’s location. Washington County and the city of Fayetteville submitted the highest bid, a total of $130,000, to which was added a $50,000 state appropriation for the benefit of the institution and $135,000 from the sale of federal lands. With $12,000 of this money, the university purchased a 160-acre farm, the homestead of William and Martha McIlroy, and established its campus on a hilltop overlooking the Ozark Mountains.

There were few facilities and little money that first academic year, but the eight students and three faculty members who gathered for classes in 1872 showed the same dedication to learning and commitment to excellence that has carried the University of Arkansas into the 21st century. Over the past 140 years, the university has developed into a mature institution with 10 schools and colleges, more than 1,100 full-time faculty members, and more than 26,000 students. It serves as the major provider of graduate-level instruction in Arkansas. The research and scholarly endeavors of its faculty make it an economic and cultural engine for the state. And its public service activities reach every county in Arkansas, throughout the nation, and around the world. Find out more about the university’s history (http://www.uark.edu/about/history.php) or browse our timeline (http://uark.edu/about/time-line.php).

Today at the University of Arkansas Campus
Students pursue a broad spectrum of academic programs leading to baccalaureate, master’s, doctoral, and professional degrees, not only in traditional disciplines within arts, humanities, social sciences, and natural sciences, but also in the core professional areas of agricultural, food and life sciences; architecture; business; education; engineering; nursing; human environmental sciences; and law.

The University of Arkansas houses more than 200 academic programs and offers bachelor’s degrees in more than 75 areas of study. Students may also pursue a wide range of graduate degrees, including the Master’s, the Educational Specialist, the Doctor of Education, and the Doctor of Philosophy.

The Carnegie Foundation categorizes the University of Arkansas as a research institution with “highest research activity,” placing the university among only 2.7 percent of universities and colleges nationwide and in a class by itself within the state of Arkansas. US News and World Report consistently ranks the university among the top tier of institutions of higher education. Faculty members perform cutting-edge research for which they annually win prestigious grants and awards, and the university encourages undergraduates to participate in the research process. Such opportunities enhance the learning process by providing hands-on experience in lab and research techniques, by developing students’ abilities to implement, experiment, discover and teach, and by fostering a mentoring relationship early in students’ academic careers.

Research programs involving both faculty and students serve as vital sources of information on the economic and social needs of Arkansas. In many fields, research performed at the University of Arkansas reaches beyond the state to provide insight and guidance on issues of national and international concern. The university provides extensive technical and professional services to varied groups and individuals throughout the state, helping to further Arkansas’ economic growth. The university operates nationally respected self-paced (correspondence) courses; it assists other institutions in developing educational programs; it offers graduate programs, both cooperatively and singly, throughout the state; and it makes specialized campus resources such as computing services and library holdings available to other institutions in the state.

Classes at the university maintain a low average ratio of students to instructor, although individual classes may range from a large general-lecture class of 200 to a focused special-topics class of 4 or 5 students. University of Arkansas students are given the tools and encouragement needed to excel. Over the last 15 years, more than 200 undergraduate Arkansas students have become Rhodes, Gates Millennium, Madison, Marshall, Goldwater, Fulbright, Boren, Gilman and Truman scholars. More than 100 graduate students have received National Science Foundation Graduate Research Fellowships. Find out more about the university’s numbers (http://www.uark.edu/about/by-the-numbers.php).

15
Academic Resources and Facilities

The University of Arkansas provides a variety of resources for students to enhance their ability to attend college, improve their studies in class, and aid their academic research as they advance through their curricula.

The programs and services listed at left provide advice, tools and inspiration for high school students; individual tutoring for students on campus and infrastructure such as libraries and technology support that offer University of Arkansas students ongoing support throughout their college careers.

Center for Learning and Student Success

The Center for Learning and Student Success is designed to provide assistance to all University of Arkansas students in meeting their academic goals. The center’s goal is for every University of Arkansas student who needs or wants academic assistance to participate in the programs and services of the center without hesitation or barrier.

Over 10,000 students took advantage of the center’s programs last year including:

• Tutoring in a variety of subjects (math, the sciences, world languages, business, economics, and other courses taught throughout the university);
• Writing Support;
• Supplemental Instruction in the sciences, economics, accounting, and data analysis;
• Academic Coaching;
• Self-help resources dealing with study skills, time management, test taking, anxiety reduction, and effective learning strategies;
• Study areas and access to state-of-the-art computers.

The center partners with University Housing, Mullins Library, Mechanical Engineering, Sam M. Walton College of Business and the Multicultural Center to provide unique tutoring and other assistance to students in a variety of locations and formats. For all services or to make an appointment for tutoring, see class.uark.edu (http://class.uark.edu/).

The center’s primary location is in Gregson Hall. The majority of CLASS-Plus SI, tutoring and writing support is available from 9 a.m. to 9 p.m. Mondays through Thursdays, and from 9 a.m. to 3 p.m. Fridays. Tutoring is also available on Sunday afternoons in the Multicultural Center (Arkansas Union) and Mullins Library.

Contact CLASS-Plus by phone at 479-575-2885 or visit class.uark.edu (http://class.uark.edu).

Center for Multicultural and Diversity Education

The Center for Multicultural and Diversity Education provides academic, cultural and social programs intended to promote inclusiveness, foster achievement and assist in the development and advancement of a diverse student body.

The center is located on the fourth floor of the Arkansas Union in Room 404, and can be contacted at 479-575-8405 or by visiting multicultural.uark.edu (http://multicultural.uark.edu).

Information Technology Services

Information Technology Services, or IT Services as most people refer to it, provides technology solutions that support and enable teaching, learning, research and discovery for students, faculty and staff at the University of Arkansas.

Supported services include student information systems, learning management systems, cloud storage, email and collaboration tools, research computing resources, software, internet access and the campus network. Learn more about everything IT Services provides at its.uark.edu (https://its.uark.edu/).

New members of the university community can get started with technology using the Get Started with Tech guide (https://its.uark.edu/get-started/).

Tech support is available 7 days a week at the IT Help Desk in the Arkansas Union, by phone at 479-575-2905 or online at help.uark.edu (https://help.uark.edu/).

Reasonable Accommodation for Students with Disabilities

The Center for Educational Access, 209 Arkansas Union, is the central campus resource for students who require reasonable accommodations in order to access the programs, services and activities offered through the University of Arkansas. The center’s staff work in partnership with the individual student to communicate and facilitate any accommodation needs to faculty and staff. Accommodation determination is based in part on medical or psychological documentation provided to the Center for Educational Access by the student. Students must meet with one of the center’s staff for an access plan meeting to discuss their needs and provide such documentation before any accommodations can be granted.

To register for services or for more information, contact the Center for Educational Access, University of Arkansas, 209 ARKU, Fayetteville, AR 72701, phone 479-575-3104 ; e-mail: ada@uark.edu; Web: Center for Educational Access (http://cea.uark.edu/) (online request for services available).

Student Support Services

The department of Student Support Services is designed to provide a powerful combination of programs and services to students who are first-generation, and/or modest-income, and/or individuals with disabilities. The services provided by Student Support Services place an emphasis on individual assessment, counseling, advising, and skill building. Some of these services include: academic/financial/personal counseling, financial scholarships, social etiquette instruction, career and graduate school preparation, academic/cultural enrichment, assistance with tutoring, and mentorship. The overarching goal of the University of Arkansas Student Support Services program is to empower students, assist them in achieving academic excellence, and seeing them through to graduation.

Student Support Services is a department in the Division of Student Affairs. The office is located on the Garden Level of Gregson Hall. For more details, call Student Support Services at 479-575-3546 or visit the Student Support Services website (http://sss.uark.edu/).
### Talent Search Programs

**College Project Talent Search, Educational Talent Search, and University Access Talent Search**

Talent Search is an early intervention/educational opportunity program. Serving students in grades 6-12, the program promotes skills and disseminates information necessary for successfully entering college and completing a baccalaureate degree. Emphasizing personal/career development, financial literacy, technological/academic skills, and ACT readiness through a developmental curriculum of college preparatory workshops, students are prepared for the rigors of higher education. Campus visits, academic monitoring/advising, and guidance in the completion of college and financial aid applications are key components for participants and their families. Summer enrichment and campus-based events are also hosted as funding permits.

Talent Search is a federal TRIO program funded by the U.S. Department of Education. The University of Arkansas has three Talent Search grant projects which serve distinct target areas in Benton, Carroll, Crawford, Sebastian and Washington counties in Arkansas, and McDonald County, Missouri. At least two-thirds of students served by the programs must be low-income and in the first generation of their family to attend college. They exhibit academic potential and attend one of the 37 target schools served. For additional information and a full listing of target schools, visit the Talent Search website (http://talentsearch.uark.edu/).

The Talent Search Programs office is located at the university’s Uptown Campus East, 1083 E. Sain Street, UPTE 128, Fayetteville, Arkansas. Call 479-575-3553 for more information.

### Testing Services

Testing Services is charged with the responsibility of administering standardized academic tests at the University of Arkansas. The office administers such national tests as:

- the ACT Assessment
- the Law School Admission Test (LSAT)
- the Graduate Management Admission Test (GMAT)
- the Graduate Record Examination (GRE)
- the CLEP exams in addition to others throughout the year.

National testing companies determine testing dates and deadlines. Testing Services also offers a number of institutional tests such as the Test of English as a Foreign Language (TOEFL) and the Spoken Language Proficiency Test (SLPT). These tests are scheduled at various times as demand dictates. Test fees vary depending on the test.

To obtain a registration bulletin or information about exam dates and deadlines, please stop by the Testing Center at 97 N. Razorback Road (https://campusmap.uark.edu/?pnl_disp=Y&amp;bldg_code=TEST&amp;parklot=Y-Student-Faculty%2FSStaff-Parking_Meters-ADA_Parking-Remote/), Fayetteville, or call 479-575-3948.

Find out more at the Testing Services website (http://test.uark.edu/).

### University Libraries

The library system of the University of Arkansas, Fayetteville, includes the David W. Mullins Library, the main research facility on campus, and four branch libraries:

- The Robert A. and Vivian Young Law Library (http://law.uark.edu/library/)
- The Fine Arts Library (http://libinfo.uark.edu/FAL/)
- The Chemistry and Biochemistry Library (http://libinfo.uark.edu/chemistry/)
- The Physics Library (http://libinfo.uark.edu/physics/)

The spacious Helen Robson Walton Reading Room is Mullins Library’s most popular quiet study area, but group study space and graduate student study space is also available. More than 200 databases and thousands of electronic journals are accessible from anywhere with a University ID. Librarians onsite assist in locating and using library resources, or students may send questions by email, phone, or 24/7 chat.

Subject librarians (http://libinfo.uark.edu/info/specialists.asp) are also available for one-on-one research consultations tailored to individual research questions, whether onsite, over the phone, or even remotely by video software. Librarians conduct orientation sessions on research methods and software throughout the semester and the Quality Writing Center (http://qwc.uark.edu/) has a satellite location inside Mullins Library.

With 2.1 million volumes and more than 56,000 journal titles, students will find research material for every subject. Other resources in the collections include several thousand maps, manuscripts, and more than 33,000 audio and visual materials, including music scores, recordings, and movies, available through the Performing Arts and Media (http://libraries.uark.edu/AV/default.asp) Department on the lower-level of Mullins Library.

A full-service computer commons (GACL) is located on the lobby level of Mullins, complete with printing stations and state-of-the-art scanners. Laptops and iPads are available to check-out to take advantage of wireless access anywhere in the library. Visit the University Libraries website (http://libinfo.uark.edu/) to learn more about services and collections, or access My Library (https://library.uark.edu/patroninfo~S1/) to check accounts, renew books, request holds, or save catalog searches.

Items not owned by the University Libraries may be obtained through Interlibrary Loan (http://libinfo.uark.edu/ill/default.asp). Requested items in electronic format will be sent directly to desktops, usually within 24 hours; physical items are held for pickup at the main service desk on the Lobby Level. The University Libraries have had official status as a United States government depository since 1907, and the Government Documents Department has been a depository for Arkansas state publications since 1993. The University Libraries’ map collection and GIS (http://libinfo.uark.edu/GIS/default.asp) (geographic information systems) program, including a public GIS workstation equipped with ArcGIS Desktop Suite, are also available.

In Special Collections, students can read rare books from around the world; consult the largest book collection related to Arkansas; handle historic letters, diaries, magazines, and old photographs in the archives; and watch old black and white films made in or about the state. A number of digital collections and exhibits (http://libinfo.uark.edu/eresources/digitalcollections.asp) are available through the Special Collections website (http://libinfo.uark.edu/SpecialCollections/). Special Collections...
also holds the University Archives, the Arkansas Collection, and the Arkansas Architectural Archives.

To stay up-to-date on the Libraries’ programs, resources, and events, follow @UARKLibraries on Facebook, Twitter, Instagram, and Pinterest. For information concerning collections and services, please inquire at 479-575-4104 or refer@uark.edu. For any other questions, please contact the Dean’s Office at 479-575-6702.

Upward Bound Programs

Upward Bound (http://ub.uark.edu/) and Upward Bound Math and Science are early intervention programs that help low-income and potential first-generation college students prepare for higher education. These programs bring high school students in grades 9 – 12 to the University of Arkansas campus on weekends and during the summer to receive instruction in mathematics, laboratory sciences, composition, literature, and foreign languages. The programs also provide academic and social support through tutoring, counseling, mentoring, cultural enrichment, financial literacy, field trips, college planning, and financial aid assistance. For students just completing their senior year of high school, Upward Bound provides a summer residential bridge program that enables participants to earn up to six hours of college credit. Funding is provided through grants from the U.S. Department of Education.

Veterans Upward Bound

Veterans Upward Bound (http://vub.uark.edu/) is designed to identify and serve the unique needs of veterans who are low-income and potential first-generation college students, who have the academic potential and desire to enter and succeed in a program of higher education. Eligible veterans must have completed a minimum of 180 days of active duty in the military and hold any discharge other than dishonorable, or discharged because of a service connected disability, a member or a reserve component of the U.S. Armed Forces called to active duty for a period of more than 30 days, or a member of a reserve component of the U.S. Armed Forces who served on active duty in support of a contingency operation on or after September 11, 2001. Services include Accuplacer testing, tutoring, guidance counseling, assistance in filing financial aid and VA benefit forms, academic/career advisement, test preparation for entrance exams, and courses in English, Spanish, math, science, and computer technology. Courses are offered days and evenings each semester. Funding is provided through a grant from the U.S. Department of Education. Call 479-575-2442 for more information.

The Upward Bound and Veterans Upward Bound offices are located at the university’s Uptown Campus West, 1001 E. Sain St., Fayetteville.
Online Education

Donald P. Judges
Vice Provost for Distance Education
Global Campus
800-952-1165
globalcampus@uark.edu

Academic colleges and schools at the University of Arkansas provide flexible learning options through distance education and online learning options for undergraduate and graduate students. Traditional online courses, self-paced online (correspondence) courses, and online degree programs remove the barriers of time and distance. Support units provide the web-based resources and services necessary for distance and online students to reach their educational and professional goals.

Global Campus

The Global Campus (http://globalcampus.uark.edu/), School of Continuing Education and Academic Outreach, serves as a portal for online, distance and professional education programs and courses provided by the University of Arkansas. Experienced staff members collaborate with the university’s academic colleges and other academic units to develop and facilitate quality courses and programs that help students reach educational and professional goals.

State Authorization and Distance Education Beyond Arkansas

The University of Arkansas, Fayetteville delivers online education programs and courses throughout the United States and internationally. All programs have been approved by the Arkansas Department of Higher Education. Many states have prescribed an “authorization” process for out-of-state institutions delivering online programs to its state residents to ensure quality post-secondary education, to preserve the integrity of an academic degree and to instill greater consumer protection for its student citizens.

Authorization (sometimes referred to as “registration,” “licensure,” “approval,” etc.) indicates that certain minimum standards have been met by the institution under the laws and regulations of that state. Authorization does not constitute an endorsement of any institution, course or degree program. Credits earned at an institution may not transfer to all other institutions.

The University of Arkansas, Fayetteville, through the Global Campus, has taken steps to protect its students and operations through nationwide compliance and has been granted authorizations, exemptions and waivers from many states. In other states, the University of Arkansas, Fayetteville can operate without such authorization because the state’s laws do not pertain to a public institution, to an accredited institution or to the University of Arkansas activities in that state. More specific information about state authorization can be found at the University of Arkansas Online Web page (http://online.uark.edu/about/state-authorization.html).

The Global Campus supports the university’s development and delivery of online and distance education.
Student Affairs

The Division of Student Affairs supports students in pursuing knowledge, earning a degree, finding meaningful careers, exploring diversity, and connecting with the global community. We provide students housing, dining, health care resources, and create innovative programs that educate and inspire. We enhance the University of Arkansas experience and help students succeed, one student at a time.

The Office of the Vice Chancellor for Student Affairs provides leadership for the division and serves as a liaison to other administrative offices, faculty, and student governing groups. The office is a central source of information concerning university policies and procedures affecting student life and co-curricular programs and services.

The Office of the Dean of Students under the Vice Chancellor for Student Affairs emphasizes student advocacy while broadening the development of services and programs that address a range of student and campus needs. Departments in the Division of Student Affairs are dedicated to developing exceptional programs and services that enhance the University of Arkansas experience and enrich the quality of student life on campus. Staff members are available and willing to assist with any issue or question that a student, staff, or faculty member may have regarding student and campus life at the University of Arkansas. The office is available for the clarification of university policies and procedures, confidential consultation, personal and family crisis assistance for students, and referral to all campus and community services. The office also seeks to assist students and faculty members in cases of emergency or extenuating circumstances. Student Affairs staff members are firmly committed to addressing the challenges and individual needs of the University of Arkansas family.

Arkansas Union

The Arkansas Union is the community center of campus; serving students, faculty, staff, alumni, and guests. Through its facilities, programs, and services, the Arkansas Union is the place to build relationships, enrich academics, and experience campus life to the fullest. But more importantly, the Arkansas Union plays a pivotal role in putting University of Arkansas students first. It is home to essential student needs, such as food service, computer technology, student accounts, banking, and the Campus Card Office. The Arkansas Union provides social and educational programming space, as well as lounge and study areas. Additionally, recreational opportunities are available in the Arkansas Union, through the satellite fitness center, cinema, and Student Technology Center. Located inside the Arkansas Union are:

Retail Outlets

- ATMs (various banks)
- Au Bon Pain
- Catering and Dining Services
- Club Red Convenience Store
- Where the Wild Greens AR
- Passport Office
- PMC – Drop-Off Copy Center
- Razorback Shop
- U.S. Post Office
- Union Hair Care

Union Market

- Chick-fil-A
- BRIC Subs, Pizza, Pasta, Salads and Bakery
- True Burger
- Pei Wei
- Flying Burrito Co.

Facilities

- Anne Kittrell Art Gallery
- Computer Lab and Help Desk
- Verizon Ballroom
- International Connections Lounge
- Student Technology Center
- Meeting rooms
- Reception rooms
- Union Living Room
- Union Information Center
- Union Theatre
- University Recreation Fitness Center
- UP Theater

Student Services

- Academic Initiatives and Integrity
- Arkansas Union Administration & Event Services
- Associated Student Government
- Campus Card Office
- Career Development Center
- Center for Community Engagement
- Center for Educational Access
- Multicultural Center
- New Student and Family Programs
- Off-Campus Student Services
- Student Activities
- Treasurer’s Office and Student Accounts
- University Productions

Campus Life

Center for Community Engagement

The purpose of the Center for Community Engagement is to promote civic engagement and leadership by connecting University of Arkansas students, faculty, and staff with nonprofit organizations in the Northwest Arkansas area and beyond.

In order to serve this purpose, the center maintains uark.givepulse.com (http://volunteer.uark.edu/), which enables the University of Arkansas community to search for agencies and volunteer opportunities. It allows users to log volunteer hours, or “impacts,” and earn opportunities for community recognition, such as the Presidential Volunteer Service Award and Chancellor’s Community Service Award. Northwest Arkansas agencies and University of Arkansas registered student organizations also utilize the site to post service opportunities and recruit volunteers. Over 350 organizations and subgroups are registered on the site, such as Habitat for Humanity, Uark Cardinal Nights, and Potter’s House Thrift.
Volunteer Action Center
The Center for Community Engagement also houses the Volunteer Action Center, a student-led volunteer coordination board with 45 members who are dedicated to active service in the community. Each year the Volunteer Action Center provides meaningful service opportunities through events and ongoing projects that engage the university and Northwest Arkansas communities. The Volunteer Action Center sponsors programs and events including the Jane B. Gearhart Full Circle Food Pantry, Make a Difference Day, Dream B.I.G. (Believing in Girls) Mentoring Program, VAC Literacy Program, and Razzback Food Recovery. The Jane B. Gearhart Full Circle Campus Food Pantry is a nationally recognized program; the pantry serves students, staff and their families. Requests and more information can be found at fullcircle.uark.edu (http://service.uark.edu/foodprograms/jane-b-gearhart-full-circle-food-pantry/).

Get involved in the following ways:

• Drop by the Center for Community Engagement, Arkansas Union, Room A643, and chat with the office’s great staff and students.
• Look for service opportunities on uark.givepulse.com (http://volunteer.uark.edu/) and log your hours. Just ten hours makes you a VAC member.
• Participate in events hosted by Volunteer Action Center and the Center for Community Engagement throughout the year.
• Become a Volunteer Action Center board member or weekly program volunteer. Applications are accepted each semester.

Greek Life
The Charles and Cappy Whiteside Greek Life Leadership Center facilitates the educational process and provides resources related to programs that strengthen the growth and development of students affiliated with fraternities and sororities on campus. The overall mission is to strengthen the academic, cultural, moral, and social development of students in Greek organizations; provide training in strengths-based leadership and other personal and social skills; promote involvement in extracurricular activities and community service projects; and promote Greek Life as a productive and viable lifestyle on campus. The Greek Life Leadership Center coordinates programs such as Recruitment, Greek Getaway, Greek Life Facilitators, and Greek Summit in collaboration with the Interfraternity Council, the National Pan-Hellenic Council, the Panhellenic Council, and the United Greek Council.

The Interfraternity Council (IFC), National Pan-Hellenic Council (NPHC), Panhellenic Council (PC) and United Greek Council (UGC) govern 16 national sororities and 19 fraternities. The officers and representatives of each council work with the staff of the Greek Life Leadership Center to provide positive programs and strengths-based leadership opportunities to the members of the Greek organizations. The Charles and Cappy Whiteside Greek Life Leadership Center is in Walton Hall 101; phone 479-575-5001 or fax 479-575-3531; Web: uagreeks.uark.edu.

New Student & Family Programs
The Office of New Student & Family Programs connects students and their families to the University of Arkansas campus and community by providing diverse, innovative programs and resources that support a successful collegiate experience. The department supports and collaborates on the following major initiatives:

• Parent & Family Programs: Family Weekend, Spring Family Reunion, Regional Razorback Family Networks, and the Parent & Family Association
• Leadership & Late Night Programs: UARK Cardinal Nights, Emerging Leaders, Student Leader of the Month, and Diversity Leadership Institute
• Transition Initiatives: New Student Welcome, Alpha Lambda Delta First Year Honor Society, A-Week, and First-Yer Leadership Summit

By providing transitional support for incoming students, their parents, and family members, our programs effectively promote the students’ academic growth and support the mission of the university.

New Student & Family Programs is located in the Arkansas Union, Room A688; phone 479-575-5002; Web: nsfp.uark.edu (http://nsfp.uark.edu/).

Office of Student Activities
With a students-first philosophy, the Office of Student Activities provides an environment for involvement, empowerment, and collaboration through student organizations, programmatic experiences, and shared governance. The office maximizes the UA experience by advocating for all students, promoting intercultural understanding, and developing citizens who are prepared to positively impact their communities.

The Office of Student Activities, located in the Arkansas Union A665, is the central location for student organizations and activities for the university. The office can be reached at 479-575-5255 or visit the office’s website at osa.uark.edu (http://osa.uark.edu/). The Office of Student Activities is responsible for the oversight and administration of the following areas:

Student Organizations
All student organizations must register annually with the Office of Student Activities. The Office of Student Activities provides student organizations with assistance and services to help them succeed. The office also assists student organizations in event planning, provides information on facility reservations and fundraising, trademark forms, mailboxes, and locker space, and offers educational workshops for students and advisers. A limited number of offices are also awarded annually in the Arkansas Union to organizations. In partnership with SOOIE, the Student Organization Outreach and Involvement Experience, fall and spring involvement fairs are offered to help registered student organizations connect with interested students.

Types of registered student organizations (RSOs):

• Governing – An organization whose primary purpose is to serve as a governing body for a large or specific constituency of students.
• Honorary/Service – An organization that requires a minimum grade point average as a prerequisite to membership and/or is affiliated with a national service or honorary organization.
• International/Cultural – An organization whose primary purpose is to provide a forum in which participants create awareness for a specific culture through educational, social, and recreational activities.
• Professional – An organization whose primary purpose is to provide a forum for participants to discuss and develop professional careers and/or is affiliated with a national or regional association.
• Religious – An organization whose primary purpose is to provide information and activities associated with one or more religions.
• **Special Interest** – An organization whose primary purpose is to provide an organized format for the practice and/or pursuit of a special or common interest.

• **Greek organizations** are also RSOs, but register through the Greek Life Office. These are organizations with Greek letters that are members of the National Interfraternity Council, the Panhellenic Council, National Pan-Hellenic Council, or the United Greek Council.

**Student Government**

As a result of a student-led process that saw the passage of both legislation and a student referendum, student governance at the University of Arkansas is now organized under the Associated Students Supreme Constitution into two, co-equal governing bodies: the Associated Student Government and the Graduate and Professional Student Congress. Both bodies are a part of the practice of shared governance at the university.

The Associated Student Government and is an undergraduate student-led organization that enables its members to have an active voice in the decisions and policy that directly affect undergraduate students at the university. Students involved in Associated Student Government have the opportunity to positively impact the quality of student life, work with and allocate student fees, provide a voice for student concerns as well as oversee programs and policies for undergraduate students. Through the executive, legislative, and judicial branches of student government students have the opportunity to work for and among their peers to make a difference on all levels of the university. Involvement levels and time commitment vary upon duties. Visit the ASG website at asg.uark.edu (http://asg.uark.edu/) or the ASG office (Arkansas Union A669) to find out more.

As its name indicates, the Graduate and Professional Student Congress serves students who have earned a baccalaureate degree and are completing coursework for graduate certificates or degrees as well as professional practice doctoral programs. The congress works to advocate for the collective welfare of its constituents, manage and distribute student fee monies, represent the common interests of its constituents, and to speak with one voice the opinions of its members. Through its executive and legislative branches, the congress seeks to improve the lives, careers, and research of all graduate-professional students at the university. Involvement levels and time commitments vary upon duties. Visit the Graduate and Professional Student Congress website at gpsc.uark.edu (https://gpsc.uark.edu/) or the its office (Arkansas Union A647) to find out more.

**University Programs**

University Programs is a volunteer student organization responsible for planning and coordinating more than 100 events annually for the campus community. University Programs provides students with cultural and educational experiences, entertainment, and fun. Eight committees, all made up of students, select, schedule and produce events such as concerts, movies, lectures, fine arts performances, gallery exhibitions, and daytime programs. Being a part of University Programs gives the student committee members leadership training and real opportunities to gain practical planning experience. Supported by a student activity fee, University Programs events are free to students.

For further information, visit the University Programs website at up.uark.edu (http://up.uark.edu/).

**University Career Development Center**

The University Career Development Center (CDC) educates and empowers students to fulfill their career goals. All U of A students are welcome to take advantage of the center’s valuable resources:

**Career Advising:** Career Counselors in the CDC are available to assist students who may need help selecting a college major, seeking career information, researching or exploring careers, preparing for their job search, or considering graduate school.

**Career and Strength-Awareness Assessments:** The STRONG Interest Assessment, FOCUS 2 and TypeFocus are career assessments that can help students make career decisions based on their interests and values. StrengthsQuest is an assessment which helps individuals discover their talents and strengths. After discovering their talents, the Career Center assists students in learning how to use their talents to achieve academic, career, and personal success.

**Career Fairs:** In partnership with academic areas on campus, the CDC hosts a number of career fairs each year to provide opportunities for students to connect with employers and to learn more about companies and organizations. These connections could lead to valuable internships or full-time employment.

**Job Search Preparation:** The CDC offers resume critiques, interview skills training, mock interviews, networking opportunities, career presentations and several professional development events throughout the academic year to prepare students for internships, co-ops or full-time jobs.

**Cooperative Education Opportunities:** Cooperative Education is a program that enables students to gain professional work experience in paid, degree-related positions. Co-op students earn credit, a competitive wage and valuable “real world” work experience.

**Handshake:** Handshake is the ultimate job and internship search tool for current UA students and recent graduates. Apply for 4000+ jobs or internships, view career fairs and events, schedule career advising appointments, and research companies all through Handshake.

**Online Resources:** Through the CDC’s website, students have access to a multitude of resources including Optimal Resume which contains hundreds of resume templates, cover letter examples, and interview questions for students to practice and enhance their interviewing skills. Students can also view 1000+ CandidCareer short videos featuring various careers and advice from professionals in the field or view our “What Can I Do With This Major?” pages featuring common careers and helpful job search sites for each UA major. These are just a few of the many resources which can be found at career.uark.edu.

**Career Track Razorbacks (formerly Professional Development Institute):** This nationally recognized program creates opportunities for UA students to develop professional career-building skills. Participation in this program can help students gain the valuable skills which give them the competitive advantage in their job or graduate school search.

For more information, check out career.uark.edu (http://career.uark.edu/).

The University Career Development Center is conveniently located in Arkansas Union Room 607, or call 479-575-2805.
Student Health and Wellness Center
Pat Walker Health Center supports students along their academic journey by providing access to professional and quality medical care, mental health care, wellness, health promotion and education.

As a department of the Division of Student Affairs, the health center strives to enrich academic and personal development by creating an inclusive environment that promotes positive behavior and healthy lifestyle changes.

Students are strongly encouraged to maintain health insurance coverage. A university-sponsored student health insurance policy is available to all students, student spouses and dependent children. Enrollment and cost information can be found at health.uark.edu (https://health.uark.edu/billing-insurance/insurance.php).

While the health center offers a variety of free programs and services, there are some charges associated for medical office visits and procedures, as well as individual counseling/psychiatry sessions. Medical services can be billed to insurance. For more information about health center billing and charges, go to the Insurance Billing page (http://health.uark.edu/billing-insurance/).

Medical Care
Pat Walker Health Center offers high-quality and affordable medical care through its signature clinics and programs. All medical services are performed by board-certified physicians and advanced practice registered nurses. Appointments can be scheduled online via the Patient Portal at myhealth.uark.edu, or by calling 479-575-4451.

- **Primary Care Clinic** offers illness and injury diagnosis and treatment, laboratory services, minor surgery, nurse triage, nutrition consultations, orthopedic consultations and X-ray.
- **Allergy, Immunization and Travel Clinic** offers allergy desensitization, immunizations, international travel consultations and tuberculosis screenings.
- **Women’s Clinic** provides comprehensive gynecological services with sensitivity to the unique needs of female clients.

Mental Health
Counseling and Psychological Services (CAPS) helps students navigate the pressures of college life and beyond with various evidence-based mental health services and programs. CAPS is staffed with licensed psychologists, counselors and social workers who work to help address common mental health issues and concerns that impact student success, such as anxiety, depression and stress.

CAPS offers services such as individual counseling, group counseling, psychiatry, emergency services, and case management. Although some services, such as ongoing individual counseling and psychiatry have minimal charges, most CAPS services and resources are offered at no charge beyond the student health fee. To learn more about CAPS services and programs, go to http://health.uark.edu/mental-health/.

24-hour emergency mental health services are available for all students.

To access CAPS services or 24-hour emergency services, call 479-575-5276.

Wellness and Health Promotion
Pat Walker Health Center’s Department of Wellness and Health Promotion inspires, motivates and supports student wellness and holistic health through a variety of academic courses, outreach presentations and events, peer education, training and wellness coaching.

The health center cultivates a campus culture of wellness through programming and services related to positive psychology and resilience, substance abuse prevention, sexual assault risk reduction, personal empowerment and lifestyle behavior change.

Employing a comprehensive holistic approach, Wellness and Health Promotion helps students maximize their personal and academic potential across eight essential dimensions of health and well-being – physical, intellectual, emotional, social, spiritual, occupational, environmental and financial.

Learn more about free Wellness services at health.uark.edu/wellness-health (http://health.uark.edu/wellness-health/).

Accreditation
Pat Walker Health Center is accredited by Accreditation Association for Ambulatory Health Care.

CAPS is accredited by the International Association of Counseling Services.

The health center is located at 525 N. Garland Ave. If you have questions about specific services, call 479-575-4451; TTY 479-575-4124. Visit us online at health.uark.edu (http://health.uark.edu/).

Housing and Dining
University Housing
University Housing is committed to providing a safe, comfortable, convenient, and reasonably priced living and learning environment that promotes student success.

Success on Campus
National research shows that academic success in the first year and beyond is directly linked to residing in an on-campus residence environment. The University of Arkansas recognizes the benefits that students receive from living on campus their first year.

Freshman Residency Requirement
All single students who are admitted to the university with a freshman classification and under 21 years of age are required to live on campus in a residence hall, or in their parent or legal guardian’s permanent home.

Students who are admitted to the University of Arkansas as transfer students from another post-secondary institution, and who have completed at least 24 credit hours at that institution are not required to live on campus.

Requests for a newly admitted freshmen to live somewhere other than with parents or a legal guardian in their permanent home will not be approved under most circumstances.

Students planning to live with their parents or legal guardian in their permanent home should complete the Living with Parent Notification form prior to attending an orientation session.
Students requesting an exemption from the University of Arkansas Freshmen Residency Requirement (http://housing.uark.edu/ Freshman_Residency_Requirement.php) should send all required paperwork to University Housing at least three weeks prior to attending an orientation session. This ensures the student receives approval or denial prior to attending orientation.

Failure to do so could cause long delays in the orientation process. Students who need a Living with Parent Notification Form or who wish to apply for an exemption to the university’s requirement for single freshmen to live on campus may refer to the information on the Housing website (http://housing.uark.edu/Contracting/contracts.php), call University Housing at 479-575-3951 or email housing@uark.edu.

**Residence Hall Leadership**

Residence Halls are managed by a full-time coordinator for residence education, or CRE, who has completed a master’s degree program in higher education, counseling or a related degree. This individual is selected for his or her academic credentials and interest in helping others as well as his or her ability to work well with college students.

In addition, every area or floor is staffed by a resident assistant, or RA, who is an upper-class student with the knowledge to answer students’ questions and help students find their own answers.

Counselors in residence (doctoral graduate assistants) provide short-term counseling for students living in the residence halls in response to personal, social, academic, and developmental needs.

**Living Learning Communities**

University Housing offers several innovative Living Learning Communities (http://housing.uark.edu/Residence_Education/Living_Learning/), or LLCs, for students. These communities enhance student’s academic success.

In an LLC, students get to live with peers who have similar interests, majors, or career plans. Living Learning Communities do not cost extra. LLC members have the opportunity to participate in fun experiences that connect learning in and out of the classroom.

Some of the initiatives include faculty-led events, major specific academic learning teams, more general thematic learning communities and other programs that assist students in their academic endeavors.

**Living Facility Options**

Living options include traditional halls, suites and apartments with designations of single-gender or co-ed. Rooms are available for visually or hearing-impaired students as well as those who are physically challenged (http://housing.uark.edu/disability-accommodation.php).

Residence hall entry/exit doors are secured and/or monitored 24 hours a day. Some entries are unlocked to accommodate offices housed in our facilities and classes that are held in our classrooms. Most, but not all, of these areas have interior doors that secure the living floors.

Residents are provided access via an electronic access system. Students should be careful not to allow non-residents to follow them into their residence hall. Residents are provided access via a fob issued when they check-in. Students are responsible for escorting all visitors and guests at all times.

**Campus Dining**

Each of the three separate dining facilities (http://housing.uark.edu/ campus_communities/dining_rates.php) on campus is managed by Campus Dining Services and provides a natural setting for socializing with friends and enjoying a wide variety of high quality, nutritious meals. All students living in a residence hall, except those residing in summer school housing, are required to have a meal plan. There are several meal plans available to meet the needs of both on-campus and off-campus students.

Learn more about Campus Dining Services online at campus dining services (http://dineoncampus.com/razorbacks/).

**Inclusion and Leadership Center for Multicultural and Diversity Education**

The Center for Multicultural and Diversity Education provides academic, cultural and social programs intended to promote inclusiveness, foster achievement and assist in the development and advancement of a diverse student body.

The center is located on the fourth floor of the Arkansas Union in Room 404, and can be contacted at 479-575-8405 or by visiting multicultural.uark.edu (http://multicultural.uark.edu).

**Student Support Services**

The department of Student Support Services is designed to provide a powerful combination of programs and services to students who are first-generation, and/or modest-income, and/or individuals with disabilities. The services provided by Student Support Services place an emphasis on individual assessment, counseling, advising, and skill building. Some of these services include: academic/financial/personal counseling, financial scholarships, social etiquette instruction, career and graduate school preparation, academic/cultural enrichment, assistance with tutoring, and mentorship. The overarching goal of the University of Arkansas Student Support Services program is to empower students, assist them in achieving academic excellence, and seeing them through to graduation.

Student Support Services is a department in the Division of Student Affairs. The office is located on the Garden Level of Gregson Hall. For more details, call Student Support Services at 479-575-3546 or visit the Student Support Services website (http://sss.uark.edu/).

**Talent Search**

Talent Search is an early intervention/educational opportunity program. Serving students in grades 6-12, the program promotes skills and disseminates information necessary for successfully entering college and completing a baccalaureate degree. Emphasizing personal/career development, financial literacy, technological/academic skills, and ACT readiness through a developmental curriculum of college preparatory workshops, students are prepared for the rigors of higher education.

Campus visits, academic monitoring/advising, and guidance in the completion of college and financial aid applications are key components for participants and their families. Summer enrichment and campus-based events are also hosted as funding permits.

Talent Search is a federal TRIO program funded by the U.S. Department of Education. The University of Arkansas has three Talent Search grant projects which serve distinct target areas in Benton, Carroll, Crawford, Sebastian and Washington counties in Arkansas, and McDonald County, Missouri. At least two-thirds of students served by the programs must be low-income and in the first generation of their family to attend college.
They exhibit academic potential and attend one of the 37 target schools served. For additional information and a full listing of target schools, visit the Talent Search website (http://talentsearch.uark.edu/).

The Talent Search Programs office is located at the university’s Uptown Campus East, 1083 E. Sain Street, UPTE 128, Fayetteville, Arkansas. Call 479-575-3553 for more information.

**Upward Bound**

**Upward Bound and Upward Bound Math and Science**

Upward Bound (http://ub.uark.edu/) and Upward Bound Math and Science are early intervention programs that help low-income and potential first-generation college students prepare for higher education. These programs bring high school students in grades 9 – 12 to the University of Arkansas campus on weekends and during the summer to receive instruction in mathematics, laboratory sciences, composition, literature, and foreign languages. The programs also provide academic and social support through tutoring, counseling, mentoring, cultural enrichment, financial literacy, field trips, college planning, and financial aid assistance. For students just completing their senior year of high school, Upward Bound provides a summer residential bridge program that enables participants to earn up to six hours of college credit. Funding is provided through grants from the U.S. Department of Education.

**Veterans Upward Bound**

Veterans Upward Bound (http://vub.uark.edu/) is designed to identify and serve the unique needs of veterans who are low-income and potential first-generation college students, who have the academic potential and desire to enter and succeed in a program of higher education. Eligible veterans must have completed a minimum of 180 days of active duty in the military and hold any discharge other than dishonorable, or discharged because of a service connected disability, a member or a reserve component of the U.S. Armed Forces who served on active duty in support of a contingency operation on or after September 11, 2001. Services include Accuplacer testing, tutoring, guidance counseling, assistance in filing financial aid and VA benefit forms, academic/career advisement, test preparation for entrance exams, and courses in English, Spanish, math, science, and computer technology. Courses are offered days and evenings each semester. Funding is provided through a grant from the U.S. Department of Education. Call 479-575-2442 for more information.

The Upward Bound and Veterans Upward Bound offices are located at the university’s Uptown Campus West, 1001 E. Sain St., Fayetteville.

**Student Life**

**Reasonable Accommodations for Students with Disabilities**

The Center for Educational Access, 209 Arkansas Union, is the central campus resource for students who require reasonable accommodations in order to access the programs, services and activities offered through the University of Arkansas. The center’s staff work in partnership with the individual student to communicate and facilitate any accommodation needed to faculty and staff. Accommodation determination is based in part on medical or psychological documentation provided to the Center for Educational Access by the student. Students must meet with one of the center’s staff for an access plan meeting to discuss their needs and provide such documentation before any accommodations can be granted.

To register for services or for more information, contact the Center for Educational Access, University of Arkansas, 209 ARKU, Fayetteville, AR 72701, phone 479-575-3104 ; e-mail: ada@uark.edu; Web: Center for Educational Access (http://cea.uark.edu/) (online request for services available).

**Off-Campus Student Services**

**Off-Campus Student Services (OCSS)**

Off-Campus Student Services (formerly Off Campus Connections) provides friendly and helpful resources, services and programs for off-campus undergraduates. Off-campus students are defined as undergraduates not living in a residence hall, fraternity, or sorority house.

For information, visit the Off-Campus Student Services website (http://occ.uark.edu/), make an appointment with a staff member in Arkansas Union Room 632, email liliveoff@uark.edu, or call 479-575-7351.

OCSS emphasizes two major priorities:

- Freshman Commuter Programs

- Off-Campus Living Education and Services

The University of Arkansas has more than 16,000 undergraduates living off-campus. Some off-campus students live near the university while others commute from hours away. Some students take advantage of online classes or majors and seldom visit campus. It is important that students living off-campus feel as welcome at the university as students living on-campus. Ongoing communication with off-campus students is important, so they know how to be an active part of the campus community as their schedule and other commitments allow. Additional challenges are faced by off-campus students and they need support from those who understand the differences they face.

Freshman Commuters are first-time, full-time, degree-seeking students who live at home with a parent or guardian during their first year of college. Off-Campus Student Services reaches out to more than 500 freshman commuters each summer and fails to share campus and academic resources, to provide opportunities to meet other cohort members, and to share mentorship and connection opportunities.

Finding a place to live is a basic need for many students after their freshman year. To help meet the needs of those students looking for housing near campus, OCSS provides the official, searchable off-campus housing website: offcampushousing.uark.edu (https://offcampushousing.uark.edu). The website is free for student use, and properties on the site have an interest in student tenants. Off-Campus Living Fairs and educational resources are also offered on the site to prepare those who are planning to live on their own for the first time in their local community. Students can search for a roommate or someone to sublease when they plan to study abroad.

Off-Campus Meal Plans have proven important to student success. Meal plans of various prices have been designed to meet off-campus students’ needs for eating while on campus for class, work, or other activities. Meal plans are available for purchase through a link provided on the Off-Campus Student Services website (http://occ.uark.edu/). Around 4,000 meal plans are purchased each year by off-campus students. Having a meal plan encourages students to eat regular meals so they can better focus on academics. Meal plans are charged to a student’s account, so costs may be covered with scholarships, financial aid awards, or paid out with tuition payments.
A friendly and comfortable Commuter Lounge — with a refrigerator, microwave, television, study tables and office spaces — is located on the Sixth Floor West of the Arkansas Union. Timely tips and information about jobs, deadlines, campus, and community life are shared through a weekly electronic newsletter published and emailed to off-campus undergraduates throughout the fall and spring semesters.

Off-Campus Student Services’ desire is for each student living off-campus to feel an important part of the University of Arkansas, earn at least one degree, and have their name forever inscribed on the historic Senior Walk.

**Office of Student Standards and Conduct**

It is the vision of the Office of Student Standards and Conduct to foster a campus community that values citizenship, personal and civic responsibility, peer accountability, and care/concern for the university and surrounding communities.

The mission of the Office of Student Standards and Conduct (OSSC) is to create a safe and inclusive community by upholding the Code of Student Life, which promotes responsibility, accountability, and student learning through:

- Educational opportunities and outreach.
- The adjudication of Code of Student Life violations.
- Providing a consistent, fair, equitable, educational, student conduct process.
- The development of ethics and adherence to personal values.
- Education on the norms and values of the University of Arkansas.

Students who are interested in involvement with the All-University Conduct Board should contact the Director of OSSC at judicial@uark.edu.

The All-University Conduct Board comprises faculty, staff, and students and is responsible for the adjudication of cases of alleged student misconduct as outlined in the Code of Student Life. This board is an advanced leadership opportunity for students who would like to gain valuable experience working with faculty and staff on an impartial peer review board.

For more information regarding the Code of Student Life, please see the Student Handbook at handbook.uark.edu (http://handbook.uark.edu/).

The Office of Student Standards and Conduct is located in Pomfret B 110, phone 479-575-5170; Web: ethics.uark.edu (http://ethics.uark.edu/).

**Veteran Resource and Information Center**

The University of Arkansas Veterans Resource and Information Center contributes to the academic and professional success of current and prospective student veterans and their dependents by providing innovative resources and support; assisting with military educational benefits; and by serving as a central “Rally Point” for a seamless collaboration among various departments within the University of Arkansas, the U.S. Department of Veterans Affairs, and the diverse network of community partners supporting veterans.

Veterans and dependents of service members may be eligible to receive monthly educational assistance from the Veterans Administration while enrolled at the University of Arkansas. For more information, including GI Bill eligibility and scholarship opportunities, contact the Veterans Resource and Information Center at vric@uark.edu or 479-575-8742. Students may also visit the center at the Garland Center Shops, suites 115 and 116 or online at veteranscenter.uark.edu (http://veteranscenter.uark.edu/).

**Student Media**

The Office of Student Media administers and advises the official student media outlets of the university. These outlets are: the student newspaper, *The Arkansas Traveler*; the University of Arkansas yearbook, *The Razorback*; the student magazine, *The Hill*; the student television station, UATV; the student radio station, KXUA; and the student advertising agency, Main Hill Media. All provide a forum for student expression, entertainment, news and information of interest to the campus community. Other than a small professional support staff, these groups are entirely staffed by student employees and volunteers, including editors and station managers. For more information, contact Student Media at 479-575-3406.
Centers and Research Units

Research programs are the means by which the university contributes to the generation of knowledge as well as to the preservation and dissemination of it. With nationally recognized programs in many areas and funding from government, industry, and other private sources, the research effort of the university is strong and diversified and provides special learning opportunities for students as discoveries are made.

In addition to the extensive work performed by faculty through individual and team efforts in academic departments, special programs of research are conducted by the university divisions described below.

Graduate students are likely to be involved in research conducted by these research units, but the university encourages undergraduates as well to pursue research in their areas of academic interest. Students who wish to engage in research of any kind should seek the guidance of their advisers and professors to identify research teams and projects. In addition to the extensive work performed by faculty through individual and team efforts in academic departments, special programs of research are conducted by faculty members and staff in many associated university research centers. The university invites students to learn more about these centers and the research opportunities they offer by visiting the websites or by contacting the individuals listed below.

Arkansas Center for Space and Planetary Sciences

Larry Roe, director
Mechanical Engineering Building, 204D
479-575-3750
csaps@uark.edu

Arkansas Center for Space and Planetary Sciences website (http://spacecenter.uark.edu/)

The Arkansas Center for Space and Planetary Sciences is a research institute of the University of Arkansas, created by faculty from six departments, including Biological Sciences, Chemical Engineering, Chemistry and Biochemistry, Electrical Engineering, Geosciences, Mechanical Engineering, and Physics. Those departments, representing the J. William Fulbright College of Arts and Sciences and the College of Engineering, work closely with the Graduate School and the Honors College.

The center operates world-class research facilities and cutting-edge research projects. It houses the only university-based, large-scale planetary simulation chamber in the country along with major facilities for the analysis of extraterrestrial samples. Major research interests include the analysis of returned samples from space, the nature of Mars, and instrumentation for use in space. The center also operates a number of programs of interest to the university community, grade school teachers and students, and the public.

The space center administers master’s and doctoral degree programs in space and planetary science. These provide a unique integrative interdisciplinary education and research training based on a suite of core courses spread across the departments and specialist courses appropriate to the student’s specific interests. Professional development in communications, ethics and space policy is also included. Such training gives graduates a competitive edge in today's space and planetary job market.

Additionally, the Departments of Biological Sciences, Geosciences and Physics offer space and planetary science as an option in their own graduate programs. Admission procedures are outlined on the space center Web site along with detailed information about the programs, the research areas, and current research projects.

Arkansas High Performance Computing Center

Rick McMullen, director
479-575-6794

Arkansas High Performance Computing Center website (http://hpc.uark.edu)

The Arkansas High Performance Computing Center is a campuswide provider of supercomputing resources for teaching and research by students and faculty. For nearly a decade, the university has strongly supported high-performance computing as a tool for enabling scientific discovery and making researchers more productive. With support from the university, the National Science Foundation and the state of Arkansas, the center has fielded two Top500 supercomputers and currently offers 4,985 cores, 13.4TB of memory, about 73 TFLOPS CPU peak performance, 93TB of long-term storage, 374TB of scratch storage, and 96TB of backup storage making it among the largest and most capable academic systems in the world. Staff members of the Arkansas High Performance Computing Center support a broad range of research programs in computational condensed matter physics, computational chemistry, nanotechnology and materials science, bioinformatics, astrophysics, and geospatial image analysis. The center also provides education and training in computational science, parallel programming and high-performance computer operations to provide both tools and skills needed in computationally intensive research.

Arkansas Security Research and Education Insitute

Jia Di, director
523 J.B. Hunt Transport Services Center for Academic Excellence
479-575-5728

Co-directors: Chase Rainwater, Steve Ricke and Dale Thompson

The University of Arkansas is well-positioned to become a leader in the state and nation in contributing to the research for security solutions and the training of students to become future security workforce. The Arkansas Security Research and Education Institute covers four research thrusts of security: cyber, transportation, critical infrastructure, and food and water. Working closely with local industry, the institute initiates and facilitates multidisciplinary collaborations among departments and colleges, leveraging the research strengths in existing on-campus centers such as the Center for Information Security and Reliability, the Mack-Blackwell National Rural Transportation Center, the Center for Excellence in Logistics and Distribution, the National Center for Reliable Electric Power Transmission, and Center for Food Safety among others.

Arkansas Water Resources Center

Brian E. Haggard, director
479-575-4403
Brewer Family Entrepreneurship Hub, the Sustainability Consortium, the for the Sam M. Walton College of Business and world-class projects The development of blockchains will provide support and enhancement for practitioners and educators involved in the use of blockchain. One promising application of blockchain is in financial services, including fund transfers, insurance, and health care. Other applications include multinational supply chains. The Blockchain Center of Excellence develops educational materials and cognitive analytics, including financial services, interbank and intrabank transfers, insurance, and health care.

**Bessie Boehm Moore Center for Economic Education**
Rita Littrell, director
RCED 217
479-575-2855

The Bessie Boehm Moore Center for Economic Education, established in 1978 and located in the Walton College of Business, promotes an understanding of the American economy among the people of Arkansas. Its major efforts are directed to elementary and secondary school children. The center's faculty and staff hold workshops and seminars for public school teachers, conduct research in economic education, develop instructional materials, maintain a lending library, and sponsor adult economic educational programs for business, labor, industry, and the general community. In recent years, center personnel have been involved in educating teachers in transitional or developing economies about market economics. The center is officially certified by the Arkansas Council on Economic Education and the National Council on Economic Education.

**Blockchain Center of Excellence**
Paul Cronan and Rajiv Sabherwal, co-directors
Enterprise Systems, Walton College 204
479-575-4500
Email: cronan@uark.edu and rsabherwal@walton.uark.edu

The Blockchain Center of Excellence develops educational materials for practitioners and educators involved in the use of blockchain technologies. Blockchain technology offers a secure, verifiable way to maintain an encrypted accounting ledger of business transactions across multinational borders. This could significantly affect the way that businesses account for business transactions and track products in multinational supply chains. Other promising applications of blockchain and cognitive analytics include financial services, interbank and intrabank fund transfers, insurance, and health care.

The development of blockchains will provide support and enhancement for the Sam M. Walton College of Business and world-class projects and research centers such as the McMillion Innovation Studio, the Brewer Family Entrepreneurship Hub, the Sustainability Consortium, the Center for Retailing Excellence and the J.B. Hunt Innovation Center of Excellence.

**Center for Advanced Spatial Technologies**
Jackson Cothren, director
J.B. Hunt Center for Academic Excellence, Room 304
479-575-6159
info@cast.uark.edu

The Center for Advanced Spatial Technologies (CAST) focuses on application of geospatial technologies in research, teaching, and service. These technologies include geomatics, GIS, GPS, remote sensing, photogrammetry, geospatial software and systems design, interoperability, and large (multi-terabyte) geospatial databases.

Established in 1991, CAST is a unit of the J. William Fulbright College of Arts and Sciences. CAST has a campus-wide focus, working with the departments of anthropology; architecture; crop, soil, and environmental science; biology; bioengineering; civil and industrial engineering; geosciences; entomology; and landscape architecture. Other related partners include the Environmental Dynamics Program, the Arkansas Water Resources Center, Mullins Library, and the Arkansas Archeological Survey.

CAST has been selected as a Center of Excellence by many corporations, including the Intergraph Corporation, Trimble Navigation Inc., the Oracle Corporation, Definiens Imaging, Sun Microsystems, Spatial Acquis, and PCI Geomatics. These and other corporate sponsors have provided more than $22 million of in-kind support of the research teaching facilities of the center. The center has extensive hardware and software capabilities, including more than 100 high-performance workstations, multiple Linux, Windows XP and Solaris servers (combined seven terabyte of on-line disk), large-format plotters, mapping and survey-grade GPS, MSS instruments, spectroradiometers, terrestrial laser scanners, and an extensive inventory of software.

University of Arkansas undergraduate and graduate students have a wide range of geomatics courses available to them that utilize CAST faculties and laboratories. These courses, taken along with related courses in cartography, remote sensing, image interpretation, photogrammetry, surveying, and spatial statistics, provide the student with a range of career options. In addition to classroom instruction, CAST facilities are used by students in both undergraduate and graduate research projects. The internship program in Applied Spatial Information Technologies offers students an opportunity to gain hands-on experience in geospatial technologies.

CAST staff are engaged in research projects in a wide range of areas. A few recent research projects focused on areas such as the creation of a seamless, on-line spatial data warehouse; K-12 GIS education; soil survey by remote sensing; land-use/land-cover identification; remote sensing for historic resources; natural resources wetlands analyses; multi-sensor remote sensing for historic resources; and predicting red oak borer populations.

**Center for Advanced Surface Engineering**
Min Zou
Center for Communication and Media Research
Robert H. Wicks, director
KIMP 417
479-575-3046
rwick@uark.edu

Center for Communication and Media Research website (http://fulbright.uark.edu/departments/communication/center-for-communication-and-media-research/

The Center for Communication and Media Research (CCMR) advances knowledge and supports scholarly and applied inquiry into the study of interpersonal, group, organizational, and media communication. The center sponsors outreach programs designed to help under-served populations, educational institutions, media companies, businesses, and non-profit organizations.

Multidisciplinary in nature, the center facilitates scholarship among allied disciplines such as journalism, law, business, political science, psychology, sociology, and computer science. Research topics include communication and advertising, dispute resolution, education, environmental concerns, family, health, information technology, legal concerns, life stages, media audiences, organizational concerns, politics, and religion.

Center for Children and Youth
Chris Goering, director
PEAH 305
479-575-4209
cgoering@uark.edu

Center for Children and Youth website (http://cied.uark.edu/center-for-children-and-youth.php)

The Center for Children and Youth is designed to address issues of intellectual growth, social development, literacy, the arts, and techniques for addressing generational or regional poverty issues. This will be accomplished through teacher professional development, pre-service education, research, as well as curriculum development and dissemination. The center was established by a generous gift of the Windgate Family Foundation in 2006 to the College of Education and Health Professions.

In 2010, the Center for Children and Youth hosted a national conference in Springdale, Ark., focused on the confluence of literacy and the arts. The conference featured speakers from the Kennedy Center for Performing Arts, Temple University, the National Council of Teachers of English, and local experts on arts integration approaches to teaching. Later in 2010, Dr. Chris Goering in the Curriculum and Instruction Department was appointed as the center’s first director.

Center for Ethics in Journalism
Raymond McCaffrey
Director
479-575-2626
Email: mmccaff@uark.edu

Center for Ethics in Journalism website (https://journalismethics.uark.edu/)

The Center for Ethics in Journalism is an outreach program of the School of Journalism and Strategic Media at the University of Arkansas’ J. William Fulbright College of Arts and Sciences. The center fosters the study and practice of the journalistic principles of accuracy, fairness and service to the public in editorial/news; in broadcast, radio and television; and in advertising and public relations.
The University of Arkansas Center for Ethics in Journalism will play an integral role in shaping the future of journalism by educating students and professionals on the tenets of ethics, preparing them to employ those principles as a matter of course and teaching them to reach ethical decisions as routine and not exception.

**Center for Excellence in Engineering Logistics and Distribution**

Manuel D. Rossetti, director  
BELL 4164  
479-575-6756  

Center for Excellence in Logistics and Distribution website (http://celdi.org/)

The Center for Excellence in Logistics and Distribution (CELDi) is a multi-university, multidisciplinary, National Science Foundation sponsored Industry/University Cooperative Research Center located in the Department of Industrial Engineering. CELDi emerged in 2001 from The Logistics Institute (1994) to provide integrated solutions to logistics problems, through research related to modeling, analysis, and intelligent-systems technologies. Research endeavors are driven and sponsored by representatives from a broad range of member organizations, including manufacturing, maintenance, distribution, transportation, information technology, and consulting. Partner universities include the University of Missouri, Clemson University, Virginia Tech and University of California Berkeley. This partnership among academic institutions and industry represents the effective integration of private and public sectors to enhance a U.S. competitive edge in the global market place.

CELDi helps industry partners excel by leveraging their supply chain to achieve a distinguishable, sustainable difference. Member companies realize a measurable return on their investment by creating competitive value chains in terms of cost and service quality. Through basic research, collaborative applied research with industry, technology transfer, and education, CELDi is a catalyst for developing the engineering logistics methodology necessary for logistics value chain optimization.

**Center for Executive Education**

Blythe Eggleston, associate director for executive education  
WJW 549  
479-575-5871  
execed@walton.uark.edu

Center for Executive Education website (http://execed.uark.edu/)

The Center for Executive Education in the Sam M. Walton College of Business provides executive and middle management training opportunities designed to enhance quality in leadership, management decision making, and human resource skills and abilities for corporate and public clients. Programs are custom designed for individual clients. The center serves local, national, and multinational businesses. The center operates on a fee-for-service basis, and its activities are supported from fee-based revenues.

**Center for Grid-Connected Advanced Power Electronic Systems**

Alan Mantooth  
Executive Director  
1475 W. Cato Springs Road  
479-575-4985  
grapes@uark.edu

The mission of this Center for Grid-Connected Advanced Power Electronic Systems is to accelerate the adoption and insertion of power electronics into the electric grid in order to improve system stability, flexibility, robustness, and economy. The members of the center expect to accomplish that mission by focusing on the following main objectives:

- Develop new technologies for advanced power electronic systems in the areas supporting grid connected distributed energy resources, power steering and routing devices, and intelligent load-side devices.
- Develop the software and tools for controlling embedded- and grid-connected power electronics to benefit the grid as well as controlled loads.
- Educate engineers who understand the power electronic technologies important to the member companies.

**Center for Information Security and Reliability**

Brajendra Panda, director  
JBHT 504  
479-575-2067  
bpanda@uark.edu

Center for Information Security and Reliability website (http://isr.csce.uark.edu/)

The center was established to promote education and research in the field of computer security and information assurance at University of Arkansas. The activities of this center includes, but not limited to the following: fostering multidisciplinary research, securing large-scale funding from federal, state, and other funding agencies, providing education and training to future work-force, increasing awareness in the field of information security and reliability by offering appropriate seminars and workshops.

**Center for Interdisciplinary Study of Science and the Arts**

Elizabeth Hellmuth Margulis, co-director  
ehm@uark.edu, 479-575-5763  
Padma Viswanathan, co-director  
pviswana@uark.edu

The Center for Interdisciplinary Study of Science and the Arts seeks to advance cohesion in campuswide research and teaching that integrates science and the arts. The center will facilitate collaboration, provide an outlet for the dissemination of interdisciplinary work at the University of Arkansas, incubate ideas that introduce students to interdisciplinary modes of thinking, lend a unique identity to arts programs at the
university, help attract top students whose interests often bridge science and the arts, and build on an existing strength on campus.

**Center for Mathematics and Science Education**

Lynne Hehr, director
346 N. West Avenue, No. 102
479-575-3875

Center for Mathematics and Science Education website (http://cmase.uark.edu)

The Center for Mathematics and Science Education – a University of Arkansas K-16 education outreach facility within the College of Education and Health Professions – works in conjunction with the Arkansas Department of Higher Education as part of a network of twelve mathematics and science centers on university and college campuses around Arkansas. The main objectives of the center are to:

1. Provide science, mathematics and technology professional development for K-16 pre-service and in-service teachers;
2. Assist in statewide K-16 education initiatives;
3. Coordinate regionally beneficial grant-funded programs among universities and colleges for K-16 education;
4. Provide science, mathematics and technology educational materials, resources, and information to the K-16 community; and
5. Link common K-16 education allies throughout the state.

University Day, Science/Engineering Fairs, Springfest, and various K-16 teacher and student programs are conducted through the center. Day-to-day educational outreach information is sent to local, regional, and statewide constituencies through the center’s website and various email listservs. The Center for Mathematics and Science Education is a host site for the federally sponsored Eisenhower National Clearinghouse and the Southwest Educational Development Laboratory Consortium. The center also serves as the Arkansas National Aeronautics and Space Administration Educator Resource Center, responsible for warehousing and disseminating NASA materials and providing regular updates on NASA programs and materials to the state.

Web pages specifically designed to provide a wealth of material resources and information available for public, private and home-school educators across the state can be accessed at the website.

**Center for Power Optimization and Electro-Thermal Systems**

The Center for Power Optimization and Electro-Thermal Systems is an engineering research center run by the University of Arkansas, the University of Illinois at Urbana Champaign, Stanford University and Howard University. These four universities include a multidisciplinary team that will create new paradigms for power flow in complex systems.

The center's long-term goal is to increase the power density of current mobile electrified systems by 10-100 times over current state-of-the-art systems. While ambitious, this would have a profound impact on a mobile electrified infrastructure of the United States and beyond. On-highway vehicles could save between 100-300 million liters of fuel per year and could nearly double the range of all-electric vehicles. Off-highway vehicles could save on the order of 100 billion liters of fuel since their electrification is starting from a less mature point than current on-highway vehicles.

Similarly, aircraft could see 10-30 billion liters of fuel saved as well as prevention of up to 10 million tons of carbon dioxide from going into the high altitude atmosphere.

These economic and environmental impacts are just the beginning of the art of the possible with the achievement of the center's vision. This center is a multi-disciplinary center involving several fields of study including mechanical engineering, electrical engineering and physics. The center functions under the assumption that a single discipline could not achieve the goals set by this team and must integrate multiple disciplines and domains to achieve such success.

**Center for Protein Structure and Function**

Frank Millett and Roger Koepppe, co-directors
CHEM 119
479-575-4601

Center for Protein Structure and Function Website (http://fulbright.uark.edu/departments/chemistry/research/center-for-protein-and-structure/)

The Center for Protein Structure and Function is an interdisciplinary unit for research and teaching within the departments of chemistry/biochemistry and biological sciences in the J. William Fulbright College of Arts and Sciences. The center raises funds from federal, state, and private sources and sponsors faculty- and student-initiated basic research on the folded structures of protein molecules, their dynamic properties, and their diverse functions in biological systems. The center has been awarded funding from the National Science Foundation, the Arkansas Science and Technology Authority, and the National Institutes of Health.

**Center for Retailing Excellence**

Jessica Salmon
Director
jsalmon@walton.uark.edu

Center for Retailing Excellence Website (https://cre.uark.edu/)

The Center for Retailing Excellence is shaping the future of commerce by inspiring and developing students and business leaders to be catalysts of innovation. The center integrates innovative experiences into a students’ learning journey by partnering with commerce companies to accelerate real-world application and create the next generation of innovators.

**Center for Social Research**

Casey Harris, co-director
Patricia Herzog, co-director

Center for Social Research Website (https://www.ua-csr.org/)

Since 1982 the Center for Social Research has provided research services to government agencies, communities and businesses. Located in the Department of Sociology, the center can conduct survey and public opinion research, impact assessment, evaluation and policy assessment. The center’s staff can provide assistance with research methodology and design, sampling, data collection and analysis.

The center’s professional staff has vast experience in virtually every aspect of social research. In addition, the center’s resources include computer-assisted telephone interviewing facilities; extensive archival data holdings, including online access to the archival holdings of the Inter-
University Consortium for Political and Social Research at the University of Michigan; and, in-house statistical analysis.

**Center for Statistical Research and Consulting**

Joon Jin Song, director  
SCEN 309B  
479-575-6319  
csrc@uark.edu

The Center for Statistical Research and Consulting is a service and research unit of the University of Arkansas, administratively housed in Department of Mathematical Sciences, providing faculty and graduate students in the university with an environment for collaboration in research and instruction emphasizing statistical and quantitative approaches. It offers statistical consulting and statistical software support to faculty, staff, graduate and undergraduate students conducting research at the university. The center will extend this statistical support to the state of Arkansas, directly providing some consulting services but primarily acting as a conduit for industry, government, and non-profit organizations to engage campus faculty and graduate students in consulting opportunities. The community support activities from the center will stimulate and enhance campus research and instructional efforts as well as provide important services to organizations throughout the region.

The mission of the Center for Statistical Research and Consulting is to participate in research to provide high quality statistical input to high quality research projects, train statisticians to interact effectively with investigators from other disciplines, and encourage collaborative research between statisticians and investigators from other disciplines.

The center is a fee-for-service unit. The initial consulting meeting with a client is provided at no cost. All subsequent and follow-up visits will require financial support.

**Center for Utilization of Rehabilitation Resources for Education, Networking, Training and Services**

Robin Freeman, director  
121 Cedar St.  
Hot Springs, AR 71901  
501-623-7700

CURRENTS website ([http://www.uacurrents.org/](http://www.uacurrents.org/))

Established in 1974, this center provides human resource and organization development services for a broad audience in the rehabilitation and disability communities. Projects managed by CURRENTS vary in scope from state and local to regional and national levels. The center is housed on the campus of the Arkansas School for Mathematics, Sciences and the Arts, Hot Springs, Arkansas.

**Center of Excellence for Poultry Science**

Michael Kidd, director  
POSC 114

Center of Excellence for Poultry Science website ([https://poultry-science.uark.edu/poultry-science-research.php](https://poultry-science.uark.edu/poultry-science-research.php))

With designation by the University of Arkansas Board of Trustees to make poultry science a center of excellence in the state’s university system, the department of poultry science became a reality in 1992.

The Center of Excellence for Poultry Science is comprised of full-time poultry science faculty members, full-time USDA/ARS Poultry Research Group faculty members, graduate assistants, adjunct faculty, and poultry science departmental staff. The center receives multidisciplinary contributions from several university departments including animal science; biological and agricultural engineering; biological sciences; crop, soil, and environmental sciences; entomology; food science; industrial engineering; the School of Human and Environmental Sciences; and the UALR College of Pharmacy.

The Department of Poultry Science and the research group are housed in the John W. Tyson Building, which is a 112,000-square-foot, state-of-the-art laboratory and office complex that was completed the fall of 1995 on the U of A campus. In addition to the John W. Tyson Building on the main campus, the Center of Excellence for Poultry Science comprises the following facilities:

- FDA-licensed feed mill;
- 10,000-square-foot processing plant used for teaching processing techniques and for ongoing food safety research projects;
- 12,000-square-foot John Kirkpatrick Skeeles Poultry Health Laboratory, which holds the highest bio-safety rating (P3) available in the country;
- A poultry research farm facility including hatchery, genetics unit, pullet-rearing facility, battery brooder, caged layer house, broiler breeder houses and turkey houses;
- Four full-sized broiler houses equipped with computerized environmental control and data collection systems capable of commercial-type production research; and
- A broiler breeder research facility that includes two full-size broiler breeder houses, a pullet-rearing facility, and quality assurance building with offices, classroom, and egg holding capacity.

**Chemical Hazards Research Center**

Jerry Havens, director  
BELL 3157  
479-575-3857  
jhavens@uark.edu

Chemical Hazards Research Center website ([http://www.cheg.uark.edu/4444.php/](http://www.cheg.uark.edu/4444.php/))

The Chemical Hazards Research Center determines the consequences of atmospheric release of potentially hazardous materials with a present emphasis on liquefied natural gas in transportation and storage operations. Computational models are used in conjunction with the wind tunnel at the center, which is presently the largest low-speed wind tunnel suited for such studies.

**Community and Family Institute**

Kevin Fitzpatrick, director
Community and Family Institute Website (https://fulbright.uark.edu/departments/sociology/research-centers/community-family-institute/)

The Community and Family Institute is a joint effort of the University of Arkansas and the Harvey and Bernice Jones Center for Families in Springdale, Arkansas. The institute is a multidisciplinary research center in the J. William Fulbright College of Arts and Sciences that conducts basic and applied research, as well as policy-related studies on the critical issues facing families and communities in the region and the nation. The institute raises funds from federal, state, and private sources and sponsors applied research by faculty and students on the family and the community.

Community Design Center
Stephen Luoni, director
1 East Center Street, Suite 220
Fayetteville, AR 72701
sluoni@uark.edu

U of A Community Design Center Website (http://uacdc.uark.edu/)

The mission of the University of Arkansas Community Design Center is to advance creative development in Arkansas through education, research, and design solutions that enhance the physical environment. As an outreach center of the Fay Jones School of Architecture and Design, the Community Design Center is developing a repertoire of new design methodologies applicable to community development issues in Arkansas, with currency at the national level. The center's design solutions introduce a multiple bottom line, integrating social and environmental measures into economic development. Integrative design solutions add long-term value and offer collateral benefits related to sustained economic capacity, enhanced ecologies, and improved public health. The design center also offers hands-on civic design experience to students who work under the direction of design professionals. The University of Arkansas Community Design Center was founded in 1995 and has provided design and planning services to more than 30 communities across Arkansas. The design center's planning has helped Arkansas communities and organizations to secure nearly $62 million in grant funding to enact suggested improvements.

Cybersecurity Center on Secure, Evolvable Energy Delivery Systems
Alan Mantooth
Director
Bell Engineering 3175
479-575-7962
mantooth@uark.edu

Shannon Davis
Managing Director
CSRC 232
479-575-6877
sgdavis@uark.edu

The Cybersecurity Center on Secure, Evolvable Energy Delivery Systems researches and develops innovative cybersecurity technologies, tools and methodologies to advance the energy sector's ability to survive cyber attacks and incidents while sustaining critical functions. The center verifies and validates efficacy of the developed solutions and methodologies for transition to practice and commercialization in the energy sector. These solutions and methodologies will enhance the resilience of energy delivery infrastructure, which includes the electricity sub-sector and the oil and natural gas sub-sector.

The specific technical areas of research and development will focus on five areas:

- Secure grid control and operations.
- Secure emerging power grid components and services.
- Secure energy delivery system operation technology infrastructure.
- Cybersecurity management and visualization.
- Cybersecurity testing and validation.

David and Barbara Pryor Center for Arkansas Oral and Visual History
Randy Dixon, director
East Square Plaza
1 East Center Street, Suite 216
479-575-6829

Pryor Center website (http://pryorcenter.uark.edu/)

The mission of the Pryor Center for Arkansas Oral and Visual History is to document Arkansas’ rich history by collecting the “living memories” of those who have been witness to various aspects of the state’s past. Using traditional oral history methodology, the center interviews individuals, transcribes those interviews, and maintains those collections for future generations. The center is responsible for preserving these memories and making them available to scholars and researchers interested in the culture and heritage of Arkansas. The center is located in East Square Plaza on the east side of the Fayetteville Square; to contact the center, call 479-575-6829, or visit the website.

Diane D. Blair Center of Southern Politics and Society
Angie Maxwell, director
MAIN 506-A
479-575-3356

Blair Center website (https://blaircenter.uark.edu/)

The Blair Center, located in the Department of Political Science, is dedicated to fostering political scholarship, public service, civic consciousness, and the study of Southern politics, history and culture. The center supports graduate students studying topics relevant to the South and hosts conferences and periodic speakers discussing issues relevant to Southern politics and society.

Exercise Science Research Center
HPER 321
479-575-6762
exercise@uark.edu
exercisescience.uark.edu (http://exercisescience.uark.edu)
The Exercise Science Research Center is a student-centered facility with a unique dual purpose that includes research and educational components. Faculty from the kinesiology and exercise science programs coordinate research efforts of the center, which initiates and conducts research focused on health, exercise and physical performance. The center also provides education outreach programs for targeted groups with an emphasis on collaborative and cooperative programs with agencies in Arkansas and the region. The center also provides educational experiences for undergraduate and graduate students in the exercise science and kinesiology programs.

**Garrison Financial Institute**

Wayne Lee, executive director  
RCED 205  
479-575-4505  
Garrison Financial Institute website ([http://gfi.uark.edu](http://gfi.uark.edu))

The Garrison Financial Institute is an institute organized within the Sam M. Walton College of Business to advance financial education and knowledge through practice. Its mission is to enhance student learning through experience, foster research that extends and perfects best practices, and contribute to the economic development of the State of Arkansas and the welfare of its citizens. The center was founded in 2005.

**Garvan Woodland Gardens**

Bob Byers, garden director  
550 Arkridge Road, PO Box 22240  
Hot Springs National Park, AR 71913  
1-800-366-4664  
gardeninfo@garvangardens.org  

Garvan Woodland Gardens is the botanical garden of the University of Arkansas, established in 1993 by an endowment from Mrs. Verna C. Garvan. Her vision is the foundation of the Garden’s mission to serve the public and provide teaching and research opportunities for the Department of Landscape Architecture and the Fay Jones School of Architecture and Design.

As early as 1985, the Department of Landscape Architecture was utilizing portions of the 210 acres on Lake Hamilton, in Hot Springs, AR, as a resource to teach local ecology and design principles. Teaching opportunities continue in these areas and currently feature urban forestry, wetland ecology, construction methods and materials, design implementation, and horticulture. Numerous designed features offer case studies for landscape architecture and architecture students as well as professionals, including the Asiatic Garden by David Slawson, a nationally recognized Japanese garden designer, and the Verna C. Garvan Pavilion, by internationally recognized architects Fay Jones and Maurice Jennings.

Research opportunities lie in wetland ecology and constructed wetland design, sustainable design, and therapeutic gardens. Ongoing public programs feature workshops on gardening techniques, bonsai collections, and perennials.

An annual symposium focuses on timely issues affecting the quality of life of people in Arkansas and the nation. Past topics include historic landscape preservation practice in Arkansas and sustainable golf course design.

Garvan Woodland Gardens is a member of the American Association of Botanical Gardens and Arboreta.

**High Density Electronics Center**

Simon Ang, director  
HiDEC/ENRC 700  
479-575-4627  
HiDEC website ([http://www.hidec.uark.edu/](http://www.hidec.uark.edu/))

The High Density Electronics Center (HiDEC) was established in 1991 as an interdisciplinary research program in advanced electronic packaging technologies, particularly the rapidly developing technology of multichip modules (MCMs), which allow electronic systems to be small, fast, and cheap.

With generous support from the Defense Advanced Research Projects Agency (DARPA), a large clean room was constructed, and an MCM fabrication facility, unique among universities, was installed. Current research programs focus on 3-D electronic packaging, high density laminate substrates, co-fired ceramic substrates for wireless applications, high temperature superconducting (HTSC) tunable filters, micro electromechanical systems (MEMS), and integrated passives development. The program is located in the Department of Electrical Engineering but involves faculty from six departments and more than 25 graduate students. Continuing funding comes from DARPA and several industrial sponsors. Significant national recognition has resulted from work performed at HiDEC.

HiDEC also houses the Center of Excellence for Nano-, Micro-, and Neuro-Electronics, Sensors and Systems (CENNESS).

**Inclusion, Diversity, Equity, Leadership, and Strategy Institute**

Yvette Murphy-Erby  
Vice Provost for Diversity and Inclusion  
Administration Building 415A  
479-575-3338  
Office of Diversity and Inclusion website ([https://diversity.uark.edu/](https://diversity.uark.edu/))

The mission of the IDEALS Institute is twofold:

- To undertake cutting-edge research on issues of diversity and inclusion and be a research-hub of expertise, leadership, and support for equity, inclusion, and other dimension of diversity.
- To develop and deliver a comprehensive array of educational and training components (courses, workshops, online seminars, etc.) about diversity and inclusion that will provide knowledge, skills, and tools for stakeholders to create and sustain change in their organizations.

Such change will foster a more creative, inclusive, respectful, and productive workforce and workplace and contribute to the type of climate and culture that will yield enriched learning experiences that foster academic and workforce success for all.

**Information Technology Research Institute**

Eric Bradford, managing director  
JPHT 409
Institute of Food Science and Engineering

Jean-Francois Meullenet, director
Food Science Building
2650 N. Young Ave., Fayetteville, AR 72704
479-575-4040

Institute of Food Science and Engineering website (http://www.uark.edu/depts/ifse/)

The Institute of Food Science and Engineering and its three technology centers grew from the commitment of the University of Arkansas Division of Agriculture to finding creative ways to bring its expertise and resources to bear on specific problems and issues that affect productivity and growth in the food processing industry, with the mission of strengthening that critical component of the agricultural sector and the entire economy.

The institute assists industry by fostering cooperative, multidisciplinary efforts that provide research to solve problems, technology transfer to put new information to work, and education in skills needed by specific industries. Alliances between the institute and private industry devise solutions to identified problems. This demand-driven approach assures a direct, positive impact on the value-added processing of food products.

The Center for Food Processing and Engineering’s primary objective is to facilitate research leading to value-added products and improving the efficiency and effectiveness of the processing of agricultural products. Activities of the Center for Food Safety and Quality seek to maintain or improve the safety of foods through production, harvest, processing, distribution, and storage. The main thrust of the Center for Human Nutrition is to develop new value-added functional foods with elevated levels of health-promoting compounds and ways to motivate people to include generous amounts of these foods in their daily diets. These efforts will assure food safety and improve the sensory and nutritional quality of food to meet the nutritional requirements and food preferences of a changing society.

The offices of the Institute of Food Science and Engineering are located in the Food Science Building at the Arkansas Agricultural Research and Extension Center.

International Center for the Study of Early Asian and Middle Eastern Musics

Rembrant Wolpert, director
MUSC 201
479-575-4701
ceam@cavern.uark.edu

International Center for the Study of Early Asian and Middle Eastern Musics website (http://www.uark.edu/ua/eeam/)

The International Center for the Study of Early Asian and Middle Eastern Musics, established in 2000, is a research center located in the Department of Music in the J. William Fulbright College of Arts and Sciences.

The center coordinates the international Tang Music Project and is linked with the Ancient Asian Music Preservation Project of the Library of Congress, a partnership that includes internships at the Library as well as an acquisitions program. The center also functions as the base...
for graduate training in historical ethnomusicology and related fields, specifically tailored toward early documented repertories of ritual- and art-music and present day performance practices in historically significant musical traditions of Asia and the Middle East. The recovery of early Asian musics and the design of music-centered algorithms and their implementation in computer programs are central aspects of the center’s research and teaching activities. The center works closely with both the Department of Music and the King Fahd Center for Middle East and Islamic Studies in sponsoring lectures, seminars, concerts, and workshops, and it collaborates in developing international ties to other institutions and in promoting student and performing-artist exchanges. For more information, contact Elizabeth Markham or Rembrandt Wolpert at 479-575-4702.

**King Fahd Center for Middle East Studies**

Todd Shields, interim director

MAIN 202
479-575-2175

King Fahd Center for Middle East Studies website (http://mest.uark.edu/)

The King Fahd Center for Middle East Studies is an academic and research unit in the J. William Fulbright College of Arts and Sciences. It is an interdisciplinary and interdepartmental area studies center that offers diverse cultural, intellectual, and educational opportunities for the University of Arkansas community. Its functions include the promotion of research and teaching in interdisciplinary Middle East studies and global Islamic studies.

Through the King Fahd Middle East Studies Program, the center offers an undergraduate major in Middle East studies and supports graduate studies in Middle East-related departments and programs. Students of superior ability who are majoring in Middle East studies may apply for MEST scholarships to help fund their studies. The center also supports summer language study and research assistantships for graduate students and teaching and research by visiting scholars from affiliated universities and programs.

Through its core faculty, the center coordinates with university departments to offer a full range of Middle East courses, supports faculty research in Middle East and Islamic studies, engages in outreach activities, and supports an ambitious program of visiting speakers and workshops. The King Fahd Center currently maintains relationships with universities in Saudi Arabia, Jordan, Morocco, Tunisia, and Russia. The center also cooperates with the Aga Khan Humanities Program in Central Asia, the Middle East Institute in Washington, D.C., and the Elijah Center for the Study of Wisdom in World Religions in Jerusalem.

**Mack-Blackwell National Rural Transportation Study Center**

Heather Nachtmann, director

BELL 4184
479-575-3484

Mack-Blackwell National Rural Transportation Study Center website (http://mackblackwell.uark.edu)

The Mack-Blackwell National Rural Transportation Study Center was established by a grant from the U.S. Department of Transportation to provide educational opportunities and conduct research in the area of rural transportation. Additional support is received from the Arkansas Highway and Transportation Department.

The broad objective of the center is to improve the quality of life in rural areas through transportation. The educational objective is to provide graduates qualified to enter the transportation-related professions with the diversity of backgrounds needed to lead transportation development in the 21st century. Although housed within the Department of Civil Engineering, the Mack-Blackwell Center’s activities are not limited to engineering. All disciplines related to or impacted by transportation participate in the center’s research and educational activities.

**Maritime Transportation Research and Education Centers**

Heather Nachtmann
MarTREC Director

Bell 4190
Phone: 479-575-6021

martrec@uark.edu

The Maritime Transportation Research and Education Centers’ theme is building economic competitiveness through efficient, resilient, and sustainable maritime and multimodal transportation systems. The centers’ vision is to be recognized as the nation’s premier source for expertise on maritime and multimodal transportation research and education. The MarTREC consortium consists of renowned maritime transportation researchers dedicated to transferable research and inclusive education and workforce development.

Maritime and multimodal transportation research is a national priority that is critical to future economic competitiveness. Waterborne freight directly and indirectly contributes to U.S. economic growth by contributing to economic value, earnings, and employment. The nation’s waterways are used to transport approximately 20 percent of America’s coal, 22 percent of U.S. petroleum products, and 60 percent of the nation’s farm exports. Better information about economic benefits of waterborne freight can inform private and federal investment in port development and infrastructure improvements, which can increase competitive advantages without negatively affecting social and environmental outcomes.

It is anticipated that transportation agencies and private industry will be increasingly challenged to find highly qualified and technically trained employees in the coming years due to increased retirement rates, fewer entrants into the transportation field, and increased competition for skilled labor, engineers, and planners. The U.S. Department of Transportation-funded 21st Century Workforce Development Summit expressed concern that transportation agencies could face a workforce loss up to 50 percent by 2020. MarTREC is dedicated to transportation education and workforce development.

**Membrane Research Center**

Ranil Wickramasinghe
Director

Bell Engineering 3151
swickram@uark.edu

The mission of the University of Arkansas Membrane Research Center is promotion of educational and training opportunities in membrane science and technology especially for graduate students. Graduate students in the master’s and doctoral programs will form the backbone of all research
teams at the Membrane Research Center, and graduate students will conduct their thesis research through center projects.

A feature of the center's research projects is that every project will have at least one of the center's industrial sponsors as a project mentor.

The University of Arkansas Membrane Research Center will:

- Conduct fundamental and applied research in the field of membranes via innovative materials and processes to facilitate the use of membrane technology for current and emerging industrial applications.
- Help sustain U.S. technological leadership in membrane materials and membrane-based separation processes and accelerate commercialization by Center sponsors of novel, sustainable and innovative technologies.
- Provide undergraduate, graduate and postdoctoral researchers with a superior educational and research experience that will enable them to become productive and effective professionals in the membrane community.

An underlying emphasis in all of these efforts is the understanding that new membrane technologies will lead to enhanced sustainability in our technological operations.

**National Agricultural Law Center**
Harrison Pittman, director
479-575-7640
nataglaw@uark.edu

National Agricultural Law Center Website (http://www.NationalAgLawCenter.org/)

The National Agricultural Law Center serves as the nation's leading source of agricultural and food law research and information and is a unit of the University of Arkansas System Division of Agriculture. Created in 1987, the center fulfills its mission by conducting and sponsoring objective and authoritative agricultural and food law research and by providing bibliographic and other resources on agricultural and food law.

The center works closely with a diverse range of public and private sector stakeholders throughout Arkansas and the nation. The center is the only institution of its kind in the United States and has received national recognition. Publications and research assistance are available in print and through the website.

**National Center for Reliable Electric Power Transmission**
Alan Mantooth, executive director
2055 South Innovation Way
479-575-4838

National Center for Reliable Electric Power Transmission website (http://ncrept.uark.edu/)

The National Center for Reliable Electric Power Transmission in the College of Engineering is located in a new building at the Arkansas Research and Technology Park. The center seeks to research and develop prototypes of advanced power electronics systems for applications in the power grid, including both protection and storage devices.

The center also serves as a test facility for advanced power electronic circuit and package designs for distribution-level voltages and high currents. The center is a unique educational resource for students interested in working in the power utility and power electronics sectors.

**Office for Studies on Aging**
Michelle Gray and Barbara Shadden, co-directors
HPER 321X
479-575-5262
aging@uark.edu

Office for Studies on Aging website (http://coehp.uark.edu/osa/)

The Office for Studies on Aging in the College of Education and Health Professions was established in August 1999 to coordinate the resources of the university in addressing the needs of the aging population in Arkansas and beyond. The office was developed to be the center for research and study of the physical, social, and psychological aspects of the aging process drawing on a host of disciplines across campus. The office conducts research, provides services, and acts as an interface between the university and the variety of service modalities for the aging population. Initial efforts of the office are directed toward a variety of issues facing older Americans to provide meaningful solutions so that the process of aging is a positive experience, both emotionally and physically.

**Office of Education Policy**
Gary Ritter, director
201 Graduate Education Building
479-575-3773

www.officeforeducationpolicy.org (http://www.officeforeducationpolicy.org)

The Office of Education Policy serves as a resource to state lawmakers, educators, administrators, and other leaders, providing them with current national, state, and regional research in education to support them in thoughtful decision-making concerning K-12 education in the state of Arkansas. The Office of Education Policy strives to look at pressing issues through the lens of academic research, bridging the gap between research and practice.

**Resiliency Center**
Marty Matlock
Executive Director for the Resiliency Center
Vol Walker Hall, suite 120
mmatlock@uark.edu

The mission of the University of Arkansas Resiliency Center, established in 2018, is to inspire current generations to better understand the interconnectedness of economic, social, and environmental systems; to integrate this understanding into knowledge and technological innovation through interdisciplinary research; and to transform the systems upon which our prosperity depends, to make our region, state, and world more resilient and sustainable.

The goal of the center will be to expand understanding of the resilient elements of food, water and urban systems that support economic and social prosperity for Arkansas and the world. The center will focus on the challenge of food and water systems to support human prosperity across local to global scales, and community design to support human health and community resilience. The Resiliency Center will leverage existing global research leadership within the University of Arkansas by strategic partnerships with business and industry supply chains to create more
responsive and implementable solutions to complex challenges at the interface of food, water, and logistics.

The center will serve as a focal point for investigating new ways to quantify complex local-to-global processes that govern food, water and urban systems. The Resiliency Center will achieve this goal by coordinating interdisciplinary education, research, and outreach in food, water, and urban systems, with a focus on solving local problems that have global applications.

Small Business and Technology Development Center
Larry Brian, director
RCED 210
479-575-5148

Small Business and Technology Development Center website (http://sbtdc.uark.edu/)

The Walton College Arkansas Small Business and Technology Development Center is part of a national network of more than 1,000 small business development centers that provide small business training seminars, as well as free market research and consulting services from three full-time business consultants to startup and existing small businesses. The Arkansas system also provides the services of a free innovation and technology consultant for the state. The Walton College center operates as a regional office of the Arkansas Small Business and Technology Development Center half funded by the United States Small Business Administration and the Walton College located in the Donald W. Reynolds Center for Enterprise Development.

The Arkansas system serves all of Arkansas through the University of Arkansas at Little Rock’s lead center and six regional offices located on college campuses throughout the state of Arkansas. Any for-profit small business intending to locate or currently located within the Walton College center’s service area may receive free assistance. This center serves the following counties: Benton, Boone, Carroll, Madison, Marion, Newton, Searcy, and Washington.

Supply Chain Management Research Center
John Kent, director
WJWH 544
479-575-6107
jkent@walton.uark.edu

Supply Chain Management Research Center website (http://scmr.uark.edu/)

The Supply Chain Management Research Center at the Sam M. Walton College of Business sponsors and promotes supply chain, logistics, and transportation research and education. Center faculty view the supply chain as the channel that integrates business processes from suppliers through end users, providing value-added products, services, and information. Supply chain management incorporates both inter- and intra-company logistics, transportation, and management systems.

The center undertakes research and training in all aspects of the supply chain. It has sponsored research on vendor-managed inventory, trained salespersons and developed systems for material requirements planning, and simulated supply chains for logistics executives. The center has a broad range of interests and capabilities and has close ties to and cooperative programs within the Walton College, such as the Center for Retail Excellence, the Information Technology Research Center and other centers at the university, such as the Logistics Institute in the College of Engineering. The Supply Chain Management Research Center is unique in that its capabilities span the technical and managerial arenas of supply chain management.

The center’s Board of Directors includes representatives of firms such as ABF Freight Systems, American Freightways, Colgate-Palmolive, Federal Express, J.B. Hunt Transport, Pillsbury, Sunbeam, Tyson Foods, Unilever HPC, and Wal-Mart. The Board of Directors, along with notable supply chain professionals from business and academia, meet annually to discuss the state of the art in supply chain management and to provide advice and direction for the center.

For additional information about the Supply Chain Management Research Center at the Sam M. Walton College of Business contact the center at 479-575-7334.

Terrorism Research Center
Brent L. Smith, director
MAIN 228
479-575-3401
bls@uark.edu

Terrorism Research Center website (http://tcr.uark.edu/)

The Terrorism Research Center in the J. William Fulbright College of Arts and Sciences houses the American Terrorism Study, the nation’s only comprehensive longitudinal database on American terrorism. Conducted in cooperation with the Federal Bureau of Investigation and sponsored by the U.S. Senate Judiciary Committee, the American Terrorism Study provides a record of federal terrorism cases resulting from indictment under an FBI “terrorism enterprise” investigation from 1980 to the present. The center is also engaged in several projects examining the spatial and temporal dimensions of terrorism, precursor and preparatory terrorist crimes, and prosecutorial and defense strategies in terrorism trials. The center’s research is funded by the Department of Homeland Security through the Memorial Institute for the Prevention of Terrorism and the Department of Justice through the National Institute of Justice.

Tesseract Center for Immersive Environments and Game Design
David Fredrick, director
J.B. Hunt Center for Academic Excellence, Room 255
479-308-8362
tesseract.uark.edu (http://tesseract.uark.edu/)

The core mission of the Tesseract Center is to create immersive, real-time visualization environments and serious games for instruction and research. The center will be fundamentally interdisciplinary, with collaborative projects and affiliated faculty from colleges across the University of Arkansas campus. The center provides the infrastructure to develop and support new academic endeavors including new academic and outreach programs, as well as an engine for innovation, entrepreneurship, and economic development through the creation of intellectual property and the fostering of connections with industry and corporations.
Tyson Center for Faith and Spirituality in the Workplace

WJWH 518
479-575-3721
jan002@uark.edu

Tyson Center for Faith and Spirituality in the Workplace website (http://tfsw.uark.edu/)

The center’s vision is to be recognized as an international center networked with other international centers, where students, academics, practitioners, business leaders and faith leaders come together to understand the effects of faith and spirituality in the workplace and develop methodologies to help transform organizations in a way that has a positive impact on the world. The center teaches courses on faith and spirituality in the workplace, provides resources to businesses and community, and maintains a database of relevant research, including conducting its own case studies.

The Tyson Center for Faith and Spirituality in the Workplace was established by a grant from Tyson Foods Inc. and the Tyson Family Foundation in 2009.
Welcome to the University of Arkansas
This catalog of studies is a comprehensive reference for your years of graduate study – a list of courses and degrees offered through the Graduate School at the University of Arkansas. It offers valuable information such as suggested and required degree plans and information about costs, scholarships and financial assistance, and campus resources. Read it with pleasure and with care.

The University of Arkansas is committed to your success. The faculty and staff are here to support you as you work to achieve your goals. Ask for help and advice whenever you need it. Take every opportunity to consult your academic adviser to ensure that you are taking advantage of courses and university resources that will help you reach your educational and career goals and graduate on time.

The University of Arkansas provides educational opportunities to all qualified students regardless of their economic or social status and will not discriminate on the basis of race, color, sex, creed, sexual orientation, disability, veteran’s status, age, marital or parental status, or national origin.

The following graduate fields of study are offered by the Graduate School and the Graduate School of Business at the University of Arkansas:

**Department of Accounting (ACCT)**
- Master of Accountancy (p. 385) (ACCTMA)
- Ph.D. in Business Administration (p. 385) (ACCTPH)

**Department of Agricultural Education, Communications, and Technology (AECT)**
- M.S. in Agricultural & Extension Education (p. 59) (AEEDMS)
- Ph.D. in Agricultural, Food and Life Sciences with AECT Concentration (p. 52) (AFLSPH-AECT)

**Department of Agricultural Economics and Agribusiness (AEAB)**
- M.S. in Agricultural Economics (p. 54) (AGECMS)

**Dale Bumpers College of Agricultural, Food and Life Sciences (AFLD)**
- M.S. in Food Safety (p. 61) (FDFSMS)
- Ph.D. in Agricultural, Food and Life Sciences (p. 61) (AFLSPH)

**Department of Animal Science (ANSC)**
- M.S. in Animal Science (p. 62) (ANSCMS)
- Ph.D. in Animal Science (p. 62) (ANSCPH)

**Department of Anthropology (ANTH)**
- M.A. in Anthropology (p. 65) (ANTHMA)
- Ph.D. in Anthropology (p. 65) (ANTHPH)

**School of Art (ARTS)**
- M.F.A. in Art (p. 70) (ARTMFA)

**Fulbright College of Arts and Sciences (ARSD)**
- M.A. in Comparative Literature and Cultural Studies (p. 112) (CLCSMA) (interdisciplinary)
- Ph.D. in Comparative Literature and Cultural Studies (p. 112) (CLCSPH) (interdisciplinary)

**Department of Biological and Agricultural Engineering (BAEG)**
- M.S.B.E. in Biological Engineering (p. 82) (BENGMS)
- M.S.En.E. in Environmental Engineering (p. 176), in collaboration with Civil Engineering
- Ph.D. in Engineering (p. 162) (BENGPH)

**Department of Biological Sciences (BISC)**
- M.S. in Biology (p. 77) (BIOLMS)
- Ph.D. in Biology (p. 77) (BIOLPH)

**Department of Biomedical Engineering (BMEG)**
- M.S.B.M.E. in Biomedical Engineering (p. 86) (BMEGMS)
- Ph.D. in Engineering (p. 162) (BMEGPH)

**Graduate School of Business**
- M.Acc. in Accounting (p. 385)
- M.A. in Economics (p. 396)
- M.B.A. in Business Administration (p. 390)
- M.B.A./J.D. (p. 390), dual degree
- M.B.A./M.P.S. (p. 390) dual degree
- M.I.S. in Information Systems (p. 401)
- Ph.D. in Business Administration (p. 390)
- Ph.D. in Economics (p. 396)
- Graduate Certificates (non-degree) in the following:
  - Business (p. 390)
  - Enterprise Systems (p. 401)
  - Entrepreneurship (p. 390)

**Ralph E. Martin Department of Chemical Engineering (CHEG)**
- M.S.Ch.E. in Chemical Engineering (p. 93) (CHEGMS)
- Ph.D. in Engineering (p. 162) (CHEGPH)

**Department of Chemistry & Biochemistry (CHBC)**
- M.S. in Chemistry (p. 96) (CHEMMS)
- Ph.D. in Chemistry (p. 96) (CHEMPH)

**Department of Civil Engineering (CVEG)**
- M.S.C.E. in Civil Engineering (p. 99) (CVEGMS)
- M.S.En.E. in Environmental Engineering (p. 176) (ENEGMS)
- Ph.D. in Engineering (p. 162) (CVEGPH)

**Department of Communication (COMM)**
- M.A. in Communication (p. 103) (COMMMA)

**Department of Computer Science & Computer Engineering (CSCE)**
- M.S. in Computer Science (p. 119) (CSCEMS)
- MS.Cmp.E. in Computer Engineering (p. 119) (CENGMS)
- Ph.D. in Computer Science (p. 119) (CSCEPH)
- Ph.D. in Engineering (p. 162) (CENGPH)

**Department of Crop, Soil and Environmental Sciences (CSES)**
- M.S. in Crop, Soil & Environmental Sciences (p. 131) (CSESMS)
- Ph.D. in Crop, Soil & Environmental Sciences (p. 131) (CSESPH)

**Department of Curriculum and Instruction (CIED)**
- M.A.T. in Elementary Education (p. 159) (ELEDMA)
- M.A.T. in Teacher Education (p. 338) (EDUCMA)
- M.Ed. in Career and Technical Education (p. 89) (CATEME)
- M.Ed. in Curriculum and Instruction (p. 134) (CIEDME)
• M.Ed. in Educational Equity (p. 148) (DEEQME)
• M.Ed. in Educational Leadership (p. 149) (EDELEME)
• M.Ed. in Educational Technology (p. 152) (ETECME)
• M.Ed. in Elementary Education (p. 159) (ELEDME)
• M.Ed. in Special Education (p. 326) (SPEDME)
• M.Ed. in Teaching English to Speakers of Other Languages (p. 340) (TESLME)
• Ed.S. in Curriculum and Instruction (p. 134) (CIEDES)
• Ed.S. in Educational Leadership (p. 149) (EDLEES)
• Ed.D. in Educational Leadership (p. 149) (EDLEED)
• Ph.D. in Curriculum and Instruction (p. 134) (CIEDPH)
• Graduate Certificates (non-degree) in the following:
  • Applied Behavior Analysis (p. 132) (APBAGC)
  • Arkansas Curriculum/Program Administrator (p. 149) (ACPAMC)
  • Autism Spectrum Disorders (p. 326) (AUTSGC)
  • Building-Level Administration (p. 149) (PSBLMC)
  • District-Level Administration (p. 357) (PSDLMC)
  • K-12 Online Teaching (p. 152) (ETECGG)
  • Special Education Transition Services (p. 364) (SPTSGC)
  • STEM Education for Early Childhood (p. 365) (K-4) (STEMGC)

Department of Economics (ECON)
• M.A. in Economics (p. 396) (ECONMA)
• Ph.D. in Economics (p. 396) (ECONPH)

Department of Education Reform (EDRE)
• Ph.D. in Education Policy (p. 146) (EDPOPH)

Department of Electrical Engineering (ELEG)
• M.S.E.E. in Electrical Engineering (p. 154) (ELEGMS)
• Ph.D. in Engineering (p. 162) (ELEGPH)

College of Engineering (ENGR)
• M.S.E. in Engineering (p. 162) (ENGRME)
• Ph.D. in Engineering (p. 162) (ENGRPH)

Department of English (ENGL)
• M.A. in English (p. 164) (ENGLMA)
• M.F.A. in Creative Writing (p. 130) (CRWRMF)
• Ph.D. in English (p. 164) (ENGLPH)
• Graduate Certificate (non-degree) in Technical Writing and Public Rhetorics (p. 164) (TWRHGG)

Department of Entomology and Plant Pathology (ENTO-PLPA)
• M.S. in Entomology (p. 171) (ENTOMS)
• M.S. in Plant Pathology (p. 282) (LPAMS)
• Ph.D. in Agricultural, Food and Life Sciences with (p. 172)Entomology Concentration (p. 171) (AFLSPH-ENTO)
• Ph.D. in Agricultural, Food and Life Sciences with Plant Pathology Concentration (p. 282) (AFLSPH-PLPA)

Department of Finance (FINN)
• Ph.D. in Business Administration (p. 390) (BADMFP)

Department of Food Science (FDSC)
• M.S. in Food Science (p. 178) (FDSCMS)
• Ph.D. in Food Science (p. 178) (FDSCPH)

Department of Geosciences (GEOS)
• M.S. in Geography (p. 181) (GEOGMS)
• M.S. in Geology (p. 181) (GEOLMS)
• Ph.D. in Geosciences (p. 181) (GEOSPH)
• Graduate Certificate in Geospatial Technologies (p. 181) (GISTGC)

Department of Health, Human Performance and Recreation (HHPR)
• M.A.T. in Athletic Training (p. 189) (ATTRMA)
• M.Ed. in Physical Education (p. 275) (PHEDME)
• M.Ed. in Recreation and Sport Management (p. 302) (RESMME)
• M.S. in Community Health Promotion (p. 110) (CHLPMS)
• M.S. in Kinesiology (p. 223) (KINSMS)
• Ph.D. in Community Health Promotion (p. 110) (CHLPPH)
• Ph.D. in Health, Sport and Exercise Science (p. 192) (HSESPPH)
• Ph.D. in Kinesiology (p. 223) (KINSPPH)

Department of History (HIST)
• M.A. in History (p. 199) (HISTMA)
• Ph.D. in History (p. 199) (HISTPH)

Department of Horticulture (HORT)
• M.S. in Horticulture (p. 207) (HORTMS)
• Ph.D. in Agricultural, Food and Life Sciences (p. 207) with Horticulture Concentration (AFLSPH-HORT)

School of Human Environmental Sciences (HESC)
• M.S. in Human Environmental Science (p. 210) (HESCMS)

Department of Industrial Engineering (INEG)
• M.S. in Engineering Management (p. 162) (EMGTMS)
• M.S.I.E. in Industrial Engineering (p. 216) (INEGMS)
• M.S.O.M in Operations Management (p. 266) (OPMGMS)
• Ph.D. in Engineering (p. 162) (INEGPH)

Interdepartmental Degree Program
• Ph.D. in Food Science (p. 178) (ANSC, FDSC, HESC, HORT)

Interdisciplinary Studies that span colleges
• M.Des. in Design Studies (p. 144) (DSGNMDS)
• M.S. in Cell & Molecular Biology (p. 90) (CEMBS)
• M.S. in Microelectronics-Photonics (p. 232) (MEPHMS)
• M.S. in Space & Planetary Sciences (p. 322) (SPACMS)
• M.S. in Statistics and Analytics (p. 336) (STANMS)
• Ph.D. in Cell & Molecular Biology (p. 90) (CEMBPH)
• Ph.D. in Environmental Dynamics (p. 174) (ENDYPH)
• Ph.D. in Microelectronics-Photonics (p. 232) (MEPPH)
• Ph.D. in Public Policy (p. 296) (PUBPPH)
• Ph.D. in Space & Planetary Sciences (p. 322) (SPACPH)

The following doctoral programs are offered by the Graduate School and the Graduate School of Business at the University of Arkansas:

Department of Accounting
- Ph.D. in Business Administration (p. 385) (BADMPH)
Department of Agricultural Education, Communication and Technology (AECT)
  • Ph.D. in Agricultural, Food and Life Sciences with AECT Concentration (p. 52) (AFLSPH-AECT)

Dale Bumpers College of Agricultural, Food and Life Sciences (AFLD)
  • Ph.D. in Agricultural, Food and Life Sciences (p. 61) (AFLSPH)

Department of Animal Science
  • Ph.D. in Animal Science (p. 62) (ANSCPH)

Department of Anthropology
  • Ph.D. in Anthropology (p. 65) (ANTHPH)

Department of Biological & Agricultural Engineering (BAEG)
  • Ph.D. in Engineering (p. 82) (BENGPH)

Department of Biological Sciences (BISC)
  • Ph.D. in Biology (p. 77) (BIOLPH)

Department of Biomedical Engineering (BMEG)
  • Ph.D. in Engineering (p. 86) (BMEGPH)

Graduate School of Business
  • Ph.D. in Business Administration (p. 390)
  • Ph.D. in Economics (p. 396)

Department of Chemical Engineering (CHEG)
  • Ph.D. in Chemical Engineering (p. 93) (CHEGPH)

Department of Chemistry & Biochemistry (CHBC)
  • Ph.D. in Chemistry (p. 96) (CHEMPH)

Department of Civil Engineering (CVEG)
  • Ph.D. in Engineering (p. 99) (CVEGPH)

Department of Computer Science & Computer Engineering (CSCE)
  • Ph.D. in Computer Science (p. 119) (CSCEPH)
  • Ph.D. in Engineering (p. 119) (CENGPH)

Department of Crop, Soil & Environmental Sciences (CSES)
  • Ph.D. in Crop, Soil & Environmental Sciences (p. 131) (CSESPPH)

Department of Curriculum & Instruction (CIED)
  • Ed.D. in Educational Leadership (p. 149) (EDLEED)
  • Ph.D. in Curriculum & Instruction (p. 134) (CIEDPH)

Department of Economics (ECON)
  • Ph.D. in Economics (p. 396) (ECONPH)

Program in Educational Statistics & Research Methods (ESRM)
  • Ph.D. in Educational Statistics & Research Methods (p. 358) (ESRMPPH)

Department of Education Reform (EDRE)
  • Ph.D. in Education Policy (p. 146) (EDPOPH)

Department of Electrical Engineering (ELEG)
  • Ph.D. in Electrical Engineering (p. 154) (ELEGPH)

College of Engineering (ENGR)
  • Ph.D. in Engineering (p. 162) (ENGRPH)

Department of English (ENGL)
  • Ph.D. in English (p. 164) (ENGLPH)

Department of Entomology and Plant Pathology (ENTO-PLPA)
  • Ph.D. in Agricultural, Food and Life Sciences (p. 172) with Entomology Concentration (AFLSPH)
  • Ph.D. in Agricultural Food and Life Sciences (p. 282) with Plant Pathology Concentration (AFLSPH)

Department of Finance (FINN)
  • Ph.D. in Business Administration (p. 400) (BADMPH)

Department of Food Science (FDSC)
  • Ph.D. in Food Science (p. 178) (FDSCPH)

Department of Geosciences (GEOS)
  • Ph.D. in Geosciences (p. 181) (GEOSPH)

Department of Health, Human Performance and Recreation (HHPR)
  • Ph.D. in Community Health Promotion (p. 110) (CHLPPH)
  • Ph.D. in Health, Sport and Exercise Science (p. 192) (HSEHPH)
  • Ph.D. in Kinesiology (p. 223) (KINSPH)

Department of History (HIST)
  • Ph.D. in History (p. 199) (HISTPH)

Department of Horticulture (HORT)
  • Ph.D. in Agricultural, Food and Life Sciences (p. 207) with Horticulture Concentration (AFLSPH-HORT)

Department of Industrial Engineering (INEG)
  • Ph.D. in Engineering (p. 216) (INEGPH)

Interdepartmental Degree Program
  • Ph.D. in Food Science (p. 178) (ANSC, FDSC, HESC, HORT)

Interdisciplinary Studies
  • Ph.D. in Cell and Molecular Biology (p. 90) (CEMBPH)
  • Ph.D. in Comparative Literature and Cultural Studies (p. 112) (CLCSPH)
  • Ph.D. in Environmental Dynamics (p. 174) (ENDYPH)
  • Ph.D. in Microelectronics-Photonics (p. 232) (MEPMPH)
The following graduate certificate programs are offered by the University of Arkansas Graduate School:

- Ph.D. in Public Policy (p. 296) (PUBPPH)
- Ph.D. in Space & Planetary Sciences (p. 322) (SPACPH)

**Department of Information Systems (ISYS)**
- Ph.D. in Business Administration (p. 401) (BADMPH)

**Department of Management (MGMT)**
- Ph.D. in Business Administration (p. 407) (BADMPH)

**Department of Marketing (MKTG)**
- Ph.D. in Business Administration (p. 409) (BADMPH)

**Department of Mathematical Sciences (MASC)**
- Ph.D. in Mathematics (p. 224) (MATHPH)

**Department of Mechanical Engineering (MEEG)**
- Ph.D. in Engineering (p. 229) (MEEGPH)

**Eleanor Mann School of Nursing**
- D.N.P. in Nursing (p. 250) (NURSDP)

**Department of Occupational Therapy (OTPD)**
- O.T.D. in Occupational Therapy (p. 261) (OTPDDP)

**Department of Philosophy (PHIL)**
- Ph.D. in Philosophy (p. 272) (PHILPH)

**Department of Physics (PHYS)**
- Ph.D. in Physics (p. 276) (PHYSPH)

**Department of Political Science (PLSC)**
- J.D./M.A. Program (p. 285), dual degree
- J.D./M.P.A. Program (p. 285), dual degree

**Department of Poultry Science (POSC)**
- Ph.D. in Poultry Science (p. 288) (POSCPH)

**Department of Psychological Science (PSYC)**
- Ph.D. in Psychology (p. 291) (PSCYPH)

**Department of Rehabilitation, Human Resources, & Communication Disorders (RHRC)**
- Ed.D. in Adult and Lifelong Learning (p. 49) (ADLLED)
- Ed.D. in Higher Education (p. 195) (HIEDED)
- Ed.D. in Human Resource and Workforce Development Education (p. 213) (HRWDED)
- Ph.D. in Counselor Education (p. 125) (CNEOPH)
- Ph.D. in Educational Statistics and Research Methods (p. 358) (ESRMPH)

**Department of Supply Chain Management**
- Ph.D. in Business Administration (p. 410) (BADMPH)

**Graduate School of Business**
- Business (p. 390)
- Enterprise Systems (p. 401)
- Entrepreneurship (p. 390)

**Department of Computer Science and Computer Engineering (CSCE)**
- Cybersecurity (p. 356) (CYBRGC)

**Department of Curriculum & Instruction (CIED)**
- Applied Behavior Analysis (p. 326) (APBAGC)
- Arkansas Curriculum/Program Administrator (p. 352) (ACPAMC)
- Autism Spectrum Disorders (p. 326) (AUTSGC)
- Building-Level Administration (p. 353) (PSBLMC)
- District-Level Administration (p. 357) (PSDLMC)
- K-12 Online Teaching (p. 152) (ETECCG)
- Special Education Transition Services (p. 364) (SPTSGC)
- STEM Education for K-6 (p. 365) (STEMG)
- Teaching English to Speakers of Other Languages (http://catalog.uark.edu/graduatecatalog/certificates/tesol/) (TESLG)

**Department of English**
- Technical Writing and Public Rhetorics (p. 164) (TWRHGC)

**Program in Educational Statistics & Research Methods (ESRM)**
- Educational Measurement (p. 358) (EDMEMC)
- Educational Psychology (p. 358) (EDPSMC)
- Educational Statistics & Research Methods (p. 358) (EDSTMC)

**Department of Geosciences**
- Geospatial Technologies (p. 181) (GISTGC)

**Department of Industrial Engineering**
- Homeland Security (p. 363) (OMHSGC)
- Lean Six Sigma (p. 363) (OMLSGC)
- Project Management (p. 364) (OMPMGC)

**Interdisciplinary Studies**
- African and African American Studies (p. 351) (AASTGC)
- Cross-Sector Alliances (p. 356) (CSALGC)
- Statistics and Analytics (p. 364) (STANGC)
- Sustainability (p. 365) (SUSTGC)

**Department of Music (MUSC)**
- Advanced Performance (p. 238) (MUSCGRC)
- Music Education for Special Needs Students (p. 363) (MUSCGRC)

**Program in Operations Management**
- Homeland Security (p. 363) (OMHSGC)
- Lean Six Sigma (p. 363) (OMLSGC)
- Project Management (p. 364) (OMPMGC)
School of Law

- Business Law (p. 353) (BLAWGC)
- Criminal Law (p. 355) (CRLWGC)

Adult and Lifelong Learning Website (http://adll.uark.edu)

Degrees Conferred:
M.Ed., Ed.D. (ADLL)

The Adult and Lifelong Learning curriculum is designed to prepare scholars/practitioners for instructional leadership roles. Coursework focuses on the assessment, design, and implementation of educational programs for adult learners across diverse developmental stages. Adult and Lifelong Learning scholars/practitioners work with specialized groups of adults including those with less than secondary (high school equivalent) education, adult learners in postsecondary education, participants in educational programs offered by community and nonprofit agencies, and participants in professional education programs.

Graduates of the degrees in Adult and Lifelong Learning are employed as instructors, coordinators, and directors of adult education and lifelong learning programs within adult literacy and general education, leisure learning, community and nonprofit organizations, extension education, military education, postsecondary education, and continuing professional education programs.

Requirements for M.Ed. in Adult and Lifelong Learning

Prerequisites for Acceptance to the Master of Education Degree Program: In addition to submitting an application for admission and an application fee to the Graduate School, students must meet all graduate school requirements for admission with the exception of standardized tests. All students seeking admission to the M.Ed. program in Adult and Lifelong Learning must submit (1) a program application that is located on the ADLL website (http://adll.uark.edu), and (2) a current resume.

Requirements for the Master of Education (M.Ed.) Degree: (Minimum 33 hours)

Requirements for Ed.D. in Adult and Lifelong Learning

Prerequisites for Acceptance to the Doctor of Education Degree Program: The Ed.D. in Adult and Lifelong Learning is a cohort-based program; applications are accepted approximately four months prior to the beginning of each cohort cycle. Cohort cycles begin approximately every two years. The anticipated timeline for program cohorts and application deadlines will be posted on the program’s website (http://adll.uark.edu).

Students seeking admission to the Ed.D. program in Adult and Lifelong Learning must complete procedures that include (1) prior admission to the University of Arkansas Graduate School, which requires a separate application process; (2) a completed Adult and Lifelong Learning Application for Admission form; (3) a current resume or vitae; (4) an autobiographical sketch; (5) a Graduate Record Examination (GRE) score; and (5) a personal interview with members of the Adult and Lifelong Learning faculty.

Adult and Lifelong Learning faculty consider several factors when reviewing applicants for admission to the program, including professional experience related to adult and lifelong learning, demonstration of interest in a career in adult education and lifelong learning, grade point average on all graduate work completed, and Graduate Record Examination (GRE) composite scores (verbal, quantitative, and analytical writing) that demonstrate the student’s ability to effectively perform academically at the doctoral level (test scores usually no lower than the 50th percentile).

Requirements for the Doctor of Education Degree: (Minimum 96 hours)

Completion of 15 semester hours of Adult Education Core 12

A cumulative grade point average of at least 3.00 on all course work for the degree. No grades below “C” will be accepted toward this degree.

Satisfactory performance on a written comprehensive examination in ADLL 5223 Adult and Lifelong Learning Applied Project, the capstone course for the degree program.

Total Hours 33

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).
Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Graduate Faculty
Kacirek, Kit, Ed.D., M.Ed. (University of Kansas), B.S. (University of Texas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1997.
Roessger, Kevin, Ph.D., M.S., B.A. (University of Wisconsin-Milwaukee), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2016.

Courses
ADLL 5113. Perspectives in Adult Education. 3 Hours.
Historical overview of the evolving field of adult education and lifelong learning in responsibilities of adult education providers and reviews the expansion of adult and lifelong learning opportunities associated with societal and demographic shifts. (Typically offered: Fall and Spring)

ADLL 5123. Principles and Practices of Adult Learning. 3 Hours.
Overview of the adult learner including characteristics, motivation for participating in learning, and strategies for developing educational programs for diverse adult populations. (Typically offered: Fall and Summer)

ADLL 5133. Curriculum Development in ABE and ASE. 3 Hours.
Curriculum development in Adult Basic Education (ABE) and Adult Secondary Education (ASE) settings including the various educational functioning levels, measures to assess student levels, selection of teaching materials, and development of curriculum utilizing instructional standards for ABE and ASE programs. (Typically offered: Fall)

ADLL 5143. Instructional Strategies and Assessment in Adult Education. 3 Hours.
Selection and utilization of materials and instructional methods for use in adult learning settings. Evaluative strategies to develop or select appropriate tools and techniques predicated upon the needs and goals of adult learners. (Typically offered: Spring)

ADLL 5153. Organization and Administration of Adult and Lifelong Learning Programs. 3 Hours.
Legal, ethical, staffing, and financial considerations for the development and implementation of programs for adult and lifelong learners in various programs including literacy centers, GED centers, community education, lifelong/leisure learning, and postsecondary education. (Typically offered: Spring)

ADLL 5163. Managing Change in Adult and Lifelong Learning. 3 Hours.
Strategies for planning, organizing, and facilitating change in programs that serve adult learners from diverse populations, across varied developmental stages and geographic locations. Discussion of social change that has impacted adult education and analysis of change models relevant to individuals, groups and organizations. (Typically offered: Fall and Summer)

ADLL 5173. Program Planning. 3 Hours.
Program development process for adult and lifelong learners. Overview of assessment, developing program objectives, identifying resources, and designing program plans. (Typically offered: Summer)

ADLL 5183. Technology and Innovation in Adult Learning. 3 Hours.
Techniques for designing, developing, implementing, and assessing technology-mediated adult and lifelong learning programs. Discussion of issues relevant to the use of innovative strategies for delivering instruction via emerging technologies and their potential impact on content and learning outcomes. (Typically offered: Summer)

ADLL 5193. Seminar in Adult and Lifelong Learning. 3 Hours.
Seminars focused on topics related to adult and lifelong learning. (Typically offered: Spring and Summer)

ADLL 5213. Adult and Lifelong Learning Internship. 3 Hours.
Internship in adult and lifelong learning settings. (Typically offered: Fall and Spring)

ADLL 5223. Adult and Lifelong Learning Applied Project. 3 Hours.
Development and Implementation of a project focused on adult and lifelong learning. Consent of advisor/instructor required. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

ADLL 5233. Independent Study. 3 Hours.
Provides students with an opportunity to pursue special study in adult and lifelong learning. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
ADLL 6113. Advanced Adult Learning Theory. 3 Hours.
Advanced study of theories and models of adult and lifelong learning with an emphasis on current trends, recent research, and issues affecting the field. Issues covered will include critical theory and advancements in neuroscience and cognition as they relate to adult learning and lifespan development. (Typically offered: Irregular)

ADLL 6123. Leadership and Ethics in Adult and Lifelong Learning. 3 Hours.
This doctoral course focuses on leadership principles and ethical considerations that are critical to developing and sustaining adult education programs that benefit individuals, organizations, and communities. Course content will include case study analysis and lectures from scholar-practitioners from the field. (Typically offered: Irregular)

ADLL 6133. Analysis of International Adult and Lifelong Programs. 3 Hours.
Survey of the historical and philosophical events which have shaped adult and lifelong learning worldwide. Discussion of issues affecting adult education and lifelong learning including globalization, educational access, and variance in national policies. (Typically offered: Irregular)

ADLL 6143. Instructional Adaptation and Innovation in Adult and Lifelong Learning. 3 Hours.
An overview of teaching and learning methods, styles, and techniques which are applicable when facilitating adult learners across diverse settings. Content to include teaching and learning style assessment, accommodating learning styles, physical and learning disabilities, language differences and cultural norms. (Typically offered: Irregular)

ADLL 6153. Policy and Public Governance of Adult and Lifelong Learning Programs. 3 Hours.
Policy analysis and public governance issues in adult and lifelong learning with emphasis on state and federal programs. Discussions of how to evaluate, design, and implement policy focused on promoting adult and lifelong learning activities in a myriad of organizations. Overview of trends and current issues related to policy and public governance of adult and lifelong learning. (Typically offered: Irregular)

ADLL 6163. Adult Development and Psychology. 3 Hours.
Focus on adult developmental psychology with emphasis on lifespan development and specific issues related to learning in the various stages of adulthood. Work-life balance, meaning of work, generational issues. (Typically offered: Irregular)

ADLL 6173. Current Issues. 3 Hours.
Exploration and discussion of current issues relative to adult education and lifelong learning. Focus on the review and application of current research as it relates to practice. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ADLL 6183. Organization Development, Learning, and Change. 3 Hours.
Using a system perspective, this course examines the theories and practices associated with organization development, learning and change to understand the dynamic nature of organizational life. This course examines the structural frame, the human resource frame, the political frame, and the symbolic frame that influences organizational behavior and learning. The course investigates strategies and best practices for managing and leveraging this dynamism to build organizational capacity and improve performance. (Typically offered: Fall and Spring)

ADLL 6213. Signature Pedagogy: Teaching and Learning in Community Colleges. 3 Hours.
Using a learning-centered change model, this course examines how community colleges can shift from a traditional teaching-centered paradigm to one that is learning-centered. This course examines the context of the learning college, strategic planning for a learning-outcomes approach to governance, the role of student development and technology in the learning college, and implementing and assessing learning-centered strategies. (Typically offered: Irregular)

ADLL 6223. Workforce and Community Development. 3 Hours.
This course provides an overview of how community colleges influence workforce, economic, and community development through their education missions. The course will examine the community college’s expanding role in economic and community development through workforce development programs. Emphasis will be placed on program structure, best practices in program development, and partnerships and collaboration with various stakeholders. (Typically offered: Irregular)

ADLL 6233. Survey and Significance of the American Community College. 3 Hours.
A comprehensive overview of the American community college, its history, its ever-evolving purpose and the challenges it faces. Course content will focus on the administrators and faculty who lead, the students they serve, and components such as developmental education, integrative education and transfer education. Discussion will include occupational and community education and issues related to accountability. Special attention will be paid to how this unique and complex institution remains relevant and significant to the community. (Typically offered: Irregular)

ADLL 6243. Current Trends in Community Colleges. 3 Hours.
This course examines environmental factors that influence the organization and administration of community colleges. Trends related to funding, policy, staffing, and workforce development are examined and contextualized to the evolving community college mission. (Typically offered: Irregular)

ADLL 6253. Professional Development in Adult and Lifelong Learning. 3 Hours.
This course examines career planning and development, performance management, and professional development in various settings. The focus of the course will be on concepts associated with Human Resource Development (HRD) and developing employees within an organization, as well as leading adults in transition in the community and in educational settings through the process of making career decisions. (Typically offered: Irregular)

ADLL 6313. Independent Study. 3 Hours.
Independent study of topics in adult and lifelong learning. (Typically offered: Irregular)

ADLL 6403. Quantitative Reasoning I for Adult Educators. 3 Hours.
Introduction to quantitative reasoning for educators and researchers in adult education. Topics include applying the hypothetico-deductive research process, describing data using statistical terminology, building statistical models, presenting data meaningfully, and using SPSS to analyze data from practical research problems. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. (Typically offered: Fall and Spring)

ADLL 6413. Quantitative Reasoning II in Adult and Lifelong Learning. 3 Hours.
Methodologies for designing descriptive, correlational, and experimental studies. Development of research questions, definition of variables, selection or development of instruments, data collection, analysis, interpretation and reporting of research results. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or equivalent. (Typically offered: Fall)

ADLL 6423. Qualitative Reasoning in Adult and Lifelong Learning. 3 Hours.
Methodologies for designing qualitative research studies in adult and lifelong learning settings. Selection of the appropriate qualitative tradition, selection of research subjects, development of data collection protocols, field work strategies, data analysis, data interpretation and presentation of data results. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. (Typically offered: Spring)
ADLL 6433. Program Evaluation. 3 Hours.
Overview of evaluation strategies in adult and lifelong learning programs that include: development of evaluation questions, selection or development of instrumentation, data collection methods, data analysis, and reporting of evaluation results. Emphasis on practical and ethical issues associated with evaluation processes. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or ADLL 6413 or ADLL 6423, or equivalent. (Typically offered: Spring)

ADLL 6443. Adult and Lifelong Learning Dissertation Seminar. 3 Hours.
Development of dissertation proposal. Formation of research question, selection of methodologies, development of problem statement, research questions, and identification of research variables, constructs of phenomena. Identification of data collection and data analysis procedures. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or ADLL 6413 or ADLL 6423 or ADLL 6433, or equivalent. (Typically offered: Spring)

ADLL 6463. Advanced Qualitative Reasoning in Adult and Lifelong Learning. 3 Hours.
This qualitative methods course provides students with advanced instruction in qualitative data collection, field observations, records research, data analysis, and data display. In addition to reviewing various research studies that demonstrate different qualitative research approaches, students will practice some of the activities associated with executing a qualitative research study. Prerequisite: ADLL 6423 or instructor consent. (Typically offered: Irregular)

ADLL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Agricultural Education, Communication and Technology (AECT)
George W. Wardlow
Head of the Department
205 Agriculture Building
479-575-2035

Agricultural Education, Communications and Technology Website (http://aeed.uark.edu/)

Degree Awarded:
Ph.D. in Agricultural, Food and Life Sciences with Agricultural Education, Communication and Technology Concentration (AFLSPH-AECT)

Program Description: The Department of Agricultural Education, Communications and Technology offers a concentration for the interdisciplinary Ph.D. program in Agricultural, Food and Life Sciences. Faculty from across Bumpers College prepare students for the wider array of natural and social sciences while allowing the student to develop a tailored degree program through the Agricultural Education, Communication and Technology Concentration.

Requirements for Ph.D. in AFLS with Agricultural Education, Communication and Technology Concentration
Prerequisites to Degree Program: A Master of Science degree is desirable. A student with a Bachelor of Science and an exceptional record in academics and/or research may be approved for admission to the Ph.D. program in Agricultural, Food and Life Sciences if the Graduate Student Concentration Admissions Committee of the desired concentration deems them qualified and approval is granted by the AFLSPH Steering Committee. A student admitted to the University of Arkansas, pursuing an M.S. and in good academic standing may apply to be admitted to the doctoral program and forgo completing the M.S. degree if so approved by the AFLSPH Steering Committee and the AFLSPH Graduate Concentration Admissions Committee. A minimum grade point average of 3.00 (on a 4.00 scale) on previous college-level course work is required.

Admissions Requirements for Entry: To be considered for admission, a student must submit a letter of intent, along with the application for admission indicating the desired degree concentration, areas of interest and career goals. Official transcripts of all previous college-level course work must be submitted. Three letters of recommendation are required. These letters should address the character and academic capability of the applicant. Applications will first be reviewed by the AFLSPH Steering Committee which will assign the student to the appropriate Graduate Student Concentration Admissions Committee for review. The Concentration Admissions Committee will make the final determination of admittance into the AFLSPH program and the concentration.

Requirements for Doctor of Philosophy Degree: The Ph.D. program in Agricultural, Food and Life Sciences requires a total of 72 credit hours after a Bachelor of Science or Bachelor of Arts degree or 42 hours after a Master of Science or Master of Arts degree.

General course requirements for each degree candidate are arranged on an individual basis by the Faculty Advisor, the Graduate Advisory Committee and the candidate in accordance with guidelines of their concentration. Alternate courses may be selected at the discretion of the committee.

All students must complete 6 hours of elective course hours and 2 hours of seminar. One seminar must be a research proposal presentation and the other must be an exit seminar presenting the dissertation research results. All students must complete 18 hours of doctoral dissertation hours. Students entering the doctoral program with only a B.S. or B.A. must also complete an additional 30 hours (to reach the 72 hour post B.S./B.A. requirement). Students must satisfactorily pass written and oral candidacy examinations covering their discipline and supporting areas. These examinations must be completed at least one year before completion of the Ph.D. degree program in Agricultural, Food and Life Sciences. Each candidate must complete a doctoral dissertation on an important research topic in the concentration field. The specific problem and subject of the dissertation is determined by the faculty adviser, the student and the Graduate Advisory Committee. A dissertation title must be submitted to the dean of the Graduate School at least one year before the dissertation defense. Provisional approval of the dissertation must be given by all members of the Graduate Advisory Committee prior to the dissertation defense. Students must pass the oral defense and examination of the dissertation given by the Graduate Advisory Committee. A student cannot be approved for conferral of the doctoral degree until after completion of all coursework, written and oral candidacy exams, the defense passed and dissertation accepted by the Graduate School and an application for the degree has been filed with the Registrar's Office and the fee paid.
Additional Concentration Requirements

In addition to the general requirements for the Ph.D. program in Agricultural, Food and Life Sciences, students in the Plant Pathology concentration must also complete:

- Professional seminar credits related to research and teaching: 3
- Graduate credits related to research and/or data analysis (qualitative and quantitative research methods): 9
- Graduate-level courses related to theory appropriate to the student’s discipline: 3
- Graduate-level elective credits as appropriate to the discipline: 6
- Externship credit to be performed outside of the Department of Agricultural Education, Communication and Technology: 6

Courses

**AGED 5001. Seminar. 1 Hour.**

Presentations and discussion of graduate student research as well as review of current literature and topics of current interest by students and faculty. All graduate students will make at least one formal presentation. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

**AGED 5013. Advanced Methods in Agricultural Mechanics. 3 Hours.**

Emphasis on shop organization and management, courses of study, unit shop instruction, and development of skills in agricultural mechanics. (Typically offered: Summer Odd Years)

**AGED 5033. Developing Leadership in Agricultural Organizations. 3 Hours.**

Organizational concepts of leadership; administrative styles and structures; leadership for boards, committees, governmental bodies, and review of societal and political processes. Prerequisite: Graduate standing. (Typically offered: Fall)

**AGED 5053. Philosophy of Agricultural and Extension Education. 3 Hours.**

An examination and analysis of social and economic events leading to the establishment and maintenance of federal, state, county, and local agricultural education programs. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Spring)

**AGED 510V. Special Topics in Agricultural and Extension Education. 1-4 Hour.**

Topics not covered in other courses or a more intensive study of specific topics in agriculture education. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

**AGED 5243. Graphic Design in AFLS. 3 Hours.**

(Formerly AGED 4243.) This course provides students with graphic design and software skills specific to industries in Agriculture, Food, and Life Sciences. Students will learn to use industry-standard software (InDesign, Photoshop, Illustrator, Microsoft Excel, etc.) to prepare text and graphics and package them for use in print production. Graduate degree credit will not be given for both AGED 4243 and AGED 5243. Prerequisite: AGME 2903 or ISYS 1123 or equivalent. (Typically offered: Fall, Spring and Summer)

**AGED 520V. Special Topics in Agricultural and Extension Education. 1-4 Hour.**

(Formerly AGED 4343.) Students will develop understanding of the principles, practices and applications of social marketing, integrated marketing communications, advertising and public relations as they pertain to developing communication campaign strategies for the agricultural industry. Students will develop a communication campaign for an agricultural company and/or entity focused on a specific product or service. Graduate degree credit will not be given for both AGED 4343 and AGED 5343. Prerequisite: Graduate standing. (Typically offered: Spring and Summer)

**AGED 5163. Leadership Analysis Through Film. 3 Hours.**

(Formerly AGED 4163.) Films are a catalyst (Clemens, 1999). They make you laugh, cry, cheer, and think. Flaum (2002) stated leadership is best learned in the leadership moment. Moreover, the principles of Andragogy advocate adult learners best learning when there is a practical application of the learning subject. Therefore, this course builds upon the study of leadership theory by allowing students to analyze, reflect, synthesize, and apply leadership theories, models and concepts in the context of film. The course materials encourage students to reflect, synthesize, analyze, and apply the information learned from major leadership theories and apply them to various scenarios and situations demonstrated in selected films. Graduate degree credit will not be given for both AGED 4163 and AGED 5163. (Typically offered: Fall and Spring)

**AGED 5343. Communication Campaigns in Agriculture. 3 Hours.**

(Formerly AGED 4343.) An overview of communication technology in the agricultural, food and life sciences. Graduate degree credit will not given for both AGED 4143 and AGED 5143. (Typically offered: Spring Even Years)
AGED 5463. Research Methodology in the Social Sciences. 3 Hours.
Logical structure and the method of science. Basic elements of research design; observation, measurement, analytic method, interpretation, verification, presentation of results. Applications to research in economic or sociological problems of agriculture and human environmental sciences. Prerequisite: Graduate standing. (Typically offered: Fall)
This course is cross-listed with HESC 5463.

AGED 5473. Interpreting Social Data in Agriculture. 3 Hours.
The development of competencies in analyzing, interpreting and reporting the results of analyses of social science data in agriculturally related professions. Students will select appropriate analysis techniques and procedures for various problems, analyze data, and interpret and report the results of statistical analyses in narrative and tabular form. (Typically offered: Fall)

AGED 5483. Technical Communication in the Social Sciences. 3 Hours.
This course will provide students with the basic principles and techniques in communicating social science information relevant to human subject research in agriculture, natural resources, and life sciences to the general public. Communication processes covered in the course include audience identification, writing, editing, and production of social science-based materials for popular and refereed publications. Focus will also be placed on thesis preparation and writing and research manuscript development and dissemination of social science research. Web delivered course. Prerequisite: Graduate standing. (Typically offered: Spring)

AGED 550V. College Teaching in Agriculture and Related Disciplines. 1-3 Hour.
For students who are pursuing graduate degrees where emphasis is on preparation for a research career, but who also may desire or expect to teach. Provides theory and practice in planning and executing a college-level course. (Typically offered: Irregular)

AGED 5543. Ag Publications. 3 Hours.
(Formerly AGED 4543.) Students produce a magazine through classroom study mirroring a professional magazine staff and are provided an opportunity for their writing, advertisements, photographs and artwork to be published in the magazine. By using computer applications, students integrate various skills including writing, editing and layout in agricultural publications. Graduate degree credit will not be given for both AGED 4543 and AGED 5543. (Typically offered: Spring Even Years)

AGED 5563. Thesis Proposal Development. 3 Hours.
The purpose of this course is to assist graduate students in the preparation of their thesis research proposal. Students will produce the first three chapters of their thesis by the end of the course. Prerequisite: AGED 5463 or HESC 5463. (Typically offered: Fall)

AGED 5632. Teaching Diverse Populations in Agricultural and Extension Education. 2 Hours.
(Formerly AGED 4632.) This course is designed to provide pre-service teachers of agriculture with an understanding of teaching diverse populations as applied to problems of practice in agricultural and extension education. Graduate degree credit will not be given for both AGED 4632 and AGED 5632. (Typically offered: Spring)

AGED 575V. Internship in Agricultural Education. 1-6 Hour.
Scheduled practical field experiences under supervision of a professional practitioner in off-campus secondary school systems. Emphasis includes classroom preparation, teaching, and student evaluation. (Typically offered: Fall, Spring and Summer)

AGED 5993. Global Horticulture and Human Nutrition to Enhance Community Resilience and Food Security. 3 Hours.
This course covers three broad areas (Global Horticulture, Sustainable International Development, Human Health and Nutrition) and experts on three campuses created the instruction. The course is intended to be multi-disciplinary, and students should use their contextual knowledge to add to weekly discussions. Prerequisite: Graduate standing. (Typically offered: Spring)
This course is cross-listed with FDSC 5993, HORT 5993.

AGED 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Degree Conferred:
M.S. in Agricultural Economics (AGEC)

Areas of Concentration: Agricultural Economics, Agribusiness, Atlantis, and International Agribusiness.

Primary Areas of Faculty Research: Agribusiness, agricultural cooperatives, agricultural finance, agricultural marketing, agricultural outlook, agricultural policy, agricultural production, applied econometrics, delta crops (rice, soybeans, wheat, cotton), economic development, farm management, food policy, food marketing, global marketing, integrated pest management, international trade, managerial economics, market infrastructure and development, natural resource management, product development, production economics, public finance, risk management.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

M.S. in Agricultural Economics with Agricultural Economics Concentration

Admission Requirements: All applicants to the graduate program must submit official scores from either the Graduate Record Exam (GRE) or Graduate Management Admission Test (GMAT), although GRE scores are preferred.

Requirements for the Master of Science Degree in Agricultural Economics (Thesis): (Minimum 31 hours.)

Prerequisites to the Thesis Concentration:

Prerequisites to the Thesis Concentration

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

M.S. in Agricultural Economics with Atlantis Concentration

Requirements for the Master of Science Degree in Agricultural Economics (U.S.-E.U. Atlantis Double Degree in Agricultural Economics and Rural Development Concentration): Thesis (Minimum 31 hours)

Participation in this two-year program includes U.S. students from the University of Arkansas and E.U. students from a consortium of five universities in Europe (University of Ghent, Ghent, Belgium; Humboldt University, Berlin, Germany; National Institute of Advanced Training and Research in Food and Agronomy, Rennes, France; University of Pisa, Pisa, Italy; and the Slovak University of Agriculture, Nitra, Slovakia). The program includes five academic terms (four semesters and one summer). U.S. students enroll for at least two terms at the University of Arkansas and for at least two terms at two E.U. universities in the European consortium. E.U. students enroll for at least two terms at two E.U. universities in the European consortium and at least two terms at the University of Arkansas. Study in both the U.S. and E.U. includes internships during the summer, and one semester of joint thesis research supervised by U.S. and E.U. faculty. All coursework is in English in both the U.S. and E.U. Class enrollment for all students remains at their home university.
Prerequisites to the Non-thesis Concentration:

Six hours of mathematics (College Algebra and Survey of Calculus or Finite Mathematics or above) 6
Three semester hours of statistics 3
Six semester hours of lower division economic theory (micro & macro) 6
Three semester hours of upper-level management 3
Three semester hours of upper-level marketing 3
Three semester hours of introductory accounting. 3
Total Hours 24

Core Requirements

Coursework from each of the following areas:
Quantitative Analysis or Research Methods 3
Management or Marketing 3
Policy or Analysis of Public Sector Issues 3
Six hours of master's thesis 6
AGEC 5011 Seminar 1

Controlled Electives 15
Other graduate courses in Agricultural Economics
Other graduate courses approved by the student's advisory committee

Other Requirements

Minimum of 16 hours in Agricultural Economics
Maximum of 15 hours of transfer courses from an inventory of classes offered in the Atlantis consortium of EU universities to satisfy core requirements and/or controlled electives.

M.S. in Agricultural Economics with International Agribusiness Concentration

Requirements for the Master of Science Degree in Agricultural Economics (International Agribusiness Concentration, Non-thesis): (Minimum 31 hours.)

Note: Participation in this program includes University of Ghent (Belgium), and University of Arkansas (UA) students. Students may study either semester at the UA campus and the other semester at the University of Ghent in Belgium, West Europe. Classes for UA students taken at the University of Ghent are in English. The summer may be spent completing an agribusiness internship or special problem, but enrollment remains at the host institution. UA students earn credits in AGEC 502V Special Topics for courses taken at Ghent.

Prerequisites to the Non-thesis Concentration:

Six semester hours of mathematics (College Algebra and Survey of Calculus or Finite Mathematics or above) 6
Three semester hours of statistics 3
Six semester hours of lower division economic theory (micro & macro) 6
Three semester hours of upper-level management 3
Three semester hours of upper-level marketing 3
Three semester hours of introductory accounting. 3
Total Hours 24

Core Requirements

AGEC 5403 Quantitative Methods for Agribusiness 3
AGEC 5413 Agribusiness Strategy 3
AGEC 5143 Financial Management in Agriculture or AGEC 5043 Agricultural Finance or AGEC 5213 Agricultural Business Management 3
AGEC 5153 The Economics of Public Policy or AGEC 5233 Political Economy of Agriculture and Food or AGEC 5133 Agricultural and Environmental Resource Economics or AGEC 5603 Food Economics and Health 3
AGEC 5303 Agricultural Marketing Theory 3
AGEC 5011 Seminar 1

Agribusiness Management (University of Ghent Electives)

Select the equivalent of 12 semester hours from the following: 12
AGEC 502V Special Topics 1-3
Sociological Perspectives of Rural Development (3 credits) 3
AGEC 502V Special Topics 1-3
Micro-economic Theory and Farm Management (3 credits) 3
AGEC 502V Special Topics 1-3
Rural Project Management (3 credits) 3
AGEC 502V Special Topics 1-3
Agricultural and Rural Policy (3 credits) 3
AGEC 502V Special Topics 1-3
Rural Development and Agriculture (3 credits) 3
AGEC 502V Special Topics 1-3
Development Economics (3 credits) 3
AGEC 502V Special Topics 1-3
Agricultural Economics of Developing Countries (2 credits) 2
AGEC 502V Special Topics 1-3
Advanced Marketing and Agribusiness Management (3 credits) 3
AGEC 502V Special Topics 1-3
Applied Rural Economic Research Methods (3 credits) 3
AGEC 502V Special Topics 1-3
Applied Statistics (3 credits) 3
AGEC 502V Special Topics 1-3
Food Marketing and Consumer Behavior (3 credits) 3
AGEC 502V Special Topics 1-3
Scientific Communications on Rural Development (2 credits) 2
AGEC 502V Special Topics 1-3
Econometrics (2 credits) 2
AGEC 502V Special Topics 1-3
Economics and Management of Natural Resources (2 credits) 2
AGEC 502V Special Topics 1-3
The European Union's International Development Policy (3 credits) 3

Controlled Electives 3
AGEC 503V Internship in Agricultural Economics
Other graduate courses in Agricultural Economics
Graduate courses in the Walton College of Business
Other graduate courses

Other Requirements
A maximum of 9 hours of AGEC graduate-level courses may be completed from a) those courses also offered as 4000-level undergraduate classes, and/or b) courses numbered 4000 or lower that do not have a corresponding graduate offering.

Minimum of 16 hours of Agricultural Economics

**AGEC 502V** Special Topics 1-3

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Rumley, Rusty W., J.D. (University of Oklahoma), Research Assistant Professor, 2009.

Thomsen, Michael R., Ph.D. (University of Minnesota-Morris), M.S., B.S. (Utah State University), Professor, 1998.

Wales, Eric J., Ph.D. (Michigan State University), B.S. (Cornell University), Distinguished Professor, 1980.

Watkins, Kenton Bradley, Ph.D. (Oklahoma State University), M.S., B.A. (University of Arkansas), Professor, 2002.

**Courses**

**AGEC 500V. Special Problems. 1-3 Hour.**

Individual reading and investigation of a special problem in agricultural economics not available under regular courses, under the supervision of the graduate faculty. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

**AGEC 5011. Seminar. 1 Hour.**

Presentation and discussion of graduate student research. Formal presentations are made by all graduate students. Consideration given to research design, procedures, and presentation of results. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

**AGEC 502V. Special Topics. 1-3 Hour.**

Advanced studies of selected topics in agricultural economics not available in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

**AGEC 503V. Internship in Agricultural Economics. 1-3 Hour.**

On-the-job application of skills developed in the M.S. program. (Typically offered: Fall, Spring and Summer)

**AGEC 5043. Agricultural Finance. 3 Hours.**

(Formerly AGEC 4403.) Principles and procedures whereby agricultural firms acquire and utilize funds required for their successful operation. Emphasis is placed upon risk of finance and financial planning and consideration is given to an understanding of financial institutions serving agriculture. Graduate degree credit will not be given for both AGEC 4143 and AGEC 5043. Prerequisite: (AGEC 1103 or ECON 2103) and (AGEC 2103 or ECON 2023) and (AGEC 2142 or ACCT 2103 or WCOB 1023). (Typically offered: Fall)

**AGEC 5053. Advanced Farm Business Management. 3 Hours.**

(Formerly AGEC 4403.) Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Graduate degree credit will not be given for both AGEC 4403 and AGEC 5053. Prerequisite: AGEC 3403 and AGME 2903 or equivalent. (Typically offered: Fall)

**AGEC 5063. Agricultural and Rural Development. 3 Hours.**

(Formerly AGEC 4163.) Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Graduate degree credit will not be given for both AGEC 4163 and AGEC 5063. Prerequisite: AGEC 1103 (or ECON 2023). (Typically offered: Fall)

**AGEC 5073. Basis Trading: Applied Price Risk Management. 3 Hours.**

(Formerly AGEC 4373.) This course provides students an opportunity to gain a detailed working knowledge of how basis trading concepts and practices are applied to agricultural markets and to develop a skill set that can be put immediately into practice in any basis trading operation. Graduate degree credit will not be given for both AGEC 4373 and AGEC 5073. Prerequisite: AGEC 3373 or consent of instructor. (Typically offered: Spring and Summer)
AGEC 5083. Basis Trading: Case Study. 3 Hours.  
(Formerly AGEC 4383.) This course provides an opportunity to apply principles learned in AGEC 4373 to grain merchandising using the case study approach. The course will involve in-class meetings supplemented with faculty-directed group-based learning experiences involving professional grain merchandisers. Group activities will follow the traditional case study method. Graduate degree credit will not be given for both AGEC 4383 and AGEC 5083. Prerequisite: AGEC 4373 or AGEC 5073 (formerly AGEC 4373). (Typically offered: Fall)

AGEC 5103. Agricultural Microeconomics. 3 Hours.  
Masters-level training in agricultural microeconomic theory and its application to food, agriculture and the environment. The course covers behavior of firms, households and markets, in more depth and rigor than encountered in undergraduate courses. Theories are explained and then applied to relevant food, agricultural, environmental and resource issues. (Typically offered: Fall)

AGEC 5113. Agricultural Prices and Forecasting. 3 Hours.  
(Formerly AGEC 4113.) Price theory and techniques for predicting price behavior of general economy and price behavior of individual agricultural products will be analyzed. Provides practice in the application of economics and statistics to agricultural price analysis. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both AGEC 4113 and AGEC 5113. Prerequisite: (AGEC 1103 or ECON 2023), AGEC 2403, (AGST 4023 or STAT 2303 or WCOB 1033) and MATH 2053. (Typically offered: Spring)

AGEC 5123. Agribusiness Entrepreneurship. 3 Hours.  
(Formerly AGEC 4323.) Agribusiness entrepreneurship is the process of bringing food or rural-based products and services from conceptualization to market. The course presents the opportunities, problems and constraints facing individuals and firms operating in rural or isolated markets while emphasizing the steps in conceptualization, development, marketing, and delivery-selling of agribusiness rural products. Graduate degree credit will not be given for both AGEC 4323 and AGEC 5123. Prerequisite: AGEC 1103 or equivalent. (Typically offered: Spring)

AGEC 5133. Agricultural and Environmental Resource Economics. 3 Hours.  
An economic approach to problems of evaluating private and social benefits and costs of altering the environment. Emphasis given to the interaction of individuals, institutions, and technology in problems of establishing and maintaining an acceptable level of environmental quality. Prerequisite: Minimum of 3 hours Agricultural Economics or Economics at 3000 level or higher or PhD standing. (Typically offered: Spring)

AGEC 5143. Financial Management in Agriculture. 3 Hours.  
Covers advanced topics in agricultural finance. The general focus of the course is the financial management of non-corporate firms. Covers the basic tools of financial analysis including financial arithmetic, asset evaluation under risk, and financial analysis and planning using econometric models. Topics covered include management of current assets, capital budgeting, capital structure, and institutions involved in agricultural finance. Prerequisite: Graduate standing. (Typically offered: Fall)

AGEC 5153. The Economics of Public Policy. 3 Hours.  
This class will examine the impact of public policy on agricultural and other business sectors as well as households and individuals, particular in rural areas. Emphasis will also be placed on analyzing the potential impact of future policy changes. The course will focus on the application of welfare criteria and economic analyses to the problems and policies affecting resource adjustments in agriculture and rural communities. Prerequisite: Graduate standing. (Typically offered: Spring)

AGEC 5203. Agribusiness Marketing Management. 3 Hours.  
(Formerly AGEC 4303.) Marketing concepts will be developed and applied to the global food and fiber system. The course will use both commodity and product marketing principles and economic theory to analyze varied marketing situations. Case studies will be used to demonstrate the role that demand analysis and consumer behavior play in market management. Graduate degree credit will not be given for both AGEC 4303 and AGEC 5203. Prerequisite: AGEC 2303 and AGEC 3303. (Typically offered: Spring)

AGEC 5213. Agricultural Business Management. 3 Hours.  
(Formerly AGEC 4313.) The planning, organizing, leading and controlling functions of management as they relate to agricultural business firms. Marketing of value-added products, budgeting, organizational structure, cost control, financial statements, capital budgeting and employee supervision and motivation. Case studies are used to teach communication and decision-making skills. Graduate degree credit will not be given for both AGEC 4313 and AGEC 5213. Prerequisite: AGEC 2142 and AGEC 2141L or (ACCT 2013 and AGEC 2303 or equivalent). (Typically offered: Fall)

AGEC 5223. International Agricultural Trade and Commercial Policy. 3 Hours.  
(Formerly AGEC 4623.) Analysis of agricultural market competition and performance in a global economy. The impact of domestic and international agricultural policies on domestic and international markets and welfare. Economic principles applied to the interaction of economic events in the world food economy. Graduate degree credit will not be given for both AGEC 4623 and AGEC 5223. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013). (Typically offered: Spring)

AGEC 5233. Political Economy of Agriculture and Food. 3 Hours.  
(Formerly AGEC 4613.) Agricultural and food policies are studied from domestic and international perspectives. Laws, regulations, decisions and actions by governments and other institutions are examined in terms of rationale, content, and consequences. Economic and political frameworks are used to assess policies in terms competitive structure, operation, and performance of farming and food systems. Graduate degree credit will not be given for both AGEC 4613 and AGEC 5233. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (PSYC 2003 or SOCI 2013 or HDF 2603). (Typically offered: Fall)

AGEC 5303. Agricultural Marketing Theory. 3 Hours.  
Survey of the structure of agricultural product and factor markets including a critique of theoretical analyses of industry structure, conduct and performance; and a review of market structure research in agricultural industries. Prerequisite: Graduate standing. (Typically offered: Fall)

AGEC 5403. Quantitative Methods for Agribusiness. 3 Hours.  
Application of quantitative techniques used to support managerial decision-making and resource allocation in agricultural firms. Provides exposure to mathematical and statistical tools (regression analysis, mathematical programming, simulation) used in economic analysis in agriculture. Emphasis is placed on computer applications with conceptual linkage to economic theory. Prerequisite: Graduate standing. (Typically offered: Fall)

AGEC 5413. Agribusiness Strategy. 3 Hours.  
Addresses problems of strategy formulation in agribusiness emphasizing current problems and cases in agriculture. Surveys modern and classic perspectives on strategy with applications to agribusiness. Examines the development of firm level strategies within the structure and competitive environment of agricultural firms and industries. Prerequisite: Graduate standing. (Typically offered: Spring)

Agricultural and Extension Education website (http://agricultural-education-communications-and-technology.uark.edu/graduate-studies/)

Degrees Conferred:
M.S. (AEED)

Areas of Study: Agricultural education, communication, technology, or extension education, and a technical area.

Primary Areas of Faculty Research: Agricultural teacher education; extension and non-formal education; agricultural systems technology management; and agricultural communications.

M.S. in Agricultural and Extension Education
Prerequisites to Degree Program: Bachelor’s degree in a closely allied field. Some deficiency courses may be assessed depending on the background and educational objectives of the student. Applicants must be admitted to the Graduate School and must have a) satisfactory undergraduate preparation in related fields of study and b) satisfactory GRE or MAT scores. In addition, applicants must submit three letters of recommendation and a writing sample.

Requirements for the Master of Science (M.S.) Degree: This program requires 33 semester hours, with a choice of either a thesis or non-thesis option.

Thesis Option: There are 12 hours of core courses consisting of AGED 5463 Research Methodology in the Social Sciences, AGED 5473 Interpreting Social Data in Agriculture, AGED 5053 Philosophy of Agricultural and Extension Education, and AGED 5001 Seminar (3, 1-hour sections). (Sp, Fa, Sp). Additionally, students in the thesis option complete a written thesis, AGED 600V (6 hours). The thesis will focus on a research problem related to agricultural education, communications, leadership, technology or extension education.

Non-Thesis Option: There are 12 hours of core courses consisting of AGED 5463 Research Methodology in the Social Sciences (Fa), AGED 5473 Interpreting Social Data in Agriculture (Fa), and AGED 5053 Philosophy of Agricultural and Extension Education (Sp) and a 3-hour communication elective.

The remaining hours (15 for the thesis option, 21 for the non-thesis option) may be taken in a technical area or in agricultural and extension education courses. Students should work with their advisory committee to choose courses to meet their academic goals.

A comprehensive examination is required of all candidates, including an oral examination for the thesis candidate, and a written examination for the non-thesis candidate.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Graduate Faculty
Cox, Casandra Kay, M.S., B.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2003.
Graham, Donna Lucas, Ph.D. (University of Maryland-College Park), M.Ed., B.S. (University of Arkansas), University Professor, Department of Agricultural Education, Communications and Technology, 1985.
Courses

AGED 5001. Seminar. 1 Hour.
Presentations and discussion of graduate student research as well as review of current literature and topics of current interest by students and faculty. All graduate students will make at least one formal presentation. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

AGED 5013. Advanced Methods in Agricultural Mechanics. 3 Hours.
Emphasis on shop organization and management, courses of study, unit shop instruction, and development of skills in agricultural mechanics. (Typically offered: Summer Odd Years)

AGED 5033. Developing Leadership in Agricultural Organizations. 3 Hours.
Organizational concepts of leadership; administrative styles and structures; leadership for boards, committees, governmental bodies, and review of societal and political processes. Prerequisite: Graduate standing. (Typically offered: Fall)

AGED 5053. Philosophy of Agricultural and Extension Education. 3 Hours.
An examination and analysis of social and economic events leading to the establishment and maintenance of federal, state, county, and local agricultural education programs. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Spring)

AGED 510V. Special Problems. 1-6 Hour.
Individual investigation of a special problem in agricultural education which is not available through regular courses. These will be directed by a member of the graduate faculty. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGED 5113. Undergraduate Researchers Improving Student Experiences. 3 Hours.
To engage students in the social sciences in action research that serves to solve a problem or answer a question within the student’s academic field through scientific inquiry. All students will work with professionals, commonly outside of the university, within their discipline to conduct their action research in order to solve a problem experienced by that professional. Students may work in teams or individually to complete the overall purpose of the course. Prerequisite: AGED 5463 or HESC 5463 or other instructor approved Research Methods course. (Typically offered: Spring)

AGED 5143. Electronic Communications in Agriculture. 3 Hours.
(Formerly AGED 4143.) An overview of communication technology in the agricultural, food and life sciences. Graduate degree credit will not be given for both AGED 4143 and AGED 5143. (Typically offered: Spring Even Years)

AGED 5153. Survey of Leadership Theory in Agriculture. 3 Hours.
(Formerly AGED 4153.) An interdisciplinary analysis of current issues in the practice of leadership in a contemporary and changing society, particularly as they affect agricultural organizations and issues. Discussions of leadership theory, roles of leaders, skills for effective leadership, diversity issues, and followership will challenge students to think critically about leadership, enhance personal leadership performance and potential, and prepare for or expand leadership roles, and to become innovative and productive in dealing with challenges facing agricultural organizations today. Graduate degree credit will not be given for both AGED 4153 and AGED 5153. Prerequisite: AGED 3153. (Typically offered: Fall)

AGED 5163. Leadership Analysis Through Film. 3 Hours.
(Formerly AGED 4163.) Films are a catalyst (Clemens, 1999). They make you laugh, cry, cheer, and think. Flum (2002) stated leadership is best learned in the leadership moment. Moreover, the principles of Andragogy advocate adult learners best learning when there is a practical application of the learning subject. Therefore, this course builds upon the study of leadership theory by allowing students to analyze, reflect, synthesize, and apply leadership theories, models and concepts in the context of film. The course materials encourage students to reflect, synthesize, analyze, and apply the information learned from major leadership theories and apply them to various scenarios and situations demonstrated in selected films. Graduate degree credit will not be given for both AGED 4163 and AGED 5163. (Typically offered: Spring and Summer)

AGED 520V. Special Topics in Agricultural and Extension Education. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in agriculture education. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

AGED 5243. Graphic Design in AFLS. 3 Hours.
(Formerly AGED 4243.) This course provides students with graphic design and software skills specific to industries in Agriculture, Food, and Life Sciences. Students will learn to use industry-standard software (InDesign, Photoshop, Illustrator, Microsoft Excel, etc.) to prepare text and graphics and package them for use in print production. Graduate degree credit will not be given for both AGED 4243 and AGED 5243. Prerequisite: AGME 2903 or ISYS 1123 or equivalent. (Typically offered: Fall, Spring and Summer)

AGED 5343. Communication Campaigns in Agriculture. 3 Hours.
(Formerly AGED 4343.) Students will develop understanding of the principles, practices and applications of social marketing, integrated marketing communications, advertising and public relations as they pertain to developing communication campaign strategies for the agricultural industry. Students will develop a communication campaign for an agricultural company and/or entity focused on a specific product or service. Graduate degree credit will not be given for both AGED 4343 and AGED 5343. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

AGED 5363. Educational Delivery Techniques. 3 Hours.
Students will learn to apply teaching and learning theory in the development of engaging instruction delivered through electronic media. The goal of the course is not to make experts in “programming” or “theory”, but rather to prepare students with the knowledge/practical skills necessary to deliver curriculum through various methods. Prerequisite: Graduate standing. (Typically offered: Irregular)

AGED 5443. Principles of Technological Change. 3 Hours.
(Formerly AGED 4443.) This course introduces a structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introduction, adoption, and diffusion of technological change. This course may be offered as a web-based course. Graduate degree credit will not be given for both AGED 4443 and AGED 5443. (Typically offered: Fall Odd Years)
AGED 5463. Research Methodology in the Social Sciences. 3 Hours.
Logical structure and the method of science. Basic elements of research design; observation, measurement, analytic method, interpretation, verification, presentation of results. Applications to research in economic or sociological problems of agriculture and human environmental sciences. Prerequisite: Graduate standing.
(Typically offered: Fall)
This course is cross-listed with HESC 5463.

AGED 5473. Interpreting Social Data in Agriculture. 3 Hours.
The development of competencies in analyzing, interpreting and reporting the results of analyses of social science data in agriculturally related professions. Students will select appropriate analysis techniques and procedures for various problems, analyze data, and interpret and report the results of statistical analyses in narrative and tabular form. (Typically offered: Fall)

AGED 5483. Technical Communication in the Social Sciences. 3 Hours.
This course will provide students with the basic principles and techniques in communicating social science information relevant to human subject research in agriculture, natural resources, and life sciences to the general public. Communication processes covered in the course include audience identification, writing, editing, and production of social science-based materials for popular and refereed publications. Focus will also be placed on thesis preparation and writing and research manuscript development and dissemination of social science research. Web delivered course. Prerequisite: Graduate standing. (Typically offered: Spring)

AGED 550V. College Teaching in Agriculture and Related Disciplines. 1-3 Hour.
For students who are pursuing graduate degrees where emphasis is on preparation for a research career, but who also may desire or expect to teach. Provides theory and practice in planning and executing a college-level course. (Typically offered: Irregular)

AGED 5543. Ag Publications. 3 Hours.
(Formerly AGED 4543.) Students produce a magazine through classroom study mirroring a professional magazine staff and are provided an opportunity for their writing, advertisements, photographs and artwork to be published in the magazine. By using computer applications, students integrate various skills including writing, editing and layout in agricultural publications. Graduate degree credit will not be given for both AGED 4543 and AGED 5543. (Typically offered: Spring Even Years)

AGED 5563. Thesis Proposal Development. 3 Hours.
The purpose of this course is to assist graduate students in the preparation of their thesis research proposal. Students will produce the first three chapters of their thesis by the end of the course. Prerequisite: AGED 5463 or HESC 5463. (Typically offered: Fall)

AGED 5562. Teaching Diverse Populations in Agricultural and Extension Education. 2 Hours.
(Formerly AGED 4632.) This course is designed to provide pre-service teachers of agriculture with an understanding of teaching diverse populations as applied to problems of practice in agricultural and extension education. Graduate degree credit will not be given for both AGED 4632 and AGED 5562. (Typically offered: Spring)

AGED 575V. Internship in Agricultural Education. 1-6 Hour.
Scheduled practical field experiences under supervision of a professional practitioner in off-campus secondary school systems. Emphasis includes classroom preparation, teaching, and student evaluation. (Typically offered: Fall, Spring and Summer)

AGED 5993. Global Horticulture and Human Nutrition to Enhance Community Resilience and Food Security. 3 Hours.
This course covers three broad areas (Global Horticulture, Sustainable International Development, Human Health and Nutrition) and experts on three campuses created the instruction. The course is intended to be multi-disciplinary, and students should use their contextual knowledge to add to weekly discussions. Prerequisite: Graduate standing. (Typically offered: Spring)
This course is cross-listed with FDSC 5993, HORT 5993.

AGED 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Agricultural, Food and Life Sciences (AFLS)

Kristin Seals
Program Coordinator
AFLS D112
479-575-3163
Email: kdseals@uark.edu

Degree Conferred:
M.S. in Food Safety (FDSF)
Ph.D. in Agricultural, Food and Life Sciences (AFLS) with Agricultural Education, Communication and Technology Concentration (p. 52)
Ph.D. in Agricultural, Food and Life Sciences (AFLS) with Entomology Concentration (p. 54)
Ph.D. in Agricultural, Food and Life Sciences (AFLS) with Horticulture Concentration (p. 207)
Ph.D. in Agricultural, Food and Life Sciences (AFLS) with Plant Pathology Concentration (p. 282)

Program Description: The interdisciplinary Ph.D. program, which encompasses four concentrations, allows faculty from across the Dale Bumpers College of Agricultural, Food, and Life Sciences to prepare students in a wide array of natural and social sciences within the agricultural, food and life sciences. The four concentrations allow students to specialize within a specific discipline, while developing a tailored degree program with electives and committee members from other disciplines.

The Master of Science in Food Safety is designed to prepare students for higher positions in the food industry. The program provides a subject matter core of courses in food microbiology, sanitation, food processing, epidemiology, food law, HACCP applications, human diseases, and other quality control areas facing the food industry.

The M.S. in Food Safety (https://online.uark.edu/programs/master-science-food-safety.php) is offered online through the University of Arkansas Global Campus.

Requirements for M.S. in Food Safety

Master of Science Program: The Master of Science in Food Safety is designed to prepare students for higher positions in the food industry.
The program provides a subject matter core of courses in food microbiology, sanitation, food processing, epidemiology, food law, HACCP applications, human diseases, and other quality control areas facing the food industry.
The Master of Science in Food Safety program requires a total of 30 hours of graduate-level work. Each student will complete one three-hour special problem in which a technical paper will be developed. This requirement may be satisfied by an approved thesis project in the Poultry or Food Science department. No more than a total of 6 hours of thesis,
special problems and internships are recognized for degree requirements with no more than a total of 6 hours of special problems and internships. Each special problem course should be limited to three hours of credit. An oral examination over all course work and the special problem project or thesis is required.

The student's advisory committee will outline the total program of study and will also determine if any course deficiencies should be addressed. An applicant must meet all of the requirements for admission to the Graduate School. The program's steering committee provides guidelines for student admission and establishes degree requirements. The student and the Program Coordinator, with approval of the Dean of the Graduate School, select a major adviser. The major adviser, in consultation with the student, will recommend additional faculty members to serve on the student's advisory committee, including one member from the program steering committee.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Courses
AFLS 501V. Special Topics. 1-3 Hour.  
Studies of selected topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Department of Animal Science Website (http://animal-science.uark.edu/)

Degrees Conferred:  
M.S., Ph.D. (ANSC)

Areas of Study: Graduate studies in subject matter areas of genetics, nutrition, parasitology, meats and physiology may be pursued. Beef cattle, dairy cattle, swine, sheep, and laboratory animals are available for research programs in the Animal Science Department.

Primary Areas of Faculty Research: Animal nutrition; animal physiology; animal breeding (genetics); meat science (muscle biology); parasitology.

M.S. in Animal Science
Prerequisites to Degree Programs: The student pursuing a program for a Master of Science degree must meet all general requirements of the Graduate School. In addition, the student must have completed the B.S. degree, preferably in a college or university with a major or equivalent in one of the areas of the Animal Science Department. Applicants must submit three letters of recommendation. All applicants must submit scores on the Graduate Record Examinations. Students accepted into the Ph.D. program without a M.S. must have a 3.20 cumulative grade-point average on all undergraduate work. The student will have a minimum of 24 hours post-baccalaureate work and 18 hours of dissertation at the end of the program.

Requirements for the Master of Science Degree: (Minimum 30 hours.)

Thesis Option. The thesis option requires a minimum of 24 hours of graduate course work, plus six hours of thesis research credit. The student and adviser will prepare a program of work that may include additional undergraduate basic courses and at least 24 semester hours of studies plus the successful completion and defense of a thesis and submission of one research paper suitable for submission to a peer reviewed professional journal. The defense of the thesis will consist of an oral defense administered by the graduate adviser and the thesis committee. Any deficiencies in undergraduate major requirements or prerequisites for advanced courses may be included in the student's program in addition to the 24 hours.

Non-thesis Option. The non-thesis option requires the completion of the plan of study outlined below, and successful performance on a final exam, but does not require the preparation of a thesis.

Requirements for application and admission to the non-thesis option:

- Applicants must meet the admission requirements of the University of Arkansas Graduate School. All applicants must submit scores on the GRE.
- An undergraduate B.S. degree in Animal Science or a closely related field of study, OR
- B.S. degree in another field with strong emphasis in the area of biological sciences (deficiency courses in addition to the prescribed 30 hour plan of study may be required).
- B.S. applicants without a strong background in biological sciences may be considered for admission to the program, but will be required to complete deficiency courses, as determined by the graduate admissions committee, in addition to the prescribed 30 hour plan of study.

Students must be accepted by a graduate adviser to begin the non-thesis program. The graduate adviser and the student's graduate committee will administer the non-thesis program. Degree requirements will be completed when the student has satisfactorily completed course work that meets the requirement for the non-thesis degree as listed below, and has satisfactorily completed a final exam. Students must have a final GPA # 2.85 to graduate from the program.

Non-Thesis M.S. Program Requirement: 30 hours minimum

Core Courses: 18-19 hours

Basic Program Core: 4 Hours

Animal Science Core Courses: 8-9 Hours

**Genetics:** 3 hours
- ANSC 5123 Advanced Animal Genetics
- ANSC 5133 Quantitative Inheritance

**Nutrition:** 3 hours
- Any 5000 level or higher nutrition class in ANSC

**Physiology:** 2-3 Hours
- ANSC 5923 Brain & Behavior
- ANSC 5932 Cardiovascular Physiology of Domestic Animals
- ANSC 5942 Endocrine Physiology of Domestic Animals
- ANSC 5952 Respiratory Physiology of Domestic Animals
- ANSC 5962 Gastrointestinal/Digestive Physiology of Domestic Animals
- ANSC 5972 Renal Physiology
- ANSC 6833 Reproduction in Domestic Animals

**ANSC Electives:** 9 Hours
- Any graduate-level course in ANSC

**General Electives:** 9 Hours
- CHEM 3813 Elements of Biochemistry
- GRSD 5003 The Professoriate: Teaching, Learning and Assessment
- Any 5000 or 6000 level course in departments within AFLS or in BIOL, CHEM, ESRM, or STAT
  - Or any graduate-level course approved by the graduate advisory committee.

Other program requirements

No more than two credit hours of seminar can be included in the 30 credit hour total.

At least 15 credits of ANSC courses must be at the 5000 level or above.

Non-thesis programs may include no more than three (3) hours of special problems in the minimum 30-credit hour requirement.

No more than six (6) hours of 4000-level graduate courses may be counted toward the 30-credit hour requirement.

Students are expected to meet with the graduate mentor at least once per semester.

Students are required to complete the annual graduate student progress report.

**Transition Between M.S. Programs:** A student can transition from the non-thesis to a thesis program with the approval of the graduate adviser and the department head. A student desiring to transition from the thesis to the non-thesis program must have the approval of the graduate adviser, the M.S. thesis committee, the department head, and the graduate dean. In addition, no credit will be granted for thesis hours, and a maximum of six hours of course work completed at the time of transition can be counted in the non-thesis degree program. Students in the non-thesis option are not eligible for departmental assistantships.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

---

**Ph.D. in Animal Science**

**Requirements for the Doctor of Philosophy Degree:** In addition to the general requirements of the Graduate School, the requirements will consist of a program of research, appropriate course work and seminars as specified by the student's graduate committee, as well as a dissertation and two research papers acceptable to the dissertation committee.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

**Graduate Faculty**

- **Ahrens, Chelsey,** Ph.D. (Texas Tech), M.S. (University of Georgia), B.S.A. (University of Arkansas), Assistant Professor, 2015.
- **Apple, Jason,** Ph.D., M.S. (Kansas State University), B.S.A. (Oklahoma State University), Professor, 1995.
- **Beck, Paul Arthur,** Ph.D. (University of Arkansas), M.S., B.S. (Oklahoma State University), Professor, 1997.
- **Coffey, Ken,** Ph.D. (University of Missouri-Columbia), M.S. (University of Kentucky), B.S. (University of Tennessee), Professor, 1996.
- **Gadberry, M. Shane,** Ph.D., M.S., B.S. (University of Arkansas), Associate Professor, 2006.
- **Huang, Yan,** Ph.D. (University of Wyoming), M.S. (Dankook University), B.S. (China Agricultural University), Assistant Professor, 2015.
- **Jennings, John A.,** Ph.D. (University of Missouri), M.S. (University of Arkansas), B.S. (Southwest Missouri State University), Professor, 1998.
- **Jogan, Kathleen,** Ed.D., M.S. (University of Arkansas), B.S. (Ursinus College), Instructor, 2015.
- **Kegley, Beth,** Ph.D., M.S. (North Carolina State University), B.S. (Virginia Polytechnic Institute and State University), Professor, 1996.
- **Koltes, Dawn A.,** Ph.D. (Iowa State University), Adjunct Assistant Professor, 2015.
- **Kutz, Bryan Richard,** M.S. (Western Kentucky University), B.S. (Oklahoma State University), A.S. (Northern Oklahoma College), Instructor, 1997.
- **Looper, Michael L.,** Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Professor, 2011.
- **Maxwell, Charles,** Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Georgia), Professor, 1996.
- **Nugent, Russell A.,** Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Pennsylvania State University), Adjunct Professor, 2011.
- **Philipp, Dirk,** Ph.D. (Texas Tech University), M.S., B.S. (University of Leizig, Germany), Associate Professor, 2007.
- **Pohlman, Fred W.,** Ph.D. (Kansas State University), M.S. (University of Tennessee), B.S. (University of Missouri-Columbia), Professor, 1997.
- **Potter, Daniel S.,** M.N.A.S., B.S. (Missouri State University), Instructor, 2016.
- **Powell, Jeremy G.,** Ph.D. (University of Arkansas), D.V.M. (Oklahoma State University), B.S. (University of Arkansas), Professor, 2009.
- **Roeder, Richard A.,** Ph.D., M.S. (Texas A&M University), B.A. (Glassboro State College), Professor, 2002.
- **Rorie, Rick,** Ph.D. (Louisiana State University), M.S., B.S. (University of Arkansas), Professor, 1989.
- **Rosenkranz, Charles F.,** Ph.D. (Kansas State University), M.S., B.S. (University of Missouri-Columbia), Professor, 1991.
- **Russell, Mark,** Ed.D. (Texas Tech University), M.S., B.S. (Colorado State University), Assistant Professor, 2010.
- **Shanks, Bruce C.,** Ph.D. (South Dakota State University), M.S. (Montana State University), B.S. (Missouri State University), Adjunct Assistant Professor, 2011.
- **Ward, Heidi,** Ph.D. (University of Oklahoma), D.V.M. (Oklahoma State University), B.S. (University of Oklahoma), Assistant Professor, 2015.
Courses

ANSC 500V. Special Problems. 1-6 Hour.
Work in special problems of animal industry. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANSC 5013. Domestic Animal Energetics. 3 Hours.
Physical, physiological and biochemical aspects of energy metabolism of domestic animals and their applications to livestock production. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

ANSC 5023. Legal Issues in Animal Agriculture. 3 Hours.
(Formerly ANSC 4123.) An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation - from local to state to federal, depending on the issue - will be studied and discussed. Graduate degree credit will not be given for both ANSC 4123 and ANSC 5023. (Typically offered: Spring Odd Years)

ANSC 5052. Cow-Calf Management. 2 Hours.
(Formerly ANSC 4252.) Systems of cow-calf management including the practical application of the principles of breeding, feeding, and management to commercial and purebred beef cattle under Arkansas conditions. Graduate degree credit will not be given for both ANSC 4252 and ANSC 5052. (Typically offered: Fall)

ANSC 5010V. Special Topics in Animal Sciences. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

ANSC 5123. Advanced Animal Genetics. 3 Hours.
Specialized study of animal genetics. Lecture 3 hours per week. Prerequisite: ANSC 3123. (Typically offered: Fall Even Years)
This course is cross-listed with POSC 5123.

ANSC 5133. Quantitative Inheritance. 3 Hours.
Advanced study of the genetic basis of variation and the genetic control of quantitative traits in populations. Lecture 3 hours per week. Prerequisite: ANSC 3133. (Typically offered: Spring Odd Years)

ANSC 5143. Biochemical Nutrition. 3 Hours.
Interrelationship of nutrition and physiological chemistry; structure and metabolism of physiological significant carbohydrates, lipids, and proteins; integration of metabolism with provision of tissue fuels; specie differences in regulatory control of tissue and whole body metabolism of nutrients. Prerequisite: CHEM 3813. (Typically offered: Fall Even Years) This course is cross-listed with POSC 5143.

ANSC 5152. Protein and Amino Acid Nutrition. 2 Hours.
Students will be introduced to the basic processes of protein digestion, amino acid absorption, transport, metabolism, and utilization along with how biochemical function of proteins and their dynamic state affect nutritional status for animals and man. Prerequisite: CHEM 3813. (Typically offered: Spring Even Years) This course is cross-listed with POSC 5152.

ANSC 5163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring) This course is cross-listed with POSC 5163.

ANSC 5253. Advanced Livestock Production. 3 Hours.
(Formerly ANSC 4262.) Methods in producing purebred and commercial swine with specific emphasis on the management programs needed for profitable pork production in Arkansas. Graduate degree credit will not be given for both ANSC 4262 and ANSC 5262. (Typically offered: Fall Even Years)

ANSC 5272. Sheep Production. 2 Hours.
(Formerly ANSC 4272.) Purebred and commercial sheep management emphasizing the programs of major importance in lamb and wool production in Arkansas. Graduate degree credit will not be given for both ANSC 4272 and ANSC 5272. (Typically offered: Spring Odd Years)

ANSC 5283. Horse Production. 3 Hours.
(Formerly ANSC 4283.) Production, use and care of horses and ponies including breeding, feeding, handling, and management. Lecture 2 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both ANSC 4283 and ANSC 5283. Corequisite: Lab component. (Typically offered: Spring)

ANSC 5452. Milk Production. 2 Hours.
(Formerly ANSC 4452.) Principles of breeding, feeding, and management of dairy cattle will be studied. Graduate degree credit will not be given for both ANSC 4452 and ANSC 5452. (Typically offered: Spring)

ANSC 5482. Companion Animal Managment. 2 Hours.
(Formerly ANSC 4482.) The study and application of principles of domestication, nutrition, reproduction, parasitology, diseases, behavior, and husbandry management to companion animals. Dogs, cats, and exotic animals will be the species of primary interest. Practical problems of care and management of these species will be solved. Graduate degree credit will not be given for both ANSC 4482 and ANSC 5482. Prerequisite: BIOL 1543 or equivalent or consent of instructor. (Typically offered: Fall)

ANSC 5553. Forage-Ruminant Relations. 3 Hours.
Advanced chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake and digestion, and techniques of measuring forage utilization and systems analysis at the plant-animal interface. Lecture 3 hours per week. CSES 1203 recommended. Prerequisite: ANSC 3143. (Typically offered: Spring Odd Years)
This course is cross-listed with CSES 5553.

ANSC 5652. Stocker-Feedlot Cattle Management. 2 Hours.
(Formerly ANSC 4652.) Production and management systems for stocker and feed-lot cattle including practical applications of forage systems, feeding, health management and economics of production of these livestock. Graduate degree credit will not be given for both ANSC 4652 and ANSC 5652. (Typically offered: Spring)

ANSC 5743L. Advanced Analytical Methods in Animal Sciences Laboratory. 3 Hours.
Introduction into theory and application of current advanced analytical techniques used in animal research. Two 3-hour laboratory periods per week. (Typically offered: Fall)
This course is cross-listed with POSC 5743L.
ANSC 5853. Advanced Meats Technology. 3 Hours.
An intensive study of processed meats, relating the science, technology, and quality of further processed meat and poultry products. Product development, sensory and chemical analysis, microbiology, nutritional aspects, and product labeling are covered. Prerequisite: POSC 4314 or ANSC 3613. (Typically offered: Spring Even Years)

ANSC 5901. Seminar. 1 Hour.
Critical review of the current scientific literature pertaining to the field of animal science. Oral reports. Lecture 1 hour per week. Prerequisite: Senior standing. (Typically offered: Fall)

ANSC 5923. Brain & Behavior. 3 Hours.
Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory systems and the autonomic nervous system, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3032 or POSC 3032) or (ANSC 3042 or POSC 3042) or PSYC 2003 or BIOL 2213 or BIOL 2443 or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with POSC 5923.

ANSC 5932. Cardiovascular Physiology of Domestic Animals. 2 Hours.
Cardiovascular physiology, including mechanisms of heart function and excitation, and blood vessel mechanisms associated with the circulatory system in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Fall)
This course is cross-listed with POSC 5932.

ANSC 5942. Endocrine Physiology of Domestic Animals. 2 Hours.
Endocrine physiology, including mechanisms of hormone secretion, function, and regulation. Mechanisms associated with the endocrine system will be discussed for domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (or first 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Fall)
This course is cross-listed with POSC 5942.

ANSC 5952. Respiratory Physiology of Domestic Animals. 2 Hours.
Respiratory physiology, including mechanisms of lung function and gas exchange. Mechanisms associated with the interaction of the respiratory system with other bodily systems in domestic animals and poultry will be discussed. Lecture 3 hours; drill 1 hour per week for first 8 weeks of semester. Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Spring)
This course is cross-listed with POSC 5952.

ANSC 5962. Gastrointestinal/Digestive Physiology of Domestic Animals. 2 Hours.
Gastrointestinal and hepatic physiology, including mechanisms of digestion, absorption of nutrients with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Fall)
This course is cross-listed with POSC 5962.

ANSC 5972. Renal Physiology. 2 Hours.
Renal physiology, including mechanisms of renal clearance with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Spring)
This course is cross-listed with POSC 5972.

ANSC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ANSC 6123. Advanced Food Animal Wellbeing. 3 Hours.
Advances in fundamentals of animal welfare including animal health, animal handling, food safety and productivity. Prerequisite: ANSC 2213 or BIOL 4833 or instructor consent. (Typically offered: Spring)
This course is cross-listed with POSC 6123.

ANSC 6143. Minerals in Animal Nutrition. 3 Hours.
Mineral nutrients, their sources and functions, as related to nutrition of domestic animals. Lecture 3 hours per week. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Fall; Spring Even Years)

ANSC 6243. Ruminant Nutrition. 3 Hours.
Anatomy and physiology of the rumen. The nutrient requirements of microbial organisms and the relation of microbial digestion in the rumen to the nutrition of cattle, sheep and other ruminants. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Fall Odd Years)

ANSC 6343. Vitamin Nutrition in Domestic Animals. 3 Hours.
The vitamins required by domestic animals with emphasis upon their role in animal nutrition, physiological functions, and consequences of failure to meet the requirement of the animal. Lecture 3 hours per week. Prerequisite: ANSC 3143 (or POSC 4343) and CHEM 3813. (Typically offered: Spring Even Years)
This course is cross-listed with POSC 6343.

ANSC 6833. Reproduction in Domestic Animals. 3 Hours.
Comprehensive review of current theory of reproductive function in domestic animals. Lecture 3 hours per week. Prerequisite: ANSC 3433. (Typically offered: Spring Even Years)

ANSC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Anthropology (ANTH)
JoAnn D’Alisera
Interim Chair and Director of Graduate Studies
330 Old Main
479-575-2508
Email: dalisera@uark.edu

Anthropology Department Website (http://anth.uark.edu)

Degrees Conferred:
M.A., Ph.D. (ANTH)

Areas of Study: Archeology; biological/physical anthropology, and cultural anthropology.

Primary Areas of Faculty Research: The biological anthropology faculty studies the present and past nature and evolution of humans and other primates. Faculty specializations are evolutionary theory, paleoanthropology, dental analysis, bioarcheology, comparative morphometrics. The cultural anthropology program focuses on such issues as gender, class, religion, and public culture as shaped by history and migration. Faculty area specialties include North America, Latin America, the Middle East, and Africa. Training is offered in popular memory, material culture, religion, performance studies, sociolinguistics, ethnobiology, medical anthropology, and popular culture. The archeology faculty is particularly strong in the U.S. Southeast, Great Plains, and the Middle East. Their research interests range from ethnohistory to lithic analysis, Quaternary environments, ground-based geophysical and satellite remote sensing, applications of geographical information
systems technology, quantitative techniques, mortuary studies, historical archeology, and ecology. A major emphasis, in collaboration with the Arkansas Archeological Survey, is public archeology.

M.A. in Anthropology
Prerequisites to Degree Program: Applicants must be admitted to the Graduate School and meet the following requirements: 1) satisfactory undergraduate preparation in anthropology, 2) three letters from persons competent to judge applicant’s potential for graduate study, 3) satisfactory GRE scores, and 4) a completed departmental application. Students who do not meet these requirements may be admitted conditionally. Students with course deficiencies may enroll concurrently in graduate courses.

Requirements for the Master of Arts Degree: (Minimum 30/36 hours, depending on option chosen.) A student may choose one of three options to satisfy the requirements for a Master of Arts degree in anthropology:

Anthropology M.A. with Thesis: (Minimum 30 hours.) A minimum of 24 semester hours of course work including distribution requirements specified by the department, six semester hours of thesis, and an oral examination conducted by the candidate's faculty committee.

Anthropology M.A. with Internship: A minimum of 30 semester hours of course work including distribution requirements specified by the department, six hours of internship, evidence of research ability, and an oral exam conducted by the candidate's faculty committee.

Anthropology M.A. without Thesis: Thirty-six semester hours including distribution requirements specified by the department and an oral examination conducted by the candidate's faculty committee.

A list of courses that meet the general distribution requirement is available from the departmental chair. A minimum of 21 graduate hours in anthropology is required in all three options.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Ph.D. in Anthropology
Requirements for the Doctor of Philosophy Degree: (Minimum of 42 hours, including 18 hours of dissertation.)

Admission Requirements: Applicants are generally required to have a master's degree in anthropology (or the equivalent) and demonstrate competence in the subfields of archeology, biological anthropology, and cultural anthropology. A student who begins doctoral study with an M.A. from another university must take the courses required for the M.A. here that were not taken elsewhere, but these deficiency courses may, with the consent of the student’s advisory committee, count toward the 24-hour course requirement. Applicants without a master's degree in anthropology (or its equivalent) but with exceptionally strong qualifications may be admitted directly into the Ph.D. program at the discretion of the department faculty.

Advisory Committee: During the first semester of study, all students will be assigned an advisory committee that will determine their particular programs. Students will select a subfield of specialization (archeology, biological anthropology, or cultural anthropology).

Foreign Language Requirement: Students are required to demonstrate competence in a foreign language.

Course Requirements: Students in the doctoral program are required to complete 24 semester hours of course work for graduate credit beyond the M.A. degree. This work will include four seminar courses to include at least one class in archeology, biological anthropology, and cultural anthropology. To strengthen and support an area of expertise, a student may take up to six hours of graduate course work in other departments. Subject to the approval of the student’s adviser, these hours will count toward the 24-hour course requirement for the degree.

Candidacy Examinations: A student must complete Graduate School residence requirements and departmental course requirements before taking the written candidacy examinations. Students will notify their committees of their intention to take the examination, and their advisory committee will construct the examination questions. The exams will be taken on campus over a period of three days. The areas that will be examined are discussed in the department’s Graduate Student Handbook.

The student’s advisory committee, in consultation with other faculty as needed, will evaluate the written answers. The student’s advisory committee chair will meet with the student and provide relevant feedback, including any weaknesses in the written examination that might need to be addressed in the oral examination.

The committee chair will then schedule an oral exam with the student’s advisory committee. After the oral exam, the advisory committee will meet and make one of the following recommendations:

1. The student has demonstrated the knowledge, skills, and abilities to proceed with his/her dissertation. The student is then admitted to candidacy.
2. Remedial work is necessary. Remedial work may include taking portions of the qualifying exam again, writing another paper, taking an additional course or independent study, or other options as appropriate. Upon successful completion of this remedial work, the student will be admitted to candidacy.
3. The student is not admitted to candidacy.

The committee recommendations will be communicated in writing to the student and to the department chair, and the Graduate School will be notified in writing by the department chair when students have passed their candidacy examinations.

Proposal Defense: Upon admission to candidacy, students will select a dissertation committee with a major professor as chair to direct the research and writing. Under direction of the major professor, candidates will develop programs of reading in the general areas and research techniques pertinent to preparing their dissertations. To demonstrate competence in this preparation, the dissertation committee will conduct an oral proposal defense. This proposal defense must be taken no later than the end of the fall or spring semester after completing the written qualifying examinations.

Dissertation and Dissertation Defense: Students will demonstrate a capacity for independent research by writing an original dissertation on a topic within their subfield of specialization. Within the time limits specified by the Graduate School, students must submit a dissertation acceptable to their dissertation committee. Students’ final examinations will be oral and primarily a defense of their dissertations.

Teaching Requirement: Although the Doctor of Philosophy degree is primarily a research degree, communication skills are critical to professional development. Therefore, each doctoral candidate will
be required to engage in teaching activities before completion of the program.

Faculty members located off-campus are available for research and individual guidance in any of these options. They may also chair and serve on student committees.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Environmental Dynamics: Anthropology participates in the interdisciplinary Ph.D. program in Environmental Dynamics (p. 174).

Common Market: Through an agreement with the Academic Common Market (p. 495), residents of certain Southern states may qualify for graduate enrollment in this degree program as in-state students for fee purposes.

Graduate Faculty

Brandon, Jamie, Ph.D. (University of Texas), M.A. (University of Arkansas), B.A. (University of Memphis), Associate Research Professor, 2014.

D’Alisera, JoAnn, Ph.D., A.M. (University of Illinois-Urbana-Champaign), B.A. (State University of New York at New Paltz), Associate Professor, 1999.

Delezene, Lucas, Ph.D., M.A. (Arizona State University), B.S. (Emory University), Instructor, 2011.

Erickson, Kirstin C., Ph.D., M.A. (University of Wisconsin-Madison), B.A. (St. Olaf College), Associate Professor, 2001.

Kay, Marvin, Ph.D. (University of Colorado-Boulder), M.A., B.A. (University of Missouri-Columbia), Professor, 1980.

Kvamme, Kenneth L., Ph.D. (University of California-Santa Barbara), M.A., B.A. (Colorado State University), Professor, 1999.

Marion, Jonathan S., Ph.D., M.A. (University of California-San Diego), B.A. (University of Redlands), Associate Professor, 2012.

Natarajan, Venkatesan Ram, Ph.D., M.A. (New York University), B.A. (Johns Hopkins University), Assistant Professor, 2015.

Nolan, Justin Murphy, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Westminster College), Associate Professor, 2002.

Rose, Jerry, Ph.D., M.A. (University of Massachusetts), B.A. (University of Colorado), Professor, 1976.

Sabo, George, Ph.D., M.A., B.S. (Michigan State University), Professor, 1980.

Stoner, Wesley, Ph.D., M.A. (University of Kentucky), B.A. (Pennsylvania State University), Assistant Professor, 2014.

Swedenburg, Ted R., Ph.D., M.A., (University of Texas at Austin), B.A. (University of Beirut), Professor, 1996.

Terhune, Claire E., Ph.D., M.A. (Arizona State University), B.A., B.S. (College of Charleston), Assistant Professor, 2013.

Ungar, Peter S., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (State University of New York, Binghampton), Distinguished Professor, 1995.

Vining, Benjamin R., Ph.D., M.A. (Boston University), B.A. Colgate University, Assistant Professor, 2016.

Courses

ANTH 500V. Advanced Problems in Anthropology. 1-18 Hour.
Individual research at graduate level on clearly defined problems or problem areas. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

ANTH 5043. Advanced Vector Geographic Information Systems. 3 Hours.
Advanced vector operations and analysis. Topics will include topological analysis, network analysis, geocoding, conflation, implications of source and product map scale, map generation, error mapping, and cartographic production. Prerequisite: ((ANTH 4563 or ANTH 5563 (formerly ANTH 4563)) or ((GEOS 4583 or GEOS 5583 (formerly GEOS 4583)) or equivalent. (Typically offered: Irregular)
This course is cross-listed with GEOS 5033.

ANTH 5053. Quaternary Environments. 3 Hours.
An interdisciplinary study of the Quaternary Period including dating methods, deposits, soils, climates, tectonics, and human adaptation. Lecture 2 hours, laboratory 2 hours per week. (Typically offered: Fall)
This course is cross-listed with ENDY 5053, GEOS 5053.

ANTH 5063. Popular Culture. 3 Hours.
(Formerly ANTH 4033.) Study of national and international varieties of popular culture, including music, dance, fashion, and the media. Emphasis will be given to both ethnographic approaches, which focus on the investigation of production and consumption of cultural forms and to cultural studies approaches, which see culture as a terrain of struggle. Graduate degree credit will not be given for both ANTH 4033 and ANTH 5063. (Typically offered: Irregular)

ANTH 5093. The Archeology of Death. 3 Hours.
(Formerly ANTH 4093.) Study of the analysis and interpretation of archeological mortuary remains and sites. Key archeological and anthropological sources that have influenced major theoretical developments are reviewed. Graduate degree credit will not be given for both ANTH 4093 and ANTH 5093. (Typically offered: Irregular)

ANTH 5103. Applications of Cultural Method and Theory. 3 Hours.
Review of the nature and history of cultural anthropology; recent theories and practical implications and applications of various methods of acquiring, analyzing and interpreting cultural anthropological data. (Typically offered: Fall)

ANTH 5113. Anthropology of the City. 3 Hours.
Examines cities as both products of culture, and sites where culture is made and received. Explores the implications of several pivotal urban and cultural trends and the way in which representations of the city have informed dominant ideas about city space, function, and feel. (Typically offered: Irregular)

ANTH 5123. Ancient Middle East. 3 Hours.
(Formerly ANTH 4123.) The archeology of the ancient Middle East with emphasis upon the interaction of ecology, technology and social structure as it pertains to domestication and urbanization. Graduate degree credit will not be given for both ANTH 4123 and ANTH 5123. (Typically offered: Irregular)

ANTH 5133. Settlement Archaeology. 3 Hours.
(Formerly ANTH 4133.) Focuses on the historical development of settlement archeology, the methods of site survey and discovery within regions, ecological and social theories that underlie patterns of human land use and distribution, methods of site location analysis, and descriptive and predictive site location modeling. Graduate degree credit will not be given for both ANTH 4133 and ANTH 5133. (Typically offered: Irregular)

ANTH 5143. Ecological Anthropology. 3 Hours.
(Formerly ANTH 4143.) Anthropological perspectives on the study of relationships among human populations and their ecosystems. Graduate degree credit will not be given for both ANTH 4143 and ANTH 5143. (Typically offered: Irregular)

ANTH 5153. Topics in Anthropology. 3 Hours.
Graduate level seminar with varied emphasis on topics relating to cultural anthropology. (Typically offered: Irregular) May be repeated for degree credit.

ANTH 5203. Applications of Archeological Method and Theory. 3 Hours.
(Formerly ANTH 4133.) Anthropological perspectives on the study of relationships among human populations and their ecosystems. Graduate degree credit will not be given for both ANTH 4133 and ANTH 5133. (Typically offered: Irregular)

ANTH 5203. Applications of Archeological Method and Theory. 3 Hours.
(Formerly ANTH 4133.) Anthropological perspectives on the study of relationships among human populations and their ecosystems. Graduate degree credit will not be given for both ANTH 4133 and ANTH 5133. (Typically offered: Irregular)
ANTH 5243. Archeology of the Midsouth. 3 Hours.
(Formerly ANTH 4243.) Survey of prehistoric and protohistoric cultures of the lower Mississippi Valley and adjacent regions. Graduate degree credit will not be given for both ANTH 4243 and ANTH 5243. (Typically offered: Irregular)

ANTH 5256. Archeological Field Session. 6 Hours.
(Formerly ANTH 4256.) Practical field and laboratory experiences in archeological research. Graduate degree credit will not be given for both ANTH 4256 and ANTH 5256. (Typically offered: Summer)

ANTH 5263. Indians of Arkansas and the South. 3 Hours.
Study of the traditional lifeways and prehistoric backgrounds of Indians living in the southern United States, including Arkansas. (Typically offered: Spring Odd Years)

ANTH 5273. Photography for Fieldwork. 3 Hours.
(Formerly ANTH 4273.) This class explores the use of photographic images as both data and representational tools in anthropological research, emphasizing the ethical, theoretical, and methodological issues involved. Graduate degree credit will not be given for both ANTH 4273 and ANTH 5273. (Typically offered: Irregular)

ANTH 5283. Survey in Ethnographic Film. 3 Hours.
(Formerly ANTH 4283.) Survey of the development and evolution of ethnographic film, based on class screenings to build familiarity, vocabulary, and literacy with this branch of visual anthropology. Graduate degree credit will not be given for both ANTH 4283 and ANTH 5283. (Typically offered: Irregular)

ANTH 5293. Identity and Culture in the U.S.-Mexico Borderlands. 3 Hours.
(Formerly ANTH 4293.) An exploration of the interplay between Latino/a, Mexican, Anglo, and Native American identities and cultures along the U.S.-Mexico border. Course examines identity formation, hybridity, social tension, marginalization, race and gender, from an anthropological perspective, paying special attention to the border as a theoretical construct as well as material reality. Graduate degree credit will not be given for both ANTH 4293 and ANTH 5293. (Typically offered: Irregular)

ANTH 5303. Applications of Method and Theory in Biological Anthropology. 3 Hours.
Review of the nature and history of biological anthropology; recent theories and the practical implications and applications of various methods of acquiring, analyzing, and interpreting data. (Typically offered: Irregular)

ANTH 5313. Laboratory Methods in Archeology. 3 Hours.
(Formerly ANTH 4313.) Theory and practice of describing, analyzing, and reporting upon archeological materials. Graduate degree credit will not be given for both ANTH 4353 and ANTH 5313. (Typically offered: Irregular)

ANTH 535V. Topics in Physical Anthropology. 1-6 Hour.
Graduate level seminar with varied emphasis on topics relating to physical anthropology. (Typically offered: Irregular) May be repeated for degree credit.

ANTH 5363. Museums, Material Culture, and Popular Imagination. 3 Hours.
(Formerly ANTH 4363.) Museums as ideological sites and thus as sites of potential contestation produce cultural and moral systems that legitimate existing social orders. This course will focus on strategies of representation and the continuous process of negotiating social and cultural hierarchies with and through objects that are displayed. Graduate degree credit will not be given for both ANTH 4363 and ANTH 5363. (Typically offered: Fall)

ANTH 5413. Bioarcheology Seminar. 3 Hours.
Intensive coverage of bioarchaeological method and theory with the context of both academic and cultural resources management research. (Typically offered: Spring Odd Years)

ANTH 5423. Human Evolutionary Anatomy. 3 Hours.
Paleobiologists reconstruct past lifeways and systematic relationships of our ancestors using comparative studies of bony morphology and associated soft tissues. This course surveys methods and theories used to infer function and phylogeny, and details relevant aspects of the anatomy of humans, living great apes, and fossil human ancestors. Prerequisite: ANTH 1013 and BIOL 1543. (Typically offered: Irregular)
This course is cross-listed with BIOL 5423.

ANTH 5443. Cultural Resource Management I. 3 Hours.
Concentrated discussion of management problems relative to cultural resources, including review and interpretation of relevant federal legislation, research vs. planning needs, public involvement and sponsor planning, and assessment of resources relative to scientific needs. No field training involved; discussion will deal only with administrative, legal, and scientific management problems. (Typically offered: Irregular)

ANTH 5473. Descriptive Linguistics. 3 Hours.
A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Fall)
This course is cross-listed with WLLC 5463, ENGL 5463.

ANTH 548V. Individual Study of Anthropology. 1-6 Hour.
(Formerly ANTH 448V.) Reading course for advanced students with special interests in anthropology. Graduate degree credit will not be given for both ANTH 448V and ANTH 548V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANTH 5513. African Religions: Gods, Witches, Ancestors. 3 Hours.
(Formerly ANTH 4513.) An exploration of African religions from a variety of anthropological perspectives, exploring how religious experience is perceived and interpreted by adherents, highlighting the way in which individual and group identities are constructed, maintained and contested within religious contexts. Readings reflect the vast diversity of religious life in Africa. Graduate degree credit will not be given for both ANTH 4513 and ANTH 5513. (Typically offered: Irregular)

ANTH 5523. Dental Science. 3 Hours.
(Formerly ANTH 4523.) Introduction to the study of the human dentition including its anatomy, morphology, growth and development, and histology. Graduate degree credit will not be given for both ANTH 4523 and ANTH 5523. (Typically offered: Fall)

ANTH 5553. Introduction to Raster GIS. 3 Hours.
(Formerly ANTH 4553.) Theory, data structures, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Credit will not be given for both ANTH 4553 and ANTH 5553. (Typically offered: Fall)
This course is cross-listed with GEOS 5453.

ANTH 5563. Vector GIS. 3 Hours.
(Formerly ANTH 4563.) Introduction to geographic information systems (GIS) applications in marketing, transportation, real estate, demographics, urban and regional planning, and related areas. Lectures focus on development of principles, paralleled by workstation-based laboratory exercises using mainstream GIS software and relational databases. Credit will not be given for both ANTH 4563 and ANTH 5563. (Typically offered: Spring)
This course is cross-listed with GEOS 5583.
ANTH 5583. Peoples and Cultures of Sub-Saharan Africa. 3 Hours.
(Formerly ANTH 4583.) An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. Credit will not be given for both ANTH 4583 and ANTH 5583. (Typically offered: Fall)

ANTH 5593. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.
(Formerly ANTH 4593.) Introduction to navigation, georeferencing, and digital data collection using GPS and GNSS receivers, data loggers, and laser technology. Components of NavStar GLONASS, Beidou and other global positioning system are used in integration of digital information into various GIS platforms with emphasis on practical applications. Credit will not be given for both ANTH 4593 and ANTH 5593.

ANTH 5603. Landscape Archaeology. 3 Hours.
(Formerly ANTH 4603.) This course provides an introduction to the methods and theories of landscape archaeology. Topics include archaeological survey techniques, environmental and social processes recorded in the archaeological landscape, and analysis of ancient settlement and land use data to reveal changes in population, resource utilization, and environmental relationships. Credit will not be given for both ANTH 4603 and ANTH 5603. (Typically offered: Fall)

ANTH 561V. Field Research in Archeology. 1-6 Hour.
Directed graduate level archeological fieldwork. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ANTH 5623. Primate Adaptation and Evolution. 3 Hours.
(Formerly ANTH 4613.) Introduction to the biology of the order of Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Credit will not be given for both ANTH 4613 and ANTH 5623. (Typically offered: Spring)

ANTH 5633. Archeological Prospecting & Remote Sensing. 3 Hours.
(Formerly ANTH 4633.) Ground-based geophysical, aerial, and other remote sensing methods are examined for detecting, mapping, and understanding archeological and other deposits. These methods include magnetometry, resistivity, conductivity, radar, aerial photography, thermography, and multispectral scanning. Requires computer skills, field trips, and use of instruments. Credit will not be given for both ANTH 4633 and ANTH 5633. (Typically offered: Irregular)

ANTH 5653. GIS Analysis and Modeling. 3 Hours.
(Formerly ANTH 4653.) Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. Credit will not be given for both ANTH 4653 and ANTH 5653. (Typically offered: Spring)

This course is cross-listed with BIOL 5653, ENDY 5043.

ANTH 5703. Mammalian Evolution and Osteology. 3 Hours.
(Formerly ANTH 4703.) This course will focus on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Credit will not be given for both ANTH 4703 and ANTH 5703. Prerequisite: ANTH 1013 and ANTH 1011L, BIOL 1543 and BIOL 1541L, or instructor consent. (Typically offered: Irregular)

This course is cross-listed with BIOL 5883.

ANTH 5803. Historical Archeology. 3 Hours.
(Formerly ANTH 4803.) Review of the development of historical archeology and discussion of contemporary theory, methods, and substantive issues. Lab sessions on historic artifact identification and analysis. Graduate degree credit will not be given for both ANTH 4803 and ANTH 5803. (Typically offered: Irregular)

ANTH 5813. Ethnographic Approaches to the Past. 3 Hours.
(Formerly ANTH 4813.) Review of the uses of ethnographic data in the reconstruction and interpretation of past cultures and cultural processes, with particular emphasis on the relationships between modern theories of culture and archeological interpretation. Credit will not be given for both ANTH 4813 and ANTH 5813. (Typically offered: Irregular)

ANTH 582V. Applied Visual Research. 1-6 Hour.
(Formerly ANTH 482V.) This class provides hands-on skill and training conducting visually informed fieldwork designed to help represent unique cultural settings, experience, and heritage. Credit will not be given for both ANTH 482V and ANTH 582V. (Typically offered: Irregular)

ANTH 5853. Quantitative Anthropology. 3 Hours.
(Formerly ANTH 4863.) Introductory statistics course for anthropology students examines probability theory, nature of anthropological data, data graphics, descriptive statistics, probability distributions, test for means and variances, categorical and rank methods, ANOVA, correlation and regression. Lectures focus on theory methods; utilize anthropological data and a statistical software laboratory. Credit will not be given for both ANTH 4863 and ANTH 5863. (Typically offered: Irregular)

This course is cross-listed with GEOS 5863.

ANTH 5903. Seminar in Anthropology. 3 Hours.
(Formerly ANTH 4903.) Research, discussion, and projects focusing on a variety of topics. Credit will not be given for both ANTH 4903 and ANTH 5903. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ANTH 5913. Topics of the Middle East. 3 Hours.
(Formerly ANTH 4913.) Covers a special topic or issue. Credit will not be given for both ANTH 4913 and ANTH 5913. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ANTH 600V. Master’s Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ANTH 6033. Society and Environment. 3 Hours.
This course examines the complex interrelationships between human societies and the natural environment. Drawing on diverse and interdisciplinary perspectives in archaeology, ethnography, history, geography, and palaeo-environmental studies, readings and discussion will explore the co-production of social and environmental systems over time. (Typically offered: Spring) May be repeated for degree credit.

This course is cross-listed with ENDY 6033.

ANTH 610V. Internship. 1-18 Hour.
Internship. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

ANTH 6813. Seminar: Cultural Anthropology. 3 Hours.
Variable topics in Anthropology will be explored in depth. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ANTH 6823. Seminar: Archeology. 3 Hours.
Various topics in Archeology will be explored in depth. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ANTH 6833. Seminar: Biological Anthropology. 3 Hours.
Various topics in Biological Anthropology will be explored in depth. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
ANTH 700V. Doctoral Dissertation. 1-18 Hour.  
Doctoral Dissertation. (Typically offered: Fall and Spring) May be repeated for degree credit.

School of Art Website (http://art.uark.edu/)

Degree Conferred:  
M.F.A. (ART)

Program Description: The objective of the program of study leading to the degree of Master of Fine Arts in art shall be professional achievement of high order, a knowledge of art history and criticism, the development of a fundamental grasp and understanding of the professional field of art and its relationship to supporting fields of knowledge, as well as the satisfactory completion of course work and other degree requirements. The program of study will vary depending upon the art medium areas selected for the creative work and the goals of the individual graduate student. The Master of Fine Arts degree in art is considered to be the terminal degree in studio art and is awarded in recognition of professional development in the visual arts as evidenced by a period of successful post-bachelor’s degree study. The M.F.A. degree is recognized as preparatory to studio art teaching positions at institutions of higher education.

Areas of Study: Major areas of study include drawing, painting, sculpture, design, printmaking, ceramics, and photography.

M.F.A. in Art

Prerequisites to Degree Programs: An earned bachelor’s degree with an art major concentration or its equivalent. Consideration will be given to applicants without an art major concentration who present evidence of proficiency in creative work in the visual arts.

Acceptance to the M.F.A. degree program requires a two-semester art history survey or its equivalent. Failing to meet this requirement, the M.F.A. student is required to complete the appropriate semesters of survey of art history for non-graduate credit.

In addition to the requirements for admission to the Graduate School, the applicant must also submit the following materials to the School of Art: transcripts of college level work; at least three letters of reference concerning art work, work habits, and potential for graduate study in art; a portfolio of art works; a personal statement concerning background, conceptual and technical development, and goals for graduate study in visual art; and an application form obtained from the School of Art on request.

Requirements for the Master of Fine Arts Degree: Completion of a minimum of 60 semester credit hours and a minimum of six regular semesters in residence (not to include summer terms).

1. A minimum of 42 credit hours in studio courses:
   a. A minimum focused study area of a total of 24 credit hours. For each semester in residence, excluding summers and the final semester, M.F.A. candidates must enroll in a minimum of three hours in their focused study area as advised by their media area adviser.
   b. One semester of ARTS 5923 MFA First Year Seminar, to be taken in the fall semester of the first year of study, and one semester of ARTS 5933 MFA Second Year Seminar, to be taken in the fall semester of the second year of study (total of 6 credit hours).
   c. A minimum of 12 Studio Art Elective credit hours. These may include 3 credit hours in excess of the required 12 hours of Art History and/or criticism. Up to 6 credit hours in graduate courses taken outside the School of Art may be included, with prior approval. Students electing to take only 9 hours of Art History will complete 15 hours of electives.

2. Art History requirement: While in the M.F.A. program, the student is required to complete a minimum of 12 hours of art history. Students admitted to the program with 12 or more hours of prior college level art history courses may elect to take only 9 hours of Art History. Requirements include:
   a. Six hours of elected art history courses. (Three hours for students with 12 or more hours of prior college level art history)
   b. ARHS 5933 Contemporary Art
   c. ARHS 5763 Seminar in Critical Theory

3. In the final year prior to graduation, the M.F.A. candidate must demonstrate satisfactory progress toward the M.F.A. exhibition thesis by meeting regularly with the thesis chair and committee, as well as faculty and peers in the M.F.A. candidate’s media area.

4. The required final semester in the M.F.A. program is to be devoted to work on the M.F.A. exhibition, ARTS 601V (http://catalog.uark.edu/search/?P=ARTS%20601V/) (6 credit hours), the production and presentation, under the direction of a graduate committee, of a one-person exhibition of art work. The M.F.A. candidate will be responsible for making one acceptable digital presentation of the exhibition and exhibition statements, which will be retained by the School of Art and the University Library.

The final semester must be completed during a regular school year. During this final semester, the M.F.A. candidate may enroll for three additional credit hours in electives if the candidate does not hold a graduate assistantship. The M.F.A. candidate holding an assistantship may not take additional credits in the final semester.

In addition to the requirements listed above, the M.F.A. program in Art also requires:

1. Graduate Critiques: All M.F.A. students are required to participate in regular reviews critiquing their artworks. These reviews involve both a mid-term critique conducted by several faculty members and a final critique attended by a selected group of School of Art Graduate faculty and M.F.A. students. After M.F.A. students receive Candidacy, their participation is still required although they will no longer need to present their artwork for review.

2. Candidacy Application and Review: After completion of four semesters in the M.F.A. degree program, the student will make application to be a candidate for completion of the M.F.A. degree. A committee of graduate faculty members will conduct a formal review of the applicant’s work and progress in the program. The awarding of candidacy will be dependent upon a three-fourths majority vote by the student’s graduate faculty committee based on the following criteria:
1) a demonstrated formal and technical proficiency in the applicant’s major studio area; 2) conceptual development as demonstrated by growth in ideas supporting the applicant’s creative research; 3) an ability to locate their research in the context of issues and practices within contemporary and historical art issues; and 4) the ability to communicate the intention and basis of their research in coherent written and verbal form. At least two regular semesters of residence must be completed after acceptance as a degree candidate. Students who do not pass the Candidacy Review will be allowed one additional Candidacy Review, held during the following regular semester. Students failing to pass Candidacy the second time will be dismissed from the program.

3. Graduate Committee and Major Adviser: When the student has been accepted as a degree candidate, the student will select a major adviser from the graduate art faculty. The major adviser will serve as adviser to the student in planning the completion of the program of study. At least one semester before graduation, a four- or five-member committee of graduate art faculty will be selected. The student’s major adviser will be chairperson of this committee, and one member of the graduate committee will represent the art history area. The degree candidate may select one additional committee member from a discipline outside the School of Art.

Graduate Faculty

Andree, David, M.F.A. (State University of New York), B.F.A. (Indiana College of Art and Design), Assistant Professor, 2015.

Callander, Adrienne, M.F.A. (Rutgers University), B.A. (Reed College), Visiting Assistant Professor, 2017.

DeWitt, Dylan, M.F.A. (Yale University), Assistant Professor, 2014.

Droel, Rebecca, M.F.A., B.A. (Indiana University, Bloomington), Assistant Professor, 2015.

Grant, Alphonso W., Ph.D. (Pennsylvania State University), Assistant Professor, 2017.

Hanson, Alexander J., M.F.A. (University of Iowa), Instructor, 2015.

Hapgood, Thomas Layley, M.F.A., B.A. (University of Arizona), Associate Professor, 2005.

Hogan, Adam S., M.A, M.F.A (Washington University in St. Louis), Assistant Professor, 2014.

Hulen, Jeannie, M.F.A. (Louisiana State University), B.F.A. (Kansas City Art Institute), Professor, 2002.

King, Sam, M.F.A. (Indiana University at Bloomington), B.F.A. (University of Tulsa), Assistant Professor, 2011.

Lane, Marty Maxwell, M.G.D. (North Carolina State University), B.F.A. (University of Illinois at Chicago), Associate Professor, 2014.

LaPorte, Angela M., Ph.D. (Pennsylvania State University), M.A. (Arizona State University), B.S. (La Roche College), Professor, 1998.

Levenson, Abra, Ph.D., M.A.(Princeton), B.A. (University of California, Berkeley), Assistant Professor, 2018.

McConnell, Mathew S., M.F.A. (University of Colorado-Boulder), B.F.A. (Valdosta State University), Associate Professor, 2011.

McMahon, Bree, M.A., B.A. (North Carolina State University), Assistant Professor, 2018.

Meares, Ian, M.F.A (Penn State), M.F.A (University of California at Irvine), Instructor, 2017.

Mitchell, Marc E., M.F.A. (Boston University), Associate Professor, 2014.

Morrissy, Sean P., M.F.A. (University of Nebraska-Lincoln), B.F.A. (Bowling Green State University), Assistant Professor, 2014.

Murf, Zora J., M.F.A. (University of Nebraska), Assistant Professor, 2018.

Place, Alison L., M.F.A (Miami University), Assistant Professor, 2017.

Posnak, Adam, M.F.A (Louisiana State University and A&M College), Instructor, 2010.

Pulido Rull, Ana, Ph.D., M.A. (Harvard University), B.A. (National Autonomous University of Mexico), Associate Professor, 2012.

Ramirez, Kasey, M.F.A. (Indiana University, Bloomington), B.F.A. (Rhode Island School of Design), Assistant Professor, 2015.

Springer, Bethany Lynn, M.F.A. (University of Georgia), B.A. (Virginia Polytechnic Institute and State University), Associate Professor, 2006.

Sytsma, Janine A., Ph.D. (University of Wisconsin-Madison), M.A. (University of Denver), B.A. (Arizona State University), Assistant Professor, 2016.

Taoka, Loring, M.F.A (University of North Texas), Instructor, 2012.

Turner, Aaron, M.F.A (Rutgers State University), B.A (University of Memphis), Research Associate, 2016.

Yoon, InJeong, Ph.D. (University of Arkansas), Assistant Professor, 2017.

Art History Courses

ARHS 5563. Pre-Columbian Art. 3 Hours.
An introduction to pre-Columbian art from Mexico (3000 BC- 1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)

ARHS 5573. Artists of New Spain. 3 Hours.
An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)

ARHS 5763. Seminar in Critical Theory. 3 Hours.
(Formerly ARHS 4763.) Study of critical theory as it relates to problems in modern and contemporary art. Graduate degree credit will not be given for both ARHS 4763 and ARHS 5763. Prerequisite: Nine credit hours of ARHS coursework. (Typically offered: Spring)
ARHS 5773. History of New Media Art. 3 Hours.
(Formerly ARHS 4773.) Examines the history of "new media" art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Graduate degree credit will not be given for both ARHS 4773 and ARHS 5773. Prerequisite: ARHS 2923 and 3 hours of 3000 level and above art history coursework. (Typically offered: Irregular)

ARHS 5793. Making the Museum: History, Theory and Practice. 3 Hours.
Presents a broad overview of the institutional history and the contemporary professional practice of the museum world. Features numerous visiting lectures from a working professionals from the local area and nationwide institutions. (Typically offered: Spring Even Years)

ARHS 5813. The History of Photography. 3 Hours.
(Formerly ARHS 4813.) Survey of photography from 1685 to present. Graduate degree credit will not be given for both ARHS 4813 and ARHS 5813. (Typically offered: Irregular)

ARHS 5823. History of Graphic Design. 3 Hours.
(Formerly ARHS 4823.) Survey of graphic design history from 1850 to the present. Graduate degree credit will not be given for both ARHS 4823 and ARHS 5823. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5833. Ancient Art. 3 Hours.
(Formerly ARHS 4833.) Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Graduate degree credit will not be given for both ARHS 4833 and ARHS 5833. Prerequisite: ARHS 2913. (Typically offered: Irregular)

ARHS 5843. Medieval Art. 3 Hours.
(Formerly ARHS 4843.) Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Graduate degree credit will not be given for both ARHS 4843 and ARHS 5843. Prerequisite: ARHS 2913. (Typically offered: Irregular)

ARHS 5853. Italian Renaissance Art. 3 Hours.
(Formerly ARHS 4853.) Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Graduate degree credit will not be given for both ARHS 4853 and ARHS 5853. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5863. Northern Renaissance Art. 3 Hours.
(Formerly ARHS 4863.) Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Graduate degree credit will not be given for both ARHS 4863 and ARHS 5863. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5873. Baroque Art. 3 Hours.
(Formerly ARHS 4873.) Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Graduate degree credit will not be given for both ARHS 4873 and ARHS 5873. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5883. 18th and 19th Century European Art. 3 Hours.
(Formerly ARHS 4883.) Study of eighteenth- and nineteenth-century art and architecture in Europe. Graduate degree credit will not be given for both ARHS 4883 and ARHS 5883. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5893. 20th Century European Art. 3 Hours.
(Formerly ARHS 4893.) Study of the major styles and movements of the century, including Cubism, Fauvism, German Expressionism, and Surrealism. Graduate degree credit will not be given for both ARHS 4893 and ARHS 5893. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5913. American Art to 1860. 3 Hours.
(Formerly ARHS 4913.) The visual arts in the United States from Colonial times through 1860. Graduate degree credit will not be given for both ARHS 4913 and ARHS 5913. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5923. American Art 1860-1960. 3 Hours.
(Formerly ARHS 4923.) The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Graduate degree credit will not be given for both ARHS 4923 and ARHS 5923. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5933. Contemporary Art. 3 Hours.
(Formerly ARHS 4933.) Study of styles and major trends in the visual arts since 1960. Graduate degree credit will not be given for both ARHS 4933 and ARHS 5933. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5953. Art Museum Studies. 3 Hours.
(Formerly ARHS 4953.) A survey of the history and function of the art museum and an introduction to museum work. Investigation of collections and collections management, conservation, exhibitions, education and public programs, museum management, and contemporary issues which effect the museum profession. Graduate degree credit will not be given for both ARHS 4953 and ARHS 5953. Prerequisite: ARHS 2913 and ARHS 2923, or graduate Art MFA standing. (Typically offered: Irregular)

ARHS 5973. Seminar in Art History. 3 Hours.
(Formerly ARHS 4973.) Special studies of periods and styles of art. Graduate degree credit will not be given for both ARHS 4973 and ARHS 5973. Prerequisite: 9 hours of Art History. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARHS 5983. Special Topics in Art History. 3 Hours.
(Formerly ARHS 4983.) Subject matter not covered in regularly offered courses, and relating to the history of art before the nineteenth century. May be repeated for different topics. Graduate degree credit will not be given for both ARHS 4983 and ARHS 5983. Prerequisite: ARHS 2913 or ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 5993. Special Topics in Modern Art. 3 Hours.
(Formerly ARHS 4993.) Subject matter not covered in regularly offered courses, and relating to the history of art from the nineteenth century to the present. May be repeated for different topics. Graduate degree credit will not be given for both ARHS 4993 and ARHS 5993. Prerequisite: ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 6413. Greek Art and Archaeology. 3 Hours.
Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. (Typically offered: Spring Odd Years)

ARHS 6423. Roman Art and Archaeology. 3 Hours.
Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, military, economy, gender, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. (Typically offered: Spring Even Years)

ARHS 6613. African Art and Society. 3 Hours.
Situates the artistic production of modern Africa (1800-present) within a socio-cultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonization, and globalization) on the artistic practice. (Typically offered: Irregular)

ARHS 6623. African American Art History. 3 Hours.
Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones". It then follows developments in African American art from the Antebellum Period to the present. (Typically offered: Irregular)
ARHS 6833. Contemporary African Art. 3 Hours.
Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. (Typically offered: Irregular)

ARHS 6783. Special Topics in Contemporary Art. 3 Hours.
Examines specialized topics within the field of contemporary art, with special attention to cutting-edge issues confronting artists today. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 6933. Graduate Research In Art History. 3 Hours.
Independent study in specific areas of art history and criticism. (Typically offered: Irregular)

ARHS 6943. Seminar: Critical Thought in Art. 3 Hours.
Explores topics of concern to the studio artist involving underlying concepts and purposes of art as well as models and methods for the analysis of art. Course based on discussions of selected readings, prepared papers and seminar reports. Prerequisite: graduate standing. (Typically offered: Fall) May be repeated for up to 3 hours of degree credit.

Art Courses
ARTS 5013. Graduate Drawing. 3 Hours.
Graduate level study of drawing materials and techniques. Prerequisite: Graduate standing. (Typically offered: Fall)

ARTS 5023. Figure Drawing II. 3 Hours.
(Formerly ARTS 4023.) Advanced study of the figure with emphasis on figure structure and its relationship to pictorial form in drawing. Graduate degree credit will not be given for both ARTS 4023 and ARTS 5023. Prerequisite: ARTS 2013. (Typically offered: Irregular)

ARTS 5513. Technical Ceramics. 3 Hours.
(Formerly ARTS 4513.) Advanced study of ceramic materials and processes. Clay composition, clay body formulation and analysis, glaze composition and formulation, firing methods (low, mid, and high-temperature gas, electric and atmospheric firings), and kiln design will be covered in depth. Graduate degree credit will not be given for both ARTS 4513 and ARTS 5513. Prerequisite: ARTS 4503. (Typically offered: Irregular)

ARTS 5723. Experiments in Moving Image I. 3 Hours.
An introduction to experimental video art, providing a theoretical and practical foundation for creating video for installation, performance or screen, set within a context of historical and contemporary video art and experimental film. Students will complete assignments creating new, original moving image works. (Typically offered: Fall and Spring)

ARTS 5813. Contemporary Photography. 3 Hours.
(Formerly ARTS 4813.) Introduction to digital photography production, techniques and theory. Digital input from scanning (flatbed & slide/negative), digital cameras, video and internet sources. Computer assisted manipulation of imagery for correction and abstraction. Output to a digital printing systems, analog systems (film recorder), servers and internet. Graduate degree credit will not be given for both ARTS 4813 and ARTS 5813. Prerequisite: ARTS 3803. (Typically offered: Fall and Spring)

ARTS 5833. Advanced Black and White Photography. 3 Hours.
(Formerly ARTS 4833.) Advanced black and white theory, practice and techniques including: Zone System, large format camera and studio lighting. Graduate degree credit will not be given for both ARTS 4833 and ARTS 5833. Prerequisite: ARTS 3803. (Typically offered: Irregular)

ARTS 584V. Special Problems in Photography. 1-6 Hour.
(Formerly ARTS 484V.) Individual instruction for advanced undergraduates and graduate students. Special projects in photography designated by students in collaboration with faculty. Graduate degree credit will not be given for both ARTS 484V and ARTS 584V. Prerequisite: ARTS 3803 and (ARTS 3813 or ARTS 4823 or ARTS 4833). (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 5883. Bookmaking. 3 Hours.
(Formerly ARTS 5883.) Introduction to the creation of unique, limited edition artist's bookworks -- with emphasis on technical knowledge and conceptual understanding of the book form as a means of artistic expression. Graduate degree credit will not be given for both ARTS 4883 and ARTS 5883. (Typically offered: Irregular) This course is equivalent to ARTS 4883.

ARTS 5913. Graduate Seminar in Studio Art. 3 Hours.
Special seminars at the graduate level in Studio Art. Subject matter changes depending on student interest and faculty expertise. Prerequisite: Admission to MFA program. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARTS 5923. MFA First Year Seminar. 3 Hours.
Introduction to graduate level study in art, including pedagogy related to teaching art at the college level. Topics to be covered include: development of research interests, critical thinking within studio practice, situating work in the contemporary context, expectations at the graduate level, and an introduction to techniques and theories of studio art education. Prerequisite: Admission to MFA program. (Typically offered: Fall)

ARTS 5933. MFA Second Year Seminar. 3 Hours.
Preparation for a professional art practice. Examination of theoretical and practical aspects of career development for contemporary artists. Prerequisite: ARTS 5923. (Typically offered: Fall)

ARTS 596V. Fine Arts Gallery Internship. 1-3 Hour.
(Formerly ARTS 493V.) Study all aspects of operating the Fine Arts Gallery. Research and preparation for exhibitions, organize and install exhibits, care of art works, create and distribute publicity, arrange interviews with newspapers, and other media. Graduate degree credit will not be given for both ARTS 493V and ARTS 596V. (Typically offered: Fall, Spring and Summer)

ARTS 601V. Master of Fine Arts Exhibition. 1-6 Hour.
Production and presentation of a one person exhibition of art work. The M.F.A. candidate will be responsible for making three acceptable slide sets of the exhibition and exhibition statements. Prerequisite: M.F.A. candidacy. (Typically offered: Fall, Spring and Summer)

ARTS 602V. Graduate Drawing. 1-6 Hour.
Individual problems in drawing techniques. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARTS 6033. Graduate Drawing Studio. 3 Hours.
Intensive studio practice in drawing combined with reading, writing, and discussion of relevant contemporary issues in the fields of painting and drawing. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 612V. Graduate Painting. 1-6 Hour.
Individual problems in painting techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6133. Graduate Painting Studio. 3 Hours.
Intensive studio practice in painting combined with reading, writing, and discussion of relevant contemporary issues in the fields of painting and drawing. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.
ARTS 622V. Graduate Sculpture. 1-6 Hour.
Individual problems in sculpture techniques. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARTS 6233. Graduate Sculpture Studio. 3 Hours.
Intensive studio practice in sculpture combined with reading, writing, and discussion of relevant contemporary issues in the field of sculpture and new media. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 642V. Graduate Printmaking. 1-6 Hour.
Individual problems in printmaking techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6433. Graduate Printmaking Studio. 3 Hours.
Intensive studio practice in printmaking combined with reading, writing, and discussion of relevant contemporary issues in the field of printmaking. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

ARTS 652V. Graduate Ceramics. 1-6 Hour.
Individual problems in ceramic techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6533. Graduate Ceramics Studio. 3 Hours.
Discussion of contemporary ceramics issues in tandem with the development of a cohesive body of work. Students lead their own explorations, technically and conceptually, while working toward a professional standard of output. Includes regular critiques, with the class and individually with the instructor. Any ceramic processes may be used. Prerequisite: MFA Studio Art Graduate Standing. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 682V. Graduate Photography. 1-6 Hour.
Individual problems in photography. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6833. Graduate Photography Studio. 3 Hours.
Intensive studio practice with reading and discussion of contemporary issues in photography for MFA students. Prerequisite: Admission to MFA program in Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 695V. Special Topics. 1-6 Hour.
Subject matter not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

Asian Studies (AIST)

Chair of Studies
428 Old Main
479-575-3356

Courses

JAPN 5333. Professional Japanese I: Business Writing. 3 Hours.
(Formerly JAPN 4333.) This course aims to familiarize the students with formats, vocabulary, and expressions in Japanese business correspondence. Emphasizes career-ready Japanese language proficiency. Graduate degree credit will not be given for both JAPN 4333 and JAPN 5333. Prerequisite: JAPN 3116 or equivalent Japanese proficiency. (Typically offered: Spring)

Athletic Training (ATTR)

Degrees Conferred:
M.A.t. in Athletic Training (ATTR)

Program Description: The Master of Athletic Training degree program prepares individuals for employment as athletic trainers for high school, college, professional sports organizations, and private clinics, military, performing arts, and industry. The Master of Athletic Training degree requires 56-59 credit hours of course work to graduate. The student is offered the opportunity to interact with high quality researchers, teachers, and preceptors throughout the two and a half years of course work, clinical rotations, and the research thesis or experience.

The graduate athletic training program (GATP) is a pre-certification program in athletic training and is not intended for students who are already eligible to sit for or have passed the Board of Certification (BOC) examination. This is a full-time graduate program that begins in the first summer term each year, and requires considerable clinical experience as part of the requirements for graduation. This is a competitive master’s program that requires admission to the University of Arkansas Graduate School and the GATP.

M.A.t. in Athletic Training

Prerequisites to Athletic Training Degree Program: For acceptance to the GATP, in addition to the general requirements for admission to the Graduate School, an undergraduate degree in kinesiology or in a related field and an overall undergraduate GPA of 3.00, GRE score and prerequisite courses are required. GPA of no less than 3.0 was changed from previous three tiered GPA requirements and submission of a GRE score.

Prerequisite Courses for Admission to the Master of Athletic Training: Students desiring admission to the athletic training program must complete the following courses prior to admission:

NUTR 1213 Fundamentals of Nutrition 3
EXSC 3393 Prevention and Care of Athletic Injuries 3
EXSC 3153 Exercise Physiology 3
EXSC 3353 Mechanics of Human Movement 3
If the above courses were obtained at a college/university other than the University of Arkansas, course syllabi/outlines for courses that are requested to meet the requirements must be submitted to the Program Director of Athletic Training Education for approval.

Students who desire consideration for admission to the GATP must submit the following information:

1. Each student must provide evidence of a preprogram physical examination based on the University of Arkansas graduate athletic training program’s technical standards by a board certified physician (DO or MD);
2. Evidence of immunizations (mumps, measles, rubella, tetanus, and diphtheria);
3. Hepatitis B vaccination or waiver prior to beginning the clinical field based experience (the University of Arkansas Student Health Center offers the Hepatitis B vaccination for $120.00 for all three shots);
4. A minimum of 150 hours of observation under the direct supervision of a BOC certified athletic trainer;
5. Three professional letters of recommendation;
6. Completion of the University of Arkansas Graduate School Application – see GATP web site (admission into the graduate athletic training program is selective, and therefore, admission to the Graduate School of the University of Arkansas does not guarantee admission into the GATP);
7. Completion of the GATP Application (see GATP Web site (https://atp.uark.edu/));
8. Background check – All expenses incurred by the background are the responsibility of the student. – Background check information is located on the GATP website (https://atp.uark.edu/).
9. An official copy of all transcripts; and
10. All prospective students must satisfy required athletic training technical standards.

Technical Standards: Because the Master of Athletic Training degree and BOC certification signifies that the holder is a clinician prepared for entry into the practice of athletic training within a variety of employment and education settings, it follows that graduates must have the knowledge and skills to function in a broad variety of clinical situations and to render a wide spectrum of patient care. Therefore, the students must meet technical standards before being admitted to the Athletic Training Education Program. The technical standards set forth by the Athletic Training Educational Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program’s accrediting agency (Commission on Accreditation for Athletic Training Education (CAATE)). Applicants who may not meet these technical standards are encouraged to contact the Program Director of Athletic Training Education, 303 HPER Building, University of Arkansas. The following are the technical standards:

1. Candidates must be able to actively learn from observations, demonstrations, and experiments in the basic sciences.
2. Candidates must be able to learn to analyze, synthesize, solve problems, and reach assessment and therapeutic judgments distinguished from the norm.
3. Candidates must have sufficient sensory function and coordination to perform appropriate physical examinations using acceptable techniques.
4. Candidates must be able to relate effectively to athletes and the physically active and to establish sensitive, professional relationships with them.
5. Candidates are expected to be able to communicate the results of the assessment to the injured or ill exerciser, to responsible officials, to parents or guardians, and to colleagues with accuracy, clarity, and efficiency.
6. Candidates are expected to learn and perform routine prevention, assessment, emergency care, and therapeutic procedures.
7. Candidates are expected to be able to display good judgment in the assessment and treatment of injured or ill athletes and physically active individuals.
8. Candidates must be able to learn to respond with precise, quick, and appropriate action in emergency situations.
9. Candidates are expected to be able to accept criticism and respond by appropriate modification of behavior.
10. Candidates are expected to possess the perseverance, diligence, and consistency to complete the athletic training degree curriculum as outlined and sequenced, to attempt BOC certification within the year of program completion, and to enter the practice of athletic training.

Academic Retention Policy:

All graduate students are subject to the Graduate School Policies: http://catalog.uark.edu/graduatecatalog/objectivesandregulations/

In addition to the graduate school policies, the Graduate Athletic Training Program (GATP) has adopted a more stringent set of academic guidelines.

Students will be retained and progress through the ATP by meeting the following requirements:

1. Follow all GATP Policies as noted in the GATP policy and procedure manual.
2. Only those that have a graduate GPA of #3.0 will be cleared for graduation from the GATP. In addition, no credit is earned for courses in which a grade of “F” or “D” is recorded (but these courses count towards GPA). Courses in which a grade of “F” or “D” are earned must be retaken, and a passing grade (“C” or better) must be earned prior to graduation. The maximum number of credit hours that can be retaken is 6 hours.
3. At the end of each semester (i.e., August, December and May), student progress will be assessed. Students will be placed on probation if:
   a. Cumulative GPA is less than or equal to a 2.85 (student will receive a letter from the graduate school) or the student earned two “C’s” or lower in the semester being evaluated (student will receive a letter from the athletic training program director).
4. Students on probation will be reassessed at the end of the following semester. Re-assessment will determine if the student is removed from probation, or is dismissed from the program.

   a. Student removed from probation: If the student earns greater than a “C” in all coursework during the probation semester AND the cumulative GPA is greater than 2.85.

   b. Student is dismissed from the program: If the student earns any grade less than a “B” during the probation semester (regardless of cumulative GPA).

A student cannot graduate while on probation. If they are on probation during their final semester, a student must earn a “B” or greater in all of their coursework. Likewise, their final cumulative GPA must be greater than or equal to a 3.00 (see point 2 above).

BOC for Athletic Training Exams:

1. If the student is on probation during their final semester (Spring 2nd year), they will not be cleared to take the Jan/Feb or March/April BOC for athletic training exam.

   a. At the semester midterm, student progress will be assessed. If it is determined that the student is on track to earn a “B” or greater in all coursework, as determined by the instructor, the student will be cleared to take the May/June BOC for athletic training exam.

   b. If it is determined the student is at risk to earn a “C” or less in any of their courses, the student will not be cleared for the May/June exam. In that case, the student will only be cleared to take the BOC for athletic training exam once the student has successfully graduated from the program.

Requirements for the Master of Athletic Training Degree:

Candidates for the Master of Athletic Training degree must complete 53 semester hours of graduate work and an independent research project or thesis. A graduate GPA of 3.0 or better is required for graduation. In addition, all degree candidates must successfully complete the required athletic training competencies and proficiencies as mandated by the accrediting body.

Total Hours: 56-59

**Courses**

**ATTR 5213.** Athletic Training Clinical I - Application of Injury Prevention Devices and Techniques. 3 Hours.

This course will serve as an introduction to the athletic training clinical program. Procedures and policies of the clinical program and application of athletic preventive devices will be included as well. Corequisite: ATTR 5223. Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Summer)

**ATTR 5223.** Athletic Training Clinical II - Emergency Procedures. 3 Hours.

This course will serve as a process for monitoring student’s progress of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce techniques and applications of therapeutic procedures and policies of the clinical program and application of athletic preventive devices will be included as well. Corequisite: ATTR 5223. Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Spring)

**ATTR 5232.** Athletic Training Clinical III - Lower Extremity Evaluation. 2 Hours.

This course will serve as a process for monitoring student’s progress of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce the evaluation skills of gait, lower extremity, and spine/pelvis. Prerequisite: ATTR 5223. (Typically offered: Fall)

**ATTR 5242.** Athletic Training Clinical IV - Evaluation of Upper Extremity. 2 Hours.

This course will serve as a process for monitoring student’s progress of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce the evaluation skills of the upper extremities, head, neck, and posture. Prerequisite: ATTR 5223. (Typically offered: Fall)

**ATTR 5262.** Athletic Training Clinical V - Rehabilitation Lab. 2 Hours.

This course will serve as a process for monitoring student’s progress of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce techniques and applications of therapeutic exercise and rehabilitation. (Typically offered: Fall)

**ATTR 5272.** Athletic Training Clinical VI - Athletic Training Seminar. 2 Hours.

This course will serve as a process for monitoring student’s progress of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and serve as a capstone course validating the athletic training clinical proficiencies and prepare students for the NATABOC certification exam and future employment. Prerequisite: ATTR 5262. (Typically offered: Spring)
ATTR 5313. Clinical Anatomy for Athletic Trainers. 3 Hours.
Instruction of human anatomy for the athletic training professional using lecture, diagrams, textbook readings, and demonstrations. Focus will be placed on anatomy of structures related to athletic injuries; and can be used in the evaluation, treatment, and rehabilitation of injuries in a variety of athletic training settings. Prerequisite: Acceptance into the graduate athletic training program or instructor consent. (Typically offered: Summer)

ATTR 5363. Evaluation Techniques of Athletic Injuries - Upper Extremity. 3 Hours.
Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the upper extremities, trunk, and head. Prerequisite: Admission to graduate athletic training program. (Typically offered: Spring)

ATTR 5373. Evaluation Techniques of Athletic Injuries - Lower Extremity. 3 Hours.
Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the hip and lower extremities. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5403. Pathophysiology and Treatment I. 3 Hours.
This course will provide knowledge, skills, and values that the entry-level athletic trainer must possess to prevent, recognize, treat, advise on medications for and, when appropriate, refer general medical conditions and disabilities of physically active individuals. Prerequisite: Admission to the athletic training program. (Typically offered: Spring)

ATTR 5413. Pathophysiology and Treatment II. 3 Hours.
This course will provide knowledge, skills, and values that the entry-level athletic trainer must possess to prevent, recognize, treat, advise on medications for and, when appropriate, refer general medical conditions and disabilities of physically active individuals. Prerequisite: ATTR 5403. (Typically offered: Fall)

ATTR 5453. Therapeutic Modalities in Athletic Training. 3 Hours.
Contemporary therapeutic modalities used in managing athletic injuries. Modalities covered are classified as thermal agents, electrical agents, or mechanical agents. Emphasis is placed on their physiological effects, therapeutic indications (and contraindications), and clinical application. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5463. Therapeutic Exercise and Rehabilitation of Athletic Injuries. 3 Hours.
A systematic approach to exercise program development, techniques, indications and contraindications of exercise, and progression as related to athletic injury, prevention, and return to play guidelines. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5473. Administration in Athletic Training. 3 Hours.
Administrative components of athletic training. Basic concepts of legal liability, leadership and management principles, financial management, day to day scheduling and supervision, maintenance, and general administration. Prerequisite: Admission to graduate athletic training program. (Typically offered: Summer)

ATTR 5483. Medical Conditions in Athletic Training. 3 Hours.
This course will provide a collection of knowledge, skills, and values that the entry-level certified athletic trainer must possess to recognize, treat, and refer, when appropriate, the general medical conditions and disabilities of athletes and others involved in physical activity. Prerequisite: Admission to the graduate athletic training program or permission of instructor. (Typically offered: Summer)

ATTR 5493. Evidence-Based Practice in Athletic Training. 3 Hours.
In-depth analysis of current literature, research, case studies, and musculoskeletal evaluation and rehabilitation directed toward musculoskeletal injuries of the physically active. Prerequisite: Admission into the Athletic Training Education Program. (Typically offered: Summer)

Department of Biological Sciences Website (http://fulbright.uark.edu/departments/biology/)

Degrees Conferred:
M.S., Ph.D. in Biology (BIOL)

Program Description: The graduate programs in Biological Sciences offer opportunity for advanced study and research to students who desire a comprehensive view of biological sciences. Accomplishment is judged by competence and a developing sense of responsibility for the advancement of knowledge rather than the fulfillment of routine requirements. The faculty requires of all candidates for advanced degrees a period of study in residence, advanced competence in the chosen area of expertise, satisfactory introduction to allied subjects, the ability to communicate at a scholarly level, and a satisfactory performance in examinations.

Primary Areas of Faculty Research: Cell and molecular biology (biotechnology, cellular physiology, functional genomics, gene regulation, immunology, developmental biology, molecular genetics, pathogenic microbiology); ecology and evolutionary biology (animal behavior, aquatic ecology, animal and plant physiology, conservation biology, community ecology, exobiology, fisheries biology, limnology, molecular systematics, mycology, physiological ecology, plant morphology, population and quantitative genetics, taxonomy, vertebrate biology — herpetology, ichthyology, mammalogy, ornithology — and wildlife management).

M.S. in Biology

Admission to Degree Program: Applicants who wish to study for advanced degrees are expected to present a minimum of 18 hours of biological science. These normally will include training in the three areas of the Biology Subject test of the Graduate Record Examinations: a) cellular and molecular biology, b) organism biology, and c) ecology, evolution, and population biology. Applicants lacking experience in any of the above areas will be expected to broaden their biological training and may be assigned specific course work to fulfill this requirement. Students lacking a total of 18 hours of biological sciences may be admitted on a conditional basis and are not eligible for assistantships. All students applying for admission to the graduate program must provide scores on the verbal, quantitative, and analytical writing sections of the Graduate Record Examinations. Those scores, along with transcripts and three letters of recommendation, will be used in evaluating applications of students applying for assistantships.

All students must have a major professor to enter the graduate program in biological sciences. Ultimately each candidate will have a committee composed of members of the graduate faculty and the student’s major professor. Students must also fulfill the Graduate School’s residency requirements, which are stated elsewhere in this catalog.
All students are required to earn credit in two graduate seminars. Additional seminar requirements may be specified by the major professor in conjunction with the graduate committee. Students are required to present a research seminar prior to the oral thesis or dissertation defense.

Requirements for the Master’s Degree: The Master of Science degree requires 30 semester hours of graduate credit specified by the department to include at least 24 semester hours of course credit and thesis research. Any student who receives a grade of “D” or “F” in any graduate-level course will be subject to dismissal following review by the Graduate Studies Committee. Master of Science students are required to enroll in BIOL 600V for 6 hours of credit and to submit a scholarly thesis based on field and/or laboratory research. A specific coursework program will be selected under the guidance of the student’s major professor and graduate committee. An oral comprehensive examination is required of all candidates, including a defense of the thesis, which will follow their research seminar.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Ph.D. in Biology

Specific Requirements for the Doctor of Philosophy Degree: There are no formal course requirements for doctoral students, except that all graduate students in biology are required to earn credit in two graduate seminars. However, students complete a minimum of 72 graduate semester hours if entering the Ph.D. program without a master’s degree, or 42 graduate semester hours beyond the master’s degree. A minimum of 18 hours must be taken in dissertation credit; these will count in the minimums mentioned in the previous sentence. Any student who receives a grade of “D” or “F” in any graduate-level course will be subject to dismissal following review by the Graduate Studies Committee. Any student receiving more than two grades of “C” in courses of two or more credit hours is no longer eligible for the Ph.D. degree, but may elect to complete an M.S. degree in the program. The Ph.D. is granted not only for fulfillment of technical requirements, but also for development and possession of a critical and creative ability in science and fruitful expression of imagination. Evidence of this is given in the dissertation that the candidate prepares, which constitutes an original research contribution to the fields of the biological sciences.

The Graduate School requires two examinations of all students pursuing the Doctor of Philosophy degree. These examinations are designed to assist students in developing the ability to communicate at a scholarly level and to show they have attained intellectual mastery of knowledge relating to the biological sciences. The first examination, the Candidacy Examination, contains questions related to the student’s field of interest and such other areas as the doctoral committee may specify. This examination is given by the doctoral advisory committee in two parts, written and oral. The written and oral portions of the candidacy examination must be completed within the first three calendar years in the program. Satisfactory performance on this examination will be indicated by either pass or fail as determined by the doctoral committee. In the event of failure, the examination may be repeated at the discretion of the doctoral committee. In no case may the candidacy examination be taken more than twice. Notification to the Graduate School of failure to pass the Candidacy Examination means that the student is dismissed from the Ph.D. program, and the student is not eligible for readmission into the Biology program to pursue the Ph.D. degree. The second examination, the oral Final Examination, preceded by a research seminar, is primarily concerned with the candidate’s dissertation and is taken at the end of the candidate’s program.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Graduate Faculty

Alrubaye, Adnan Ali Khalaf, Ph.D., M.Ed. (University of Arkansas), M.S., B.V.M. (University of Baghdad, Iraq), Clinical Assistant Professor, 2013.

Alverson, Andrew James, Ph.D. (University of Texas at Austin), M.S. (Iowa State University), B.S. (Grand Valley State University), Associate Professor, 2012.

Beaulieu, Jeremy M., Ph.D. (Yale University), M.S., B.S. (California Polytechnic State University), Assistant Professor, 2016.

Beaufre, Steven J., Ph.D. (University of Pennsylvania), M.S., B.S. (University of Wisconsin), Professor, 1995.

Catanzaro, Donald G., Ph.D. (University of Arkansas), A.B. (University of California, Los Angeles), Research Assistant Professor, 2014.

Ceballos, Ruben M., Ph.D. (University of Montana), M.A. (University of Alabama-Birmingham), B.S.(University of Alabama-Huntsville), Assistant Professor, 2016.

Coleman, James S., Ph.D., M.S., M.Phil (Yale University), B.S. (University of Maine), Professor, 2017.

Douglas, Michael Edward, Ph.D. (University of Georgia), M.S., B.S. (University of Louisville), Professor, 2011.

Douglas, Marlis R., Ph.D., M.S., B.S. (University of Zurich), Professor, 2012.

Du, Yuchun, Ph.D. (Kagoshima University, Japan), B.S. (Shaanxi University of Technology, China), Associate Professor, 2007.

DuRant, Sarah Elizabeth, Ph.D. (Virginia Polytechnic Institute and State University), B.S. (University of South Carolina), Assistant Professor, 2017.

Duridik, Jeannine M., Ph.D. (Johns Hopkins University), B.S. (Purdue University), Professor, 1994.

Eges, William J., Ph.D. (University of Rochester), M.S. (University of Georgia), B.S. (North Carolina State University), Professor, 1987.

Evans, Timothy A., Ph.D. (Indiana University), B.S. (Slippery Rock University), Assistant Professor, 2013.

Evans-White, Michelle Allayne, Ph.D. (University of Notre Dame), M.S., B.S. (Kansas State University), Professor, 2008.

Henry, Ralph Leroy, Ph.D., M.S. (University of Florida), B.S.E. (University of Kansas), Distinguished Professor, 1996.

Ivey, Mack, Ph.D., B.S. (University of Georgia), Associate Professor, 1992.

Iyer, Shilpa, Ph.D. (University of Georgia), M.Sc., B.Sc. (University of Pune, India), Assistant Professor, 2016.

Kral, Timothy Alan, Ph.D. (University of Florida), B.S. (John Carroll University), Professor, 1981.

Lehmann, Michael Herbert, Ph.D., Diploma in Biology (Philipps University of Marburg, Germany), Professor, 2002.

Lessner, Daniel J., Ph.D. (University of Iowa), B.S. (University of Wisconsin-Stevens Point), Associate Professor, 2008.

Lewis, Jeffrey A., Ph.D. (University of Wisconsin-Madison), B.S. (University of California-Santa Barbara), Assistant Professor, 2013.

MagoUlick, Daniel D., Ph.D. (University of Pittsburgh), M.S. (Eastern Michigan University), B.S. (Michigan State University), Research Professor, 2000.

McNabb, David S., Ph.D. (Louisiana State University Health Sciences Center), B.S. (University of Texas at Arlington), Associate Professor, 2000.

Naithani, Kusum, Ph.D. (University of Wyoming), M.Sc. (G.B. Pant University of Agriculture and Technology-India), B.Sc. (University of Lucknow-India), Assistant Professor, 2014.

Nakanishi, Nagayasu, Ph.D. (University of California, Los Angeles), B.S. (University of California, San Diego), Assistant Professor, 2017.
Pinto, Ines, Ph.D. (Louisiana State University Health Sciences Center), M.S., B.S. (University of Chile), Associate Professor, 2000.
Rhoads, Douglas Duane, Ph.D. (Kansas State University), M.A., B.A. (Wichita State University), University Professor, 1990.
Siepielski, Adam M., Ph.D. (University of Wyoming-Laramie), M.S. (New Mexico State University), B.S. (Pennsylvania State University-University Park), Assistant Professor, 2015.
Spiegel, Frederick W., Ph.D. (University of North Carolina at Chapel Hill), B.A. (Drew University), Distinguished Professor, 1982.
Stephenson, Steven Lee, Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Lynchburg College), Research Professor, 2003.
Tipsmark, Christian K., Ph.D., M.S. (University of Southern Denmark), Associate Professor, 2010.
Walker, James M., Ph.D. (University of Colorado-Boulder), M.S., B.S. (Louisiana Polytechnic Institute), Professor, 1965.
Westerman, Erica L., Ph.D. (Yale University), M.Sc. (University of New Hampshire), B.S. (Yale University), Assistant Professor, 2016.
Willson, John David, Ph.D. (University of Georgia), B.S. (Davidson College), Associate Professor, 2012.

Courses

BIOL 5001. Seminar in Biology. 1 Hour.
Discussion of selected topics and review of current literature in any area of the biological sciences. (Typically offered: Fall and Spring) May be repeated for up to 2 hours of degree credit.
This course is cross-listed with CEMB 5911.

BIOL 5003L. Laboratory in Prokaryote Biology. 3 Hours.
Laboratory techniques in prokaryote culture, identification, physiology, metabolism, and genetics. Laboratory 6 hours per week. Prerequisite: BIOL 3123. (Typically offered: Fall and Spring)

BIOL 5024. Insect Diversity and Taxonomy. 4 Hours.
(Formerly BIOL 4024.) Principles and practices of insect classification and identification with emphasis on adult insects. 2.5 hours lecture, 4 hours lab. Previous knowledge of basic entomology is necessary. Graduate degree credit will not be given for both BIOL 4024 and BIOL 5024. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall)
This course is cross-listed with ENTO 5024.

BIOL 5034. Wildlife Management Techniques. 4 Hours.
(Formerly BIOL 4734.) To familiarize students with techniques used in the management of wildlife populations. Students will be exposed to field methods, approaches to data analysis, experimental design, and how to write a scientific paper. Management applications will be emphasized. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4734 and BIOL 5034. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 5053. Insect Ecology. 3 Hours.
(Formerly BIOL 4053.) Teaches important ecological concepts through study of dynamic relationships among insects and their environment. Introduces literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. 2 hours lecture/2 hours lab. Graduate degree credit will not be given for both BIOL 4053 and BIOL 5053. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall Even Years)
This course is cross-listed with ENTO 5053.

BIOL 5104. Taxonomy of Flowering Plants. 4 Hours.
(Formerly BIOL 4104.) Identifying, naming, and classifying of wildflowers, weeds, trees, and other flowering plants. Emphasis is on the practical aspects of plant identification. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4104 and BIOL 5104. Corequisite: Lab component. Prerequisite: BIOL 1613 and BIOL 1611L and BIOL 2323 and BIOL 3023. (Typically offered: Spring)

BIOL 5113. Insect Behavior and Chemical Ecology. 3 Hours.
Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Spring Even Years)
This course is cross-listed with ENTO 5113.

BIOL 5122. Food Microbiology. 2 Hours.
(Formerly BIOL 4114.) The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Graduate degree credit will not be given for both BIOL 4122 and BIOL 5122. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with FDSC 5122.

BIOL 5124. Dendrology. 4 Hours.
(Formerly BIOL 4134.) Morphology, classification, geographic distribution, and ecology of woody plants. Lecture 3 hours, laboratory 3 hours per week, and fieldtrips. Graduate degree credit will not be given for both BIOL 4114 and BIOL 5124. Prerequisite: BIOL 3863. (Typically offered: Fall)

BIOL 5133. Insect Molecular Genetics. 3 Hours.
A hands on course in insect molecular genetic techniques including molecular diagnostics and population genetics. Students will learn how to apply advanced molecular genetic methodologies and Internet database resources to insects that they are using for their graduate research. (Typically offered: Spring Even Years)
This course is cross-listed with ENTO 5133.

BIOL 5143. Advanced Methods in Microscopy. 3 Hours.
Stand alone course on laboratory methods emphasizing techniques in modern microscopy. Individual research project required. Prerequisite: Graduate standing. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

BIOL 5153. Practical Programming for Biologists. 3 Hours.
Hands-on instruction in the fundamentals of biological computing. Students learn how to set up a Unix work station, work from the command line, install software, build databases, and program in Perl, a popular scripting language for biological applications. Most examples focus on the analysis of genomic data. (Typically offered: Irregular)

BIOL 5163. Dynamic Models in Biology. 3 Hours.
(Formerly BIOL 4163.) Mathematical and computational techniques for developing, executing, and analyzing dynamic models arising in the biological sciences. Both discrete and continuous time models are studied. Applications include population dynamics, cellular dynamics, and the spread of infectious diseases. Graduate degree credit will not be given for both BIOL 4163 and BIOL 5163. Prerequisite: MATH 2554. (Typically offered: Irregular)

BIOL 5174. Conservation Genetics. 4 Hours.
Covers concepts of biodiversity identification and illustrates how genetic data are generated and analyzed to conserve and restore biological diversity. Prerequisite: BIOL 3023, BIOL 3863 and STAT 2023 (or equivalent) and graduate standing. (Typically offered: Spring)
BIOL 5213. Biological Regulation and Subcellular Communication. 3 Hours. 
Combines lectures, review of primary literature, student presentations, and small group discussions to explore a diversity of topics related to mechanisms of biological regulation and subcellular communication. Prerequisite: Graduate standing. 
(Typically offered: Irregular)

BIOL 5223. Bacterial Lifestyles. 3 Hours.  
The course will introduce students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied in more detail to identify unique strategies that bacteria employ to thrive in their respective environment, whether they are causing diseases or establishing beneficial interactions with animals or plants or coexisting with other microorganisms in diverse ecological environments. The course will also cover special adaptations that bacteria have evolved to adapt to harsh environments and how these adaptations can be harnessed to control pollution. Prerequisite: (BIOL 2013 and BIOL 2011L) or BIOL 3123. (Typically offered: Spring Odd Years)  
This course is cross-listed with PLPA 5123.

BIOL 5233. Genomics and Bioinformatics. 3 Hours.  
Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 or BIOL 2323. (Typically offered: Spring)

BIOL 5241L. Ichthyology Laboratory. 1 Hour.  
Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 5243. Corequisite: BIOL 5243. (Typically offered: Spring Odd Years)

BIOL 5243. Ichthyology. 3 Hours.  
Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, evolution, taxonomy, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Corequisite: BIOL 5241L. (Typically offered: Spring Odd Years)

BIOL 5254. Comparative Physiology. 4 Hours.  
(Formerly BIOL 4234.) Comparison of fundamental physiological mechanisms in various animal groups. Adaptations to environmental factors at both the organismal and cellular levels are emphasized. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4234 and BIOL 5254. Prerequisite: BIOL 2533 and CHEM 3613 and (CHEM 3611L or CHEM 3612M). (Typically offered: Fall)

BIOL 5263. Cell Physiology. 3 Hours.  
In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signaling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2323, BIOL 2533, BIOL 2531L, CHEM 3813, and PHYS 2033. (Typically offered: Fall)

BIOL 5273. Endocrinology. 3 Hours.  
In endocrinology we study hormonal integration of living processes at all levels from molecule to organism. We will work with the mechanisms of hormone action, the endocrine control axes and hormones physiological role. The course will include paper discussions and student presentations on topics of special interest. (Typically offered: Spring)

BIOL 5303. Plant Physiology. 3 Hours.  
Introductory course in plant physiology focusing on cellular processes that support the metabolic, developmental, and reproductive needs of plants. Prerequisite: 3 hours of cell biology or biochemistry. (Typically offered: Fall)

BIOL 5313. Molecular Cell Biology. 3 Hours.  
In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3610L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)

BIOL 5323. Comparative Neurobiology. 3 Hours.  
Exploration of modern research approaches to understanding the development and function of animal nervous systems, with emphasis on molecular and cellular approaches in non-human animal models commonly used in biomedical research. Format combines lectures, group discussions, and student presentations using examples from the primary neurobiology literature. Prerequisite: Graduate standing. (Typically offered: Irregular)

BIOL 5343. Advanced Immunology. 3 Hours.  
Aspects of innate, cell-mediated, and humoral immunity in mammalian and avian species. Molecular mechanisms underlying the function of the immune system are emphasized. A course in Basic Immunology prior to enrollment in Advanced Immunology is recommended but not required. Lecture 3 hours per week. (Typically offered: Spring)  
This course is cross-listed with POSC 5343.

BIOL 5352L. Immunology in the Laboratory. 2 Hours.  
Laboratory course on immune-diagnostic laboratory techniques and uses of antibodies as a research tool. Included are cell isolation and characterization procedures, immunochemistry, flow cytometry, ELISA and cell culture assay systems. Laboratory 6 hours per week. Prerequisite: POSC 5343 or BIOL 5343. (Typically offered: Spring)  
This course is cross-listed with POSC 5352L.

BIOL 5353. Ecological Genetics/genomics. 3 Hours.  
Analysis of the genetics of natural and laboratory populations with emphasis on the ecological bases of evolutionary change. Prerequisite: BIOL 2323 and BIOL 2321L, BIOL 3023 and MATH 2554 and STAT 2023 or equivalents. (Typically offered: Fall Odd Years)

BIOL 5404. Comparative Botany. 4 Hours.  
A comparative approach to organisms classically considered to be plants with emphasis on morphology, life history, development, and phylogeny. Three hours lecture, 4 hours lab per week. Corequisite: Lab component. Prerequisite: Graduate standing. (Typically offered: Fall Odd Years)

BIOL 5414. Mycology. 4 Hours.  
Form and function of the fungi. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Laboratory component. (Typically offered: Irregular)

BIOL 5423. Human Evolutionary Anatomy. 3 Hours.  
Paleobiologists reconstruct past lifeways and systematic relationships of our ancestors using comparative studies of bony morphology and associated soft tissues. This course surveys methods and theories used to infer function and phylogeny, and details relevant aspects of the anatomy of humans, living great apes, and fossil human ancestors. Prerequisite: ANTH 1013 and BIOL 1543. (Typically offered: Fall Even Years)

BIOL 5433. Principles of Evolution. 3 Hours.  
Advanced survey of the mechanisms of evolutionary change with special emphasis on advances since the Modern Synthesis. Historical, theoretical, and population genetics approaches are discussed. Recommended: BIOL 3023 and BIOL 2321L and BIOL 3861L. Prerequisite: BIOL 2323 and BIOL 3863. (Typically offered: Fall Even Years)

BIOL 5463. Physiological Ecology. 3 Hours.  
Interactions between environment, physiology, and properties of individuals and populations on both evolutionary and ecological scales. Prerequisite: BIOL 3863 and BIOL 4234. (Typically offered: Spring Odd Years)

BIOL 5511L. Population Ecology Laboratory. 1 Hour.  
Demonstration of the models and concepts from BIOL 5513. Pre- or Corequisite: BIOL 5513. (Typically offered: Fall Even Years)
BIOL 5513. Population Ecology. 3 Hours.
Survey of theoretical and applied aspects of populations processes stressing models of growth, interspecific interactions, and adaptation to physical and biotic environments. Corequisite: BIOL 5511L. Prerequisite: BIOL 3863. (Typically offered: Fall Even Years)

BIOL 5523. Plant Ecology. 3 Hours.
To develop understanding of important ecological concepts through study of dynamics relationships among plants and their environment. To become familiar with the literature of plant ecology, and interpretation and critique of ecological research. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

BIOL 5524. Developmental Biology with Laboratory. 4 Hours.
An analysis of the concepts and mechanisms of development emphasizing the experimental approach. Students may not receive degree credit for both BIOL 5543 Developmental Biology and BIOL 5524 Developmental Biology with Laboratory. Corequisite: Lab component. (Typically offered: Fall)

BIOL 5534. Biochemical Genetics. 4 Hours.
An analysis of the principles and mechanisms of development emphasizing the embryonic and postembryonic development of animals. Degree credit will not be allowed for both BIOL 5543 and BIOL 5524. (Typically offered: Fall)

BIOL 5543. Developmental Biology. 3 Hours.
An analysis of the principles and mechanisms of development emphasizing the embryonic and postembryonic development of animals. Degree credit will not be allowed for both BIOL 5543 and BIOL 5524. (Typically offered: Fall)

BIOL 5553. Astrobiology. 3 Hours.
Discuss the scientific basis for the possible existence of extraterrestrial life. Includes the origin and evolution of life on Earth, possibility of life elsewhere in the solar system (including Mars), and the possibility of life on planets around other stars. Prerequisite: Instructor consent. (Typically offered: Fall)

This course is cross-listed with SPAC 5553.

BIOL 5556. Cancer Biology. 3 Hours.
An introduction to the fundamentals of cancer biology. Prerequisite: BIOL 2533. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

BIOL 5561. Primate Adaptation and Evolution. 3 Hours.
(Formerly BIOL 4613.) Introduction to the biology of the order Primates. This class considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Graduate degree credit will not be given for both BIOL 4613 and BIOL 5561. Prerequisite: BIOL 3023 or ANTH 1013. (Typically offered: Spring)

This course is cross-listed with ANTH 5561.

BIOL 5563. Wetlands Ecology and Management. 4 Hours.
To familiarize students with the ecology and management of wetlands. Students will be exposed to the characteristics of wetlands, the environmental factors that produce wetland types, and the management techniques used to meet desired wetland goals. Primary lecture topics will include: wetland definition, wetlands of the world, wetland status, trends, laws, wetland hydrology, wetland soils, wetland plants, wetland plant adaptations, wetland ecosystem development, and wetland management. Lecture 2 hours, Laboratory 3 hours per week. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 5564. Eukaryote Phylogeny. 3 Hours.
Molecular analysis of the eukaryotic tree of life, phylogenetic tree reconstruction, and eukaryote diversity and evolutionary relationships. (Typically offered: Spring Odd Years)
Biol 580v. Special topics in biological sciences. 1-6 hour.
Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, spring and summer) May be repeated for up to 6 hours of degree credit.

Biol 5833. Animal Behavior. 3 hours.
Organization, regulation, and phylogeny of animal behavior, emphasizing vertebrates. Lecture, laboratory, and field work. Corequisite: Lab component. (Typically offered: Fall odd years)

Biol 5843. Conservation Biology. 3 hours.
The study of direct and indirect factors by which biodiversity is impacted by human activity. It is a synthetic field of study that incorporates principles of ecology, biogeography, population genetics, economics, sociology, anthropology, philosophy, geology, and geography. Prerequisite: Biol 3863. (Typically offered: Irregular)

Biol 5844. Community Ecology. 4 hours.
Survey of theoretical and applied aspects of community processes stressing structure, trophic dynamics, community interactions, and major community types. Corequisite: Lab component. Prerequisite: Biol 3863. (Typically offered: Fall odd years)

Biol 5863. Analysis of Animal Populations. 3 Hours.
(formerly Biol 4863.) Basic principles of design and analysis for population studies of fish and wildlife species. Students will be instructed in the use of the latest software for estimating population parameters. Focus will be on both concepts and applications. Management applications of estimated parameters will be emphasized. Lecture 2 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both Biol 4863 and Biol 5863. Corequisite: Lab component. Prerequisite: Biol 3863. (Typically offered: Spring even years)

Biol 5873. Microbial Molecular Genetics and Informatics. 3 Hours.
Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: Graduate status. (Typically offered: Fall)

Biol 5883. Mammalian Evolution and Osteology. 3 hours.
Focuses on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Credit will not be given for both Anth 4703 and Anth 5703. Prerequisite: Instructor consent. (Typically offered: Fall even years)

This course is cross-listed with Anth 5703.

Biol 5914. Stream Ecology. 4 Hours.
Current concepts and research in lotic ecosystem dynamics. Lecture, laboratory, field work and individual research projects required. Corequisite: Lab component. Prerequisite: 3 hours of ecology-related coursework. (Typically offered: Fall even years)

This course explores the chemical, biological, and geological processes occurring within ecosystems. An understanding of these processes is used to investigate how they form the global biogeochemical cycles that provide energy and nutrients necessary for life. Class discussions focus on global change and the effects of more recent anthropogenic influences. Prerequisite: 3 hours of chemistry or biochemistry and ecology. (Typically offered: Spring odd years)

Biol 596V. Culture and Environment: Field Studies. 1-6 Hour.
(formerly Biol 496V.) May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. Graduate degree credit will not be given for both Biol 496V and Biol 596V. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

Biol 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, spring and summer) May be repeated for degree credit.

Biol 6113. Insect Physiology. 3 Hours.
General and comparative physiology of insects. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Spring even years)
This course is cross-listed with ENT 6113.

Biol 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, spring and summer) May be repeated for degree credit.

Biological and Agricultural Engineering (BAEG)
Laful Verma
Department Head
203 Engineering Hall
479-575-2351
Email: lverma@uark.edu

Biological and Agricultural Engineering Website (http://bio-ag.engineering.uark.edu/)

Degrees Conferred:
M.S.B.E. (BENG) in Biological Engineering
M.S.En.E. (ENEG) in Environmental Engineering, in collaboration with Civil Engineering (See Environmental Engineering (p. 176))
Ph.D. (BENG) in Engineering (See Engineering (p. 162))

Biological Engineering (BENG) (M.S.B.E.)
Primary Areas of Faculty Research: The biological and agricultural engineering program is unique in that it is linked administratively to the College of Engineering and the Division of Agriculture. At present, the department is experiencing growth in teaching, research and service. In particular, departmental research continues to strengthen and expand in its two broad areas of concentration:

Biotechnology Engineering – Biotechnology at the micro- and nano-scale, food processing, food safety and security, bio-energy, developing new products from biomaterials, biotransformation to synthesize industrial and pharmaceutical products, bioinstrumentation, bio-nano interfacing and molecular self-assembly, bio-nano plasmonics, and bio-nano sensing.

Ecological Engineering – Integrates ecological principles into the design of sustainable systems to treat, remediate, and prevent pollution to the environment. Applications include mathematical modeling of watershed process, stream restoration, watershed management, water and wastewater treatment design, ecological services management, urban greenway design and enclosed ecosystem design.

M.S.B.E. in Biological Engineering
Admission to the Degree Program: Admission to the Biological Engineering graduate program is a three-step process. First, the prospective student must be admitted to graduate standing by the University of Arkansas Graduate School. Second, the student must be accepted into the department’s program, which depends on transcripts, recommendations, a statement of purpose, and the following additional requirements:
Students with an ABET-accredited or equivalent Engineering Degree

- Students seeking admission to an M.S. program from a B.S. degree in engineering:
  1. A score on the Graduate Record Examination (GRE) (http://www.gre.org/ed) to meet the Graduate School requirement of a standardized exam.
  2. For students whose first language is not English, a demonstration of English-language proficiency which meets the requirements of the Graduate School.
  3. GPA of 3.00 or higher on the last 60 hours of a B.S. degree or B.S. and/or M.S. degrees.
  4. B.S. degree in engineering from an ABET accredited program or equivalent.

Students without an Engineering Degree

- Students to an M.S. program from a non-engineering B.S. degree:
  1. A score on the Graduate Record Examination (GRE) (http://www.gre.org/ed) to meet the Graduate School requirement of a standardized exam.
  2. For students whose first language is not English, a demonstration of English-language proficiency which meets the requirements of the Graduate School.
  3. GPA of 3.00 or higher on the last 60 hours of a B.S. degree.
  4. Completion of 18 hours of engineering course work.

Finally, a member of the faculty who is eligible (graduate status of group II or higher) must agree to serve as the major adviser to the prospective student.

Detailed requirements are in the Biological and Agricultural Engineering Department Graduate Student Handbook, available at baeg.uark.edu.

Requirements for the Master of Science Degree: (Minimum 30 hours)

In addition to the requirements of the Graduate School and the graduate faculty in Engineering, the following departmental requirements must be satisfied for the M.S.B.E. degree:

1. Students with an engineering B.S. degree: All students are required to complete not less than 24 semester hours of course work acceptable to the committee and a minimum of six semester hours of thesis. Of the 24 hours required for the M.S. degree, no more than 12 semester hours of course work presented for the MS degree can be at the 4000 level.
2. Students with a non-engineering B.S. degree: In addition to the requirement in 1, students must complete 18 hours of deficiency engineering course work to demonstrate engineering competence.
3. Earn a minimum cumulative grade-point average of 3.0 on all graduate courses attempted. The minimum acceptable grade on a graduate course is “C.”
4. Prior to acceptance into the program a candidate must, in consultation with the department head, identify a professor who is willing to serve as the major professor. During the first semester, the candidate must, in consultation with the major professor and department head, select a graduate committee. The candidate will, in consultation with the committee, prepare a written graduate program of study that will achieve the candidate’s objectives.

5. Satisfactorily pass a written thesis research proposal at least one semester before completing all other requirements. Students may retake a failed proposal defense once, contingent upon approval of the student’s advisory committee. A student who fails the proposal defense twice will be terminated from the program.
6. Satisfactorily pass a final oral examination and complete and submit a thesis.
7. Candidates must prepare a paper suitable for submission to a refereed journal from research done for a thesis.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Ph.D. in Engineering

Admission to the Degree Program: Admission to the Biological Engineering graduate program is a three-step process. First, the prospective student must be admitted to graduate standing by the University of Arkansas Graduate School. Second, the student must be accepted into the department’s program, which depends on transcripts, recommendations, a statement of purpose, and the following additional requirements:

Students with an ABET-accredited or equivalent Engineering Degree

- Students seeking admission to the Ph.D. program who have a B.S. and M.S. degree in engineering:
  1. A score on score of 301 or above (verbal and quantitative) on the Graduate Record Examination (GRE) (http://www.gre.org/ed) to meet the Graduate School requirement of a standardized exam.
  2. A TOEFL score of at least 550 (paper-based) or 213 (computer-based) or 80 (Internet-based). For students This requirement is waived for applicants whose first native language is not English, English or who earn a demonstration of English-language proficiency which meets the requirements of the Graduate School. Bachelor’s or Master’s degree from a U.S. institution.
  3. GPA of 3.00 or higher on the last 60 hours of a B.S. degree or B.S. and/or M.S. degrees.
  4. B.S. degree in engineering from an ABET-accredited program or equivalent.
  5. Students to a Ph.D. program directly from a B.S. degree in engineering:
     1. A score on the Graduate Record Examination (GRE) to meet the Graduate School requirement of a standardized exam.
     2. A score of 307 or above (verbal and quantitative) on the GRE.
     3. A TOEFL score of at least 550 (paper-based) or 213 (computer-based) or 80 (Internet-based). For students This requirement is waived for applicants whose first native language is not English, English or who earn a demonstration of English-language proficiency which meets the requirements of the Graduate School.
     4. Bachelor’s or master’s degree from a U.S. institution.
     5. A cumulative GPA of 3.5 or above for undergraduate work.
6. B.S. degree in engineering from an ABET-accredited program or equivalent.

Students without an Engineering Degree

- Students seeking admission to a Ph.D. program from non-engineering B.S. plus M.S. degrees:
  1. A score on the Graduate Record Examination (GRE) to meet the Graduate School requirement of a standardized exam.
  2. A score of 301 or above (verbal and quantitative) on the GRE.
  3. A TOEFL score of at least 550 (paper-based) or 213 (computer-based) or 80 (Internet-based). For students This requirement is waived for applicants whose first native language is not English, English or who earn a demonstration of English-language proficiency which meets the requirements of the Graduate School.
  4. Bachelor’s or master’s degree from a U.S. institution.
  5. GPA of 3.00 or higher on the last 60 hours of B.S. and/or M.S. degrees.
  6. Completion of 18 hours of engineering course work.

- Students to a Ph.D. program directly from a non-engineering B.S. degree:
  1. A score on the Graduate Record Examination (GRE) to meet the Graduate School requirement of a standardized exam.
  2. A score of 307 or above (verbal and quantitative) with 155 (quantitative) and 4.5 or above in writing on the GRE.
  3. A TOEFL score of at least 580 (paper-based) or 237 (computer-based) or 92 (Internet-based). For students This requirement is waived for applicants whose first native language is not English, English or who earn a demonstration of English-language proficiency which meets the requirements of the Graduate School.
  4. Bachelor’s or master’s degree from a U.S. institution.
  5. A cumulative GPA of 3.5 or above for undergraduate work.
  6. Completion of 18 hours of engineering course work.

Finally, a member of the faculty who is eligible (graduate status of group II or higher) must agree to serve as the major adviser to the prospective student.

Detailed requirements are in the Biological and Agricultural Engineering Department Graduate Student Handbook, available at the Graduate_Program/BAEG_Graduate_Handbook_May_2017BAEG.pdf.

Graduate Faculty

Costello, Thomas A., Ph.D. (Louisiana State University), M.S.Ag.E., B.S.Ag.E. (University of Missouri-Columbia), Associate Professor, 1986.
Haggard, Brian Edward, Ph.D. (Oklahoma State University), M.S. (University of Arkansas), B.S. (Missouri University of Science and Technology), Professor, 2006.
Henry, Christopher Garrett, Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Kansas State University), Associate Professor, 2011.
Kim, Jin-Woo, Ph.D. (Texas A&M University), M.S. (University of Wisconsin-La Crosse), B.S. (University of Iowa), Professor, 2001.
Li, Yanbin, Ph.D. (University of Alberta, Canada), M.S. (China Agricultural University, Beijing, China), Associate Professor, 2007.
Loewer, Otto J., Ph.D. (Purdue University), M.S. (Michigan State University), B.S. (Louisiana State University), Professor, 1996.
Matlock, Marty D., Ph.D., M.S., B.S. (Oklahoma State University), Professor, 2001.
Osborn, G. Scott, Ph.D. (North Carolina State University), M.S., Ag.E., B.S. (University of Kentucky), Associate Professor, 2001.
Runkle, Benjamin R.K., Ph.D., M.S. (University of California—Berkeley), B.S. (Princeton University), Assistant Professor, 2014.
Sadaka, Sammy, Ph.D. (Dalhousie University, Canada, and Alexandria University, Egypt), M.S., B.S. (Alexandria University, Egypt), Associate Professor, 2007.
VanDevender, Karl, Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Professor, 1995.
Verma, Lalit R., Ph.D. (University of Nebraska-Lincoln), M.S. (University of Montana), B. Tech. (J.N. Agricultural University, Jabalpur, India), Professor, 2000.
Zhu, Jun, Ph.D. (University of Illinois at Urbana-Champaign), M.S., B.S. (Zhejiang University, Hangzhou, China), Professor, 2013.

Courses

**BENG 4123. Biosensors & Bioinstrumentation. 3 Hours.**
Principles of biologically based sensing elements and interfacing techniques. Design and analysis methods of biosensing and transducing components in bioinstrumentation. Applications of biosensors and bioinstrumentation in bioprocessing, bioenvironmental, biomechanical and biomedical engineering. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2013 or BIOL 2533 and BENG 3113. (Typically offered: Spring Odd Years)

**BENG 452V. Special Topics in Biological Engineering. 1-6 Hour.**
Special topics in biological engineering not covered in other courses. Prerequisite: Engineering student. (Typically offered: Irregular) May be repeated for up to 8 hours of degree credit.

**BENG 500V. Advanced Topics in Biological Engineering. 1-6 Hour.**
Special problems in fundamental and applied research. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

**BENG 5103. Advanced Instrumentation in Biological Engineering. 3 Hours.**
Applications of advanced instrumentation in biological systems. Emphasis on updated sensing and transducing technologies, data acquisition and analytical instruments. Lecture 2 hours, lab 3 hours per week. Corequisite: Lab component. Prerequisite: BENG 3113. (Typically offered: Spring Even Years)

**BENG 5253. Bio-Mems. 3 Hours.**
Topics include the fundamental principles of microfluidics, Navier-Stokes Equation, bio/abio interfacing technology, bio/abio hybrid integration of microfabrication technology, and various biomedical and biological problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Lecture 3 hour per week. Prerequisite: MEEG 3503 or CVEG 3213 or CHEG 2133. (Typically offered: Irregular)
This course is cross-listed with MEEG 5253.

**BENG 5613. Simulation Modeling of Biological Systems. 3 Hours.**
Application of computer modeling and simulation of discrete-event and continuous-time systems to solve biological and agricultural engineering problems. Philosophy and ethics of representing complex processes in simplified form. Deterministic and stochastic modeling of complex systems, algorithm development, application limits, and simulation interpretation. Emphasis on calibration, validation and testing of biological systems models for the purposes of system optimization, resource allocation, real-time control and/or conceptual understanding. Prerequisite: (AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 4003 or INEG 2313. (Typically offered: Irregular)

**BENG 5623. Life Cycle Assessment. 3 Hours.**
This course will examine the process and methodologies associated with life cycle analysis (LCA). The course will explore the quantitatively rigorous methodology for life cycle inventory (LCI), LCA and life cycle impact assessment (LCIA). This course is offered on-line. The principal instructor will be a UA faculty member. (Typically offered: Spring)

**BENG 5633. Linkages Among Technology, Economics and Societal Values. 3 Hours.**
Addresses how macro-level change is influenced by the linkages among technology, economics and societal values. Three major course initiatives: 1) Developing a conceptual model for understanding how macro-level change has occurred over history; 2) Examining recorded history in order to develop a contextual appreciation for Society’s current situation; and 3) Using statistical data to identify six overriding world trends that are likely to greatly impact society’s goal of achieving sustainable prosperity and well-being in the foreseeable future. Prerequisite: Graduate standing or instructor permission. (Typically offered: Fall and Spring)
This course is cross-listed with OMGT 5633.

**BENG 5703. Design and Analysis of Experiments for Engineering Research. 3 Hours.**
Principles of planning and design of experiments for engineering research. Propagation of experimental error. Improving precision of experiments. Analysis of experimental data for optimal design and control of engineering systems using computer techniques. Students must have an introductory background in statistics. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Irregular)

**BENG 5743. Biotechnology Engineering. 3 Hours.**
Introduction to biotechnology topics ranging from principles of microbial growth, mass balances, bioprocess engineering as well as emerging principles in the design of biologically based microbial and enzymatic production systems. Application areas such as biofuels, and fine and bulk chemical production. Lecture 2 hours, laboratory 3 hours per week. Students may not earn credit for both BEN 5743 and BENG 4703. Prerequisite: Graduate standing. Corequisite: Lab component. (Typically offered: Fall)

**BENG 5801. Graduate Seminar. 1 Hour.**
Reports presented by graduate students on topics dealing with current research in biological engineering. Prerequisite: Graduate standing. (Typically offered: Spring)

**BENG 5923. Nonpoint Source Pollution Control and Modeling. 3 Hours.**
Control of hydrologic, meteorologic, and land use factors on nonpoint source (NPS) pollution in urban and agricultural watersheds. Discussion of water quality models to develop NPS pollution control plans and total maximum daily loads (TMDLs), with consideration of model calibration, validation, and uncertainty analysis. Prerequisite: CVEG 3223. (Typically offered: Irregular)

**BENG 5933. Environmental and Ecological Risk Assessment. 3 Hours.**
Process and methodologies associated with human-environmental and ecological risk assessments. Environmental risk assessments based on human receptors as endpoints, addressing predominantly abiotic processes. Ecological risk assessments based on non-human receptors as endpoints. Approach using hazard definition, effects assessment, risk estimation, and risk management. Application of methods to student projects to gain experience in defining and quantifying uncertainty associated with human perturbation, management and restoration of environmental and ecological processes. (Typically offered: Spring)
BENG 5953. Ecological Engineering Design. 3 Hours.
Design of low impact development techniques to enhance ecological services, reduce peak runoff, and capture sediments, nutrients and other pollutants resulting from urban development. Techniques may include: bio-swales, retention basins, filter strips. Design of sustainable ecological processes for the treatment and utilization of wastes/residues. Design goals include optimization of ecological services to maintain designated uses of land, water and air; including enhancement of habitat for wildlife and recreation, and the discovery of economically viable methods for co-existence of urban and agricultural land uses. Lecture 3 hours per week. (Typically offered: Fall)

BENG 5963. Modeling Environmental Biophysics. 3 Hours.
Interactions between the biosphere and the atmosphere. Connecting the physical environment of solar energy, wind, soil, and hydrology to the biosphere through plant ecophysiology, Boundary layer meteorology, photosynthesis and boundary layer modeling strategies, and the soil-plant-atmosphere continuum. Instrumentation, measurement and modeling strategies for understanding leaf-, landscape- and regional behaviors; and, the transfer, kinetics, and balance of momentum, energy, water vapor, CO2, and other atmospheric trace gases between the landscape (vegetation and soil) and the atmosphere. Applications in sustainable agriculture, irrigation, land and water resources, and modeling plant water use and carbon uptake strategies. A working knowledge of calculus and a discipline related to the course is expected. Three hours of lecture per week. Students may not earn degree credit for both BENG 4963 and BENG 5963. Prerequisite: Instructor consent. (Typically offered: Spring Even Years)

BENG 5973. Advanced Practice in Water Quality Monitoring and Analysis. 3 Hours.
Application of water quality principles to a real world problem. Team project experience leading and developing quality assurance project plans, designing monitoring systems, selecting chemical analysis methods, estimating loads, performing trend analysis, basic model calibration and validation, team management, and technical report writing and oral presentations. Working with various clientele to analyze water quality data in the context of evaluating real-world problems and issues. Three hours of lecture per week. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

BENG 600V. Master's Thesis. 1-6 Hour.
Graduate standing required for enrollment. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BENG 700V. Doctoral Dissertation. 1-18 Hour.
Candidacy is required for enrollment. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Biomedical Engineering Website (https://biomedical-engineering.uark.edu/)

Degrees Conferred:
M.S.B.M.E. (BMEG) Ph.D. (BMEG) in Engineering (See Engineering (p. 162))

Primary Areas of Faculty Research: Bioimaging and biosensing; bioinformatics and computational biology; tissue engineering and biomaterials; bio-MEMS/nanotechnology.

Program Objectives: The objectives of the M.S.B.M.E. program are to prepare graduates for careers in biomedical engineering practice with government agencies, engineering firms, consulting firms or industries and to provide a foundation for continued study at the post-master’s level.

M.S.B.M.E. in Biomedical Engineering
Admission to Degree Program: Admission to the M.S.B.M.E. is a two-step process. First, the prospective student must be admitted to graduate standing by the University of Arkansas Graduate School (see “The Graduate School: Objectives, Regulations, Degrees” in this catalog or visit grad.uark.edu (http://grad.uark.edu/) for details). Second, the student must be admitted to the Department of Biomedical Engineering on the basis of academic transcripts, standardized test scores, three letters of recommendation and a statement of purpose. Students with a non-engineering degree or a non-ABET-accredited engineering degree must demonstrate completion of the Minimum Admission Criteria for non-Engineering Majors prior to being admitted. Complete details for admission may be obtained in the applicable program section from the Biomedical Engineering website (http://bmeg.uark.edu/) as well as in the BMEG graduate program handbook. A general summary of admission requirements is given below:

1. A B.S. or M.S. degree in engineering or engineering equivalent or completion of the minimum admission criteria for non-engineering majors (see below) with a GPA of at least 3.0.
2. A GPA of 3.0 or higher on the last 60 hours of the baccalaureate degree.
3. A GRE score of 302 or above (verbal and quantitative).
4. A TOEFL score of at least 213 (computer-based) or 80 (internet based). This requirement is waived for applicants whose native language is English or who earn a bachelor’s or master’s degree from a U.S. institution.
5. A member of the faculty who is eligible (graduate status of group III or higher) must agree to serve as the Major Adviser to the prospective student.

Minimum Admission Criteria for non-Engineering Majors: Prior to gaining admission into the M.S.B.M.E. program, students with a non-engineering degree or a non-ABET-accredited engineering degree must demonstrate completion of the following coursework with a GPA of at least 3.0: 3 courses in Mathematics (selected from Calculus I, Calculus II, Calculus III, Linear Algebra, and/or Differential Equations), 2 courses of University-level Biology, 2 courses of University-level Chemistry, and 2 courses of University-level (calculus-based) Physics. In addition, students will be required to enroll and complete one of the following courses to provide adequate background in Engineering Design (BMEG2904 – Biomedical Instrumentation, BMEG3634 – Biomaterials, BMEG3124 – Biomedical Signals and Systems, or BMEG3824 – Biomolecular Engineering). Students should consult the Graduate Coordinator for a complete list of courses that satisfy the Minimum Admission Criteria.

Complete details for admission may be obtained in the applicable program section from the BMEG website (http://bmeg.uark.edu/) as well as in the BMEG graduate program handbook.
Requirements for M.S. Degree in Biomedical Engineering: Both thesis and non-thesis options are available for the M.S.B.M.E. degree. In general, students pursuing the thesis option are supported by research or teaching assistantships and conduct research under the guidance of a major adviser. Students pursuing the non-thesis options are typically not sponsored. For either option, all course work must be approved by the student's program advisory committee. The cumulative grade-point average on all graduate courses presented for the degree must be at least 3.0. A general summary of degree requirements is given below. More detailed information may be obtained from the B (http://bmeg.uark.edu/ico;omedical Engineering (http://bmeg.uark.edu/) website (http://bmeg.uark.edu/) as well as in the BMEG graduate program handbook.

• Thesis Option: 24 hours of graduate-level course work, including 5 hours of Biomedical Engineering Graduate Core as identified below, at least 6 additional hours of graduate-level classes in Biomedical Engineering, plus six hours of research resulting in a written master's thesis. Candidates must pass a comprehensive final examination that will include an oral defense of the master's thesis. The examination is prepared and administered by the student's master's thesis committee.

• Non-thesis Option: 30 hours of graduate-level course work including 5 hours of Biomedical Engineering Graduate Core as identified below, and at least 6 additional hours of graduate-level classes in Biomedical Engineering.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Ph.D. in Engineering

Program Description: The Ph.D. Degree in Engineering with a concentration in Biomedical Engineering is an interdisciplinary research degree awarded through the College of Engineering in cooperation with the Graduate School (at the University of Arkansas, there is a common Ph.D. degree for all engineering disciplines). The Ph.D. degree is earned through advanced coursework and in-depth, specialized research. Graduates from this program will be well-prepared for careers in academia, industry or government or as entrepreneurs in technology-based start-up companies.

Admission to Degree Program: Admission into the Ph.D. program with a concentration in Biomedical Engineering is a two-step process. First, the prospective student must be admitted to graduate standing by the University of Arkansas Graduate School (see “The Graduate School: Objectives, Regulations, Degrees” in this catalog or visit grad.uark.edu (http://grad.uark.edu/) for details). Second, the student must be admitted to the Department of Biomedical Engineering on the basis of academic transcripts, standardized test scores, three letters of recommendation, and statement of purpose. All students in the Ph.D. program are offered either a research or teaching assistantship. A member of the faculty who is eligible (graduate faculty status of Group I), must agree to serve as the major adviser to the prospective student. Because of the multidisciplinary nature of Biomedical Engineering, students holding either Engineering or non-Engineering degrees are eligible to apply. Eligibility criteria are outlined below:

- Engineering Academic Background: Students with a B.S. or M.S. degree in engineering or engineering equivalent are eligible to apply for the Ph.D. program.
- Non-engineering Academic Background: Students with a non-engineering degree must fulfill the admission requirements for the Master of Science in Biomedical Engineering (M.S.B.M.E.) including the Minimum Admission Criteria for non-Engineering Majors (see admission requirements for the M.S.B.M.E.). Students with a non-engineering background may be admitted directly into the Ph.D. program; however, it is recommended that students first complete the M.S.B.M.E. degree before entering the Ph.D. program.

Complete details for admission may be obtained in the applicable section from the B (http://bmeg.uark.edu/ico;omedical Engineering (http://bmeg.uark.edu/) website (http://bmeg.uark.edu/) as well as in the BMEG graduate program handbook.

Degree Requirements for the Doctor of Philosophy in Engineering with a concentration in Biomedical Engineering: In addition to the requirements of the Graduate School and the College of Engineering, candidates must meet the following requirements:

1. Develop a Plan of Study within the first year after matriculation.
2. Complete an Annual Progress Report for each subsequent year of study.
3. Complete at least 42 hours of course work beyond the B.S. degree.
   a. For B.S. to Ph.D. candidates, a minimum of 50 percent of the first 30 hours, and all of the remaining hours of course work, must be at the 5000 level or above.
   b. For M.S. to Ph.D. candidates, all course work must be at the 5000 level or above.
4. The cumulative grade-point average on all graduate courses presented for the degree must be at least 3.0. Upon recommendation of the student's Program Advisory Committee, a student who has entered the Ph.D. program after an M.S. degree in engineering may receive credit for up to 24 hours of course work. See Coursework Requirements, below, for additional details.
5. Complete 30 hours of dissertation. Upon recommendation of the student's Program Advisory Committee, a student who has entered the Ph.D. program after an M.S. degree in engineering may receive credit for up to six hours of thesis research toward the dissertation requirement.
6. Satisfactorily pass both a written and oral candidacy examination administered by the student's Program Advisory Committee. Details of the candidacy exam are found in the BMEG graduate program handbook.
7. Assist in departmental teaching for two semesters.
8. Submit and defend the final dissertation to the student's Dissertation Committee.

Coursework Requirements: Students are required to complete 42 credit hours of coursework beyond the B.S. degree in engineering or equivalent in the following four categories.

BMEG 5213. Tissue Mechanics. 3 Hours.
The purpose of this course is to introduce students to non-linear biomechanics of soft tissues such as skin, bladder, blood vessels, and the brain. Topics covered: Tissue mechanics: continuum biomechanics, tensor analysis, kinematics of continua, balance laws. Governing physics of mechanics as applied to soft tissues. Various constitutive relations will be discussed: linear elastic, hyperelastic, viscoelastic, poroelastic, and inelastic materials with internal variables. Cannot receive credit for both BMEG 4213 and BMEG 5213. Prerequisite: BMEG 2813 and BMEG 4623 or equivalents. (Typically offered: Irregular)

BMEG 5313. Advanced Biomaterials and Biocompatibility. 3 Hours.
From Absorbable sutures to Zirconium alloy hip implants, biomaterials science influences nearly every aspect of medicine. This course focuses on the study of different classes of biomaterials and their interactions with human tissues. Prerequisite: BMEG 3634 and BMEG 4623 or equivalents. (Typically offered: Irregular)

BMEG 5413. Tissue Engineering. 3 Hours.
This course introduces Tissue Engineering approaches at genetic and molecular, cellular, tissue, and organ levels. Topics include cell and tissue in-vitro expansion, tissue organization, signaling molecules, stem cell and stem cell differentiation, organ regeneration, biomaterial and matrix for tissue engineering, bioreactor design for cell and tissue culture, dynamic and transport in cell and tissue cultures, clinical implementation of tissue engineered products, and tissue-engineered devices. Students may not earn credit for both BMEG 5413 and BMEG 4413. Corequisite: Lab component. Prerequisite: BIOL 2533 and BMEG 3824. (Typically offered: Irregular)

BMEG 5423. Regenerative Medicine. 3 Hours.
The course covers five broad areas: Biological and molecular basis for regenerative medicine, tissue development, regenerative medicine and innovative technologies, clinical applications of regenerative medicine, and regulation and ethics. Prerequisite: BIOL 2533 and BMEG 3824 or equivalents. (Typically offered: Irregular)

BMEG 5513. Biomedical Optics and Imaging. 3 Hours.
This course will provide students with a fundamental understanding of various biomedical imaging modalities. Topics will include: Basics of light-tissue interaction - absorption, fluorescence, elastic and inelastic scattering; Computational and analytical models of light propagation to quantify tissue optical properties; Optical imaging techniques - spectroscopy, tomography, and laser speckle with potential clinical applications; and Clinical imaging modalities and recent advances - X-ray, Magnetic Resonance Imaging (MRI), Positron Emission Tomography (PET), Computed Tomography (CT), Ultrasound imaging, and Photacoustic imaging. At the end of this course, students should have a good understanding of optical imaging, spectroscopy, and non-optical imaging modalities, specific anatomical sites that they are best suited for, and the trade-offs between imaging depth and resolution. Students may not receive credit for both BMEG 4513 and BMEG 5513. (Typically offered: Irregular)

BMEG 5523. Biomedical Data and Image Analysis. 3 Hours.
This course focuses on an introduction to image processing and analysis for applications in biomedical research. After a review of basic MATLAB usage, students will learn fundamental tools for processing and analyzing data from a variety of subdisciplines within biomedical engineering. Topics include: filtering, thresholding, segmentation, morphological processing, and image registration. Through exercises involving 1D, 2D, and 3D data, students will develop problem-solving skills and a knowledge base in MATLAB required for customized quantitative data analysis. Students may not receive credit for both BMEG 4523 and BMEG 5523. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 560V. Advanced Individual Study. 1-6 Hour.
Individual study and research of a topic mutually agreeable to the student and faculty member. Prerequisite: Graduate standing. (Typically offered: Irregular)
BMEG 570V. Advanced Special Topics. 1-6 Hour.
Consideration of current biomedical engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit.

BMEG 5713. Cardiovascular Physiology and Devices. 3 Hours.
Understanding etymology of disease while creating solutions and dedicated devices is the primary focus of biomedical engineering. This course describes an interdisciplinary approach of the clinical and engineering worlds to develop devices for treating cardiovascular disease. The first part of the course will be a thorough review of the relevant anatomic and physiological considerations important for developing devices. Understanding these considerations from an engineering perspective to inform device development will be the second part of the course. Students may not receive credit for both BMEG 4713 and BMEG 5713. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 5800. Graduate Seminar I. 0 Hours.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research. Prerequisite: BMEG 5801. (Typically offered: Fall) May be repeated for up to 0 hours of degree credit.

BMEG 5801. Graduate Seminar I. 1 Hour.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research. (Typically offered: Fall)

BMEG 5810. Graduate Seminar II. 0 Hours.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property. Prerequisite: BMEG 5811. (Typically offered: Spring) May be repeated for up to 0 hours of degree credit.

BMEG 5811. Graduate Seminar II. 1 Hour.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property. (Typically offered: Spring)

BMEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.
The course will cover the concepts of linear-elastic, elastic-plastic and time-dependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. (Typically offered: Fall and Spring) This course is cross-listed with MEEG 5953, CVEG 5953.

BMEG 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

BMEG 700V. Doctoral Dissertation. 1-6 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

Career and Technical Education (CATE)
Betsy Orr
Program Coordinator
315 Peabody Hall
479-575-6430

BMEG 700V. Advanced Special Topics. 1-6 Hour.
Consideration of current biomedical engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit.

BMEG 5713. Cardiovascular Physiology and Devices. 3 Hours.
Understanding etymology of disease while creating solutions and dedicated devices is the primary focus of biomedical engineering. This course describes an interdisciplinary approach of the clinical and engineering worlds to develop devices for treating cardiovascular disease. The first part of the course will be a thorough review of the relevant anatomic and physiological considerations important for developing devices. Understanding these considerations from an engineering perspective to inform device development will be the second part of the course. Students may not receive credit for both BMEG 4713 and BMEG 5713. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 5800. Graduate Seminar I. 0 Hours.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research. Prerequisite: BMEG 5801. (Typically offered: Fall) May be repeated for up to 0 hours of degree credit.

BMEG 5801. Graduate Seminar I. 1 Hour.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research. (Typically offered: Fall)

BMEG 5810. Graduate Seminar II. 0 Hours.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property. Prerequisite: BMEG 5811. (Typically offered: Spring) May be repeated for up to 0 hours of degree credit.

BMEG 5811. Graduate Seminar II. 1 Hour.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property. (Typically offered: Spring)

BMEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.
The course will cover the concepts of linear-elastic, elastic-plastic and time-dependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. (Typically offered: Fall and Spring) This course is cross-listed with MEEG 5953, CVEG 5953.

BMEG 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

BMEG 700V. Doctoral Dissertation. 1-6 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

Email: borr@uark.edu

Career and Technical Education Program Page (http://cate.uark.edu/masters/)

See Curriculum and Instruction (p. 134) for full departmental faculty listing.

Degrees Conferred:
M.Ed. in Career and Technical Education (CATE)

Program Description: The degree of Master of Education in Career and Technical Education is available for students who possess a bachelor's degree in business, family and consumer sciences, or technology education or a related field in any of those areas. Candidates may choose one of two options. Option 1 is designed for the candidate who has a bachelor's degree in a related field in career and technical education and is interested in obtaining Arkansas teacher licensure. Option 2 is designed to meet the needs of current professionals in the field who desire to attain further education and an advanced degree in career and technical education.

Primary Areas of Faculty Research: Business technology, family and consumer sciences education, technology education, and STEM.

M.Ed. in Career and Technical Education Admission to the Master of Education Degree: For acceptance to the master's degree program in career and technical education, the candidate must meet all general requirements of the Graduate School, an undergraduate program in career and technical education (business education, family and consumer science education, technology education) or in a related field. Additional prerequisites prescribed by the program area are: passing scores for Praxis I and Praxis II: Content and a successful interview by CATE faculty.

Requirements for the Master of Education Degree: (Minimum 33 hours)

Candidates for the master's degree in career and technical education must complete nine hours of core courses and 24 hours of professional education courses. In addition to the program requirements listed below, all degree candidates must successfully complete a written comprehensive examination.

Required Core Courses 9
Choose one course from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESRM 5013</td>
<td>Research Methods in Education</td>
</tr>
<tr>
<td>ESRM 5393</td>
<td>Statistics in Education and Health Professions</td>
</tr>
<tr>
<td>ESRM 5833</td>
<td>Life-Span Human Development</td>
</tr>
</tbody>
</table>

Choose one course from the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDFD 5373</td>
<td>Psychological Foundations of Teaching and Learning</td>
</tr>
<tr>
<td>EDFD 5573</td>
<td>Life-Span Human Development</td>
</tr>
</tbody>
</table>

Choose the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDFD 5353</td>
<td>Philosophy of Education</td>
</tr>
</tbody>
</table>

Required Professional Education Courses 24
Option 1:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CATE 5003</td>
<td>Introduction to Professionalism</td>
</tr>
<tr>
<td>CATE 5023</td>
<td>Classroom Management</td>
</tr>
<tr>
<td>CATE 5013</td>
<td>Teaching Strategies</td>
</tr>
<tr>
<td>CATE 5016</td>
<td>Cohort Teaching Internship</td>
</tr>
</tbody>
</table>
This course provides a study of curricula, methods, and techniques involved in teaching career development in public schools. 3 Hours.

CATE 5073. Introduction to Teaching Programming in the Secondary Schools. 3 Hours.
This course provides an introduction to the foundations of teaching methods of computer programming in the secondary schools. Methods of computer programming instruction will include teaching strategies in coding, problem-solving skills, and applying key programming concepts. This is an introductory level course. No prerequisites are required. Graduate degree credit will not be given for both CATE 4073 and CATE 5073. (Formerly CATE 4073.)

Graduate Faculty

Carter, Vinson R., Ph.D., M.A.T., B.S. (University of Arkansas), Associate Professor, Department of Curriculum and Instruction, 2008.
Daugherty, Michael, Ed.D., M.S., B.S. (Oklahoma State University), Professor, Department of Curriculum and Instruction, 2005.
Orr, Betsy, Ed.D., M.Ed. (University of Arkansas), B.A. (University of Arkansas at Monticello), Associate Professor, Department of Curriculum and Instruction, 1989.

Courses

CATE 5003. Introduction to Professionalism. 3 Hours.
This course examines the principles and concepts of professionalism in the teaching profession, with an emphasis on developing professional concepts in the profession. Added emphasis is on career and technical education organizations. Prerequisite: Admission to the CATE teacher education program. (Typically offered: Fall)

CATE 5013. Teaching Strategies. 3 Hours.
This course is designed to offer a variety of ideas and experiences concerning methods of teaching, planning and presenting instruction. (Typically offered: Fall)

CATE 5016. Cohort Teaching Internship. 6 Hours.
A minimum of 12 weeks will be spent in an off-campus school, at which time the intern will have an opportunity under supervision to observe, to teach, and to participate in other activities involving the school and the community. Prerequisite: Admission to the College of Education and Health Professions Teacher Education and CATE Master's program. (Typically offered: Spring)

CATE 5023. Classroom Management. 3 Hours.
(Formerly CATE 4023.) Theory and techniques in classroom management, including professional ethics and school policies related to students, faculty and programs. Graduate degree credit will not be given for both CATE 4023 and CATE 5023. Prerequisite: CATE 3103. (Typically offered: Fall)

CATE 5033. Assessment/Program Evaluation. 3 Hours.
An introduction to constructing, evaluating, and interpreting tests; descriptive and inferential statistics; state competency testing; and guidelines for state program evaluations. Prerequisite: Graduate standing. (Typically offered: Fall)

CATE 5073. Instructional Materials. 3 Hours.
A comprehensive technology education methods course pertaining to the teaching of standards-based curriculum materials. (Typically offered: Fall, Spring and Summer)

CATE 5463. Applications in Career Orientation. 3 Hours.
Student is introduced to various teaching methods and techniques of managing hands-on activities in career orientation class setting. (Typically offered: Summer)

CATE 5503. Trends and Issues in Technology Education. 3 Hours.
A comprehensive technology education methods course pertaining to the teaching of standards-based curriculum materials. (Typically offered: Fall, Spring and Summer)

CATE 5543. Technology for Teaching and Learning. 3 Hours.
A study of computer technology as it relates to teacher education. This course concentrates on knowledge and performance and includes hands-on technology activities that can be incorporated in an educational setting. Students interact with the instructor and other students via BlackBoard and engage in weekly discussions and acquire hands-on computer technology experience. (Typically offered: Fall and Summer)

CATE 5573. Instructional Materials. 3 Hours.
A comprehensive course designed to give students the opportunity to understand, prepare, and test materials leading toward excellence in instruction. The focus of this course is the design and development of instructional media and materials utilizing different multimedia and software for use in educational programs. This includes the development of computer based, general instructional materials. (Typically offered: Fall and Summer)

CATE 5803. Teaching Apparel Production to Secondary Students. 3 Hours.
This course prepares students to teach apparel production concepts to students in secondary school settings. Topics to be covered include clothing selection, textiles, clothing care and laundry, clothing construction, and careers and technology. Problem- and project-based learning will provide the foundation for content delivery in this course. The focus on this course is on preparing preservice teachers in secondary schools to teach apparel production utilizing a variety of teaching methods. (Typically offered: Spring)

Cell and Molecular Biology

Degrees Conferred:
M.S., Ph.D. (CEMB)

Program Description: Cell and Molecular Biology is an interdisciplinary graduate program incorporating faculty from 17 departments and four colleges in the University of Arkansas system. Graduate studies may be...
pursued in any area of cell or molecular biology for which there is faculty expertise.

Primary Areas of Faculty Research: The study of various aspects of cell function, structure, metabolism, and chemical functions on, within, and between cells; the study of biomolecular interactions; the relationships between biomolecular reactions and observed cellular properties; molecular genetics, protein chemistry, biological structures; as well as the use of molecular detection methods to detect or characterize biological states in prokaryotes, eukaryotes, systematics, forensics, or health care.

M.S. in Cell and Molecular Biology

Admission to Degree Program: All applicants must have a B.A. or B.S. in a basic or applied science. Applicants must present Graduate Record Examination scores for the Verbal and Quantitative tests, and the GRE writing instrument. For admission, a student must have a sponsoring faculty member. The sponsoring faculty member will submit probable thesis subjects to the Program Committee prior to acceptance of the student. Once an applicant has been approved by the Program Committee, applications are forwarded to the Graduate School for application for admission to the Graduate School. Admitted and sponsored students will be responsible for the Graduate School’s application fee unless paid by the department of the sponsoring faculty member. When deemed appropriate by the Director and Program Advisory Committee, the Cell and Molecular Biology program will allow a qualified applicant to be admitted to complete research rotations through up to three designated research laboratories during his/her first semester enrolled in the Cell and Molecular Biology graduate program. Admission for research rotations is contingent upon: 1) Stipend support has been guaranteed for the student during the rotation semesters; and 2) the Cell and Molecular Biology faculty designated for the rotation have agreed to host the student during this period. After the rotation period, the student must obtain a faculty research sponsor.

Requirements for the Master of Science Degree: For the M.S. degree, the Graduate School and/or the program requires 30 semester hours, a comprehensive examination, a cumulative GPA of 3.00, and a minimum residence of 30 weeks. Any student who receives a grade of “F” in any graduate-level course will be subject to dismissal following review by the Program Advisory Committee. All candidates for the M.S. must complete a minimum of 24 hours of post-baccalaureate graduate credits not including seminar and thesis credit hours (18 hours plus CHEM 5813 and CHEM 5843) in Cell and Molecular Biology-approved courses and 6 hours of thesis research. In addition, all candidates who are considered full-time must enroll every fall and spring semester in a Cell and Molecular Biology designated seminar course. Graduate advisory and thesis committees will consist of at least three program faculty representing at least two different departments. With the approval of the student’s Graduate Advisory Committee, the Cell and Molecular Biology program will allow a qualified applicant to be admitted research rotations through up to three designated research laboratories during his/her first semester enrolled in the Cell and Molecular Biology graduate program. After the rotation period, the student must obtain a faculty research sponsor.

Requirements for the Doctor of Philosophy Degree: Candidates for the Ph.D. must complete 24 hours of dissertation research. Students wishing to bypass the M.S. for a Ph.D. must complete the same 24 hours of course work in Cell and Molecular Biology-approved course work as for the M.S. degree, plus a minimum of 18 hours of dissertation research. In addition, all candidates who are considered full-time must enroll every fall and spring semester in a Cell and Molecular Biology designated seminar course. Graduate advisory and dissertation committees will consist of at least four program faculty representing at least two different departments. With the approval of the student’s Graduate Advisory Committee, up to 6 hours of alternative graduate courses may be used to satisfy the 24 hours of course work. Any student who receives a grade of “D” or “F” in any graduate-level course will be subject to dismissal following review by the Program Advisory Committee. Any student receiving more than two grades of “C” in courses of two or more credit hours is no longer eligible for the Ph.D., but may elect to complete an M.S. degree in the program.

Candidates for the Ph.D. who do not meet the requirement for proficiency in spoken English at the time of admission must demonstrate proficiency in spoken English through a university-accepted examination prior to their candidacy exam. English proficiency courses are available at the University of Arkansas to help in this effort. Meeting this language requirement will not only prepare candidates for communication in oral examinations, research groups, national meetings, and interviews, but will also (in conjunction with the written language evaluation) enable students to serve as teaching assistants, providing an alternative mechanism for support in the event that other support is unavailable.

All Ph.D. students must complete the Candidacy Examination. The Candidacy Examination for the Ph.D. will consist of the writing of an original research proposal using the guidelines for a federally funded post-doctoral fellowship (e.g., NIH, NSF, USDA) and an oral examination over the proposal, related subjects, and general knowledge. The written and oral portions of the candidacy examination must be completed within the Ph.D. candidate’s first 29 months in this program.

Students in the Ph.D. track will, in collaboration with their Graduate Advisory Committee, select a topic and format for their research proposal within the two years in the program. The proposal topic is to be within the field of Cell and Molecular Biology but on a subject distinct from the student’s Ph.D. research. The written proposal is submitted to the student’s Graduate Advisory Committee for evaluation and approval or rejection. Students may submit the proposal more than once. Upon
completion of an approved proposal the candidate must then pass an oral examination by the student’s Graduate Advisory Committee covering the proposal, related subjects as determined by the examining committee, and general knowledge relevant to research in Cell and Molecular Biology.

Only upon satisfactory completion of the proposal and oral examination, as judged by the student’s Graduate Advisory Committee, does a student become a candidate for the Ph.D. Students who fail to complete the candidacy examination in the allotted time will be dropped from the Ph.D. program but may choose to become candidates for the M.S. The Ph.D. is granted not only for fulfillment of technical requirements but also for development and possession of critical and creative thought abilities in the areas of Cell and Molecular Biology. Evidence of these abilities is given through the completion of a dissertation. The student’s Graduate Dissertation Committee will evaluate the dissertation and conduct an oral Final Examination of the candidate over the dissertation and any other subject matter deemed appropriate by the committee. Administration of the final oral defense will follow the Graduate School guidelines outlined in the Graduate Catalog. Just prior to the Final Examination, the Ph.D. candidate will present a public seminar announced to all CEMB faculty and students.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

**Graduate Faculty**

**A**

- **Adams, Paul D.**, Ph.D. (Case Western Reserve University), B.S. (Louisiana State University), Associate Professor, Department of Chemistry and Biochemistry, 2006.
- **Alverson, Andrew James**, Ph.D. (University of Texas at Austin), M.S. (Iowa State University), B.S. (Grand Valley State University), Associate Professor, Department of Biological Sciences, 2012.
- **Anthony, Nick**, Ph.D. (Virginia Polytech Institute and State University), M.S., B.S. (The Ohio State University), Professor, Department of Poultry Science, 1990.

**B**

- **Baum, Jamie I.**, Ph.D., B.S. (University of Illinois-Urbana-Champaign), Associate Professor, Department of Food Science, 2011.
- **Bluhm, Burt H.**, Ph.D., M.S. (Purdue University), B.S. (University of Oklahoma), Associate Professor, Department of Entomology and Plant Pathology, 2008.
- **Bottje, Walter G.**, Ph.D. (University of Illinois-Urbana-Champaign), M.S. (Southern Illinois University), B.S. (Eastern Illinois University), Professor, Department of Poultry Science, 1985.
- **Burgos, Nilda Roma**, Ph.D., M.S. (University of Arkansas), B.S. (Visayas State College of Agriculture-Philippines), Professor, Department of Crop, Soil and Environmental Sciences, 1998.

**C**

- **Correll, Jim**, Ph.D., M.S. (University of California-Berkeley), B.S. (Pennsylvania State University), Distinguished Professor, Department of Entomology and Plant Pathology, 1989.

**D**

- **Donoghue, Dan**, Ph.D. (Texas A&M University), M.S. (Brigham Young University), B.S. (Medical University of South Carolina), Professor, Department of Poultry Science, 2000.
- **Douglas, Michael Edward**, Ph.D. (University of Georgia), M.S., B.S. (University of Louisville), Professor, Department of Biological Sciences, 2011.
- **Douglas, Marlis R.**, Ph.D., M.S., B.S. (University of Zurich), Professor, Department of Biological Sciences, 2012.
- **Dowling, Ashley Patrick Gregg**, Ph.D. (University of Michigan-Ann Arbor), B.S. (University of Arizona), Associate Professor, Department of Entomology and Plant Pathology, 2008.
- **Du, Yuchun**, Ph.D. (Kagoshima University, Japan), B.S. (Shaanxi University of Technology, China), Associate Professor, Department of Biological Sciences, 2007.
- **Durdik, Jeannine M.**, Ph.D. (Johns Hopkins University), B.S. (Purdue University), Professor, Department of Biological Sciences, 1994.

**E**

- **Erf, Gisela F.**, Ph.D. (Cornell University), M.S., B.S. (University of Guelph, Canada), Professor, Department of Poultry Science, 1994.
- **Etges, William J.**, Ph.D. (University of Rochester), M.S. (University of Georgia), B.S. (North Carolina State University), Professor, Department of Biological Sciences, 1987.

**G**

- **Goggin, Fiona**, Ph.D. (University of California-Davis), B.S. (Cornell University), Professor, Department of Entomology and Plant Pathology, 2001.

**H**

- **Hargis, Billy M.**, Ph.D., D.V.M. (University of Minnesota-Twin Cities), M.S. (University of Georgia), B.S. (University of Minnesota), Distinguished Professor, Department of Poultry Science, 2000.
- **Henry, Ralph Leroy**, Ph.D., M.S. (University of Florida), B.S.E. (University of Kansas), Distinguished Professor, Department of Biological Sciences, 1996.
- **Hestekin, Christa**, Ph.D. (Northwestern University), B.S.Ch.E. (University of Kentucky), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 2006.
- **Hettiarachchy, Navam S.**, Ph.D. (University of Hull, England), M.S. (Edinburgh University, Scotland), B.S. (University of Madras, India), University Professor, Department of Food Science, 1992.

**K**

- **Koepp, Roger E.**, Ph.D. (California Institute of Technology), A.B. (Haverford College), Distinguished Professor, Department of Chemistry and Biochemistry, 1979.
- **Kong, Byungwhi**, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (Korea University), Associate Professor, Department of Poultry Science, 2006.
- **Korth, Ken L.**, Ph.D. (North Carolina State University), B.S. (University of Nebraska), Professor, Department of Entomology and Plant Pathology, 1999.
- **Kuenzel, Wayne J.**, Ph.D. (University of Georgia), M.S., B.S. (Bucknell University), Professor, Department of Poultry Science, 2000.
- **Kwon, Young Min**, Ph.D. (Texas A&M University), M.S., B.S. (Seoul National University), Associate Professor, Department of Poultry Science, 2002.

**L**

- **Lay, Jackson**, Ph.D. (University of Nebraska-Lincoln), Professor, Department of Chemistry and Biochemistry, 2002.
- **Lehmann, Michael Herbert**, Ph.D., Diploma in Biology (Philips University of Marburg, Germany), Professor, Department of Biological Sciences, 2002.
- **Lessner, Daniel J.**, Ph.D. (University of Iowa), B.S. (University of Wisconsin-Stevens Point), Associate Professor, Department of Biological Sciences, 2008.
Lewis, Jeffrey A., Ph.D. (University of Wisconsin-Madison), B.S. (University of California-Santa Barbara), Assistant Professor, Department of Biological Sciences, 2013.

M

McIntosh, Matt, Ph.D. (Pennsylvania State University), B.A. (Virginia Tech), Professor, Department of Chemistry and Biochemistry, 1996.

McNabb, David S., Ph.D. (Louisiana State University Health Sciences Center), B.S. (University of Texas at Arlington), Associate Professor, Department of Biological Sciences, 2000.

Millett, Francis, Ph.D. (Columbia University), B.S. (University of Wisconsin), Distinguished Professor, Department of Chemistry and Biochemistry, 1972.

P

Paul, David W., Ph.D. (University of Cincinnati), B.S. (Southwestern University), Associate Professor, Department of Chemistry and Biochemistry, 1980.

Pereira, Andy, Ph.D. (Iowa State University), M.S. (Indian Agricultural Research Institute, India), B.Sc.Ag. (Govind Ballabh Pant University of Agriculture and Technology, India), Professor, Department of Crop, Soil and Environmental Sciences, 2011.

Pinto, Ines, Ph.D. (Louisiana State University Health Sciences Center), M.S., B.S. (University of Chile), Associate Professor, Department of Biological Sciences, 2000.

R

Rhoads, Douglas Duane, Ph.D. (Kansas State University), M.A., B.A. (Wichita State University), University Professor, Department of Biological Sciences, 1990.

Ricke, Steven C., Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Illinois), Professor, Department of Food Science, 2005.

Rorie, Rick, Ph.D. (Louisiana State University), M.S., B.S. (University of Arkansas), Professor, Department of Animal Science, 1989.

Rosenkranz, Charles F., Ph.D. (Kansas State University), M.S., B.S. (University of Missouri-Columbia), Professor, Department of Animal Science, 1991.

S

Sakon, Joshua, Ph.D. (University of Wisconsin-Madison), B.S. (Southern Oregon University), Professor, Department of Chemistry and Biochemistry, 1997.

Srivastava, Vibha, Ph.D. (Jawaharlal Nehru University, New Delhi), M.S. (Govind Ballabh Pant University of Agriculture and Technology), B.S. (D.E.I. University), Professor, Department of Crop, Soil and Environmental Sciences, 2001.

Stites, Wesley, Ph.D. (Massachusetts Institute of Technology), M.A., B.A. (Johns Hopkins University), Professor, Department of Chemistry and Biochemistry, 1991.

Szalanski, Allen Lawrence, Ph.D. (University of Nebraska-Lincoln), M.S. (Kansas State University), B.S. (University of Manitoba), Professor, Department of Entomology and Plant Pathology, 2001.

T

Thallapuranam, Suresh, Ph.D. (Osmania University), Professor, Department of Chemistry and Biochemistry, 2003.

Tipsmark, Christian K., Ph.D., M.S. (University of Southern Denmark), Associate Professor, Department of Biological Sciences, 2010.

Tzanetakis, Ioannis E., Ph.D. (Oregon State University), M.S., B.S. (Agricultural University of Athens, Greece), Professor, Department of Entomology and Plant Pathology, 2008.

W

Wideman, Robert F., Ph.D. (University of Connecticut), B.A. (University of Delaware), Professor, Department of Poultry Science, 1993.

Wilkins, Charles L., Ph.D. (University of Oregon), B.S. (Chapman College), Distinguished Professor, Department of Chemistry and Biochemistry, 1998.

Wolchok, Jeffrey Collins, Ph.D. (University of Utah), M.S., B.S. (University of California at Davis), Associate Professor, Department of Biomedical Engineering, 2011.

Courses

CEMB 590V. Special Topics in Cell and Molecular Biology. 1-6 Hour.
Considers new areas in Cell and Molecular Biology not yet treated adequately in textbooks or in other courses. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CEMB 5911. Seminar in Cell and Molecular Biology. 1 Hour.
Discussion of current topics in Cell and Molecular Biology. All graduate students in the Cell and Molecular Biology degree program must enroll every fall and spring semester in this course or an approved alternate seminar course. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.
This course is cross-listed with BIOL 5001.

CEMB 600V. Master’s Thesis. 1-6 Hour.
Master's thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CEMB 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Chemical Engineering Website (http://chemical-engineering.uark.edu/)

Degrees Conferred:
M.S.Ch.E. (CHEG)
Ph.D. in Engineering (CHEG) (See Engineering (p. 162))

Program Description: The goal of the graduate program in the Ralph E. Martin Department of Chemical Engineering is to prepare the student for advanced roles in the profession through a combination of planned course work and independent research activities. The graduate program allows the student to specialize in an area of interest while also broadening the graduate’s intellectual abilities and enhancing career opportunities in research, teaching, management, and general engineering practice. The student’s goals for pursuing an advanced degree, including preferences for a research topic, are given primary consideration in the preparation of the course of study. The student’s advisory committee will assist in the definition of a diversified program to ensure competence as a practicing engineer.

Primary Areas of Faculty Research: Alternative sources of chemicals and fuels; biochemical and bioprocess engineering; biomaterials; catalysis and reaction engineering; chemical and biochemical separations; chemical process safety and hazard assessment; engineering education;
materials science for nanomaterials and microelectronics; membrane materials and process engineering; statistical mechanics and molecular modeling; sustainability and life cycle analysis.

**M.S.Ch.E in Chemical Engineering**

**Admission to the Degree Program:** The specific requirements for admission to the program and completion of an advanced degree in chemical engineering are determined by the Graduate School of the University of Arkansas and the Graduate Studies Committee of the Ralph E. Martin Department of Chemical Engineering. A general summary of departmental requirements is given below and detailed information may be obtained from the Chemical Engineering website (http://chemical-engineering.uark.edu/).

An undergraduate or M.S. degree in chemical engineering is recommended for admission to the graduate program, but students with a B.S. in another field of engineering or in a natural science may also enter the program by first taking certain undergraduate chemical engineering courses to prepare them for graduate study. The requirements for admission to the department's graduate program are:

- A grade point average of 3.0 out of 4.0 in a B.S. or M.S. in chemical engineering or, if the student does not have a degree in chemical engineering, satisfactory completion of the department's undergraduate deficiency program.
- A minimum GRE score of 155 on the quantitative section of the exam and a minimum of 307 combined score on the quantitative and verbal sections, taken within five years prior to application.
- Students without a B.S. degree from a U.S. university will need a minimum score on one of the following English proficiency exams: TOEFL paper exam – 550; iBT computer exam – 80; or IELTS – 6.5. The test must have been taken within two years prior to application.
- To enter the Ph.D. program, a majority vote by the Graduate Studies Committee of the Ralph E. Martin Department of Chemical Engineering is required.

Financial aid may be available for the student’s stipend and/or tuition on a case-by-case basis. This is decided in the department.

Details about these requirements are in the Chemical Engineering Department Graduate Student Handbook, available as a downloadable PDF (http://chemical-engineering.uark.edu/academics/graduate-program/hestekin-fall-handbook.pdf).

**Research Program:** The thesis M.S. degree and the Ph.D. degree involve an interactive, hands-on program that exposes the graduate student to the techniques, procedures, and philosophy necessary for successful and ethical research. The students will work closely with their supervising professor and committee to perform original research on a topic of importance to the profession. The student will participate in the planning, managerial, budgetary, experimental, and reporting aspects of his/her research projects. The result will be a thesis (for the thesis master’s degree) or a dissertation (for the Ph.D.), both of which should result in at least one journal or conference publication for the student. Active research interests of the faculty are listed on the department's research page (http://chemical-engineering.uark.edu/research/).

**Requirements for the non-thesis M.S. Degree:** At least 30 hours of course work as follows:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 4423</td>
<td>Introduction to Partial Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>CHEG 5113</td>
<td>Transport Processes I</td>
<td>3</td>
</tr>
</tbody>
</table>

**CHEG 5133** Advanced Reactor Design 3
**CHEG 5333** Advanced Thermodynamics 3
**CHEG 6123** Transport Processes II 3
Nine hours of a 4000 or 5000 level CHEG course 2 9
Six hours of any 4000, 5000 or 6000 level technical electives 3 6
CHEG 5801 Graduate Seminar (this should be taken every semester) 1
Assisting in departmental teaching is required.

**Total Hours** 31

1. Because this is an undergraduate course, additional work will be required by the instructor for graduate credit. In addition to this course, the non-thesis student will be able to present only three more hours of 3000-level credit for the degree, with the permission of the advisory committee.
2. Not to exceed 3 hours of 4000 level credit. These electives must be lecture courses, not a special project, seminar or independent research topic.
3. Not to exceed 3 hours of 4000 level credit. These electives must be lecture courses, not a special project, seminar or independent research topic.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

**Requirements for the thesis M.S. Degree:** At least 24 hours of course work and six hours of thesis as follows:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 4423</td>

Assisting in departmental teaching is required.

**Total Hours** 31

1. Because this is an undergraduate course, additional work will be required by the instructor for graduate credit. The thesis student will not be able to present any additional hours of 3000 level credit for the degree.
2. Not to exceed 3 hours of 4000 level credit. These electives must be lecture courses, not a special project, seminar or independent research topic.
3. These electives must be lecture courses, not a special project, seminar or independent research topic.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).
MATH 5423 Introduction to Partial Differential Equations 3
CHEG 5113 Transport Processes I 3
CHEG 5133 Advanced Reactor Design 3
CHEG 5333 Advanced Thermodynamics 3
CHEG 6123 Transport Processes II 3
6 hours of a 5000 or 6000 level CHEG course 6
18 hours of any 5000 or 6000 level technical electives 18
CHEG 5801 Graduate Seminar (this should be taken every semester 3
CHEG 7001 Doctoral Dissertation 30

Research resulting in successfully defended dissertation and
assisting in departmental teaching are required.

Total Hours 72

1 International or non-engineering BS students must take a design course as one of their electives in addition to the above list.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Graduate Faculty

Ackerson, Michael D., Ph.D. (University of Arkansas), M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), Associate Professor, 1986.
Almodovar Montanez, Jorge L., Ph.D. (Iowa State University), Assistant Professor, 2018.
Beitle, Robert R., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Pittsburgh), Professor, 1993.
Clausen, Ed, Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), University Professor, 1981.
Ford, David M., Ph.D., M.S., B.S.Ch.E. (University of Pennsylvania), Professor, 2017.
Greenlee, Lauren F., Ph.D., M.S. (University of Texas, Austin), BSChE (University of Michigan), Associate Professor, 2015.
Hestekin, Jamie A., Ph.D. (University of Kentucky), B.S.Ch.E. (University of Minnesota-Duluth), Professor, 2006.
Hestekin, Christa, Ph.D. (Northwestern University), B.S.Ch.E. (University of Kentucky), Associate Professor, 2006.
Servoss, Shannon, Ph.D. (Northwestern University), B.S.Ch.E. (University of Michigan-Ann Arbor), Associate Professor, 2007.
Spicer, Tom O., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Professor, 1981.
Thoma, Greg, Ph.D. (Louisiana State University), M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Professor, 1993.
Thompson, Audie K., Ph.D (University of Mississippi Medical Center), Assistant Professor, 2018.
Walker, Heather L., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, 2008.
Wickramasinghe, Ranil, Ph.D. (University of Minnesota-Twin Cities), M.S., B.S. (University of Melbourne, Australia), Professor, 2011.

Courses

CHEG 4813. Chemical Process Safety. 3 Hours.
Application of chemical engineering principles to the study of safety, health, and loss prevention. Fires and explosions, hygiene, toxicology, hazard identification, and risk assessment in the chemical process industries. Corequisite: Drill component. Prerequisite: CHEG 3144 and CHEG 3323. (Typically offered: Fall)

CHEG 5013. Membrane Separation and System Design. 3 Hours.
Theory and system design of cross flow membrane process--reverse osmosis, nanofiltration, ultrafiltration, and microfiltration--and applications for pollution control, water treatment, food and pharmaceutical processing. (Typically offered: Irregular)

CHEG 5033. Technical Administration. 3 Hours.
Contemporary issues affecting the domestic and global Chemical Process Industries (CPI). Emphasis is on process economics, market and corporate strategy as well as advances in technology to improve corporate earnings while addressing the threats and opportunities in the CPI. Prerequisite: Senior or graduate standing. (Typically offered: Irregular)

CHEG 5043. Colloid and Interface Science. 3 Hours.
This course aims to provide essential knowledge about surface, interface, and molecular self-organization. At the end of this course students should understand (i) basic concepts to describe phenomena at surfaces, (ii) molecular self-organization, and (iii) basic techniques for characterization of surfaces and interfaces. (Typically offered: Fall)

CHEG 5113. Transport Processes I. 3 Hours.
Fundamental concepts and laws governing the transfer of momentum, mass, and heat. (Typically offered: Fall)

CHEG 5133. Advanced Reactor Design. 3 Hours.
Applied reaction kinetics with emphasis on the design of heterogeneous reacting systems including solid surface catalysis, enzyme catalysis, and transport phenomena effects. Various types of industrial reactors, such as packed bed, fluidized beds, and other non-ideal flow systems are considered. (Typically offered: Spring)

CHEG 5213. Advanced Chemical Engineering Calculations. 3 Hours.
Developments of and solutions of equations and mathematical models of chemical processes and mechanisms. (Typically offered: Irregular)

CHEG 5273. Corrosion Control. 3 Hours.
Qualitative and quantitative introduction to corrosion and its control. Application of the fundamentals of corrosion control in the process industries is emphasized. (Typically offered: Spring)

CHEG 5333. Advanced Thermodynamics. 3 Hours.
Methods of statistical thermodynamics, the correlation of classical and statistical thermodynamics, and the theory of thermodynamics of continuous systems (non-equilibrium thermodynamics). (Typically offered: Fall)

CHEG 5353. Advanced Separations. 3 Hours.
Phase equilibrium in non-ideal and multicomponent systems, digital and other methods of computation are included to cover the fundamentals of distillation, absorption, and extraction. (Typically offered: Fall)

CHEG 5443. Chemical Engineering Design II. 3 Hours.
A capstone design class designed for graduate students who do not have an engineering degree. Responsibility for decision making is placed on the students in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Students may not receive credit for both CHEG 4443 and CHEG 5443. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CHEG 5513. Biochemical Engineering Fundamentals. 3 Hours.
An introduction to bioprocessing with an emphasis on modern biochemical engineering techniques and biotechnology. Topics include: basic metabolism (procaryote and eucaryote), biochemical pathways, enzyme kinetics (including immobilized processes), separation processes (e.g. chromatography) and recombinant DNA methods. Material is covered within the context of mathematical descriptions (calculus, linear algebra) of biochemical phenomenon. (Typically offered: Spring Even Years)
CHEG 5733. Polymer Theory and Practice. 3 Hours.
Theories and methods for converting monomers into polymers are presented. Topics include principles of polymer science, commercial processes, rheology, and fabrication. (Typically offered: Fall Odd Years)

CHEG 5801. Graduate Seminar. 1 Hour.
Oral presentations are given by master’s candidates on a variety of chemical engineering subjects with special emphasis on new developments. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CHEG 588V. Special Problems. 1-6 Hour.
Opportunity for individual study of an advanced chemical engineering problem not sufficiently comprehensive to be a thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CHEG 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CHEG 6123. Transport Processes II. 3 Hours.
Continuation of CHEG 5113. Prerequisite: CHEG 5113. (Typically offered: Spring)

CHEG 6203. Preparation of Research Proposals. 3 Hours.
This course will cover technical communication in both written and oral presentation. Prerequisite: Instructor consent. (Typically offered: Irregular)

CHEG 6801. Graduate Seminar. 1 Hour.
Oral presentations are given by doctoral students on a variety of chemical engineering subjects with special emphasis on new developments. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CHEG 688V. Special Topics in Chemical Engineering. 1-3 Hour.
Advanced study of current Chemical Engineering topics not covered in other courses. Prerequisite: Doctoral students only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CHEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Department of Chemistry and Biochemistry Website (https://fulbright.uark.edu/departments/chemistry/)

Degrees Conferring:
M.S.; Ph.D. in Chemistry (CHEM)

Areas of Study: Analytical, inorganic, organic, physical, biophysical, and biochemistry.

Primary Areas of Faculty Research: Specialized centers complement traditional research areas in the Department of Chemistry and Biochemistry. These include the Center for Protein Structure and Function and the State-Wide Mass Spectrometry Facility.

Requirements for M.S. in Chemistry

Admission to Graduate Program: In addition to the application for admission to the Graduate School and the transcripts required for Graduate School admission, applicants for admission to the degree programs of the Department of Chemistry and Biochemistry must submit a) three letters of recommendation from persons familiar with the applicant’s previous academic and professional performance and b) official scores from the Graduate Record Examination (General Test). Advanced subject GRE tests scores (Chemistry, Biochemistry, etc.) are encouraged but not required.

Basic Program for Advanced Degree Candidates: In addition to the material given below, the student is referred to the general Graduate School requirements mentioned earlier in this catalog and to the bulletin Information for Graduate Students in Chemistry and Biochemistry available from the Department of Chemistry and Biochemistry.

1. An undergraduate program, consisting of courses in general chemistry, analytical chemistry (two semesters), organic chemistry (three semesters), physical chemistry (two semesters), and inorganic chemistry (one semester) provide an adequate foundation for graduate work in chemistry and biochemistry. If a graduate student lacks any part of this introductory program, it must be completed within the first four semesters as a graduate student. If the student has the necessary prerequisites, courses for graduate credit may be taken concurrently. Proficiency in physical chemistry must be demonstrated by satisfactory performance on placement examinations. Inadequate performance may be remedied by enrollment in one or more recommended courses.

2. The department has no foreign language requirement for either the M.S. or Ph.D. degree.

3. Each advanced degree candidate must present a suitable program of advanced courses and research. The specific courses needed to provide a basis for scholarly work beyond the B.S. level will vary with the student’s undergraduate preparation, area of concentration and the degree sought. Individual course enrollments must be approved initially by the graduate adviser and subsequently by the student’s advisory committee.

4. Every student must register for a minimum of one credit hour of CHEM 600V or CHEM 700V in each term during which the student is present and doing thesis or dissertation research. Post-candidacy doctoral students are required to be enrolled in at least one hour of dissertation credit (CHEM 700V) every semester (fall, spring, summer), until the degree is conferred.

Additional Requirement for Master of Science Degree: The Master of Science degree in Chemistry requires a minimum 24 hours of course work plus six hours of thesis. A thesis reporting original research will be required of all candidates for the Master of Science degree in chemistry. Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Requirements for Ph.D. in Chemistry

Additional Requirements for the Doctor of Philosophy Degree: A doctoral advisory committee is appointed to evaluate the candidate’s preparation and to draw up a suitable program of study and research. This committee consists of the student’s major professor and at least three
other members of the graduate faculty. Under most circumstances, the major professor serves as the chairperson of that committee.

For chemistry students, the candidacy examination is of the cumulative type. Five cumulative examinations are given each semester in each of the areas of concentration mentioned above. To complete the candidacy examination, seven of these cumulative examinations must be passed within a specified time, usually by the end of the fifth semester of graduate work.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Graduate Faculty

Adams, Paul D., Ph.D. (Case Western Reserve University), B.S. (Louisiana State University), Associate Professor, 2006.

Allison, Neil T., Ph.D. (University of Florida), B.S. (Georgia College), Associate Professor, 1980.

Beyzavi, M. Hassan, Ph.D. (Freie Universität Berlin, Germany), Assistant Professor, 2017.

Chen, Jingyi, Ph.D. (University of Washington), M.A. (State University College at Buffalo), B.S. (Zhongshan University), Associate Professor, 2010.

Coridan, Robert, Ph.D., M.S. (University of Illinois-Urbana-Champaign), B.S. (The Ohio State University), Assistant Professor, 2015.

Fan, Chenguang, Ph.D. (Iowa State University), B.S. (Nanjing University), Assistant Professor, 2016.

Fritsch, Ingrid, Ph.D. (University of Illinois-Urbana-Champaign), B.S. (University of Utah), Professor, 1992.

Greathouse, Denise A., Ph.D. (University of Arkansas), Research Associate Professor, 1997.

Heyes, Colin David, Ph.D. (Georgia Institute of Technology), B.S. (Loughborough University), Associate Professor, 2008.

Kilyanek, Stefan M., Ph.D., M.S. (University of Chicago), B.S. (Grand Valley State University), Assistant Professor, 2014.

Koepe, Roger E., Ph.D. (California Institute of Technology), A.B. (Haverford College), Distinguished Professor, 1979.

Lay, Jackson, Ph.D. (University of Nebraska-Lincoln), Professor, 2002.

McIntosh, Matt, Ph.D. (Pennsylvania State University), B.A. (Virginia Tech), Professor, 1996.

Millett, Francis, Ph.D. (Columbia University), B.S. (University of Wisconsin), Distinguished Professor, 1972.

Moradi, Mahmoud, Ph.D. (North Carolina State University), M.S., B.S. (Sharif University of Technology), Assistant Professor, 2015.

Paul, David W., Ph.D. (University of Cincinnati), B.S. (Southwestern University), Associate Professor, 1980.

Sakon, Joshua, Ph.D. (University of Wisconsin-Madison), B.S. (Southern Oregon University), Professor, 1997.

Shi, Wei, Ph.D. (University of Alberta), M.S. (East China University of Science and Technology), B.S. (Shanghai Jiao Tong University), Assistant Professor, 2012.

Stenken, Julie A., Ph.D. (University of Kansas), B.S. (University of Akron), Professor, 2007.

Stites, Wesley, Ph.D. (Massachusetts Institute of Technology), M.A., B.A. (Johns Hopkins University), Professor, 1991.

Striegler, Susanne, Ph.D., M.S., B.S. (Ulm University, Germany), Professor, 2012.

Thallapuranam, Suresh, Ph.D. (Osmania University), Professor, 2003.

Tian, Ryan, Ph.D. (University of Connecticut), B.S. (Fudan University, Shanghai), Associate Professor, 2004.

Wang, Feng, Ph.D. (University of Pittsburgh), Ph.D. (Kutztown University of Pennsylvania), Associate Professor, 2012.

Wilkins, Charles L., Ph.D. (University of Oregon), B.S. (Chapman College), Distinguished Professor, 1998.

Xiao, Jie, Ph.D. (State University of New York-Binghamton), M.S., B.S. (Wuhan University), Associate Professor, 2016.

Zheng, Nan, Ph.D. (University of Michigan-Ann Arbor), M.S. (University of Rochester), B.S. (University of Science and Technology of China), Associate Professor, 2008.

Courses

CHEM 505V. Special Topics in Chemistry. 1-4 Hour.
(Formerly CHEM 405V.) Potential topics include: advanced spectroscopic methods, bioanalytical chemistry, bioinorganic chemistry, biogenic chemistry, biophysical chemistry, chemical sensors, drug discovery and design, nanomaterials, pharmaceutical chemistry, process analytical chemistry, and protein folding and design. Graduate degree credit will not be given for both CHEM 405V and CHEM 505V. Prerequisite: Instructor consent. (Typically offered: Irregular)

CHEM 5101. Introduction to Research. 1 Hour.
This eight week course introduces new graduate students to research opportunities and skills in chemistry and biochemistry. Meets 2 hours per week in the first half of the semester. Safety and ethics in research and scholarship are discussed. Students learn about research programs in the department to aid in choosing an advisor. (Typically offered: Fall)

CHEM 5123. Advanced Inorganic Chemistry. 3 Hours.
Reactions and properties of inorganic compounds from the standpoint of electronic structure and the periodic table. Emphasis on recent developments. Knowledge comparable to material in CHEM 3453 is recommended. (Typically offered: Fall)

CHEM 5143. Advanced Inorganic Chemistry II. 3 Hours.
Chemistry of metallic and non-metallic elements emphasizing molecular structure, bonding and the classification of reactions. Knowledge of inorganic chemistry comparable to material in CHEM 4123 and CHEM 5123 is recommended. (Typically offered: Irregular)

CHEM 5153. Structural Chemistry. 3 Hours.
Determination of molecular structure by diffraction, spectroscopic, and other techniques. Illustrative examples will be chosen from inorganic chemistry and biochemistry. (Typically offered: Irregular)

CHEM 5213. Instrumental Analysis. 3 Hours.
Provides students, especially those in the physical, agricultural, and biological sciences, with an understanding of the theory and practice of modern instrumental techniques of analysis. Lecture 3 hours per week. Knowledge comparable to material in CHEM 2263 and CHEM 3603 is recommended. (Typically offered: Spring)

CHEM 5223. Chemical Instrumentation. 3 Hours.
Use and application of operational amplifiers to chemical instrumentation; digital electronic microprocessor interfacing; software development and real-time data acquisition. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended. (Typically offered: Spring Odd Years)

CHEM 5233. Chemical Separations. 3 Hours.
Modern separation methods including liquid chromatography (adsorption, liquid-liquid partition, ion exchange, exclusion) and gas chromatography. Theory and instrumentation is discussed with emphasis on practical aspects of separation science. Prerequisite: CHEM 4213. (Typically offered: Fall Even Years)
CHEM 5243. Electrochemical Methods of Analysis. 3 Hours.
Topics will include diffusion, electron transfer kinetics, and reversible and irreversible electrode processes followed by a discussion of chronocoulometry, chronocoulometry, polarography, voltammetry, and chronopotentiometry. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended. (Typically offered: Spring Even Years)

CHEM 5253. Spectrochemical Methods of Analysis. 3 Hours.
Principles and methods of modern spectroscopic analysis. Optics and instrumentation necessary for spectroscopy is also discussed. Topics include atomic and molecular absorption and emission techniques in the ultraviolet, visible, and infrared spectral regions. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended. (Typically offered: Fall Odd Years)

CHEM 5263. Nuclear Chemistry. 3 Hours.
Nuclear structure and properties, natural and artificial radioactivity, radioactive decay processes, nuclear reaction and interactions of radiation with matter. Prerequisite: CHEM 3514. (Typically offered: Fall Odd Years)

CHEM 5273. Cosmochemistry. 3 Hours.
Laws of distribution of the chemical elements in nature, cosmic and terrestrial abundance of elements; origin and age of the earth, solar system, and the universe. Prerequisite: CHEM 3514. (Typically offered: Spring Odd Years)

CHEM 5283. Energy Conversion and Storage. 3 Hours.
Fundamental and applied concepts of energy storage and conversion with sustainability implications. Chemical reactions (kinetics, thermodynamics, mass transfer), emphasizing oxidation-reduction, electrochemical, and interfacial processes, and impact on performance of fuel and biofuel cells, batteries, supercapacitors, and photochemical conversion. (Typically offered: Fall Even Years)

CHEM 5383. Chemometrics. 3 Hours.
Chemometrics is the process of extracting relevant information from chemical data by mathematical and statistical tools. These tools allow for designing optimal experimental procedures, extracting important information from complex chemical systems, and better understanding of complex chemical systems. (Typically offered: Spring Even Years)

CHEM 5443. Physical Chemistry of Materials. 3 Hours.
Physical and chemical characteristics of materials and discussion of the science behind materials engineering and performance. Topics include theory, principles of characterization methods, modeling, and applications in the context of materials. Knowledge comparable to material in CHEM 3514 and CHEM 3504 or CHEM 3453 or CHEG 3713 or MEEG 2403 is recommended. (Typically offered: Irregular)

CHEM 5453. Quantum Chemistry I. 3 Hours.
Fundamental quantum theory: Hamiltonian formalism in classical mechanics, Schrodinger equation, operators, angular momentum, harmonic oscillator, barrier problems, rigid rotor, hydrogen atom, and interaction of matter with radiation. Knowledge of physical chemistry comparable to material in CHEM 3504 is recommended. (Typically offered: Spring Odd Years)

CHEM 5473. Chemical Kinetics. 3 Hours.
Theory and applications of the principles of kinetics to reactions between substances, both in the gaseous state and in solution. Knowledge of physical chemistry comparable to material in CHEM 3514 is recommended. (Typically offered: Spring)

CHEM 5513. Biochemical Evolution. 3 Hours.
Abiotic synthesis of biomolecules on Earth, the origin of cells, genetic information, origin of life on Earth and elsewhere, evolution and diversity, ecological niches, bacteria, archaea, eukaryotes, novel metabolic reshaping of the environment, life being reshaped by the environment, molecular data and evolution. Prerequisite: CHEM 5813. (Typically offered: Spring Even Years)

CHEM 5573. Statistical Thermodynamics. 3 Hours.
Covers fundamentals in thermodynamics, molecular dynamics, Monte Carlo, phase transitions, behavior of gases and liquids and basic concepts in chemical kinetics and physical kinetics. Knowledge comparable to physical chemistry materials in CHEM 3514 is recommended. (Typically offered: Irregular)

CHEM 5603. Physical Organic Chemistry. 3 Hours.
Introduction to the theoretical interpretation of reactivity, reaction mechanisms, and molecular structure of organic compounds. Application of theories of electronic structure; emphasis on recent developments. Knowledge of material comparable to CHEM 3613, CHEM 3613H, CHEM 3713 and CHEM 3514 is recommended. (Typically offered: Fall)

CHEM 5633. Organic Reactions. 3 Hours.
The more important types of organic reactions and their applications to various classes of compounds. Knowledge of organic chemistry comparable to material in CHEM 3603 is recommended. (Typically offered: Irregular)

CHEM 5723. Experimental Methods in Organic Chemistry. 3 Hours.
Introduction to the application of synthetic and spectroscopic methods in organic chemistry, including mass spectrometry, infrared spectroscopy, and nuclear magnetic resonance spectrometry. Lecture 3 hours per week. Knowledge comparable to material in CHEM 3613 is recommended. (Typically offered: Fall)

CHEM 5753. Methods of Organic Analysis. 3 Hours.
Interpretation of physical measurements of organic compounds in terms of molecular structure. Emphasis on spectroscopic methods (infrared, ultraviolet, magnet resonance, and mass spectra). Knowledge of organic chemistry comparable to material in CHEM 3603 is recommended. (Typically offered: Fall)

CHEM 5813. Biochemistry I. 3 Hours.
The first of a two-course series covering biochemistry for graduate students in biology, agriculture, and chemistry. Topics covered include protein structure and function, enzyme kinetics, enzyme mechanisms, and nucleic acid and carbohydrate structures. Knowledge of organic chemistry comparable to material in CHEM 3613 is recommended. (Typically offered: Fall)

CHEM 5843. Biochemistry II. 3 Hours.
A continuation of CHEM 5813 covering topics including biological membranes and bioenergetics, photosynthesis, lipids and lipid metabolism, nucleic acid and amino acid metabolism, and molecular biology. Knowledge of organic chemistry comparable to material in CHEM 3613 is recommended. Prerequisite: CHEM 5813. (Typically offered: Spring)

CHEM 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Chemistry graduate students enroll in this course as needed until all CUMES are passed and the student is officially a doctoral candidate. Prerequisite: Chemistry graduate student. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CHEM 6011. Chemistry Seminar. 1 Hour.
Weekly discussion of current chemical research. Departmental and divisional seminars in analytical chemistry, biochemistry, inorganic, organic, and physical chemistry are held weekly. Seminar credit does not count toward the minimum hourly requirements for any chemistry graduate degree. (Typically offered: Fall and Spring) May be repeated for degree credit.

CHEM 619V. Special Topics in Inorganic Chemistry. 1-3 Hour.
Topics which have been covered in the past include: technique and theory of x-ray diffraction, electronic structure of transition metal complexes, inorganic reaction mechanisms, and physical methods in inorganic chemistry. (Typically offered: Irregular) May be repeated for degree credit.
CHEM 6283. Mass Spectrometry. 3 Hours.
This course is devoted to the fundamental principles and applications of analytical mass spectrometry. Interactions of ions with magnetic and electric fields and the implications with respect to mass spectrometer design are considered, as are the various types of mass spectrometer sources. Representative applications of mass spectrometry in chemical analysis are also discussed. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

CHEM 629V. Special Topics in Analytical Chemistry. 1-3 Hour.
Topics that have been presented in the past include: electroanalytical techniques, kinetics of crystal growth, studies of electrode processes, lasers in chemical analysis, nucleosynthesis and isotopic properties of meteorites, thermoluminescence of geological materials, early solar system chemistry and analytical cosmochemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 649V. Special Topics in Physical Chemistry. 1-3 Hour.
Topics which have been covered in the past include advanced kinetics, solution chemistry, molecular spectra, nuclear magnetic resonance spectroscopy, and methods of theoretical chemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 6633. Chemistry of Organic Natural Products. 3 Hours.
Selected topics concerned with structure elucidation and synthesis of such compounds as alkaloids, antibiotics, bacterial metabolites, plant pigments, steroids, terpenoids, etc. Prerequisite: CHEM 5603 and CHEM 5633. (Typically offered: Irregular)

CHEM 6643. Organometallic Chemistry. 3 Hours.
Theories and principles of organometallic chemistry. Concepts include bonding, stereochemistry, structure and reactivity, stereochemical principles, conformational, steric and stereoelectronic effects. Transition metal catalysis of organic reactions will also be described. Knowledge of material comparable to CHEM 3713 and CHEM 3514 is recommended. (Typically offered: Irregular)

CHEM 6673. Organic Reaction Mechanisms. 3 Hours.
A detailed description of the fundamental reactions and mechanisms of organic chemistry. Prerequisite: CHEM 5633. (Typically offered: Irregular)

CHEM 669V. Special Topics in Organic Chemistry. 1-3 Hour.
Topics which have been presented in the past include heterogeneous catalysis, isotope effect studies of organic reaction mechanisms, organometallic chemistry, stereochemistry, photochemistry, and carbanion chemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 6823. Physical Biochemistry. 3 Hours.
Physical chemistry of proteins, nucleic acids, and biological membranes. Ultracentrifugation, absorption and fluorescent spectrophotometry, nuclear magnetic resonance spectroscopy, x-ray diffraction, and other techniques. Prerequisite: CHEM 5813. (Typically offered: Fall Even Years)

CHEM 6833. Enzymes. 3 Hours.
Isolation, characterization, and general chemical and biochemical properties of enzymes. Kinetics, mechanisms, and control of enzyme reactions. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Fall Odd Years)

CHEM 6873. Molecular Biochemistry. 3 Hours.
Nucleic acid chemistry in vitro and in vivo, synthesis of DNA and RNA, genetic diseases, cancer biochemistry and genetic engineering. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Spring Odd Years)

CHEM 6883. Bioenergetics and Biomembranes. 3 Hours.
Cellular energy metabolism, photosynthesis, membrane transport, properties of membrane proteins, and the application of thermodynamics to biological systems. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Spring Even Years)

CHEM 700V. Doctoral Dissertation. 1-12 Hour.
Doctoral Dissertation. For chemistry graduate students who have passed all CUMES and have officially been admitted to doctoral candidacy. Prerequisite: Chemistry graduate student. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Civil Engineering (CVEG)
W. Micah Hale
Department Head
4190 Bell Engineering Center

Civil Engineering website (http://cveg.uark.edu)

Degrees Conferred:
M.S.C.E. in Civil Engineering (CVEG)
M.S.En.E. in Environmental Engineering (ENEG) (See Environmental Engineering (p. 176))
Ph.D. in Engineering (CVEG) (See Engineering (p. 162))

Program Description: The Master of Science in Civil Engineering program is intended primarily for students possessing the Bachelor of Science in Civil Engineering degree. Students with degrees from other engineering disciplines may be admitted to the program but will be required to complete some undergraduate civil engineering courses as preparation for their graduate studies. The specific courses required will depend on the emphasis of their graduate studies. The objectives of the M.S.C.E. program are to provide a greater depth of understanding of civil engineering topics for the practice of engineering and to serve as preparation for doctoral studies. Students are allowed a great deal of flexibility in designing their course of study. Students desiring to develop a deeper understanding of one sub-discipline area may select courses solely concentrated in that area while those desiring a broader-based education may select courses from several sub-disciplines including courses from other disciplines.

Primary Areas of Faculty Research: The Department of Civil Engineering has ongoing research programs in the environmental/water resources, geotechnical, structural, and transportation areas. The following is a more detailed listing of topics currently being studied in each of these areas:

- Environmental/Water Resources Area: Water and wastewater treatment; decentralized collection and treatment systems; soil and groundwater remediation; surface and ground water quality; storm water pollution prevention; environmental and hydrologic modeling; water quality studies.
- Geotechnical Area: Aggregates and base materials; geosynthetic reinforcement; embankment and slope stability; field instrumentation and measurement of soil properties; soil and groundwater remediation using geosynthetics; GIS application to geotechnical engineering; foundation design.
- Structural Area: High performance concrete; structural materials; bridge deck rehabilitation; computational mechanics; computational wind engineering and tornado modeling; structural earthquake analysis and modeling; structural steel design and analysis.
- Transportation Area: Facility design; roadway geometrics; traffic operations and safety; pavement design and rehabilitation; asphalt concrete mixture design; construction materials characterization; construction quality control; geosynthetic reinforced flexible pavements; transportation management systems; high-speed...
pavement condition data acquisition; and transportation and land development.

In addition to these core areas, the Department of Civil Engineering is also actively pursuing research in the areas of alternative energy sources, infrastructure security, nanotechnology, and sustainability.

M.S.C.E. in Civil Engineering

Requirements for the Master of Science in Civil Engineering Degree:
Minimum 30 semester hours of graduate-level credit for thesis option; or 30 semester hours of graduate-level non thesis or research credit for course work only option.

1. Candidates for the degree who present a thesis are required to complete a minimum of 24 semester hours of course work and a minimum of six semester hours of thesis.
2. Candidates for the degree who do not present a thesis are required to complete a minimum of 30 semester hours of graduate-level course work.
3. Candidates for the degree must present a cumulative grade point average of 3.00 on all graduate courses. The minimum acceptable grade for any course is "C."
4. Upon admission to the Graduate School and acceptance in a program of study, candidates pursuing a thesis-based program will be assigned to a major adviser, who in consultation with the department head, will select a graduate committee. With guidance from the committee, the candidate will develop a plan of study and a research project to be completed by the candidate. The committee will serve as the examination committee for the final oral and/or written examination and for the thesis. Candidates pursuing a coursework-based program will be assigned to a major adviser, who will assist the candidate in developing a plan of study; the major adviser will coordinate the final and/or written examination.
5. All graduate students enrolled in the M.S.C.E. program in the Department of Civil Engineering must successfully complete one semester of CVEG 5000 Graduate Seminar in Civil Engineering.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Ph.D. in Civil Engineering

Requirements for the Doctor of Philosophy (Ph.D.) degree with emphasis in Civil Engineering: Minimum 72 semester hours of graduate-level credit beyond the baccalaureate degree; minimum 42 semester hours of graduate-level credit beyond the master's degree.

1. Candidates for the degree are required to complete a minimum of 36 semester hours of graduate-level course work and a minimum of 18 semester hours of dissertation. Graduate-level course work comprising an earned master’s degree may be included in the minimum course work credit hours for the Ph.D. degree.
2. Candidates for the degree must present a cumulative grade point average of 3.00 on all graduate courses. The minimum acceptable grade for any course is "C."
3. All graduate students enrolled in the Ph.D. program in the Department of Civil Engineering must successfully complete two semesters of CVEG 5000 Graduate Seminar in Civil Engineering.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Graduate Faculty

Bernhardt-Barry, Michelle, Ph.D., M.S.C.E., B.S.C.E. (Texas A&M University), Assistant Professor, 2013.
Braham, Andrew F., Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Wisconsin-Madison), Associate Professor, 2010.
Coffman, Rick, Ph.D. (University of Missouri-Columbia), M.S. (University of Texas at Austin), B.S. (University of Wyoming), Associate Professor, 2009.
Dennis, Norman D., Ph.D. (University of Texas at Austin), M.B.A. (Boston University), M.S.C.E., B.S.C.E. (Missouri University of Science and Technology), University Professor, 1996.
Edwards, Findlay, Ph.D. (New Mexico State University), M.S. (University of New Mexico), M.S.C.E. (New Mexico State University), Associate Professor, 1999.
Fairey, Julian, Ph.D., M.S.C.E. (University of Texas at Austin), B.S.C.E. (University of Alberta, Canada), Associate Professor, 2008.
Fernstrom, Eric, Ph.D. (University of Arkansas), Instructor, 2014.
Gatiss, J. L., Ph.D. (Texas A&M University), M.S.C.E. (University of Texas Arlington), B.S.C.E. (University of Arkansas), Professor, 1993.
Hale, Micah, Ph.D., M.S.C.E., B.S.C.E. (University of Oklahoma), Professor, 2002.
Hall, Kevin D., Ph.D. (University of Illinois-Urbana-Champaign), M.S.C.E., B.S.C.E. (University of Arkansas), Professor, 1993.
Hernandez, Sarah, Ph.D., M.S. (University of California, Irvine), B.S. (University of Florida), Assistant Professor, 2015.
Heymsfield, Ernie, Ph.D. (City University of New York), M.S.C.E. (Polytechnic University), Associate Professor, 2001.
Selvam, R. Panneer, Ph.D. (Texas Tech University), M.S.C.E. (South Dakota School of Mines and Technology), M.E., B.E. (University of Madras, India), University Professor, 1986.
Williams, Stacy Goad, Ph.D., M.S.C.E., B.S.C.E. (University of Arkansas), Associate Professor, 1997.
Williams, Rodney D., Ph.D., M.S., B.S.C.E. (University of Arkansas), Assistant Professor, 1998.
Wood, Clinton M., Ph.D. (University of Texas at Austin), M.S.C.E., B.S.C.E. (University of Arkansas), Assistant Professor, 2013.
Zhang, Wen, Ph.D. (Purdue University), M.S. (University of Kansas), Assistant Professor, 2011.

Courses

CVEG 5000. Graduate Seminar in Civil Engineering. 0 Hours.
A weekly seminar devoted to civil engineering research topics. Appropriate grade to be "S". (Typically offered: Fall and Spring)

CVEG 5103. Geosynthetic Applications in Civil Engineering. 3 Hours.
CVEG 5103 - Geosynthetic Applications in Civil Engineering: The functional properties of various geosynthetic materials are defined as they relate to; reinforcement, separation, filtration, and drainage applications. Design procedures are developed for the use of geosynthetics in transportation, environmental and geotechnical applications. Prerequisite: CVEG 3132 and CVEG 3131L or equivalent. (Typically offered: Irregular)

CVEG 5113. Soil Dynamics. 3 Hours.
This course covers propagation of stress waves in elastic and inelastic materials, dynamic loading of soils, and stiffness and damping properties of soils. Use of field and laboratory techniques to determine shear wave velocity of soils. Also includes applications of dynamic soil properties in site stiffness characterization, geotechnical earthquake engineering, evaluation of ground improvement, and design of machine foundations. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)
CVEG 5123. Measurement of Soil Properties. 3 Hours.
Consideration of basic principles involved in measuring properties of soils. Detailed analysis of standard and specialized soil testing procedures and equipment. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5133. Geotechnical Site Characterization. 3 Hours.
One of primary tasks of geotechnical engineers is to perform in-situ site characterization for engineering design of foundations, retaining structures, roads, bridges and other infrastructure. This course will focus on in-situ investigations performed for the purpose of collecting detailed site characterization data for direct and/or indirect use in geotechnical design. Specifically, we will study various static (e.g., SPT, CPT, VST, DMT, PMT) and dynamic (e.g., CHT, DHT, SW, GPR) in-situ tests used to obtain estimates of stratigraphy, density, strength, stress history, modulus, and permeability of geotechnical materials. We will predominantly focus on site characterization of soil sites, but will mention rock testing and design methods when appropriate. Prerequisite: CVEG 4143 or the equivalent. (Typically offered: Irregular)

CVEG 5143. Transportation Soils Engineering. 3 Hours.
Advanced study of the properties of surficial soils; soil classification systems; pedology; soil occurrence and variability; subgrade evaluation procedures; repeated load behavior of soils; soil compaction and field control; soil stabilization; soil trafficability and subgrade stability for transportation facilities. Prerequisite: CVEG 3132. (Typically offered: Irregular)

CVEG 5153. Earth Retaining Structures. 3 Hours.
This course will focus on the analysis and design of earth retaining structures. Specifically, we will discuss soil and rock property design parameter selection, lateral earth pressures for wall system design, and load and resistance factor design (LRFD) for retaining walls. Wall types discussed include gravity and semi-gravity walls, modular gravity walls, MSE walls, non-gravity cantilever walls and anchored walls, and in-situ reinforced walls. Information on wall system feasibility and selection, construction materials and methods, cost information, and design and performance information will be discussed. Prerequisite: CVEG 4143 or equivalent. (Typically offered: Irregular)

CVEG 5163. Seepage and Consolidation. 3 Hours.
Investigation of the flow of water through soils and the time rate of compression of soils. Characterization of the hydraulic conductivity of soils in the field, seepage through earth dams, excavation cut-off walls, and other seepage control systems. Analytical and experimental investigations of soil volume change under hydraulic and mechanical loading. Design of earth and rock dams, well pumping, and vertical and radial consolidation in embankments. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5173. Advanced Foundations. 3 Hours.
Study of soil-supported structures. Topics include drilled piers, slope stability, pile groups, negative skin friction, foundation design from the standard penetration test and Dutch cone, and other specialized foundation design topics. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5183. Geo-Environmental Engineering. 3 Hours.
Study of the geotechnical aspects of waste containment systems and contaminant remediation applications. Analysis and measurement of flow of water and contaminants through saturated and unsaturated soils, clay mineralogy and soil-chemical compatibility, and mechanical and hydraulic behavior of geomembranes, geotextiles, and geosynthetic clay liners. Design and construction aspects of compacted clay and composite landfill liners, drainage systems, and landfill covers. Prerequisite: CVEG 3132 or graduate standing. (Typically offered: Irregular)

CVEG 5193. Geotechnical Earthquake Engineering. 3 Hours.
This course covers stress wave propagation in soil and rock; influence of soil conditions on seismic ground motion characteristics; evaluation of site response using wave propagation techniques; liquefaction of soils; seismic response of earth structures and slopes. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5203. Water Chemistry. 3 Hours.
This course provides a basis for applying principles of physical chemistry to understanding the composition of natural waters and to the engineering of water and wastewater treatment processes. Topics covered include chemical equilibrium (algebraic, graphical, and computer-aided solution techniques); acid-base equilibria and buffering; oxidation and reduction reactions; and solid precipitation and dissolution. Prerequisite: Graduate standing or CVEG 3243 and instructor approval. (Typically offered: Spring)

CVEG 5213. Advanced Water Treatment Design. 3 Hours.
Design of industrial and municipal water treatment plants. Discussion of raw and treated water requirements for several uses. Prerequisite: CVEG 3243. (Typically offered: Spring)

CVEG 5224. Advanced Wastewater Treatment Design. 4 Hours.
Application of advanced techniques for the analysis of wastewater treatment facilities. Physical, chemical and biological processes for removing suspended solids, organics, nitrogen, and phosphorus. Laboratory treatability studies will be used to develop design relationships. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 4243 or graduate standing. (Typically offered: Fall)

CVEG 5233. Microbiology for Environmental Engineers. 3 Hours.
Fundamental and applied aspects of microbiology and biochemistry relating to water quality control, wastewater treatment, and stream pollution. Prerequisite: CVEG 3243. (Typically offered: Irregular)

CVEG 5243. Groundwater Hydrology. 3 Hours.
Detailed analysis of groundwater movement, well hydraulics, groundwater pollution and artificial recharge. Surface and subsurface investigations of groundwater and groundwater management, saline intrusion and groundwater modeling will be addressed. Prerequisite: CVEG 3223. (Typically offered: Irregular)

CVEG 5253. Physical-Chemical Processes for Water and Wastewater Treatment. 3 Hours.
This course provides a fundamental understanding of physical and chemical processes used in the treatment of drinking water and wastewater. Principals of mass balance are applied to understand the impact of reactor hydraulics (ideal and non-ideal flow) and reaction kinetics on process performance and identify important process variables. Chemical processes covered include disinfection, gas transfer, adsorption, and ion exchange; physical processes covered include coagulation, flocculation, sedimentation, filtration, and membranes. Prerequisite: Graduate standing and instructor consent. (Typically offered: Fall Odd Years)

CVEG 5273. Open Channel Flow. 3 Hours.
Open Channel Flow includes advanced open channel hydraulics, flow measurement techniques, a hydrology review, culvert and storm drainage facility design, natural channel classification (fluvial geomorphology) and rehabilitation, computer methods and environmental issues. Prerequisite: CVEG 3213 and CVEG 3223. (Typically offered: Irregular)

CVEG 5293. Water Reuse. 3 Hours.
CVEG 5293 is a graduate-level course that discusses topics related to water reclamation and reuse. Topics include past and current practices of water reuse, health and environmental issues related to water reuse, water technologies and systems for water reuse, and water reuse applications. Prerequisite: CVEG 3243 or equivalent course. (Typically offered: Spring Even Years)
CVEG 5303. Theory of Stability. 3 Hours.
Study of structural members subjected to compression. Analysis of compression members considering support conditions and within frame configurations. Analysis of beams considering lateral torsional bucking. AISC Steel Manual strength equations related to columns and beams are derived and discussed. Prerequisite: CVEG 4303. (Typically offered: Irregular)

CVEG 5313. Matrix Analysis of Structures. 3 Hours.
Energy and digital computer techniques of structural analysis as applied to conventional forms, space trusses, and frames. Prerequisite: CVEG 3303 (formerly CVEG 3304) or graduate standing. (Typically offered: Irregular)

CVEG 5323. Structural Dynamics. 3 Hours.
Dynamics response of single and multidegree of freedom systems. Modal analysis. Response spectra. Computer programs for dynamic analysis. Design considerations for structures subjected to time-varying forces including earthquake, wind, and blast loads. Prerequisite: CVEG 3303. (Typically offered: Irregular)

CVEG 5333. Concrete Materials. 3 Hours.
Topics include portland cement production, supplementary cementing materials, fresh and hardened concrete properties, mixture proportioning, chemical admixtures, curing, and specialty concretes. Corequisite: Lab component. Prerequisite: CVEG 4303. (Typically offered: Irregular)

CVEG 5343. Highway Bridges. 3 Hours.
Economics of spans, current design and construction specifications, comparative designs. Possible refinements in design techniques and improved utilization of materials. Prerequisite: CVEG 4313 and CVEG 4303. (Typically offered: Irregular)

CVEG 5353. Prestressed Concrete Design. 3 Hours.
Analysis and design of prestressed concrete beams. Topics include flexural analysis, prestress bond, draping and debonding, allowable stresses, shear analysis and design, camber prediction, and prestress losses. Prerequisite: CVEG 4303. (Typically offered: Irregular)

CVEG 5363. Advanced Topics in Reinforced Concrete. 3 Hours.
Analysis and design of reinforced concrete members. Topics include slender columns, one-way and two-way slab design, strut and tie design, and torsion. Prerequisite: CVEG 4303 or graduate standing. (Typically offered: Irregular)

CVEG 5373. Advanced Structural Steel Design. 3 Hours.
Design of structural steel components using the Load and Resistance Factor Design method. Intensive treatment of simple and eccentric connections, composite construction, plate girders, and plastic analysis and design. Prerequisite: CVEG 4313 or graduate standing. (Typically offered: Irregular)

CVEG 5383. Finite Element Methods in Civil Engineering. 3 Hours.
An understanding of the fundamentals of the finite element method and its application to structural configurations too complicated to be analyzed without computer applications. Application to other areas of civil engineering analysis and design such as soil mechanics, foundations, fluid flow, and flow through porous media. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5393. Advanced Strength of Materials. 3 Hours.
The course will continue from the basic material addressed in the undergraduate course and investigate in more detail stress analysis as it pertains to civil engineering type problems. Topics addressed in the course will include stress analysis (two-dimensional), constitutive relationships, solutions for two-dimensional problems, flexure, torsion, beams on elastic foundations, and energy methods. Prerequisite: CVEG 2015 (Formerly CVEG 2014) or CVEG 2023 or MEEG 3013. (Typically offered: Irregular)

CVEG 5403. Advanced Reinforced Concrete II. 3 Hours.
Design of circular and rectangular reinforced concrete tanks for fluid and granular loads. Prerequisite: CVEG 4303. (Typically offered: Irregular)

CVEG 5413. Transportation and Land Development. 3 Hours.
Study of interaction between land development and the transportation network. Application of planning, design, and operational techniques to manage land development impacts upon the transportation system, and to integrate land layout with transportation network layout. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5423. Structural Design of Pavement Systems. 3 Hours.
An introduction to the structural design of pavement systems including: survey of current design procedures; study of rigid pavement jointing and reinforcement practices; examination of the behavioral characteristics of pavement materials and of rigid and flexible pavement systems; introduction to structural analysis theories and to pavement management concepts. Prerequisite: CVEG 4433. (Typically offered: Irregular)

CVEG 5433. Traffic Engineering. 3 Hours.
A study of both the underlying theory and the use of traffic control devices (signs, traffic signals, pavement markings), and relationships to improved traffic flow and safety, driver and vehicle characteristics, geometric design, and societal concerns. Also includes methods to collect, analyze, and use traffic data. Prerequisite: CVEG 3413 or graduate standing. (Typically offered: Irregular)

CVEG 5463. Transportation Modeling. 3 Hours.
The use of mathematical techniques and/or computer software to model significant transportation system attributes. May compare model results with actual measured traffic attributes, using existing data sources and/or collecting and analyzing field data. Pre- or Corequisite: Lab component. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5473. Transportation System Characteristics. 3 Hours.
Introduction to traffic flow theory, including traffic stream interactions and capacity. Applications for planning, design, operations. Prerequisite: CVEG 3413 or graduate standing. (Typically offered: Irregular)

CVEG 5483. Transportation Management Systems. 3 Hours.
Six transportation management systems are explored: pavement, bridge, intermodal, public transportation, safety, and congestion. System approaches are presented. Techniques are introduced on how to optimally allocate resources. Pavement and bridge structure basics are discussed and their performance parameters are presented. Case studies are used to illustrate the interfaces among various modes of transportation. Safety and congestion problems in transportation are addressed. (Typically offered: Irregular)

CVEG 562V. Research. 1-6 Hour.
Fundamental and applied research. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

CVEG 563V. Special Problems. 1-6 Hour.
Special problems in CVEG. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 5863. Fundamentals of Sustainability in Civil Engineering. 3 Hours.
Qualify and quantify the economic, environmental, societal and engineering drivers behind sustainability in Civil Engineering. Justification of the feasibility and benefits of sustainability in environmental, geotechnical, structural and transportation through verbal and written communications. Students cannot receive credit for both CVEG 4863 and CVEG 5863. Prerequisite: Graduate standing or instructor consent. (Typically offered: Irregular)
CVEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.
The course will cover the concepts of linear-elastic, elastic-plastic and time-
dependent Fracture Mechanics as applied to fracture in a variety of materials,
structures, and operating conditions. The examples will include fracture in large
components such as aircraft, bridges and pressure vessels and also in bones
and in soft materials and human tissue. Prerequisite: Graduate standing in Civil,
Mechanical or Biomedical Engineering or consent of the instructor. (Typically
offered: Fall)
This course is cross-listed with BMEG 5953, MEEG 5953.
CVEG 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and
Summer) May be repeated for degree credit.
CVEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and
Summer) May be repeated for degree credit.

Clinton School of Public Service Website (http://www.clintonschool.uasys.edu/)

Degree Conferred:
Master of Public Service (M.P.S.)
The Master of Public Service degree is offered at the University of
Arkansas Clinton School in Little Rock, Arkansas, in collaboration with
the University of Arkansas, the University of Arkansas at Little Rock, and
the University of Arkansas for Medical Sciences. For a description of the
program, admission and degree requirements, please see the Clinton

Clinton School courses will be interactive, making extensive use of
problem-based formats and employing instructional technology as
needed. The classes will also have access to speakers and public leaders
who visit the Clinton Presidential Library for special events.

Bavon, Al, Ph.D., M.S. (Florida State University), Professor, 2008.
DiPippa, Nikolai Shiro, B.S. (Hendrix College), Instructor, 2006.
Fitzpatrick, Ellen Therese, Ph.D. (Michigan State University), Professor, 2012.
Hoffpaur, Susan Annette, Ph.D. (University of Michigan-Ann Arbor),
Distinguished Professor, 2011.
Standerfer, Christina Corrado, Ph.D. (University of Colorado-Boulder),
M.A., B.A. (University of Arkansas at Little Rock), Professor, 2007.

Williams, Charlotte Lewellen, Ph.D., M.S. (University of Arkansas for
Medical Sciences), B.S. (Howard University), Professor, 2007.

Courses

UACS 501V. Special Topics in Public Service. 1-3 Hour.
Designed to cover specialized topics not usually presented in depth in regular
courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree
credit.
UACS 502V. Advanced Problems in Public Service. 1-3 Hour.
Provides an opportunity for individual study. (Typically offered: Irregular)
UACS 5101. Ethical and Legal Dimensions of Public Service. 1 Hour.
This course will provide an overview of the primary ethical principles and legal
concepts that guide difficult decisions in the public realm. Traditional academic study
of ethical and legal theory will be combined with practical approaches to problem
solving. Students will explore issues of economic, political, and social justice through
case studies of current issues. Students will construct cases that are relevant to their
own fields and present them to the class, identifying ethical and legal constraints on
decision-making and implementation. (Typically offered: Irregular)
UACS 5303. Communication Processes and Conflict Transformation. 3 Hours.
The course is designed to increase the student's personal communication
effectiveness as a leader and public servant, and to enable students to understand
the application of communication processes in the public arena. (Typically offered:
Irregular)
UACS 5313. Dynamics of Social Change. 3 Hours.
The course deals with the elements of social change in a democratic society, and
how these intersect with and are affected by economic and political forces. A critical
examination of the various justifications for promoting or discouraging social change
will be undertaken, and the inherent strengths and weaknesses of these various
approaches will be analyzed. Real-world cases will be used, and a culminating
exercise will be a strategic assessment of the Lower Mississippi Delta. (Typically
offered: Irregular)
UACS 5323. Leadership in Public Service. 3 Hours.
This course is designed to increase students' knowledge of leadership concepts and
best practices, provide opportunities and experiences that improve leadership skills
and techniques, and enhance capabilities in organizational management. Students
will assess their leadership strengths and weaknesses, as well as develop an action
plan to match their career goals. They will improve knowledge and skills in building
diverse teams, in initiating/managing change, in addressing uncertainty, and in
leading non-governmental organizations. At the end of the course, students should
be able to design leadership strategies to successfully address a spectrum of issues
in public service and in promoting the community good. (Typically offered: Irregular)
UACS 5333. Analysis for Decision Making In Public Service. 3 Hours.
This course is intended to provide students with analytical tools that enhance their
skills in diagnosing problems and formulating solutions within organizations and
communities. Instruction will focus on evaluating community assets as a balance
of ethical and legal theory will be combined with practical approaches to problem
solving. Students will explore issues of economic, political, and social justice through
case studies of current issues. Students will construct cases that are relevant to their
own fields and present them to the class, identifying ethical and legal constraints on
decision-making and implementation. (Typically offered: Irregular)

Degree Conferred:
M.A. (COMM)

Program Description: Communication with specific emphasis in civic engagement. We define civic engagement broadly, but seek to study and use communication to create more inclusive organizations, more resilient communities, and more informed and engaged citizens.

Primary Areas of Faculty Research: Film; media; rhetoric; organizational, environmental, health, interpersonal, intercultural and political issues using interpretive, quantitative, rhetorical and critical lenses.

M.A. in Communication

Prerequisites to Degree Program: A student entering graduate studies should have a minimum of 24 semester hours in undergraduate credit within the area of communication or closely related studies. Prospective students must supply: 1) three letters of recommendation (preferably from professors who can comment on their ability to do graduate-level work) and 2) their GRE examination scores through the Graduate School application portal. They must send 3) an essay-length writing sample (preferably an essay or research paper written for a class) and 4) a statement of their goals for graduate study in Communication at the University of Arkansas directly to the Communication Department’s Graduate Coordinator.

Requirements for a Master of Arts Degree: A minimum of 30 semester hours in graduate-level courses plus the capstone course (3 hours) or 27 hours of course work and a thesis (6 hours). The following departmental requirements must be met by students pursuing the M.A. in Communication:

1. Completion of the COMM 5163 Introduction to Communication Paradigms during their first semester of resident graduate study in which it is offered.
2. Two graduate courses in communication research methods taken in their first year of graduate study and selected from the following: COMM 5173 Qualitative Methods in Communication, COMM 5123 Quantitative Research Methods in Communication, or COMM 5183 Interpretive Research Methods in Communication.
3. Either three hours of capstone project credit (COMM 5923 Capstone Course in Communication) or six hours of thesis credit (COMM 600V Master’s Thesis). Each student must complete and successfully defend either a capstone project or an M.A. thesis.
4. In addition to the Paradigms class, the two required methods courses, and the selected exit option (i.e., thesis or capstone course), at least four three-hour 5000-level courses must be completed in the Department of Communication. At least three of these courses should be in one focal area of civic engagement.
5. The remaining hours of graduate credit must be selected from the following options:
   a. Additional 5000-level departmental seminars;
   b. Up to six hours of graduate-level courses outside the department that directly relate to the student’s plan of study;
   c. Three hours of internship credit in COMM 5913 Internship in Communication;
   d. Up to six hours of credit in COMM 590V Special Problems.

Students should also be aware of Graduate School requirements with regard to master's degrees (http://catalog.uark.edu/graduatemaster/degreerequirements/#mastersdegreestext).

Graduate Faculty
Allen, Myria, Ph.D., M.A., B.A. (University of Kentucky), Professor, 1993.
Aloia, Lindsey S., Ph.D. (Pennsylvania State University), M.A. (University of Delaware), B.A. (College of New Jersey), Assistant Professor, 2017.
Amason, Trish, Ph.D. (Purdue University), M.A. (University of Kentucky), B.S.E. (University of Arkansas), Associate Professor, 1994.
Brady, Robert M., Ph.D. (University of Michigan-Ann Arbor), M.A. (Western Kentucky University), B.S. (Murray State University), Associate Professor, 1979.
Corrigan, Lisa, Ph.D., M.A. (University of Maryland-College Park), B.A. (University of Pittsburgh), Associate Professor, 2007.
Frentz, Tom, Ph.D., M.S., B.S. (University of Wisconsin-Madison), Professor, 1985.
Hollingsworth, Cathy A., M.A. (University of Arkansas), Instructor, 2011.
Janicke, Sophie H., Ph.D. (Florida State University), M.S. (Eberhard Karls University), B.A. (Friedrich Willhelms University), Visiting Assistant Professor, 2014.
Neville-Shepard, Meredith D., Ph.D. (University of Kansas), Clinical Assistant Professor, 2016.
Neville-Shepard, Ryan M., Ph.D. (University of Kansas), Assistant Professor, 2016.
O’Loughlin, J. Brian, Ph.D. (University of Alabama), M.A. (Syracuse University), B.S. (Boston College), Visiting Assistant Professor, 2016.
Oommen, Thomas, Ph.D. (Tufts University), Visiting Assistant Professor, 2015.
Rosteck, Thomas, Ph.D. (University of Wisconsin-Madison), M.A. (Brown University), A.B. (Washington University), Associate Professor, 1990.
Scheide, Frank Milo, Ph.D. (University of Wisconsin-Madison), M.A. (New York University), B.S. (University of Wisconsin-River Falls), Professor, 1977.
Schulte, Stephanie Ricker, Ph.D., M.A. (George Washington University), B.A. (University of Arkansas), Associate Professor, 2008.
Spialek, Matthew L., Ph.D. (University of Missouri), Assistant Professor, 2017.
Warren, Ron, Ph.D. (Indiana University), M.A. (Colorado State University), B.A. (Michigan State University), Associate Professor, 1997.
Wicks, Robert Howard, Ph.D. (Michigan State University), M.A. (University of Missouri-Columbia), B.A. (American University), Professor, 1994.

Courses
COMM 5111. Colloquium in Communication Research. 1 Hour.
Presentation, evaluation, and discussion of research proposals or on-going research projects. Graduate students are required to register for this course each semester of residence. (Typically offered: Fall and Spring) May be repeated for degree credit.
COMM 5113. Historical and Legal Methods in Communication. 3 Hours.
Emphasizes the assumptions and procedures of historical and legal research methods in communication. (Typically offered: Fall) May be repeated for up to 3 hours of degree credit.
COMM 5123. Quantitative Research Methods in Communication. 3 Hours. Emphasizes the assumptions and procedures of social scientific research methods in communication. (Typically offered: Fall)

COMM 5133. Media Processes & Effects. 3 Hours. Introduction to scholarly research and theory in media processes and effects. Particular attention will be devoted to the impact of media messages on individuals and societies. Emphasis will be placed on the construction and development of theory. (Typically offered: Fall)

COMM 5143. Ethnographic Methods in Communication. 3 Hours. This class focuses upon the fieldwork procedures and narrative writing strategies that comprise the methods of ethnographic research in communication. Students conduct fieldwork requiring in-depth interpersonal contact with members of a group or culture, and practice narrative writing skills. (Typically offered: Fall)

COMM 5163. Introduction to Communication Paradigms. 3 Hours. Introduces the variety of modes of inquiry used in communication. Reviews the field's history and boundaries. Explores contemporary communication research. (Typically offered: Fall)

COMM 5173. Qualitative Methods in Communication. 3 Hours. Emphasizes the assumptions and procedures of qualitative research methods in the examination of human communication behavior. (Typically offered: Spring)

COMM 5183. Interpretive Research Methods in Communication. 3 Hours. Examines various perspectives used to analyze and critique various texts (e.g., media programming, speeches). (Typically offered: Spring)

COMM 5193. Seminar in Communication. 3 Hours. Research, discussion, and papers focus on one of a variety of communication topics including symbolic processes in communication, philosophy of rhetoric, communication education, criticism of contemporary communication, interpersonal communication, organizational communication, and contemporary applications of rhetoric. Maximum credit is 9 semester hours. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

COMM 5303. Seminar in Rhetorical Theory. 3 Hours. Humanistic theories of communication and rhetoric with emphasis upon the development of rhetorical theory in the classical world and upon contributions of contemporary theorists. Prerequisite: Graduate standing. (Typically offered: Fall Even Years)

COMM 5323. Seminar in Persuasion. 3 Hours. Focus is on comparing theoretical accounts of persuasion and research evidence concerning the effects of various factors on persuasion. (Typically offered: Fall)

COMM 5333. Interpersonal Communication Theory. 3 Hours. Survey of the theoretical orientations in interpersonal communication with primary focus on conceptual, philosophical and research issues. (Typically offered: Fall Even Years)

COMM 5343. Interpersonal Communication. 3 Hours. Theory and research concerning the exchange of information and the mutual influencing of behavior among people. Prerequisite: Graduate standing. (Typically offered: Fall)

COMM 5353. Rhetorical Criticism. 3 Hours. A seminar in rhetorical criticism. A study of the development of standards of rhetorical appraisal from the foundations of the art of speaking to the modern period; examination of contemporary approaches to rhetorical appraisal and practice in critical analysis of contemporary address. (Typically offered: Irregular)

COMM 5373. Content Analysis. 3 Hours. Techniques for observing and analyzing the overt communication behavior of selected communicators. Prerequisite: Graduate standing. (Typically offered: Irregular)

COMM 5383. Seminar in Political Communication. 3 Hours. Research seminar focusing on selected topics such as candidate imagery, diffusion of political information, or political symbolism. Prerequisite: Graduate standing. (Typically offered: Irregular) This course is cross-listed with PLSC 5383.

COMM 5403. Organizational Communication Theory. 3 Hours. A seminar on the historical development of theory and research into communication processes occurring within an organizational setting. Lecture, discussion, oral and written reports. Prerequisite: Graduate standing. (Typically offered: Irregular)

COMM 5413. Organizational Communication Research. 3 Hours. A seminar on conducting applied research within an organizational setting. Prerequisite: COMM 5403 and graduate standing. (Typically offered: Summer)

COMM 5423. Seminar in Mass Media Cognition. 3 Hours. Seminar exploring how people learn from written, aural and visual mass media messages. Topics to include attention, memory, comprehension, emotional response, arousal, unconscious processing, picture perception and person perception. Seminar will be concerned with most popular media (e.g., television radio, newspaper, and film), and with several content genres (e.g., entertainment, news, advertising). (Typically offered: Spring Even Years)

COMM 5433. Marital Communication. 3 Hours. An exploration of the major theories and lines of research that examine marital communication in contemporary American life. (Typically offered: Irregular)

COMM 5443. Issues of Race and Gender in Interpersonal Communication. 3 Hours. An exploration of the major theories and lines of research that examine how race and gender influence interpersonal communication in everyday life in America. (Typically offered: Spring Odd Years)

COMM 5453. Myth and Communication Criticism. 3 Hours. Seminar in major theories of mythology, including archetypal and ideological perspectives, and their applications to the criticism of public communicative events. Practice in written critical analysis. Prerequisite: Graduate standing. (Typically offered: Irregular)

COMM 5463. Descriptive Linguistics. 3 Hours. A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Fall) This course is cross-listed with WLLC 5463, ANTH 5473, ENGL 5463.

COMM 5473. Treatment of Native Americans in Film. 3 Hours. Compares the treatment of Native Americans in film with how representatives of this group identify themselves. Will also focus on motion pictures relating to Native Americans produced by indigenous filmmakers. (Typically offered: Irregular)

COMM 5503. Communication and Cultural Studies. 3 Hours. Examinations of the role of communication in modern culture. Emphasis is upon the production and circulation of meanings with society, and special attention is given to the role of popular and mass media in this process. Prerequisite: Graduate standing. (Typically offered: Fall)

COMM 5513. Sustainability and Communication. 3 Hours. Communication's role in creating and conveying an organization's environmental sustainability philosophy and initiatives. Discusses internal communication when establishing and communicating sustainability goals and initiatives. Covers communicating sustainability to external groups through websites, sustainability reports, and advocacy initiatives. For profit, nonprofit, governmental, NGOs, and/or advocacy organizations discussed. (Typically offered: Fall Even Years)

COMM 5533. Family Communication. 3 Hours. An exploration of the major theories and lines of research that examine family communication in contemporary American life. (Typically offered: Fall Even Years)
COMM 599V. Seminar in Film Studies. 1-3 Hour.
Research, discussion; papers on a variety of film genres and areas including the
new American film, the science-fiction film, directors, film comedy, the experimental
film, criticism, and the film musical. (Typically offered: Irregular) May be repeated for
up to 6 hours of degree credit.
This course is cross-listed with ENGL 599V.

COMM 5763. Health Communication. 3 Hours.
Examines the difficulties of effective communication between health care providers
and recipients including the following: issues of social support, conveying bad
news, cultural issues, and identifying relevant communication skills associated with
effective health care provision. Explores medical education models for training in
effective patient-provider communication. (Typically offered: Irregular)

COMM 5823. Political Communication. 3 Hours.
Covers contemporary political communication theory and applies them to understand
modern political campaigns. Topics covered include the rhetoric of politics, political
advertising, the role of the media and public opinion, the impact of new technology,
campaign speech genres, political debates, and the role of social identity in
presidential campaigns. (Typically offered: Irregular)

COMM 5833. The Rhetoric of the Modern American Presidency. 3 Hours.
Study contemporary presidents’ reliance on public persuasion, especially in efforts to
bypass Congress and accomplish complicated political goals. Explore the origins of
the concept of the “rhetorical presidency,” specifically how it developed and changed
the nature of the executive branch of government. Examine major genres of modern
presidential rhetoric illustrating that trend. (Typically offered: Irregular)

COMM 5843. Legal Communication. 3 Hours.
Examines communication processes in the legal environment and focuses on
communication skills and behaviors among judges, attorneys, litigants, and jurors.
Particular attention will be given to verbal strategies and nonverbal messages
related to interviews, negotiation, mediation, and litigation and to the rhetorical
functions of legal pleadings and judicial opinions. (Typically offered: Irregular)

COMM 5853. American Film Survey. 3 Hours.
A survey of major American film genres, major directors and films that have
influenced the development of motion pictures. (Typically offered: Fall and Summer)

COMM 5863. History and Development of International Film I. 3 Hours.
A critical survey of international film as a distinctive art form and as a medium of
expression and communication with attention given to films and cinema from its
origins to 1975. (Typically offered: Irregular)

COMM 5873. History and Development of International Film II. 3 Hours.
A critical survey of international film as a distinctive art form and as a medium of
expression and communication with attention given to films and cinema from 1975 to
the present. (Typically offered: Irregular)

COMM 590V. Special Problems. 1-6 Hour.
Credit by arrangement. Prerequisite: Graduate standing. (Typically offered: Fall,
Spring and Summer) May be repeated for degree credit.

COMM 5913. Internship in Communication. 3 Hours.
Internship in applied communication within public and private organizations.
Prerequisite: 15 hours graduate level communication in residence. (Typically offered:
Fall, Spring and Summer)

COMM 5923. Capstone Course in Communication. 3 Hours.
Students organize and synthesize knowledge developed throughout their
graduate coursework into a tangible capstone product which becomes part of their
professional portfolio. (Typically offered: Fall, Spring and Summer)

COMM 5993. Readings In Cultural Studies. 3 Hours.
Classic and current theoretical approaches to cultural studies. Subject matter
changes depending on student interest and faculty expertise. (Typically offered:
Irregular)

COMM 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall and
Spring) May be repeated for degree credit.

Communication Disorders Website (http://cdis.uark.edu/)

Degrees Conferred:
M.S. in Communication Disorders (CDIS)

The Master of Science (M.S.) degree program in communication disorders
with an emphasis on speech-language pathology at the University of
Arkansas is accredited by the Council on Academic Accreditation (CAA) in Audiology and Speech-Language Pathology of the American
Speech-Language-Hearing Association, 2200 Research Boulevard, #310,
Rockville, MD 20850, 800-498-2071 or 301-296-5700.

M.S. in Communication Disorders

Prerequisites to Degree Program: Applicants to the M.S. degree in
communication sciences and disorders with an emphasis in speech-
language pathology are expected to have completed prerequisite
course work in normal speech, language, and hearing functions, normal
development, and speech-language and hearing disorders, as well as
biological and physical sciences, behavioral and social sciences, and
mathematics. Prospective applicants with undergraduate degrees in other
disciplines should contact the Program Adviser for further information.
To be considered for admission to graduate study in communication
sciences and disorders, applicants must have a minimum overall GPA of
3.00 in undergraduate course work and must submit transcripts of
all college-level coursework, a personal statement, and three letters
of recommendation from persons competent to judge the applicant’s
potential for graduate studies. All applicants must submit scores from the
Graduate Record Examination for full consideration. Students are only
accepted for Fall admission. The application deadline is February 1 and
must be completed using the CSDCAS centralized electronic application
process (see the Communication Sciences and Disorders website (http://
cdis.uark.edu/) for details). Incomplete and/or late applications will not be
considered. Admission decisions are based on demonstrated graduate
potential as well as best fit for the program.

Requirements for the Master of Science Degree: The M.S. degree
program in communication sciences and disorders is designed to ensure
that all degree candidates meet the minimum academic and clinical
practicum requirements for the Certificate of Clinical Competence in
Speech-Language Pathology of the American Speech-Language-Hearing
Association (ASHA). The degree program requires a minimum of five
academic semesters to complete, including continuous enrollment in
the summer session between the first and second years. Thesis and
non-thesis options are available. All candidates for the M.S. degree are
required to pass a written comprehensive examination.
The program requires 36 hours of graduate-level academic credit and 11 hours of graduate-level clinical credit for the M.S. in Communication Sciences and Disorders. Required courses, clinical courses, and electives are listed below.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

## Graduate Faculty

**Bowers, Lisa Marie**, Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (Louisiana State University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.

**Bowers, Andrew L.**, Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (University of Tennessee), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.

**Cook, Aletha**, M.S., B.A. (University of Arkansas), Clinical Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.

**Frazier, Kimberly Frances**, Ph.D. (University of South Carolina–Columbia), M.S., B.S.E. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2007.

**Gilbertson, Margie**, Ph.D. (University of Memphis), M.S.E., B.A. (University of Central Arkansas), Clinical Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2016.

**Glade, Rachel E.**, Ph.D. (University of Arkansas), M.S. (University of Arkansas for Medical Sciences), M.A. (University of Arkansas), B.S. (University of Arkansas at Little Rock), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.

**Hagstrom, Fran W.**, Ph.D. (Clark University), M.S. (University of Texas Health Science Center-Houston), M.A. (University of St. Louis University), B.A. (Southwest Baptist University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2002.

**Perry, Kim**, M.S. (University of Arkansas), Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2007.

## Courses

**CDIS 5103. Research Methodology in Communication Disorders. 3 Hours.**

An examination of methods of research in speech-language pathology and audiology and of the use of bibliographic tools. Focuses on purposes and problems of various forms of communication disorders research, procedures and instruments employed, and reporting of research. Prerequisite: Graduate standing. (Typically offered: Fall)

**CDIS 5113. Seminar in Early Intervention. 3 Hours.**

Study of a family-centered, transdisciplinary approach to early intervention with infants and toddlers at-risk for communication disorders. Topics include early communication development, service delivery in a family context, coordination with other disciplines, legislation mandating services, and providing services to children with multiple disabilities. Prerequisite: CDIS 3223 or equivalent, and graduate standing. (Typically offered: Spring)

**CDIS 5121L. Feeding and Swallowing Disorders Lab. 1 Hour.**

Observation and interpretation of techniques used for assessment and remediation of feeding and swallowing disorders in children and adults. Corequisite: CDIS 5122. Prerequisite: CDIS 3213 and graduate standing. (Typically offered: Fall)

**CDIS 5122. Feeding and Swallowing Disorders. 2 Hours.**

Study of the etiology, assessment, and remediation of feeding and swallowing disorders in children and adults. Prerequisite: CDIS 3213 or equivalent, and graduate standing. (Typically offered: Fall)

**CDIS 5143. Cognitive-Communication Development and Disorders. 3 Hours.**

Study of normal cognitive development, the role of communication in this development, and shifts that may occur in conjunction with various speech, language and/or hearing disorders. Prerequisite: CDIS 3223. (Typically offered: Fall)

**CDIS 5153. TBI and Right-Hemisphere Disorders. 3 Hours.**

Study of the speech and language disorders commonly resulting from traumatic brain injury and right hemisphere disorders. Prerequisite: CDIS 4253 or equivalent, and graduate standing. (Typically offered: Spring)

**CDIS 5163. Seminar in Language Topics. 3 Hours.**

Study of selected topics in normal and disordered language acquisition and/or language use. Implications of current research are reviewed and applied to evaluation and management of language impairment(s). Prerequisite: Graduate standing. (Typically offered: Irregular)

**CDIS 5173. Sign Language and Deafness. 3 Hours.**

(Formerly CDIS 4103.) An introduction to American Sign Language (ASL) and the Deaf Community that uses it. This class will study expressive and sign language skills using ASL vocabulary, structure and grammar. The Deaf Community will be studied through videotapes and readings. Issues in Deaf Education will also be introduced. Graduate degree credit will not be given for both CDIS 4103 and CDIS 5173. (Typically offered: Fall, Spring and Summer)

**CDIS 5181. Advanced Clinical Practicum I. 1 Hour.**

Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing. (Typically offered: Fall)

**CDIS 5193. Seminar in Problems of Oral Communication. 3 Hours.**

Investigation of research in selected problems of oral communication; recent developments in speech-language pathology and audiology; individual problems for investigation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)
CDIS 5203. Introduction to Aural Rehabilitation. 3 Hours.
(Formerly CDIS 4133.) Study of the technique used in the rehabilitation of speech and language problems of the hearing impaired including the role of amplification, auditory training, and speech reading in rehabilitation. Graduate degree credit will not be given for both CDIS 4133 and CDIS 5203. Prerequisite: CDIS 3103. (Typically offered: Spring)

CDIS 5213. Voice and Resonance Disorders. 3 Hours.
Study of disorders of phonation and resonance, including etiologies, diagnosis, and intervention strategies. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5223. Fluency Disorders. 3 Hours.
An examination of fluency disorders including theory, etiological factors, and development. In addition, the course is designed to address assessment and management of fluency disorders consistent with evidence-based practice for prospective speech-language pathologists. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5233. Speech Sound Disorders. 3 Hours.
Assessment and treatment of disorders in speech articulation. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 5243. Language Disorders in Adults. 3 Hours.
Cognitive and communicative breakdown due to neurological trauma, including etiology, characteristics, assessment and treatment for aphasia, traumatic brain injury, and right hemisphere disorders. Prerequisite: Graduate standing. (Typically offered: Spring)

CDIS 5253. Motor Speech Disorders. 3 Hours.
Study of motor speech production disorders related to damage to central or peripheral nervous system motor centers and pathways. Cerebral palsy, adult dysarthria, apraxia, and dysphagia are emphasized. Both theoretical and treatment considerations are addressed. Prerequisite: CDIS 4253 or equivalent, and graduate standing. (Typically offered: Spring)

CDIS 5263. Advanced Audiology. 3 Hours.
(Formerly CDIS 4263.) Study of the basic techniques used in audiological assessment of children and adults, including pure tone audiometry, speech audiometry, and special tests of hearing function. Graduate degree credit will not be given for both CDIS 4263 and CDIS 5263. Prerequisite: CDIS 3103. (Typically offered: Fall)

CDIS 5273. Language, Learning and Literacy. 3 Hours.
An examination of language-based literacy skills, including consideration of development, disorders, assessment and intervention. Prerequisite: Graduate standing and CDIS 5181. (Typically offered: Spring)

CDIS 5281. Advanced Clinical Practicum II. 1 Hour.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5281. (Typically offered: Summer)

CDIS 5293. Augmentative and Alternative Communication. 3 Hours.
Approaches to communication management with the severely and profoundly handicapped child or adult, with primary emphasis on augmentative and alternative communication assessment and intervention. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5303. Clinical Assessment of Speech and Language Disorders. 3 Hours.
(Formerly CDIS 4183.) Study of the basic diagnostic procedures used in speech-language pathology. Emphasis is placed on the clinical processes of assessment, including criteria for test selection, techniques in test administration, and interpretation of test. Graduate degree credit will not be given for both CDIS 4183 and CDIS 5303. Pre- or Corequisite: Prior coursework in CDIS and ANTH 1023. (Typically offered: Spring)

CDIS 5313. Introduction to Speech and Hearing Science. 3 Hours.
(Formerly CDIS 4213.) Study of the acoustic structure of oral speech and the auditory skills underlying speech perception. Graduate degree credit will not be given for both CDIS 4213 and CDIS 5313. Prerequisite: CDIS 3203, CDIS 3213, CDIS 3124 and its lab component. Pre- or Corequisite: MATH 1203 or higher. (Typically offered: Spring)

CDIS 5323. Language Disorders in Children. 3 Hours.
(Formerly CDIS 4223.) Study of disorders of language acquisition and usage in children and adolescents, with emphasis upon the nature, assessment, and treatment of such disorders. Graduate degree credit will not be given for both CDIS 4223 and CDIS 5323. Prerequisite: CDIS 3223. (Typically offered: Spring)

CDIS 5353. Neurological Bases of Communication. 3 Hours.
(Formerly CDIS 4253.) A study of the structures and functions of the central and peripheral nervous systems as they relate to human speech, language, and cognition. Graduate degree credit will not be given for both CDIS 4253 and CDIS 5353. Prerequisite: CDIS 3213. (Typically offered: Fall)

CDIS 5373. Communication Behavior and Aging. 3 Hours.
(Formerly CDIS 4273.) Study of the effects upon communication of normal aspects of the aging process, from early adulthood throughout the lifespan. Changes in speech, language, and hearing functioning are identified; common alterations in communicative disorders commonly associated with advanced age are discussed. Graduate degree credit will not be given for both CDIS 4273 and CDIS 5373. (Typically offered: Fall)

CDIS 5381. Advanced Clinical Practicum III. 1 Hour.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5281. (Typically offered: Summer)

CDIS 5391. Clinical Practicum: Hearing Disorders. 1 Hour.
Practicum in audiology. (Typically offered: Fall, Spring and Summer)

CDIS 548V. Off-Campus Practicum: Public School Site. 1-6 Hour.
Practicum activities in speech-language disorders in a public school setting. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CDIS 5511. Professional Issues I. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders. (Typically offered: Fall)

CDIS 5521. Professional Issues II. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders. (Typically offered: Spring)

CDIS 5531. Professional Issues III. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders. (Typically offered: Fall)

CDIS 555V. Internship: Clinical Site. 3-6 Hour.
Field placement in approved clinical setting for clock hours in speech-language pathology assessment and treatment. Students in the master's program must enroll in a minimum of 3 credit hours of CDIS 555V or CDIS 578V during their last semester of graduate studies. Prerequisite: Graduate standing; Completion of one semester of either CDIS 548V or CDIS 568V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 568V. Off-Campus Practicum: Clinical Site. 1-6 Hour.
Practicum activities in speech-language disorders in an off-campus clinical site. Prerequisite: Graduate standing and completion of at least 2 semesters of CDIS 5281. (Typically offered: Fall, Spring and Summer)
The overall goal of this program is to improve the capacity of colleges and seek to build their content expertise and improve their preparation of community college employees that will correspondingly improve these institutions. The program is designed for individuals with a bachelor’s degree and at least some experience working at a community college. Additionally, most students will bring a deep belief in the potential of community colleges to educate individuals and improve local communities.

Requirements for M.Ed. in Community College Leadership
The M.Ed. in Community College Leadership has been included pending approval by the Arkansas Higher Education Coordinating Board.

Admission Requirements: Applicants must meet all requirements for admission to the University of Arkansas Graduate School, except the standardized test score requirement. In addition, applicants must have significant experiences with and preferably current employment at a community college. Applicants will be required to complete a Community College Leadership Program application form and submit two professional references, a résumé, and a statement of interest.

Program Requirements: In addition to completing 33 hours of coursework, all students in the Master of Education in Community College Leadership program are required to complete a written comprehensive examination. The examination will be embedded within CCLE 5103 Critical Issues in Community Colleges. Courses are offered online in an 8-week semester format, except in the summer.

Courses

CCLE 5003. History of the Community College. 3 Hours.
The course examines the history and development of community colleges in the United States. Prerequisite: Admission into M.Ed. in Community College Leadership program or instructor consent. (Typically offered: Irregular)

CCLE 5013. Legal Issues in Community Colleges. 3 Hours.
The course examines the legal issues facing community colleges in the United States, including: the rights and responsibilities of educators and students, fair employment; due process; torts liability and contracts; and federal and state legislation. Prerequisite: Admission into the M.Ed. program in community college leadership or instructor consent. (Typically offered: Irregular)

Community College Leadership (CCCLE)

Contact

Degree Offered:
M.Ed. in Community College Leadership (CCCLEME)

The M.Ed. in Community College Leadership has been included pending approval by the Arkansas Higher Education Coordinating Board.

The Master of Education in Community College Leadership is an online 33-hour graduate program targeting individuals who work in community colleges and seek to build their content expertise and improve their career mobility. The overall goal of this program is to improve the

CDIS 578V. Internship: Public School Site. 3-6 Hour.
Field placement in approved public school setting for clock hours in speech-language pathology assessment and treatment. Students in the Master’s program must enroll in a minimum of 3 credit hours of CDIS 578V or CDIS 558V during their last semester of graduate studies. Prerequisite: Graduate standing; Completion of one semester of either CDIS 548V or CDIS 568V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 5813. Advanced Auditory (Re)Habilitation. 3 Hours.
This course provides students with an in-depth knowledge of hearing anatomy and physiology as well as current hearing and hearing assistive technologies. The development of auditory skills across the lifespan will be discussed as well as intervention techniques to facilitate auditory, speech, and spoken language skills across the lifespan. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5823. Language Learning with Multiple Disabilities. 3 Hours.
Approaches to services (assessment and intervention) for individuals who, as a result of multiple disabilities, are in the beginning stages of language development including the preintentional and presymbolic stages. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5823. Communication and Swallowing in Dementia. 3 Hours.
This course provides an in-depth examination of the communication and feeding/swallowing factors demonstrated by patients with dementia. Etiologies, symptoms, progression, evaluation, and appropriate interventions for the most common forms of dementia are addressed. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 5883. Policies & Procedures in Educational Speech-Language Pathology. 3 Hours.
Educational Speech Pathology is designed to familiarize the student the factors related to functioning as an SLP in an educational setting, including state and federal regulations/standards, service delivery considerations, eligibility criteria, and documentation. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 590V. Special Problems. 1-6 Hour.
Special problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 599V. Seminar in Professional Issues. 1-3 Hour.
Selected topics in professional issues in speech-language pathology and audiology. (Typically offered: Fall and Spring)

CDIS 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CDIS 699V. Seminar in Communication Sciences and Disorders. 1-6 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.
CCLE 5023. Organization and Leadership in Community Colleges. 3 Hours.  
The course applies the scholarship of organizations and leadership to community colleges in the United States, covering issues related to governance and policymaking, management, problem-solving, and personnel. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5033. Diversity and Inclusion in Community Colleges. 3 Hours.  
The course focuses on the responsibilities of community college leaders to be multiculturally competent professionals who foster inclusive practices for diverse student populations. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5043. Finance and Fiscal Management in Community Colleges. 3 Hours.  
The course provides an understanding of community college finance and budgeting practices. Prerequisite: Admission into M.Ed. in Community College Leadership program or instructor consent. (Typically offered: Irregular)

CCLE 5053. Students in Community Colleges. 3 Hours.  
The course provides an understanding of student populations in community colleges. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5063. Teaching and Learning in Community Colleges. 3 Hours.  
The course examines instructional strategies and considers the diverse types of learning environments at community colleges. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5073. Workforce and Economic Development in Community Colleges. 3 Hours.  
The course provides an overview of the role community colleges play in workforce, economic, and community development, including community-based partnerships, best practices in program development, and collaboration with both for-profit and nonprofit organizations. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5083. Research and Assessment of Community Colleges. 3 Hours.  
The course provides an overview of research and assessment applicable to community colleges to inform strategic planning and data-driven decision-making. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5093. Program Planning in Community Colleges. 3 Hours.  
The course introduces the process of program planning in community colleges, including various planning models used in academic settings and fundamental steps in the planning process. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

CCLE 5103. Critical Issues in Community Colleges. 3 Hours.  
The course considers the pressing problems facing community colleges and strategies to maximize the potential of these institutions. Prerequisite: Admission into M.Ed. in Community College Leadership or instructor consent. (Typically offered: Irregular)

Degrees Conferred:  
M.S. in Community Health Promotion (CHLP)  
Ph.D. in Community Health Promotion (CHLP)

Program Description: The Community Health Promotion program prepares students in the area of public and community health at both the masters in Community Health (M.S.) and doctoral (Ph.D. with a concentration in Health Behavior and Health Promotion) level. The M.S degree prepares students for advanced and entry-level public health positions in both the private and public health sectors including non-for-profit organizations, public health departments, health care agencies and governmental agencies (e.g., Centers for Disease Control and Prevention). The Ph.D. program prepares students for careers in academia with the competencies necessary to perform research and teaching in university settings. The minimum number of credit hours required to complete the master’s degree is 33 and the Ph.D. requires a minimum of 96 credit hours.

M.S. in Community Health Promotion  
Prerequisites to M.S. Degree Program: For acceptance to the master’s degree programs, the program area requires in addition to the general requirements for admission to the Graduate School, an undergraduate degree in health or a related field and the following admission standards: an overall undergraduate GPA of 3.00 (or if the overall undergraduate GPA is between 2.70 and 2.99, the student must have a 3.00 GPA on the last 60 hours of undergraduate course work, excluding student teaching, or a GRE score of 297 on the combined verbal and quantitative parts of the general test). Further, a curriculum vitae and 500 word interest statement must be submitted for program admission consideration.

Approved Electives (Thesis Option requires 9 credit hours of electives; Project Option requires 12 credit hours of electives; Non-Thesis/Non-Project Option requires 15 credit hours of electives)

| Total Hours | 33 |
Students must receive a grade of B or better in courses associated with the required research component and required courses component.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Ph.D. in Community Health Promotion

Prerequisites to the Ph.D. Degree Program: The applicant must have completed a master’s degree or its equivalent in health or a closely related field and meet general admission requirements of the Graduate School. An application should include the following: 1) curriculum vitae; 2) statement of purpose, including objectives, research interests, and background information; 3) three letters of recommendation; and 4) an acceptable score on the Graduate Record Examinations (GRE). Additional prerequisites may be prescribed after review of application materials. Furthermore, applicants who present a GRE score of 308 or greater on the combined verbal/quantitative portions, a GRE writing score of 5.5 or greater, a minimum overall GPA of 3.85 and faculty approval may apply for admission to the Ph.D. Community Health Promotion program after completion of their bachelor’s degree.

Requirements for the Doctor of Philosophy Degree: A minimum of 96 graduate hours beyond the bachelor’s degree is required. A doctoral advisory committee will be established by the student in consultation with the Coordinator of Graduate Study during the first semester of enrollment subsequent to acceptance into the degree program. The student, in conjunction with the advisory committee, will define the program of study. The degree program requires successful completion of candidacy examinations, an acceptable dissertation, and an oral defense of the dissertation. These last requirements (p. 461) are described elsewhere in this catalog. Further requirements of the Doctor of Philosophy degree in community health promotion include the following:

Field of Study (9 hours)

Students, in consultation with their doctoral advisory committee, will identify further course work comprising a field of study in community health promotion, consistent with the goals and objectives of the students and institution. Course work may be selected from several related disciplines or a single discipline.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Public Health Courses

PBHL 5023. Teaching in Community Health Promotion. 3 Hours. Examination and practical exposure to the principles and practices of undergraduate teaching in public health. Includes course planning, teaching techniques, assessment strategies, and supervised practice. Prerequisite: Admission to the M.S. or Ph.D. program in Community Health Promotion. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

PBHL 5213. Evaluation of Public Health Programs. 3 Hours. This seminar style course is designed to provide students with exposure to different types of program evaluation, including needs assessment, formative evaluation, process evaluation, and outcome and impact evaluation. The course covers theoretical frameworks supporting evaluation, ethics in evaluation, methods for data collection, reporting evaluation findings, and strengths and limitations of conducting program evaluation. Prerequisite: PBHL 5563 and HHPR 5353. (Typically offered: Fall)

PBHL 5353. Health Counseling. 3 Hours. A review of the role and function of the health counselor including a focus on problem solving approaches for coping with daily problems of living, decision making, and life style planning. (Typically offered: Fall Odd Years)
PBHL 5533. Theories of Social and Behavioral Determinants of Health. 3 Hours.
This course will provide a basic foundation in the social and behavioral sciences relevant to public health. Students will learn the role of social and behavioral determinants in the health of individuals and of populations. Then, students will learn models and theories of health behavior, both generally and specifically. Generally, the student will learn how to identify, analyze, and use theoretical constructs and principles with particular attention to the use of theory in professional public health practice. Specifically, the student will learn the constructs and principles of several theories commonly used in public health behavior research and intervention design. The course will cover the four major individual factors that influence health behavior: (i.e., Health Belief Model, Transtheoretical Model, Theory of Reasoned Action/Planned Behavior, and Social Cognitive Theory) as well as several social, organizational, and community theories that are beyond the individual level. (Typically offered: Fall)

PBHL 5543. Contemporary Issues in Human Sexuality. 3 Hours.
In-depth analysis of the social, biological, and behavioral factors associated with the development of one's sexuality. (Typically offered: Irregular)

PBHL 5563. Public Health: Practices and Planning. 3 Hours.
Acquaints the student with the structure, functions, and current problems in public health and with the role of education in public health. Prevention and control practices and planning will be emphasized. Prerequisite: PBHL 5573. (Typically offered: Spring)

PBHL 5573. Principles of Health Education. 3 Hours.
Current trends, basic issues, controversial issues, and fundamental principles of health education. (Typically offered: Fall)

PBHL 5613. Epidemiology. 3 Hours.
This course will present principles and practices related to the prevention and control of health-related conditions in the human population. Emphasis will be placed on understanding the concepts of epidemiology, including aspects of disease distribution, epidemiologic methods, risk of disease and injury, descriptive and analytic epidemiologic methods and study designs, and application of epidemiologic data to the prevention and control of disease. Format will include lecture and small group seminars. (Typically offered: Fall)

PBHL 5623. Human Diseases. 3 Hours.
(Formerly PBHL 4623.) An examination of the variety, behavior, distribution, and management of both infectious and noninfectious diseases in human populations. Graduate degree credit will not be given for both PBHL 4623 and PBHL 5623. (Typically offered: Irregular)

PBHL 5633. Health Services Administration. 3 Hours.
Emphasis is on an examination of administrative factors related to health services. Administrative and professional authority, boards, consumers, delivery of services, federal role, and cost containment will also be addressed. (Typically offered: Irregular)

PBHL 5643. Multicultural Health. 3 Hours.
Through lecture, discussion, simulations, and case studies, students will develop an appreciation for the cultural traditions and practices of different groups. The importance and implications of these traditions on health outcomes and health status will be examined. Particular attention will be paid to the role of the public health educator in mediating the impact of health disparities, including advocacy. Students will develop skills of cultural competence that are essential for public health practitioners today. Prerequisite: Graduate standing or consent. (Typically offered: Spring Even Years)

PBHL 574V. Internship. 1-6 Hour.
Internship in health behavior and health promotion. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

PBHL 589V. Independent Research. 1-6 Hour.
Development, implementation, and completion of graduate research project. Prerequisite: M.S. degree in Community Health Promotion and HHPR 5353 and ESRM 5393. (Typically offered: Fall, Spring and Summer)

PBHL 600V. Master's Thesis. 1-6 Hour.
Thesis in health behavior and health promotion. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PBHL 6013. Advanced Directed Research. 3 Hours.
This course is intended for doctoral students who wish to pursue research under the direction of a faculty member. In this course, doctoral students will work independently and collaborate with faculty member(s) and fellow students to conduct research in a specified area of interest. The purpose of the course is for the student to develop knowledge in her/his own domain, strengthen her/his research skills, and work collaboratively on research projects. The course will aim for students to present research findings at conferences and/or publish research findings in peer reviewed journals. The directed research course places more emphasis on the students’ role as a researcher in an academic setting. Prerequisite: Admission to the Ph.D. program in Community Health Promotion. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

PBHL 605V. Independent Study. 1-6 Hour.
Provides students with an opportunity to pursue special study of education problems. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

PBHL 6333. Health Behavior Research. 3 Hours.
A review of human behavior and its relationship to health and wellbeing. Focuses on contemporary health behavior research and instrumentation. (Typically offered: Fall Even Years)

PBHL 6553. Environmental Health. 3 Hours.
An analysis and evaluation of the various environmental factors that influence our health. Causes of problem factors are identified and solutions proposed for improving environmental conditions. (Typically offered: Spring)

PBHL 6733. Health and the Aging Process. 3 Hours.
An overview of the health-related issues facing elderly populations with in-depth study of the biological and behavioral changes associated with aging. (Typically offered: Irregular)

PBHL 6803. Health Communication Theory, Research and Practice. 3 Hours.
This course is designed to acquaint you with the role of communication in health education and with basic principles and practices in interpersonal, group, and mass communication. Health communication theory will be discussed in the first part of the semester, followed by important research in the area of health communication, and finally putting to practice the material will be the terminal experience for the course. (Typically offered: Spring Odd Years)

PBHL 6833. Principles of Epidemiology II. 3 Hours.
Provides students with knowledge and skills necessary to design, conduct, and interpret observational epidemiologic concepts, sources of data, prospective cohort studies, retrospective cohort studies, case-control studies, cross-sectional studies, methods of sampling, estimating sample size, questionnaire design, and effects of measurement error. Corequisite: ESRM 5393 or ESRM 6403. (Typically offered: Spring and Summer)

PBHL 699V. Seminar. 1-6 Hour.
Discussion of selected topics and review of current literature in community health promotion. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
Literature and Cultural Studies:

Admission to the Master of Arts Degree in Comparative Literature and Cultural Studies Program is an innovative interdisciplinary graduate program for advanced studies in literature and culture across linguistic, national, disciplinary, and genre boundaries. Comparative Literature and Cultural Studies takes for granted that matters of everyday culture — popular culture as well as literary culture — are political matters in the way that power relations are established and sometimes challenged. The program offers advanced academic training in comparative literature, cultural studies, Hispanic studies, literary translation, and world language acquisition.

The program is supported primarily by the Departments of Communication, English, and World Languages, Literatures, and Cultures. The program also has affiliated faculty members in several programs and departments in the humanities and social sciences, including Anthropology, Art, Classics, Theatre, History, Philosophy, Sociology, Education, as well as interdisciplinary programs such as African and African American, Latin American and Latino, Middle Eastern, Indigenous, Jewish, and Gender Studies.

Primary Areas of Faculty Research: Literary theory and criticism, cultural studies, postcolonial studies, gender studies, visual discourses, world languages, literary translation.

M.A. in Comparative Literature and Cultural Studies

Admission to the Master of Arts Degree in Comparative Literature and Cultural Studies: The normal preparation for graduate study in comparative literature and cultural studies is an undergraduate degree in world languages, English, or a related field in the humanities and the social sciences. Applicants should have advanced proficiency in the intended languages of study. Admission requirements:

1. Application to the Graduate School
2. Complete official transcripts of all undergraduate and graduate work.
3. Graduate Record Examination (GRE) scores on the Aptitude Test (verbal, quantitative, and analytical writing).
4. International students are required to take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam, meeting the minimum score required by the Graduate School.
5. Statement of purpose describing academic interests and professional goals.
6. A Curriculum Vitae
7. An academic writing sample, demonstrating critical thinking, writing ability and research potential (10 pp approximately)
8. Three letters of recommendation

Requirements for the Master of Arts Degree in Comparative Literature and Cultural Studies: In addition to the general requirements of the Graduate School, all master’s candidates must meet the following requirements:

1. All master’s candidates must take WLIT 5193 Introduction to Comparative Literature and COMM 5503 Communication and Cultural Studies
2. All master’s candidates must take 6 hours of world languages and literatures in areas and historical periods different from their primary fields. All master’s candidates are required to take and pass a comprehensive examination based on course work taken. Students may retake only once any examination they fail.
3. All master’s candidates must demonstrate reading proficiency in a language other than English. The language requirement may be fulfilled either by taking 12 hours in the target language or by taking the reading exam administered by the Department of World Languages, Literatures, and Cultures. Documented coursework from an accredited institution in which the language of instruction is other than English may be used to substitute for a language exam.

Requirements of the Thesis Option

1. Candidates in the master’s option must complete 30 hours of graduate course work and 6 thesis hours. Master’s candidates intending to enter the Ph.D. program are recommended to choose the thesis option.
2. Candidates will take 6 hours of course work and 6 thesis hours in their primary area of concentration.
3. Candidates will take 12 hours of graduate course work in a second field (other literary tradition or cultural studies).
4. Master’s candidates in the thesis option must present a thesis proposal early in their second year of study and must turn in the thesis during the last semester of course work, following Graduate School guidelines for thesis submission.
5. Theses in a language other than English. Students in the Comparative Literature and Cultural Studies Program may request permission to submit their thesis in a language other than English, with legitimate justification. Valid reasons for submitting a thesis in a language other than English includes the subject matter, special primary audience, publication venues, academic position in a foreign country, historical or literary value, and the documents to be used, analyzed and interpreted. Limited English writing skills is not a valid justification. Students must request approval of the target language from the thesis committee, the program advisory committee, the program director and the dean of the graduate school before starting the project. All committee members must be proficient in the target language and approve target language usage. Abstracts must be written in English.
6. Candidates in the thesis option are only required to take the world literatures and cultures comprehensive exam.

Requirements for the Non-Thesis Option

1. In addition to the general requirements, Master’s candidates in the non-thesis option must select two fields and complete 12 hours of graduate course work in each field (Arabic, Classics, English, French, German, Spanish, and courses in other disciplines in the humanities and the social sciences).
2. Candidates are required to take two comprehensive exams. One is on the specialty fields and one is on the selected areas of world literatures and cultures.
Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Requirements for Ph.D. with Comparative Literature Concentration

Admission Requirements:

1. Application to the Graduate School
2. Complete official transcripts of all undergraduate and graduate work
3. Graduate Record Examination (GRE) scores on the Aptitude Test (verbal, quantitative, and analytical writing).
4. International students are required to take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exams, meeting the minimum score required by the Graduate School.
5. Statement of purpose describing academic interests and professional goals. Doctoral applicants must specify which concentration they wish to pursue (comparative literature, cultural studies, Hispanic Studies, applied linguistics, or translation) and describe how their research interests might be met by working with specific members of our faculty
6. An academic writing sample preferably from a research or examination paper from a literature or culture course, showing evidence of critical thinking, writing ability and research skills
7. Three letters of recommendation from former instructors, employers, or supervisors

Requirements for the Doctoral Degree:

1. Ph.D. candidates must complete a minimum of 66 hours of graduate course work (including credit taken for the M.A. or M.F.A.) and must attain a 3.00 grade-point average in each of their fields. Part or all of the graduate course work completed at other U.S. institutions or accredited institutions abroad with a grade of “B” or higher and taken within seven years of starting the doctoral program may count towards the 66 hours requirement with the approval of the Program Advisory Committee. However, it should be noted that this course work will not be reflected on the student’s transcript.
2. WLIT 5193 Introduction to Comparative Literature is required of all Ph.D. candidates in the Program in Comparative Literature and Cultural Studies.
3. Ph.D. candidates must take 24 hours in a main field. The goal is for the student to use this coursework to create a primary field of specialization.
4. Ph.D. candidates must complete 18 hours in one of the five doctoral concentrations—traditional comparative literature, cultural studies, interdisciplinary Hispanic studies, translation, and world languages and applied linguistics—as described in detail below.
5. Ph.D. candidates must take 9 hours in world literatures and cultures outside their main field, providing historical depth and geographical breadth to their literary and cultural studies.
6. Ph.D. students must complete an additional 12 elective credits. They may use these to develop a tertiary field, strengthen primary or secondary fields, or to take courses outside those fields.
7. Ph.D. candidates must take 18 dissertation hours.
8. Ph.D. students must declare a concentration by the end of the first year and define a Dissertation Committee by the end of the second year. The committee consists of the student’s research supervisor plus two other faculty members. This committee will administer the candidacy exam, the proposal defense, and the dissertation defense.
9. Ph.D. students must demonstrate reading proficiency in two languages other than English before being admitted into candidacy. The language requirements may be fulfilled either by completing 12 hours in the target language or by taking the reading exam administered by the Department of World Languages, Literatures, and Cultures. Documented coursework from an accredited institution in which the language of instruction is other than English may be used to substitute for a language exam.
10. Candidacy: Upon completion of coursework and world languages requirements, all Ph.D. students must take a two part candidacy exam and present a dissertation proposal.
11. The candidacy examination is based on a set of reading lists based on coursework and areas of concentration, that the student composes with the guidance of their advisor and committee members. The reading list is divided into five sections: two lists comprising the student’s areas of concentration and three lists covering world literatures and cultures. The candidacy examination has two parts:
   a. A written examination covering the student’s world literatures and cultures fields;
   b. A written examination covering the concentration areas of the reading lists.

Students may retake only once any examination they fail.

1. Dissertation Proposal: After successfully completing the candidacy examination, the Ph.D. student will submit a dissertation proposal to be discussed and approved in a formal meeting with the Dissertation Committee. This meeting is the proposal defense. A student failing a proposal defense may revise the proposal and retake the defense one time.
2. Dissertations in a language other than English. Students in the Comparative Literature and Cultural Studies Program may request permission to submit their dissertation in a language other than English, with legitimate justification. Valid reasons for submitting a dissertation in a language other than English includes the subject matter, special primary audience, publication venues, academic position in a foreign country, historical or literary value, and the documents to be used, analyzed and interpreted. Limited English writing skills is not a valid justification. Students must request approval of the target language from the dissertation committee, the program advisory committee, the program director and the dean of the graduate school before starting the project. All committee members must be proficient in the target language and approve target language usage. Abstracts must be written in English.
3. Upon passing both parts of the written examination as well as successfully completing the proposal defense, the student becomes a Ph.D. degree candidate and enters the dissertation stage.
4. Within the time limits specified by the Graduate School, each student must submit a dissertation acceptable to the student’s dissertation committee.
5. Each student must pass a dissertation defense administered by the student’s Dissertation Committee.

Requirements for the Comparative Literature Concentration (CLIT): This concentration is for students interested in world literature and the intersections of different literary traditions beyond national borders. Candidates will complete at least 18 hours in a second world language and literary tradition.
Requirements for Ph.D. with Cultural Studies Concentration

Admission Requirements:

1. Application to the Graduate School
2. Complete official transcripts of all undergraduate and graduate work
3. Graduate Record Examination (GRE) scores on the Aptitude Test (verbal, quantitative, and analytical writing).
4. International students are required to take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exams, meeting the minimum score required by the Graduate School.
5. Statement of purpose describing academic interests and professional goals. Doctoral applicants must specify which concentration they wish to pursue (comparative literature, cultural studies, Hispanic Studies, applied linguistics, or translation) and describe how their research interests might be met by working with specific members of our faculty
6. An academic writing sample preferably from a research or examination paper from a literature or culture course, showing evidence of critical thinking, writing ability and research skills
7. Three letters of recommendation from former instructors, employers, or supervisors

Requirements for the Doctoral Degree:

1. Ph.D. candidates must complete a minimum of 66 hours of graduate course work (including credit taken for the M.A. or M.F.A.) and must attain a 3.00 grade-point average in each of their fields. Part or all of the graduate course work completed at other U.S. institutions or accredited institutions abroad with a grade of “B” or higher and taken within seven years of starting the doctoral program may count towards the 66 hours requirement with the approval of the Program Advisory Committee. However, it should be noted that this course work will not be reflected on the student’s transcript.
2. WLIT 5193 Introduction to Comparative Literature is required of all Ph.D. candidates in the Program in Comparative Literature and Cultural Studies.
3. Ph.D. candidates must take 24 hours in a main field. The goal is for the student to use this coursework to create a primary field of specialization.
4. Ph.D. candidates must complete 18 hours in one of the five doctoral concentrations—traditional comparative literature, cultural studies, interdisciplinary Hispanic studies, translation, and world languages and applied linguistics—as described in detail below.
5. Ph.D. candidates must take 9 hours in world literatures and cultures outside their main field, providing historical depth and geographical breadth to their literary and cultural studies.
6. Ph.D. students must complete an additional 12 elective credits. They may use these to develop a tertiary field, strengthen primary or secondary fields, or to take courses outside those fields.
7. Ph.D. candidates must take 18 dissertation hours.
8. Ph.D. students must declare a concentration by the end of the first year and define a Dissertation Committee by the end of the second year. The committee consists of the student’s research supervisor plus two other faculty members. This committee will administer the candidacy exam, the proposal defense, and the dissertation defense.
9. Ph.D. students must demonstrate reading proficiency in two languages other than English before being admitted into candidacy. The language requirements may be fulfilled either by completing 12 hours in the target language or by taking the reading exam administered by the Department of World Languages, Literatures, and Cultures. Documented coursework from an accredited institution in which the language of instruction is other than English may be used to substitute for a language exam.
10. Candidacy: Upon completion of coursework and world languages requirements, all Ph.D. students must take a two part candidacy exam and present a dissertation proposal.
11. The candidacy examination is based on a set of reading lists based on coursework and areas of concentration, that the student composes with the guidance of their advisor and committee members. The reading list is divided into five sections: two lists comprising the student’s areas of concentration and three lists covering world literatures and cultures. The candidacy examination has two parts:
   a. A written examination covering the student’s world literatures and cultures fields;
   b. A written examination covering the concentration areas of the reading lists.

Students may retake only once any examination they fail.

1. Dissertation Proposal: After successfully completing the candidacy examination, the Ph.D. student will submit a dissertation proposal to be discussed and approved in a formal meeting with the Dissertation Committee. This meeting is the proposal defense. A student failing a proposal defense may revise the proposal and retake the defense one time.
2. Dissertations in a language other than English. Students in the Comparative Literature and Cultural Studies Program may request permission to submit their dissertation in a language other than English, with legitimate justification. Valid reasons for submitting a dissertation in a language other than English includes the subject matter, special primary audience, publication venues, academic position in a foreign country, historical or literary value, and the documents to be used, analyzed and interpreted. Limited English writing skills is not a valid justification. Students must request approval of the target language from the dissertation committee, the program advisory committee, the program director and the dean of the graduate school before starting the project. All committee members must be proficient in the target language and approve target language usage. Abstracts must be written in English.
3. Upon passing both parts of the written examination as well as successfully completing the proposal defense, the student becomes a Ph.D. degree candidate and enters the dissertation stage.
4. Within the time limits specified by the Graduate School, each student must submit a dissertation acceptable to the student’s dissertation committee.
5. Each student must pass a dissertation defense administered by the student’s Dissertation Committee.

Requirements for the Cultural Studies Concentration (CULS). This concentration is for students interested in inter and trans disciplinary approaches to study literature and culture, including non-literary genres such as mass media, popular culture, visual discourses, and communication theories. In addition to the other program requirements, students in the cultural studies concentration must complete 18 hours of coursework in an area related to cultural studies, including take COMM 5503 Communication and Cultural Studies and the seminar COMM 5993 Readings In Cultural Studies.
Ph.D. with Interdisciplinary Hispanic Studies Concentration

Admission Requirements:

1. Application to the Graduate School
2. Complete official transcripts of all undergraduate and graduate work
3. Graduate Record Examination (GRE) scores on the Aptitude Test (verbal, quantitative, and analytical writing).
4. International students are required to take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exams, meeting the minimum score required by the Graduate School.
5. Statement of purpose describing academic interests and professional goals. Doctoral applicants must specify which concentration they wish to pursue (comparative literature, cultural studies, Hispanic Studies, applied linguistics, or translation) and describe how their research interests might be met by working with specific members of our faculty
6. An academic writing sample preferably from a research or examination paper from a literature or culture course, showing evidence of critical thinking, writing ability and research skills
7. Three letters of recommendation from former instructors, employers, or supervisors

Requirements for the Doctoral Degree:

1. Ph.D. candidates must complete a minimum of 66 hours of graduate course work (including credit taken for the M.A. or M.F.A.) and must attain a 3.00 grade-point average in each of their fields. Part or all of the graduate course work completed at other U.S. institutions or accredited institutions abroad with a grade of “B” or higher and taken within seven years of starting the doctoral program may count towards the 66 hours requirement with the approval of the Program Advisory Committee. However, it should be noted that this course work will not be reflected on the student’s transcript.
2. WLIT 5193 Introduction to Comparative Literature is required of all Ph.D. candidates in the Program in Comparative Literature and Cultural Studies.
3. Ph.D. candidates must take 24 hours in a main field. The goal is for the student to use this coursework to create a primary field of specialization.
4. Ph.D. candidates must complete 18 hours in one of the five doctoral concentrations—traditional comparative literature, cultural studies, interdisciplinary Hispanic studies, translation, and world languages and applied linguistics—as described in detail below.
5. Ph.D. candidates must take 9 hours in world literatures and cultures outside their main field, providing historical depth and geographical breadth to their literary and cultural studies.
6. Ph.D. students must complete an additional 12 elective credits. They may use these to develop a tertiary field, strengthen primary or secondary fields, or to take courses outside those fields.
7. Ph.D. candidates must take 18 dissertation hours.
8. Ph.D. students must declare a concentration by the end of the first year and define a Dissertation Committee by the end of the second year. The committee consists of the student’s research supervisor plus two other faculty members. This committee will administer the candidacy exam, the proposal defense, and the dissertation defense.
9. Ph.D. students must demonstrate reading proficiency in two languages other than English before being admitted into candidacy. The language requirements may be fulfilled either by completing 12 hours in the target language or by taking the reading exam administered by the Department of World Languages, Literatures, and Cultures. Documented coursework from an accredited institution in which the language of instruction is other than English may be used to substitute for a language exam.
10. Candidacy: Upon completion of coursework and world languages requirements, all Ph.D. students must take a two part candidacy exam and present a dissertation proposal.
11. The candidacy examination is based on a set of reading lists based on coursework and areas of concentration, that the student composes with the guidance of their advisor and committee members. The reading list is divided into five sections: two lists comprising the student’s areas of concentration and three lists covering world literatures and cultures. The candidacy examination has two parts:
   a. A written examination covering the student’s world literatures and cultures fields;
   b. A written examination covering the concentration areas of the reading lists.

Students may retake only once any examination they fail.

1. Dissertation Proposal: After successfully completing the candidacy examination, the Ph.D. student will submit a dissertation proposal to be discussed and approved in a formal meeting with the Dissertation Committee. This meeting is the proposal defense. A student failing a proposal defense may revise the proposal and retake the defense one time.
2. Dissertations in a language other than English. Students in the Comparative Literature and Cultural Studies Program may request permission to submit their dissertation in a language other than English, with legitimate justification. Valid reasons for submitting a dissertation in a language other than English includes the subject matter, special primary audience, publication venues, academic position in a foreign country, historical or literary value, and the documents to be used, analyzed and interpreted. Limited English writing skills is not a valid justification. Students must request approval of the target language from the dissertation committee, the program advisory committee, the program director and the dean of the graduate school before starting the project. All committee members must be proficient in the target language and approve target language usage. Abstracts must be written in English.
3. Upon passing both parts of the written examination as well as successfully completing the proposal defense, the student becomes a Ph.D. degree candidate and enters the dissertation stage.
4. Within the time limits specified by the Graduate School, each student must submit a dissertation acceptable to the student’s dissertation committee.
5. Each student must pass a dissertation defense administered by the student’s Dissertation Committee.

Requirements for the Interdisciplinary Hispanic Studies Concentration (HISP): This concentration is designed for candidates with an M.A. in Spanish whose scholarly and teaching interests are primarily in Hispanic studies and in interdisciplinary and transnational approaches to the literatures and cultures of Spain, Latin America and Hispanic United States. Candidates in this concentration will complete 18 hours in one of these three fields: Iberian, Latin American or U.S. Latino/Latina literatures and cultures.
Ph.D. with Literary Translation Concentration

Admission Requirements:

1. Application to the Graduate School
2. Complete official transcripts of all undergraduate and graduate work
3. Graduate Record Examination (GRE) scores on the Aptitude Test (verbal, quantitative, and analytical writing).
4. International students are required to take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exams, meeting the minimum score required by the Graduate School.
5. Statement of purpose describing academic interests and professional goals. Doctoral applicants must specify which concentration they wish to pursue (comparative literature, cultural studies, Hispanic Studies, applied linguistics, or translation) and describe how their research interests might be met by working with specific members of our faculty.
6. An academic writing sample preferably from a research or examination paper from a literature or culture course, showing evidence of critical thinking, writing ability and research skills.
7. Three letters of recommendation from former instructors, employers, or supervisors.

Requirements for the Doctoral Degree:

1. Ph.D. candidates must complete a minimum of 66 hours of graduate coursework (including credit taken for the M.A. or M.F.A.) and must attain a 3.00 grade-point average in each of their fields. Part or all of the graduate course work completed at other U.S. institutions or accredited institutions abroad with a grade of “B” or higher and taken within seven years of starting the doctoral program may count towards the 66 hours requirement with the approval of the Program Advisory Committee. However, it should be noted that this course work will not be reflected on the student’s transcript.
2. WLIT 5193 Introduction to Comparative Literature is required of all Ph.D. candidates in the Program in Comparative Literature and Cultural Studies.
3. Ph.D. candidates must take 24 hours in a main field. The goal is for the student to use this coursework to create a primary field of specialization.
4. Ph.D. candidates must complete 18 hours in one of the five doctoral concentrations—traditional comparative literature, cultural studies, interdisciplinary Hispanic studies, translation, and world languages and applied linguistics—as described in detail below.
5. Ph.D. candidates must take 9 hours in world literatures and cultures outside their main field, providing historical depth and geographical breadth to their literary and cultural studies.
6. Ph.D. students must complete an additional 12 elective credits. They may use these to develop a tertiary field, strengthen primary or secondary fields, or to take courses outside those fields.
7. Ph.D. candidates must take 18 dissertation hours.
8. Ph.D. students must declare a concentration by the end of the first year and define a Dissertation Committee by the end of the second year. The committee consists of the student’s research supervisor plus two other faculty members. This committee will administer the candidacy exam, the proposal defense, and the dissertation defense.
9. Ph.D. students must demonstrate reading proficiency in two languages other than English before being admitted into candidacy. The language requirements may be fulfilled either by completing 12 hours in the target language or by taking the reading exam administered by the Department of World Languages, Literatures, and Cultures. Documented coursework from an accredited institution in which the language of instruction is other than English may be used to substitute for a language exam.
10. Candidacy: Upon completion of coursework and world languages requirements, all Ph.D. students must take a two part candidacy exam and present a dissertation proposal.
11. The candidacy examination is based on a set of reading lists based on coursework and areas of concentration, that the student composes with the guidance of their advisor and committee members. The reading list is divided into five sections: two lists comprising the student’s areas of concentration and three lists covering world literatures and cultures. The candidacy examination has two parts:
   a. A written examination covering the student’s world literatures and cultures fields;
   b. A written examination covering the concentration areas of the reading lists.

Students may retake only once any examination they fail.

1. Dissertation Proposal: After successfully completing the candidacy examination, the Ph.D. student will submit a dissertation proposal to be discussed and approved in a formal meeting with the Dissertation Committee. This meeting is the proposal defense. A student failing a proposal defense may revise the proposal and retake the defense one time.
2. Dissertations in a language other than English. Students in the Comparative Literature and Cultural Studies Program may request permission to submit their dissertation in a language other than English, with legitimate justification. Valid reasons for submitting a dissertation in a language other than English includes the subject matter, special primary audience, publication venues, academic position in a foreign country, historical or literary value, and the documents to be used, analyzed and interpreted. Limited English writing skills is not a valid justification. Students must request approval of the target language from the dissertation committee, the program advisory committee, the program director and the dean of the graduate school before starting the project. All committee members must be proficient in the target language and approve target language usage. Abstracts must be written in English.
3. Upon passing both parts of the written examination as well as successfully completing the proposal defense, the student becomes a Ph.D. degree candidate and enters the dissertation stage.
4. Within the time limits specified by the Graduate School, each student must submit a dissertation acceptable to the student’s dissertation committee.
5. Each student must pass a dissertation defense administered by the student’s Dissertation Committee.

Requirements for the Literary Translation Concentration (LTTR). This concentration is designed for candidates interested in advanced studies in translation theory and scholarly research on literary translation. Candidates in this concentration must take 18 hours of translation coursework including nine hours in translation workshops (ENGL 5043) and nine hours from the following form and theory courses in poetry and fiction (ENGL 5223, ENGL 5263, ENGL 5273, ENGL 5283, ENGL 5293). Courses may be substituted from related fields with advisor approval. The dissertation project may be a study of some translation issue or a book-length translation of a literary work with a critical introduction and annotated text. Candidates will typically have an M.F.A. in literary
translation or an M.A. in Arabic, Classics, French, German, Spanish, or other languages and literatures.

**Ph.D. with World Languages and Applied Linguistics Concentration**

**Admission Requirements:**

1. Application to the Graduate School
2. Complete official transcripts of all undergraduate and graduate work
3. Graduate Record Examination (GRE) scores on the Aptitude Test (verbal, quantitative, and analytical writing).
4. International students are required to take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exams, meeting the minimum score required by the Graduate School.
5. Statement of purpose describing academic interests and professional goals. Doctoral applicants must specify which concentration they wish to pursue (comparative literature, cultural studies, Hispanic Studies, applied linguistics, or translation) and describe how their research interests might be met by working with specific members of our faculty
6. An academic writing sample preferably from a research or examination paper from a literature or culture course, showing evidence of critical thinking, writing ability and research skills
7. Three letters of recommendation from former instructors, employers, or supervisors

**Requirements for the Doctoral Degree:**

1. Ph.D. candidates must complete a minimum of 66 hours of graduate course work (including credit taken for the M.A. or M.F.A.) and must attain a 3.00 grade-point average in each of their fields. Part or all of the graduate course work completed at other U.S. institutions or accredited institutions abroad with a grade of “B” or higher and taken within seven years of starting the doctoral program may count towards the 66 hours requirement with the approval of the Program Advisory Committee. However, it should be noted that this course work will not be reflected on the student’s transcript.
2. WLIT 5193 Introduction to Comparative Literature is required of all Ph.D. candidates in the Program in Comparative Literature and Cultural Studies.
3. Ph.D. candidates must take 24 hours in a main field. The goal is for the student to use this coursework to create a primary field of specialization.
4. Ph.D. candidates must complete 18 hours in one of the five doctoral concentrations – traditional comparative literature, cultural studies, interdisciplinary Hispanic studies, translation, and world languages and applied linguistics—as described in detail below.
5. Ph.D. candidates must take 9 hours in world literatures and cultures outside their main field, providing historical depth and geographical breadth to their literary and cultural studies.
6. Ph.D. students must complete an additional 12 elective credits. They may use these to develop a tertiary field, strengthen primary or secondary fields, or to take courses outside those fields.
7. Ph.D. candidates must take 18 dissertation hours.
8. Ph.D. students must declare a concentration by the end of the first year and define a Dissertation Committee by the end of the second year. The committee consists of the student’s research supervisor plus two other faculty members. This committee will administer the candidacy exam, the proposal defense, and the dissertation defense.
9. Ph.D. students must demonstrate reading proficiency in two languages other than English before being admitted into candidacy. The language requirements may be fulfilled either by completing 12 hours in the target language or by taking the reading exam administered by the Department of World Languages, Literatures, and Cultures. Documented coursework from an accredited institution in which the language of instruction is other than English may be used to substitute for a language exam.
10. Candidacy: Upon completion of coursework and world languages requirements, all Ph.D. students must take a two part candidacy exam and present a dissertation proposal.
11. The candidacy examination is based on a set of reading lists based on coursework and areas of concentration, that the student composes with the guidance of their advisor and committee members. The reading list is divided into five sections: two lists comprising the student’s areas of concentration and three lists covering world literatures and cultures. The candidacy examination has two parts:
   a. A written examination covering the student’s world literatures and cultures fields;
   b. A written examination covering the concentration areas of the reading lists.

Students may retake only once any examination they fail.

1. Dissertation Proposal: After successfully completing the candidacy examination, the Ph.D. student will submit a dissertation proposal to be discussed and approved in a formal meeting with the Dissertation Committee. This meeting is the proposal defense. A student failing a proposal defense may revise the proposal and retake the defense one time.
2. Dissertations in a language other than English. Students in the Comparative Literature and Cultural Studies Program may request permission to submit their dissertation in a language other than English, with legitimate justification. Valid reasons for submitting a dissertation in a language other than English includes the subject matter, special primary audience, publication venues, academic position in a foreign country, historical or literary value, and the documents to be used, analyzed and interpreted. Limited English writing skills is not a valid justification. Students must request approval of the target language from the dissertation committee, the program advisory committee, the program director and the dean of the graduate school before starting the project. All committee members must be proficient in the target language and approve target language usage. Abstracts must be written in English.
3. Upon passing both parts of the written examination as well as successfully completing the proposal defense, the student becomes a Ph.D. degree candidate and enters the dissertation stage.
4. Within the time limits specified by the Graduate School, each student must submit a dissertation acceptable to the student’s dissertation committee.
5. Each student must pass a dissertation defense administered by the student’s Dissertation Committee.

**Requirements for World Languages and Applied Linguistics Concentration (WLAL):** This concentration is designed for candidates with research and teaching interest in applied linguistics and second language pedagogy for world languages, literatures and cultures at the college level. Applicants should have a Master’s of Arts in a world language (French, German, Spanish or other languages) or a field in the humanities or the social sciences. Candidates in this concentration must
take 18 hours in applied linguistics related courses including: WLLC 5063 Teaching Foreign Languages on the College Level, WLLC 5463 Descriptive Linguistics, CIED 5923 Second Language Acquisition, two applied linguistics seminars (WLLC 6553 to be repeated for a total of six hours), a qualitative and/or quantitative research methods course, depending on the candidate’s research project approved by the adviser, such as SOCI 5083 Applied Qualitative Research.

Courses
WLIT 5123. Survey of Russian Literature from Its Beginning to the 1917 Revolution. 3 Hours.
(Formerly WLIT 4123.) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English. Graduate degree credit will not be given for both WLIT 4123 and WLIT 5123. (Typically offered: Irregular)

WLIT 5133. Survey of Russian Literature Since the 1917 Revolution. 3 Hours.
(Formerly WLIT 4133.) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English with readings in English. Graduate degree credit will not be given for both WLIT 4133 and WLIT 5133. (Typically offered: Irregular)
This course is cross-listed with RUSS 5133.

WLIT 5193. Introduction to Comparative Literature. 3 Hours.
Literary theory, genres, movements, and influences. (Typically offered: Irregular)
WLIT 5523. The Quran as Literature. 3 Hours.
The Quran as literary text: its style and form, historical context, translation, issues, communities of interpretation, and comparative perspectives. Course’s integrated approach includes translations of literature originally in Arabic. All readings in English; students with reading abilities in Arabic encouraged to read original text. (Typically offered: Irregular)
WLIT 5623. The Bible as Literature. 3 Hours.
The several translations of the Bible; its qualities as great literature; its influence upon literature in English; types of literary forms. (Typically offered: Irregular)
This course is cross-listed with ENGL 5623.

WLIT 575V. Special Investigations on World Literatures and Cultures. 1-6 Hour.
Independent study of a special topic in world literatures and cultures. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WLIT 5993. African Literature. 3 Hours.
(Formerly WLIT 4993.) A study of modern African fiction, drama, poetry, and film from various parts of Africa in their cultural context. Works are in English or English translation. Graduate credit will not be given for both WLIT 4993 and WLIT 5993. (Typically offered: Irregular)

WLIT 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

WLIT 601V. Special Studies in Comparative Literature. 1-6 Hour.
Special studies in comparative literature. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WLIT 6703. Psychoanalysis and Culture. 3 Hours.
Readings of key tests in Psychoanalytic thought and cultural criticism including Freud, Lacan, Kristeva, Certeau, Zizek, and others. Selections of Psychoanalytic approaches to literature, film and gender and trauma studies. (Typically offered: Irregular)

WLIT 6713. Literature of Spain, 711-1615 C.E.. 3 Hours.
Examines the multiple cultural traditions of Spain between 711-1615 C.E. and train to produce scholarship pertinent to the field. Integrated approach includes English translations of literature originally in Arabic (50%+ of content), Hebrew, Spanish, French. Students with reading abilities in original languages encouraged to read original text. (Typically offered: Irregular)

WLIT 6803. Postcolonial Theory and Subaltern Studies. 3 Hours.
Seminar examining the geopolitical (imperial, colonial and national) implications of knowledge and culture. Selected readings of early postcolonial texts by Cesaire, Fanon, and Fernandez Retamar, as well as more recent texts by Said, Spivak, Bhabha, Mignolo, Beverly and Chakrabarty among others. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WLIT 690V. Seminar. 1-6 Hour.
Seminar. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WLIT 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Computer Science and Computer Engineering Website (http://computer-science-and-computer-engineering.uark.edu/)

Degrees Conferred:
M.S. in Computer Science (CSCE)
M.S.Cmp.E. in Computer Engineering (CENG)
Ph.D. in Engineering (CENG) (See Engineering (p. 162))

Graduate Certificates (non-degree):
Graduate Certificate in Cybersecurity (CYBR)

Primary Areas of Faculty Research: Distributed computer systems and networks, database security, computer security, digital forensics, big data security, hardware security, cyber-physical systems security, next-generation computer architectures, RFID information security, embedded systems, hardware/software co-design, low-power systems design, pervasive and mobile computing, image and video processing, natural language processing, biometrics, machine learning and deep learning, pattern recognition and machine intelligence, data mining, artificial intelligence, data privacy, computer-aided design.

M.S.Cmp.E. in Computer Engineering
Prerequisite to Degree Programs: The Computer Science and Computer Engineering Department offers two Master of Science degrees, one in Computer Science and one in Computer Engineering. Applicants to the Computer Science M.S. program should have a Bachelor of Science degree in computer science from an accredited program. Applicants to the Computer Engineering M.S. program should have a Bachelor of Science degree in computer engineering from an accredited program. Applicants
to either program whose transcripts do not show core courses relevant to the program to which they are applying will be assigned deficiency courses. All applicants must present acceptable scores on the General Test of the Graduate Records Examination (GRE).

Master of Science Degree Programs: The two M.S. degrees have common requirements in terms of the number of credit hours required. The two programs are differentiated by the student’s advisory committee. The advisory committee will approve courses that are appropriate for the student’s program and interests. Students enrolled in the computer engineering program can expect to take more courses with a hardware and systems emphasis, while students enrolled in the computer science program can expect to take more courses with an emphasis in software and theory. All rules and regulations of the CSCE Department, the College of Engineering, and the Graduate School must be followed.

Master of Science in Computer Engineering (C.S.Cmp.E.)

Degree Requirements: The thesis option (30 hours) requires the successful completion of at least six credit hours of CSCE 610V Master’s Thesis, plus 24 credit hours of course work approved by the candidate’s advisory committee. At least 15 of the 24 hours must be CSCE courses at the 5000 level. The remaining nine hours may include no more than six hours of transfer work, three hours of individual study, six hours from outside the department, and nine hours of courses at the 4000 level.

All master’s students completing the thesis option must pass an oral examination and defense of the thesis in, at most, two attempts. The first attempt may not occur before all of the following qualifying conditions have been satisfied:

- Candidate has completed at least 21 hours that are applicable toward the degree;
- Candidate is currently enrolled in CSCE 610V.
- Candidate’s cumulative grade-point average on all graduate-level courses is 3.0 or higher;
- Any deficiencies assigned upon admission to the program have been removed; Candidate must be continuously enrolled, except for summers, until the thesis is defended.

The final exam is comprehensive; a portion of the exam will be devoted to questions concerning courses completed by the student. Another portion of the exam will be directed toward a defense of the thesis. Reading copies of the thesis should be delivered to members of the Thesis Committee at least two weeks prior to undertaking the final examination. If a student is unsuccessful, the Program of Study committee may recommend that the examination be repeated. If so, the requirements to be satisfied prior to reexamination will be stipulated and a time limitation specified.

All other conditions that have been specified by the student’s advisory or thesis committee must be satisfied.

The course work option requires the successful completion of 33 credit hours of course work approved by the candidate’s graduate committee. At least 21 of the 33 hours must be CSCE courses at the 5000 level. The remaining twelve hours may include no more than six hours of transfer work, three hours of individual study, six hours from outside the department, and nine hours of courses at the 4000 level.

All master’s students completing the course work option must pass an oral examination of the course work in the final semester of enrollment of graduate-level courses and the following conditions have been satisfied:

1. The candidate’s cumulative grade-point average on all graduate-level courses is 3.0 or higher.
2. Any deficiencies assigned upon admission to the program have been removed.

Students who complete a B.S. degree in CSCE at the University of Arkansas, Fayetteville, with a cumulative GPA of 3.5 or greater may count up to six hours of CSCE graduate-level course work (5000 level) completed as an undergraduate student towards the graduate degree. Students must submit the “Request for Retroactive Graduate Credit” form to the Graduate coordinator in their first semester of graduate study.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Grade Requirements: Students in the master’s program in Computer Science or Computer Engineering must maintain grades at the B level of higher. Should a student receive a grade of C or lower, the student must immediately contact the student’s advisor and the Graduate Coordinator to discuss the consequences and options available. The graduate adviser and the CSCE graduate program coordinator will select the student’s classes for the following semester. If a second grade lower than B is received the student will be terminated from the program. The student may appeal the termination to the Graduate Studies Committee. If the student is allowed to remain in the program the student should expect to be required to repeat one or more classes in which a grade less than B was received as well as other possible requirements.

M.S.C.S. in Computer Science

Prerequisite to Degree Programs: The Computer Science and Computer Engineering Department offers two Master of Science degrees, one in Computer Science and one in Computer Engineering. Applicants to the Computer Science MS program should have a Bachelor of Science degree in computer science from an accredited program. Applicants to the Computer Engineering MS program should have a Bachelor of Science degree in computer engineering from an accredited program. Applicants to either program whose transcripts do not show core courses relevant to the program to which they are applying will be assigned deficiency courses. All applicants must present acceptable scores on the General Test of the Graduate Records Examination (GRE).

Master of Science Degree Programs: The two M.S. degrees have common requirements in terms of the number of credit hours required. The two programs are differentiated by the student’s advisory committee. The advisory committee will approve courses that are appropriate for the student’s program and interests. Students enrolled in the computer engineering program can expect to take more courses with a hardware and systems emphasis, while students enrolled in the computer science program can expect to take more courses with an emphasis in software and theory. All rules and regulations of the CSCE Department, the College of Engineering, and the Graduate School must be followed.

Master of Science in Computer Science (M.S.C.S.)

Degree Requirements: The thesis option (30 hours) requires the successful completion of at least six credit hours of CSCE 610V Master’s Thesis, plus 24 credit hours of course work approved by the candidate’s advisory committee. At least 15 of the 24 hours must be CSCE courses
at the 5000 level. The remaining nine hours may include no more than 6 hours of transfer work, 3 hours of individual study, 6 hours from outside the department, and 9 hours of courses at the 4000 level.

All master’s students completing the thesis option must pass an oral examination and defense of the thesis in, at most, two attempts. The first attempt may not occur before all of the following qualifying conditions have been satisfied:

- Candidate has completed at least 21 hours that are applicable toward the degree;
- Candidate is currently enrolled in CSCE 610V.
- Candidate’s cumulative grade-point average on all graduate-level courses is 3.0 or higher;
- Any deficiencies assigned upon admission to the program have been removed; Candidate must be continuously enrolled, except for summers, until the thesis is defended.

The final exam is comprehensive; a portion of the exam will be devoted to questions concerning courses completed by the student. Another portion of the exam will be directed toward a defense of the thesis. Reading copies of the thesis should be delivered to members of the Thesis Committee at least two weeks prior to undertaking the final examination. If a student is unsuccessful, the Program of Study committee may recommend that the examination be repeated. If so, the requirements to be satisfied prior to reexamination will be stipulated and a time limitation specified.

All other conditions that have been specified by the student’s advisory or thesis committee must be satisfied.

The course work option requires the successful completion of 33 credit hours of course work approved by the candidate’s graduate committee. At least 21 of the 33 hours must be CSCE courses at the 5000 level. The remaining 12 hours may include no more than 6 hours of transfer work, three hours of individual study, 6 hours from outside the department, and 9 hours of courses at the 4000 level.

All master’s students completing the course work option must pass an oral examination of the course work in the final semester of enrollment of graduate-level courses and the following conditions have been satisfied:

1. The candidate’s cumulative grade-point average on all graduate-level courses is 3.0 or higher.
2. Any deficiencies assigned upon admission to the program have been removed.

Students who complete a B.S. degree in CSCE at the University of Arkansas, Fayetteville, with a cumulative GPA of 3.5 or greater may count up to 6 hours of CSCE graduate-level course work (5000 level) completed as an undergraduate student towards the graduate degree. Students must submit the “Request for Retroactive Graduate Credit” form to the Graduate coordinator in their first semester of graduate study.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

**Graduate Requirements:** Students in the master’s programs in Computer Science or Computer Engineering must maintain grades at the B level of higher. Should a student receive a grade of C or lower, the student must immediately contact the student’s adviser and the Graduate Coordinator to discuss the consequences and options available. The graduate adviser and the CSCE graduate program coordinator will select the student’s classes for the following semester. If a second grade lower than B is received the student will be terminated from the program. The student may appeal the termination to the Graduate Studies Committee. If the student is allowed to remain in the program the student should expect to be required to repeat one or more classes in which a grade less than B was received as well as other possible requirements.

**Ph.D. in Computer Engineering**

**Requirements for the Doctor of Philosophy Degree:** In addition to the requirements of the Graduate School, the following departmental requirements must be satisfied by candidates for a Doctor of Philosophy degree with a concentration in either computer science or computer engineering.

A student is admitted to candidacy by first passing a Ph.D. Qualifying Examination and then, at a later time, a Candidacy Examination on the student’s dissertation proposal. The student must attempt the Ph.D. Qualifying Examination no later than the end of the first year of study for students admitted to the program with a master’s degree and no later than the end of the third year for students admitted to the program without a master’s degree.

The Qualifying Examination is scored Pass or Fail on each of the four sections of the examination. If a Fail is assigned on any section of the examination, then the student must repeat that section at the next administration of the examination. A second failure will terminate the student’s course of study in the doctoral program. In preparation for the Ph.D. Qualifying Examination, a student should refer to the CSCE Graduate Student Handbook.

Each student must form a doctoral advisory committee before registering for dissertation hours. This committee must consist of four faculty members who hold qualifying status on the graduate faculty. Three members, including the chair, must hold regular or adjunct appointments in the Department of Computer Science and Computer Engineering. The fourth member should be from outside the department.

For the Candidacy Examination, the student is expected to present a dissertation proposal. Committee members will judge the proposal on its scientific merit, originality, and difficulty. Each Ph.D. student is required to defend a completed dissertation before his or her dissertation committee.

**Summary:**

1. All students must complete a minimum of 72 semester hours of graduate-level credit beyond the bachelor’s degree, including a minimum of 42 semester hours of course work and a minimum of 30 semester hours of dissertation research credits.
2. A minimum of 30 semester hours of course work must be at the graduate level (5000 or above)
3. Upon recommendation of the student’s advisory committee, a student who has entered the Ph.D. program after a master’s degree may receive credit for up to 30 semester hours. If the 30 hours includes master’s thesis research, the advisory committee may credit up to six hours of thesis research toward the minimum dissertation research requirement.
4. Ph.D. students must complete a minimum of nine semester credit hours of course work in a set of coherent courses in a related subject area approved by the student’s advisory committee.
5. Students must earn a minimum cumulative grade-point average of 3.0 on all graduate courses attempted.
6. Ph.D. students must complete and defend a dissertation on a topic in the student’s major field of study.
Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

**Graduate Certificate in Cybersecurity**

**Program Description:** The Cybersecurity Graduate Certificate prepares students to protect valuable data assets and develop cyber-centric multidisciplinary security skills for predicting and avoiding cyber threats.

**Program Requirements:** Students are required to take 12 hours of coursework to complete the Cybersecurity Graduate Certificate.

### Graduate Faculty

**Andrews, David**, Ph.D. (Syracuse University), M.S., B.S.E.E. (University of Missouri-Columbia), Professor, 2008.

**Di, Jia**, Ph.D. (University of Central Florida), M.S., B.S. (Tsinghua University), Professor, 2004.

**Gauch, Susan E.**, Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen’s University, Canada), Professor, 2007.

**Gauch, John Michael**, Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen’s University, Canada), Professor, 2008.

**Huang, Miaqing**, Ph.D. (George Washington University), B.S. (Fudan University), Associate Professor, 2010.

**Li, Wing Ning**, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (University of Iowa), Professor, 1989.

**Li, Qinghua**, Ph.D. (Pennsylvania State University), M.S. (Tsinghua University), B.E. (Xi’an Jiaotong University), Assistant Professor, 2013.

**Liu, Xiaoling Frank**, Ph.D. (Texas A&M University), M.S. (Southeast University, China), B.S. (National University of Defense Technology, China), Professor, 2015.

**Luu, Khoa**, Ph.D. (Concordia University), Assistant Professor, 2018.

**Nelson, Alexander H.**, Ph.D. (University of Maryland), M.S., B.S. (University of Arkansas), Assistant Professor, 2017.

**Panda, Brajendra Nath**, Ph.D. (North Dakota St. University), M.S. (Utkal University, India), Professor, 2001.

**Parkerson, Pat**, Ph.D., B.S. (University of Arkansas), Associate Professor, 1990.

**Patitz, Matthew J.**, Ph.D., M.S., B.S. (Iowa State University), Associate Professor, 2012.

**Peng, Yarui**, Ph.D., M.S. (Georgia Institute of Technology), B.S. (Tsinghua University), Assistant Professor, 2017.

**Thompson, Dale R.**, Ph.D. (North Carolina State University), M.S., B.S. (Mississippi State University), Associate Professor, 2000.

**Wu, Xintao**, Ph.D. (George Mason University), M.E. (Chinese Academy of Space Technology), B.S. (University of Science and Technology), Professor, 2014.

### Courses

**CSCE 5013. Advanced Special Topics in Computer Science or Computer Engineering. 3 Hours.**

Consideration of current computer engineering or computer science topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

**CSCE 5033. Advanced Algorithms. 3 Hours.**

Design of computer algorithms, with primary emphasis on the development of efficient implementation. (Typically offered: Irregular)

**CSCE 5043. Advanced Artificial Intelligence. 3 Hours.**

In-depth introduction to AI. Topics include: philosophical foundations, cognition, intelligent agents, AI languages, search, genetic algorithms, first order and modal logic, inference, resolution, knowledge representation, ontologies, problem solving, planning, expert systems, uncertainty, probabilistic reasoning, fuzzy logic, machine learning, natural language processing, machine vision, and robotics. Prerequisite: CSCE 4613. (Typically offered: Irregular)

**CSCE 5053. Advanced Virtual Worlds. 3 Hours.**

In depth study of 3D multi-user virtual worlds covering application domains like retail and healthcare logistics, simulations, training, and gaming as well as platform architectures. Students will apply their knowledge of programming and data structures while using synthetic worlds to explore, model and script future smart worlds where computing is pervasive. (Typically offered: Irregular)

**CSCE 5063. Machine Learning. 3 Hours.**

An introduction to machine learning, with particular emphasis on neural network techniques. This course presents the basic principles underlying algorithms that improve with experience, and covers using them effectively for modeling data and making predictions. (Typically offered: Irregular)

**CSCE 5073. Data Mining. 3 Hours.**

This course surveys the most common methods used in data mining and machine learning. It involves several projects in which students will implement tools that are useful for mining knowledge from data and making predictions. The course will study both heuristic algorithms and statistical techniques. Prerequisite: CSCE 3193 and (INEG 2313 or STAT 3013). (Typically offered: Irregular)

**CSCE 5114. Embedded Systems. 4 Hours.**

(Formerly CSCE 4114.) The architecture, software, and hardware of embedded systems. Involves a mixture of hardware design and software for the control of a system (including electrical, electro-mechanical, and electro-chemical systems). They are found in a variety of products including cars, VCRs, HDTVs, cell phones, pacemakers, spacecraft, missile systems, and robots for factory automation. Graduate degree credit will not be given for both CSCE 4114 and CSCE 5114. Corequisite: Lab component. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Fall)

**CSCE 5133. Algorithms. 3 Hours.**

(Formerly CSCE 4133.) Provides an introduction to formal techniques for analyzing the complexity of algorithms. The course surveys important classes of algorithms used in computer science and engineering. Graduate degree credit will not be given for both CSCE 4133 and CSCE 5133. Prerequisite: CSCE 3193 and (MATH 2603 or MATH 2803) or MATH 4423. (Typically offered: Fall)

**CSCE 5173. Formal Languages and Computability. 3 Hours.**

(Formerly CSCE 4323.) Finite Automata and regular languages, regular expressions, context-free languages and pushdown automata, nondeterminism, grammars, and Turing machines. Church's thesis, halting problem, and undecidability. Graduate degree credit will not be given for both CSCE 4323 and CSCE 5173. Prerequisite: CSCE 4133 or CSCE 5133 (formerly CSCE 4133). (Typically offered: Spring)
CSCE 5163. Advanced Data Structures. 3 Hours.
(Formerly CSCE 4263.) This course continues the study of data structures, algorithmic analysis for these data structures, and their efficient implementation to support standard library in programming languages. Topics include: AVL trees, Red-Black trees, Splay trees, Optimal Binary Search trees, 2-3 tree, 2-3-4 tree, B-trees, Segment trees, Leftist Heaps, Binomial Heaps, Fibonacci Heap, Disjoint Set, Hashing, and big integer with hundreds to thousands of digits. Graduate degree credit will not be given for both CSCE 4263 and CSCE 5163. Prerequisite: CSCE 3193. (Typically offered: Irregular)

CSCE 5193. Concurrent Computing. 3 Hours.
(Formerly CSCE 4253.) Programming concurrent processes; computer interconnection network topologies; loosely coupled and tightly coupled parallelized computer architectures; designing algorithms for concurrency; distributed computer architectures. Graduate degree credit will not be given for both CSCE 4253 and CSCE 5193. Prerequisite: CSCE 3193. (Typically offered: Irregular)

CSCE 5203. Advanced Database Systems. 3 Hours.
Topics include: object databases, distributed databases, XML query, data warehouses, network as database systems, peer-peer data sharing architectures, data grids, data mining, logic foundations, semantic databases, spatial and temporal databases, and knowledge bases. Prerequisite: CSCE 4523 and graduate standing. (Typically offered: Irregular)

CSCE 5213. Bioinformatics. 3 Hours.
Application of algorithmic techniques to the analysis and solution of biological problems. Topics include an introduction to molecular biology and recombinant DNA technology, biological sequence comparison, and phylogenetics, as well as topics of current interest. Prerequisite: Instructor consent. (Typically offered: Irregular)

CSCE 5223. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both CSCE 4333 and CSCE 5223. Prerequisite: ELEG 3214 or ELEG 3933 and MATH 2584. (Typically offered: Fall)

CSCE 5233. Low Power Digital Systems. 3 Hours.
(Formerly CSCE 4233.) The reduction of power consumption is rapidly becoming one of the key issues in digital system design. Traditionally, digital system design has mainly focused on performance and area trade-offs. This course will provide a thorough introduction to digital design for lower consumption at the circuit, logic, and architectural level. Graduate degree credit will not be given for both CSCE 4233 and CSCE 5233. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular)

CSCE 5253L. Integrated Circuit Design Laboratory I. 3 Hours.
Design and layout of large scale digital integrated circuits. Students design, check and simulate digital integrated circuits which will be fabricated, and tested in I.C. Design Laboratory II. Topics include computer aided design, circuit timing, and wire delay. Prerequisite: CSCE 4333. (Typically offered: Irregular)
This course is cross-listed with ELEG 5253L.

CSCE 5263. Computational Complexity. 3 Hours.
Turing machines, recursion theory and computability, complexity measures, NP-completeness, analysis on NP-complete problems, pseudo-polynomial and approximation. (Typically offered: Irregular)

CSCE 5273. Big Data Analytics and Management. 3 Hours.
Topics include principles of distributed data computing and management, design and implementation of non-relational data systems, crowd sourcing and human computation, big data analytics and scalable machine learning, real-time streaming data analysis, and social aware computing. Prerequisite: CSCE 3193 and INEG 2313. (Typically offered: Irregular)

CSCE 5283. Graph and Combinatorial Algorithms. 3 Hours.
A study of algorithms for graphs and combinatorics with special attention to computer implementation and runtime efficiency. (Typically offered: Irregular)

CSCE 5293. Computer Architecture. 3 Hours.
(Formerly CSCE 4213.) The architecture of modern scalar and parallel computing systems. Techniques for dynamic instruction scheduling, branch prediction, instruction level parallelism, shared and distributed memory multiprocessor systems, array processors, and memory hierarchies. Graduate degree credit will not be given for both CSCE 4213 and CSCE 5293. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Spring)

CSCE 5313. Advanced Operating Systems. 3 Hours.
Concurrent processes and process communication; mutual exclusion and synchronization principles; kernel philosophy; resource allocation and deadlock; and case studies of specific operating systems. Prerequisite: CSCE 3613. (Typically offered: Irregular)

CSCE 5323. Computer Security. 3 Hours.
Study of a broad selection of contemporary issues in computer security. Topics include access control, security policies, authentication methods, secure system design, and information assurance. Prerequisite: CSCE 3613. (Typically offered: Irregular)

CSCE 5333. Computer Forensics. 3 Hours.
Various methods for identification, preservation, and extraction of electronic evidence at a computer crime scene. Specific topics include auditing and investigation of network and host intrusions, computer forensics tools, resources for system administrators and information security officers, legal issues related to computer and network forensics. Prerequisite: CSCE 5323. (Typically offered: Irregular)

CSCE 5343. Advanced Software Engineering. 3 Hours.
This course is about software metrics and models. It will focus on quantitative methods and techniques for management of software projects, design of software systems, and improvement of software quality. The material covered will be metrics and models used in the software lifecycle, such as software requirements metrics, design metrics, implementation metrics, testing metrics, effort estimation model. Prerequisite: CSCE 3513. (Typically offered: Irregular)

CSCE 5353. CPLD/FPGA-Based System Design. 3 Hours.
(Formerly CSCE 4353.) Field Programmable Logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Graduate degree credit will not be given for both CSCE 4353 and CSCE 5353. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular)

CSCE 5363L. Integrated Circuit Design Laboratory II. 3 Hours.
Students test the I.C. chips they designed in I.C. Design Laboratory I, and propose design corrections where needed. Topics include bipolar chip design, gate arrays, BiCMOS, memory design, design for testability, and dynamic & domino logic. Prerequisite: CSCE 5253L. (Typically offered: Irregular)
This course is cross-listed with ELEG 5263L.

CSCE 5423. Cryptography. 3 Hours.
(Formerly CSCE 4433.) This course provides a general introduction to modern cryptography. Topics include: stream ciphers, block ciphers, message authentication codes, public key encryption, key exchange, and signature schemes. Graduate degree credit will not be given for both CSCE 4433 and CSCE 5423. Prerequisite: CSCE 2014 with a grade of C or better and (MATH 2603 or MATH 2803). (Typically offered: Irregular)
CSCE 4543. Advanced Cryptography. 3 Hours.
This course provides an in-depth look into some facet of either cryptographic theory or the implementation of cryptography. Topics may include: the discrete logarithm problem, integer factorization, information theory, elliptic curves, lattices, pseudorandom number generators, zero-knowledge proofs, and quantum cryptography. Prerequisite: CSCE 4433 or instructor consent. (Typically offered: Irregular)

CSCE 5523. Database Management Systems. 3 Hours.
(Formerly CSCE 4523.) Introduction to database management systems, architecture, storage structures, indexing, relational data model, E-R diagrams, query languages, SQL, ODBC, transaction management, integrity, and security. Graduate degree credit will not be given for both CSCE 4523 and CSCE 5523. Prerequisite: CSCE 3193 or CSCE 3193H with a C or better. (Typically offered: Spring)

CSCE 5533. Advanced Information Retrieval. 3 Hours.
Study of the architecture, implementation, and evaluation of current information retrieval systems. Students will apply their knowledge of programming and data structures to implement a large system with an emphasis on efficiency and scalability. They will study current research in the field and implement individual or group projects on advanced topics. (Typically offered: Irregular)

CSCE 5543. Statistical Natural Language Processing. 3 Hours.
Introduction to statistical natural language processing (NLP). Covers the theory and algorithms needed for building NLP tools, provides broad coverage of mathematical and linguistic foundations, and detailed discussion of statistical methods for text mining and information extraction. Current research and applications of statistical NLP will be discussed. Prerequisite: CSCE 2014 and (STAT 3013 or INEG 2313). (Typically offered: Irregular)

CSCE 5553. Software Architecture. 3 Hours.
(Formerly CSCE 4543.) A study of software architecture through the use of case studies drawn from real systems designed to solve real problems from technical as well as managerial perspectives. Techniques for designing, building, and evaluating software architectures. Graduate degree credit will not be given for both CSCE 4543 and CSCE 5553. Prerequisite: CSCE 4133 or CSCE 5133 (formerly CSCE 4133) and CSCE 3513. (Typically offered: Irregular)

CSCE 5613. Artificial Intelligence. 3 Hours.
(Formerly CSCE 4613.) Introduction to intelligent agents, AI languages, search, first order logic, knowledge representation, ontologies, problem solving, natural language processing, machine vision, machine learning, and robotics. Graduate degree credit will not be given for both CSCE 4613 and CSCE 5613. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 5623. Secure Digital System Design. 3 Hours.
This course is to give graduate students an insight of contemporary security-related issues in modern digital systems. In addition to lectures, students will be practicing secure digital system design during a project. (Typically offered: Irregular)

CSCE 5633. Network Performance Evaluation. 3 Hours.
A study of performance modeling tools for telecommunication networks, computer networks, and wireless networks. Prerequisite: STAT 3013. (Typically offered: Irregular)

CSCE 5643. Computer Communications Networks. 3 Hours.
A study of computer communication networks, including the data link layer, routing, flow-control, local area networks, TCP/IP, ATM, B-ISDN, queuing analysis, and recent developments in computer communications. (Typically offered: Irregular)

CSCE 5653. Network Security. 3 Hours.
This course introduces security and secrecy in a networked environment. It is intended to familiarize students with the elements of secure communication, and how they inter-relate to provide secure networks in public and private settings. (Typically offered: Irregular)

CSCE 5663. Database Security. 3 Hours.
This is an advanced course covering security issues in database systems. Topics to be covered include discretionary and mandatory access control policies, multilevel secure database systems, auditing, data recovery, database intrusion detection, database insider threat, etc. Prerequisite: CSCE 4523. (Typically offered: Irregular)

CSCE 5673. Mobile Programming. 3 Hours.
(Formerly CSCE 4623.) An introduction to software development on mobile devices. The major topics covered in this course include underlying concepts and principles in mobile programming, as well as hands-on programming experience on mobile devices with an emphasis on smartphones. Graduate degree credit will not be given for both CSCE 4623 and CSCE 5673. Prerequisite: CSCE 3193 or CSCE 3193H. (Typically offered: Irregular)

CSCE 5683. Image Processing. 3 Hours.
The objective of this class is to give students a hands-on introduction to the fundamentals of image processing. A variety of image processing techniques and applications will be discussed including image enhancement, noise removal, spatial domain and frequency domain filtering, image restoration, color image processing, image compression, edge detection and image segmentation. Prerequisite: CSCE 4813. (Typically offered: Irregular)

CSCE 5693. Graphics Processing Units Programming. 3 Hours.
(Formerly CSCE 4643.) This course provides an introduction to massively parallel programming using Graphics Processing Units (GPUs). Topics include basic programming model, GPU thread hierarchy, GPU memory architecture, and performance optimization techniques and parallel patterns needed to develop real-life applications. Graduate degree credit will not be given for both CSCE 4643 and CSCE 5693. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 5703. Computer Vision. 3 Hours.
The objective of this course is to give students a hands-on introduction to the fundamentals of computer vision. Topics include image formation, object modeling, image processing, feature and edge detection, image segmentation, motion estimation, depth from stereo, shape description and object recognition. Prerequisite: CSCE 4813 or CSCE 5683. (Typically offered: Irregular)

CSCE 5753. Wireless Systems Security. 3 Hours.
Wireless systems such as wireless local area networks, cellular and mobile networks, and sensor networks are vulnerable to attacks. The goal of the class is for students to understand how to design secure wireless systems. Security topics include confidentiality, integrity, availability, privacy, and control of fraudulent usage of networks. Issues addressed include basic wireless theory, cryptography, threat modeling, risks, and mitigation techniques. (Typically offered: Irregular)

CSCE 5763. Privacy Enhancing Technologies. 3 Hours.
This course introduces privacy enhancing technologies and hot privacy topics in modern computing systems. Students will be exposed to many interesting privacy problems, study privacy enhancing technologies, and apply their knowledge to explore an open research problem in a research-oriented project. After completing this course, students will gain broad knowledge of the state-of-the-art privacy enhancing technologies and open research problems. They will also develop skills and enhance potentials to do research on privacy and security. (Typically offered: Irregular)

CSCE 5773. Computer Networks. 3 Hours.
(Formerly CSCE 4753.) This course is an introductory course on computer networks. Using the Internet as a vehicle, this course introduces underlying concepts and principles of modern computer networks, with emphasis on protocols, architectures, and implementation issues. Graduate degree credit will not be given for both CSCE 4753 and CSCE 5773. Prerequisite: INEG 2313. (Typically offered: Irregular)
CSCE 5813. Computer Graphics. 3 Hours.
(Formerly CSCE 4813.) Introduction to the theory and algorithms used in computer graphics systems and applications. Topics include: 2D and 3D geometric models (points, lines, polygons, surfaces), affine transformations (rotation, translation, scaling), viewpoint calculation (clipping, projection), lighting models (light-material interactions, illumination and shadow calculation). Students will implement their own graphics pipeline to demonstrate many of these techniques. Higher level computer graphics applications will be created using OpenGL. Graduate degree credit will not be given for both CSCE 4813 and CSCE 5813. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 5823. Multiprocessor Systems on Chip. 3 Hours.
This course covers the latest trends in advanced computer architecture for multiprocessor systems on chip for embedded and real time systems. Topics covered include multcore architectures, modeling abstractions, run time systems, and MIMD/SIMD heterogeneous architectures, Hw/Sw co-design techniques. Prerequisite: CSCE 3613 and CSCE 4213. (Typically offered: Irregular)

CSCE 5833. Computer Architecture Security. 3 Hours.
This course will cover fundamental principles and emerging implementation strategies to reason about, design and construct architecture level security capabilities in the manycore era. Coverage includes formal security models, new and emerging considerations for heterogeneous multiprocessor system on chip architectures, hardware and software implementation methods, operating systems for run time security enforcement. Prerequisite: CSCE 4213. (Typically offered: Irregular)

CSCE 5843. Reconfigurable Computing. 3 Hours.
This course will cover emerging and proposed techniques and issues in Reconfigurable Computing. Topics will include FPGA technologies, CAD/CAE tools, Hw/Sw co-design, system level synthesis, programming models and abstractions. Prerequisite: CSCE 4213 and CSCE 3613. (Typically offered: Irregular)

CSCE 5853. Information Security. 3 Hours.
(Formerly 4853.) This course covers principles, mechanisms, and policies governing confidentiality, integrity, and availability of digital information. Topics to be covered include security concepts and mechanisms, security policies, multilevel security models, system vulnerability, threat and risk assessment, basic cryptography and its applications, intrusion detection systems. Graduate degree credit will not be given for both CSCE 4853 and CSCE 5853. Prerequisite: CSCE 3193 or CSCE 3193H. (Typically offered: Irregular)

CSCE 590V. Advanced Individual Study. 1-3 Hour.
Advanced graduate level individual study directed by faculty in current research topics, state of the art, or advanced methodology in one of the major computer science or computer engineering areas. (Typically offered: Irregular)

CSCE 5914. Advanced Digital Design. 4 Hours.
(Formerly CSCE 4914.) To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Graduate degree credit will not be given for both CSCE 4914 and CSCE 5914. Corequisite: Lab component. Prerequisite: CSCE 2114 or ELEG 2904. (Typically offered: Irregular)

CSCE 5943. Computer Arithmetic Circuits. 3 Hours.
Examination of fundamental principles of algorithms for performing arithmetic operations in computers. This course provides sufficient theoretical and practical information to prepare the digital design engineer with an awareness of basic techniques for the realization of arithmetic circuits. (Typically offered: Irregular)

CSCE 5983. Application Specific Integrated Circuit Design. 3 Hours.
ASIC design is taught with emphasis on industrial preparation. Topics include ASIC technologies, design entry, simulation, and synthesis. Advanced design methods and techniques are studied for cell based and gate array ASICS. Prerequisite: CSCE 4213. (Typically offered: Irregular)

CSCE 610V. Master’s Thesis. 1-6 Hour.
Master’s thesis. (Typically offered: Fall and Spring) May be repeated for degree credit.

CSCE 620V. Post-Master’s Research. 1-18 Hour.
Post-master’s research. (Typically offered: Fall and Spring)

CSCE 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Counselor Education (CNED)
Kristin Higgins
Program Coordinator
106 Graduate Education Building
479-575-3329
Email: rhrcgrad@uark.edu

Degrees Offered:
M.S. in Counseling (CNSL)
Ph.D. in Counselor Education (CNED)

Program Description: The Counselor Education program at the University of Arkansas is committed to providing quality education and training for individuals pursuing counseling positions in a variety of settings. The M.S. and Ph.D. degrees are offered through the program. The M.S. degree in counseling offers four concentrations: Clinical Mental Health Counseling, School Counseling, Rehabilitation Counseling, and Addiction Counseling.

Common course requirements are specified for each emphasis. General requirements for M.S. and Ph.D. applicants are as specified in the Objectives, Regulations, and Degrees section of this catalog. Persons completing degrees in counselor education are eligible to apply for licensure as a Professional Counselor through the Board of Examiners in Counseling for the State of Arkansas and/or for various certifications through the State Department of Education and National Board for Certified Counselors. Persons intending to complete school counselor certification requirements for the state of Arkansas must, in addition to the master’s degree, meet certain Arkansas Department of Education requirements.

The Counselor Education Program’s M.S. in School Counseling, M.S. in Clinical Mental Health Counseling, M.S. in Rehabilitation Counseling and Ph.D. in Counselor Education are accredited by the Council for Accreditation of Counseling and Related Education Programs (CACREP).

Areas of Concentration: Clinical mental health counseling, school counseling, rehabilitation counseling, addiction counseling.

M.S. in Counseling with Addiction Counseling Concentration

Admission Requirements and Procedures for the Master of Science in Counseling Degree Program: Academic requirements include a 3.00 GPA on all undergraduate and also on any previous graduate course work. Applicants should submit a program application, three letters of professional recommendation, and a statement of professional goals to the Coordinator for Graduate Studies (GRAD 116). Applicants should first submit an application and official transcripts to the Graduate School. The applicant must be accepted by the Graduate School prior to consideration for admission into the Counseling Program and meet all graduate school requirements with the exception of standardized tests. Top applicants will be invited for a personal interview with Counselor Education faculty and
will be asked to submit a writing sample. Completed application deadlines are September 15 for spring admission and January 15 for summer/fall admission.

Ph.D. in Counselor Education
Admission Requirements and Procedures for the Doctor of Philosophy Degree: Applicants for the doctoral program in counselor education may obtain an application packet from the counselor education Web site: http://cned.uark.edu.

Doctoral applicants must:

1. Have a completed master’s degree in counseling or its equivalent in areas specified by the Council for Accreditation of Counseling and Related Education Programs (CACREP), and preferably one year post-master’s professional counseling experience or the equivalent.
2. Apply to the Graduate School.
3. Submit official transcripts reflecting a minimum 3.5 GPA on all previous graduate work.
5. Submit three letters of recommendation indicating capacity for advanced graduate study.
6. Submit an autobiographical sketch.
7. Submit a role-play recording demonstrating counseling skills.
8. Top applicants will be invited for a formal interview with the counselor education faculty.
9. All applicants must be accepted by the Graduate School prior to consideration for admission into the Counseling Program.

10. Complete applications are due September 15 for Spring admission and January 15 for Summer/Fall admission.

Requirements for the Doctor of Philosophy Degree: Candidates for the Doctor of Philosophy in counselor education must meet the requirements for the applicable degree in the Objectives, Regulations, and Degrees section of this catalog and complete a minimum of 69 semester hours of graduate study acceptable to their doctoral advisory committee.

3 credit hours of statistical elective course approved by the advisory committee

Cognate Requirement:

Doctoral students may choose cognate courses (total of 12 credit hours) in the areas of rehabilitation counseling, higher education, clinical counseling, or student's choice with advisory committee approval. Nine hours of courses must be at the 6000 level.

Other Requirements:

Dissertation (listed above), research and statistics (listed above).

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Doctoral Portfolio

Portfolios are developed with the guidance and approval of the doctoral advisory committee and are due at the time of the student’s oral comprehensive examination.

Graduate Faculty

Bilsard, Paul, Ed.D. (University of Arkansas), M.C., B.S., B.S. (Southwest Missouri State University), Clinical Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.

Christian, David, Ph.D., M.S. (University of North Texas), B.A. (University of Texas at Dallas), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.

Higgins, Kristin Kay, Ph.D., M.S. (University of Arkansas), B.A. (Vanderbilt University). Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2006.

Perryman, Kristi Leann, Ph.D. (University of Arkansas), M.S., B.S. (Southwest Missouri State University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.

Courses

CNED 5003. Counseling and Human Development. 3 Hours.

This course is intended to give students a broad overview of human nature/behavior through knowledge of lifespan developmental theory, personality development, modern & post-modern approaches to the study of human nature/behavior, and learning theory. Throughout the course, close attention will be given to human ecology or those social/historical/cultural/environmental forces furthering or impeding development. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CNED 5193. Clinical Mental Health Counseling. 3 Hours.

An introductory study of community counseling. The course content includes information concerning the educational, historical, philosophical, psychological foundations of community counseling as well as specific traits and skills of professional community counselors. In addition, the course is designed to provide introductory level concepts and skills required for future certification and licensure as counseling professionals. Prerequisite: Graduate student status. (Typically offered: Spring)

CNED 5203. Foundations of the Counseling Profession. 3 Hours.

A study of the counseling profession applicable to school, college and community agency settings. Introduction to the basic educational, historical, philosophical foundations of counseling as well as specific traits and skills of counselors. The course is also designed to provide beginning level concepts and skills required for certification and licensure. Prerequisite: Must be taken first year in program. (Typically offered: Fall and Summer)

CNED 5213. Lifestyle & Career Development. 3 Hours.

Theories of career development and counseling, including the use of occupational information sources and career assessment tools and techniques. Prerequisite: CNED 5333. (Typically offered: Summer)

CNED 5223. Introduction to School Counseling. 3 Hours.

Philosophy, organization, and practices of a counseling program in the elementary and secondary school. The school counselor's role as counselor, consultant, and coordinator, professional identity, and legal issues are included. Includes a significant focus on ethical standards and issues. (Typically offered: Irregular)

CNED 5303. Individual Appraisal. 3 Hours.

Analysis of concepts, methods, and procedures utilized in individual appraisal. (Typically offered: Fall)

CNED 5313. Program Organization and Information Management. 3 Hours.

This course addresses needs and strategies for effective development and management of school counseling programs and guidance curriculum. Prerequisite: CNED 5223. (Typically offered: Fall)
CNED 5323. Counseling Theory. 3 Hours.
Introductory survey and critical analysis of major alternative theoretical perspectives in counseling. (Typically offered: Fall and Summer)

CNED 5333. Basic Counseling Techniques. 3 Hours.
Introduction to basic counseling techniques and skills common to multiple theoretical perspectives. Prerequisite: Master's students in Counseling. (Typically offered: Fall and Spring)

CNED 5343. Counseling Practicum. 3 Hours.
Supervised counseling practice. CNED faculty consent required. Pre- or Corequisite: CNED 5303 and CNED 5363 and CNED 5373. Prerequisite: CNED 5203, CNED 5323, CNED 5333, CNED 5403. (Typically offered: Fall and Spring)

CNED 5353. Psychopharmacology. 3 Hours.
Study of theory, research, & practice issues pertaining to psychopharmacology for non-medical practitioners. Prerequisite: CNED 5203, CNED 5323, and CNED 5333. (Typically offered: Summer)

CNED 5363. Dynamics of Group Counseling. 3 Hours.
Therapeutic and other theoretical information is presented regarding group process and the counselor's role in that process. An experiential group experience is required. Prerequisite: CNED 5333 and CNED 5323. (Typically offered: Fall and Spring)

CNED 5373. Ethical and Legal Issues in Counseling. 3 Hours.
Review of ethical and legal standards governing professional counselor training, research, and counseling practice; including client rights; confidentiality; the client-counselor relationship; and counseling research, training, and supervision. Prerequisite: CNED 5003 and CNED 5203. (Typically offered: Summer)

CNED 5383. Crisis Intervention Counseling. 3 Hours.
Analysis and application of short-term counseling intervention strategies in crisis situations, with special attention to incidents involving rape, physical, or emotional abuse, divorce, suicidal depression, grief, marital or family instability, and violent conflict. Prerequisite: CNED 5333. (Typically offered: Fall)

CNED 5403. Diagnosis and Treatment in Counseling. 3 Hours.
Procedures in case management utilizing both clinical and interview data in assisting children, adolescents, and adults in educational, vocational, personal, and social planning. Prerequisite: CNED 5303, CNED 5323 and CNED 5333. (Typically offered: Fall and Spring)

CNED 5443. Vocational Rehabilitation Foundations. 3 Hours.
Survey of the philosophy of vocational rehabilitation, including history and legislation. (Typically offered: Fall)

CNED 5453. Medical Aspects of Disability. 3 Hours.
Orientation to medical and medically related aspects of various disabling conditions with emphasis on the severely disabled. (Typically offered: Spring)

CNED 5463. Rehabilitation Case Management. 3 Hours.
Counseling process in the rehabilitation setting. Focusing upon effective counseling strategies, representative cases, and effective case management methods. (Typically offered: Spring)

CNED 5473. Psychological Aspects of Disability. 3 Hours.
Intensive study of the psychological aspects of adjustment to atypical physique and prolonged handicapping condition. (Typically offered: Spring)

CNED 5483. Counseling Research. 3 Hours.
An in-depth examination of counseling research methodology and issues to prepare students to critically evaluate and use counseling research in their professional practice. (Typically offered: Fall, Spring and Summer)

CNED 5493. Principles and Practices of Psychiatric Rehabilitation. 3 Hours.
The course introduces students to the principles and practices of recovery-oriented, evidence-based psychiatric rehabilitation. Through lectures, guest presentations, films, discussions, and readings, students (a) explore the clinical, psychosocial, and vocational aspects of psychiatric disabilities and (b) examine psychiatric rehabilitation principles and practices to facilitate community integration and successful employment outcomes for individuals with psychiatric disabilities. (Typically offered: Fall)

CNED 5513. Counseling and Human Diversity. 3 Hours.
Examination of human and cultural diversity, emphasizing issues of race, class, and socioeconomic status, and how they impact our clients as individuals and as family and society members. (Typically offered: Summer)

CNED 5523. Process and Behavioral Addictions. 3 Hours.
This course provides an overview of non-substance related addictive disorders such as technology (e.g., video games, Internet, television), gambling, eating, sex, shopping/buying and work as well as potential treatment options for these disorders. (Typically offered: Summer)

CNED 5533. Placement of Persons with Disabilities. 3 Hours.
Focuses on placement theory and practice as they apply to persons who experience disabilities. Special attention is given to RehabMark approach. (Typically offered: Summer)

CNED 5574V. Counseling Internship. 1-9 Hour.
A 600-clock-hour field placement in an approved setting over a minimum of two continuous semesters. For students completing a counseling internship in a school setting, successful completion of a criminal background check is required before beginning internship. Pre- or Corequisite: CNED 5213. Prerequisite: CNED 5203, CNED 5303, CNED 5323, CNED 5333, CNED 5343, CNED 5363, CNED 5373, CNED 5403, CNED 5513. CNED faculty consent required. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

CNED 599V. Seminar. 1-6 Hour.
Seminar. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CNED 6003. Theories and Foundations of Addictions. 3 Hours.
A study of behavioral and substance addictions, including an overview of differential treatment. Prerequisite: CNED 5323 and CNED 5333, and admission to the CNED masters or doctoral program or departmental consent. (Typically offered: Spring and Summer)

CNED 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CNED 6013. Advanced Counseling Theory and Methods. 3 Hours.
Critical analysis of major theoretical perspectives in counseling, including both group and individual counseling strategies for dealing with affective, cognitive, and behavioral dysfunction. Prerequisite: CNED doctoral standing or permission. (Typically offered: Spring Even Years)

CNED 6023. Foundations of Marriage and Family Counseling Therapy. 3 Hours.
Comprehensive exploration of the current theories/techniques of marriage, family and couples counseling. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or permission. (Typically offered: Summer)

CNED 6033. Advanced Group Theory and Methods. 3 Hours.
Comparative study of theories and processes of group counseling. Includes supervised experience in group facilitation with video recording and playback. Prerequisite: CNED 5363 or equivalent and CNED doctoral or masters standing or permission. (Typically offered: Spring Odd Years)
CNED 6043. Supervision of Counselors. 3 Hours.
Analysis, assessment, and practical application of counselor supervision techniques in training and treatment programs. Prerequisite: CNED doctoral standing and CNED faculty consent (Typically offered: Fall Even Years)

CNED 605V. Independent Study. 1-18 Hour.
Independent study. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CNED 6073. Advanced Research in Counseling. 3 Hours.
This course involves acquiring a knowledge and understanding of the use of research in counseling and the development of new research in the counseling profession that has heuristic value. Prerequisite: Graduate standing. (Typically offered: Spring)

CNED 6083. Consultation Theory and Methods. 3 Hours.
Strategies, practical application, and techniques for effective consultation with parents, teachers, and community agencies. Prerequisite: CNED 5333 (preferred) CNED doctoral or masters standing or permission. (Typically offered: Summer)

CNED 6093. Counseling Children and Adolescents Through Play. 3 Hours.
Introduction to counseling children and adolescents through play; including the process, theories, techniques, and materials applicable to children and adolescents in a pluralistic society. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or permission. (Typically offered: Spring)

CNED 6113. Theory to Practice: Working with Co-occurring Disorders. 3 Hours.
This course is designed to demonstrate the application of theory to practice in the treatment of co-occurring disorders. Specifically, it is intended to carefully review current research and literature on counseling individuals presenting with both a substance abuse disorder and mental-emotional challenges. Prerequisite: Graduate or license eligible. (Typically offered: Summer)

CNED 6123. Clinical Applications of Marriage and Family Counseling and Therapy. 3 Hours.
Advanced clinical methodology appropriate for family counseling, marriage counseling, and couples counseling (in all settings), with emphasis on solution-focused systems, Satir model and psychoeducational family work in schools. Includes supervision of clinical experience in marriage, family and couples counseling, video recording and school/community outreach. Prerequisite: CNED doctoral standing or permission. (Typically offered: Fall Odd Years)

CNED 6133. Introduction to Play Therapy. 3 Hours.
This course is an introduction to the basic concepts of child-centered play therapy (CCPT). Students will learn the conceptual framework of child-centered play therapy, as well as the attitudes and skills necessary to establish and maintain facilitative relationships with children that encourage their self-expression and facilitate change. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or consent. (Typically offered: Irregular)

CNED 6223. Foundations of Counselor Education and Supervision. 3 Hours.
This course is designed to enhance the professional development and acculturation of doctoral students in order to facilitate their success in professional leadership roles of counselor education, supervision, counseling practice, and research competencies. Prerequisite: CNED Doctoral status or permission. (Typically offered: Spring Odd Years)

CNED 6233. Employment Practices and Interventions. 3 Hours.
An intensive study of the employment experiences of workers with disabilities with emphasis on disincentives and barriers to employment and interventions to enable people with disabilities to participate in employment. Prerequisite: RHAB 5493 or equivalent. (Typically offered: Irregular)

CNED 6243. Disability Policy in the U.S.. 3 Hours.
An analysis of public policy approaches to disability in the U.S. Examines the political and philosophical origins of disability policy; reviews major disability legislation and its effects on policy stakeholders; describes recent initiatives; and analyzes evolution of disability policy within context of changing societal, economic, and political conditions. (Typically offered: Fall)

CNED 6253. Advanced Psychosocial Aspects of Disability. 3 Hours.
A theoretical and applied study of techniques that enable people to cope with 2 major life events: disability and unemployment. (Typically offered: Fall Odd Years)

CNED 6343. Cultural Foundations and Counseling. 3 Hours.
To gain learning experiences in pedagogy relevant to multicultural issues and competencies, including social change theory and advocacy action planning. To identify current multicultural issues as they relate to social change theories, ethical and legal considerations, disability, gender, sexuality, social justice, and advocacy models. Prerequisite: CNED or RHAB Doctoral Standing or Permission. (Typically offered: Fall Even Years)

CNED 6413. Advanced Individual Appraisal. 3 Hours.
To provide advanced knowledge and experience with those psychoeducational instruments and procedures used in conducting school related assessment. Prerequisite: CNED 5303 or equivalent and CNED doctoral standing or permission. (Typically offered: Fall Odd Years)

CNED 6713. Advanced Counseling Practicum. 3 Hours.
Supervised counseling practice. A 100-clock hour approved practical counseling experience. Prerequisite: CNED doctoral standing and permission of CNED faculty and Clinical Coordinator. (Typically offered: Fall Odd Years)

CNED 674V. Internship. 1-18 Hour.
Supervised field placement (Clinical/Instructorship/Supervision/Research). Prerequisite: CNED doctoral standing, CNED faculty consent and CNED Clinical Coordinator consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CNED 699V. Seminar. 1-18 Hour.
Seminar. Prerequisite: CNED Doctoral standing or permission. (Typically offered: Summer) May be repeated for up to 18 hours of degree credit.

CNED 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy and consent. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Creative Writing (CRWR)

Dorothy Stephens
Department Chair of English

http://mfa.uark.edu

Degree Conferred:
M.F.A. (CRWR)

Program Description: The Master of Fine Arts program in Creative Writing offers degree tracks in poetry, fiction, and literary translation as well as the option of a focused study in rhetoric and composition.
The program's 60-hour curriculum enhances the workshop experience with coursework in craft and literary studies so that students develop their own creative voices alongside a deep understanding of the great writers and works that have come before them. The program's small class sizes and dedicated faculty — award-winning writers themselves — guarantee that students receive hands-on attention through their four years of study.

**M.F.A. in Creative Writing**

**Requirements for the Master of Fine Arts Degree in Creative Writing:** The program leading to the degree of Master of Fine Arts in Creative Writing provides graduate-level training in creative writing and in the study of literature.

**Required Courses:** 60 hours are required for the M.F.A. degree.

1. **Required Writing and Craft Courses**
   a. Writing Workshop (15 to 24 semester hours)
   b. Craft of Fiction, Poetry, or Translation (9 hours total: 6 hours in student's primary genre; 3 hours in second genre)
   c. Modern/Contemporary Fiction and Poetry (9 hours total: 6 hours in student's primary genre; 3 hours in second genre)

2. **Other Advanced Courses (4000-level or higher):** 18-30 hours of literature or approved courses, at least 3 hours of which must be a course that focuses on literature written prior to 1900 and 3 hours of which must be a literature course that emphasizes cultural diversity.

3. **Thesis Advising:** 6 hours.

**Thesis:** An M.F.A. thesis may be a collection of poems or stories or a novel. For students whose primary genre is Translation, the thesis will consist of a significant body of work (i.e., poems, stories, or a novel) translated from the original language into English. The thesis should be of the quality of those works currently published by national magazines, by literary journals, and by legitimate book publishers.

**Final Examination:** Each M.F.A. candidate must pass a one-hour oral examination and defense of the thesis. Awarding of the M.F.A. degree requires approval of the faculty committee.

**Grade Requirement:** Per Graduate School policy, M.F.A. candidates must present a minimum cumulative grade-point average of 2.85 on all graduate courses required for the degree in order to earn the M.F.A. Failing to earn such an average on the minimum number of hours, the student is permitted to present up to six additional course (not thesis) hours of graduate credit in order to accumulate a grade-point average of 2.85. In the computation of grade point, all courses pursued at this institution for graduate credit (including any repeated courses) shall be considered. Students who repeat a course in an endeavor to raise their grade must count the repetition toward the maximum of six additional hours. If a student encounters academic difficulty after having already completed six credit hours for the degree beyond the minimum degree requirements, no additional hours may be taken. Please note that the Graduate School calculates grade-point average on all graduate-level coursework displayed on the transcript.

All students working toward the degree will plan their specific programs in consultation with their advisers. All degree requirements must be completed within six consecutive calendar years from the date of first enrollment.

Find out more about the program at the Creative Writing website. (http://mfa.uark.edu/)

**Focused Study in Rhetoric and Composition**

Students earning the Master of Fine Arts in Creative Writing may choose Rhetoric and Composition as a field of focused study. Students who choose this option are required to do the following:

1. Take ENGL 5003 Composition Pedagogy; ENGL 5973 Advanced Studies in Rhetoric and Composition or ENGL 6973 Seminar in Rhetoric and Composition; and an additional graduate-level course in Rhetoric and Composition approved by the Director of Composition.

2. Teach five of the following writing courses offered by the English Department:
   - Any two courses from Category A
   - Any two courses from Category B
   - And any additional course from A, B or C

   **Category A**
   - ENGL 0002, ENGL 0013, ENGL 1013, ENGL 1023, ENGL 1023 (Special Topics)

   **Category B**
   - ENGL 2003, ENGL 1023, ENGL 1033, ENGL 3053

   **Category C**
   - ENGL 2013, ENGL 2023, ENGL 3013

3. Earn 10 professional development points from the Program in Rhetoric and Composition by engaging in any combination of the following activities:
   - Presenting research at any Rhetoric and Composition conference (three points)
   - Organizing or leading a PRC workshop (two points)
   - Participating in a PRC workshop (one point)
   - Coordinating a PRC course or project (three points)

**Graduate Faculty**

**Brock, Geoffrey Arthur,** Ph.D. (University of Pennsylvania), M.F.A. (University of Florida), M.A. (University of Pennsylvania), B.A. (Florida State University), Professor, Department of English, 2005.

**Davis, Geffrey,** Ph.D., M.F.A., M.A. (Penn State University), B.A. (Oregon State University), Assistant Professor, Department of English, 2014.

**Jensen, Toni,** Ph.D. (Texas Tech University), M.A., B.A. (University of South Dakota), Assistant Professor, Department of English, 2014.

**McCombs, Davis,** M.F.A. (University of Virginia), A.B. (Harvard), Professor, Department of English, 2002.

**Viswanathan, Padma,** M.F.A. (University of Arizona), M.A. (Johns Hopkins University), B.A. (University of Alberta), Associate Professor, Department of English, 2010.

**Crop, Soil and Environmental Sciences (CSES)**

Robert Bacon
Department Head
115 Plant Sciences Building
479-575-2354
Email: drkidd@uark.edu

Crop, Soil and Environmental Sciences Website (http://cses.uark.edu/)

**Degrees Conferred:**
M.S., Ph.D. (CSES)
**Areas of Study:** Crop sciences, soil sciences, and environmental sciences. Areas of specialization within these concentrations include plant breeding and genetics, biotechnology, water quality, environmental science, crop physiology, crop production, weed science, pesticide residue, seed technology, soil chemistry, soil classification, soil fertility, soil microbiology, and soil physics.

**Primary Areas of Faculty Research:** Environmental, soil, and water science (bioremediation, soil and water quality, microbial ecology, nutrient management, natural resource management using GIS); plant sciences (plant breeding and genetics, plant biotechnology, plant physiology, weed science), and agronomic production science.

**Prerequisites to Degree Programs:** While extensive undergraduate training in agriculture and physical and biological science is desirable, no specific prerequisites are required. Deficiencies in undergraduate major or prerequisites for advanced courses may be included in the student’s program.

**M.S. in Crop, Soil and Environmental Science Requirements for the Master of Science Degree:**

Minimum of 24 semester hours of course work as outlined by the student’s graduate advisory committee plus six semester hours of thesis credit. The student will be given an oral examination after the thesis is completed.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

**Ph.D. in Crop, Soil and Environmental Science Requirements for the Doctor of Philosophy Degree:** After a student has been admitted to the Graduate School and accepted by the department as being qualified for advanced work, the student is assigned to a major adviser. The major adviser will, in consultation with the department head, select a graduate committee. This committee will serve both in an advisory capacity for the student’s program and as the dissertation and examination committee. The student’s graduate advisory committee will determine the number of hours of course work to be completed for the degree.

The student must take candidacy examinations (prelims) in at least five fields of study after completing approximately two years of graduate study and at least one year before completing all other requirements. Preliminary examinations must be written and oral. Further details regarding requirements for the Doctor of Philosophy degree are available in the department office.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Savin, Mary Cathleen, Ph.D., M.S. (University of Rhode Island), B.S. (University of Notre Dame), Professor, 2002.
Scott, Robert C., Ph.D. (Mississippi State University), M.S., B.S. (Oklahoma State University), Professor, 2002.

Shan, Xueyan, Ph.D. (Louisiana State University), Associate Professor, 2012.

Shakiba, Ehsan, Ph.D., M.S. (University of Arkansas), M.S., B.S. (Azad University, Iran), Assistant Professor, 2015.

Sharpley, Andrew N., Ph.D. (Massey University, New Zealand), B.S. (University College of North Wales), Distinguished Professor, 2006.

Skinner, Jerral V., Ph.D. (University of Arkansas), Lecturer, 1990.

Slaton, Nathan A., Ph.D., M.S. (University of Arkansas), B.S. (Murray State University), Professor, 2001.

Srivastava, Vibha, Ph.D. (Jawaharlal Nehru University, New Delhi), M.S. (Govind Ballabh Pant University of Agriculture and Technology), B.S. (D.E.I. University), Professor, 2001.

W

Willet, Cammy, Ph.D., M.S. (University of Missouri), B.S. (Evangel University), Assistant Professor, 2016.

Wilson, Charles E., Ph.D., M.S. (University of Arkansas), B.S. (Arkansas State University), Professor, 2011.

Wood, Lisa S., Ph.D., M.S., B.S. (University of Arkansas), Clinical Assistant Professor, 2012.

Courses

CSES 5001. Weed Science Practicum. 1 Hour.
Training for membership on weed team, through participation. Prerequisite: Graduate standing. (Typically offered: Summer)

CSES 5013. Crop Physiology. 3 Hours.
Understanding and quantitative measurement of physiological processes, plant responses, and environmental parameters in relation to the production of crops. Prerequisite: BIOL 4303. (Typically offered: Fall Odd Years)

CSES 5023. Physiology of Herbicide and Plant Interaction. 3 Hours.
The reproduction, growth, and development of weeds and the ecological factors affecting these processes; development and mechanisms of herbicide resistance, flow of herbicide-resistance genes; and development of herbicide-resistant crops. Corequisite: Lab component. Prerequisite: CSES 4143 or CSES 5143 (formerly CSES 4143) and BIOL 4303 or CHEM 5813. (Typically offered: Spring Odd Years)

CSES 502V. Special Problems Research. 1-6 Hour.
Original investigations on assigned problems in agronomy. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

CSES 5033. Advanced Soil Fertility and Plant Nutrition. 3 Hours.
Study of water uptake, ion absorption, translocation and metabolism in higher plants. Lecture 3 hours per week. Prerequisite: BIOL 4303 and CHEM 2613 and CHEM 2611L. (Typically offered: Spring Even Years)

CSES 504V. Special Topics. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in agronomy. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

CSES 5053. Scientific Writing. 3 Hours.
Open to graduate students, especially those in agricultural and life sciences. The course will cover searching the scientific literature, writing theses, proposals, journal articles, and other scientific documents. Emphasis on style and techniques used in scientific publication. Lecture and workshop 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Irregular)

CSES 5073. Advanced Crop Science. 3 Hours.
Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Graduate degree credit will not be given for both CSES 4013 and CSES 5073. (Typically offered: Fall)

CSES 5093. Plant Breeding. 3 Hours.
(Formerly CSES 4103.) Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4103 and CSES 5093. Corequisite: Lab component. Prerequisite: ANSC 3123 or BIOL 2323. (Typically offered: Fall Even Years)

CSES 5103. Scientific Presentations. 3 Hours.
Experience in procedures required for professional presentations of scientific papers, seminars, posters; and research findings at meetings in conferences, and with discussion groups. Instruction in organization of materials, visual aids, and good speaking habits. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Fall)

CSES 5114. Soil Fertility. 4 Hours.
Study of the soil's chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4224 and CSES 5114. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003. (Typically offered: Fall)

CSES 5143. Principles of Weed Control. 3 Hours.
(Formerly CSES 4143.) Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current usage. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4143 and CSES 5143. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHEM 1071L. (Typically offered: Spring)

CSES 5214. Analytical Research Techniques in Agronomy. 4 Hours.
Preparation and analysis of plant and soil samples utilizing spectrophotometry, isotopes, and chromatographic separation methods. Additionally, measurements are made of photosynthesis, respiration, water relationships, light, and temperatures in whole plants. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: BIOL 4303 and CHEM 2613 and CHEM 2611L. (Typically offered: Fall Even Years)

CSES 5224. Soil Physics. 4 Hours.
Physical properties of soils and their relation to other soil properties, growth of plants and transport of water, oxygen, heat, and solutes such as pesticides and plant nutrients. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and MATH 1203. (Typically offered: Spring)

CSES 5233. Plant Genetic Engineering. 3 Hours.
Topics will be covered in the field of in vitro plant biology, transgene genetics and crop genetic engineering. Concepts and applications of transgenic plant technology will be discussed, with the emphasis on the strategies for crop improvement and gene discovery. Lecture 3 hours. (Typically offered: Spring Odd Years)

CSES 5253. Soil Classification and Genesis. 3 Hours.
(Formerly CSES 4253.) Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4253 and CSES 5253. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L. (Typically offered: Fall Odd Years)
CSES 5264. Microbial Ecology. 4 Hours.
A study of the microorganisms in soil and the biochemical processes for which they are responsible. Lecture 3 hours, laboratory 3 hours per week. Additional suggested prerequisites are BIOL 2013, CSES 2203, and ENSC 3003. Corequisite: Lab component. Prerequisite: BIOL 1543 and BIOL 3863 or ENSC 3223. (Typically offered: Fall Odd Years)

CSES 5303. Bioenergy Feedstock Production. 3 Hours.
(Formerly CSES 4303.) Overview of production and characteristics of cultivated crops, perennial grasses, and woody species as feedstocks for bioenergy. Fundamentals of plant growth factors, culture, harvest and storage, quality and improvement, and introduction to environmental impact, modeling, and resource utilization. Graduate degree credit will not be given for both CSES 4303 and CSES 5303. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203. (Typically offered: Spring)

CSES 5313. Crop Simulation Models in Research, Management and Policy. 3 Hours.
The basics of theory and practice of crop simulation models and their applications in crop research and management, and cropping systems planning and policy. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203 or consent of instructor. Courses in introductory chemistry and plant physiology are preferred. (Typically offered: Fall Even Years)

CSES 5323. Soil/Water Quality in Bioenergy Feedstock Production Systems. 3 Hours.
Examine concepts of soil and water quality in relation to bioenergy feedstock production, explore research related to biomass removal and by-product addition to soils, and examine the potential effects of proposed feedstock production systems on soil and water quality. Prerequisite: MATH 1203 and CSES 4203 or equivalent or consent of instructor, and CSES 4303 or CSES 5303 (formerly CSES 4303) preferred. (Typically offered: Fall Odd Years)

CSES 5453. Soil Chemistry. 3 Hours.
Application of the principles of chemistry to processes of agronomic and environmental importance in soils. Soil clay mineralogy, soil solution thermodynamics, structure and reactivity of humus, surface complexation and ion exchange, electro-chemical phenomena, and colloidal stability. Prerequisite: CSES 2203 and CSES 1203. (Typically offered: Spring Even Years)

CSES 5533. Wetland Soils. 3 Hours.
(Formerly CSES 4553.) This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicators and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Graduate degree credit will not be given for both CSES 4553 and CSES 5533. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V. (Typically offered: Spring Even Years)

CSES 5543. Plant Genomics. 3 Hours.
Plant genetics based on the study of whole genome sequence, transcriptome and proteome. Provides an overview of the principles and techniques of experimental and in silico genomics. Covers all areas of genome research including structural, comparative and functional genomics as well as proteomics. Prerequisite: CHEM 5843 or any graduate level genetics course. (Typically offered: Spring Odd Years)

CSES 5553. Forage-Ruminant Relations. 3 Hours.
Advanced chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake and digestion, and techniques of measuring forage utilization and systems analysis at the plant-animal interface. CSES 1203 recommended. Corequisite: Lab component. Prerequisite: ANSC 3143. (Typically offered: Spring Odd Years)
This course is cross-listed with ANSC 5553.

CSES 5653. Fate and Transport of Organic Contaminants. 3 Hours.
Fate and Transport of Organic Contaminants will present an overview of the transformation and transport processes that influence the environmental fate of organic contaminants, with an emphasis on agricultural pesticides. Biotic and abiotic factors influencing the movement and behavior of organic contaminants in soil and water will be covered extensively, with an emphasis on chemical mechanisms. Prerequisite: CHEM 1123 and CHEM 1121L and CSES 2203, or instructor consent. (Typically offered: Spring Odd Years)

CSES 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CSES 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Curriculum and Instruction (CIED)

Department of Curriculum and Instruction website (http://cied.uark.edu/)

Degrees Conferred:
M.A.T. in Elementary Education (p. 159) (ELED)
M.A.T. in Teacher Education (p. 338) (EDUC)
M.Ed. in Curriculum and Instruction (CIED)
M.Ed. in Career and Technical Education (p. 89) (CATE)
M.Ed. in Educational Equity (p. 148) (EDEQ)
M.Ed. in Educational Leadership (p. 149) (EDLE)
M.Ed. in Educational Technology (p. 152) (ETEC)
M.Ed. in Special Education (p. 326) (SPED)
M.Ed. in Teaching English to Speakers of Other Languages (p. 340) (TESL)
Ed.S. in Curriculum and Instruction (CIED)
Ed.S. in Educational Leadership (p. 149) (EDLE)
Ed.D. in Educational Leadership (p. 149) (EDLE)
Ph.D. in Curriculum and Instruction (CIED)

Graduate Certificates Offered (non-degree):
Applied Behavior Analysis (p. 326) (APBA)
Arkansas Curriculum/Program Administrator (p. 149) (ACPA)
Autism Spectrum Disorders (p. 326) (AUTS)
Building-Level Administration (p. 149) (PSBL)
District-Level Administration (p. 149) (PSDL)
STEM Education for Early Childhood (p. 365) (K-4) (STEM)

Additional Licensing Programs (ALP)
Middle-Level Education
Special Education (P-Grade 4)
Special Education (Grades 4-12)

Program Description: Graduate programs in the Department of Curriculum and Instruction focus upon advanced preparation of practitioners who may serve in a variety of roles in K-12 schools, higher
education, business, industry and clinical settings. Degrees and certificate programs focus on providing initial and/or additional licensure for teaching and educational leadership in K-12 schools. In addition doctoral degrees prepare practitioners for research, teaching and service roles in public education and/or higher education or positions with state, federal or community educational organizations.

Primary Areas of Faculty Research: The research areas of faculty vary widely based upon their area of expertise. Individual lines of inquiry range from a focus upon K-20 student, teacher, administrator and practitioner preparation and effectiveness, to content specific inquiry within the various sub-disciplines. Additional research areas cross disciplines with a focus on clinical applications and therapeutic interventions as well.

M.Ed. in Curriculum and Instruction

The M.Ed. in Curriculum and Instruction provides additional preparation for individuals who currently hold teaching credentials or for those who wish to further their professional development in specific content area or education-related field.

Admission to the Master's Degree: Students must apply to the UA Graduate School before consideration for admission. In addition to those requirements, students must provide two letters of recommendation and a personal statement. This statement should discuss their reasons for pursuing the degree as well as a discussion of an area of curricular interest, which will be the focus of their program of study. Students should have at least two years of experience in an education-related field before beginning the M.Ed. program.

Requirements for the Master of Education Degree (33 hours):

Required Courses

Research Tools and Foundations (9 credits)

Choose one of the following:

- CIED 5013 Measurement, Research and Statistical Concepts in the Schools
- CIED 5273 Research in Curriculum and Instruction
- CIED 5983 Practicum in Curriculum & Instruction

Choose one of the following:

- ESRM 5393 Statistics in Education and Health Professions
- ESRM 6533 Qualitative Research

Psycho-Sociological Foundations (6 credits)

CIED 5053 Multicultural Issues in Elementary Education 3

And one of the following:

- EDFD 5373 Psychological Foundations of Teaching and Learning
- EDFD 5673 Principles of Motivation
- CIED 5303 Adolescence and Learning

Pedagogical Foundations (6 credits)

CIED 5623 The School Curriculum 3

ETEC 5303 Learning with Computers in K-12 Classrooms 3

CATE 5543 Technology for Teaching and Learning 3

Interest Areas (All M.Ed. students must choose an interest area)(9 hours minimum)

Elementary Education

Select four of the following:

- CIED 5173 Literacy Assessment and Intervention
- CIED 5493 Teaching Social Studies
- CIED 5533 Teaching Language Arts
- CIED 5853 Issues in Mathematics Education
- CIED 6343 Advanced Science Teaching Methods

Gifted Education (9 hours basic program or 18 hours with endorsement)

CIED 6073 Seminar in Developing Creativity 3

CIED 6143 Differentiated Instruction for Academically Diverse Learners 3

CIED 6163 Social and Emotional Components of Gifted and Talented Students 3

Note: Individuals with a valid teaching certificate may take the following three additional courses in this area to earn an endorsement in Gifted and Talented Education. Please see adviser regarding this option.

- CIED 5803 Nature and Needs of the Gifted and Talented
- CIED 5813 Curriculum Development in Gifted and Talented
- CIED 5823 Gifted and Talented (Structured) Practicum

TESOL (9 hours basic or 12 hours with endorsement)

Choose three of the following:

CIED 5923 Second Language Acquisition 3

CIED 5933 Second Language Methodologies 3

CIED 5943 Teaching People of Other Cultures 3

CIED 5953 Second Language Assessment 3

Note: Individuals with a valid teaching certificate may take all four classes listed and earn an endorsement in English as a Second Language (ESL). Please see adviser regarding this option.

English Education

CIED 5843 Representations of American Education in Film 3

CIED 5983 Practicum in Curriculum & Instruction (Adolescent Literature) 3

ENGL 5973 Advanced Studies in Rhetoric and Composition 3

CIED 599V Special Topics (Issues and Trends in Literacy Education) 1-18

Science Education

CIED 6313 Issues, History, and Rationale of Science Education 3

CIED 6333 Nature of Science: Philosophy of Science for Science Educators 3

CIED 6343 Advanced Science Teaching Methods 3

Social Studies Education

CIED 5493 Teaching Social Studies 3

CIED 567V Teaching Foreign Cultures in Social Studies Curricula 1-6

CIED 5863 Teaching Global Issues 3

Integrated STEM Education

STEM 5033 Introduction to STEM Education 3

STEM 5023 Creativity and Innovation in STEM 3

STEM 5203 Problem-Based Mathematics 3

STEM 5213 Teaching Problem-Based Science in the Elementary Grades 3

Research Requirement for the M.Ed. Degree: Students are not required to complete a formal master's thesis but will take a class (such as
CIED 5013 or CIED 5273) that provides an introduction to education research and then design and carry out an action research project in CIED 5983 Practicum in Curriculum & Instruction. Following this two-course sequence, students will defend their project as the comprehensive exam for the degree. This project will be assessed by a faculty panel which will include the adviser for the student’s program and two other M.Ed. faculty members.

For students who have the experience and desire necessary to complete a formal thesis, this option exists. In such cases, students will form an advisory committee and then propose, write, and defend a thesis project. The successful defense of the thesis will represent the comprehensive exam for the M.Ed. degree. Students who choose the thesis option are not required to complete CIED 5013 or CIED 5273 or CIED 5983, but must take six hours of master’s thesis credit (CIED 600V) in place of these two courses.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

**Ed.S. in Curriculum and Instruction**

**Admission to the Program:** Students who wish to become candidates for the degree of Educational Specialist in Curriculum and Instruction are expected to first complete work equivalent to a master’s degree as determined by program faculty. In addition they must apply to be admitted to the Graduate School as well as be accepted into the program by the Department of Curriculum and Instruction. As part of the application process, the applicant will be asked to provide a brief narrative consisting of an overview of previous work and educational experiences, future goals and indicating the content interest area in which he or she will pursue. This information is used to match each student with an advisor with expertise in their desired area. Some content areas are offered fully online, while others require some or all of the coursework to be completed on campus.

**Program Requirements.** The program of study for the Ed.S. in Curriculum and Instruction consists of a minimum of 33 semester hours of graduate work beyond the master’s degree. This consists of a required 9 semester hours of Curriculum and Instruction Core; 9 semester hours of Research Core and requirements for the students designated content area of interest (12-18 semester hours). Each student is also required to complete a 3 semester hour Ed.S. Project which is an investigation or inquiry of the students own design which demonstrates their capacity to design, implement and evaluate an intervention independently. A grade-point average of 3.25 is required for the Educational Specialist degree program on all graduate hours completed.

Students should also be aware of Graduate School requirements with regard to specialist degrees (p. 461).

**Ph.D. in Curriculum and Instruction**

The Ph.D. in Curriculum and Instruction is a post master’s degree that focuses upon the development of theoretical knowledge, research skills and the application of research in guiding investigations and improving practice. This degree provides advanced study and preparation for individuals who wish to pursue roles as higher education professors and/or researchers and/or serve in a leadership role in a variety of educational/clinical settings.

**Admission to the Ph.D. Program in Curriculum and Instruction**

Students must first apply to the UA Graduate School and then to the Department of Curriculum and Instruction where the final admission decision is made by the following deadlines:

- **December 1** - Fall admission for students seeking Graduate Assistantships
- **April 1** - Summer admission or fall admission for students not seeking Graduate Assistantships
- **October 1** - Spring Admission

The decision to admit a student to graduate study particularly at the PhD level is multi-faceted. It involves not only a review of the students’ qualifications but also the department’s capacity to help each student achieve their specific personal and career goals. We expect our successful applicants to have an earned master’s degree and a solid GPA and GRE scores at or above the 50th percentile (approximately 149 in Quantitative and 151 Verbal Reasoning ). However, the final decision is not based solely on any single indicator, but rather through a holistic evaluation of the potential student’s application materials. Students bypass full Ph.D. Admission Committee review if they meet the following minimum criteria:

- GRE Scores at the 50th percentile or above in all three areas
  - Quantitative
  - Verbal
  - Writing
- Master’s degree G.P.A. of 3.5 or above
- An available faculty mentor in the desired area of interest
- Minimum of three years full-time professional teaching experience, clinical experience, or equivalent employment experiences prior to the application to the doctoral program.
- Favorable faculty mentor reviews of:
  - Writing sample which demonstrates professional writing competency
  - Letters of recommendation
  - Three years of field related experience in the desired area of interest

Students who do not meet these minimum requirements can still be admitted if their applications are approved by the Ph.D. Admissions Committee. Review by the Graduate Admissions Committee is required for any student who wishes to be considered for a Graduate Assistantship/Fellowship. Graduate Assistantships are awarded by the CIED Department Head in consultation with the Ph.D. Admissions Committee. GA positions are limited, and are not necessarily available to the department each year. Preference is given to candidates who would also have a strong case for a Doctoral Fellowship. More information regarding the fellowships is available here (http://graduate-recruitment.uark.edu/funding-degree/fellowships.php).
In addition to the Graduate School application requirements, students applying for the Ph.D. in Curriculum and Instruction must also submit the following through the application portal:

1. Resume or CV: Current resume or CV that outlines prior educational and professional experience.

2. Statement of Purpose: Brief personal narrative that describes applicant’s personal, educational, and professional goals. Statements of Purpose typically include educational interests, future career plans, research interests, and a description of how a Ph.D. in Curriculum and Instruction will facilitate those goals.

3. Writing Sample: Original writing sample (20 page maximum) that illustrates applicant’s ability to communicate in a clear and creative fashion. Writing samples can take many forms, both educational and professional, as long as they provide the department with an accurate representation of the applicant’s writing style and ability.

**Requirements for the Doctor of Philosophy Degree**

Candidates for the Doctor of Philosophy degree must meet the general University degree requirements and complete a minimum of 102 semester hours of graduate study approved by the Doctoral Advisory Committee. The program of study for the Doctor of Philosophy candidate must include the following:

<table>
<thead>
<tr>
<th>Approved Master degree program</th>
<th>33</th>
</tr>
</thead>
</table>

**Curriculum and Instruction Core Courses**

<table>
<thead>
<tr>
<th>CIED 6013</th>
<th>Curriculum Theory, Development, and Evaluation</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIED 6023</td>
<td>Instructional Theory</td>
</tr>
</tbody>
</table>

6 hours chosen from:

| CIED 6043 | Analysis of Teacher Education |
| CIED 605 | Curriculum and Instruction: Learner Assessment and Program Evaluation |
| CIED 613 | Trends and Issues in Curriculum and Instruction |
| CIED 660 | Multicultural Education |

**Inquiry Core Courses**

| ESRM 6403 | Educational Statistics and Data Processing |
| CIED 5313 | Principles of Qualitative Research in Curriculum & Instruction |
| CIED 6443 | Mixed Methods Research |
| ESRM 6413 | Experimental Design in Education |

3 hours 5000-/6000-level inquiry course

**Research Capstone**

| CIED 674V | PhD Research Internship |
| CIED 6623 | Research Methods and Scholarship in Curriculum and Instruction |

**Electives from student’s area of interest in CIED**

| Educational Technology |
| English Education |
| Gifted Education |
| Literacy |
| Math Education |
| Science Education |
| Social Studies Education |
| TESOL |

Cognate coursework

<table>
<thead>
<tr>
<th>Dissertation</th>
<th>18</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIED 700V</td>
<td>Dissertation</td>
</tr>
</tbody>
</table>

Total Hours 102

1 As approved by Doctoral Advisory Committee.

2 Students must be continuously enrolled after successful completion of candidacy exam and must be enrolled in at least one dissertation credit during term in which dissertation is defended.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

**Graduate Faculty**

**B**

Barth, Daniel, Ph.D., M.A. (Claremont Graduate University), B.S. (Eureka College), Clinical Assistant Professor, 2014.

Beasley, Jennifer G., Ed.D. (University of Virginia), M.A. (Wichita State University), B.A. (Kansas State University), Clinical Associate Professor, 2009.

Beck, Dennis E., Ph.D. (University of Florida), B.S. (Pennsylvania State University), Associate Professor, 2010.

Bell, Karmen V., M.Ed. (Indiana Wesleyan University), Clinical Instructor, 2015.

Bengtson, Ed, Ph.D. (University of Georgia), Ed.S. (George Washington University), M.A. (California State University-Sacramento), B.S. (Pennsylvania State University), Associate Professor, 2010.

Bowles, Freddick A., Ph.D., M.A. (University of Arkansas), B.A. (Arkansas State University), Associate Professor, 2004.

Brady, Kevin P., Ph.D. (University of Illinois-Champaign-Urbana), M.A. (Columbia University), B.A. (Binghamton University), Associate Professor, 2014.

**C**

Carter, Vinson R., Ph.D., M.A.T., B.S. (University of Arkansas), Associate Professor, 2008.

Collet, Vicki S., Ph.D. (State University of New York at Buffalo), M.A. (University of Northern Colorado), B.A. (University of Utah), Associate Professor, 2012.

Collins, Kathleen, Ph.D., M.A., B.A. (University of California-Santa Barbara), Professor, 2002.

Connors, Sean P., Ph.D. (The Ohio State University), M.S. (Elmira College), B.A. (SUNY Geneseo), Associate Professor, 2010.

**D**

Daugherty, Michael, Ed.D., M.S., B.S. (Oklahoma State University), Assistant Professor, 2005.

Deaton, Sheri, M.A.T., B.S. (University of Arkansas), Instructor, 2016.

**E**

Ellers, Linda Hale, Ph.D. (Louisiana State University at Shreveport), M.Ed., B.S.E. (University of Arkansas at Little Rock), Clinical Associate Professor, 2001.

Elsass, Angela Carlton, Ed.D., Ed.S. (University of Arkansas), M.Ed. (Harding University), B.S.E. (University of Central Arkansas), Clinical Associate Professor, 2010.

Endacott, Jason L., Ph.D., M.S. (University of Kansas), B.S. (Kansas State University), Associate Professor, 2011.
CIED 5053. Multicultural Issues in Elementary Education. 3 Hours.
This course provides an introduction to the major concepts and issues related to multicultural education in elementary classrooms. The ways in which race, class, gender and exceptionality influence students' behavior are discussed. Prerequisite: Admission to graduate school. (Typically offered: Spring Odd Years; Summer)

CIED 5063. Disciplinary and Interdisciplinary Literacies in Education. 3 Hours.
This course teaches the integration of reading, writing, and new literacies within the discipline and across disciplines. Theory and strategy are presented as integrated strands of the language process as presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the focus on practical application. Prerequisite: Admission to Teacher Education M.A.T. Program. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

CIED 5073. Action Research in Elementary Education. 3 Hours.
Provides the students with experience in conducting case studies and action research related to childhood education. In addition, students gain knowledge regarding practices used in ethnographic research. Prerequisite: Admission to M.A.T. program. (Typically offered: Spring)

CIED 508V. Elementary Education Cohort Teaching Internship. 1-6 Hour.
Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 5093. Methods of Instruction for Middle Level I. 3 Hours.
A study of methods and materials in the special content areas (math, science, English/language arts, and social studies). The planning of instruction, microteaching, and the development of middle school instructional materials are included. Prerequisite: Admission to M.A.T. program. (Typically offered: Summer)

CIED 5103. Advanced Middle Level Principles. 3 Hours.
An in-depth examination of recent research on the major issues, practices, and policies for middle level education. Emphasis is on analysis of cutting edge issues germane to the life, education, and welfare of the early adolescent via the integration of theory and practice. Prerequisite: Admission to Masters of Arts in Teaching program. (Typically offered: Spring)

CIED 5113. Reading in Middle Schools. 3 Hours.
An overview of methods and materials for teaching reading to early adolescents. Reflective activities and site-based field experiences are integrated with course content to provide continuity between theory and practice. Portfolio expectations will be a primary means of course evaluation. Prerequisite: Admission to the middle level education program and CIED 3113. (Typically offered: Fall, Spring and Summer)

CIED 5123. Writing Process Across the Curriculum (Middle Level). 3 Hours.
This course will provide an overview of the research, and methods for incorporating writing across all curriculum. Writing as a process will be emphasized. Reflective activities and site-based field experience will be integrated into the course content. Prerequisite: Admission to M.A.T. Program. (Typically offered: Fall, Spring and Summer)

CIED 5132. Research in Middle Level Curriculum and Instruction. 2 Hours.
An introduction to inquiry and research in middle level curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Practicum in educational research and evaluation is done as part of the class. Prerequisite: Admission to the MAT program. (Typically offered: Fall)

CIED 5143. Internship: Middle Level. 3 Hours.
The internship for middle level education is an extended field experience in which a pre-service teacher integrates knowledge and skills developed in education classes with practice in the field. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)

CIED 5153. Creativity in Daily Practice. 3 Hours.
(Formerly CIED 4083.) Arts integration course including the ideas, design, and implementation of practices in the classroom, board room, and professional field that enrich the experiences of all stakeholders while building right-brain thinking skills for the new millennium. Graduate degree credit will not be given for both CIED 4083 and CIED 5153. (Typically offered: Spring Even Years) May be repeated for up to 6 hours of degree credit.

CIED 5162. Applied Practicum. 2 Hours.
Provides laboratory experiences for CIED 5173 (Literacy Assessment and Intervention) and CIED 5183 (Readings in Early Childhood Education). Corequisite: CIED 5183 and CIED 5173. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall)

CIED 5173. Literacy Assessment and Intervention. 3 Hours.
Focuses on assessment of young children's literacy skills. Techniques discussed include informal observation, miscue analysis, and portfolio assessment. Prerequisite: Admission to graduate school. (Typically offered: Fall and Summer)

CIED 5183. Readings in Early Childhood Education. 3 Hours.
Will continue to develop understandings of classic studies and will explore the impact these have had on the most recent issues in early childhood education. Prerequisite: Admission to the CHED M.A.T. (Typically offered: Fall)

CIED 5193. Methods of Instruction for Middle School II. 3 Hours.
Second special methods course for teaching at the middle level. Emphasizes further refinement of teaching skills and methods; the integration of the sciences, mathematics, and technology; science, technology, and society (STS) issues; and the integration of social studies and English language arts. Prerequisite: CIED 5093 and admission to the M.A.T. program. (Typically offered: Fall)

CIED 5203. English Language Arts/Speech & Drama Methods of Instruction. 3 Hours.
This course provides an introduction to teaching English language arts (ELA) and speech/drama in the context of elementary, middle and high school settings. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching the content area provide the major tenets of instruction. (Typically offered: Summer)

CIED 5213. Issues and Trends in Literacy. 3 Hours.
This course provides an examination of practices to teaching literacy, broadly defined. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching provide the major tenets of instruction. Prerequisite: Admission to M.A.T. (EDUCMA) Secondary program or instructor consent. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

CIED 5223. Learning Theory. 3 Hours.
This course provides the student with information about foundational issues in education, including history and philosophy of American Education, psychological and social theories of education, characteristics of learners, and learning processes. Prerequisite: Admission to M.A.T. degree program. (Typically offered: Summer)

CIED 5232. Interdisciplinary Studies. 2 Hours.
Introduction to the nature of interdisciplinary study: curricular content, course planning (topics and themes), instructional strategies, and evaluation and assessment. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)

CIED 5243. The Moral Mind in Action. 3 Hours.
(Formerly CIED 4433.) The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed. Graduate degree credit will not be given for both CIED 4433 and CIED 5243. (Typically offered: Fall)
CIED 5253. Moral Courage. 3 Hours.
(Formerly CIED 4443.) Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. Graduate degree credit will not be given for both CIED 4443 and CIED 5253. (Typically offered: Spring)

CIED 5263. Assessment, Evaluation, and Practitioner Research. 3 Hours.
A study of assessment, testing, and evaluative procedures in classrooms including types of tests, abuses of tests, test construction, scoring, analysis and interpretation, statistical methods, and alternative evaluation and assessment techniques. Classroom-based data collection and analysis. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall)

CIED 5273. Research in Curriculum and Instruction. 3 Hours.
An introduction to inquiry and research in curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Qualitative method in assessment and evaluation are considered. Practicum in educational research and evaluation is done as part of the class. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)

CIED 528V. Teaching Experience. 1-6 Hour.
The teaching experience is an essential component of the Masters of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to the M. A. T. Program. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 5293. Special Methods, Interdisciplinary Section. 3 Hours.
The third and final part of the middle level special methods course. Provides interns with the knowledge, dispositions, and skills for developing an interdisciplinary course of study in conjunction with the members of their interdisciplinary team. Prerequisite: CIED 5093 and admission to M.A.T. program. (Typically offered: Spring)

CIED 5303. Adolescence and Learning. 3 Hours.
Study of the developmental characteristics (physical, emotional, social and intellectual) of early and late adolescence (ages 10-18; grades 5 to 12). The progression from early to late adolescence and the implications this evolution has for learning, motivation, instruction and classroom practices are emphasized. Prerequisite: PSYC 2003. (Typically offered: Spring)

CIED 5313. Principles of Qualitative Research in Curriculum & Instruction. 3 Hours.
Designed specifically for aspiring qualitative researchers who wish to conduct research in settings unique to curriculum and instruction. Methods of research design, data analysis, and writing for publication will be emphasized. Strongly recommended for graduate students who are considering a qualitative thesis or dissertation in curriculum and instruction. (Typically offered: Spring Odd Years)

CIED 5323. Transition Planning for Persons with Disabilities. 3 Hours.
Prepares students to plan, evaluate, and implement transition programs within both regular and special classrooms at the elementary, middle and secondary school levels. (Typically offered: Spring)

CIED 5333. Curriculum Theory and Development for Educators. 3 Hours.
The design and adaptation of curriculum for students in regular and special K-12 classrooms. Theoretical bases and curriculum models are reviewed. Concurrent clinical experiences in each area of emphasis are included. Prerequisite: Admission to the M.A.T. program. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

CIED 5353. Teaching Students with Diverse Needs in Middle Education Settings. 3 Hours.
To provide future scholar-practitioners with a knowledge base concerning the issues involved in the successful instruction of persons with special learning needs during middle school years. (Typically offered: Irregular)

CIED 5363. Methods and Assessment in K-12 Online Teaching. 3 Hours.
The study of curriculum, instructional methods and assessment techniques to facilitate student learning in K-12 virtual and hybrid teaching environments. Students enrolled in the course will be required to demonstrate knowledge of prevalent and relevant models of K-12 curriculum, web-based instructional methods, assessment techniques and utilize tools for the development and implementation of effective instruction in the K-12 virtual classroom. Prerequisite: Graduate standing. (Typically offered: Fall)

CIED 5393. Introduction to Linguistics. 3 Hours.
This course is an introduction to human language. The goal is to understand what it means to speak a language, including an introduction to phonetics and phonology (specifically the sound system of American English), morphology (the rules of English at the word level), syntax (rules that govern sentence level language), semantics (meanings of words) and sociolinguistics (or the study of language use in its social context). (Typically offered: Fall)

CIED 5403. Early Childhood Education: Rationale and Curriculum. 3 Hours.
Rationale and curriculum of an early childhood education program, with special attention given curricular frameworks and professional organization policies. (Typically offered: Irregular)

CIED 5423. Curriculum and Instruction: Models and Implementation. 3 Hours.
The study of models of curriculum and instruction and their implementation to facilitate student learning in a variety of instructional environments. (Typically offered: Spring)

CIED 5433. Methods and Materials for Teaching Children’s and Adolescent Literature. 3 Hours.
Issues and trends in children’s literature. Contemporary works are evaluated and reviewed based on changing social political conditions. Multicultural approach to children’s literature is emphasized. Prerequisite: Undergraduate course in children’s literature. (Typically offered: Irregular)

CIED 5443. Methods of Teaching Foreign Language K-12. 3 Hours.
Study of the methods and materials in the teaching of foreign language in K-12 settings as well as the theories of second language acquisition. Includes philosophical, cognitive, and psychological dimensions of teaching foreign languages. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the MAT program. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

CIED 5453. Evaluation Techniques. 3 Hours.
Evaluation of learning using traditional means of assessment as well as alternative or authentic assessment techniques. (Typically offered: Irregular)

CIED 5461. Capstone Research Seminar. 1 Hour.
This course provides students with basic knowledge and practical skills in understanding, utilizing and implementing a research design project with a focus in the discipline of curriculum and instruction with particular emphasis of some aspect of teaching and/or learning. As a part of this course students will design, conduct and report the results of an action research study undertaken in the teaching internship. Prerequisite: Admission to M.A.T. program. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

CIED 5483. Teaching Mathematics. 3 Hours.
Content, methods, and materials for teaching multiple strands of elementary school mathematics. Emphasis on principles and procedures of a conceptual and integrated approach to learning mathematics. Prerequisite: Undergraduate coursework in teaching elementary or early childhood mathematics. (Typically offered: Irregular)
CIED 5493. Teaching Social Studies. 3 Hours.
Purpose, content, psychology, materials, and methods for teaching the social sciences in the elementary school. Emphasis on principles and procedures for combining the social studies with other areas of the curriculum in broad unit instruction. Prerequisite: Undergraduate coursework in teaching elementary or early childhood social studies. (Typically offered: Irregular)

CIED 5503. Teaching Science. 3 Hours.
The influence of science on the community, on the home, and the child. Use of science in the living and learning of the child at school. (Typically offered: Spring and Summer)

CIED 5513. Sound System of American English. 3 Hours.
This course will study the structure and development of American English (AE). Topics include: 1) the structure/systems of American English pronunciation, 2) vowels, 3) consonant system (including such features as minimal pairs, 4) prosody, intonation, rhythm, and stress, and 5) regionalism and social varieties, and 6) pedagogical approaches to teaching the features of American English. (Typically offered: Fall)

CIED 5523. Instructional Practices in Teaching Foreign Language. 3 Hours.
A pedagogical studies course based on the theoretical and practical aspects of methods, techniques, and materials for effective teaching of foreign languages in K-12 schools. Prerequisite: Admission to M.A.T. Program. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

CIED 5533. Teaching Language Arts. 3 Hours.
The place of the language arts in the elementary curriculum. Exploration of materials, content, practices, and methods, used in reading, speaking, listening, and writing experiences. (Typically offered: Spring)

CIED 5543. Structures of American English. 3 Hours.
This course provides an introduction to the grammars of English, including (but not restricted to traditional, structural, and transformational-generative (universal grammar). It includes approaches to the teaching of all types of grammars. (Typically offered: Spring)

CIED 5553. Social Justice and Multicultural Issues in Education. 3 Hours.
This seminar provides an introduction to the major concepts and issues related to multicultural education and social justice in education and the ways in which race, ethnicity, class, gender, and exceptionality influence students' behavior. The course also examines the intersection of teacher and student perceptions of identity, schooling, and the effects on educational systems. Prerequisite: Admission to M.A.T. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

CIED 5563. Teaching Internship/Action Research. 3 Hours.
During this course, Master's candidates will be provided with classroom time to prepare to teach and then will be assigned to a classroom or classrooms. During this time the candidates will have an opportunity (under supervision) to observe, to teach and to participate in classroom activities. Additionally, candidates will research some area of their own pedagogy relevant to the experience. (Typically offered: Irregular)

CIED 5573. Foundations of Literacy. 3 Hours.
Teaching of reading to children; techniques, research, and modern practices. (Typically offered: Fall, Spring and Summer)

CIED 5583. Correlates of Reading Process. 3 Hours.
The developmental program is emphasized through a student of the reading process. Learning theory and research are related to reading instruction and materials through the development and application of evaluative criteria based on an understanding of reading process. Prerequisite: CIED 5573. (Typically offered: Irregular)

CIED 5593. Advanced Diagnosis and Intervention. 3 Hours.
Emphasizes the diagnosis and remediation of reading difficulties in the classroom setting. Students are expected to become familiar with cause of reading failure, diagnosis instruments and procedures, principles of report writing, and corrective instructional methods and materials. The course is open to graduate students with instructor's consent. Enrollment limited to 20. Prerequisite: CIED 5573. (Typically offered: Irregular)

CIED 5603. Innovations in School Education. 3 Hours.
An examination of the change process in education with emphasis on those elements which support or hinder change in the schools, and the detailed study of schools innovations on national, state, and local levels. (Typically offered: Fall, Spring and Summer)

CIED 5613. Contemporary Issues in Education. 3 Hours.
A study of issues pertaining to the goals, objectives, organization, and curriculum of the schools with an analysis of the teacher's role in dealing with current concerns in these areas. (Typically offered: Fall Odd Years)

CIED 5623. The School Curriculum. 3 Hours.
General principles and techniques of selecting and organizing curricular materials. (Typically offered: Fall, Spring and Summer)

CIED 5633. Analysis of Instruction. 3 Hours.
A survey of the research and literature related to the systematic study of the field of teaching. An examination of the definitions of teaching and the knowledge base on which teaching is predicated. A study of the implications of the research of effective teaching and the key curricular and instructional issues. (Typically offered: Spring Even Years)

CIED 564V. Science Instructional Strategies. 1-6 Hour.
Methods and materials in teaching specific science content with a focus on that content and/or the pedagogical perspectives necessary for effective and engaging instruction. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CIED 5653. Methods of Middle School Instruction. 3 Hours.
Philosophy, rationale, and instructional practices of middle school instruction. Prerequisite: Graduate standing. (Typically offered: Summer)

CIED 5663. Evaluation of Instruction. 3 Hours.
Examination of methods and philosophies of evaluation. Consideration will be given to grading, techniques of grading, and construction of behavioral objectives and test items. (Typically offered: Summer Even Years)

CIED 567V. Teaching Foreign Cultures in Social Studies Curricula. 1-6 Hour.
Extensive examination of foreign cultures (West Europe, USSR, China, Latin America) and methods of teaching about them in secondary school social studies. (Typically offered: Fall, Spring and Summer)

CIED 5683. Adolescent Literature. 3 Hours.
Content course in adolescent literature including selection, reading, evaluation, and psychological basis of classic and contemporary works. (Typically offered: Fall, Spring and Summer)

CIED 5703. English Language Arts and Reading Standards: Contents and Quality. 3 Hours.
This course will (1) examine the purposes, contents, and quality of K-12 English language arts and reading standards, (2) analyze their relationship to classroom and school district curricula, student assessment, educator licensing regulations, licensure tests, and professional development, (3) and explore educational, social, and political issues raised by ELA/R standards. (Typically offered: Irregular)
CIED 5713. Integrating the Elementary Curriculum. 3 Hours.
This course focuses on meaningful integration of science, mathematics, literacy, social studies, art, and music in the elementary classroom. A strong foundation for integrating the elementary curriculum will be developed by providing students with theoretical frameworks, research, resources, and methods related to classroom practice. Strategies to coordinate the integration of these subject areas for the K-4 classroom will be modeled. (Typically offered: Summer)

CIED 5723. Nature and Needs of Persons with Mild Disabilities. 3 Hours.
Educational, psychological, and social characteristics of individuals who have mild disabilities with emphasis on educational methods and modifications. Prerequisite: CIED 3023. (Typically offered: Fall)

CIED 5793. Practicum in Literacy. 3 Hours.
Laboratory experience in which students diagnose reading difficulties and practice remedial measures under the direct supervision of the instructor. Emphasis is given to continuous diagnosis and to the use of commercially produced materials and trade books in remediation. Enrollment limited to 15. Prerequisite: CIED 5593. (Typically offered: Fall, Spring and Summer)

CIED 5803. Nature and Needs of the Gifted and Talented. 3 Hours.
Educational, psychological, and social characteristics of gifted and talented children. Prerequisite: Graduate standing. (Typically offered: Fall)

CIED 5813. Curriculum Development in Gifted and Talented. 3 Hours.
Examines the various models for developing curriculum and providing services for students identified for gifted programs. Prerequisite: CIED 5803. (Typically offered: Spring)

CIED 5823. Gifted and Talented (Structured) Practicum. 3 Hours.
Supervised field experience in gifted education programs and providing services for students identified for gifted programs. Prerequisite: CIED 5813. (Typically offered: Summer)

CIED 5833. Gifted and Talented (Flex) Practicum. 3 Hours.
Students design and implement an individualized practicum experience (Type III Renzulli) that provides the opportunity to refine and enhance personal attitudes, beliefs, and skills in gifted education. Prerequisite: CIED 5823. (Typically offered: Fall)

CIED 5843. Representations of American Education in Film. 3 Hours.
This course provides an examination of students, teachers, administrators, schools, and schooling as they exist on the silver screen. Of particular interest is how film representations and misrepresentations potentially affect public perceptions of education. This course draws on educational theory and the field of cultural studies. (Typically offered: Irregular)

CIED 5853. Issues in Mathematics Education. 3 Hours.
Study of research in mathematics education and applications to classroom teaching and learning. Emphasis will be given past and current research in the areas of students' cognitive development in mathematics, mathematics curriculum development, and teaching practices and assessment. (Typically offered: Irregular)

CIED 5863. Teaching Global Issues. 3 Hours.
Global interdependence and its consequent issues have become an integral part of most social studies programs in American schools. Some schools developed specific courses, required or elective, and others include them in existing history, economics, government and civic courses. Secondary social studies teachers and their students explore these issues as part of current events discussions. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

CIED 5913. Parent/Family Engagement for Culturally & Linguistically Diverse Students. 3 Hours.
Students will investigate characteristics of family-community engagement systems and models serving culturally and linguistically diverse (CLD) students and families. Identify qualities of a welcoming, accepting environment for CLD families and implement some of these characteristics in their classroom and schools. Support communication and facilitate contributions by CLD families to the school and community including leadership roles. Demonstrate knowledge, skills, best practices and resources to enhance CLD family-community engagement by developing and implementing a service-learning project in their school or community. Prerequisite: Graduate standing. (Typically offered: Summer)

CIED 5923. Second Language Acquisition. 3 Hours.
This is one of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly ESL. (Typically offered: Fall)

CIED 5933. Second Language Methodologies. 3 Hours.
This is one of a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces the basics in approaches, methodologies, techniques, and strategies for teaching second languages, especially ESL. (Typically offered: Spring)

CIED 5943. Teaching People of Other Cultures. 3 Hours.
This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course focuses on cultural awareness, understanding cultural differences, and instruction methods for integrating second cultures, especially the culture of the United States, into the curriculum. (Typically offered: Fall)

CIED 5953. Second Language Assessment. 3 Hours.
This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces basic methods for testing, assessing and evaluating second language, especially ESL, learners for placement purposes and academic performance. (Typically offered: Spring)

CIED 5963. Reading in Middle and Secondary Schools. 3 Hours.
Methods and materials of teaching reading in secondary schools with emphasis on remedial and developmental reading problems of students. (Typically offered: Irregular)

CIED 5973. Practicum in Secondary Education. 3 Hours.
Students will engage in action research in a school setting to advance their knowledge of teaching and learning environments including schools and informal learning environments. Prerequisite: Permission. (Typically offered: Fall and Spring)

CIED 5983. Practicum in Curriculum & Instruction. 3 Hours.
This course will provide degree candidates with advance knowledge of teaching in the elementary or secondary schools. This will be accomplished through a semester-long practicum during which an action research project will be designed, enacted, and reported. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CIED 599V. Special Topics. 1-18 Hour.
Special topics. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CIED 600V. Master's Thesis. 1-6 Hour.
This course is designed for students completing a thesis at the master's level in curriculum and instruction and related programs. It may be taken multiple times for 1-6 credits but no more than 6 credits will be counted toward the degree. Prerequisite: Graduate Standing (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
CIED 6013. Curriculum Theory, Development, and Evaluation. 3 Hours.
Principles and concepts of curriculum and development, with an analysis of the factors basic to planning, the aims of the educational program, the organization of the curriculum, curriculum models, and elements desirable in the curriculum of schools including evaluation. (Typically offered: Fall Odd Years)

CIED 6023. Instructional Theory. 3 Hours.
Study of psychological, anthropological, sociological, and educational theories of instruction and learning. Emphasis is placed on synthesizing a broad range of existing and emerging perspectives in understanding individual, interactional and contextual phenomena of instruction and learning. (Typically offered: Spring Even Years)

CIED 6033. Content Specific Pedagogy. 3 Hours.
This course explores the relationship between the content of courses taught in schools and the pedagogical principles that the teaching of the content requires. Students will discuss and synthesize findings from the research literature and from personal investigation. (Typically offered: Irregular)

CIED 6043. Analysis of Teacher Education. 3 Hours.
This course examines issues, problems, trends, and research associated with teacher education programs in early childhood, elementary, special education, and secondary education. Prerequisite: CIED 6023. (Typically offered: Summer Even Years)

CIED 6053. Curriculum and Instruction: Learner Assessment and Program Evaluation. 3 Hours.
This course provides an overview of designing, implementing and analyzing learner assessments as well as systemic and program evaluations in a variety of instructional environments. Prerequisite: Admissions to Ed.S. or Ph.D. program. (Typically offered: Spring Even Years)

CIED 6063. Systemic Change In Education. 3 Hours.
This course is designed to critically examine education and society and interplay their interdependence between them, to differentiate between meaningful and superficial change, and to explore the agents of change in a diverse and complex social environment. Prerequisite: Admission to Ed.S. or Ph.D. program. (Typically offered: Spring Odd Years)

CIED 6073. Seminar in Developing Creativity. 3 Hours.
A study of the facets of creativity, how they can be applied to be used in one’s everyday life, how they can be applied in all classrooms, and how to encourage the development of these in students. (Typically offered: Irregular)

CIED 6083. Piaget’s Theory and Instruction. 3 Hours.
Piaget's theory has been applied to classroom instruction in various settings. This course will investigate the theory in depth, study classroom application, and students will devise application. Prerequisite: CIED 6023. (Typically offered: Spring Odd Years)

CIED 6093. Vygotsky in the Classroom. 3 Hours.
This course introduces the cultural-historical theory of L. Vygotsky and considers its complexity. The comprehensive nature of Vygotsky’s heritage and the importance of the sociocultural context for understanding his work is emphasized, as well as the implications of his theories for contemporary educational settings. (Typically offered: Fall Even Years)

CIED 6113. Trends and Issues in Social Studies Education. 3 Hours.
Analysis of social studies education including an examination of the historical, political and social issues that have shaped curriculum, pedagogy and the educator's role in the increasingly complex endeavor to prepare future citizens. (Typically offered: Spring Odd Years)

CIED 6123. New Literacy Studies. 3 Hours.
In the past decade scholars have expressed an interest in the diverse literacy practices in which adolescents engage outside of school. In using new media, adolescents interweave multiple sign system, including word and image, to construct a narrative or communicate information. How do readers interpret these texts? What conventions do authors manipulate to influence the meanings they construct? This course aims to answer these and other questions. (Typically offered: Fall Odd Years) May be repeated for up to 12 hours of degree credit.

CIED 6133. Trends and Issues in Curriculum and Instruction. 3 Hours.
Analysis of trends and issues in curriculum and instruction with emphasis on political/social contexts and prevailing philosophies/theories/practices across disciplines. Prerequisite: Admittance in Ed.D, Ed.S. or Ph.D. program. (Typically offered: Fall Even Years)

CIED 6143. Differentiated Instruction for Academically Diverse Learners. 3 Hours.
Major focus of this course will be the examination of differentiated instruction, a teaching philosophy appropriate for a wide range of learners. (Typically offered: Summer Even Years)

CIED 6153. Theories of Literacy Learning. 3 Hours.
In this seminar, students consider theories of literacy learning and their implications for practice and research. Theories are viewed as historically and socially situated, and students reflect on how their own work might be situated within these theories. The ways in which theories support research methodology are also explored. (Typically offered: Spring Odd Years)

CIED 6163. Social and Emotional Components of Gifted and Talented Students. 3 Hours.
Purpose of this course is to study the theoretical and practical aspects of those affective issues, behaviors, and experiences often associated with gifted and talented students. (Typically offered: Summer Even Years)

CIED 6173. Reviews of Research in Reading Comprehension. 3 Hours.
In this online course, students will learn types of reviews of research, including qualitative systematic reviews and meta-analyses, and will conduct a review of research on a topic related to reading comprehension. Students will consider explicit definitions of comprehension and the influence various definitions have on assessment, instruction, policy and research and will examine comprehension in different contexts, disciplines, genres, and platforms. The course is a CIED Area of Study or Cognate Course (not part of the Inquiry Core). (Typically offered: Summer Even Years)

CIED 6183. Theory and Research in Arts Integration. 3 Hours.
Content course in arts integration including the pedagogy, design, and implementation of lesson plans which simultaneously address core curriculum learning targets and teach skills through the visual and performing arts in order to address the needs of the learners of the new millennium. Prerequisite: Instructor consent. (Typically offered: Spring and Summer)

CIED 6193. Teaching English Language Learners in the Content Areas. 3 Hours.
This course prepares teachers to teach English language learners in math, science, and social studies. These subject areas each have their own vocabulary that must be mastered by English language learners. The course focuses on teachers of both children and adults. (Typically offered: Spring)

CIED 6233. Organization of Reading Programs. 3 Hours.
Study of the problem of organizing the classroom, individual school, and school system, for the improvement of reading instruction. Emphasis is given to the development of program organization rationale based on requirements of the teaching-learning setting. (Typically offered: Fall, Spring and Summer)
CIED 6313. Issues, History, and Rationale of Science Education. 3 Hours.
This course is the foundation experience for those interested in the discipline of science education. It provides an overview of the fundamental issues in and vocabulary of science education. The course includes the research basis for science teaching, the literature of science education, and the issues and controversies surrounding the teaching of science. (Typically offered: Fall and Spring)

CIED 6333. Nature of Science: Philosophy of Science for Science Educators. 3 Hours.
The Nature of Science is a hybrid arena consisting of aspects of the philosophy, history and sociology of science along with elements of the psychology of scientific observations all targeting the complete understanding of how science actually functions. Prerequisite: Admission to grad school. (Typically offered: Irregular)

CIED 6343. Advanced Science Teaching Methods. 3 Hours.
This course is designed for those educators who have had some previous instruction in science teaching methods and/or had some prior science teaching experience. Students will gain new or renewed perspectives with respect to their personal teaching ability while engaging in discussions and activities designed to assist others in professional grow in science instruction. Prerequisite: Admission to graduate school. (Typically offered: Irregular)

CIED 6443. Mixed Methods Research. 3 Hours.
This course will provide opportunities for students to acquire the skills, knowledge, and strategies necessary to design and implement a mixed methods research study. Emphasis is upon developing research questions, developing a research design, selecting a sample, and utilizing appropriate techniques for analyzing data. (Typically offered: Fall)

CIED 6503. Effective Teaching: Concepts and Processes. 3 Hours.
This course is designed to assist students in examining a variety of effective teaching practices and conditions found in classrooms and in acquiring knowledge, concepts, and ideas about ways to effectively influence the interests, learning and development of students. Prerequisite: Admission to the Ph.D. program. (Typically offered: Spring)

CIED 6533. Problem-Based Learning and Teaching. 3 Hours.
A course in the design, development, and delivery of the problem-based learning (PBL) model. Theoretical cases and curriculum models will be centered on issues and models related to PBL. (Typically offered: Irregular)

CIED 6603. Multicultural Education. 3 Hours.
This course is designed to trace, examine, discuss, and promote understanding of issues related to multicultural education, different views of multicultural education, and the impact of multicultural education upon the schooling process. Emphasis is upon schooling experiences of culturally diverse students, language issues, gender issues, and evaluation issues. Prerequisite: Admission to the Ed.S. or Ph.D. program. (Typically offered: Spring)

CIED 660V. Workshop. 1-18 Hour.
Workshop. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

CIED 6623. Research Methods and Scholarship in Curriculum and Instruction. 3 Hours.
In this course students will look at methods and practices in writing a successful dissertation proposal. Emphasis will be placed on research studies, collection of reliable and valid data, and analysis of data. Throughout the course, topics will focus on what scholarship looks like in curriculum and instruction. Prerequisite: Advanced standing in the doctoral program. (Typically offered: Spring)

CIED 674V. PhD Research Internship. 1-6 Hour.
This research internship is for doctoral level students in curriculum and instruction. The goal is provide research experience within the doctoral course of study. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 680V. Ed.S. Project. 1-6 Hour.
Instructor permission required to register. Prerequisite: Instructor permission. (Typically offered: Fall, Spring and Summer)

CIED 684V. PhD Teaching Internship. 1-6 Hour.
This teaching internship is for doctoral level students in curriculum and instruction. The goal is to provide teaching experience within the doctoral course of study. (Typically offered: Fall, Spring and Summer)

CIED 694V. Special Topics. 1-6 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Specific focus on recent developments. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CIED 695V. Independent Study. 1-6 Hour.
Independent study. (Typically offered: Fall, Spring and Summer)

CIED 699V. Doctoral Seminar. 1-3 Hour.
Doctoral seminar. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CIED 700V. Dissertation. 1-18 Hour.
Dissertation. Prerequisite: Candidacy (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Design Studies (DSGN)

Jennifer Webb
Graduate Coordinator
120 Vol Walker Hall
479-575-4945
FayGrad@uark.edu

Degree Offered:
M.Des. in Design Studies

The Fay Jones School of Architecture and Design offers a Master of Design Studies (M.Des.). The goal is to provide a nationally-recognized, interdisciplinary design program that meets the needs of Arkansas, the region, and nation. The Master of Design Studies degree is recognized as multidisciplinary degrees that explores emerging concerns that are universal to the human-environmental design disciplines.

The program offers two areas of concentration:

Resiliency Design: This post-professional graduate degree is focused on community and landscape resiliency determined by critical factors including water, mobility, food, housing, aging, and public health. The one-year, three-semester program provides advanced study of pressing public-interest civic issues by combining design, research, and expanded modes of professional engagement. The University of Arkansas Community Design Center is one of six programs leading the American Institutes of Architect’s National Resiliency Initiative, and houses one of the few university-based teaching offices in design programs nationally. This unique program will prepare graduates to engage interdisciplinary urban design challenges through service learning and public outreach in collaboration with a professional staff. Utilizing strengths across the University of Arkansas campus, this program combines course offerings with a professional residency to immerse students in these dynamic fields.

Retail and Hospitality Design: This post-professional graduate degree provides advanced study of strategic thinking and design methods relative to the hospitality and retail environments. The one-year, three-semester program is grounded in design’s contribution to economic success. Business strategies are integrated with innovative problem solving to craft unique experiences within these specialized settings. Proximity to international business enterprises and strategic relationships with global
design firms enables graduates to integrate environmental, cultural, and social discourse to deliver comprehensive approaches to complex design scenarios. Utilizing strengths across the University of Arkansas campus, this program combines course offerings with a professional residency to immerse students in these dynamic fields.

Requirements for M.Des. with Resiliency Design Concentration

Requirements for the Master of Design: The program can be completed in 1 year (3 semesters including 2 full-time, on-campus semesters combined with an off-campus, summer residency component). The curriculum includes two advanced design studios addressing increasingly complex challenges resolved first through the synthesis of multiple knowledge domains and moving to scenarios for which there are unidentified constraints and unknown methods for solution.

The M.Des. program requires 36 credit hours. Core courses comprise 24 credit hours and each concentration requires an additional 12 credit hours of elective coursework.

Requirements for M.Des. with Retail and Hospitality Design Concentration

Requirements for the Master of Design: The program can be completed in 1 year (3 semesters including 2 full-time, on-campus semesters combined with an off-campus, summer residency component). The curriculum includes two advanced design studios addressing increasingly complex challenges resolved first through the synthesis of multiple knowledge domains and moving to scenarios for which there are unidentified constraints and unknown methods for solution.

The M.Des. program requires 36 credit hours. Core courses comprise 24 credit hours and each concentration requires an additional 12 credit hours of elective coursework.

Courses

FJAD 6723. Methods of Design Inquiry. 3 Hours.
Investigation into the practical, theoretical, and methodological strategies necessary for embarking upon inquiry and discourse for design-related problems. Pre- or Corequisite: Admission into the Master of Design program. (Typically offered: Fall)

FJAD 6803. Design Leadership. 3 Hours.
Explores leadership through conceptual and theoretical perspectives. Emphasis is on developing and managing effective design processes, methods, and organizations enabling innovative design practices. Students will explore contemporary issues and forces that affect the conditions of how design is embedded in thought leadership. Pre- or Corequisite: Admission into the Master of Design program. (Typically offered: Spring)

FJAD 6813. Cities and Public Good. 3 Hours.
Studies infrastructure as socio-technical systems and potential transitions to lower carbon futures. Concepts governing Large Technical Systems such as obduracy, path-dependency, energy transitions, value capture, and public good are explored through analytic frameworks like Multi-level Perspectives (MLP) and Socio-technical Systems Theory (STS) in the context of incumbent technologies. Pre- or Corequisite: Admission into the Master of Design program. (Typically offered: Fall and Spring)

FJAD 6823. Vocabularies of Context Production. 3 Hours.
Explores connectivity through spatial and organizational formats from urbanism to supply chains, ecosystems, resource sheds, infrastructure, neighborhoods, eco-districts, and other public spaces. In addition to the traditional categories of geometry, proportion, and fit used to define place, vocabularies of flow, timing, interactivity, phasing, modulation, distribution, and emergence will be examined. Pre- or Corequisite: Admission into the Master of Design program. (Typically offered: Fall and Spring)

FJAD 6833. Wood Theories, Tectonics and Environmental Response. 3 Hours.
Investigate wood design through theoretical, technical and practical inquiry emphasizing tectonics responding to a range of material and environmental aspects. Focused study of wood's physical properties, functions, and behavior in manufactured and constructed assemblies. Current and future global issues, industry, economy, and the design of the constructed environment are explored. Prerequisite: Admission to the Master of Design Studies Degree. (Typically offered: Fall)
**Education Policy (EDPO)**

Department of Education Reform website (http://edre.uark.edu/)

**Degrees Conferred:**  
Ph.D. in Education Policy (EDPO)

**Program Description:** The Ph.D. in Education Policy is designed to prepare policy-oriented scholars for careers in academia, think tanks, and public service in the field of K-12 education policy. The program of study is based on the social sciences and other academic disciplines, supported by empirical research. The program has five components:

- Core courses to establish the disciplinary base and intellectual framework;
- Research methods to prepare for empirical work;
- Field seminars in the key education reform fields, to understand and contribute to research behind key policy debates;
- Electives to pursue further specialization; and
- Dissertation, following completion of comprehensive exams.

**Ph.D. in Education Policy**

**Admission to the Program:** In addition to meeting university requirements for admission to the Graduate School, applicants should have combined GRE scores of 304, writing score of 4.0, and minimum GPA of 3.0 undergraduate or 3.5 in a masters’ program. Admission is based on the individual’s total profile, with special attention given to those with professional experience in education policy. Those students who have completed calculus and statistics courses prior to arriving on campus will more readily satisfy the prerequisites for the program’s research methods sequence.

**Electives**

Students will take four electives, which typically will be a combination of relevant course offerings in other departments and directed research projects. The specific electives will all be subject to approval of the Education Policy graduate director, and may include subjects such as education law, qualitative methods, advanced quantitative methods, organizational theory, etc. Directed research projects could be either of the student’s own design or within the context of one of the various research projects underway in the Department of Education Reform.

</tbody>
</table>

Total Hours 72

Students will take a written qualifying examination after the spring term of the first year, covering research methods, with applications to the first-year content courses. The field exams, with both written and oral components, will ordinarily be taken in the fall or spring of the third year, covering the student’s choice of two fields.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).
Graduate Faculty

Costrell, Robert M., Ph.D. (Harvard University), B.A. (University of Michigan), Professor, Department of Education Reform, 2006.
Greene, Jay Phillip, Ph.D., A.M. (Harvard University), B.A. (Tufts University), Distinguished Professor, Department of Education Reform, 2005.
Trivitt, Julie R., Ph.D., M.A. (University of Arkansas), M.A. (Southwest Missouri State University), Clinical Associate Professor, Department of Education Reform, 2012.
Wolf, Patrick J., Ph.D., M.A. (Harvard University), B.A. (University of Saint Thomas), Distinguished Professor, Department of Education Reform, 2006.
Zamarro Rodriguez, Gema, Ph.D., M.S. (Centro de Estudios Monetarios y Financieros, Spain), B.A. (Universidad Carlos III de Madrid, Spain), Professor, Department of Education Reform, 2014.

Courses

EDRE 5053. Philosophy and History of Education and Education Reform. 3 Hours.
This course traces the historical development of the philosophical debates concerning education and its role in society as well as how those ideas and consequent demands for reform affected the educational system and its structures. (Typically offered: Spring Even Years)

EDRE 559V. Field Research. 1-6 Hour.
Directed graduate-level field research in education policy settings. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

EDRE 6023. Economics of Education. 3 Hours.
This course applies the principles of economic analysis to education and education reform. Topics include: Human capital and signaling theories; education labor markets; educational production functions; public policy and market forces. The course also features empirical evidence evaluating economic theories of education. (Typically offered: Spring Odd Years)

EDRE 6033. Politics of Education. 3 Hours.
This course explores historical and institutional forces that help shape education policymaking. Particular attention will be paid to the experience of past education reform movements as well as the influence of interest groups, federalism, bureaucracy, governance structures, public opinion, and judicial review on education policy. (Typically offered: Fall)

EDRE 6043. Finance and Education Policy. 3 Hours.
This course examines K-12 education finance from the standpoint of education reform policy. The tools of analysis include economics, public finance, law and political science. Topics include: revenue sources and fiscal federalism, standards-based reform and school finance, school funding formulas, adequacy lawsuits, the politics of school funding, school funding and markets. The course also features empirical evidence on the educational impact of education finance. (Typically offered: Fall)

EDRE 6053. Measurement of Educational Outcomes. 3 Hours.
This course will train students to consider the various types of outcome and assessment measures used for education at the K-12 level throughout the United States; further, the students will engage in analyses of research that relies on these various outcome measures. (Typically offered: Fall)

EDRE 6103. Quantitative Analytical Techniques for Education Policy. 3 Hours.
This course introduces students to the quantitative techniques required for the evaluation of education policies and interventions. The class will focus on the identification and estimation of causal effects, necessary assumptions, and how to deal with the failure of these assumptions. Major topics covered include randomized experiments, the ordinary least squares regression method, matching estimators, instrumental variable methods, regression discontinuity, difference in difference methods, and introduction to estimation strategies with panel data models. (Typically offered: Fall)

EDRE 6113. Advanced Quantitative Analytical Techniques for Education Policy. 3 Hours.
This course introduces students to advanced estimation methods and empirical models often used in education policy empirical research, such as Maximum Likelihood to estimate discrete choice models, censored models and selection models, duration models, Generalized Method of Moments to estimate dynamic panel data models, and bootstrapping of standard errors and simulation-based inference. Prerequisite: EDRE 6103. (Typically offered: Spring Odd Years)

EDRE 6213. Program Evaluation and Research Design. 3 Hours.
This course provides students with training in the methods used to generate evidence-based answers to questions regarding the efficacy and impacts of education programs. The central questions that motivate most educational program evaluations are: (1) What is the problem? (2) What policies or programs are in place to address the problem? (3) What is their effect? (4) What works better? (5) What are the relative benefits and costs of alternatives? (Typically offered: Fall)
This course is cross-listed with ESRM 6613.

EDRE 6223. Research Seminar in Education Policy. 3 Hours.
This course provides students with the opportunity to learn about education policy research by interacting directly with the leading scholars and practitioners in the field. Students will also gain a foundation in the field of education policy research by reading and discussing some of the founding works of the field. (Typically offered: Fall)

EDRE 636V. Special Problems. 1-6 Hour.
Independent reading and investigation in education policy under faculty supervision. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

EDRE 6413. Issues in Education Policy. 3 Hours.
This course examines how K-12 education policy is designed and implemented in the United States. Students will develop a working knowledge of policymaking frameworks to examine major education policies of current interest and debate key policy issues that arise at each level of government. In great measure, the goals of the course will be accomplished through the consideration of opposing stances on key educational policy debates and issues that are of current import. (Typically offered: Spring)
This course is cross-listed with EDFD 5683.

EDRE 6423. Seminar in School Choice Policy. 3 Hours.
This course examines parental school choice - perhaps the most controversial education reform of our age. Students will be introduced to the full set of school choice policies, including charter schools and vouchers, and evaluate their benefits and drawbacks as educational interventions. (Typically offered: Fall Even Years)

EDRE 6433. Seminar in Education Accountability Policy. 3 Hours.
This course examines K-12 school and district accountability under state and Federal law (e.g. NCLB), as well as teacher and student accountability (e.g. exit exams). Topics include the theory of incentives and politics of tradeoffs, measurement issues of policy implementation, and statistical evidence on policy effects on performance. (Typically offered: Spring Odd Years)
EDRE 6443. Seminar in Education Leadership Policy. 3 Hours.
This course will examine the individual and systemic prerequisites of effective leadership of schools and school systems, and effective leadership techniques. It will consider the differences between public and private sector leadership. It will also explore ways to identify effective and ineffective leaders, and design and evaluate systems to recruit and train the former and reassign the latter. (Typically offered: Fall Odd Years)

EDRE 6453. Seminar in Teacher Quality and Public Policy. 3 Hours.
Examines how our public system of education shapes the preparation and continued professional development of K-12 teachers, and how that system has been influenced by standards-based education reform as well as efforts to enhance the quality of teaching and learning in public schools. Uses education reform legislation in several states as case studies to illustrate the successes and pitfalls of attempts to reform teacher education and licensure through public policy. (Typically offered: Spring Even Years)

EDRE 6463. Psychology of Education. 3 Hours.
This course explores psychological science findings that pertain to education research and policy with a focus on empirical evidence. Particular emphasis will be on studying individual differences in the context of education. Historical, methodological, and measurement perspectives will be examined. (Typically offered: Spring Odd Years)

EDRE 674V. Internship in Education Policy. 1-6 Hour.
Internship at a public or private entity involved in the making or implementation of education policy. Paper required on a significant aspect of the internship experience. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular)

EDRE 699V. Special Topics. 1-3 Hour.
Topics vary depending on instructor. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

EDRE 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Irregular) May be repeated for degree credit.

Educational Equity (EDEQ)
Tom Smith
Program Coordinator 308 ARKA
479-575-3326
Email: tecsmith@uark.edu

Degree Offered:
M.Ed. in Educational Equity (EDEQME)

Program Description: The Master of Education in Educational Equity is a two-year, 33-hour graduate program targeting early career educators who are committed to increasing effectiveness in their classrooms and meeting the educational needs of students in high-poverty districts. Participants work full-time as lead teachers in high-need districts while enrolled in this program. The overall goal of the program is to increase the effectiveness and support of these early-career teachers while they lead classrooms in struggling, high-poverty schools in Arkansas. Degree candidates will bring a deep commitment to making a difference across the state of Arkansas, a desire to share in the ambitious work of teacher development, and an unwavering belief that students in high-poverty schools need a consistent, high-quality teacher workforce.

Requirements for M.Ed. in Educational Equity
Admission Requirements: Applicants must meet all requirements for admission to the University of Arkansas Graduate School, except the standardized test score requirement. Additionally, the following are requirements for admission into the program:

- Two years of teaching experience or a bachelor's degree in education or a related field with one year teaching experience.
- Valid teaching license.
- Applicants must complete program-specific admission requirements including an interview with program staff and providing at least two references.

Degree Requirements: Degree candidates enter the Master of Education in Educational Equity program during the summer as a cohort. The degree is completed in two years (four regular semesters and two summers) and focuses on building skills around teaching particular content areas in high-poverty districts. During the program, candidates complete two courses each term through web-based distance technology, one in-person course during the first summer, and two courses (one in-person course and one course either in-person or online) during the second summer. Candidates are also working full-time as lead teachers in high-need districts across the state during the two year program, which provides them with a real-time opportunity, with mentor support, to implement instructional strategies. During their final semester, candidates will complete a written comprehensive examination.

Courses

EDEQ 5003. Best Practices for Teaching in High-Needs Schools. 3 Hours.
This course is designed to equip students with the knowledge and skills to be successful in the classroom. The course primarily focuses on teaching specific content areas, classroom management, and understanding the socioeconomic circumstances driving poverty. Sessions will focus on Cultural Competency or Content and Pedagogy. Students will learn and develop a working knowledge of the concepts of rigor, cultural responsiveness, and learner variability. Prerequisite: Admission into EDEQ program or instructor consent. (Typically offered: Summer)

EDEQ 5013. Classroom Management Mechanics and Content. 3 Hours.
The course provides students with the knowledge and skills to move from good to great in the areas of classroom mechanics and content. Directors of Content will provide direct classroom observation, feedback, and coaching. Students will periodically meet electronically as a whole cohort for additional sessions on vital skills such as workshopping lesson plans, analyzing data, diagnosing and planning for interventions, sharing best practices, and building community and parent engagement skills. Prerequisite: Admission into EDEQ program or instructor consent. (Typically offered: Irregular)

EDEQ 5023. Collecting and Analyzing Student Data. 3 Hours.
This course provides students with the knowledge and skills to collect and analyze quantitative and qualitative data in order to master data-driven instruction and improvement. Data from norm-referenced, high stakes testing as well as informal assessments will be used. Prerequisite: Admission into EDEQ program or instructor consent. (Typically offered: Irregular)

EDEQ 5033. Teaching Specific Content in High-Needs Schools. 3 Hours.
This course focuses on specific content instruction for students in high-needs school districts. Students focus on their content areas, e.g. math, science, literacy, special education, to design specific, evidence-based strategies for students from high poverty schools. The course culminates in a final project presentation to all coaches and cohort members. Prerequisite: Admission into EDEQ program or instructor consent. (Typically offered: Summer)

EDEQ 5043. Reflecting and Planning Content Delivery. 3 Hours.
This course focuses on the delivery of specific content instruction for students in high-needs school districts in content areas, e.g. math, science, literacy, special education. Students identify specific, evidence-based strategies for students from high poverty schools and apply these strategies directly in classrooms. This course also provides students the opportunity to build the skills necessary to engage in self-directed growth and learning related to their instruction. Prerequisite: Admission into EDEQ program or instructor consent. (Typically offered: Irregular)

EDEQ 5053. Understanding and Exploring Community Context. 3 Hours.
This course provides students the opportunity to understand the overall impact of poverty, and explore equity within their specific school and community context. The course is designed for students to build the skills necessary for tapping into existing networks and building relationships outside of their school building. Prerequisite: Admission into EDEQ program or instructor consent. (Typically offered: Irregular)

Educational Leadership (EDLE)

Educational Leadership Website (https://cied.uark.edu/programs/educational-leadership/)

Degrees Conferred:
M.Ed. in Educational Leadership (EDLE)
Ed.S. in Educational Leadership (EDLE)
Ed.D. in Educational Leadership (EDLE)

Graduate Certificates Offered (non-degree):
Arkansas Curriculum/Program Administrator (p. 352) (ACPA)
Building-Level Administration (p. 149) (PSBL)
District-Level Administration (p. 149) (PSDL)

Program Description: The Educational Leadership graduate degrees and graduate certificate programs are designed to prepare qualified persons for a variety of leadership roles. Placement of recent graduates have been in the following areas: principalships and other school-site administrative and supervisory positions; superintendents and other central administrative personnel; and federal and state governmental positions in education.

Primary Areas of Faculty Research: School leadership; school/ community relations; educational law; school finance; effective schools; rural schools; the use of data for school improvement; principal succession and retention; the education doctorate as a professional doctorate; leadership ethics; and moral decision-making.

Admission to the M.Ed., Ed.S., and Ed.D. Programs: In addition to meeting university requirements for admission to the Graduate School, all candidates seeking admission to any educational leadership program must complete program application procedures, which are described on the program website (http://edle.uark.edu). Admissions for the Masters and Specialist degrees are rolling; therefore, prospective students can apply at any time of the year. Application for admission must be completed before the required deadlines for each semester as set by the
Graduate School. The Ed.D. program follows a cohort model; therefore, a completed application deadline is set for Feb. 1 each year. Each cohort starts in the summer semester.

**Admission to the Graduate Certificate programs:** Applicants must meet university requirements for admission to the Graduate School as non-degree-seeking, but certificate-seeking students, and must have a master’s degree. In addition, to receive the graduate certificate in district-level administration, applicants must have a valid teaching license and a valid building-level administration license.

**M.Ed. in Educational Leadership**

**Admission to the M.Ed. Programs:** In addition to meeting university requirements for admission to the Graduate School, all candidates seeking admission to any educational leadership program must complete program application procedures, which are described on the program website (http://edle.uark.edu). Admissions for the Master’s degree are rolling; therefore, prospective students can apply at any time of the year. Application for admission must be completed before the required deadlines for each semester as set by the Graduate School.

**Requirements for the Master of Education (M.Ed.) Degree (33 hours):**

The master’s degree in Educational Leadership is designed primarily to provide professional preparation for students seeking administrative positions in elementary and secondary schools. It requires the following:

- Completion of the following required common courses in Educational Leadership (24 credits):
  - EDLE 5013 School Organization and Administration 3
  - EDLE 5023 The School Principalship 3
  - EDLE 5043 Leadership Ethics 3
  - EDLE 5053 School Law 3
  - EDLE 5063 Instructional Leadership, Planning, and Supervision 3
  - EDLE 5083 Analytical Decision-Making 3
  - EDLE 5093 Effective Leadership for School Improvement 3
  - EDLE 574V Internship 1-6

- Completion of nine credit hours from foundations courses, including:
  - EDLE 5033 Psychology of Learning 3
  - or EDFD 5373 Psychological Foundations of Teaching and Learning 3
  - EDLE 5073 Research for Leaders 3
  - EDLE 5003 Schools and Society 3

A cumulative grade-point average of at least 3.00 on all course work is required for the degree. No grades below “C” will be accepted for graduate degree credit.

Satisfactory performance on a written comprehensive examination or portfolio presentation is required.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

**Ed.S. in Educational Leadership**

**Admission Requirements:** Candidates must have a master’s degree in educational leadership plus submit either a GRE score or a School Leadership Licensure Assessment (SLLA) score for admission. All other requirements of admission to the graduate school and Educational Leadership program must also be met.

**Requirements for the Educational Specialist Degree (30 hours post Masters):** The specialist degree program in Educational Leadership is designed primarily to provide professional preparation for students involved in school-site administration and those individuals who have districtwide administrative responsibilities.

- EDLE 6023 School Facilities Planning and Management 3
- EDLE 6053 School-Community Relations 3
- EDLE 6093 School District Governance: The Superintendency 3
- EDLE 6103 School Finance 3
- EDLE 6173 School Business Management 3
- EDLE 674V Internship 1-6
- EDLE 6333 Advanced Legal Issues in Education 3

The following three research courses are to be taken in sequence:

- EDL 6503 Topics in Educational Research for School Administration 3
- or ESRM 6403 Educational Statistics and Data Processing 3
- EDLE 6513 Program Evaluation in Education 3

Note: Prior to District-Level Licensure application, all students must present a culminating project to a committee of faculty with practitioner representation for the district-level license.

Students should also be aware of Graduate School requirements with regard to specialist degrees (p. 461).

**Ed.D. in Educational Leadership**

**Admission to the Ed.D. Program:** In addition to meeting university requirements for admission to the Graduate School, all candidates seeking admission to any educational leadership program must complete program application procedures, which are described on the program website (http://edle.uark.edu). Admissions for the Master’s and Specialist degrees are rolling; therefore, prospective students can apply at any time of the year. Application for admission must be completed before the required deadlines for each semester as set by the Graduate School.

The Ed.D. program follows a cohort model; therefore, a completed application deadline is set for February 1 each year. Each cohort starts in the summer semester.

**Requirements for the Doctor of Education Degree:** Completion of the courses required for the Master of Education degree in Educational Leadership, and completion of the courses required for the Educational Specialist degree in Educational Leadership.

- EDLE 6533 Educational Policy 3
- ESRM 6533 Qualitative Research 1-3
- or HRWD 572V Workshop
- EDLE 699V Seminar 1-6

These requirements must be met before admission.
Seminar, taken on campus three times for one credit each. Doctoral students will come to campus to meet with faculty and practitioners for a one-credit seminar that will serve as a valuable capstone for the distance experience. The meaningful campus experience will be an intensive long weekend cohort seminar on the University of Arkansas campus. Each cohort weekend will be focused on a theme that connects theory with practice and includes mini-lectures by scholars and practitioners in the field, facilitated discussion groups, and lively debate of critical issues facing school leaders. The intent of the cohort weekend is to build relationships, introduce students to leaders in the field and expose them to interactive, hands-on learning experiences that lend themselves more easily to the face-to-face environment.

Nine credit hours from either the qualitative track or the quantitative track:

18 semester hours of dissertation credit 18

A minimum grade point average of at least 3.25 on all graduate course work, and on all course work presented for the Ed.D. degree.

Satisfactory completion of all requirements governing the written and oral examinations for the candidacy examination, the dissertation, and the final oral dissertation defense. The Ed.D. degree must be completed within seven years from the date the Declaration of Intent is signed.

The program of study must comply with university residency requirements.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

**Courses**

**EDLE 5003. Schools and Society. 3 Hours.**
Schools and Society is an introduction to the social, structural, political and historical forces that have created the American school system. (Typically offered: Summer Even Years)

**EDLE 5013. School Organization and Administration. 3 Hours.**
Analysis of structure and organization of American public education; fundamental principles of school management and administration. (Typically offered: Fall; Summer Odd Years)

**EDLE 5023. The School Principalship. 3 Hours.**
Duties and responsibilities of the public school building administrator; examination and analysis of problems, issues, and current trends in the theory and practice of the principalship. (Typically offered: Spring and Summer)

**EDLE 5033. Psychology of Learning. 3 Hours.**
This course prepares educational leaders to create and sustain a learning centered environment in school settings. Students will study learning theory across the lifespan and apply it to the practice of instructional leadership, curriculum design, and staff development. (Typically offered: Spring; Summer Odd Years)

**EDLE 5034. The School Plant. 3 Hours.**
School facilities planning, management, cost analysis, operations, and maintenance of the school plant. (Typically offered: Fall Odd Years)

**EDLE 5039. Principles of Research for Educational Leaders. 3 Hours.**
Important foundational topics in educational leadership that are current and critical will be taught in this Master’s-level seminar. Topics range from the psychology of learning and leading to how schools and society interact in the 21st century. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

**EDLE 5043. Leadership Ethics. 3 Hours.**
Leadership Ethics is an experiential based course grounded in ethical decision making theory that uses case study and practice to study school based ethical dilemmas. (Typically offered: Fall; Summer Odd Years)

**EDLE 5053. School Law. 3 Hours.**
Legal aspects of public and private schooling; federal and state legislative statues and judicial decisions, with emphasis upon Arkansas public education. (Typically offered: Fall; Summer Odd Years)

**EDLE 5063. Instructional Leadership, Planning, and Supervision. 3 Hours.**
Instructional Leadership, Planning, and Supervision is designed to prepare practitioners to seize the role of educational leader at the school site level through the development of a vision that will be used to drive a data driven instructional school plan. (Typically offered: Fall; Summer Odd Years)

**EDLE 5073. Research for Leaders. 3 Hours.**
This course introduces research methodology that will support school leaders as consumers of educational research and supervisors of action research within their schools. Practical application of research for school leaders is emphasized. (Typically offered: Spring; Summer Odd Years)

**EDLE 5083. Analytical Decision-Making. 3 Hours.**
Analytical Decision Making is a performance based examination of the principles and practices related to the building administrator’s role in the development, administration, and evaluation of curricular programs in public schools. This includes creating a school culture, fostering communication, aligning curriculum with state mandated standards, and staff development. (Typically offered: Spring Even years; Summer)

**EDLE 5093. Effective Leadership for School Improvement. 3 Hours.**
A performance based examination of strategic planning, group facilitation and decision-making, organizational behavior and development, professional ethics and standards, student services administration, and principles of effective leadership. (Typically offered: Spring and Summer)

**EDLE 574V. Internship. 1-6 Hour.**
Supervised in-school/district experiences individually designed to afford opportunities to apply previously-acquired knowledge and skills in administrative workplace settings. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

**EDLE 599V. Seminar. 1-6 Hour.**
Important foundational topics in educational leadership that are current and critical will be taught in this Master’s-level seminar. Topics range from the psychology of learning and leading to how schools and society interact in the 21st century. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

**EDLE 600V. Master’s Thesis. 1-6 Hour.**
Master’s Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

**EDLE 6013. Problems of Practice for Educational Leaders. 3 Hours.**
Problems of Practice is designed to extend and refine students’ thinking, experience, and knowledge about the Education Doctorate (EdD), as well as selecting a Problem of Practice that can contribute to the following program goals: advanced analytical reasoning skills; positive impact on professional practice; and the refinement of the scholar-practitioner. (Typically offered: Summer)

**EDLE 6023. School Facilities Planning and Management. 3 Hours.**
School facilities planning, management, cost analysis, operations, and maintenance of the school plant. (Typically offered: Fall Odd Years)

1 Seminar, taken on campus three times for one credit each. Doctoral students will come to campus to meet with faculty and practitioners for a one-credit seminar that will serve as a valuable capstone for the distance experience. The meaningful campus experience will be an intensive long weekend cohort seminar on the University of Arkansas campus. Each cohort weekend will be focused on a theme that connects theory with practice and includes mini-lectures by scholars and practitioners in the field, facilitated discussion groups, and lively debate of critical issues facing school leaders. The intent of the cohort weekend is to build relationships, introduce students to leaders in the field and expose them to interactive, hands-on learning experiences that lend themselves more easily to the face-to-face environment.
EDLE 6053. School-Community Relations. 3 Hours.
Community analysis, politics and education; power groups and influences; school issues and public responses; local policy development and implementation; effective communication and public relations strategies. (Typically offered: Spring Even Years)

EDLE 605V. Independent Study. 1-6 Hour.
Independent study. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EDLE 6093. School District Governance: The Superintendent. 3 Hours.
Analysis of the organizational and governance structures of American public education at national, state, and local levels. (Typically offered: Fall Even Years)

EDLE 6103. School Finance. 3 Hours.
Principles, issues and problems of school funding formulae and fiscal allocations to school districts. (Typically offered: Spring Odd Years)

EDLE 6173. School Business Management. 3 Hours.
Fiscal and resource management in public schools: budgeting, insurance, purchasing, and accounting. (Typically offered: Summer Odd Years)

EDLE 6333. Advanced Legal Issues in Education. 3 Hours.
The examination and discussion of advanced legal issues affecting public school education. Prerequisite: Advanced graduate standing. (Typically offered: Fall Even Years)

EDLE 6433. Legal Aspects of Special Education. 3 Hours.
A study of litigation and legislation in special education, federal and state laws and court cases, and due process hearings. (Typically offered: Irregular)
This course is cross-listed with SPED 6433.

EDLE 6503. Topics in Educational Research for School Administration. 3 Hours.
Application of educational research in the school setting by educational administrators. Emphasis placed on the use of state and local school or district data, data analysis, interpretation and reporting, hands-on experience with SPSS, and the formal process of writing a research report. Prerequisite: Advanced graduate standing. (Typically offered: Regular)
This course is cross-listed with SPED 6433.

EDLE 6513. Program Evaluation in Education. 3 Hours.
Program Evaluation in Education is designed to introduce students to concepts and methods of policy and program evaluation. Emphasis will be placed on preparing educational leadership students to conduct a program evaluation specialist project of dissertation. (Typically offered: Summer)

EDLE 6523. Advanced Application of Educational Leadership. 3 Hours.
A review of seminal and current works on leadership as applied to the educational setting. Provides knowledge of classic and contemporary strategies for leadership. (Typically offered: Summer)

EDLE 6533. Educational Policy. 3 Hours.
Examination of the research and theory related to the evolution of local, state, and federal governance and educational policy. Emphasis given to the consideration of procedures involving policy formulation, implementation, and analysis. (Typically offered: Spring Odd Years)

EDLE 6543. Introduction to Qualitative Research. 3 Hours.
This course offers an introduction to the qualitative approach to research in the Social Sciences. In particular, this course focuses on initial qualitative research designs that support planning, problem solving, and evaluation for educational leaders. Developing a conceptual framework, gaining an initial understanding of the methods of data collection and analysis, and establishing credibility in qualitative research are discussed. This course will be taught online using Blackboard and will require synchronous online class meetings that will require a webcam and microphone. (Typically offered: Fall)

EDLE 6553. Advanced Qualitative Methods in Educational Research. 3 Hours.
This course has been designed to provide graduate students with a more in-depth understanding of qualitative research methods. Emphasis will be placed on preparing educational leadership students to design a qualitative or mixed-method dissertation study. Prerequisite: ESRM 6543 or HRWD 572V. (Typically offered: Spring)

EDLE 674V. Internship. 1-6 Hour.
Internship. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EDLE 680V. Educational Specialist Project. 1-6 Hour.
An original project, research project, or report required of all Ed.S. Degree candidates. Prerequisite: Admission to the Ed.S. program. (Typically offered: Fall, Spring and Summer)

EDLE 699V. Seminar. 1-6 Hour.
A seminar. Prerequisite: Advanced graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EDLE 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

**Degrees Conferred:**

M.Ed. in Education Technology (ETEC)

**Graduate Certificates Offered (non-degree):**

K-12 Online Teaching (p. 363) (ETEC)

**Program Description:** The Educational Technology Program is a 34-hour non-thesis on-line master’s program that prepares students for professional positions as educational technologists of education, business, government, and the health professions. It also offers a 15-hour certificate program that prepares K-12 teachers to plan, create, provide, and assess effective instruction within online K-12 environments.

**Primary Areas of Faculty Research:** Curricular integration of technology, distance learning, instructional design, policies and best practices in online learning, vulnerable populations, virtual schools, cyber schools, immersive learning environments.

**M.Ed. in Education Technology**

**Prerequisites to Degree Programs:** Applicants for the M.Ed. degree must have completed a bachelor’s degree and earned a 3.00 GPA on the last 60 hours of undergraduate course. Applicants with an earned GPA of 2.7-2.9 on the last 60 hours of undergraduate course work may be considered if an acceptable score on the Graduate Record Examination or Miller Analogies Test is obtained.
Requirements for the Master of Education Degree: In addition to the general requirements of the Graduate School, students must complete a minimum of 34 hours of graduate course work to include 22 semester hours of core educational technology courses, nine semester hours of elective educational technology courses, and three semester hours of research. Additionally, a Culminating Student Portfolio must be successfully completed in the last semester of course work in the EPortfolio Production course and will replace the Graduate School requirement of a comprehensive examination.

Degree Requirements: (34 hours)

1. Educational Technology Core: 22 hours
2. Education Technology Electives: 9 hours
3. College of Education and Health Professions research course: 3 hours
4. Culminating Student Portfolio: Completed during the last semester of course work.

Culminating EPortfolio

A Culminating Electronic Student Portfolio must be successfully completed in the last semester of course work in the EPortfolio Production course.

Total Hours 34

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Courses

ETEC 5203. Foundations of Educational Technology, 3 Hours.
Provides learners with a comprehensive survey of the major trends, issues, people, processes, and products that have significantly affected the evolution of the field of educational technology. (Typically offered: Spring and Summer)

ETEC 5213. Educational Media, 3 Hours.
Instruction in selecting, utilizing and evaluating instructional materials and equipment. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

ETEC 5243. Instructional Design Theory & Models, 3 Hours.
A study of the instructional development process as it pertains to the design and production of instructional materials which use modern technologies. Goal analysis, objectives, evaluation, instructional strategy development, production of an educational product, and revision of the instructional materials are considered. Prerequisite: Graduate standing. (Typically offered: Fall)

ETEC 5253. Information Technologies, 3 Hours.
Students perform intensive examinations of the role of new technologies and their implications for instructional practice. Emphasis is on identification and evaluation of new technologies in instructional environments. Establishing and maintaining learning environments, exploring selected theories and concepts, assessing potential uses of IT, and utilization of new technologies will occur. (Typically offered: Irregular)

ETEC 5263. Grant Writing in Instructional Technology, 3 Hours.
Students will have an opportunity to find grant funding sources, write a grant, and submit an actual grant proposal to an agency for consideration. Will survey research in instructional media over the past 60 years and learn specific criteria for reading and evaluating research reports and articles. Will investigate current issues and topics related to research and grant writing in instructional media. (Typically offered: Fall and Summer)

ETEC 5273. Advanced Design of Educational Media, 3 Hours.
Instruction in the planning and local production of instructional materials. Prerequisite: ETEC 5213. (Typically offered: Spring)

ETEC 5283. Field Experiences in Educational Technology, 3 Hours.
Field experience in educational technology settings. Prerequisite: Graduate standing and 6 hours of graduate work in educational technology. (Typically offered: Fall, Spring and Summer)

ETEC 5303. Learning with Computers in K-12 Classrooms, 3 Hours.
Students learn how technology can be used to support K-12 classroom environments. Various learning theories and technologies will be explored and projects will be developed that utilize technologies and current learning theories in K-12 settings. Emphasis is on identification, evaluation, and the effective use of technologies to support classroom environments. Prerequisite: Graduate standing. (Typically offered: Spring)

ETEC 5313. Principles in Visual Literacy, 3 Hours.
Students gain understanding of visual literacy research and learn to create graphics that support learning. Literature in the area of visual literacy and learning theories as well as tools that facilitate effective visual literacy will be used to create visuals that are clear, communicate well, and help enhance learner performance. (Typically offered: Spring and Summer)

ETEC 5373. Web Design, 3 Hours.
Students design, create, and analyze Web sites by applying processes, standards and techniques used to identify target audience; ensure compliance with copyright and disability laws, measure effectiveness, and coordinate Web design. Topics include copyright and fair use, user and task analysis, usability, accessibility, testing, search engine optimization, and web analytics. Prerequisite: ETEC 5213 or equivalent experience. (Typically offered: Spring) May be repeated for up to 3 hours of degree credit.
ETEC 5743. Internship. 3 Hours.
A supervised field placement in educational technology that provides experience consistent with the student’s professional goals and training emphasis. Internship experiences are planning and directed under the guidance of a faculty member. On-campus and on-site supervision is required. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ETEC 5981. Eportfolio Production. 1 Hour.
This is a capstone course that is typically taken in the last semester of coursework and designed to: 1) review key constructs presented within the Educational Technology curriculum; 2) provide ETEC students the opportunity for reflection relative to his/her learning of the key concepts; and 3) utilize technology to assemble student-created artifacts that demonstrate mastery of the key concepts. (Typically offered: Fall, Spring and Summer)

ETEC 600V. Master’s Thesis. 1-6 Hours.
Master’s Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ETEC 6053. Special Problems in Educational Technology. 3 Hours.
Individually designed and conducted studies of educational technology under the guidance of a faculty member. Negotiated learning contract with supervising faculty required before enrollment. On-campus supervision required. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ETEC 6223. Strategic Planning and IDT Programs. 3 Hours.
The course offers readings and experiences intended to develop strategic planning knowledge, values, attitudes, and skills in future instructional design and technology leaders. Topics covered include strategic planning and leadership. (Typically offered: Fall)

ETEC 6243. Advanced Instructional Design. 3 Hours.
This course explores advanced topics in instructional design to facilitate understanding of grounded models, advanced theories, and research. This course focuses on: 1) design and development of contextualized technology-supported learning environments; 2) analysis and application of advanced theoretical foundations of design; and 3) examination and critique of instructional design research. Prerequisite: ETEC 5243 or equivalent. (Typically offered: Spring)

ETEC 6253. Distance Learning. 3 Hours.
An intensive examination of the role of telecommunications and distance education technologies and their implications for educational practices. Emphasis is on techniques of development, utilization and evaluation of telecommunication and distance education technologies in classroom environments. (Typically offered: Spring and Summer)

ETEC 6393. Issues and Trends in Instructional Design and Technology. 3 Hours.
Critical challenges posed as a result of the increasing infusion of technology into the school and training environments are explored. The course prepares students to make and defend policy decisions and become conversant with current trends and issues in the field. (Typically offered: Fall)

Email: eleggrad@uark.edu (%20eleggrad@uark.edu)

Electrical Engineering Website (http://electrical-engineering.uark.edu/)

Degrees Conferred:
M.S.E.E. (ELEG)
Ph.D. in Engineering (ELEG) (See Engineering (p. 162))

Primary Areas of Faculty Research: Communications, digital signal processing and sensor networks; electronics and electronic packaging, analog and mixed signal, and integrated circuits; power systems, power electronics, renewable energy and control; RF and microwave, electromagnetics, antennas, and terahertz; semiconductors, nanotechnology, optoelectronics, photovoltaic and photonics

M.S.E.E. in Electrical Engineering
Requirements for Admission: A student must have a grade point average of at least 3.0 (based on a 4.0 system) on all undergraduate work, or a 3.0 average or above on the last 60 hours of undergraduate coursework.

Requirements for Graduate Degrees: In addition to the requirements of the Graduate School and the College of Engineering, the following departmental requirements must be satisfied by candidates for advanced degrees in electrical engineering.

1. Candidates for the Master of Science degree who present a thesis are required to complete a minimum of 24 semester hours of course work and six semester hours of thesis.
2. Candidates for the Master of Science degree who do not present a thesis are required to complete a minimum of 30 semester hours of course work.
3. Course work presented for the degree of Master of Science must include a minimum of 12 semester hours at the 5000- or 6000-level in electrical engineering. At least 15 (21 for non-thesis option) hours of the student’s graduate course work must be ELEG courses. No more than six hours of ELEG 588V may be presented for degree credit.
4. Students who complete a B.S. degree in Electrical Engineering at the University of Arkansas, Fayetteville, with a GPA of 3.5 or greater may count towards the M.S. degree up to six hours of ELEG graduate-level coursework completed as an undergraduate student.
5. Students who are applying for the coursework-only M.S.E.E. degree through distance education may have the GRE requirement waived providing the student meets the following conditions. The student must meet the following three criteria:
   a. The student has passed an equivalent exam (like the Fundamentals of Engineering);
   b. The student has a B.S. degree in electrical engineering from an ABET-Accredited program, or already completed a graduate degree (M.Sc. or higher) in an engineering related field; and
   c. The student has at least one year of professional working experience after completing a baccalaureate degree.
6. Candidates for the M.S.E.E. degree must take an M.S. Readiness Assessment exam during their first semester of graduate work. This exam is administered by the student’s major professor and advisory committee, and is designed to assess the student’s undergraduate
preparation for his or her graduate work. The student may be required to take whatever undergraduate courses are deemed necessary in addition to the graduate courses specified in items 1-3.

7. The M.S.E.E. degree includes a distance education option for which students complete most or all of their coursework using distance education courses. The use of this option is subject to approval by the student's major professor, and to the availability of sufficient distance education courses in the student's specialty areas to enable completion of the M.S.E.E.

8. The M.S.E.E. degree will allow transfer of up to nine credit hours of graduate level coursework from universities with which the University of Arkansas has a "1+1" M.S.E.E. exchange program. This is an exception to the Graduate School rule that only six hours may be transferred. Each course transferred must be graduate level, and must be approved for transfer by the Electrical Engineering Graduate Committee. The transferred courses will not count toward the M.S.E.E. requirement for 5000 or 6000 level ELEG courses.

9. Any other conditions as stipulated in the departmental guidelines for master's degrees.

Ph.D. in Electrical Engineering
In addition to the requirements of the graduate school, the program of study for the Ph.D. degree must satisfy the following:

1. The Ph.D. degree requires 36 hours of coursework, as follows:
   a. A student entering the Ph.D. program with a B.S.E.E. will be required to complete a minimum of 36 hours of graded coursework.
   b. A student entering the Ph.D. program with an M.S. degree will be required to complete a minimum of an additional 12 hours of graded coursework on the University of Arkansas, Fayetteville, campus.
   c. All Ph.D. students must complete a minimum of 12 hours of graded coursework on the University of Arkansas, Fayetteville, campus.

2. The course work specified in item (a) must include a minimum of 30 hours of course work at the 5000 and 6000 level, and at least 24 of these 5000- and 6000-level hours must be in electrical engineering.

3. The course work specified in item (a) must include GRSD 5003 or MEPH 5383.

4. The doctoral program must include at least 72 hours of course work and thesis or dissertation hours. A maximum of six of these hours may be thesis hours. The remaining hours that are not course work must be dissertation. The Graduate School requires a minimum of 18 hours of dissertation for graduation.

5. Candidates for the Ph.D. degree must take a Ph.D. Readiness Assessment exam during their first semester of graduate work. This exam is administered by the student's major professor and advisory committee, and is designed to assess the student's readiness to conduct research during his or her graduate work. The student may be required to take whatever undergraduate courses are deemed necessary in addition to the graduate courses specified above.

6. It is emphasized that the course work specified above represents minimums, and many students' programs will include more than this minimum, particularly if the student has an M.S.E.E. degree from a school that is not a recognized graduate school in the United States.

Graduate Faculty

Ang, Simon S., Ph.D. (Southern Methodist University), M.S.E.E. (Georgia Institute of Technology), B.S.E.E. (University of Arkansas), Professor, 1988.

Balda, Juan Carlos, Ph.D. (University of Natal), B.S. (Universidad Nacional del Sur), University Professor, 1989.

Chen, Zhong, Ph.D. (North Carolina State University), M.Eng. (National University of Singapore), B.S. (Zhejiang University), Assistant Professor, 2015.

Dix, Jeffrey, Ph.D., M.S., B.S.E.E., (University of Tennessee, Knoxville), Assistant Professor, 2018.

El-Ghazaly, Samir M., Ph.D. (University of Texas at Austin), M.S., B.S. (Cairo University), Distinguished Professor, 2007.

El-Shenawee, Magda O., Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Assiut University, Egypt), Professor, 2001.

Luo, Fang, Ph.D. (Huazhong University of Science and Technology), Assistant Professor, 2017.

Manasreh, Omar, Ph.D. (University of Arkansas), M.S. (University of Puerto Rico-Rio Piedras), B.S. (University of Jordan), Professor, 2003.

Mantooth, Alan, Ph.D. (Georgia Institute of Technology), M.S., B.S. (University of Arkansas), Distinguished Professor, 1998.

Martin, Terry W., Ph.D., M.S.E.E., B.S.E.E. (University of Arkansas), Professor, 1990.

McCann, Roy A., Ph.D. (University of Dayton), M.S.E.E., B.S.E.E. (University of Illinois), Professor, 2003.

Naseem, Hameed A., Ph.D., M.S. (Virginia Polytechnic State University), M.Sc. (Panjab University), University Professor, 1985.

Saunders, Robert F., M.S.E.E., M.S. (University of Arkansas), Instructor, 2012.

Spießhoefer, Silke, Ph.D., M.S.E.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, 2014.

Ware, Morgan, Ph.D. (North Carolina State University), B.S. (Florida State University), Assistant Professor, 2005.

Wu, Jingxian, Ph.D. (University of Missouri-Columbia), M.S. (Tsinghua University), B.S. (Beijing University of Aeronautics and Astronautics), Associate Professor, 2008.

Yu, Fisher, Ph.D. (Arizona State University), M.S., B.S. (Peking University), Associate Professor, 2008.

Zhao, Yue, Ph.D. (University of Nebraska-Lincoln), B.S. (Beijing University), Assistant Professor, 2015.

Courses

ELEG 4243. Analog Integrated Circuits. 3 Hours.
Theory and design techniques for linear and analog integrated circuits. Current mirrors, voltage to base emitter matching, active loads, compensation, level shifting, amplifier design techniques, circuit simulation using computer-assisted design programs. Prerequisite: ELEG 3224. (Typically offered: Irregular)

ELEG 4253. Nanotechnology in Engineering & Medicine. 3 Hours.
The objective of this course is to present a concise and concurrent introduction to Nanotechnology and its applications in engineering and medicine, particularly for nanoelectronics, nanosensors and nano-computing. This course presents basic aspects of the nanotechnology, its fabrication and imaging technologies and integration of biomolecules with electronic systems for the design of devices in nanoelectronics, nanobioelectronics and Nanomedicine. Prerequisite: Senior standing or instructor consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
ELEG 4283. Mixed Signal Test Engineering I. 3 Hours.
Overview of mixed signal testing, the test specification process, DC and parametric measurements, measurement accuracy, tester hardware, sampling theory, DSP-based testing, analog channel testing, digital channel testing. Prerequisite: Senior or graduate standing. (Typically offered: Irregular)

ELEG 4303. Introduction to Nanomaterials and Devices. 3 Hours.
This course provides the students with an introduction to nanomaterials and devices. The students will be introduced to the quantization of energy levels in nanomaterials, growth of nanomaterials, electrical and optical properties, and devices based on these nanomaterials, such as tunneling resonant diodes, transistors, detector, and emitters. Graduate students will be given additional or different assignments. Graduate students will be expected to explore and demonstrate an understanding of the material with a greater level of depth and breadth than the undergraduates.
Each group of students will have different expectations and grading systems. The instructor will prepare and distribute two distinct syllabi. Corequisite: ELEG 4203. Prerequisite: ELEG 3214 and PHYS 2074. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ELEG 4463L. Control Systems Laboratory. 3 Hours.
Experimental study of various control systems and components. The use of programmable logic controllers in the measurement of systems parameters, ladder-logic applications, process-control applications, and electromechanical systems. Prerequisite: ELEG 3924 and ELEG 3124. (Typically offered: Irregular)

ELEG 4603. Deterministic Digital Signal Processing System Design. 3 Hours.
Design of Digital Signal Processing systems with deterministic inputs. Sampling, quantizing, oversampling, ADC trade-offs, distortion, equalizers, anti-aliasing, coherency, frequency domain design, audio and video compression. Prerequisite: ELEG 3124. (Typically offered: Irregular)

ELEG 4623. Communication Systems. 3 Hours.
Various modulation systems used in communications. AM and FM fundamentals, pulse modulation, signal to noise ratio, threshold in FM, the phase locked loop, matched filter detection, probability of error in PSK, FSK, and DPSK. The effects of quantization and thermal noise in digital systems. Information theory and coding. Pre- or Corequisite: ELEG 3143. (Typically offered: Irregular)

ELEG 487V. Special Topics in Electrical Engineering. 1-3 Hours.
Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ELEG 4963. CPLD/FPGA Based System Design. 3 Hours.
Field Programmable logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Corequisite: Lab component. Prerequisite: ELEG 4914. (Typically offered: Irregular) This course is cross-listed with CSCE 4353.

ELEG 4983. Computer Architecture. 3 Hours.
Design of a single board computer including basic computer organization, memory subsystem design, peripheral interfacing, DMA control, interrupt control, and bus organization. Prerequisite: ELEG 3924. (Typically offered: Irregular) This course is cross-listed with CSCE 4213.

ELEG 5173L. Digital Signal Processing Laboratory. 3 Hours.
Use of DSP integrated circuits. Lectures, demonstrations, and projects. DSP IC architectures and instruction sets. Assembly language programming. Development tools. Implementation of elementary DSP operations, difference equations, transforms and filters. Prerequisite: ELEG 3124. (Typically offered: Irregular)

ELEG 5193L. Advanced DSP Processors Laboratory. 3 Hours.
Familiarization with, and use of, advanced DSP processors. Parallel processor configurations, timing consideration, specialized programming techniques, and complex pipelines. Prerequisite: ELEG 5173L. (Typically offered: Irregular)

ELEG 5203. Semiconductor Devices. 3 Hours.
Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of p-n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5213. Integrated Circuit Fabrication Technology. 3 Hours.
Theory and techniques of integrated circuit fabrication technology: crystal growth, chemical vapor deposition, impurity diffusion, oxidation, ion implantation, photolithography and medullization. Design and analysis of device fabrication using SUPREM and SEDAN. In-process analysis techniques. Student review papers and presentations on state of the art fabrication and device technology. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Irregular)

ELEG 5223. Design and Fabrication of Solar Cells. 3 Hours.
Solar insolation and its spectral distribution/ p-n junction solar cells in dark and under illumination; solar cell parameters efficiency limits and losses; standard cell technology; energy accounting; design of silicon solar cells using simulation; fabrication of designed devices in the lab and their measurements. Students cannot receive credit for both ELEG 4223 and ELEG 5223. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Irregular)

ELEG 5243L. Microelectronic Fabrication Techniques and Procedures. 3 Hours.
The Thin-Film Fabrication course is designed to prepare students to use the thin-film equipment and processes available at the Engineering Research Center's thin-film cleanroom. The process modules to be trained on include lithography, metal deposition and etching, oxide deposition, growth and etching, reactive dry etching, tantalum anodization, photodefined spin-on dielectric and electroplating. The related metrology modules include microscope inspection, spectrophotometric measurement of oxide, profilometry and four-point probe measurements. Prerequisite: ELEG 5273. (Typically offered: Irregular)

ELEG 5253L. Integrated Circuit Design Laboratory I. 3 Hours.
Design and layout of large scale digital integrated circuits. Students design, check, and simulate digital integrated circuits which will be fabricated and tested in I.C. Design Laboratory II. Topics include computer-aided design, more in-depth coverage of topics from ELEG 4233, and design of very large scale chips. Prerequisite: ELEG 4233 or ELEG 5923. (Typically offered: Irregular)
This course is cross-listed with MEEG 5273.

ELEG 5273. Electronic Packaging. 3 Hours.
An introductory treatment of electronic packaging, from single chip to multichip, including materials, substrates, electrical design, thermal design, mechanical design, package modeling and simulation, and processing considerations. Credit cannot be earned for both MEEG 5273 and ELEG 5273. Prerequisite: Graduate standing. (Typically offered: Irregular)
This course is cross-listed with MEEG 5273.

ELEG 5283. Mixed Signal Test Engineering II. 3 Hours.
Focus calibrations, DAC testing, ADC testing, DIB design, Design for Test, Data Analysis, and Test Economics. Prerequisite: ELEG 4283. (Typically offered: Irregular)

ELEG 5293L. Integrated Circuits Fabrication Laboratory. 3 Hours.
Experimental studies of silicon oxidation, solid-state diffusion, photolithographical materials and techniques, bonding and encapsulation. Fabrication and testing of PN diodes, NPN transistors and MOS transistors. Prerequisite: ELEG 5213. (Typically offered: Irregular)
ELEG 5313. Power Semiconductor Devices. 3 Hours.
Carrier transport physics; breakdown phenomenon in semiconductor devices; power bipolar transistors, thyristors, power junction field-effect transistors, power field-controlled diodes, power metal-oxide-semiconductor field-effect transistors, and power MOS-bipolar devices. Prerequisite: ELEG 4203 or graduate standing. (Typically offered: Irregular)

ELEG 5323. Semiconductor Nanostructures I. 3 Hours.
This course is focused on the basic theoretical and experimental analyses of low dimensional systems encountered in semiconductor heterojunctions and nanostructures with the emphasis on device applications and innovations. Prerequisite: ELEG 4203 or instructor permission. (Typically offered: Irregular)

ELEG 5333. Semiconductor Nanostructures II. 3 Hours.
This course is a continuation of ELEG 5323 Semiconductors Nanostructures I. It is focused on the transport properties, growth, electrical and optical properties of semiconductor nanostructures, and optoelectronic devices. Prerequisite: ELEG 5323 or instructor permission. (Typically offered: Irregular)

ELEG 5343. Organic Electronics Technology. 3 Hours.
Students become familiar with recent developments in and process technology for organic material based devices and sensors in the classroom, but also gain hands on experience with fabrication processes using micro-fabrication tools in the lab. (Typically offered: Irregular)

ELEG 5353. Semiconductor Optoelectronic Devices. 3 Hours.
This course will provide graduate students a detailed background in semiconductor optoelectronic devices such as light emitting diodes and lasers, photodetectors, solar cells, modulators. The applications of these devices will also be discussed. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Spring Odd Years)

ELEG 5363. Semiconductor Material and Device Characterization. 3 Hours.
This course provides an overview of semiconductor characterization techniques in industry: Electrical measurements, Optical measurements, Electron and ion beam measurements, X-ray and probe measurements. Prerequisite: ELEG 4203 or ELEG 5203 and instructor consent. (Typically offered: Irregular)

ELEG 5383. Introduction of Integrated Photonics. 3 Hours.
This course is designed to provide junior and senior graduate students detailed knowledge of integrated photonics by using silicon photonics as an example. The course covers a cycle of design, fabrication, and testing of photonic devices by using analytic and numerical methods. The course will focus on designing an interferometer, which is widely used in communication and sensing applications. Students will be exposed to the state-of-art design simulation tool, Numerical, to design the photonic circuits and to evaluate the performances. In the course project, students will extend the design rules to design a set of components to be used for integrated microwave photonics based on Ge on Si, SiGeSn, or Si3N4 on sapphire platform. Prerequisite: ELEG 4203 and ELEG 5353. (Typically offered: Irregular)

ELEG 5393. Electronic Materials. 3 Hours.
This is a lecture course designed to provide a fundamental introduction to materials science. Upon this fundamental basis, we will survey many of the properties and materials relevant to modern electronics. This course will cover semiconductors, but only briefly. The focus will be on properties and materials not generally well covered in other electrical engineering courses from a materials perspective. This will include, but not be limited to metals, dielectrics, and magnetic and optical materials. Prerequisite: Graduate standing; A knowledge of quantum mechanics is helpful but not required. (Typically offered: Spring)

ELEG 5403. Control Systems. 3 Hours.
Mathematical modeling of dynamic systems, stability analysis, control systems architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics on microprocessor implementation. Credit not given for both ELEG 4403 and ELEG 5403. Prerequisite: Graduate standing or ELEG 3124. (Typically offered: Irregular)

ELEG 5413. Modern Control Systems. 3 Hours.
A second course in linear control systems. Emphasis on multiple-input and multiple-output systems: State-space analysis, similarity transformations, eigenvale and eigenvector decomposition, stability in the sense of Lyapunov, controllability and observability, pole placement, quadratic optimization. Credit not given for both ELEG 4413 and ELEG 5413. Prerequisite: ELEG 5403 or equivalent. (Typically offered: Irregular)

ELEG 5423. Optimal Control Systems. 3 Hours.
Basic concepts, conditions for optimality, the Hamilton Jacobi equation, structure and properties of optimal systems. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5433. Digital Control Systems. 3 Hours.
Signal processing in continuous-discrete systems. System modeling using the z-transform and state-variable techniques. Analysis and design of digital control systems. Digital redesign for continuous control. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5443. Nonlinear Systems Analysis and Control. 3 Hours.
Second-order nonlinear systems. Nonlinear differential equations. Approximate analysis methods. Lyapunov and input-output stability. Design of controllers, observers, and estimators for nonlinear systems. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5453. Adaptive Filtering and Control. 3 Hours.

ELEG 5463. Biomedical Control Systems. 3 Hours.
Study of control systems analysis and design as applied to human physiological systems: Modeling and dynamics of biological processes, biomedical sensors, time and frequency domain analysis, identification of physiological systems. Overview of medical device regulations. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5473. Power System Operation and Control. 3 Hours.
Study of the control and operation of electric power systems: Modeling, dynamics, and stability of three-phase power systems. Design and implementation of control systems related to generation and transmission. Overview of the related industry and government regulations for power system protection and reliability. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5503. Design of Advanced Power Distribution Systems. 3 Hours.
ELEG 5503 Design of Advanced Power Distribution Systems. 3 credit hours. Design considerations of electric power distribution systems, including distribution transformer usage, distribution system protection implementation, primary and secondary networks design, applications of advanced equipment based on power electronics, and use of capacitors and voltage regulation. Students may not receive graduate credit for both ELEG 4503 and ELEG 5503. Prerequisite: ELEG 3304 or graduate standing. (Typically offered: Irregular)

ELEG 5513. Power Systems Analysis. 3 Hours.
Modeling and analysis of electric power systems: Energy sources and conversion; load flow analysis; reference frame transformations; symmetrical and unsymmetrical fault conditions; load forecasting and economic dispatch. Credit not given for both ELEG 4513 and ELEG 5513. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5523. Electric Power Quality. 3 Hours.
The theory and analysis of electric power quality for commercial, industrial and residential power systems. Specific topics include harmonics, voltage sags, wiring and grounding, instrumentation, distributed generation and power electronic systems, and site surveys. Case studies complement the theoretical concepts. Prerequisite: ELEG 3304 or graduate standing. (Typically offered: Irregular)
ELEG 5533. Power Electronics and Motor Drives. 3 Hours.
Fundamentals of power electronics, diode bridge rectifiers, inverters, general concepts on motor drives, induction motor drives, synchronous motor drives, and DC motor drives. Students may not receive credit for both ELEG 4533 and ELEG 5533. Prerequisite: Graduate standing or ELEG 3224 and ELEG 3304. (Typically offered: Irregular)

ELEG 5543. Introduction to Power Electronics. 3 Hours.
Present basics of emerging areas in power electronics and a broad range of topics such as power switching devices, electric power conversion techniques and analysis, as well as their applications. Students may not receive credit for both ELEG 5543 and ELEG 4543. Prerequisite: ELEG 2114 and ELEG 3214, or graduate standing. (Typically offered: Irregular)

ELEG 5553. Switch Mode Power Conversion. 3 Hours.
Basic switching converter topologies, control scheme of switching converters, simulation of switching converters, resonant converters, isolated converters, dynamic analysis of switching converters. Students will not receive graduate credit for both ELEG 4553 and ELEG 5553. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5563. EMI in Power Electronics Converters: Generation, Propagation and Mitigation. 3 Hours.
Concepts of electro-magnetic-interference issues in power electronics converters. Basic concepts of EMI measurement, modeling and mitigation, with a focus on conducted EMI in power electronics converters. The course is structured with lectures and a lab session. Students can not receive credit for both ELEG 4563 and ELEG 5563. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5613. Introduction to Telecommunications. 3 Hours.
Overview of public and private telecommunication systems; traffic engineering; communications systems basics, information technology, electromagnetics, and data transmission. Prerequisite: ELEG Graduate Standing or ELEG 3124. (Typically offered: Irregular)

ELEG 5623. Information Theory. 3 Hours.
Continuous and discrete source and channel models, measure of information, channel capacity, noisy-channel coding theorem, coding and decoding techniques. Prerequisite: ELEG 3143 or ELEG 4623 or graduate standing. (Typically offered: Irregular)

ELEG 5633. Detection and Estimation. 3 Hours.
Binary and multiple decisions for single and multiple observations; sequential, composite, and non-parametric decision theory; estimation theory; sequential, non-linear, and state estimation; optimum receiver principles. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5653. Artificial Neural Networks. 3 Hours.
Fundamentals of artificial neural networks, both theory and practice. Teaches basic concepts of both supervised and unsupervised learning, and how they are implemented using artificial neural networks. Topics include the perceptron, back propagation, the competitive Hamming net, self-organizing feature maps, topological considerations, requirements for effective generalization, subpattern analysis, etc. Prerequisite: MATH 2584. (Typically offered: Irregular)

ELEG 5663. Communication Theory. 3 Hours.
Principles of communications. Channels and digital modulation. Optimum receivers and algorithms in the AWGN and fading channels. Coherent, non-coherent detectors and matched filters. Bounds on the performance of communications, and comparison of communications systems. Background in stochastic processes and probabilities, communication systems is desirable. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

ELEG 5693. Wireless Communications. 3 Hours.
Comprehensive course in fast developing field of wireless mobile/cellular personal telecommunications. Topics include cellular system structures, mobile radio propagation channels, etc. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5703. RF & Microwave Design. 3 Hours.
An introduction to microwave design principles. Transmission lines, passive devices, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as it relates to radar and communications systems will be reviewed. Selected topics for device fabrication and measurements will be covered. Cannot get credit if student has taken ELEG 4703. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 5723. Advanced Microwave Design. 3 Hours.
This course is an advanced course in microwave design building on the introduction to microwave design course. A detailed discussion of active devices, biasing networks, mixers, detectors, Microwave Monolithic Integrated Circuits (MMIC), and wideband matching networks will be provided. In addition, a number of advanced circuits will be analyzed. Prerequisite: ELEG 3704 and ELEG 4703 or ELEG 5703. (Typically offered: Irregular)

ELEG 5763. Advanced Electromagnetic Scattering & Transmission. 3 Hours.
Reflection and transmission of electromagnetic waves from a flat interface, the Poynting theorem, the complex and average power, the rectangular wave guides, TE and TM modes, radiation from antennas in free space and introduction to computational electromagnetics. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 5773. Electronic Response of Biological Tissues. 3 Hours.
Understand the electric and magnetic response of biological tissues with particular reference to neural and cardiovascular systems. Passive and active forms of electric signals in cell communication. We will develop the central electrical mechanisms from the membrane channel to the organ, building on those that are common to many electrically active cells in the body. Analysis of Nernst equation, Goldman equation, linear cable theory, and Hodgkin-Huxley Model of action potential generation and propagation. High frequency response of tissues to microwave excitation, dielectric models for tissue behavior, Debye, Cole-Cole models. Role of bound and free water on tissue properties. Magnetic response of tissues. Experimental methods to measure tissue response. Applications to Electrocardiography & Electroencephalography, Microwave Medical Imaging, RF Ablation will be discussed. Students may not receive credit for both ELEG 4773 and ELEG 5773. Prerequisite: MATH 2584, ELEG 3704 or BIOL 2533 or equivalent. (Typically offered: Irregular)

ELEG 5783. Introduction to Antennas. 3 Hours.
Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Students cannot get credit for ELEG 5783 if they have taken ELEG 4783. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 587V. Special Topics in Electrical Engineering. 1-3 Hour.
Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ELEG 588V. Special Problems. 1-6 Hour.
Opportunity for individual study of advanced subjects related to a graduate electrical engineering program to suit individual requirements. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
ELEG 5903. Engineering Technical Writing. 3 Hours.
In this course, advanced graduate students (PhD candidates and selected MS students) will be trained in rephrasing and preparing technical papers, including scientific reports. Illustrations step by step will be explained. Each student is required to prepare technical papers based on their own research results and will be guided from selecting a title to a finished product. The emphasis will be placed on the structures of the articles including figures and table preparation, abstract writing, citations and references, and acknowledgments. The students will also be trained to prepare letters to the journals' editors and how to respond to reviewers' comments. Prerequisite: Graduate standing. (Typically offered: Fall)

ELEG 5914. Advanced Digital Design. 4 Hours.
To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Students may not receive credit for both ELEG 5914 and ELEG 4914 or CSCE 4914. Corequisite: Lab component. Prerequisite: ELEG 2904 or CSCE 2114. (Typically offered: Fall)

ELEG 5923. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both ELEG 4233 and ELEG 5923. Prerequisite: ELEG 3214 or ELEG 3933 and MATH 2584. (Typically offered: Fall)

ELEG 5993. Mixed-signal Modeling and Simulation. 3 Hours.
Study of basic analog, digital & mixed signal simulation solution methods. Modeling with hardware description languages. Use of state-of-the-art simulators and HDLs. Students may not receive credit for both ELEG 4293 and ELEG 5993. Prerequisite: ELEG 3224 or graduate standing. (Typically offered: Irregular)

ELEG 600V. Master's Thesis. 1-6 Hours.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ELEG 6801. Graduate Seminar. 1 Hour.
Papers presented by candidates for the Doctor of Philosophy degree in electrical engineering on current research or design problems in the field of electrical engineering. (Typically offered: Fall, Spring and Summer)

ELEG 700V. Doctoral Dissertation. 1-18 Hours.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Degrees Conferred:
M.A.T. in Elementary Teaching
M.Ed. in Elementary Education

Graduate Certificates Offered (non-degree):
STEM Education for Early Childhood (p. 365) (K-4)

Program Description: The University of Arkansas offers the Bachelor of Science (B.S.E.) degree in Childhood Education and the Master of Arts in Teaching (M.A.T.) degree in Elementary Education. These combined degree programs are one of the options at the University of Arkansas that lead to initial teacher licensure in Elementary Education (Pre-Kindergarten through Grade 6). Students who obtain their B.S.E. degree from the University of Arkansas will have completed the prerequisite course requirements for entry into the M.A.T. program. Students who obtain a bachelors degree from another university and/or in a program area other than Elementary Education must have their transcripts evaluated by a Elementary Education program adviser to determine what deficiencies must be met before they can be considered for admission into the M.A.T. program. The M.A.T. degree program is a 33-semester-hour program. To be recommended for licensure by the University of Arkansas, Fayetteville, campus, students must complete the M.A.T. degree program or the undergraduate Elementary Licensure program (see undergraduate catalog for more information). Students also choose a concentration from among English as a Second Language, Reading, Gift and Talented, or STEM Education.

The program also offers coursework toward a graduate certificate in STEM Education for Early Childhood (K-4).

M.A.T. in Elementary Education with ESL for K-6 Candidates Concentration
See also the general Graduate School requirements (p. 457) for the M.A.T. Degree.

Prerequisites to Degree Program
Enrollments will be limited in upper division professional studies courses in the Childhood Education B.S.E. Program. In addition, the number of students accepted into the M.A.T. Program in Elementary Education will be contingent upon availability of placements with partnership schools. Specific application procedures, screening, and selection criteria are in effect to limit course enrollments and acceptance to the M.A.T. program. Please contact your childhood education program faculty adviser for details regarding the selective admission process. Admission requirements for the M.A.T. degree program for initial certification are as follows:

1. Completion of an appropriate undergraduate degree program.
2. Cumulative GPA of 3.00, or 3.00 in the last 60 hours of the baccalaureate degree.
3. Admission to the Graduate School.
4. Screening/acceptance into internship, which includes an admission portfolio.
5. Admission to the Master of Arts in Teaching program.
6. Successful completion of the required criminal background check. Background check materials must be submitted by May 1st prior to the internship year.
7. Completion of the pre-education core with a minimum of “C” in all courses.
8. Completion of all prerequisite courses in teaching field.
9. Payment of internship fee.

Requirements for the Master of Arts in Teaching Degree
A minimum of 33 hours of course work is required in one of the following concentrations.

Students should also be aware of Graduate School requirements with regard to master's degree.

M.A.T. in Elementary Teaching with STEM for K-6 Candidates Concentration

See also the general Graduate School requirements (p. 457) for the M.A.T. Degree.

Prerequisites to Degree Program

Enrollments will be limited in upper division professional studies courses in the Childhood Education B.S.E. Program. In addition, the number of students accepted into the M.A.T. Program in Elementary Education will be contingent upon availability of placements with partnership schools. Specific application procedures, screening, and selection criteria are in effect to limit course enrollments and acceptance to the M.A.T. program. Please contact your childhood education program faculty adviser for details regarding the selective admission process. Admission requirements for the M.A.T. degree program for initial certification are as follows:

1. Completion of an appropriate undergraduate degree program.
2. Cumulative GPA of 3.00, or 3.00 in the last 60 hours of the baccalaureate degree.
3. Admission to the Graduate School.
4. Screening/acceptance into internship, which includes an admission portfolio.
5. Admission to the Master of Arts in Teaching program.
6. Successful completion of the required criminal background check. Background check materials must be submitted by May 1st prior to the internship year.
7. Completion of the pre-education core with a minimum of “C” in all courses.
8. Completion of all prerequisite courses in teaching field.
9. Payment of internship fee.

Requirements for the Master of Arts in Teaching Degree

A minimum of 33 hours of course work is required in one of the following concentrations.

Students should also be aware of Graduate School requirements with regard to master’s degree.

Requirements for the M.Ed. in Elementary Education

See also the general Graduate School requirements (p. 457) for the M.Ed. Degree.

Requirements for the Master of Education Degree:

(Minimum 33 hours.) Candidates for the master’s degree in elementary education must complete a minimum of 33 hours of graduate course work: 21 hours from courses in elementary education (ELED) with 15 hours from the following areas – English as a second language (ESLM), language arts, mathematics, science, children’s literature, social studies, early childhood education, reading, special education, or general elementary education; 3 hours of electives; and 9 core hours, including ESRM 5013 Research Methods in Education and three hours from each of the areas listed below. The required research course (ESRM 5013) is to be taken during the first 12 hours of degree coursework and the CIED 5983 Practicum in Curriculum & Instruction is taken at the end. (The major adviser must approve all courses.)

All candidates who receive the master’s degree in elementary education must pass the master’s comprehensive examination which will consist of the defense of the results of an action research project. The M.Ed. is designed for experienced teachers who have the goal of expanding professional competence. The M.Ed. program does not meet requirements for state licensure. Students seeking state licensure should pursue enrollment in the M.A.T. program in Childhood Education (preK – Grade 4) or the B.S.E. program in Childhood Education.
Engineering Management (EMGT)

Gregory S. Parnell
Program Director
4207 Bell Engineering Center

Email: msom@uark.edu

Engineering Management Website (https://engineering-management.uark.edu/)

Degree Offered:
M.S. in Engineering Management (EMGT)

The Master of Science in Engineering Management prepares engineers to lead and manage teams, projects, and organizations with technical workforces to meet strategic objectives. Students will increase their engineering and management knowledge to enable them to develop and deliver new products and services to create value for their organization and customers.

Mode of Delivery: Course work for the Master of Science in Engineering Management is delivered entirely online.

M.S. in Engineering Management

Admissions requirements:

1. Conferred bachelor of science in engineering degree from an engineering program accredited by the Engineering Accreditation Commission of ABET (or equivalent accreditation).
2. A grade point average (GPA) of 3.0 or better (A=4.0) on all course work taken prior to the engineering bachelor degree, or a GPA of 3.0 or better on the last 60 hours of course work taken prior to receipt of the engineering bachelor degree.
3. Applicants with a 3.0 or better GPA are not required to take the GRE.

Requirements for the Master of Science in Engineering Management:

Total Hours 30

Comprehensive Exam

- A minimum of 80 percent of course work, including all core and engineering sequence courses, must be completed prior to the comprehensive oral exam.

Courses

EMGT 5033. Introduction to Engineering Management. 3 Hours.
Provides foundation knowledge of engineering management. Introduces quantitative skills required to lead a diverse, technical workforce, analyze financial data, lead technical projects, develop alternative solutions and communicate complex concepts. Apply decision and risk tools. Introduces basic engineering management principles. (Typically offered: Irregular)

EMGT 5053. Tradeoff Analytics for Engineering Management. 3 Hours.
Explore the use of trade-off analytics as a tool to assist with infrastructure development and preservation efforts, with integrated examples investigating maritime and multimodal infrastructure. Learn sound methodology to identify stakeholders, stakeholder objectives, and measures of performance for infrastructure improvement programs. Apply descriptive, predictive, and prescriptive data, models, and analytics to evaluate current infrastructure status and identify potential improvements. Develop and implement an Excel™ based decision support tool to provide trade-off analytics insights and assess best value-per-dollar infrastructure decisions. Prerequisite: EMGT 5033 or instructor consent or department consent. (Typically offered: Fall, Spring and Summer)

EMGT 514V. Special Topics in Engineering Management. 1-3 Hour.
Consideration of current engineering management topics not covered in other courses. May be repeated for up to 6 hours of degree credit. Prerequisite: Graduate standing and must be admitted to the Master of Science in Engineering Management Program, or the Project Management Graduate Certificate Program, or be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

Engineering, College of (ENGR)

Norman Dennis
Associate Dean
4183 Bell Engineering Center
479-575-7455
Email: ndennis@uark.edu

College of Engineering Website (https://engineering.uark.edu)

Degrees Conferred:
M.S.E., Ph.D. (ENGR)

The College of Engineering offers instruction in engineering leading to the degrees of Master of Science in Biological, Biomedical, Chemical, Civil, Computer, Electrical, Environmental, Industrial, and Mechanical Engineering as well as a Master of Science in Operations Management and a Doctor of Philosophy in Engineering and Computer Science. Descriptions and requirements of these degree programs may be found under separate departmental headings. In addition, a Master of Science in Engineering (M.S.E.) degree is available for students who wish to take
a broader range of courses than is usually permitted for the designated degrees listed above.

**Master of Science in Engineering**

**General Requirements for the Master of Science Degrees in the College of Engineering:** In addition to the requirements of the Graduate School, the following requirements have been established by the College of Engineering for all Master of Science graduates:

1. Complete a minimum of 30 semester hours of graduate-level credit beyond the bachelor's degree that includes 50 percent graduate-level credit in the field of study.
2. Earn a minimum cumulative grade-point average of 3.00 on all graduate courses attempted.

Departments may set higher grade standards and additional requirements.

**Master of Science in Engineering Degree:** The M.S.E. degree is available as a distance-delivered option. Courses are offered in five 8-week terms each year. A Master of Science in Engineering (M.S.E.) degree is available for students who wish to take a broader range of courses than is usually permitted for the designated degrees listed in the previous paragraph.

**Prerequisites to the Master of Science in Engineering Degree:** Students with a B.S. degree from any engineering program accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology are normally accepted into the M.S.E. program.

**Requirements for the Master of Science in Engineering Degree:**

The general minimum requirements of the Graduate School for Master of Science degrees must be met. The graduate faculty of the College of Engineering has established the following specific requirements for the Master of Science in Engineering degree:

1. Complete a minimum of 30 semester hours of graduate-level credit beyond the bachelor’s degree. Up to 6 semester hours of project research can be used to satisfy the required 30 semester hours of credit by writing a project paper approved by the departmental faculty.
2. Course requirements:
   a. One 3-hour course from each of the following four areas for a total of 12 hours: mathematics, computer applications, technical communications, and engineering management;
   b. Three 3-hour courses from a single engineering emphasis with the approval of the advisory committee;
   c. Nine additional graduate-level hours from any area with the approval of the advisory committee, with:
   d. A maximum of four 4000-level graduate courses, with the remainder at the 5000 level or higher; and
   e. A maximum of four Operations Management (OMGT) courses
3. Earn a minimum cumulative grade-point average of 3.00 on all graduate courses attempted. Minimum grades of “B” are required on 80 percent of the graduate hours taken for credit towards the M.S.E. degree.
4. Satisfactorily complete a comprehensive examination.

The program of study for each candidate will be determined by conference with the major professor and with advice from the candidate's graduate committee.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

**Doctor of Philosophy in Engineering**

**General Requirements for the Doctor of Philosophy Degree in Engineering**

The program of study leading to the degree of Doctor of Philosophy in Engineering will vary, depending upon the major field of study and the objective of the prospective candidate. Program requirements balance credit hours for required coursework, research, and dissertation preparation.

In addition to the requirements of the Graduate School and those established by the College of Engineering for all doctoral graduates, the following requirements have been established for INEG doctoral graduates:

1. A minimum of 72 semester hours of graduate-level credit beyond the bachelor’s degree.
2. A minimum of 42 semester hours of graduate-level credit beyond the master’s degree of which a minimum of 21 semester hours shall be approved graduate level courses and a minimum of 21 semester hours of dissertation hours (INEG 700V).
3. Students admitted with a B.S. degree must complete their initial 30 semester hours out of the 72 total at the 5000-level or above, with the remaining 42 semester hours subject to the rule stated in paragraph 2 above.
4. Ph.D. students in Industrial Engineering must pass a Qualifier Exam over a subset of topics in Industrial Engineering determined by the student’s Doctoral Advisory Committee. Students may fail the exam once and retake it. Students who fail the exam twice will be dismissed from the Ph.D. program.

Departments may set higher grade standards and additional requirements. (See department requirements.) Students from non-engineering backgrounds typically will be required to take selected fundamental engineering courses.

Major areas of study for the Doctor of Philosophy Degree in Engineering are as follows:

- Biological Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical Engineering
- Industrial Engineering
- Mechanical Engineering

The Graduate School also offers a Doctor of Philosophy in Computer Science (p. 119).

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).
Courses
GNEG 5103. Globalization and Innovation. 3 Hours.
Integration of engineering in the globalized business environment. Innovation and integration models. Global survival skills. International organizational value-chain. Conducting business with emerging nations. Case studies; field trips; guest lectures. Experiential learning design component. Taken by students participating in departmental approved study abroad programs. May not earn credit for GNEG 3103 or GNEG 4103. (Typically offered: Irregular)

GNEG 550V. Master's Research Project. 1-3 Hour.
Required course for MSE students who wish to complete a Master's research project as part of their degree program. Prerequisite: Instructor permission. (Typically offered: Irregular)

GNEG 5801. Parallel Cooperative Education. 1 Hour.
Part time supervised experience in industry where students apply focused, discipline specific, classroom and research skills to problems directly related to their area of study in a professional work place setting. May be repeated for up to 3 hours of non-degree credit. Prerequisite: Instructor permission. (Typically offered: Fall, Spring and Summer)

GNEG 5811. Alternating Cooperative Education. 1 Hour.
Full time supervised experience in industry where students apply focused, discipline specific, classroom and research skills to problems directly related to their area of study in a professional work place setting. May be repeated for up to 3 hours of non-degree credit. Prerequisite: Instructor permission. (Typically offered: Fall, Spring and Summer)

GNEG 590V. Special Topics. 1-4 Hour.
Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. (Typically offered: Irregular) May be repeated for up to 16 hours of degree credit.

English (ENGL)

Director of Graduate Studies
333 Kimpel Hall
479-575-4301
Email: lhinrich@uark.edu

English Department Website (https://fulbright.uark.edu/departments/english/)

Degrees Conferred:
M.A., Ph.D. (ENGL)
M.F.A. in Creative Writing (CRWR)

Graduate Certificate Offered (non-degree):
Technical Writing and Public Rhetorics (TWRHGC)

Primary Areas of Faculty Research: English, American, and Angloculture; creative writing; poetry; literary translation; rhetoric and composition; literary theory; linguistics; comparative literature; literary theory; service-learning; gender studies; peace and conflict studies; indigenous studies; southern studies; post-colonialism; science fiction; popular culture; American studies; African American studies; Latino/Latina studies; Central American literature; Muslim literature and culture, European studies; medieval Welsh; medieval and renaissance studies; digital humanities; sustainability and ecocriticism; folklore; music and literature; theatre; archival studies; politics and literature; religion and literature; psychoanalysis and literature; technology and literature; social media; film studies; the visual arts as text; professionalization in the humanities.

Areas of Study: Under each of the degree and certificate programs, the following areas of study are among those available:

- Master of Arts — generalist approach to history and criticism of literature in English; specialized approaches in the following areas: comparative literature; cultural studies; ethnic and regional literatures; gender and sexuality; medieval literature; Modern American literature; rhetoric, composition, and literacy.
- Master of Fine Arts — fiction, poetry, translation.
- Doctor of Philosophy — Medieval literature; Renaissance literature to 1660; nineteenth-century British literature; modern and contemporary British literature; American literature to 1900; modern and contemporary American literature; linguistics; literary criticism and theory; American southern literature and culture; world literature and culture in English; American multiculturalism; gender studies; film and media studies; popular culture and popular genres; literary history; rhetoric, composition, and literacy.
- Graduate Certificate in Technical Writing and Public Rhetorics — document design, writing for online audiences, technical editing, technical writing praxis and practice.

Admission to Degree Programs and Certificate Program: Detailed instructions for the application process are on the English Department website (http://english.uark.edu/). Each applicant must submit a separate application to the Graduate School and either the Director of Graduate Studies (for the M.A. and Ph.D. programs), the Director of Creative Writing (for the M.F.A. program), or the Director of Technical Writing and Public Rhetorics (for the Graduate Certificate program).

M.A. in English
Requirements for the Master of Arts in English Degree:

For further information about the Master of Arts Degree program, visit the "M.A./Ph.D. in English" pages (http://fulbright.uark.edu/departments/english/graduate/ma-phd-english/) on the English Department website.

In addition to the general requirements of the Graduate School, the department stipulates that the following conditions be met:

1. Each candidate must complete a total of 30 credit hours.
2. Each candidate must take:
   a. ENGL 5203 Introduction to Graduate Studies, one course emphasizing theory, and two courses at the seminar (6000) level
   b. ENGL 5213 Portfolio Workshop (and successfully present a portfolio for the final project) or six thesis hours (and successfully defend a thesis for the final project)
      i. The candidate's portfolio or thesis, which will be used to fulfill the comprehensive exam requirement for the degree, is evaluated by faculty committee and scored Pass/Fail.
3. Each candidate must also select either the Generalist Concentration or the Specialist Concentration and take the following courses:
   a. Generalist Concentration (Portfolio Track)
      i. Two courses selected from two of the following three areas: Medieval Literature and Culture; Renaissance Literature and Culture; Restoration and Eighteenth-Century British Literature and Culture
ii. Three courses selected from three of the following five areas (at least one course being in British literature and at least one course being in American literature): Nineteenth-Century British Literature and Culture; Modern and Contemporary British Literature and Culture; American Literature and Culture before 1900; Modern and Contemporary American Literature and Culture; World Literature and Culture in English

iii. Three elective courses offered by the Department of English or as approved by the student's graduate advisor

b. Generalist Concentration (Thesis Track)
   i. Two courses selected from two of the following three areas: Medieval Literature and Culture; Renaissance Literature and Culture; Restoration and Eighteenth-Century British Literature and Culture

ii. Three courses selected from three of the following five areas (at least one course being in British literature and at least one course being in American literature): Nineteenth-Century British Literature and Culture; Modern and Contemporary British Literature and Culture; American Literature and Culture before 1900; Modern and Contemporary American Literature and Culture; World Literature and Culture in English

iii. Two elective courses offered by the Department of English or as approved by the student's graduate advisor

c. Specialist Concentration (Portfolio Track)
   i. Five courses in one of the following areas of specialization: Comparative Literature; Cultural Studies; Ethnic and Regional Literatures; Gender and Sexuality; Medieval Literature; Modern American Literature; Rhetoric, Composition, and Literacy

   ii. Three elective courses offered by the Department of English or as approved by the student's graduate advisor

d. Specialist Concentration (Thesis Track)
   i. Five courses in one of the following areas of specialization: Comparative Literature; Cultural Studies; Ethnic and Regional Literatures; Gender and Sexuality; Medieval Literature; Modern American Literature; Rhetoric, Composition, and Literacy

   ii. Two elective courses offered by the Department of English or as approved by the student's graduate advisor

4. Each candidate must demonstrate a reading knowledge of a language other than English that is relevant to the student’s area of study. French, German, Italian, Spanish, Russian, Ancient Greek, and Latin are the normally acceptable choices, although other languages may be used with the approval of the Director of Graduate Studies. (For details about this requirement, see section 2, a-c, under “Requirements for the Doctor of Philosophy Degree (p. 166).”)

5. Each candidate must have a cumulative GPA of at least 3.33 for the total number of hours presented for the degree and may take a maximum of one course at the 4000 level for credit with approval from the Director of Graduate Studies.

Graduate Student Appeal Process: Any M.A. student who is notified that he or she is being dismissed from the graduate program due to inadequate progress toward his or her degree has the right to appeal such a decision. The process for appealing is as follows:

1. The student may contact the Director of Graduate Studies to determine whether the student can take further steps to avoid being dismissed from the program.

2. If the Director of Graduate Studies advises the student that the student can take no further steps to remain in the program, the student may appeal this decision to the Department Chair.

3. If the Department Chair advises the student that the student can take no further steps to remain in the program, the student may appeal this decision to the Academic Appeals Committee of the Graduate Council through the graduate student academic grievance process.

If the Graduate Council advises the student that the student can take no further steps to remain in the program, the student will be dismissed from the program.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

M.F.A. in Creative Writing

Requirements for the Master of Fine Arts Degree in Creative Writing: The program leading to the degree of Master of Fine Arts in Creative Writing provides graduate-level training in creative writing and in the study of literature.

Required Courses: 60 hours are required for the M.F.A. degree.

1. Required Writing and Craft Courses
   a. Writing Workshop (15 to 24 semester hours)
   b. Craft of Fiction, Poetry, or Translation (9 hours total: 6 hours in student’s primary genre; 3 hours in second genre)
   c. Modern/Contemporary Fiction and Poetry (9 hours total: 6 hours in student’s primary genre; 3 hours in second genre)

2. Other Advanced Courses (4000-level or higher): 18-30 hours of literature or approved courses, at least 3 hours of which must be a course that focuses on literature written prior to 1900 and 3 hours of which must be a literature course that emphasizes cultural diversity.

Thesis: An M.F.A. thesis may be a collection of poems or stories or a novel. For students whose primary genre is Translation, the thesis will consist of a significant body of work (i.e., poems, stories, or a novel) translated from the original language into English. The thesis should be of the quality of those works currently published by national magazines, by literary journals, and by legitimate book publishers.

Final Examination: Each M.F.A. candidate must pass a one-hour oral examination and defense of the thesis. Awarding of the M.F.A. degree requires approval of the faculty committee.

Grade Requirement: Per Graduate School policy, M.F.A. candidates must present a minimum cumulative grade-point average of 2.85 on all graduate courses required for the degree in order to earn the M.F.A. Failing to earn such an average on the minimum number of hours, the student is permitted to present up to six additional course (not thesis) hours of graduate credit in order to accumulate a grade-point average of 2.85. In the computation of grade point, all courses pursued at this institution for graduate credit (including any repeated courses) shall be considered. Students who repeat a course in an endeavor to raise their grade must count the repetition toward the maximum of six additional hours. If a student encounters academic difficulty after having already completed six credit hours for the degree beyond the minimum degree requirements, no additional hours may be taken. Please note that the Graduate School calculates grade-point average on all graduate-level coursework displayed on the transcript.
All students working toward the degree will plan their specific programs in consultation with their advisers. All degree requirements must be completed within six consecutive calendar years from the date of first enrollment.

Find out more about the program at the Creative Writing website. (http://mfa.uark.edu/)

**Focused Study in Rhetoric and Composition**

Students earning the Master of Fine Arts in Creative Writing may choose Rhetoric and Composition as a field of focused study. Students who choose this option are required to do the following:

1. Take ENGL 5003 Composition Pedagogy; ENGL 5973 Advanced Studies in Rhetoric and Composition or ENGL 6973 Seminar in Rhetoric and Composition; and an additional graduate-level course in Rhetoric and Composition approved by the Director of Composition.

2. Teach five of the following writing courses offered by the English Department:
   - Any two courses from Category A
   - Any two courses from Category B
   - And any additional course from A, B or C

   **Category A**
   - ENGL 0002, ENGL 0013, ENGL 1013, ENGL 1023, ENGL 1023 (Special Topics)

   **Category B**
   - ENGL 2003, ENGL 1023, ENGL 3033, ENGL 3053

   **Category C**
   - ENGL 2013, ENGL 2023, ENGL 3013

3. Earn 10 professional development points from the Program in Rhetoric and Composition by engaging in any combination of the following activities:
   - Presenting research at any Rhetoric and Composition conference (three points)
   - Organizing or leading a PRC workshop (two points)
   - Participating in a PRC workshop (one point)
   - Coordinating a PRC course or project (three points)

**Ph.D. in English**

For more information about the Doctor of Philosophy Degree program, visit the "M.A./Ph.D. in English" pages (http://fulbright.uark.edu/departments/english/graduate/ma-phd-english/) on the English Department website.

**Requirements for the Doctor of Philosophy Degree:** In addition to the general requirements of the Graduate School, the department stipulates that these requirements be met:

1. A student who begins doctoral study here may be required, at the discretion of the Director of Graduate Studies, to take certain designated deficiency courses in lieu of electives. However, these hours will count toward the 24-hour course requirement for the doctoral degree.

2. Each doctoral candidate is required to demonstrate a reading knowledge of at least one language other than English that is relevant to the student's area of study. French, German, Italian, Spanish, Russian, Ancient Greek, and Latin are the normally acceptable choices to meet the foreign language requirement, although other languages may be used with the approval of the Director of Graduate Studies. Students who elect the medieval period as the field of specialization must demonstrate a reading knowledge of Latin, Old English, and Middle English as well as one relevant modern language. Doctoral candidates can meet the foreign language requirement by documenting that they have met a foreign language requirement at the University of Arkansas or another accredited M.A. program no more than two years before starting the Ph.D. program. This requirement should be met as early as possible in the student’s program of study, preferably before registration for doctoral dissertation hours.

   For either the M.A. or Ph.D. degree, reading knowledge must be demonstrated in one of the following ways:

   a. The student passes a test of reading knowledge as administered through the Department of World Languages, Literatures, and Cultures or by a member of the faculty of another department in the University who is competent to assess reading knowledge in the given language. The Department of World Languages, Literatures, and Cultures administers testing either in conjunction with Ph.D. reading courses (course number 3063) in French, German, Latin, or Spanish; or through individual examinations. Students wishing to be examined in a foreign language should contact the Department of World Languages, Literatures, and Cultures well before the test to familiarize themselves with the different requirements of each language program.

   b. The student presents evidence of having completed the equivalent of one semester of graduate or upper-level undergraduate study in the given foreign language with a grade of “B” or above at an accredited college or university.

   c. The student documents that the language in question is his or her native language and that he or she has native fluency in the language.

3. By the time they take the candidacy examinations, students must have completed the 24-hour course requirement or be registered for courses which, if passed, will complete the 24-hour course requirement. Students must pass both candidacy exams before registering for dissertation hours.

4. To strengthen and support a field of specialization, each student may take up to six hours of graduate course work in other departments. Subject to the approval of the student’s adviser, these hours will count toward the 24-hour course requirement for the degree.

5. Students in the doctoral program are required to complete 24 semester hours of course work for graduate credit beyond the M.A. degree. This work must include at least one course in critical theory and at least four seminar courses, at least one of which must be in the field of specialization.

6. With the consent of the Graduate Studies Committee, students will declare a field of specialization. This declaration will be made prior to the completion of the candidate’s first year of doctoral studies; it must be made before arranging to take the written candidacy examination. The field of specialization may be a period (Medieval; Renaissance to 1660; Restoration and Eighteenth-Century British; Nineteenth-Century British; Modern and Contemporary British; American to 1900; Modern and Contemporary American) or an area (Rhetoric, Composition, and Literacy; Southern Literature and Culture; World Literature and Culture in English; American Multiculturalism; Gender Studies; Film and Media Studies; Literary Criticism and Theory; Popular Culture and Popular Genres; and Literary History). In conjunction with their committee and with the approval of the Director of Graduate Studies, students may propose additional fields if their particular projects do not fit within any of the suggested areas.

7. The Director of Graduate Studies in the department must be notified by each student of his or her intention to take the candidacy
examinations a month before the end of the term preceding the
date of the examinations, which will be scheduled by the student in
consultation with the committee administering the examinations. At
the time of the candidacy examinations, each student must have a
grade-point average of 3.50 for courses taken beyond the master’s
degree.
8. Each student must pass the following candidacy examinations:
   a. A 72-hour take-home written examination in the field of
      specialization.
   b. An oral examination on a specific topic within the student’s broad
      field, approved jointly by the student and the exam committee.
      Students may retake only once any examination they fail.
9. Upon successfully completing the candidacy exams, if a dissertation
   prospectus has not already been submitted to the student’s committee
   for approval, each student must submit a dissertation prospectus to
   be discussed and approved in a formal meeting with the student’s
dissertation committee.
10. Within the time limits specified by the Graduate School, each student
    must complete 18 dissertation hours and submit a dissertation
    acceptable to the student’s dissertation committee.
11. Each student must pass a dissertation defense administered by the
    student’s dissertation committee.

Graduate Student Appeal Process: Any Ph.D. student who is notified
that he or she is being dismissed from the graduate program due to
inadequate progress toward his or her degree has the right to appeal such
a decision. The process for appealing is as follows:

1. The student may contact the Director of Graduate Studies to
determine whether the student can take further steps to avoid being
dismissed from the program.
2. If the Director of Graduate Studies advises the student that the
   student can take no further steps to remain in the program, the
   student may appeal this decision to the Department Chair.
3. If the Department Chair advises the student that the student can take
   no further steps to remain in the program, the student may appeal this
decision to the Academic Appeals Committee of the Graduate Council
   through the graduate student academic grievance process.

If the Graduate Council advises the student that the student can take no
further steps to remain in the program, the student will be dismissed from
the program.

Focused Study in Rhetoric and Composition
Students earning the Doctor of Philosophy in English may choose
Rhetoric and Composition as a field of focused study. Students who
choose this option are required to do the following:

1. Take ENGL 5003 Composition Pedagogy; ENGL 5973 Advanced
   Studies in Rhetoric and Composition or ENGL 6973 Seminar in
   Rhetoric and Composition; and an additional graduate-level course in
   Rhetoric and Composition approved by the Director of Composition.
2. Teach five of the following writing courses offered by the English
   Department:
      • Any two courses from Category A
      • Any two courses from Category B
      • And any additional course from A, B or C
   Category A
   ENGL 0002, ENGL 0013, ENGL 1013, ENGL 1023, ENGL 1023
   (Special Topics)

Category B
   ENGL 2003, ENGL 1033, ENGL 3053

Category C
   ENGL 2013, ENGL 2023, ENGL 3013

3. Earn 10 professional development points from the Program in
   Rhetoric and Composition by engaging in any combination of the
   following activities:
      • Presenting research at any Rhetoric and Composition
        conference (three points)
      • Organizing or leading a PRC workshop (two points)
      • Participating in a PRC workshop (one point)
      • Coordinating a PRC course or project (three points)

Graduate Certificate in Technical Writing and
Public Rhetorics
Requirements: In order to complete the Graduate Certificate in Technical
Writing and Public Rhetorics, students must complete 12 credit hours
of coursework, with at least 6 of these hours coming from the Technical
Writing and Public Rhetorics core curriculum. The additional 6 hours
of credit may come from a list of approved elective courses or from
additional courses from the core curriculum. Students must earn a
grade of ‘B’ or better for all courses used to fulfill the requirements of the
Graduate Certificate in Technical Writing and Public Rhetorics. In addition
to coursework, students are required to complete a Technical Writing and
Public Rhetorics Portfolio consisting of at least 4 pieces from the student’s
coursework in the program.

Core Curriculum

</table>

Other relevant graduate coursework will be allowed on a case-by-case
basis, subject to administrative approval and topical relevancy to the
graduate certificate and its aims.

Portfolio: Students must consult with the Director of the Graduate
Certificate in Technical Writing and Public Rhetorics program during their
final semester to develop and defend a portfolio. The program director
will chair students’ portfolio review committee; working with the director,
students will choose two additional faculty members to serve on the
committee and at least four pieces of writing to include in the portfolio.
Students will work with the committee to polish those pieces to a level
appropriate for publication or non-profit, government, or corporate use.
When the portfolio is approved by the committee, students will host
a public viewing of their works, and the portfolio will be added to the
certificate program’s online repository of student work hosted by the
university library.
Graduate Faculty

Bailey, Constance, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Alcorn State University), Assistant Professor, 2016.

Booker, M. Keith, Ph.D. (University of Florida), M.S., M.A. (University of Tennessee), B.A. (Vanderbilt University), Professor, 1990.

Burris, Sidney J., Ph.D., M.A. (University of Virginia), B.A. (Duke University), Professor, 1986.

Candido, Joseph D., Ph.D. (Indiana University at Bloomington), M.A. (University of New Hampshire), B.A. (Colby College), Professor, 1979.

Cochran, Robert Brady, Ph.D. (University of Toronto), M.A., B.S. (Northwestern University), Professor, 1976.

Davis, Geoffrey, Ph.D., M.F.A., M.A. (Penn State University), B.A. (Oregon State University), Assistant Professor, 2014.

Dempsey, Sean A., Ph.D., M.A. (Boston University), B.A. (Connecticut College), Assistant Professor, 2009.

Domínguez Barajas, Elías, Ph.D., M.A., B.A. (University of Illinois at Chicago), Associate Professor, 2011.

Hallett, LewEllyn, M.F.A. (Bowling Green State University), B.A. (University of New Mexico), Instructor, 2013.

Hinrichsen, Lisa, Ph.D., M.A. (Boston University), B.A. (Wellesley College), Associate Professor, 2008.

Hsu, V. Jo, Ph.D., M.F.A. (Pennsylvania State University), B.A. (Rice University), Assistant Professor, 2017.

Jensen, Toni, Ph.D. (Texas Tech University), M.A., B.A. (University of South Dakota), Assistant Professor, 2014.

Kahf, Mohja, Ph.D., B.A. (Rutgers State University-New Brunswick), Associate Professor, 1995.

Kayser, Casey Lee, Ph.D. (Louisiana State University), M.A. (University of Missouri-Columbia), B.A. (Westminster College), Assistant Professor, 2012.

Long, Mary Beth, Ph.D., M.A. (University of Massachusetts, Amherst), B.A. (Ouachita Baptist University), Assistant Professor, 2014.

Madison, Robert Durwood, Ph.D. (Northwestern University), M.A. (Clark University), B.A. (University of Rhode Island), Instructor, 2009.

Marren, Susan M., Ph.D., M.A. (University of Michigan-Ann Arbor), B.A. (Cornell University), Associate Professor, 1995.

Padilla, Yajaira, Ph.D. (University of California, San Diego), B.A. (University of California, Santa Cruz), Associate Professor, 2013.

Pope, Adam, Ph.D. (Purdue University), M.A. (University of Arkansas), B.A. (Freed-Hardeman University), Assistant Professor, 2013.

Quinn, William A., Ph.D., M.A. (The Ohio State University), B.A. (Xavier University), Distinguished Professor, 1978.

Roberts, Robin, Ph.D., M.A. (University of Pennsylvania), B.A. (Mount Holyoke College), Professor, 2011.

Slattery, Patrick Joseph, Ph.D. (Indiana University at Bloomington), A.B. (College of the Holy Cross), Associate Professor, 1991.

Smith, Joshua Byron, Ph.D., M.A. (Northwestern University), B.A. (University of Illinois at Chicago), Assistant Professor, 2011.

Sparks, Leigh Pryor, Ph.D. (University of Arkansas), M.A., B.A. (Stanford University), Instructor, 2009.

Szwydka-Davis, Lissette López, Ph.D., M.A., B.A. (University of Miami), Assistant Professor, 2013.

Teuton, Sean Kicummah, Ph.D., M.A. (Cornell University), B.A. (University of Colorado-Boulder), Professor, 2013.

Viswanathan, Padma, M.F.A. (University of Arizona), M.A. (Johns Hopkins University), B.A. (University of Alberta), Associate Professor, 2010.

Yandell, Kay, Ph.D., M.A. (Cornell University), B.A. (University of Arkansas), Associate Professor, 2013.

English Courses

ENGL 5003. Composition Pedagogy. 3 Hours.
Introduction to teaching college composition. Designed for graduate assistants at the University of Arkansas. (Typically offered: Fall)

ENGL 5023. Writing Workshop: Fiction. 3 Hours.
Fiction writing workshop. Prerequisite: Creative Writing MFA students only. (Typically offered: Irregular) May be repeated for up to 24 hours of degree credit.

ENGL 5033. Writing Workshop: Poetry. 3 Hours.
Poetry writing workshop. Prerequisite: Creative Writing MFA students only. (Typically offered: Irregular) May be repeated for up to 24 hours of degree credit.

ENGL 5043. Translation Workshop. 3 Hours.
Problems of translation and the role of the translator as both scholar and creative writer; involves primarily the discussion in workshop of the translations of poetry, drama, and fiction done by the students, some emphasis upon comparative studies of existing translations of well-known works. Primary material will vary. Prerequisite: Reading knowledge of a foreign language and Creative Writing MFA students only. (Typically offered: Irregular) May be repeated for up to 24 hours of degree credit. This course is cross-listed with WLLC 504V.

ENGL 5063. English Language and Composition for Teachers. 3 Hours.
Subject matter and methods of approach for the teaching of composition in high school. (Typically offered: Fall and Spring)

ENGL 507V. Creative Non-Fiction Workshop. 1-3 Hour.
The theory and practice of the "New Journalism" with a study of its antecedents and special attention to the use of "fictional" techniques and narrator point of view to make more vivid the account of real people and real events. (Typically offered: Irregular)

ENGL 5083. Professional Topics. 3 Hours.
Specialized topics related to professional issues in the humanities, e.g. academic and alternative-academic job searches, publication workshops, public humanities, and/or the teaching of language and literature at various levels. (Typically offered: Irregular)

ENGL 510V. Readings in English and American Literature. 1-6 Hour.
Open to Honors candidates and graduate students. Prerequisite: Departmental approval and instructor approval required. (Typically offered: Irregular) May be repeated for degree credit.

ENGL 5173. Advanced Studies in Medieval Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5183. The Structure of Present English. 3 Hours.
Structural analysis of the language. (Typically offered: Spring)

ENGL 5193. Graduate Internship in English. 3 Hours.
Internship changes depending on availability and student interest. Departmental consent required. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
ENGL 5203. Introduction to Graduate Studies. 3 Hours.
Develop knowledge and strategies for successfully negotiating graduate work and
the profession. Topics covered include, but are not limited to, scholarly habits and
practices, writing and publishing skills, scholarly associations, journals, conferences,
university structures, and career paths. Emphasis on the development of individual
academic and professional goals. (Typically offered: Irregular)

ENGL 5213. Portfolio Workshop. 3 Hours.
Workshop designed for students in the M.A. Program in English who are using the
Portfolio Option to complete the program. Instructor consent required. (Typically
offered: Spring)

ENGL 5223. Advanced Studies in Renaissance Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5233. Craft of Translation: I. 3 Hours.
An examination of the principal challenges that confront translators of literature,
including the recreation of style, dialect, ambiguities, and formal poetry; vertical
translation; translation where multiple manuscripts exist; and the question of how
literal a translation should be. (Typically offered: Irregular)

ENGL 5243. Special Topics. 3 Hours.
Designed to cover subject matter not offered in other courses. (Typically offered:
Irregular) May be repeated for degree credit.

ENGL 5263. Craft of Fiction: I. 3 Hours.
Such aspects of the genre as scene, transition, character, and conflict. Discussion is
limited to the novel. (Typically offered: Irregular)

ENGL 5273. Craft of Poetry: I. 3 Hours.
An examination of perception, diction, form, irony, resolution, and the critical theories
of the major writers on poetry, such as Dryden, Coleridge, and Arnold. (Typically
offered: Irregular)

ENGL 5283. Craft of Fiction: II. 3 Hours.
Second part of the study of the techniques of fiction. Discussion is limited to the
short story. Prerequisite: ENGL 5263. (Typically offered: Irregular) May be repeated
for degree credit.

ENGL 5293. Craft of Poetry: II. 3 Hours.
Second part of the study of the techniques of poetry; independent study of a poet or
a problem in writing or criticism of poetry. (Typically offered: Irregular)

ENGL 5313. Introduction to Literary Theory. 3 Hours.
An advanced introductory survey of a number of theoretical approaches to literature.
(Typically offered: Irregular)

ENGL 5403. Advanced Studies in Nineteenth-Century British Literature and
Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5413. Advanced Studies in Modern and Contemporary British Literature and
Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5463. Descriptive Linguistics. 3 Hours.
A scientific study of language with primary emphasis on modern linguistic theory
and analysis. Topics include phonology, morphology, syntax, semantics, language
acquisition, and historical development of world languages. (Typically offered: Fall)
This course is cross-listed with WLIT 5463, ANTH 5473.

ENGL 5513. Document Design for Technical Writers. 3 Hours.
Focuses on the role of document design in technical and professional writing.
Covers industry standard software and theories of rhetorically-centered document
design. Special emphasis on creating print-ready technical documents such as
manuals, catalogs, and infographics. (Typically offered: Fall Odd Years)

ENGL 5523. Technical Writing for Online Audiences. 3 Hours.
Investigates the medium-specific challenges of preparing technical documents for
online audiences. Covers user-centered theory, strategies, and skills for online
writing, HTML, CSS, and web standards. Specific focus on creating organizational
websites with editorial workflows geared towards technical writers. (Typically offered:
Fall Even Years)

ENGL 5533. Technical Writing Praxis. 3 Hours.
Focuses on the process of applying theory to situated practice in technical writing.
The first portion of the course will lay out the fundamentals of technical writing
theory, with the second half situating that theory within genre-specific practice.
Second-half topics will vary by instructor interest and expertise. (Typically offered:
Summer) May be repeated for up to 6 hours of degree credit.

ENGL 5543. Advanced Studies in U.S. Latino/Latina Literature and Culture. 3
Hours.
The study of works of U.S. Latino/a literature and literary criticism, with attention to
particular themes, genres, authors, literary movements, historical moments, or other
organizing principles. Content varies. (Typically offered: Irregular) May be repeated
for up to 12 hours of degree credit.

ENGL 5563. Advanced Studies in Native American Literature and Culture. 3
Hours.
The study of works of Native American literature, with attention to particular themes,
genres, authors, literary movements, historical moments, or other organizing
principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12
hours of degree credit.

ENGL 5583. Advanced Studies in Arab American Literature and Culture. 3
Hours.
The study of works of Arab American literature and criticism, with attention to
particular themes, genres, authors, literary movements, historical moments, or other
organizing principles. Content varies. Research paper required. No knowledge of
Arabic necessary. (Typically offered: Irregular) May be repeated for up to 12 hours of
degree credit.

ENGL 5593. Advanced Studies in Gender, Sexuality, and Literature. 3 Hours.
The study of gender or sexuality and literature, with attention to specific theories,
themes, genres, authors, historical moments, literary movements, or other
organizing principles. Content varies. (Typically offered: Irregular) May be repeated for
up to 12 hours of degree credit.

ENGL 5603. World Literature and Culture in English. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5623. The Bible as Literature. 3 Hours.
The several translations of the Bible; its qualities as great literature; its influence
upon literature in English; types of literary forms. (Typically offered: Irregular)
This course is cross-listed with WLIT 5623.

ENGL 5633. English Drama from Its Beginning to 1642. 3 Hours.
Early forms, Tudor drama, Shakespeare's contemporaries, and Stuart drama to the
closing of the theatres. (Typically offered: Irregular)

ENGL 5653. Shakespeare: Plays and Poems. 3 Hours.
An introduction to a broad selection of Shakespeare's work. (Typically offered:
Irregular)

ENGL 569V. Seminar in Film Studies. 1-3 Hour.
Research, discussion; papers on a variety of film genres and areas including the
new American film, the science-fiction film, directors, film comedy, the experimental
film, criticism, the film musical. (Typically offered: Irregular) May be repeated for up
to 6 hours of degree credit.
This course is cross-listed with COMM 569V.
ENGL 5703. Advanced Studies in American Literature and Culture Before 1900. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5723. Advanced Studies in Literature and Culture of the American South. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5763. Advanced Studies in Postcolonial Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5803. Advanced Studies in Modern and Contemporary American Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5863. Advanced Studies in African American Literature and Culture. 3 Hours.
The study of works of African American literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5923. Advanced Studies in Film and Media. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5933. Advanced Studies in Popular Culture and Popular Genres. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5943. Advanced Studies in Criticism and Literary Theory. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5953. Advanced Studies in Literary History. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5963. Advanced Studies in Technical Writing and Public Rhetorics. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. Course will cover various topics relevant to students working in Technical Writing and Public Rhetorics. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENGL 5973. Advanced Studies in Rhetoric and Composition. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6113. Seminar in Medieval Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6193. The Development of English. 3 Hours.
Intensive course in the fundamentals of linguistic study and their application to the history of English from prehistoric times to the present. (Typically offered: Fall)

ENGL 6203. Seminar in Renaissance Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6243. Seminar in Special Topics. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6443. Seminar in Nineteenth-Century British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6513. Seminar in Modern and Contemporary British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6543. Seminar in U.S. Latino/Latina Literature and Culture. 3 Hours.
The study of works of U.S. Latino/a literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6553. Seminar in Native American Literature and Culture. 3 Hours.
The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6583. Seminar in Arab American Literature and Culture. 3 Hours.
The study of works of Arab American literature and criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. Research paper required. No knowledge of Arabic necessary. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6593. Seminar in Gender, Sexuality, and Literature. 3 Hours.
The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6723. Seminar in American Literature and Culture Before 1900. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6733. Seminar in Literature and Culture of the American South. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6763. Seminar in Postcolonial Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6803. Seminar in Modern and Contemporary American Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6853. Seminar in African American Literature and Culture. 3 Hours.
The study of works of African American literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6923. Seminar in Film and Media. 3 Hours.
Extensive research into, and discussion of, a focused topic in film studies, with emphasis upon film as text. Extended project required. Course topic varies.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 6933. Seminar in Popular Culture and Popular Genres. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6943. Seminar in Criticism and Literary Theory. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6953. Seminar in Literary History. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6973. Seminar in Rhetoric and Composition. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 698V. Master's Thesis. 1-6 Hour.
Master's thesis. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

ENGL 699V. Master of Fine Arts Thesis. 1-6 Hour.
Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ENGL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

World Literature Courses

WLIT 5123. Survey of Russian Literature from Its Beginning to the 1917 Revolution. 3 Hours.
(Formerly WLIT 4123.) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English. Graduate degree credit will not be given for both WLIT 4123 and WLIT 5123. (Typically offered: Irregular)

WLIT 5133. Survey of Russian Literature Since the 1917 Revolution. 3 Hours.
(Formerly WLIT 4133.) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English with readings in English. Graduate degree credit will not be given for both WLIT 4133 and WLIT 5133. (Typically offered: Irregular)

WLIT 5193. African Literature. 3 Hours.
(Formerly WLIT 4993.) A study of modern African fiction, drama, poetry, and film from various parts of Africa in their cultural context. Works are in English or English translation. Graduate credit will not be given for both WLIT 4993 and WLIT 5993. (Typically offered: Irregular)

WLIT 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

WLIT 603V. Special Studies in Comparative Literature. 1-6 Hour.
Special studies in comparative literature. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WLIT 6703. Psychoanalysis and Culture. 3 Hours.
Readings of key texts in Psychoanalytic thought and cultural criticism including Freud, Lacan, Kristeva, Certeau, Zizek, and others. Selections of Psychoanalytic approaches to literature, film and gender and trauma studies. (Typically offered: Irregular)

WLIT 6713. Literature of Spain, 711-1615 C.E.. 3 Hours.
Examines the multiple cultural traditions of Spain between 711-1615 C.E. and train to produce scholarship pertinent to the field. Integrated approach includes English translations of literature originally in Arabic (50%+ of content), Hebrew, Spanish, French. Students with reading abilities in original languages encouraged to read original text. (Typically offered: Irregular)

WLIT 6803. Postcolonial Theory and Subaltern Studies. 3 Hours.
Seminar examining the geopolitical (imperial, colonial and national) implications of knowledge and culture. Selected readings of early postcolonial texts by Cesaire, Fanon, and Fernandez Retamar, as well as more recent texts by Said, Spivak, Bhabha, Mignolo, Beverly and Chakrabarty among others. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WLIT 680V. Seminar. 1-6 Hour.
Seminar. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WLIT 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Department of Entomology Website (http://entomology.uark.edu)

Degrees Conferred:
M.S. in Entomology (ENTO)
Ph.D. in Agricultural, Food and Life Sciences (AFLS)

Primary Areas of Faculty Research:
Pest management, insect pathology, insect-plant interactions, arthropod-animal interactions, biological control, molecular biology, taxonomy, systematics, physiology, and insect ecology.
**M.S. in Entomology**

**Prerequisites to Degree Program:** Applicants for graduate degrees must meet all requirements for admission to the Graduate School. Applicants without a master's degree will be accepted into the departmental program based on grade-point average (GPA), letters of recommendation, résumé and an adviser in the student's area of interest. Applicants must present Graduate Record Examination scores for the verbal, quantitative, and writing tests. To be accepted for the Master of Science degree, an undergraduate background in physical and biological sciences is essential. An undergraduate major in entomology is not required. A cumulative GPA of 3.00 is highly desirable.

**Requirements for the Master of Science Degree:** Students studying for the Master of Science degree with a limited undergraduate background in entomology may be expected to complete more than the minimum number of 30 credit hours required for the degree. A thesis, reporting of original research, and a final comprehensive oral examination also are required.

Specific requirements follow:

**General Course Requirements:** The degree program and coursework for each candidate will be arranged on an individual basis. M.S. students must register for a minimum of 30 hours of graduate credit including 6 thesis hours.

**Prerequisite Requirements:** ENTO 3013. Introductory Entomology (Fa) or its equivalent. 3 hours.

**Core Course Requirements:** The student must take or have taken courses equivalent to:

- **ENTO 5024** Insect Diversity and Taxonomy 4 hours.
- **ENTO 5053** Insect Ecology 3 hours.
- **ENTO 5153** Insect Pest Management 3 hours.
- **ENTO 6113** Insect Physiology and Molecular Biology 3 hours.

A course in statistics for graduate credit is also required.

**Seminar Requirements:** Two semester hours of seminar are required. Seminar hours may be taken in Entomology (ENTO 6071) or, with Department Head approval, as a formal for-credit seminar offered in another department within the university. In addition, each student is required to present a seminar on his/her thesis research plans during the first year of the degree program and an exit seminar on the thesis research prior to leaving the program.

**Residence Requirements:** A minimum of 30 weeks in residence is required for the M.S. degree.

**Grade Point Average Requirement:** A minimum 3.00 GPA must be maintained. If the cumulative GPA falls below 3.00, or research or general academic progress is unsatisfactory, the student’s performance will be re-evaluated by the Advisory Committee and a recommendation made on continued status as a graduate student. For details about this process, please see the Graduate Student Handbook on the departmental website.

**Comprehensive Examination:** A comprehensive oral examination covering coursework and defense of the thesis research is required. The examination is generally taken during the student’s final semester.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

**Requirements for Ph.D. in AFLS with Entomology Concentration**

**Prerequisites to Degree Program:** A Master of Science degree is desirable. A student with a Bachelor of Science and an exceptional record in academics and/or research may be approved for admission to the Ph.D. program in Agricultural, Food and Life Sciences if the Graduate Student Concentration Admissions Committee of the desired concentration deems them qualified and approval is granted by the AFLSPH Steering Committee. A student admitted to the University of Arkansas, pursuing an M.S. and in good academic standing may apply to be admitted to the doctoral program and forgo completing the M.S. degree if so approved by the AFLSPH Steering Committee and the AFLSPH Graduate Concentration Admissions Committee. A minimum grade point average of 3.00 (on a 4.00 scale) on previous college-level course work is required.

**Admissions Requirements for Entry:** To be considered for admission, a student must submit a letter of intent, along with the application for admission indicating the desired degree concentration, areas of interest and career goals. Official transcripts of all previous college-level course work must be submitted. Three letters of recommendation are required. These letters should address the character and academic capability of the applicant. Applications will first be reviewed by the AFLSPH Steering Committee which will assign the student to the appropriate Graduate Student Concentration Admissions Committee for review. The Concentration Admissions Committee will make the final determination of admittance into the AFLSPH program and the concentration.

**Requirements for Doctor of Philosophy Degree:** The Ph.D. program in Agricultural, Food and Life Sciences requires a total of 72 credit hours after a Bachelor of Science or Bachelor of Arts degree or 42 hours after a Master of Science or Master of Arts degree.

General course requirements for each degree candidate are arranged on an individual basis by the Faculty Advisor, the Graduate Advisory Committee and the candidate in accordance with guidelines of their concentration. Alternate courses may be selected at the discretion of the committee.

All students must complete 6 hours of elective course hours and 2 hours of seminar. One seminar must be a research proposal presentation and the other must be an exit seminar presenting the dissertation research results. All students must complete 18 hours of doctoral dissertation hours. Students entering the doctoral program with only a B.S. or B.A. must also complete an additional 30 hours (to reach the 72 hour post B.S./B.A. requirement). Students must satisfactorily pass written and oral candidacy examinations covering their discipline and supporting areas. These examinations must be completed at least one year before completion of the Ph.D. degree program in Agricultural, Food and Life Sciences. Each candidate must complete a doctoral dissertation on an important research topic in the concentration field. The specific problem and subject of the dissertation is determined by the faculty advisor, the student and the Graduate Advisory Committee. A dissertation title must be submitted to the dean of the Graduate School at least one year before the dissertation defense. Provisional approval of the dissertation must be given by all members of the Graduate Advisory Committee prior to the dissertation defense. Students must pass the oral defense and examination of the dissertation given by the Graduate Advisory Committee. A student cannot be approved for conferral of the
doctoral degree until after completion of all coursework, written and oral candidacy exams, the defense passed and dissertation accepted by the Graduate School and an application for the degree has been filed with the Registrar’s Office and the fee paid.

**Additional Requirements for Entomology Concentration**

In addition to the general requirements for the Ph.D. program in Agricultural, Food and Life Sciences, students in the Entomology concentration must also complete:

**Graduate Faculty**

**Bateman, Nick**, Ph.D. (Mississippi State University), B.S. (University of Arkansas-Monticello), Assistant Professor, 2016.

**Bluhm, Burt H.**, Ph.D., M.S. (Purdue University), B.S. (University of Oklahoma), Associate Professor, 2008.

**Correll, Jim**, Ph.D., M.S. (University of California-Berkeley), B.S. (Pennsylvania State University), Distinguished Professor, 1989.

**Dowling, Ashley Patrick Gregg**, Ph.D. (University of Michigan-Ann Arbor), B.S. (University of Arizona), Associate Professor, 2008.

**Egan, Martin J.**, Ph.D., B.Sc. (University of Exeter, United Kingdom), Assistant Professor, 2016.

**Faske, Travis**, Ph.D. (Texas A&M University), M.S. (Oklahoma State University), B.S. (Tarleton State University), Associate Professor, 2015.

**Goggin, Fiona**, Ph.D. (University of California-Davis), B.S. (Cornell University), Professor, 2001.

**Hopkins, John D.**, Ph.D. (University of Arkansas), M.S., B.S. (Clemson), Associate Professor, 2002.

**Johnson, Donn T.**, Ph.D., M.S. (Michigan State University), B.S. (University of Minnesota, Duluth), Professor, 1978.

**Joshi, Neelendra**, Ph.D. (Pennsylvania State University), Assistant Professor, 2015.

**Kirkpatrick, Terry**, Ph.D. (North Carolina State University), M.S., B.S. (University of Arkansas), Professor, 1984.

**Korth, Ken L.**, Ph.D. (North Carolina State University), M.S. (University of Arkansas), Professor, 1999.

**Loftin, Kelly M.**, Ph.D. (New Mexico State University), M.S. (University of Arkansas), B.S. (Arkansas Tech), Associate Professor, 2002.

**Lorenz, Gus M.**, Ph.D., B.S.A., M.S. (University of Arkansas), Distinguished Professor, 1997.

**Robbins, Robert Thomas**, Ph.D. (North Carolina State University), M.S., B.S. (Kansas State University), University Professor, 1979.

**Rojas, Clemencia**, Ph.D. (Cornell University), M.S. (Purdue University), B.S. (Universidad de Los Andes, Colombia), Assistant Professor, 2015.

**Rojas, Alejandro**, Ph.D., M.S. (Michigan State University), M.S., B.S. (Los Andes University), Assistant Professor, 2018.

**Rupe, John C.**, Ph.D., M.S. (University of Kentucky), B.S. (Colorado State University), Professor, 1984.

**Spradley, J. Ples**, M.S. (University of Arkansas), B.S. (Hendrix College), Extension Associate Professor, 1984.

**Spurlock, Terry**, Ph.D. (University of Arkansas), Extension Assistant Professor, 2015.

**Steinkraus, Donald C.**, Ph.D. (Cornell University), M.S. (University of Connecticut), B.A. (Cornell University), Professor, 1989.

**Stephen, Fred M.**, Ph.D. (University of California-Berkeley), B.S. (San Jose State University), University Professor, 1974.

**Studebaker, Glenn**, Ph.D., M.S. (University of Arkansas), B.S. (Missouri Southern State University), Associate Professor, 1993.

**Szalanski, Allen Lawrence**, Ph.D. (University of Nebraska-Lincoln), M.S. (Kansas State University), B.S. (University of Manitoba), Professor, 2001.

**Thrash, Ben**, Assistant Professor, 2018.

**Tzanetakis, Ioannis E.**, Ph.D. (Oregon State University), M.S., B.S. (Agricultural University of Athens, Greece), Professor, 2008.

**Wamishe, Yeshi Andenow**, Ph.D. (University of Arkansas) M.S., B.S. (Addis Ababa University, Ethiopia), Associate Professor, 2011.

**Wiedenmann, Robert N.**, Ph.D., B.S. (Purdue University), Professor, 2005.

**Courses**

**ENTO 500V. Special Problems. 1-4 Hour.**

Special problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.

**ENTO 5013. Morphology of Insects. 3 Hours.**

Origin, evolution, and functional significance of external insect structure. Structure and function of major internal systems. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. (Typically offered: Fall Odd Years)

**ENTO 5024. Insect Diversity and Taxonomy. 4 Hours.**

Principles and practices of insect classification and identification with emphasis on adult insects. 2.5 hours lecture, 4 hours lab. Prerequisite: ENTO 3013 or instructor consent. Corequisite: Lab component. (Typically offered: Fall) This course is cross-listed with BIOL 5024.

**ENTO 5043. Apiculture. 3 Hours.**

To acquaint the student with social insects in general and honey bees in particular, to promote an interest in apiculture as a hobby, occupation, and/or science, to give the students the basic knowledge of how to keep honey bees, and to increase awareness of the contribution that pollinating insects make to agriculture, natural ecosystems, and human life. Prerequisite: Instructor consent. (Typically offered: Spring Odd Years)

**ENTO 5053. Insect Ecology. 3 Hours.**

To develop an understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. 2 hours lecture/2 hours lab. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall) This course is cross-listed with BIOL 5053.

**ENTO 510V. Special Topics. 1-3 Hour.**

Topics not covered in other courses or a more intensive study of specific topics in entomology. (Typically offered: Irregular) May be repeated for degree credit.

**ENTO 5113. Insect Behavior and Chemical Ecology. 3 Hours.**

Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Spring Even Years)

This course is cross-listed with BIOL 5113.

**ENTO 5123. Biological Control. 3 Hours.**

Theoretical and practical basis for biological control of arthropod pests and weeds via parasites, predators, and pathogens. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall Odd Years)
Environmental Dynamics (ENDY)

Email: endy@uark.edu

Environmental Dynamics Website

Degree Conferred:
Ph.D. in Environmental Dynamics (ENDY)

Program Description: The Environmental Dynamics faculty prepare program graduates to enter the workforce as leaders in the global effort to understand and manage climate change and human responses to it. Environmental Dynamics students can learn from nearly 100 affiliated faculty members and make use of state-of-the-art research facilities and laboratories on our campus. Our approach is interdisciplinary and allows students to work across departments and colleges to gain the tools needed to address today’s most pressing environmental issues. The Environmental Dynamics program’s focus is unique and two-tiered, providing students with a deep-time perspective, which gives human-environmental interactions context, and sustainability, which gives them relevance. This approach benefits all Environmental Dynamics students and prepares them to meet the challenges of employment that doctoral degree-holding professionals face in today’s world.

Primary Areas of Faculty Research: Interdisciplinary research activities among faculty participating in the ENDY program are very broad, though particular areas of strength are found in dendrochronology and paleoclimatology; watershed and water resource sciences; geosciences (geomorphology, geodynamics, geodesy, geoinformatics and geospatial applications); anthropology; soil sciences; sustainability issues; ecology, ecological change, environmental pollution and land use change; and impacts of natural hazards. In addition, many research activities involve strong components of social sciences, economics and sustainable development. Interested individuals are encouraged to contact the ENDY program or participating faculty to obtain additional information related to specific research projects and possible participation.

Ph.D. in Environmental Dynamics

Requirements for Admission: Applicants should hold a master’s degree in an environmental field such as anthropology; geography; geology; biological sciences; crop, soil and environmental sciences; environmental engineering; or in a social science field with an environmental focus (e.g. environmental economics, environmental policy, environmental sociology). Further, these students will be required to have at least a 3.20 GPA in graduate courses and strong scores on all components of the Graduate Record Examination (GRE). Applicants without the master’s degree but with exceptionally strong qualifications may be admitted directly into the ENDY program but must complete the master’s requirements. Admission into the program will be by committee evaluation. In addition to fulfilling the requirements for admission to the Graduate School, applicants must also supply the following materials:

1. Three recommendations from individuals familiar with the applicant’s academic or work history who can give candid assessments of the applicant’s ability to perform at the Ph.D. level.
2. A three-page Statement of Purpose outlining the applicant’s plans for the ENDY degree program that includes relevance of previous academic or work experience, current research interests or employment that bear on doctoral research, special skills, fieldwork experience, familiarity with interdisciplinary work (if any), and future career goals.
3. An example of the applicant’s writing such as a publication reprint, report, major term paper, undergraduate honors thesis, chapter from M.A./M.S. thesis, or similar document that demonstrates the applicant’s organizational skills, research ability, familiarity with a body of literature, ability to report clearly on an academic topic, and/or general writing skills.
4. TOEFL (Test of English as a Foreign Language) and TSE (Test of Spoken English) scores for international students whose native language is not English.
5. GRE scores and other relevant information that would assist the Admissions Committee in selecting applicants to the program.

Requirements for the Degree: During the first semester of study, all students will be assigned an advisory committee to determine the student’s particular program of study. Students are required to integrate both environmental and human components into their Ph.D. coursework and dissertation research. The advisory committee will determine the
courses required and assist the student in balancing courses among disciplines.

Students become candidates for the doctorate only upon passing written and oral comprehensive exams. The examination must be passed at least nine months before graduation.

Each candidate must complete a doctoral dissertation on a topic determined through collaboration with a major professor and dissertation committee. This dissertation must be a scholarly and significant original contribution to knowledge within the field of Environmental Dynamics.

A final oral examination is required and must be taken at least two weeks before graduation. The examination will be concerned primarily with the candidate’s dissertation but may include other aspects of the graduate work.

Individually tailored programs of study will be designed with the expectation that the student will complete a minimum of 24 hours of course work beyond the master’s level, to include four required courses.

ENDY/GEOS 5113 Global Change 3
ENDY 6013 Environmental Dynamics 3
ENDY/ANTH/GEOS 5053 Quaternary Environments 3
ENDY/ANTH 6033 Society and Environment 3

In addition, students are required to take three semesters of ENGY 6991 Environmental Dynamics Colloquium and 18 hours of dissertation research are required.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

A

Aly, Mohamed H., Ph.D. (Texas A&M), M.S., B.S. (Zagazig University), Assistant Professor, Department of Geosciences, 2013.
Arnold, Mark E., Ph.D., B.S. (Northern Illinois University), A.S. (Rock Valley College), Associate Professor, Department of Mathematical Sciences, 1993.

B

Beaupre, Steven J., Ph.D. (University of Pennsylvania), M.S., B.S. (University of Wisconsin), Professor, Department of Biological Sciences, 1995.
Brye, Kristofer R., Ph.D., M.S. (University of Wisconsin-Madison), B.S. (University of Wisconsin–Stevens Point), Professor, Department of Crop, Soil and Environmental Sciences, 2001.

C

Coffey, Ken, Ph.D. (University of Missouri-Columbia), M.S. (University of Kentucky), B.S. (University of Tennessee), Professor, Department of Animal Science, 1996.
Cothren, Jackson David, Ph.D., M.S. (The Ohio State University), B.S. (United States Air Force Academy), Associate Professor, Department of Geosciences, 2004.
Covington, Matthew D., Ph.D. (University of California-Santa Cruz), B.A. (University of Arkansas), Associate Professor, Department of Geosciences, 2012.

D

Davidson, Fiona M., Ph.D., M.A. (University of Nebraska-Lincoln), B.A. (Newcastle Upon Tyne Polytechnic), Associate Professor, Department of Geosciences, 1992.
Davis, Ralph K., Ph.D., M.S., B.S. (University of Nebraska, Lincoln), Professor, Department of Geosciences, 1994.
Dumond, Gregory, Ph.D. (University of Massachusetts), M.S. (Texas Tech University), B.S. (University of Texas El Paso), Associate Professor, Department of Geosciences, 2010.

F

Feng, Song, Ph.D., M.S. (Chinese Academy of Sciences), B.S. (Yunnan University), Associate Professor, Department of Geosciences, 2013.
Fitzpatrick, Kevin M., Ph.D. (State University of New York at Albany), M.A. (University of South Carolina at Columbia), B.A. (Susquehanna University), University Professor, Department of Sociology and Criminology, 2005.

G

Gordon, Joel Samuel, Ph.D. (University of Michigan-Ann Arbor), B.A. (University of Illinois), Professor, Department of History, 1999.

H

Hays, Phillip D., Ph.D., M.S. (Texas A&M University), B.S. (University of Arkansas), Research Professor, Department of Geosciences, 2000.

K

Kay, Marvin, Ph.D. (University of Colorado-Boulder), M.A., B.A. (University of Missouri-Columbia), Professor, Department of Anthropology, 1980.
Kvamme, Kenneth L., Ph.D. (University of California-Santa Barbara), M.A., B.A. (Colorado State University), Professor, Department of Anthropology, 1999.

L

Limp, Fred, Ph.D., M.A., B.A. (Indiana University at Bloomington), University Professor, Department of Geosciences, 1979.
Liner, Christopher L., Ph.D. (Colorado School of Mines), M.S. (University of Tulsa), B.S. (University of Arkansas), Professor, Department of Geosciences, 2012.

M

McComas, William, Ph.D. (University of Iowa), M.S. (West Chester University of Pennsylvania), B.S. (Lock Haven University of Pennsylvania), Distinguished Professor, Department of Curriculum and Instruction, 2006.
Messadi, Tahar, Ed.D., M.Arch. (University of Michigan-Ann Arbor), B.Arch. (Universite de Constantine, Algeria), Associate Professor, Department of Architecture, 2003.
Miller, David M., Ph.D. (University of Georgia), M.S., B.S. (Purdue University), Professor, Department of Crop, Soil and Environmental Sciences, 1988.

N

Nalley, Lawton Lanier, Ph.D. (Kansas State University), M.S. (Mississippi State University), B.S. (The Ohio State University), Professor, Department of Agricultural Economics and Agribusiness, 2008.
Nolan, Justin Murphy, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Westminster College), Associate Professor, Department of Anthropology, 2002.

P

Petris, Giovanni, Ph.D., M.S. (Duke University), B.S. (Università degli Studi di Milano, Italy), Professor, Department of Mathematical Sciences, 1999.
Plavcan, Joseph M., Ph.D., B.A. (Duke University), Professor, Department of Anthropology, 2001.

Popp, Michael P., Ph.D. (Colorado State University), M.B.A. (University of Colorado-Boulder), B.Comm. (University of Manitoba), Professor, Department of Agricultural Economics and Agribusiness, 1998.

Popp, Jennie Sheerin, Ph.D., M.S. (Colorado State University), B.S. (University of Scranton), Professor, Department of Agricultural Economics and Agribusiness, 1998.

Potra, Adriana, Ph.D. (Florida International University), M.S., B.S. (University of Babes-Bolyai, Romania), Assistant Professor, Department of Geosciences, 2012.

Rom, Curt R., Ph.D., M.S. (The Ohio State University), B.S. (University of Arkansas), University Professor, Department of Horticulture, 1989.

Rose, Jerry, Ph.D., M.A. (University of Colorado), B.A. (University of Colorado), University Professor, Department of Anthropology, 1976.

Schwab, Bill, Ph.D., M.A. (The Ohio State University), M.A. (University of Akron), B.A. (Miami University), University Professor, Department of Sociology and Criminology, 1976.

Smith, Carl Alan, Ph.D., M.A. (University of Sheffield), B.Sc. (University of Lancaster), Associate Professor, Department of Landscape Architecture, 2008.

Stahle, David William, Ph.D. (Arizona State University), M.A. (University of Arkansas), B.A. (University of Arizona), Distinguished Professor, Department of Geosciences, 1982.

Suarez, Celia A., Ph.D. (University of Kansas), M.S. (Temple University), B.S. (Trinity University), Associate Professor, Department of Geosciences, 2012.

Swedenburg, Ted R., Ph.D., M.A., (University of Texas at Austin), B.A. (University of Beirut), Professor, Department of Anthropology, 1996.

Ungar, Peter S., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (State University of New York, Binghampton), Distinguished Professor, Department of Anthropology, 1995.

West, Elliott, Ph.D., M.A. (University of Colorado-Boulder), B.A. (University of Texas, Austin), Alumni Distinguished Professor, Department of History, 1979.

Whayne, Jeannie, Ph.D., M.A., B.A. (University of California-San Diego), University Professor, Department of History, 1990.

Courses

ENDY 5043. GIS Analysis and Modeling. 3 Hours.
Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. (Typically offered: Spring)
This course is cross-listed with GEOS 5663, ANTH 5663.

ENDY 5053. Quaternary Environments. 3 Hours.
An interdisciplinary study of the Quaternary Period including dating methods, deposits soils, climates, tectonics and human adaptations. (Typically offered: Fall)
This course is cross-listed with ANTH 5053, GEOS 5053.

ENDY 5113. Global Change. 3 Hours.
Examines the interacting natural and anthropogenic factors involved in global change, concentrating on climate variability and change. Prerequisite: Graduate standing or instructor's approval. (Typically offered: Spring)
This course is cross-listed with GEOS 5113.

ENDY 5153. Environmental Site Assessment. 3 Hours.
Principles, problems, and methods related to conducting an environmental site assessment. An applied course covering field site assessment, regulatory documentation, and report preparation. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033). (Typically offered: Irregular)
This course is cross-listed with GEOS 5153.

ENDY 5853. Environmental Isotope Geochemistry. 3 Hours.
Introduction to principles of isotope fractionation and distribution in geological environments isotopic analytical methods, and extraction of isotope samples; application of isotopes in characterization of geologic processes and interaction with hydrologic, surficial, and biologic attenuation, paleothermometry soil and biochemical processes. (Typically offered: Spring)
This course is cross-listed with GEOS 5853.

ENDY 6013. Environmental Dynamics. 3 Hours.
Required course for ENDY doctoral candidates. Overview of Earth Systems: Lithosphere; Hydrosphere, Atmosphere, Biosphere, Cryosphere, and human interaction across Earth systems. Emphasis on understanding of processes within Earth systems and interactions across Earth Systems as they pertain to global self-regulation, secular variation, climate stability, development and sustainability of human societies. Prerequisite: Graduate standing. (Typically offered: Fall)

ENDY 6023. Seminar in Environmental Dynamics. 3 Hours.
Seminar examining specific contemporary topic of topics in Environmental Dynamics. Topics will change with each offering. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENDY 602V. Current Topics Seminar. 1-2 Hour.
Various aspects of the environment will be explored through topic specific seminars. Subject matter will change each semester addressing current environmental issues and research. Seminars will be one or two hours credit. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENDY 6033. Society and Environment. 3 Hours.
This course examines the complex interrelationships between human societies and the natural environment. Drawing on diverse and interdisciplinary perspectives in archaeology, ethnography, history, geography, and palaeo-environmental studies, readings and discussion will explore the co-production of social and environmental systems over time. (Typically offered: Spring)
This course is cross-listed with ANTH 6033.

ENDY 689V. Special Problems in Environmental Dynamics. 1-6 Hour.
Independent study of a topic related to environmental dynamics under the guidance of an ENDY faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ENDY 6991. Environmental Dynamics Colloquium. 1 Hour.
Weekly meetings for discussion of current research in environmental dynamics. Graduate students must register for colloquium each semester. Colloquium credit does not count towards minimum hours required for the doctorate. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ENDY 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Environmental Engineering (ENEG)

W. Micah Hale
Department Head of Civil Engineering
4190 Bell Engineering Center
479-575-4954
Degree Conferred:
M.S.En.E. in Environmental Engineering (ENEG)

Program Description: The Master of Science in Environmental Engineering is a multidiscipline degree program designed for students from a multitude of academic areas. The objectives of the M.S.En.E. program are to prepare graduates for careers in environmental engineering practice with government agencies, engineering firms, or industries and to provide a foundation for continued study at the post-masters level.

Primary Areas of Faculty Research: Water treatment and distribution; waste-water collection and treatment; soil and groundwater remediation; surface and ground water quality; environmental and hydrologic modeling; animal waste management; non-point source pollution prevention; watershed management; reactor design and biomass energy; energy systems including heat transfer; thermodynamics and liquid-vapor phase change; bacterial tracers for evaluating movement through fractured subsurface strata.

M.S.En.E. in Environmental Engineering

Admission Criteria: In addition to the requirements of the Graduate School, the following are the minimum criteria for admission to the M.S.En.E. degree program:

- GPA: 3.00 or higher
- GRE Scores: No less than 302 (verbal and quantitative) and 3.5 analytical writing

Degree Requirements:

Thesis Option: A minimum of 30 semester hours of graduate-level credits, 24 semester hours of graded course work and a minimum of six semester hours of thesis.

Course Work Only Option: 30 semester hours of graded graduate-level course credits.

Both Options:

1. Upon admission to the Graduate School and acceptance in a program of study, candidates pursuing a thesis-based program will be assigned an adviser, who will assist the candidate with course selection and with finding a major adviser. The major adviser and the candidate will select a graduate committee. The candidate and major adviser, with guidance from the graduate committee, will develop a plan of study and a research project for completion of the requirements for the degree. The graduate committee will serve as the examination committee for the research, the thesis, and the final oral and/or written examination. Candidates pursuing a coursework-based program will be assigned to a major adviser, who will assist the candidate in selection of a graduate committee, developing a plan of study; and coordination of the final oral and/or written examination.

2. No more than six graduate credit hours presented for the M.S.En.E. degree may be 4000-level.

3. Required courses listed below.
   - CVEG 5203 Water Chemistry
   - CVEG 5213 Advanced Water Treatment Design
   - CVEG 5224 Advanced Wastewater Treatment Design
   - CVEG 5233 Microbiology for Environmental Engineers
   - CVEG 5273 Open Channel Flow

4. Candidates for the degree must present a cumulative grade point average of 3.00 on all graduate courses. The minimum acceptable grade for any course is "C".

5. A comprehensive examination that will include either a defense of the candidate's thesis or a presentation and discussion of the candidate's course work.

6. Students should also be aware of Graduate School requirements with regard to master's degrees (https://catalog.uark.edu/graduatetocatalog/graduaterequirements/#mastersdegreestext).

7. Students should be aware that most or all of the courses in this program have prerequisite requirements. Students will be required to meet these prerequisite requirements or obtain instructor permission to enroll.

Graduate Faculty

Clausen, Ed, Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), University Professor, Ralph E. Martin Department of Chemical Engineering, 1981.

Costello, Thomas A., Ph.D. (Louisiana State University), M.S.Ag.E., B.S.Ag.E. (University of Missouri-Columbia), Associate Professor, Department of Biological and Agricultural Engineering, 1986.

Edwards, Findlay, Ph.D. (New Mexico State University), M.S. (University of New Mexico), M.S.C.E. (New Mexico State University), Associate Professor, Department of Civil Engineering, 1999.

Fairey, Julian, Ph.D., M.S.C.E. (University of Texas at Austin), B.S.C.E. (University of Alberta, Canada), Associate Professor, Department of Civil Engineering, 2008.

Nutter, Darin W., Ph.D. (Texas A&M University), M.S.M.E., B.S.M.E. (Oklahoma State University), Professor, Department of Mechanical Engineering, 1994.

Williams, Rodney D., Ph.D., M.S., B.S.C.E. (University of Arkansas), Assistant Professor, Department of Civil Engineering, 1998.

Zhang, Wen, Ph.D. (Purdue University), M.S. (University of Kansas), Assistant Professor, Department of Civil Engineering, 2011.

Degree Conferred:
M.S. in Food Safety (FDSF)

M.S. in Food Safety
Master of Science Program: The Master of Science in Food Safety is designed to prepare students for higher positions in the food industry.
The program provides a subject matter core of courses in food microbiology, sanitation, food processing, epidemiology, food law, HACCP applications, human diseases, and other quality control areas facing the food industry.
The Master of Science in Food Safety program requires a total of 30 hours of graduate-level work. Each student will complete one three-hour special problem in which a technical paper will be developed. This requirement may be satisfied by an approved thesis project in the Poultry or Food Science department. No more than a total of 6 hours of thesis, special problems and internships are recognized for degree requirements with no more than a total of 6 hours of special problems and internships. Each special problem course should be limited to three hours of credit. An oral examination over all course work and the special problem project or thesis is required.
The student’s advisory committee will outline the total program of study and will also determine if any course deficiencies should be addressed. An applicant must meet all of the requirements for admission to the Graduate School. The program’s steering committee provides guidelines for student admission and establishes degree requirements. The student and the Program Coordinator, with approval of the Dean of the Graduate School, select a major adviser. The major adviser, in consultation with the student, will recommend additional faculty members to serve on the student’s advisory committee, including one member from the program steering committee.
Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Department of Food Science website (http://food-science.uark.edu)

Degrees Conferred:
M.S., Ph.D. (FDSC)

Program Description: The M.S. and Ph.D. programs in Food Science provide students with graduate education and research experience, both fundamental and applied, aimed at enhancing production and processing techniques, assuring food safety, utilizing co-products of food processing, improving the sensory and nutritional quality of food and understanding the role of nutrition in health and disease. Interdisciplinary faculty with comprehensive expertise in the food and food-related sciences, along with state-of-the-art facilities, are capable of addressing the most complex fundamental and applied research problems.

Primary Areas of Faculty Research: Post-harvest technologies; food engineering; new value-added products and process development; methodology and assessment of quality attributes of raw and processed foods; food biochemistry; food microbiology; food processing and packaging; lipid, protein, and carbohydrate chemistry; food enzymology; functional foods; nutraceuticals; food safety; sensory analysis, human nutrition and chronic diseases.

M.S. in Food Science
Admission to Master of Science Degree Program: The student must have a B.S. degree from an accredited institution with a grade-point average of no less than 3.00, GRE score of 146 verbal, 144 quantitative and 4.0 writing, suitable preparation in food science or related areas, and be acceptable to the department. International students must also have a TOEFL score of no less than 237 (computer)/580 (paper)/92 (Internet) and no less than 4.5/6 on the TWE score of the TOEFL test.

Requirements for the Master of Science Degree: A minimum of 24 semester hours of course work and 6 semester hours of thesis are required for the M.S. degree. Course deficiencies, if any, will be identified at the time of acceptance. At least 14 course credits of the 24 credits required must be from 5000-level or higher courses. In addition to coursework, the student will be required to conduct research and prepare an acceptable thesis. Upon admission to this program the candidate will be assigned to a thesis director, who in consultation with the department head will select a graduate committee. This committee will assist with developing a suitable program for the candidate and will serve as the examination committee.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Ph.D. in Food Science
Admission to Doctor of Philosophy Degree Program: Applicants for acceptance into the interdepartmental doctoral program in food science must meet all of the requirements for admission to the Graduate School and the Department of Food Science. Students with a research thesis M.S. degree in Food Science or related sciences from an accredited institution should have an M.S. GPA of no less than 3.5. Students with a B.S. will be considered for the Ph.D. program if their UGPA is no less than 3.65 and they have had research experience with publishable research results. All applicants to the Ph.D. program (B.S. and M.S.) should have a GRE score of 153 verbal, 148 quantitative and 4.0 writing, suitable preparation for the food science graduate program, and be acceptable to the department. International students must also have a TOEFL score of no less than 237 (computer)/580 (paper)/92 (Internet) and no less than 4.5/6.0 on the TWE score of the TOEFL test.

Requirements for the Doctor of Philosophy Degree: Upon acceptance to this program, the student will be assigned to a dissertation director from the department representing the student’s selected area of concentration. The dissertation director in consultation with the student and with the department head will select at least two suitable graduate faculty members from outside the student’s own department to complete a committee of five members. The doctoral advisory committee chaired by
the dissertation director will be responsible for supervision of the student’s program development, and will serve as the examination committee for candidacy and final examinations.

The student’s course work and dissertation topic will be supervised by the doctoral advisory committee. For students holding an M.S. degree in a science discipline and aside from deficiencies identified upon acceptance to the program, a minimum of 24 semester hours of course credit and a minimum of 18 semester hours of Ph.D. dissertation research credit will be required. Requirements include a minimum of 18 hours of 5000- and 6000-level courses. For students holding a B.S. degree and aside from deficiencies identified upon acceptance to the program, a minimum of 42 semester hours of course credit and a minimum of 18 semester hours of Ph.D. dissertation research credit will be required. Requirements include a minimum of 30 hours of 5000- and 6000-level courses and up to six hours from the Food Science core courses can be counted toward the 42 hours. The student must maintain a grade-point average of 3.00 or higher. General requirements pertaining to the declaration of intent, admission to candidacy and residency are in accordance with the requirements set forth by the Graduate School of the University of Arkansas.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

**Graduate Faculty**

Atungulu, Griffiths Odhiambo, Ph.D., M.S. (Iwate University, Japan), B.S. (Jomo Kenyatta University of Agriculture and Technology, Kenya), Associate Professor, 2013.

Baum, Jamie I., Ph.D., B.S. (University of Illinois-Urbana-Champaign). Associate Professor, 2011.

Carbonero, Francy, Ph.D. (University of Warwick, U.K.), M.S. (Université Blaise Pascal, France). B.S. (Université Joseph Fourier, France), Assistant Professor, 2013.

Crandall, Philip G., Ph.D., M.S. (Purdue University), B.S. (Kansas State University), Professor, 1989.

Gibson, Kristen Elizabeth, Ph.D. (Johns Hopkins University), B.S. (University of Central Florida), Associate Professor, 2012.

Hettiarachchy, Navam S., Ph.D. (University of Hull, England), M.S. (Edinburgh University, Scotland), B.S. (University of Madras, India), University Professor, 1992.

Howard, Luke R., Ph.D., M.S. (University of Arkansas), B.S. (Purdue University), Professor, 2002.

Lee, Sun-Ok, Ph.D., M.S. (Iowa State University), M.S., B.S. (Dongduk Women’s University), Associate Professor, 2008.

Meullenet, Jean-François, Ph.D. (University of Georgia), M.S. (National Superior School of Agronomy and Food Science, Nancy, France), Professor, 1996.

Morawicki, Ruben O., Ph.D. (Pennsylvania State University), M.Eng. (State University of New York-Buffalo), B.S. (Universidad Nacional de Misiones, Argentina), Associate Professor, 2006.

Ricke, Steven C., Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Illinois), Professor, 2005.

Seo, Han-Seok, Dr.med. (Technische Universität Dresden, Germany), Ph.D., M.Sc. (Seoul National University). B.S. (Korea University, Seoul), Associate Professor, 2012.

Siebenmorgen, Terrence J., Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (University of Arkansas), Distinguished Professor, 1984.

Wang, Ya-Jane, Ph.D. (Iowa State University), M.S. (University of Minnesota-Twin Cities), B.S. (National Taiwan University), Professor, 1999.

**Courses**

**FDSC 5001. Seminar. 1 Hour.**
Presentation and discussion of graduate student research. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 2 hours of degree credit.

**FDSC 509V. Special Problems Research. 1-6 Hour.**
Original investigation on assigned problems in food science. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

**FDSC 5111L. Food Analysis Lab. 1 Hour.**
(Formerly FDSC 4111L.) Laboratory exercises providing students with experience of analytical techniques and instrumentation used in food analysis. Laboratory 3 hours per week. Graduate degree credit will not be given for both FDSC 4111L and FDSC 5111L. Corequisite: FDSC 4113 or FDSC 5113 (formerly FDSC 4113). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304) and CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

**FDSC 5113. Food Analysis. 3 Hours.**
(Formerly FDSC 4113.) Methods of analysis, instrumentation, and laboratory techniques for measuring the chemical composition of raw and value-added products. Lecture 3 hours. Graduate degree credit will not be given for both FDSC 4113 and FDSC 5113. Corequisite: FDSC 4111L or FDSC 5111L (formerly FDSC 4111L). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304) and CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

**FDSC 5121L. Food Microbiology Lab. 1 Hour.**
(Formerly FDSC 4121L.) A hands-on laboratory course designed to teach students microbiological techniques and certain enumeration and plating techniques of specific food spoilage and pathogenic bacteria. Graduate degree credit will not be given for both FDSC 4121L and FDSC 5121L. Pre- or Corequisite: FDSC 4122 or FDSC 5122 (formerly FDSC 4122). (Typically offered: Fall)

**FDSC 5122. Food Microbiology. 2 Hours.**
(Formerly FDSC 4122.) The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Graduate degree credit will not be given for both FDSC 4122 and FDSC 5122. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)

**FDSC 5223. Food Biosecurity. 3 Hours.**
This course is the study of the security of agricultural products and the protection of our food supply from intentional and accidental, domestic and international contamination. Prerequisite: Graduate standing. (Typically offered: Irregular)

**FDSC 5304. Food Chemistry. 4 Hours.**
(Formerly FDSC 4304.) Water, carbohydrates, lipids, proteins, vitamins, and minerals in foods; biochemical and functional properties, enzymes, food additives (emulsifiers, pigments, colors, flavors, preservatives, and sweeteners) and texture as related to properties in food systems and during processing. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both FDSC 4304 and FDSC 5304. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Fall)

**FDSC 531V. Internship in Food Science. 1-4 Hour.**
(Formerly FDSC 431V.) The Food Science Internship is a supervised practical work experience with a food industry, research program or governmental agency to gain professional experience and insight into career opportunities. Graduate degree credit will not be given for both FDSC 431V and FDSC 531V. Prerequisite: Completion of first year of graduate studies and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.
FDSC 5333. Molecular Biology Techniques Applied to Nutrition and Food Science. 3 Hours.
This course will provide advanced knowledge on current molecular biology techniques and how they can be used in nutrition and food science. A specific emphasis will be given on learning how to understand and interpret results generated through these methods. Therefore, the course is of interest to a wider audience, as such analytic skills are valuable for a diverse array of disciplines. Methods covered will include DNA and RNA-based techniques (PCR, microarrays, sequencing, genomics and metagenomics), protein-based techniques (blots, proteomics) and other molecules-based techniques (metabolomics, immunoblots). Prerequisite: Graduate standing. (Typically offered: Fall)

FDSC 5413. Sensory Evaluation of Food. 3 Hours.
(Formerly FDSC 4413.) Principles and procedures for sensory evaluation of food. Appropriate uses of specific tests are discussed, along with physiological, psychological, and environmental factors affecting sensory verdicts. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both FDSC 4413 and FDSC 5413. Corequisite: Lab component. Prerequisite: STAT 2303 or WOCB 1033 or AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 2023 or PSYC 2013. (Typically offered: Fall)

FDSC 5423. Foodborne Diseases. 3 Hours.
This course will introduce students to the major pathogens associated with foodborne diseases, their epidemiology, and approaches to outbreak investigation and control of foodborne illness. An emphasis will be placed on understanding the relationships between the host, the etiologic agent, and the environment as they relate to disease causation. The student will gain knowledge through lectures, case studies, readings, and an individual project. Prerequisite: BIOL 1543 or equivalent. (Typically offered: Summer Odd Years)

FDSC 5503. Safety and Sanitation for the Food Industry. 3 Hours.
This web-based course will provide an appreciation of the need for sanitation in food processing and increase the students' knowledge of sanitary techniques. Topics will include contamination sources, plant and equipment design, cleaners and sanitizers, HACCP, and food biosecurity. Also covered will be considerations in selecting, establishing and maintaining a sanitation program. Prerequisite: General Microbiology or Food Microbiology; General Chemistry. (Typically offered: Fall)

FDSC 5623. Principles of Food Science. 3 Hours.
This is an introduction for graduate students to the major food science disciplines and provides core knowledge and broad appreciation of basic food science principles. The basics of food engineering, food processing, food microbiology and food safety, food chemistry, sensory science, and nutrition will be discussed. This course provides a general foundation in food science prior to more specialized food science graduate studies. The student will gain understanding through lectures, readings and class discussion. Prerequisite: Graduate standing. (Typically offered: Fall)

FDSC 5713. Product Innovation for the Food Scientist. 3 Hours.
(Formerly FDSC 4713.) This is a capstone course integrating knowledge developed in Food Science to the development of new food products. This course will take an integrated multidisciplinary approach to developing innovative food products and will provide learning experiences in new product development and Research & Development. Topics include product formulation, ingredient interactions, sensory analysis, packaging, labeling, food safety and food law. Graduate degree credit will not be given for both FDSC 4713 and FDSC 5713. Corequisite: Lab component. Pre- or Corequisite: FDSC 4113 or FDSC 5113 (formerly FDSC 4113) and FDSC 4111L or FDSC 5111L (formerly FDSC 4111L). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304), FDSC 3103, and FDSC 4413 or FDSC 5413 (formerly FDSC 4413). (Typically offered: Spring)

FDSC 5754. Engineering Principles of Food Processing. 4 Hours.
(Formerly FDSC 4754.) Basic mechanics of refrigeration, temperature controls, materials handling and mechanical problems as applied to foods and food processing. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both FDSC 4754 and FDSC 5754. Corequisite: Lab component. Prerequisite: MATH 1213, PHYS 2013, and PHYS 2011L. (Typically offered: Spring Even Years)

FDSC 5823. Principles of Food Microbiology. 3 Hours.
(Formerly FDSC 4823.) This web-based course is a study of the fundamentals of food microbiology to include its history, classifications, spores and their importance, and the most common and serious pathogenic food microorganisms. Fermentation, spoilage microorganisms and control methodology are also discussed. Graduate degree credit will not be given for both FDSC 4823 and FDSC 5823. (Typically offered: Irregular)

FDSC 5993. Global Horticulture and Human Nutrition to Enhance Community Resilience and Food Security. 3 Hours.
This course covers three broad areas (Global Horticulture, Sustainable International Development, Human Health and Nutrition) and experts on three campuses created the instruction. The course is intended to be multi-disciplinary, and students should use their contextual knowledge to add to weekly discussions. Prerequisite: Graduate standing. (Typically offered: Spring)
This course is cross-listed with AGED 5993, HORT 5993.

FDSC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

FDSC 602V. Special Topics. 1-3 Hour.
Discussions focused on selected topics of particular fields of raw product physiology and food processing. chemistry, physiology, microbiology, evaluation, sensory analysis and preservation. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

FDSC 6033. Food Biochemistry. 3 Hours.
Biochemical characteristics, functions, regulation and impact of components in raw and processed foods of plant origin. Lecture/discussion 3 hours per week. Prerequisite: CHEM 3813. (Typically offered: Fall Odd Years)

FDSC 6123. Food Carbohydrate Chemistry. 3 Hours.
Focus is on carbohydrate chemistry including molecular structures and physical properties, production and food applications, analytical methods for food carbohydrates, and interactions among food polysaccharides. Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304). (Typically offered: Fall Even Years)

FDSC 6143. Advanced Food Processing and Packaging and their Environmental Impact. 3 Hours.
The course is directed to graduate students in food science and related fields. Students will learn advanced food processing technologies and packaging as well as the environmental issues associated to food production, processing, and distribution. Prerequisite: FDSC 3103 or equivalent, or food processing/engineering background with knowledge of basic food processing operations. (Typically offered: Spring Even Years)

FDSC 6323. Nutraceuticals and Functional Foods. 3 Hours.
Course will include past, present and future of nutraceuticals and functional foods, chemistry, mechanism, novel technologies, nutrigenomics, processing, healthy lifestyle, regulation, safety, marketing, international aspects, and industry project. Prerequisite: CHEM 2613 (or CHEM 3603) and CHEM 3813 and FDSC 4304 or instructor consent. (Typically offered: Spring Even Years)
FDSC 6333. Food Protein Chemistry and Functionality. 3 Hours.
This course is a study in advanced food protein chemistry, including molecular structures, characterization, physicochemical bases of food protein functionality, structure-function relationship, processing technologies to improve functionality, as well as hands-on experiences with timely, practical projects related to food proteins. Lecture and problem solving projects for 3 hours per week. Pre- or Corequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304). (Typically offered: Spring Odd Years)

FDSC 6403. Epidemiologic Principles in Food Safety and Public Health. 3 Hours.
This course will provide an introduction to epidemiologic methods used in foodborne disease outbreak investigations. The importance of surveillance systems in detecting outbreaks and in the development of effective disease prevention and control strategies will also be presented. An emphasis will be placed on understanding the relationships between the host, the etiologic agent, and the environment as they relate to disease causation. In addition, molecular methods utilized for the identification of etiologic agents will be discussed. Selected important foodborne diseases will be discussed in detail to clarify the role of epidemiology in understanding the pathogenesis of infectious processes in individuals and communities. Prerequisite: FDSC 4122 or FDSC 5122 (formerly FDSC 4122) or equivalent. (Typically offered: Fall Even Years)

FDSC 6443. Metabolism of Xenobiotics. 3 Hours.
This course is designed to provide in-depth knowledge of the integration of molecular, cellular, and physiologic aspects of xenobiotics (e.g., phytochemicals)/micronutrients and metabolism. This course will also discuss the current understanding of the mechanism and regulation of gene expression by xenobiotics/micronutrients. Examination of current research literature to understand how xenobiotics/micronutrients and physiological states metabolize and influence gene expression, as well as the research methodology used to address these relations. Prerequisite: CHEM 3813. (Typically offered: Fall Even Years)

FDSC 700V. Doctoral Dissertation. 1-18 Hour.
The doctoral program in food science is an interdepartmental program offered by the departments of Food Science, Animal and Poultry Sciences, and Human Environmental Sciences. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

French
See World Languages, Literatures, and Cultures (p. 344).

Courses
FREN 5003. French Grammar and Phonetics. 3 Hours.
Systematic review of principles of French grammar and syntax; comprehensive presentation of French phonetics. (Typically offered: Irregular)

FREN 5033. Advanced French Conversation. 3 Hours.
This course will provide a small discussion environment in which graduate students will improve their command of spoken French in an interactive setting. Discussion will concentrate on current cultural issues in the French speaking world. (Typically offered: Irregular)

FREN 5213. French Culture & Civilization. 3 Hours.
An analysis of French cultural symbols and attitudes as observed in their historical, economical, political, social, educational, and linguistic aspects. (Typically offered: Irregular)

FREN 5333. Old French Literature. 3 Hours.
An intensive study of French Medieval Literature from the Chansons de Geste to Villon, including an in-depth analysis of the genres and their evolution, and of the major authors of the times. (Typically offered: Irregular)

FREN 5353. Survey of French Poetry. 3 Hours.
A comprehensive study of French poetry from the Middle Ages to the twentieth century, focusing on close readings of individual poems. This course will cover literary movements and trends of the periods and presents the terminology required to do explication de texte. (Typically offered: Irregular)

FREN 5433. French 16th-Century Literature. 3 Hours.
A survey of representative writers of the sixteenth century. (Typically offered: Irregular)

FREN 5543. French 17th-Century Literature. 3 Hours.
A survey of representative writers of the seventeenth century. (Typically offered: Irregular)

FREN 5563. French Short Story. 3 Hours.
An introduction to the French short story, focusing on close readings of a variety of contes and nouvelles from the Middle Ages through the twenty-first century. (Typically offered: Irregular)

FREN 5673. French 18th-Century Literature. 3 Hours.
French 18th-Century literature. (Typically offered: Irregular)

FREN 5703. Special Topics. 3 Hours.
May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

FREN 575V. Special Investigations. 1-6 Hour.
Special investigations. (Typically offered: Irregular) May be repeated for degree credit.

FREN 5773. Survey of Francophone Literature. 3 Hours.
A survey of representative texts in the field of sub-Saharan and North African literature concentrating on postcolonial novels using contemporary critical approaches. (Typically offered: Irregular)

FREN 5783. The French Nineteenth-Century Novel. 3 Hours.
The French Nineteenth-Century novel. (Typically offered: Irregular)

FREN 5813. French 20th-Century Theatre. 3 Hours.
French 20th-Century theatre. (Typically offered: Irregular)

FREN 5833. French 20th-Century Novel. 3 Hours.
French 20th-Century novel. (Typically offered: Irregular)

Degrees Conferred:
M.S. in Geography (GEOG)
M.S. in Geology (GEOG)
Ph.D. in Geosciences (GEOS)

Graduate Certificates Offered (non-degree):
Geospatial Technologies (GIST)

Geography (GEOG) (M.S.)

Areas of Study: Human geography, physical geography, GIS, cartography, space and planetary sciences.

Program Description: The Department of Geosciences offers a Master of Science (M.S.) degree in geography. This program draws on a variety of faculty expertise in physical, environmental, human, and regional studies in geography as well as in cartography, remote sensing, photogrammetry, and computational aspects of geographic information science (GIS) or geoinformatics.

Geology (GEOG) (M.S.)

Areas of Study: General geology, space and planetary sciences

Program Description: Instruction in geology at the graduate level focuses on preparation of students to become practicing professional geologists in industry or to pursue, without deficiencies, doctorates in geosciences at established programs. Students intending to enter the industrial workforce are encouraged to maintain a broad perspective with an emphasis in an area of geology that has a demonstrated record of past employment, such as petroleum geology or environmental geology. The greatest strength of the program in geology at the University of Arkansas is instruction in practical geologic interpretation, with emphasis on field relationships. This instructional strength includes all levels of teaching and supports an active research program that serves to strengthen the research and communication skills of the students through writing assignments, oral presentations, and participation in professional societies.

Geosciences (GEOS) (Ph.D.)

Primary Areas of Faculty Research:
1. Basin evolution and analysis (including multiple aspects of petroleum geology that incorporate sedimentation, structural geology, stratigraphy and geophysics),
2. Crustal and mantle composition and tectonic evolution,
3. Neotectonics and dynamic geomorphology,
4. Geoinformatics (including GIS, remote sensing, GPS geodesy, and geospatial analysis),
5. Groundwater dynamics, karst hydrology and limnology, and
6. Paleoclimatology.

The Department of Geosciences focuses on research and education dealing with the nature, genesis, and history of the Earth and the global environment, the evolution of landscapes and biota at the Earth’s surface, and the advance of geospatial technologies. The Doctor of Philosophy degree is designed for students who are committed to scholarship in the geosciences and who wish to prepare for professional employment within the academic community, industry, or government. Geosciences research requires rigorous observation, quantitative analysis, and modeling in order to yield scientific results that are acceptable for publication in first-rate, internationally-ranked journals. Given the interdisciplinary nature of Geosciences, the Department of Geosciences encourages research including elements of space and planetary sciences, biological sciences, environmental sciences, physics and chemistry to address relevant problems at the boundaries of geoscience and other disciplines.

Applicants for the doctoral program must have completed the baccalaureate degree with a major in geosciences or an allied discipline. Students wishing to prepare for the advancement of geoscientific knowledge and research are encouraged to pursue a Ph.D. degree in geosciences. In addition, students interested in preparing for professional employment in the field of geosciences, the Department of Geosciences encourages research including elements of space and planetary sciences, biological sciences, environmental sciences, physics and chemistry to address relevant problems at the boundaries of geoscience and other disciplines. Students with academic preparation at the undergraduate or masters level in other disciplines of physical science, engineering, and mathematics are also encouraged to apply. All applicants must submit their scores on the Graduate Record Examination directly to the University of Arkansas Graduate School, provide three letters of recommendation from individuals qualified to assess the applicant’s academic potential, a personal curriculum vita, and a statement of academic and research interests.

Qualified students with a bachelor’s degree or a master’s degree may be accepted into the Ph.D. program. Academic requirements for admission to the program are listed in the table below. In addition, prospective applicants are encouraged to contact Department of Geosciences faculty with similar research interests to initiate dialogue regarding availability for mentoring, potential research topics, and research funding opportunities.

M.S. in Geography

Admissions to Degree Program: Applicants must be admitted to the Graduate School and meet the following requirements: 1) satisfactory undergraduate preparation in geography, 2) three letters from persons competent to judge the applicant’s potential for graduate studies, 3) satisfactory GRE scores, and 4) a completed departmental application. In addition to these requirements, students applying to the MS program should have adequate mathematical preparation at the undergraduate level, including statistics, algebra, and/or calculus. Students who do not meet these requirements may be admitted conditionally. Students with course deficiencies may enroll concurrently in graduate courses. Students speaking English as a foreign language are encouraged to take the TOEFL with results reported to the department.

Degree Requirements: Requires a total of 30 semester hours. A minimum of 24 semester hours of course work (including a 7-hour core and 6 hours of quantitative or computational electives), six semester hours of thesis, and a comprehensive examination (defense of thesis) conducted by the candidate’s thesis committee are required for all students who obtain an M.S. in Geography.

GEOS 600V  Master's Thesis 6

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

M.S. in Geology
Admission to Degree Program: Students admitted to graduate study should have completed an undergraduate geology program similar to that required for the B.S. degree at the University of Arkansas. Applicants lacking an appropriate background may satisfy deficiencies while enrolled in Graduate School. Prospective students should submit application forms, three letters of recommendation, and a statement of their graduate and professional goals before January 15 for the fall semester and October 15 for the spring semester to assure their consideration. These dates are also deadlines for receipt of application for financial assistance.

Requirements for the Master of Science Degree: The program in Geology requires 30 graduate course credit hours, six of which will be derived from a thesis reporting the results of an original research problem. All course work, a thesis topic, and the final thesis must be approved by the student’s thesis committee. This committee is selected by the student and the student’s thesis director and will consist of a minimum of three members. At least two of the committee members will be chosen from geology faculty whose areas of expertise coincide with the research interests of the student.

Thesis 6
GEOS 5612  Research Methods in Geosciences 2
GEOS 5011  Colloquium 1
Electives at 5000 level 12
Taught by Geology faculty and not to include unnamed special topics and independent study.
Additional Electives 9
To be determined in consultation with the thesis adviser and advisory committee.

Total Hours 30

A listing of geology Faculty can be found in the Geosciences Graduate Student Handbook.

Courses transferred or previously taken as an undergraduate may not be used for graduate credit toward the 24 credit hour requirement. Students should be aware that courses taken to fulfill deficiencies as graduate students will incur graduate tuition.

To complete the requirements for the degree, the candidate must complete all course work with a grade-point average of 3.00, submit an acceptable thesis, and pass a comprehensive examination based primarily on a defense of the student’s thesis.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Ph.D. in Geosciences
Requirements for Admission to the Doctor of Philosophy Degree in Geosciences:

- Minimum Undergraduate GPA: 2.85 on a 4.0 system
- Minimum Graduate GPA: 3.20 on a 4.0 system
- Minimum GRE Verbal: 153
- Minimum GRE Quantitative: 144
- Minimum GRE combined Verbal and Quantitative: 297
- Minimum GRE writing: 4
- International students only: a minimum score of 6.5 on the International English Language Testing System (IELTS), 79 on the Internet-based Test of English as a Foreign Language (TOEFL), or a 58 on the Pearson Test of English - Academic (PTE-A), taken within the preceding two years
- M.S./M.A. requirements: 24 units graduate courses, 6 hours thesis
- Recommendations: Three (3) letters of recommendation from individuals qualified to assess the applicant’s academic potential
- Ph.D. course requirements: 24 units graduate courses; 18 hours dissertation; completed original dissertation research.
- No course with a grade of less than a C (graduate or undergraduate) will be accepted as fulfilling prerequisites.
- Acceptance by an adviser
- Other: Current Curriculum Vita; Statement of academic and research interests
- Submit application by Jan. 15 deadline for fall semester to assure consideration

Course Requirements for the Doctor of Philosophy Degree:

- 24 course hours beyond the U of A M.S./M.A. degree or equivalent.
- GEOS 5023 Technical and Proposal Writing for the Geosciences
- It is strongly recommended that two courses be taken outside of the department that are supplementary to the student’s interests and dissertation topic. These may be 3000-level undergraduate courses, if approved by the Advisory Committee and the Graduate School.
- No more than 3 hours of Special Problems or Independent Research
- Dissertation – 18 hours to be taken after admission to candidacy

Candidacy Exams: The comprehensive examinations consist of two rigorous examinations:

1. A written comprehensive examination and

Students will take a comprehensive examination after they have completed the Graduate School residency requirement and have completed the required departmental core courses. The exam will be taken during the fall or spring semester when classes are in session, but not during final exams. At the time of the exam, the student must have a grade point average of 3.25 on 12 or more hours of course work taken beyond the master’s degree. This exam must be taken at least one year prior to completing all requirements for the degree.

The second written work to be assessed by the Comprehensive Examination Committee will be a research proposal composed by the student in the format typical of a National Science Foundation grant proposal. It is expected that the document will conform to all proposal...
formatting described in the Department of Geosciences Graduate Student Handbook requirements.

**Oral Dissertation Proposal:** Upon admission to candidacy (passing the written comprehensive exam), the student will present to his/her Dissertation Committee a written and oral proposal of the dissertation topic for comment, suggestions, and approval. The dissertation adviser will chair the committee, unless prohibited by Graduate School conflict of interest rules.

Successful completion of the proposal defense requires the positive vote of the committee. Normally this proposal will be completed by the third or fourth semester after matriculation and can only be delayed with the approval of the dissertation committee and the appropriate departmental Graduate Adviser.

Any waivers to these requirements must be appealed to the Advisory or Dissertation committee and the departmental Graduate Adviser.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

The student must maintain a 3.0 GPA in course work taken for the Ph.D. degree.

The Doctor of Philosophy degree is primarily a research degree, but communication of that research is critical for professional development and required for most professional pursuits. To promote development of the communication skills, each student is required to teach labs and/or a course for at least one semester and to present scientific results at one or more national or international professional meetings.

**Graduate Certificate in Geospatial Technologies**

The Department of Geosciences offers an online Geospatial Technologies Graduate Certificate through University of Arkansas Global Campus (http://globalcampus.uark.edu). This certificate is designed for working professionals who wish to develop technical skills in the emerging field of geospatial technologies. The certificate provides the technical instruction needed to be employed in the geosciences and collateral disciplines as one of the American Society of Photogrammetry and Remote Sensing’s “Mapping Scientist” and as a “Certified Geographic Information Systems Professional” (GISP).

**Requirements for a Geospatial Technologies Graduate Certificate**

Requirements for admission: Graduate status; there are no disciplinary requirements.

A total of 12-18 hours are required for the certificate:

- GEOS 5043 Foundations of Geospatial Data Analysis 3
- GEOS 5073 Geospatial Technologies Computational Toolkit 3
- GEOS 5083 Geospatial Data Mining 3
- GEOS 5543 Geospatial Applications and Information Science 3
- GEOS 5553 Spatial Analysis Using ArcGIS 3
- GEOS 5593 Introduction to Geodatabases 3

It is possible to waive 3 to 6 hours of required coursework for GEOS 5043 and GEOS 5073 through successful completion of proficiency exams.

**Graduate Faculty**

- Aly, Mohamed H., Ph.D. (Texas A&M), M.S., B.S. (Zagazig University), Assistant Professor, 2013.
- Boss, Steve K., Ph.D. (University of North Carolina at Chapel Hill), M.S. (Utah State University), B.S. (Bemidji State University), Professor, 1996.
- Cothren, Jackson David, Ph.D., M.S. (The Ohio State University), B.S. (United States Air Force Academy), Associate Professor, 2004.
- Covington, Matthew D., Ph.D. (University of California-Santa Cruz), B.A. (University of Arkansas), Associate Professor, 2012.
- Davidson, Fiona M., Ph.D., M.A. (University of Nebraska-Lincoln), B.A. (Newcastle Upon Tyne Polytechnic), Associate Professor, 1992.
- Davis, Ralph K., Ph.D., M.S., B.S. (University of Nebraska, Lincoln), Professor, 1994.
- Dumond, Gregory, Ph.D. (University of Massachusetts), M.S. (Texas Tech University), B.S. (University of Texas El Paso), Associate Professor, 2010.
- Feng, Song, Ph.D., M.S. (Chinese Academy of Sciences), B.S. (Yunnan University), Associate Professor, 2013.
- Hays, Phillip D., Ph.D., M.S. (Texas A&M University), B.S. (University of Arkansas), Research Professor, 2000.
- Holland, Edward C., Ph.D., M.A. (University of Colorado, Boulder), B.A. (Princeton University), Assistant Professor, 2016.
- Lamb, Andrew P., Ph.D. (Boise State University), M.S. (Florida Institute of Technology), B.S. (University of Dublin, Trinity), Assistant Professor, 2017.
- Limp, Fred, Ph.D., M.A., B.A. (Indiana University at Bloomington), University Professor, 1979.
- Liner, Christopher L., Ph.D. (Colorado School of Mines), M.S. (University of Tulsa), B.S. (University of Arkansas), Professor, 2012.
- Paradise, Thomas R., Ph.D. (Arizona State University), M.A. (Georgia State University), F.G.A., G.G. (Gemological Institute of America), B.S. (University of Nevada), University Professor, 2000.
- Potra, Adriana, Ph.D. (Florida International University), M.S., B.S. (University of Babes-Bolyai, Romania), Assistant Professor, 2012.
- Sharman, Glenn R., Ph.D. (Stanford University), B.S. (Wheaton College), Assistant Professor, 2017.
- Shaw, John B., Ph.D. (University of Texas at Austin), B.A. (Oberlin College), Assistant Professor, 2014.
- Shi, Xuan, Ph.D. (West Virginia University), M.S. (Indiana University of Pennsylvania), B.S. (Hubei University), Assistant Professor, 2012.
- Stahle, David William, Ph.D. (Arizona State University), M.A. (University of Arkansas), B.A. (University of Arizona), Distinguished Professor, 1982.
- Suarez, Celina A., Ph.D. (University of Kansas), M.S. (Temple University), B.S. (Trinity University), Associate Professor, 2012.
- Sui, Daniel, Ph.D. (University of Georgia), M.S., B.S. (Peking University), Distinguished Professor, 2018.
- Tullis, Jason A., Ph.D., M.S. (University of South Carolina at Columbia), B.S. (Bingham Young University), Professor, 2004.

**Courses**

- **GEOS 5003. Seminar in Geography. 3 Hours.**
  Selected topics, the nature of which varies with the need. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

- **GEOS 5011. Colloquium. 1 Hour.**
  Weekly meetings of faculty, graduates, advanced students and guests to discuss research and trends in the field of geography. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.
GEOS 5023. Technical and Proposal Writing for the Geosciences. 3 Hours.
Preparation of technical reports, research proposals, and manuscripts for publication in the area of geosciences. (Typically offered: Spring)

GEOS 5033. Advanced Vector Geographic Information Systems. 3 Hours.
Advanced vector operations and analysis. Topics will include topological analysis, network analysis, geocoding, conflations, implications of source and product map scale, map generation, error mapping, and cartographic production. Prerequisite: GEOS 5043 or GEOS 5583 (formerly GEOS 4583). (Typically offered: Irregular)

This course is cross-listed with ANTH 5043.

GEOS 5043. Foundations of Geospatial Data Analysis. 3 Hours.
Basic mathematical tools applied in geospatial technology, including trigonometry in mapping, linear algebra in remote sensing, optimization in spatial decision support, and graph theory in routing. Course develops the framework for spatial data analysis and decision support. Corequisite: GEOS 5543. (Typically offered: Fall and Spring)

GEOS 5053. Quaternary Environments. 3 Hours.
An interdisciplinary study of the Quaternary Period, including dating methods, deposits, soils, climates, tectonics, and human adaptation. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: Graduate standing. (Typically offered: Fall)

This course is cross-listed with ANTH 5053, ENDY 5053.

GEOS 5073. Geospatial Technologies Computational Toolkit. 3 Hours.
Basic computer tools and processes applied in geospatial software, related computer hardware components, systems and applications software, and spatial database fundamentals. Python, including SciPy and NumPy, geospatial implementations will be emphasized. No programming experience is required. Pre- or Corequisite: GEOS 5543. (Typically offered: Fall and Spring)

GEOS 5083. Geospatial Data Mining. 3 Hours.
Basic tools for analyzing, summarizing and visualizing geospatial data. Exploratory data and spatial data analysis, probability distributions and application, single and multivariate analysis and hypothesis testing, and spatial smoothing and interpolation. Emphasis will be on problem solving in geospatial settings using the R statistical language. Prerequisite: GEOS 5043 and GEOS 5073 or equivalent. (Typically offered: Fall and Spring)

GEOS 5093. History and Philosophy of Geography. 3 Hours.
This course familiarizes students with the history of geography, the contributions of geographers to scientific thought and theory, and research techniques that are used in geography. Emphasis is given to the integration of statistical and spatial analysis, and their applications in field research. The course includes short field-based projects in and around Northwest Arkansas. (Typically offered: Spring Even Years)

GEOS 510V. Special Problems in Physical Geosciences. 1-6 Hour.
Special problems in Geosciences. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

GEOS 5113. Global Change. 3 Hours.
Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. (Typically offered: Fall)

This course is cross-listed with ENDY 5113.

GEOS 5123. Stratigraphic Principles and Practice. 3 Hours.
Physical and biological characteristics of sedimentary environments and their correlation in time with emphasis on the local geologic section. Corequisite: Lab component. Prerequisite: GEOS 4223 or GEOS 5323 (formerly GEOS 4223). (Typically offered: Irregular)

GEOS 5133. Radar Remote Sensing. 3 Hours.
Introduction to radar remote sensing and its applications in geology, geography, archeology, engineering, and agriculture. Focuses on Synthetic Aperture Radar (SAR) and advanced techniques including radar stereo, polarimetry, and interferometry. Covers Interferometric SAR (InSAR) for mapping topography and modeling Earth’s surface motions due to earthquakes, volcanic eruptions, landslides, and subsidence. Prerequisite: GEOS 3023 or equivalent. (Typically offered: Spring)

GEOS 5143. 3D Seismic Exploration. 3 Hours.
Interpretation of 3D seismic data for geological structure, stratigraphy, and pore fluid variations with emphasis on hydrocarbon exploration. Credit will not be given for both GEOS 4463 and GEOS 5143. Prerequisite: GEOS 4433 or GEOS 5433 (formerly GEOS 4433). (Typically offered: Spring)

GEOS 5153. Environmental Site Assessment. 3 Hours.
Principles, problems, and methods related to conducting an environmental site assessment. An applied course covering field site assessment, regulatory documentation, and report preparation. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033). (Typically offered: Irregular)

This course is cross-listed with ENDY 5153.

GEOS 5163. Hydrogeologic Modeling. 3 Hours.
Topics include numerical simulation of ground water flow, solute transport, aqueous geochemistry, theoretical development of equations, hypothesis testing of conceptual models, limitations of specific methods, and error analysis. Emphasis on practical applications and problem solving. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033) and computer literacy. (Typically offered: Irregular)

GEOS 5173. Urban Geography. 3 Hours.
Areal patterns of modern urban regions and the focus shaping these patterns. Emphasis is placed on American urban areas and their evolution and functional areas. Field work. Graduate degree credit will not be given for both GEOS 4073 and GEOS 5173. (Typically offered: Irregular)

GEOS 5183. Geography of the Middle East. 3 Hours.
Physical and cultural landscapes, natural and cultural resources, art and architecture, land use, political history, OPEC, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Class participation, discussions, slides and films, and student presentations will round out the class. Graduate degree credit will not be given for both GEOS 4043 and GEOS 5183. (Typically offered: Fall)

GEOS 5196. Advanced Field Methods of Applied Hydrogeology. 6 Hours.
Applied field course emphasizing collection and interpretation of ground water data. Three hours may be applied toward an M.S. degree in geology. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033). (Typically offered: Summer)

GEOS 520V. Special Problems in Human Geography. 1-6 Hour.
Special problems in human geography. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

GEOS 5213. Principles of Remote Sensing. 3 Hours.
Fundamental concepts of remote sensing of the environment. Optical, infrared, microwave, LIDAR, and in situ sensor systems are introduced. Remote sensing of vegetation, water, urban landscapes, soils, minerals, and geomorphology is discussed. The course includes laboratory exercises in GIS software and field spectroscopy. (Typically offered: Fall)

GEOS 5223. Sedimentary Petrology. 3 Hours.
Sediments and sedimentary rocks. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 4223 or GEOS 5323 (formerly GEOS 4223). (Typically offered: Fall)
GEOS 5233. Geography of Religion & Sacrality. 3 Hours.
Explores the spatial nature of the World's major faiths and religious institutions, focusing on the distribution and origins of these religions. Examines the religious beliefs, rituals, architecture, demographics, and art in different societies, cultures, and countries. Considers the tenets and practices of what is sacred and/or spiritual, held in common by a group or community. Prerequisite: Graduate standing. (Typically offered: Fall Odd Years)

GEOS 5243. Political Geography. 3 Hours.
(Formerly GEOS 4243.) Contemporary world political problems in their geographic context. Development of the principles of political geography with emphasis upon the problems of Eastern Europe, Africa, and Southeast Asia. Graduate degree credit will not be given for both GEOS 4243 and GEOS 5243. (Typically offered: Fall Odd Years)

GEOS 5253. Geomorphology. 3 Hours.
(Formerly GEOS 4053.) Mechanics of landform development. Lecture 2 hours, laboratory 3 hours per week. Several local field trips are required during the semester. Graduate degree credit will not be given for both GEOS 4053 and GEOS 5253. (Typically offered: Spring)

GEOS 5263. Hydrogeology. 3 Hours.
(Formerly GEOS 4033.) Occurrence, movement, and interaction of water with geologic and cultural features. Lecture 3 hours per week. Graduate degree credit will not be given for both GEOS 4033 and GEOS 5263. Prerequisite: Lab component. Prerequisite: MATH 2043 or MATH 2554, and GEOS 3514. (Typically offered: Fall)

GEOS 5273. Principles of Geochemistry. 3 Hours.
(Formerly GEOS 4063.) Introduction to fundamental principles of geochemistry from historic development to modern concepts. Graduate degree credit will not be given for both GEOS 4063 and GEOS 5273. Corequisite: Lab component. Prerequisite: CHEM 1121L, CHEM 1123 and GEOS 2313. (Typically offered: Fall)

GEOS 5283. Economic Geology. 3 Hours.
(Formerly GEOS 4083.) Introduction to mineral deposits used as economic resources. Covers basic geology and geochemistry of mineral deposit formations and the formation of major classes of deposits. Examines the relationship between the distribution of ores, oil, gas, coal, and Plate Tectonics. Explores environmental issues associated with the extraction of earth resources. Graduate degree credit will not be given for both GEOS 4083 and GEOS 5283. Prerequisite: GEOS 2313. (Typically offered: Spring)

GEOS 5293. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.
(Formerly GEOS 4593.) Fundamentals of navigation, mapping, and high-precision positioning using the Navstar Global Positioning System. Topics include datum definition and transformation, map projections, autonomous and differential positioning using both code and carrier processing, and analysis of errors. Graduate degree credit will not be given for both GEOS 4593 and GEOS 5293. (Typically offered: Fall)

This course is cross-listed with ANTH 5593.

GEOS 530V. Special Problems in Regional Geography. 1-6 Hour.
Special problems in regional geography. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

GEOS 5313. Planetary Atmospheres. 3 Hours.
Origins of planetary atmospheres, structures of atmospheres, climate evolution, dynamics of atmospheres, levels in the atmosphere, the upper atmosphere, escape of atmospheres, comparative planetology of atmospheres. (Typically offered: Irregular)

GEOS 5323. Stratigraphy and Sedimentation. 3 Hours.
(Formerly GEOS 4223.) Introductory investigation of stratigraphic and sedimentologic factors important to the study of sedimentary rocks. Lecture 2 hours, laboratory 3 hours per week. A required weekend, two-day field trip will be conducted during the semester. Graduate degree credit will not be given for both GEOS 4223 and GEOS 5323. Corequisite: Lab component. Prerequisite: GEOS 3413. (Typically offered: Fall)

GEOS 534V. Internship in Physical Geography. 3-6 Hour.
(Formerly GEOS 430V.) Supervised experience in municipal, county, state or private natural resource management agency, or any other such organization approved by instructor. Graduate degree credit will not be given for both GEOS 430V and GEOS 534V. (Typically offered: Fall, Spring and Summer)

GEOS 5353. Meteorology. 3 Hours.
(Formerly GEOS 4353.) Examination of the atmospheric processes that result in multifarious weather systems. Offered as physical science. Graduate degree credit will not be given for both GEOS 4353 and GEOS 5353. (Typically offered: Fall)

GEOS 5363. Climatology. 3 Hours.
(Formerly GEOS 4363.) Fundamentals of topical climatology followed by a study of regional climatology. Offered as physical science. Graduate degree credit will not be given for both GEOS 4363 and GEOS 5363. (Typically offered: Spring)

GEOS 537V. Geology Field Trip. 1-2 Hour.
(Formerly GEOS 437V.) Camping field trip to areas of geologic interest, usually conducted during Spring Break. Graduate degree credit will not be given for both GEOS 437V and GEOS 537V. Prerequisite: GEOS 3313. (Typically offered: Spring) May be repeated for up to 4 hours of degree credit.

GEOS 5383. Hazard & Disaster Assessment, Mitigation, Risk & Policy. 3 Hours.
(Formerly GEOS 4383.) Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the class. Graduate degree credit will not be given for both GEOS 4383 and GEOS 5383. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

GEOS 5393. Mathematical Modeling of Geological Processes. 3 Hours.
This course explores a variety of topics in applied mathematics and computational methods within the context of studying geological processes and from the perspective of a modeling practitioner. Programming is conducted in Python. Knowledge of Calculus II is necessary. (Typically offered: Irregular)

GEOS 5403. American Public Lands and Policy. 3 Hours.
The course examines the role of American federal public lands in 19th-21st century geography, history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America's national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Graduate standing. (Typically offered: Irregular)

GEOS 5423. Remote Sensing of Natural Resources. 3 Hours.
Introductory digital image processing of remotely sensed data. Topics include data collection, laboratory design, scientific visualization, radiometric and geometric correction, enhancement, pattern recognition, artificial intelligence, and change detection in natural resource remote sensing. GIS-based exercises and a course project are included. Prerequisite: GEOS 4413 or GEOS 5213. (Typically offered: Spring Even Years)

GEOS 5433. Geophysics. 3 Hours.
(Formerly GEOS 4433.) Derivation from physical principles, of the geophysical methods for mapping the Earth. Computational methods of converting gravity, magnetic, radiometric, electrical, and seismic data into geologic information. Lecture 3 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both GEOS 4433 and GEOS 5433. Corequisite: Lab component. Prerequisite: MATH 2564 and PHYS 2033 and PHYS 2031L and GEOS 3514. (Typically offered: Irregular)
GEOS 5443. The Solid Earth. 3 Hours.
Modern views for the origin of the solid Earth and its structure, composition, and evolution through geologic time. Topics will include examination of relevant geophysical and geochemical constraints used to develop global models for the Earth. Prerequisite: GEOS 3313, MATH 2564, CHEM 1123, PHYS 2074 or instructor consent. (Typically offered: Irregular)

GEOS 5453. Introduction to Raster GIS. 3 Hours.
(Formerly GEOS 4553.) Theory, data structure, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Graduate degree credit will not be given for both GEOS 4553 and GEOS 5453. (Typically offered: Fall)
This course is cross-listed with ANTH 5553.

GEOS 5463. Microtectonics. 3 Hours.
Focuses on the microstructural evolution of tectonite rocks and the constraints that can be gleaned from optical microscopic evaluation of rocks in petrographic thin-sections and hand samples. Results are evaluated in the context of plate tectonic theory and geodynamics. Knowledge of mineralogy and petrology equivalent to GEOS 2313 is required. Pre- or Corequisite: GEOS 5563. Corequisite: Lab component. (Typically offered: Fall)

GEOS 5473. Applied Climatology. 3 Hours.
Applied climatology involves the use of climatic data to solve a variety of social, economic and environmental problems, such as for clients in agriculture, water and energy management. The basic purpose of applied climatology is to help society, at all scales and levels, to achieve a better adjustment to the climatic environment. (Typically offered: Fall)

GEOS 5483. Severe Weather. 3 Hours.
(Formerly GEOS 4483.) Focuses on the formation and impact of weather phenomena such as blizzards, floods, tornadoes, thunderstorms, hurricanes and droughts. Covers the mechanisms and physics that control severe weather, advanced terminology, physical concepts and scientific methods used in meteorology, and the analysis and interpretation of meteorological data. Graduate degree credit will not be given for both GEOS 4483 and GEOS 5483. (Typically offered: Spring)

GEOS 550V. Internship in GIS & Cartography. 3-6 Hour.
(Formerly GEOS 440V.) Supervised experience in GIS and/or cartographic applications with municipal, county, state, or private enterprises. Graduate degree credit will not be given for both GEOS 440V and GEOS 550V. (Typically offered: Spring and Summer) May be repeated for up to 6 hours of degree credit.

GEOS 5513. Introduction to GIS Programming. 3 Hours.
This course introduces fundamentals of GIS software engineering and offers hands-on tutorials in customized applications using ArcGIS through programming ArcObjects in VBA/VA.net environment. Topics covered include ArcObjects, different programming syntax and styles, and fundamental routines and functions in ArcGIS. After completing the course, students will have the capability to develop customized ArcGIS applications. (Typically offered: Fall)

GEOS 5523. Cartographic Design & Production. 3 Hours.
(Formerly GEOS 4523.) This course addresses advanced cartographic concepts (i.e. visual hierarchy, aesthetics, image cognition) and production techniques as they relate to computer-assisted mapping. Students produce a variety of maps using Adobe Illustrator (CS 4-6) software to build a map portfolio. Field trips may be required. Graduate degree credit will not be given for both GEOS 4523 and GEOS 5523. (Typically offered: Spring)

GEOS 5533. Introduction to Petroleum Geophysics. 3 Hours.
(Formerly GEOS 4533.) Introduction to seismic wave propagation and petroleum seismology with particular emphasis on seismic events, elastic waves, and seismic survey design. Credit will not be given for both GEOS 4533 and GEOS 5533. Prerequisite: MATH 2564, PHYS 2033, and GEOL 3514 or consent of instructor. (Typically offered: Fall)

GEOS 5543. Geospatial Applications and Information Science. 3 Hours.
An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. (Typically offered: Fall and Spring)

GEOS 5553. Spatial Analysis Using ArcGIS. 3 Hours.
Applications of analysis of spatial data using ArcGIS tools in map design, on-line mapping, creating geodatabases, accessing geospatial data, geo-processing, digitizing, geocoding, spatial analysis including basic spatial statistics, analysis of spatial distributions and patterning and 3D application using ArcGIS 3D Analyst. Prerequisite: GEOS 3543 or GEOS 5543. (Typically offered: Fall and Spring)

GEOS 5563. Tectonics. 3 Hours.
Development of ramifications of the plate tectonics theory. Analysis of the evolution of mountain belts. Lecture 3 hours per week. Prerequisite: GEOS 3514. (Typically offered: Fall)

GEOS 5573. Advanced Cartographic Techniques & Production. 3 Hours.
Covers advanced production and techniques in cartography, including animation, geospatial visualization, pochade, and advanced visualization. Emphasizes client relationships in creating and producing cartographic materials. Prerequisite: GEOS 4523 or GEOS 5523. (Typically offered: Irregular)

GEOS 5583. Enterprise and Multiuser GIS. 3 Hours.
GIS practice that is typical of collaborative team-based geospatial organizations. Solve real-world problems through end-to-end GIS design and implementation using ArcGIS Enterprise, extensive federal, state, and local repositories, and high quality software documentation. Includes relevant training in geospatial provenance and metadata, and in enterprise and multiuser GIS administration. Introductory-level familiarity with GIS is recommended. (Typically offered: Spring)

GEOS 5593. Introduction to Geodatabases. 3 Hours.
Fundamental concepts and applications of geospatial databases. Schema development and spatial data models for geodata. Spatial and attribute query and optimization, properties and structures of relational and object-oriented geodatabases. Spatial extensions of SQL, spatial indexing, measurement, and geometry. Course will use PostGIS, ESRI File Geodatabases, and MS-SQL. Prerequisite: GEOS 3543 and GEOS 3103 or equivalent. (Typically offered: Fall and Spring)

GEOS 560V. Graduate Special Problems. 2-6 Hour.
Library, laboratory, or field research in different phases of geology. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.

GEOS 5612. Research Methods in Geosciences. 2 Hours.
Survey of research methodologies used in both geology and geography, with an emphasis on quantitative analysis. Preparation of research proposals and presentations in the field of geosciences. Prerequisite: Graduate standing. (Typically offered: Fall)

GEOS 5643. Introduction to Internet GIS. 3 Hours.
This course introduces Internet computing and Web GIS and offers hands-on tutorials in customized applications using ArcGIS Server JavaScript API. Topics covered include Internet protocols and Web standards, Web services, and fundamental routines and functions in Arc GIS server development. Students will have the capability to develop customized ArcGIS server applications. Prerequisite: GEOS 5513 or equivalent. (Typically offered: Spring)
GEOS 5653. GIS Analysis and Modeling. 3 Hours.
(Formerly GEOS 4653.) Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. Graduate degree credit will not be given for both GEOS 4653 and GEOS 5653. (Typically offered: Spring) This course is cross-listed with ANTH 5653, ENDY 5043.

GEOS 5663. Low-Temperature Geochemistry of Natural Waters. 3 Hours.
(Formerly GEOS 4663.) Covers the low-temperature geochemistry of waters and their associated minerals at Earth's surface. Examines the controls on the chemical composition of natural waters and the minerals precipitated from them. Topics covered will include water-rock interactions, pH, redox, the carbonate-water system, clay minerals and exchange, heavy metals, and a brief introduction to stable isotopes and geomicrobiology. Credit will not be given for both GEOS 4663 and GEOS 5663. Prerequisite: CHEM 1121L, CHEM 1123, GEOS 1113, and GEOS 1111L. (Typically offered: Fall)

GEOS 5673. Volcanology. 3 Hours.
A broad introduction to volcanic processes and their associated hazards. Emphasis will be placed on applying basic physical and chemical principles to understanding volcanic systems. Prerequisite: GEOS 2313. (Typically offered: Irregular)

GEOS 5693. Environmental Justice. 3 Hours.
(Formerly GEOS 4693.) This course deals with the ethical, environmental, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. Credit will not be given for both GEOS 4693 and GEOS 5693. (Typically offered: Spring)

GEOS 5713. Geology of Our National Parks. 3 Hours.
(Formerly GEOS 4563.) This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Credit will not be given for both GEOS 4563 and GEOS 5713. Prerequisite: GEOS 1113. (Typically offered: Fall)

GEOS 5743. Petroleum Geology. 3 Hours.
(Formerly GEOS 4253.) Distribution and origin of petroleum. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both GEOS 4253 and GEOS 5743. Corequisite: Lab component. Prerequisite: GEOS 4413 or GEOS 5213 (formerly GEOS 4413) or (GEOS 4593 or GEOS 5293 (formerly GEOS 4593)) or equivalent. (Typically offered: Fall)

GEOS 5793. Environmental Isotope Geochemistry. 3 Hours.
Introduction to principles of isotope fractionation and distribution in geologic environments, isotopic analytical methods, and extraction of isotope samples; application of isotopes in characterization of geologic processes and interaction with hydrologic, surficial, and biologic attenuation, paleothermometry soil, and biogeochemical processes. (Typically offered: Spring) May be repeated for up to 3 hours of degree credit.
This course is cross-listed with ENDY 5853.

GEOS 5853. Environmental Isotope Geochemistry. 3 Hours.
(Formerly GEOS 4413.) An introduction to the application of standard quantitative and spatial statistical techniques to geoscientific analysis. Students will use both micro and large system computers in the course. Graduate degree credit will not be given for both GEOS 4863 and GEOS 5853. (Typically offered: Spring) This course is cross-listed with ANTH 5853.

GEOS 5873. Geological Data Analysis. 3 Hours.
(Formerly GEOS 4863.) Quantitative methods and techniques for analysis and interpretation of geological data. Credit will not be given for both GEOS 4873 and GEOS 5873. Corequisite: Lab component. Prerequisite: MATH 2564 and GEOS 3514. (Typically offered: Spring)

GEOS 5924. Earth System History (ACTS Equivalency = PHSC 1104). 4 Hours.
(Formerly GEOS 4924.) Physical and biological events that form the history of the earth from its formation to the beginning of the historical era. Credit will not be given for both GEOS 4924 and GEOS 5924. Graduate enrollment only with departmental permission. Corequisite: Lab component. Prerequisite: GEOS 3514. (Typically offered: Spring)

GEOS 5933. Ancient Forest Science and Sustainability. 3 Hours.
Ancient forests preserve beautiful habitat with high ecological integrity. This course will examine the development, spatial distribution, and ongoing destruction of ancient forests worldwide, and how science can contribute to the understanding and sustainable management of these valuable resources. (Typically offered: Spring)

GEOS 5973. Seminar in Geoinformatics. 3 Hours.
Geographic information science and technology research topics of particular interest to the graduate student class. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

GEOS 5993. Dynamics of Sediment Transport. 3 Hours.
The course will give aspiring geologists and civil engineers tools for solving sedimentological problems in their fields. Starting from a grounding in fluid mechanics, we will learn how sediment is transported and stratigraphy accumulated. This will be applied to problems in sedimentology at all scales. (Typically offered: Fall Odd Years)

GEOS 600V. Master's Thesis. 1-6 Hour.
Master's thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

GEOS 700V. Doctoral Dissertation. 1-9 Hour.
Dissertation research. Prerequisite: Graduate standing and Ph.D. candidacy (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Degrees Conferred:
- M.AT. in Athletic Training (p. 74) (ATTR)
- M.Ed. in Physical Education (p. 275) (PHED)
- M.Ed. in Recreation and Sport Management (p. 302) (RESM)
- M.S. in Kinesiology (p. 223) (KINS)
- M.S., Ph.D. in Community Health Promotion (p. 110) (CHLP)
- Ph.D. in Health, Sport and Exercise Science (p. 192) (HSES)

Primary Areas of Faculty Research: Please see individual faculty bios for specific research interests.

Graduate Faculty

Bonacci, Jeff, D.A. (Middle Tennessee State University), M.S. (West Virginia University), B.S. (University of Akron), Clinical Associate Professor, 2000.

Calleja, Paul C., Ph.D., M.S. (University of Arkansas), B.S. (San Jose State University), Clinical Professor, 2003.

Davis, Robert, Ph.D., M.S., B.S. (University of Mississippi), Assistant Professor, 2018.

DiBrezzo, Rosalie, Ph.D. (Texas Woman's University), M.S. (Indiana University), B.S. (Brooklyn College), University Professor, 1983.

Dittmore, Stephen W., Ph.D. (University of Louisville), M.A., B.A. (Drake University), Professor, 2008.

Edmonston, Craig, M.S. (University of Kansas), B.S. (Kansas State University), Instructor, 2016.

Elbin, R. J., Ph.D. (Michigan State University), M.A., B.A. (University of New Orleans), Associate Professor, 2013.

Forbess, Janet B., M.Ed. (University of Florida), B.S.E. (Georgia Southern College), Instructional Assistant, 1978.

Gallagher, Kaitlin, Ph.D., B.Sc. (University of Waterloo, Canada), Assistant Professor, 2015.

Ganio, Matthew Stueck, Ph.D. (University of Connecticut), M.S., B.S. (University of Georgia), Associate Professor, 2011.

Gorman, Dean Richard, Ph.D. (University of Kansas), M.S., B.A. (Arizona State University), Professor, 1979.

Gray, Michelle, Ph.D. (University of Arkansas), M.S. (Ball State University), B.S. (University of Tennessee, Chattanooga), Associate Professor, 2010.

Greene, Nicholas P., Ph.D. (Texas A&M University), M.S., B.S. (University of South Carolina), Associate Professor, 2013.

Hammig, Bart, Ph.D. (University of Kansas), M.P.H. (University of Kansas Medical Center), B.S. (University of Kansas), Professor, 2008.

Henry, Leah Jean, Ph.D. (Texas Woman's University), M.A. (Michigan State University), B.S. (Texas A&M University), Associate Professor, 2008.

Howie, Erin, Ph.D. (University of South Carolina), B.S. (University of Maryland), Assistant Professor, 2016.

Jones, Chese, Ph.D. (University of Alberta at Birmingham), B.S.E. (Pittsburg State University), Professor, 1994.

Jozkowski, Kristen N., Ph.D., M.S. (Indiana University at Bloomington), B.S. (University of Pennsylvania State University), Associate Professor, 2011.

Kern, Jack C., Ph.D. (Texas Woman's University), M.Ed. (Texas State University-San Marcos), B.S. (University of Wisconsin-LaCrosse), Clinical Professor, 1996.

Langsner, Steve, Ph.D. (Indiana University at Bloomington), M.S. (University of Baltimore), B.S. (Springfield College), Associate Professor, 1989.

Lens, Joshua, J.D. (University of Iowa), B.A. (University of Northern Iowa), Clinical Assistant Professor, 2018.

Lirgg, Cathy D., Ph.D. (Michigan State University), M.S. (Indiana State University), B.A. (Muskingum College), Professor, 1991.

McDermott, Brendon P., Ph.D. (University of Connecticut), M.S. (Indiana University at Bloomington), B.S. (Northeastern University), Associate Professor, 2012.

Moiseichik, Merry Lynn, J.D. (University of Arkansas), R.Ed. (Indiana University at Bloomington), M.S., B.S.E. (State University of New York at Cortland), Professor, 1989.

Smith-Nix, Angela, Ph.D. (University of Arkansas), M.Ed., B.S.E. (Arkansas State University), Clinical Assistant Professor, 1989.

Stokowski, Sarah, Ph.D. (University of Tennessee), M.Ed. (University of Oklahoma), B.S.E. (University of Kansas), Assistant Professor, 2014.

Sullivan, Amanda Lynn, Ph.D., M.A.T., B.S.E. (University of Arkansas), Clinical Associate Professor, 2010.

Vandemark, Lesley, Ph.D., M.S. (University of Connecticut), B.S. (California University of Pennsylvania), Clinical Assistant Professor, 2016.

Washington, Tyrone A., Ph.D., B.S. (University of South Carolina at Columbia), Associate Professor, 2011.

Exercise Science Courses

EXSC 5023. Advanced Teaching in Exercise Science. 3 Hours.
Examination and practical exposure to the principles and practices of undergraduate teaching in exercise science. Includes course planning, teaching techniques, assessment strategies, and supervised practice. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EXSC 5323. Biomechanics I. 3 Hours.
Intended to serve as an introduction to biomechanics and focuses on scientific principles involved in understanding and analyzing human motion. (Typically offered: Fall)

EXSC 5333. Instrumentation in Biomechanics. 3 Hours.
The application of knowledge and skills necessary for data collection for sports analysis. Provides valuable information on instrumentation used specifically in biomechanics. Prerequisite: EXSC 5323. (Typically offered: Irregular)

EXSC 5353. Exercise Psychology. 3 Hours.
Exercise Psychology is a lecture and discussion format for students interested in learning about theoretical and research information related to exercise adherence. (Typically offered: Fall)
EXSC 5443. Seminar in Brain Injury and Behavior. 3 Hours.
The Brain Injury and Behavior Seminar will immerse you in specific topics pertaining to the study of human brain-behavior relationships. Emphasis will be placed on traumatic brain injury (TBI), including moderate-to-severe injuries, as well as mild TBI or concussion. The first half of the course will focus on research related to how individuals sustain and recover from TBI. The second half of the course will focus on sports-related concussion in youth, collegiate, and professional athletes, with an emphasis on how athletes sustain concussions, how concussions are assessed, treated, and managed, and how return-to-play decision are made. This course will introduce you to research in a variety of fields that include physiology, neurology, and neuropsychology through primary source material in the form of book chapters and journal articles. (Typically offered: Irregular)

EXSC 5513. Physiology Exercise I. 3 Hours.
A study of the foundation literature in exercise physiology. Emphasis is placed on the muscular, cardiovascular, and respiratory systems. (Typically offered: Fall)

EXSC 5523. Muscle Metabolism in Exercise. 3 Hours.
A study of the metabolic changes that occur in muscle as a result of exercise, exercise training, and other stressors. Prerequisite: EXSC 5513 or equivalent. (Typically offered: Spring)

EXSC 5533. Cardiac Rehabilitation Program. 3 Hours.
An examination of the concepts, design, and implementation of cardiac rehabilitation programs. Emphasis on exercise programs but reference to nutrition, psychology, and other lifestyle interventions. (Typically offered: Spring Even Years)

EXSC 5543. Cardiovascular Function in Exercise. 3 Hours.
Study of the effects of exercise training and other stressors on the cardiovascular system. Detailed study of the components of the cardiovascular system and the responses and adaptations of those components to selected stimuli. Corequisite: EXSC 5513 or equivalent. (Typically offered: Fall Even Years)

EXSC 5593. Practicum in Laboratory Instrumentation. 3 Hours.
Practical experience in testing physical fitness utilizing laboratory equipment. Objective is to quantify physiological parameters, leading to the individualized exercise prescription. (Typically offered: Fall and Summer)

EXSC 5613. Physical Dimensions of Aging. 3 Hours.
This course will focus on the physiological changes with healthy aging, pathophysiology of age-related diseases, testing issues, exercise interventions, and the psychosocial aspects of aging. Prerequisite: EXSC 5513. (Typically offered: Spring Odd Years)

EXSC 5643. Advanced Psychology of Sports Injury and Rehabilitation. 3 Hours.
The purpose of this course is to explore and discuss factors related to the psychological aspects of athletic injuries. These factors include the sociocultural, mental, emotional, and physical dimensions of injury rehabilitation. Prerequisite: Students must be accepted into the Masters of Athletic Training graduate program. (Typically offered: Spring)

EXSC 5773. Performance and Drugs. 3 Hours.
The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. (Typically offered: Spring)

EXSC 6313. Muscle Physiology. 3 Hours.
To expand the student's knowledge of the skeletal muscle form and function. Specifically, how muscle is formed to how it can adapt as a post-mitotic tissue. This course will focus on the morphological, physiological, cellular, and molecular factors that affect skeletal muscle form and function. (Typically offered: Fall Even Years)

EXSC 6323. Biomechanics II. 3 Hours.
Analysis of human movement with emphasis on sports skills by application of principles of anatomy, kinesiology, and cinematographical analysis. Prerequisite: EXSC 5323. (Typically offered: Irregular)

EXSC 6343. Physiology of Exercise II. 3 Hours.
Detailed study of the body systems affected by exercise, the functions of these systems during exercise, the effects of age, sex, body type, and nutrition on capacity for exercise, the techniques of assessing work capacity, and a critical analysis of research literature in this area. (Typically offered: Irregular)

EXSC 6443. Thermoregulation and Fluid Balance. 3 Hours.
Comprehensive overview of human thermoregulatory responses to exercise in heat and cold. (Typically offered: Spring Even Years)

Health, Human Performance and Recreation Courses

HHPR 5333. Research in Health, Human Performance and Recreation. 3 Hours.
Methods and techniques of research in health, human performance and recreation including an analysis of examples of their use and practice in their application to problems of interest to the student. (Typically offered: Fall, Spring and Summer)

HHPR 560V. Workshop. 1-6 Hour.
Workshop. (Typically offered: Irregular)

HHPR 6233. Management in HHPR. 3 Hours.
Deals with principles, procedures, relationships, problems, and current practices in the supervision of health education and kinesiology. Includes management of facilities, programs, personnel, and processes. (Typically offered: Irregular)

HHPR 6333. Measurement in HHPR. 3 Hours.
Competencies for analysis and application of evaluation and measurement in HHPR. (Typically offered: Fall Odd Years)

HHPR 689V. Directed Research. 1-6 Hour.
Laboratory investigations, in basic and applied research. (Typically offered: Fall, Spring and Summer)

HHPR 699V. Seminar. 1-3 Hour.
Seminar. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

HHPR 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Physical Education Courses

PHED 5243. Sport Skill Assessment and Instructional Strategies. 3 Hours.
The focus of this course is practical assessment techniques and instructional strategies in the area of sport and physical education activities. (Typically offered: Summer Odd Years)

PHED 5253. The Physical Education Curriculum. 3 Hours.
Principles, problems, procedures, and the influence of educational philosophy on programs in physical education and their application in the construction of a course of study for a specific situation. (Typically offered: Fall Even Years)

PHED 5273. Professional Issues in Physical Education and Sport. 3 Hours.
A review of contemporary research literature informing effective teaching practices in physical education settings. Students gain experience in critically reviewing literature and discussing current issues. (Typically offered: Fall Even Years)

PHED 5313. Risk Management in Physical Education & Athletics. 3 Hours.
This course is designed to provide opportunities for the student to acquire an understanding of how to reduce the risk of injuries and eliminate hazards that may contribute to injuries associated with physical education and athletics. (Typically offered: Summer Even Years)
PHED 5553. Scientific Principles of Movement and Performance. 3 Hours.
This course focuses on theoretical information about sport biomechanics and movement principles, with practical applications to the physical education of coaching profession. (Typically offered: Summer Odd Years)

PHED 5683. Motor Learning. 3 Hours.
Concepts of motor learning and control are presented. Attention is given to an analysis of the literature in movement control, motor behavior, and motor learning. (Typically offered: Fall and Spring)

PHED 5893. Intramural Sports Program. 3 Hours.
Investigation of historical and contemporary research in sport psychology. (Typically offered: Fall and Summer)

PHED 5803. Measurement Concepts for K-12 Physical Education Teachers. 3 Hours.
This course focuses on techniques that physical education teachers can use to monitor student progress in a K-12 environment. (Typically offered: Summer)

PHED 6363. Supervision in Physical Education. 3 Hours.
The focus of this course is instructional supervision as a set of complex processes in which the supervisor works within accepted guidelines and functions to effectively supervise a teacher's pedagogical development. The Physical Education Instructional Supervision (PEIS) Model will be used to help facilitate this process. (Typically offered: Fall Odd Years)

PHED 6723. Project Implementation and Data Analysis. 3 Hours.
This course is designed to expose students to the rigors of research and will be the culminating experience of their degree program. The students will spend the majority of time developing a research topic. The research topic will be expanded into a complete research study in which the student will seek approval from the University of Arkansas IRB committee to conduct the study and then collect data. The data will be analyzed and presented at the conclusion of the class. (Typically offered: Spring and Summer)

Recreation and Sport Management Courses

RESM 5023. Outdoor Adventure Leadership. 3 Hours.
(Formerly RESM 4023.) This course considers the values and scope of outdoor recreation programs, leadership and skill development with practical experience in a wilderness environment. The course will include a canoe trip through the wilderness, and skill training in such areas as orienteering and rock climbing; and leadership development in interpersonal and processing skills. The graduate portion of the class is geared toward leading and trip planning for taking college age and older students into remote areas. Graduate degree credit will not be given for both RESM 4023 and RESM 5023. (Typically offered: Summer)

RESM 5273. The Intramural Sports Program. 3 Hours.
(Formerly RESM 4273.) Historical development, aim and objectives, organization, administration, units of competition, program of activities, schedule making, scoring plans, rules and regulations, awards, and special administrative problems. Graduate degree credit will not be given for both RESM 4273 and RESM 5273. (Typically offered: Fall Odd Years)

RESM 5283. History and Application of American Sport. 3 Hours.
This survey course will explore the historical development of sport in American culture and the processes of change in American culture and sport from the 15th century to the present. Students will learn how to apply historical concepts to current issues in recreation and sport management. (Typically offered: Irregular)

RESM 5293. Athletics and Higher Education. 3 Hours.
This course features an examination of the historical development of athletics within American institutions of higher learning with an emphasis upon concepts and ideals that underlie the developments and the major problems affecting contemporary intercollegiate athletics. The purpose of this course is to teach the learner about the development of intercollegiate athletics from the mid-19th century to today. A second purpose of this course is to examine the major issues facing sport administrators within intercollegiate athletics today. (Typically offered: Spring and Summer)

RESM 5333. Sport Media and Public Relations. 3 Hours.
The course will explore the relationship between media organizations and sport organizations, with an emphasis on the business of media rights, as well as public relations theories such as two-way symmetrical communication and agenda setting. Finally, the course will examine practical communication tactics employed by public relations practitioners such as image repair and crisis communications, and the issues presented by forms of new media. (Typically offered: Fall)

RESM 5463. Sports Facilities Management. 3 Hours.
Considers basic elements and procedures in the planning, design, construction, operation, and maintenance of sport facilities; management considerations in conducting various types of events. (Typically offered: Summer)

RESM 560V. Workshop. 1-3 Hour.
Workshop. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

RESM 574V. Internship. 1-3 Hour.
This experiential-based course requires 135 hours per semester of work in a recreation or sport setting. (Typically offered: Fall and Spring)

RESM 5813. Social Issues in Sport. 3 Hours.
Using sociological theories and scholarship to examine social and cultural influences on sport and physical activity. Course is based on a social justice framework and a cultural studies perspective. (Typically offered: Fall and Summer)

RESM 5833. Recreation and Sport for Special Populations. 3 Hours.
Skills, knowledge, and concepts within recreation and sport which are appropriate to planning and implementing recreation and sport programs and services for the handicapped. (Typically offered: Irregular)

RESM 5843. Tourism. 3 Hours.
Explores major concepts of tourism to discover what makes tourism work, how tourism is organized, and its social and economic effects. (Typically offered: Spring)

RESM 5853. Capstone in Recreation and Sport Management. 3 Hours.
Capstone course where students utilize program courses to solve administrative issues which may arise in an organization. Attention is given to how departmental organization, administrative practices and policies, strategic planning, personnel management, finances, and legal areas are integrated to create solutions to broad-based contemporary issues. (Typically offered: Spring)

RESM 5873. Leadership in Recreation and Sport Management Services. 3 Hours.
Considers research, theory, and practical applications of leadership principles utilized in the provision of recreation and sport management services. Focus is on motivation, attitude, communication, group dynamics, and problem solving. (Typically offered: Fall and Summer)

RESM 5883. Recreation and Sport Services Promotion. 3 Hours.
Examines specific strategies for promoting recreation and sport programs in the local community. (Typically offered: Summer)
RESM 5893. Public and Private Finance in Recreation and Sport Management. 3 Hours. 
Develops an understanding of both public and private finance management for students in public and private management positions. Provides an understanding of the budgeting processes and techniques used in obtaining and controlling funds, including private sector finance problems in areas of credit, pricing, indexing, and debt management. (Typically offered: Fall)

RESM 600V. Master's Thesis. 1-18 Hour. 
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

RESM 605V. Independent Study. 1-3 Hour. 
Independent study. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

RESM 612V. Directed Reading in Recreation and Sport. 1-3 Hour. 
Critical analysis of literature in the area of recreation and sport. (Typically offered: Fall, Spring and Summer)

RESM 6133. Issues in RESM. 3 Hours. 
A review of the significant social, demographic, behavioral, developmental, and technological issues that influence health, kinesiology, and recreation and sport management programs. Pre- or Corequisite: Doctoral level students only. (Typically offered: Irregular)

RESM 6533. Legal and Political Aspects. 3 Hours. 
An overview of major legislation affecting recreation and sport management professionals; how to operate within these laws; and methods for influencing new legislation. Also discusses political aspects of professions both outside and inside government agencies. (Typically offered: Spring)

RESM 674V. Internship. 1-3 Hour. 
Students will learn diverse teaching techniques and implement them in an ongoing undergraduate recreation and sport management class serving as the teaching laboratory. The “what” “when” and “how” relative to integrating various teaching techniques with specific content areas in the class will be explored by both the student and the instructor. (Typically offered: Fall, Spring and Summer)

Degree Offered: 
Ph.D. in Health, Sport and Exercise Science (HSES)

The Ph.D. program in the Department of Health, Human Performance and Recreation is a research-focused degree that is designed to prepare scholars in advanced study to contribute to the field through teaching, research, and service.

The department is comprised of four divisions and offers the Ph.D. degree with a concentration in each corresponding program area:

1. Exercise Science
2. Health Behavior and Health Promotion
3. Kinesiology Pedagogy
4. Recreation and Sport Management

Ph.D. in Health, Sport and Exercise with Exercise Science Concentration

Admission to Ph.D. Degree Program:

The applicant must have 1) completed a master’s degree or its equivalent in a field related to their specialization area to which they are applying, 2) meet general admission requirements of the Graduate School, 3) a GPA of at least 3.00 on all graduate course work; and 4) an acceptable score on the Graduate Record Examinations (GRE). Admission will be based on the willingness and ability of a graduate faculty member to accept a new student. Additional prerequisites may be prescribed after review of application materials.

Applications must include the following:
1. Curriculum vitae.
2. Statement of purpose and research interest, including specification of the area of concentration to which you are applying.
3. Academic transcripts
4. Three letters of recommendation

Requirements for the Doctor of Philosophy Degree:

A minimum of 60 graduate semester hours, including 18 hours of dissertation, is required after admission into the Ph.D. program. In the event required courses for the Ph.D. program have been taken during a student’s master’s degree program, they will need to substitute another graduate course in lieu of the required course. A doctoral advisory committee will be established by the student in consultation with the Coordinator of Graduate Study during the first semester of enrollment subsequent to acceptance into the degree program. The student, in conjunction with the advisory committee, will define the program of study. The degree program requires successful completion of qualifying examinations, dissertation, and an oral defense of the dissertation. These last requirements are described elsewhere in this catalog.

HHPR 5353 Research in Health, Human Performance and Recreation 3
ESRM 5393 Statistics in Education and Health Professions 3
HHPR 700V Doctoral Dissertation 18

Research and Statistical Requirements
A minimum of 18 hours approved by doctoral advisory committee. 18

Total Hours 42

Requirements also include the area of concentration presented below.

Requirements for Exercise Science Concentration:

Exercise Science Core
EXSC 5523 Biomechanics I 3
EXSC 5513 Physiology Exercise I 3
EXSC 5593 Practicum in Laboratory Instrumentation 3
Cognate
The student, in consultation with the doctoral advisory committee, will identify hours of further course work comprising a field of study in an area of interest. Course work may be selected from several related disciplines or a single discipline.

**Electives**

Students must complete 36 hours of graduate electives as approved by the doctoral advisory committee.

| Total Hours | 54 |

**Ph.D. in Health, Sport and Exercise Science with Health Behavior and Health Promotion Concentration**

**Admission to Ph.D. Degree Program:**

The applicant must have 1) completed a master’s degree or its equivalent in a field related to their specialization area to which they are applying, 2) meet general admission requirements of the Graduate School, 3) a GPA of at least 3.00 on all graduate course work; and 4) an acceptable score on the Graduate Record Examinations (GRE). Admission will be based on the willingness and ability of a graduate faculty member to accept a new student. Additional prerequisites may be prescribed after review of application materials.

Applications must include the following:

1. Curriculum vitae.
2. Statement of purpose and research interest, including specification of the area of concentration to which you are applying.
3. Academic transcripts
4. Three letters of recommendation

**Requirements for the Doctor of Philosophy Degree:**

A minimum of 60 graduate semester hours, including 18 hours of dissertation, is required after admission into the Ph.D. program. In the event required courses for the Ph.D. program have been taken during a student’s master’s degree program, they will need to substitute another graduate course in lieu of the required course. A doctoral advisory committee will be established by the student in consultation with the Coordinator of Graduate Study during the first semester of enrollment subsequent to acceptance into the degree program. The student, in conjunction with the advisory committee, will define the program of study. The degree program requires successful completion of qualifying examinations, dissertation, and an oral defense of the dissertation. These last requirements are described elsewhere in this catalog.

Courses
EXSC 5023. Advanced Teaching in Exercise Science. 3 Hours.
Examination and practical exposure to the principles and practices of undergraduate teaching in exercise science. Includes course planning, teaching techniques, assessment strategies, and supervised practice. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EXSC 5322. Biomechanics I. 3 Hours.
Intended to serve as an introduction to biomechanics and focuses on scientific principles involved in understanding and analyzing human motion. (Typically offered: Fall)

EXSC 5333. Instrumentation in Biomechanics. 3 Hours.
The application of knowledge and skills necessary for data collection for sports analysis. Provides valuable information on instrumentation used specifically in biomechanics. Prerequisite: EXSC 5323. (Typically offered: Irregular)

EXSC 5353. Exercise Psychology. 3 Hours.
Exercise Psychology is a lecture and discussion format for students interested in learning about theoretical and research information related to exercise adherence. (Typically offered: Fall)
EXSC 5443. Seminar in Brain Injury and Behavior. 3 Hours.
The Brain Injury and Behavior Seminar will immerse you in specific topics pertaining to the study of human brain-behavior relationships. Emphasis will be placed on traumatic brain injury (TBI), including moderate-to-severe injuries, as well as mild TBI or concussion. The first half of the course will focus on research related to how individuals sustain and recover from TBI. The second half of the course will focus on sports-related concussion in youth, collegiate, and professional athletes, with an emphasis on how athletes sustain concussions, how concussions are assessed, treated, and managed, and how return-to-play decisions are made. This course will introduce you to research in a variety of fields that include physiology, neurology, and neuropsychology through primary source material in the form of book chapters and journal articles. (Typically offered: Irregular)

EXSC 5513. Physiology Exercise I. 3 Hours.
A study of the foundation literature in exercise physiology. Emphasis is placed on the muscular, cardiovascular, and respiratory systems. (Typically offered: Fall)

EXSC 5523. Muscle Metabolism in Exercise. 3 Hours.
A study of the metabolic changes that occur in muscle as a result of exercise, exercise training, and other stressors. Prerequisite: EXSC 5513 or equivalent. (Typically offered: Spring)

EXSC 5533. Cardiac Rehabilitation Program. 3 Hours.
An examination of the concepts, design, and implementation of cardiac rehabilitation programs. Emphasis on exercise programs but reference to nutrition, psychology, and other lifestyle interventions. (Typically offered: Spring Even Years)

EXSC 5543. Cardiovascular Function in Exercise. 3 Hours.
Study of the effects of exercise training and other stressors on the cardiovascular system. Detailed study of the components of the cardiovascular system and the responses and adaptations of those components to selected stimuli. Corequisite: EXSC 5513 or equivalent. (Typically offered: Fall Even Years)

EXSC 5593. Practicum in Laboratory Instrumentation. 3 Hours.
Practical experience in testing physical fitness utilizing laboratory equipment. Objective is to quantitate physiological parameters, leading to the individualized exercise prescription. (Typically offered: Fall and Summer)

EXSC 5613. Physical Dimensions of Aging. 3 Hours.
This course will focus on the physiological changes with healthy aging, pathophysiology of age-related diseases, testing issues, exercise interventions, and the psychosocial aspects of aging. Prerequisite: EXSC 5513. (Typically offered: Spring Odd Years)

EXSC 5643. Advanced Psychology of Sports Injury and Rehabilitation. 3 Hours.
The purpose of this course is to explore and discuss factors related to the psychological aspects of athletic injuries. These factors include the sociocultural, mental, emotional, and physical dimensions of injury rehabilitation. Prerequisite: Students must be accepted into the Masters of Athletic Training graduate program. (Typically offered: Spring)

EXSC 5773. Performance and Drugs. 3 Hours.
The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. (Typically offered: Spring)

EXSC 6313. Muscle Physiology. 3 Hours.
To expand the student’s knowledge of the skeletal muscle form and function. Specifically, how muscle is formed to how it can adapt as a post-mitotic tissue. This course will focus on the morphological, physiological, cellular, and molecular factors that affect skeletal muscle form and function. (Typically offered: Fall Even Years)

EXSC 6323. Biomechanics II. 3 Hours.
Analysis of human movement with emphasis on sports skills by application of principles of anatomy, kinesiology, and cinematographical analysis. Prerequisite: EXSC 5323. (Typically offered: Irregular)

EXSC 6343. Physiology of Exercise II. 3 Hours.
Detailed study of the body systems affected by exercise, the functions of these systems during exercise, the effects of age, sex, body type, and nutrition on capacity for exercise, and the techniques of assessing work capacity, and a critical analysis of research literature in this area. (Typically offered: Irregular)

EXSC 6443. Thermoregulation and Fluid Balance. 3 Hours.
Comprehensive overview of human thermoregulatory responses to exercise in heat and cold. (Typically offered: Spring Even Years)

Higher Education (HIED)

Michael Hevel
Department Head and Ed.D. Program Coordinator
100 Graduate Education Building
479-575-4924
Email: hevel@uark.edu

Leslie Jo Shelton
M.Ed. Program Coordinator
116A Graduate Education Building
479-575-4873
Email: ljshelto@uark.edu

Degrees offered:
M.Ed., Ed.D. in Higher Education (HIED)

Program Description: The Higher Education program prepares students for professional competence, leadership, and service in two areas: administration (including student affairs work) and college teaching. Within these areas of specialization, practicing professionals as well as persons entering the higher education field, may pursue programs emphasizing community colleges, four-year colleges and universities, or state, regional, or national agencies.

M.Ed. in Higher Education

Admission Prerequisites for Master of Education Program: Formal admission to the Master’s of Education (M.Ed.) degree in Higher Education requires prior admission to the University of Arkansas Graduate School, which requires a separate application process. Admission to the University of Arkansas Graduate School requires a minimum 3.0 cumulative GPA or a 3.0 GPA on the last 60 hours of course work attempted. Applicants who do not meet the GPA guideline may qualify for admission by special consideration after consulting with the program coordinator prior to applying for the program.

In addition, admission to the program requires (1) a completed Higher Education Master’s program application form; (2) a statement of interest; (3) a current resume; (4) three supporting letters of recommendation; and (5) a writing sample demonstrating the applicant’s best writing.

Requirements for the Master of Education Degree: (Minimum 33 hours.) The master’s degree program in higher education provides academic preparation for persons who plan to seek entry level positions at the director or assistant director level in both two-year and four-year institutions for which a master’s degree is appropriate preparation,
including community colleges and technical colleges, liberal arts colleges, and four-year colleges and universities. Depending upon prior experience, graduates may expect to find employment in a wide variety of positions in residence life, financial aid, career planning and placement, student activities, student union management, alumni affairs, development, public information, continuing education, financial management, human resources, and institutional research, or as adviser to fraternities and sororities, or minority students.

In combination with course work outside of Higher Education, students may prepare for positions in development and in other beginning level positions in post-secondary institutions and educational agencies.

**M.Ed. Program Requirements**

1. Completion of a minimum total of 33 graduate semester-hour credits.
2. Completion of the following required seven courses in Higher Education:
   - **HIED 5003** Overview-American Higher Education 3
   - **HIED 5033** Student Affairs in Higher Education 3
   - **HIED 5043** Student Development in Higher Education 3
   - **HIED 5083** History and Philosophy of Higher Education 3
   - **HIED 5073** Management of Higher Education Institutions 3
   - **HIED 5643** Reflective Practice in Higher Education and Student Affairs 3
   - **HIED 6653** Legal Aspects of Higher Education 3
3. Three 3-hour adviser-approved Higher Education elective courses (9 credit hours total).
4. Electives in Higher Education may be selected from the following:
   - **HIED 504V** Practicum in Higher Education 1-6
   - **HIED 5053** The Community College 3
   - **HIED 5063** Diversity in Higher Education 3
   - **HIED 5103** Higher Education in International Contexts 3
   - **HIED 574V** Internship 1-3
   - **HIED 605V** Independent Study 1-6
   - **HIED 6183** Organization Development and Change in Higher Education 3
   - **HIED 6533** Assessment of Institutional Effectiveness in Higher Education 3
   - **HIED 6663** Finance and Fiscal Management 3
   - **HIED 6683** Governance and Policy Making in Higher Education 3
   - **HIED 699V** Seminar 1-6
5. A minimum of 3 hours in research methods or statistics selected from the following: **HIED 5093** Research in Higher Education and Student Affairs, **ESRM 5013** Research Methods in Education, **ESRM 5393** Statistics in Education and Health Professions or other equivalent course.
6. A cumulative grade point average of at least 3.00 on all course work for the degree. No grades below “C” will be accepted for graduate degree credit.
7. Satisfactory performance on a written comprehensive examination.
8. Students enrolled in the Higher Education Program should hold a graduate assistantship or be employed full-time in higher education or a related field (exceptions must be approved by faculty).

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

**Ed.D. in Higher Education**

**Admission Prerequisites for the Doctor of Education Degree:** Formal admission to the Doctor of Education (Ed.D.) degree in Higher Education requires:

1. Prior admission to the University of Arkansas Graduate School, which requires a separate application process;
2. A master’s degree or approved equivalent (minimally, 30 hours of post-baccalaureate graduate work completed);
3. A cumulative grade-point average on all graduate work attempted of at least 3.25;
4. A satisfactory Millers Analogy Test (MAT) score or Graduate Record Examination (GRE) scores (test scores usually at the 50th percentile);
5. Relevant professional experience in the field of higher education or a closely related field;
6. A completed Higher Education Program Application for Admission Form;
7. A current résumé or vitae;
8. A statement of interest;
9. At least three references (using our forms);
10. A writing sample demonstrating the applicant’s best writing;
11. A personal interview with a Higher Education faculty committee, which by majority vote decides admission. Completed application deadlines are October 15 for Spring admission and March 15 for Fall admission.

**Ed.D. Program Requirements**

**Higher Education Foundation Core (15 hours)**

- **HIED 5083** History and Philosophy of Higher Education 3
- **HIED 6423** Trends, Issues and Problems in Higher Education 3
- **HIED 6443** College Students in the United States 3
- **HIED 6653** Legal Aspects of Higher Education 3
- **HIED 6683** Governance and Policy Making in Higher Education 3

**HIED Courses**

Higher Education courses such as the following. Up to 6 credit hours of master’s-level HIED courses or self directed HIED courses such as Practicum or Independent Study may be approved by the advisory committee.

- **HIED 6013** The Professoriate: Problems and Issues
- **HIED 6023** Introduction to the Study of Higher Education
- **HIED 6083** Management Skills for Effective Leadership
- **HIED 6093** Leading Change
- **HIED 6183** Organization Development and Change in Higher Education
- **HIED 6303** Advancement in Higher Education
- **HIED 6323** Design and Evaluation of College Teaching
- **HIED 6353** The College and University Presidency
- **HIED 6483** Strategic Enrollment Management
Courses

HIED 5003. Overview-American Higher Education. 3 Hours.
A basic course in the study of higher education open to all students seeking careers in colleges and universities. Serves as an introduction to the programs, problems, issues, and trends in higher education. (Typically offered: Fall)

HIED 5033. Student Affairs in Higher Education. 3 Hours.
Study of origins, functions, and policies in student personnel services in contemporary 2- and 4-year colleges and universities with emphasis on the student and student development. (Typically offered: Fall)

HIED 5043. Student Development in Higher Education. 3 Hours.
Provides those who work or plan to work in post secondary educational institutions with an understanding of the student population in contemporary colleges and universities. (Typically offered: Spring)

HIED 504V. Practicum in Higher Education. 1-6 Hour.
Students are assigned to a department or agency within or outside the university for professional experience under the joint supervision of on-site personnel and university faculty. Periodic meetings are scheduled for evaluation, discussion, and examination of techniques. (Typically offered: Fall, Spring and Summer)

HIED 5053. The Community College. 3 Hours.
An overview of the community college. Topics include the history and philosophy of the community college movement, students, curriculum, state and local campus governance, teaching, student personnel work, finance and issues, problems, and trends. (Typically offered: Irregular)

HIED 5063. Diversity in Higher Education. 3 Hours.
Broadly explores how sociocultural contexts influence diversity at colleges and universities. Focuses on the responsibilities of higher education leaders to be multiculturally competent professionals who foster inclusive practices for diverse student populations. (Typically offered: Irregular)

HIED 5073. Management of Higher Education Institutions. 3 Hours.
Principles and concepts of management and their application in college and university settings. (Typically offered: Fall and Summer)

HIED 5083. History and Philosophy of Higher Education. 3 Hours.
An examination of the history and development of higher education including the study of the philosophy, objectives, and functions of various types of institutions. (Typically offered: Spring)

HIED 5093. Research in Higher Education and Student Affairs. 3 Hours.
This course provides master's students an overview of research and literature applicable to the discipline; teaches students how to understand academic literature and use empirical evidence to inform practices and policies at colleges and universities. Prerequisite: MED students in the Higher Education Program. (Typically offered: Fall, Spring and Summer)

HIED 5103. Higher Education in International Contexts. 3 Hours.
Explores various systems of higher education around the world. Equips students with the knowledge and skills to work in the increasingly internationalized field of higher education. (Typically offered: Irregular)

Graduate Faculty

Camargo, Elsa, Ph.D. (Virginia Polytechnic Institute and State University), M.A., B.A. (University of Illinois at Chicago), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2018.

Hevel, Michael Stephen, Ph.D. (University of Iowa), M.A. (Bowling Green State University), B.A. (University of Kansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.

Mamiseishvili, Ketevan, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Akaki Tsereteli State University), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2008.

McCray, Suzanne, Ph.D. (University of Tennessee), M.A., B.A. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2010.

Miller, Michael T., Ed.D. (University of Nebraska), M.S., B.A. (Southern Illinois University), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2003.

Shelton, Leslie Jo, Ph.D. (Michigan State University), M.Ed., B.A. (Ohio University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.

HIED 6533 Assessment of Institutional Effectiveness in Higher Education

HIED 6663 Finance and Fiscal Management

HIED 699V Seminar

Research and Statistics

HIED 5093 Research in Higher Education and Student Affairs (or an equivalent course or waived by the student's advisory committee) 3

ESRM 6403 Educational Statistics and Data Processing (or an equivalent course approved by the student's advisory committee) 3

HIED 6693 Research Techniques in Higher Education Advanced research methods course (quantitative or qualitative) as approved by the student's advisory committee 3

Graduate Electives

Electives as needed to fulfill total graduate semester hours required. May include graduate hours completed as part of another graduate degree program as approved by the student's advisory committee.

Dissertation

HIED 700V Doctoral Dissertation 18

Completion of the following doctoral program requirements:

- Minimum of 96 total graduate semester credit hours that includes a minimum of 78 credit hours of post-baccalaureate graduate coursework and at least 18 credit hours of dissertation.
- For students with master's in higher education, a minimum of 42 graduate semester credit hours completed beyond master's at the University of Arkansas, including a minimum of 24 hours of post-master's higher education coursework and at least 18 semester credit hours of dissertation.
- Minimum grade point average of at least 3.25 on all course work presented as part of the degree program. No graduate degree credit will be granted for any course grades below "C."
- Satisfactory completion of all requirements governing the written and oral examinations for the candidacy examination, the dissertation, and the final oral dissertation defense.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).
HIED 5303. Non-Profit Fundraising. 3 Hours.
Non-Profit Fundraising examines the theory and practice of the professional field of fundraising and development, which is dedicated to attracting philanthropic support from constituents for colleges, universities, health organizations, hospitals, non-profit organizations, museums and other philanthropic endeavors. (Typically offered: Irregular)

HIED 5643. Reflective Practice in Higher Education and Student Affairs. 3 Hours.
Provides students an opportunity to work in a functional area of higher education, reflect on how their experiences inform their career goals as higher education professionals, and learn job search strategies in higher education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HIED 574V. Internship. 1-3 Hour.
Supervised field experiences in student personnel services, college administration, academic advising, institutional research, development, or other areas of college and university work. (Typically offered: Fall, Spring and Summer)

HIED 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

HIED 6013. The Professoriate: Problems and Issues. 3 Hours.
An examination of the vital issues and trends affecting college faculty personnel with emphasis upon institutional practices and policies. (Typically offered: Irregular)

HIED 6023. Introduction to the Study of Higher Education. 3 Hours.
A requirement for all new doctoral and specialist students. Familiarization with writing requirements, library search procedures, library resources, and program requirements. Prerequisite: Admission to Higher Education Ed.D program. (Typically offered: Irregular)

HIED 605V. Independent Study. 1-6 Hour.
Provides students with an opportunity to pursue special study in higher education. (Typically offered: Fall, Spring and Summer)

HIED 6083. Management Skills for Effective Leadership. 3 Hours.
Development of management skills that enhance leadership includes understanding yourself, managing yourself, team building, personnel selection, group and individual decision-making, problem solving, managing conflict, developing valid performance appraisal systems, conducting performance appraisal interview, and other topics of current interest. Prerequisite: Doctoral students in Higher Education or permission of the instructor. (Typically offered: Irregular)

HIED 6093. Leading Change. 3 Hours.
An in-depth examination of leadership, change, and culture in postsecondary education. (Typically offered: Irregular)

HIED 6183. Organization Development and Change in Higher Education. 3 Hours.
An examination of the theory and practice of organization development as it relates to planned change in colleges and universities. (Typically offered: Irregular)

HIED 6303. Advancement in Higher Education. 3 Hours.
Advancement in Higher Education examines the theory and practice of the professional field and function referred to as "institutional advancement", which is dedicated to attracting philanthropic support as well as building attitudinal and behavioral support among key constituents for colleges and universities. (Typically offered: Irregular)

HIED 6323. Design and Evaluation of College Teaching. 3 Hours.
Theory and practice of effective college teaching. Emphasis is placed on preparation and evaluation of instruction. (Typically offered: Irregular)

HIED 6333. Curriculum Design in Higher Education. 3 Hours.
Types of undergraduate curricula and their supporting philosophies; approaches to curriculum planning and assessment; curricular reforms; and factors influencing curricular policy making. (Typically offered: Irregular)

HIED 6343. Strategies for Effective College Teaching. 3 Hours.
An examination of traditional and innovative instructional strategies for use in college teaching. (Typically offered: Irregular)

HIED 6353. The College and University Presidency. 3 Hours.
The course explores the basic elements of the presidency of an academic institution and examines the critical issues facing the college and university presidents/chancellors. (Typically offered: Irregular)

HIED 6423. Trends, Issues and Problems in Higher Education. 3 Hours.
A study of the current problems and trends related to the field of higher education. (Typically offered: Irregular)

HIED 6483. Strategic Enrollment Management. 3 Hours.
An examination of admissions marketing strategies, communications plans, branding, and forecasting as well as how other areas (financial aid, honors, scholarships, and student affairs) contribute to successful recruitment efforts. Other key enrollment management areas of focus for the class include academic records, registration, degree audits, FERPA, student support, and most importantly, retention. Major state and federal legislation that underscores any of these activities will be discussed as well. (Typically offered: Irregular)

HIED 6533. Assessment of Institutional Effectiveness in Higher Education. 3 Hours.
The course examines the fundamentals of assessment of learning outcomes and institutional effectiveness and introduces assessment as a tool to inform strategic planning and data-driven decision-making in higher education. (Typically offered: Irregular)

HIED 6643. College Students in the United States. 3 Hours.
Students will engage with the leading theoretical and empirical scholarship related to college students and use this information to engage in class discussion, complete course assignments, consider implications for practice, and contemplate opportunities for new scholarship. Prerequisite: Doctoral student in the Higher Education Program or instructor consent. (Typically offered: Irregular)

HIED 6653. Legal Aspects of Higher Education. 3 Hours.
An examination of the legal status of higher education in the United States; the rights and responsibilities of educators and students including fair employment; due process; torts liability and contracts; student rights landmark court decisions; federal and state legislation having an impact on education. (Typically offered: Fall and Spring)

HIED 6663. Finance and Fiscal Management. 3 Hours.
Higher education finance and budgeting practices: problems, issues, trends, and policy issues in higher education. (Typically offered: Irregular)

HIED 6683. Governance and Policy Making in Higher Education. 3 Hours.
An analysis of governance and policy making affecting the control of colleges and universities. Attention is given to policy generation, governing board supervision, and the impact of institutional, professional, and regional groups as well as community, state, and federal pressures. (Typically offered: Irregular)

HIED 6693. Research Techniques in Higher Education. 3 Hours.
Techniques of research applicable to Higher Education. (Typically offered: Irregular)

HIED 674V. Internship. 1-6 Hour.
Supervised field experiences in student personnel services, college administration, college teaching, institutional research, development, or other areas of college and university work. (Typically offered: Fall, Spring and Summer)

HIED 699V. Seminar. 1-6 Hour.
A series of seminar for specialized study into areas of current significance in postsecondary education, such as leadership and planning; organization, development, and change; human resource development and appraisal; the student in higher education; etc. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
HIED 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

History Department website (http://fulbright.uark.edu/departments/history/index.php/grad_program/)

Degrees Conferred:
M.A., Ph.D. (HIST)

Prerequisites to Degree Program:

All prospective students are evaluated by the Graduate Studies Committee of the Department of History and are judged on a case-by-case basis, looking at a variety of factors including GPA, GRE scores, letters of recommendation, statement of purpose, and the appropriateness of our current faculty and other resources to student interests.

Graduate work at the master’s level presupposes an undergraduate major in history of approximately 30 semester hours, although the Graduate Studies Committee will consider outstanding applicants with undergraduate degrees in related disciplines. In the past, strong applicants have presented at least an overall cumulative undergraduate grade point average of 3.0 or a grade point average of 3.25 in the last 60 hours of undergraduate work, a verbal score in the sixty-fifth percentile on the Graduate Record Examination (GRE) and an Analytical Writing score of 4.0 on the Graduate Record Examination (GRE). Students who present a minimum of 30 hours in history may be admitted without a deficiency. Students who present between 18 and 30 hours of history may be admitted with a deficiency, subject to the determination of the Graduate Studies Committee. Students who present less than 18 hours of history may not be admitted without a deficiency. The Graduate Studies Committee will determine the nature of the deficiency requirements.

Graduate work at the doctoral level presupposes a Master of Arts in History, although the Graduate Studies Committee will consider outstanding applicants with master’s degrees in related disciplines. Applicants without an M.A. degree but with exceptionally strong qualifications may be admitted directly into the Ph.D. program at the discretion of the Graduate Studies Committee. In the past, strong applicants have presented at least a 3.25 GPA in their previous graduate work as well as a verbal score in the sixty-fifth percentile on the Graduate Record Examination (GRE) and a 4.0 Analytical Writing score on the Graduate Record Examination (GRE).

Applicants to the M.A. program in History must apply through the Graduate School. Students must submit a statement of purpose describing their goals in graduate study, a departmental application, a resume or CV, a writing sample, and three letters of recommendation.

Master’s applications are due February 1 each year. Details can be found on the departmental website.

Applicants to the Ph.D. program in History must apply through the Graduate School. Students must submit a statement of purpose describing their goals in graduate study, a departmental application, a resume or CV, three letters of recommendation, and a writing sample. Ph.D. applications are due December 1 each year. Details can be found on the departmental website.

Requirements for the Master of Arts Degree: Students seeking the Master of Arts degree must complete at least 30 hours of history at the 5000-level and above. These should include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 7023</td>
<td>Historical Methods</td>
<td>3</td>
</tr>
<tr>
<td>HIST 600V</td>
<td>Master’s Thesis</td>
<td>6</td>
</tr>
<tr>
<td>7000-level seminar courses (either reading or research)</td>
<td>12</td>
<td></td>
</tr>
</tbody>
</table>

Only three hours of independent study may be counted towards the degree. HIST 7043 Historiography can be used to partially fulfill the seminar requirement. At least 9 of the 21 hours of seminars and electives must be in areas outside of the main field of specialization. Master’s candidates must complete and satisfactorily defend a master’s thesis in history as judged by a panel of departmental faculty. Students must maintain a minimum 3.0 GPA in all course work for the M.A. degree.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Requirements for the Doctor of Philosophy Degree: During the first semester of study, all doctoral students will be assigned an advisory committee that will determine their particular programs. Students will select four fields of historical specialization. Students will also be required to meet the departmental language requirement by establishing reading competency in at least one foreign language. At the discretion of the student’s advisory committee, doctoral students may be required to prove reading competency in additional foreign languages if appropriate to their respective fields of research and study.

After completing the course of study prescribed by their advisory committees (with a minimum 3.0 GPA in all course work for the Ph.D. degree) and satisfying the language requirements, students may apply to take the candidacy examinations. These consist of written exams in each of the four specialized fields and an oral examination. When these examinations have been passed, students may apply for admission to candidacy. Within six months of passing the written and oral exams in all four fields, ABD students will write and defend a dissertation prospectus.

All students must demonstrate a capacity for independent research by the writing of an original dissertation on a topic within their major area of study. Upon admission to candidacy, students will be assigned a dissertation committee with a major professor as chair to direct the research and writing. Under direction of the major professor, candidates will develop programs of reading in the general areas and research techniques pertinent to researching and writing their dissertations.

The student’s final examination will be an oral defense of the dissertation.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

M.A. in History

Prerequisites to Degree Program:
All prospective students are evaluated by the Graduate Studies Committee of the Department of History and are judged on a case-by-case basis, looking at a variety of factors including GPA, GRE scores, letters of recommendation, statement of purpose, and the appropriateness of our current faculty and other resources to student interests.

Graduate work at the master’s level presupposes an undergraduate major in history of approximately 30 semester hours, although the Graduate Studies Committee will consider outstanding applicants with undergraduate degrees in related disciplines. In the past, strong applicants have presented at least an overall cumulative undergraduate grade point average of 3.0 or a grade point average of 3.25 in the last 60 hours of undergraduate work, a verbal score in the sixty-fifth percentile on the Graduate Record Examination (GRE) and an Analytical Writing score of 4.0 on the Graduate Record Examination (GRE). Students who present a minimum of 30 hours in history may be admitted without deficiency. Students who present between 18 and 30 hours of history may be admitted with or without deficiency, subject to the determination of the Graduate Studies Committee. Students who present less than 18 hours of history may not be admitted without deficiency. The Graduate Studies Committee will determine the nature of the deficiency requirements.

Graduate work at the doctoral level presupposes a Master of Arts in History, although the Graduate Studies Committee will consider outstanding applicants with master’s degrees in related disciplines. Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Graduate Faculty

Antov, Nikolay Atanasov, Ph.D. (University of Chicago), M.A. (Bilkent University, Turkey), B.A. (American University in Bulgaria), Associate Professor, 2011.

Austin, Shawn, Ph.D., M.A. (University of New Mexico), B.A. (Brigham Young University-Idaho), Assistant Professor, 2015.

Banton, Caree A., Ph.D. (Vanderbilt University), M.A. (University of Ghana), M.A. (University of New Orleans), B.A./B.P.A. (Grambling State University), Associate Professor, 2013.

Brogi, Alessandro, Ph.D. (Ohio University), Ph.D. (University of Florence, Italy), M.A. (Ohio University), B.A. (University of Florence, Italy), Professor, 2002.

Brubaker, Robert P., Ph.D. (University of Michigan-Ann Arbor), M.S. (University of Wisconsin-Milwaukee), B.A. (Grinnell College), Instructor, 2009.

Cleveland, Todd, Ph.D. (University of Minnesota), M.A., B.A. (University of New Hampshire), Associate Professor, 2015.

Coon, Lynda L., Ph.D., M.A. (University of Virginia), B.A. (James Madison University), Professor, 1990.

Dominguez, Freddy C., Ph.D., M.A. (Princeton University), B.A. (Brown University), Assistant Professor, 2014.

Gigantino, Jim, Ph.D. (University of Georgia), B.A. (University of Richmond), Professor, 2010.

Gordon, Joel Samuel, Ph.D. (University of Michigan-Ann Arbor), B.A. (University of Illinois), Professor, 1999.

Gordon, Ronald J., Ph.D. (University of Arkansas), Instructor, 2014.
Hammond, Kelly, Ph.D. (Georgetown University), M.A. (Simon Frazer University), B.A. (Bishop’s University), Assistant Professor, 2015.
Hare, Laurence, Ph.D., M.A. (University of North Carolina at Chapel Hill), B.A. (University of Tennessee at Chattanooga), Associate Professor, 2010.
Muntz, Charles E., Ph.D. (Duke University), B.A. (Swarthmore College), Associate Professor, 2008.
Pepitone, Lauren, Ph.D., M.A. (Johns Hopkins University), B.A., Vassar University, Assistant Professor, 2016.
Pierce, Michael C., Ph.D., M.A. (The Ohio State University), B.A. (Kenyon College), Associate Professor, 2001.
Robinson, Charles F., Ph.D. (University of Houston), M.A. (Rice University), B.A. (University of Houston), Professor, 1999.
Rodriguez, Sarah, Ph.D., B.A. (University of Pennsylvania), Assistant Professor, 2016.
Rosales, Steven, Ph.D. (University of California-Irvine), B.A. (University of California-San Diego), Associate Professor, 2013.
Sloan, Kathryn Ann, Ph.D., M.A., M.B.A. (University of Kansas), B.A. (Kansas State University), Professor, 2004.
Starks, Trish, Ph.D., M.A. (The Ohio State University), B.A. (University of Missouri), Professor, 2000.
Sutherland, Daniel E., Ph.D., M.A., B.A. (Wayne State University), Distinguished Professor, 1989.
West, Elliott, Ph.D., M.A. (University of Colorado-Boulder), B.A. (University of Texas, Austin), Alumni Distinguished Professor, 1979.
Whyane, Jeannie, Ph.D., M.A., B.A. (University of California-San Diego), University Professor, 1990.
White, Calvin, Ph.D. (University of Mississippi), M.A., B.A. (University of Central Arkansas), Associate Professor, 2007.
Williams, Patrick George, Ph.D., M.A. (Columbia University), B.A. (University of Texas at Austin), Professor, 1998.
Woods, Randall B., Ph.D., M.A., B.A. (University of Texas at Austin), Distinguished Professor, 1971.

Courses
HIST 5003. Democratic Athens. 3 Hours.
(Formerly HIST 4003.) History of the Athens from the sixth century BCE to the end of the fourth. Topics include origins and evolution of democracy, the Persian wars, the rise and fall of the Athenian Empire, and the development of historiography, literature, art, and philosophy during the period. Graduate degree credit will not be given for both HIST 4003 and HIST 5003. (Typically offered: Irregular)

HIST 5013. Alexander the Great and the Hellenistic World. 3 Hours.
(Formerly HIST 4013.) A survey of the achievements of Alexander and the culture of the new world he created. The personality and career of Alexander are examined as well as the rich diversity of the Hellenistic world: trade with India, religious syncretism, and the development of Hellenistic science and philosophy. Graduate degree credit will not be given for both HIST 4013 and HIST 5013. (Typically offered: Irregular)

HIST 5033. Roman Empire. 3 Hours.
(Formerly HIST 4033.) History of Rome from the Emperor Augustus to Constantine, ca. 30 BCE - 337 CE. Topics include the sources for imperial Rome, the organization of imperial government, the provinces of Rome and provincial government, art and literature under the empire, the rise of Christianity, and the conversion of the Empire. Graduate degree credit will not be given for both HIST 4033 and HIST 5033. (Typically offered: Irregular)

HIST 506V. Readings in European History. 1-6 Hour.
Directed readings in the field of European history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

HIST 507V. Readings in American History. 1-6 Hour.
Readings. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HIST 508V. Research Problems in European History. 1-6 Hour.
Research problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

HIST 509V. Research Problems in American History. 1-6 Hour.
Research problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

HIST 511V. Research Problems in Latin American History. 1-6 Hour.
Research problems in Latin American history. (Typically offered: Irregular)

HIST 517V. Readings in Asian History. 1-6 Hour.
Readings. Prerequisite: Graduate standing. (Typically offered: Irregular)

HIST 518V. Research Problems in Asian History. 1-18 Hour.
Research problems in Asian history. Prerequisite: Graduate standing. (Typically offered: Irregular)

HIST 5193. Great Britain, 1901-2001. 3 Hours.
(Formerly HIST 4193.) Examines the history of the British Isles from the death of Queen Victoria in 1901 to the reelection of Prime Minister Tony Blair in 2001. Special attention is given to the collapse of the British Empire, the birth of the welfare state, and the challenges inherent in the decline of British world power. Graduate degree credit will not be given for both HIST 4193 and HIST 5193. (Typically offered: Spring Odd Years)

HIST 5203. History of the Holocaust. 3 Hours.
(Formerly HIST 4203.) Examines the origins, history, and legacies of the European Holocaust. Traces the origins of anti-Semitism in Europe, the rise of Nazism in Germany, the path to genocide during World War II, and the role of victims, perpetrators, rescuers, and bystanders. Considers issues of memory and justice in the postwar era. Graduate degree credit will not be given for both HIST 4203 and HIST 5203. (Typically offered: Irregular)

HIST 522V. Readings in Latin America History. 1-6 Hour.
Readings in Latin American history. (Typically offered: Irregular)

HIST 524V. Readings in African History. 1-6 Hour.
Readings in African history. (Typically offered: Irregular)

HIST 525V. Research Problems in African History. 1-6 Hour.
Research problems in African history. (Typically offered: Irregular)

HIST 526V. Readings in Middle Eastern History. 1-6 Hour.
Readings in Middle Eastern history. (Typically offered: Irregular)

HIST 527V. Readings in Medieval History. 1-6 Hour.
Readings in Medieval history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 528V. Research Problems in Middle Eastern History. 1-6 Hour.
Research problems in Middle Eastern history. (Typically offered: Irregular)

HIST 529V. Research Problems in Medieval History. 1-6 Hour.
Research problems in Medieval history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 530V. Readings in British History. 1-6 Hour.
Directed readings in the field of British history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

HIST 533V. Readings in Ancient History. 1-6 Hour.
Readings in Ancient history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 534V. Research Problems in Ancient History. 1-6 Hour.
Research problems in Ancient history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
HIST 5393. Early Modern Islamic Empires, 1300-1750. 3 Hours.
(Formerly HIST 4393.) An examination of the historical development of the three great Islamic empires in the early modern period: the Ottomans, the Safavids of Iran, and the Mughals of India. Special attention given to imperial expansion, administrative structures, religious-legislar establishment, and the formation of distinct traditions in political ideology, historiography, and the arts and sciences. Graduate degree credit will not be given for both HIST 4393 and HIST 5393. (Typically offered: Spring Odd Years)

HIST 5403. Islam in Asia. 3 Hours.
(Formerly HIST 4403.) Introduces students to the history of Islam in East and Southeast Asia over the past 1,200 years. It focuses on the 18th-21st centuries when Muslims were part of everyday life in Asia and participated in the formation of majority and minority identities in the region. Graduate degree credit will not be given for both HIST 4403 and HIST 5403. (Typically offered: Irregular)

HIST 545V. Readings in Caribbean History. 1-6 Hour.
Graduate readings in Caribbean history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 546V. Research Problems in Caribbean History. 1-6 Hour.
Independent research in Caribbean history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 547V. Readings in Atlantic History. 1-6 Hour.
Graduate readings in Atlantic world history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 5483. African American Biographies. 3 Hours.
(Formerly HIST 4483.) Introduction to the history and intellectual development of famous and not-so-famous African Americans. Graduate degree credit will not be given for both HIST 4483 and HIST 5483. (Typically offered: Irregular)

HIST 5493. Religion in America to 1860. 3 Hours.
(Formerly HIST 4493.) History of religion in early America, primarily from a social and cultural perspective. Topics will include region, social class, growth of institutions, slavery, print culture, and social reform in traditions including Protestantism, West African religion, Catholicism, Native American religion, and Judaism. Graduate degree credit will not be given for both HIST 4493 and HIST 5493. (Typically offered: Irregular)

HIST 5503. History of Political Parties in the United States, 1789-1896. 3 Hours.
(Formerly HIST 4503.) Origin and development of the American party system from the implementation of the constitution to the election of McKinley. Graduate degree credit will not be given for both HIST 4503 and HIST 5503. (Typically offered: Fall Even Years)

HIST 5513. History of Political Parties in the United States Since 1896. 3 Hours.
(Formerly HIST 4513.) Response of the party system to America's emergence as an industrial nation and world power from the election of 1896 to present. Graduate degree credit will not be given for both HIST 4513 and HIST 5513. (Typically offered: Spring Odd Years)

HIST 5523. Roman Republic. 3 Hours.
(Formerly HIST 4523.) History of Rome from its origins in the eighth century BCE to the fall of the Republic in the first century BCE. Topics include the sources for Roman history, the development, functioning, and ultimate failure of republican government, the Roman army, and Roman imperialism in Italy and the Mediterranean. Graduate degree credit will not be given for both HIST 4523 and HIST 5523. (Typically offered: Irregular)

HIST 5543. American Social and Intellectual History Since 1865. 3 Hours.
(Formerly HIST 4543.) Survey of thought and society since the Civil War. Graduate degree credit will not be given for both HIST 4543 and HIST 5543. (Typically offered: Spring Odd Years)

HIST 5553. The Recluse in Early East Asia. 3 Hours.
(Formerly HIST 4553.) A cross-cultural study of those who chose or needed to leave the world of officialdom for the world of nature in early East Asia. Graduate degree credit will not be given for both HIST 4553 and HIST 5553. (Typically offered: Fall Even Years)

HIST 5553. The Old South, 1607-1865. 3 Hours.
(Formerly HIST 4563.) Survey of the political, social, and economic development of the antebellum South. Graduate degree credit will not be given for both HIST 4563 and HIST 5563. (Typically offered: Fall Odd Years)

HIST 5573. The New South, 1860 to the Present. 3 Hours.
(Formerly HIST 4573.) Survey of the development of the Civil War and postwar South to the present. Graduate degree credit will not be given for both HIST 4573 and HIST 5573. (Typically offered: Fall Even Years)

HIST 5583. Arkansas in the Nation. 3 Hours.
(Formerly HIST 4583.) Designed to provide advanced undergraduate and graduate students with a comprehensive understanding of the full sweep of Arkansas history. The focus will be on social, economic and political history, and historiography. Graduate degree credit will not be given for both HIST 4583 and HIST 5583. (Typically offered: Irregular)

HIST 5593. The Colonial French in the Mississippi Valley. 3 Hours.
(Formerly HIST 4593.) This course focuses on the French Colonial Mississippi Valley from 1698 until 1763. Activities for both French and non-French speaking students provide a rich environment to discuss encounters, subsistence strategies, and warfare faced by native peoples, missionaries, explorers, and colonists alike. Students will examine primary handwritten, transcribed, or translated sources. Graduate degree credit will not be given for both HIST 4593 and HIST 5593. (Typically offered: Spring)

HIST 5603. U.S. Labor History to 1877. 3 Hours.
(Formerly HIST 4603.) Examines the changing nature of work in U.S. history from 1607 until 1877 including the ways that workers--individually and collectively--understand the meanings of their labor and to the ways that notions of class, gender, ethnicity, and race inform these understandings. Graduate degree credit will not be given for both HIST 4603 and HIST 5603. (Typically offered: Fall Odd Years)

HIST 5613. Colonial America 1600-1763. 3 Hours.
(Formerly HIST 4613.) History of colonial America from 1600 to the end of the Seven Years War emphasizing economic, social, and cultural perspectives. Topics include Native American, French, Spanish, English, Dutch, and Russian interactions in North America and the larger Atlantic World. Graduate degree credit will not be given for both HIST 4613 and HIST 5613. (Typically offered: Irregular)

HIST 5623. Revolutionary America, 1763 to 1789. 3 Hours.
(Formerly HIST 4623.) History of revolutionary America emphasizing economic, social, and cultural perspectives. Topics include historical interpretations of the causes of the war, the impact of war on African Americans, women, loyalists, elite, and poor Americans. The course also examines the formation of the new national government. Graduate degree credit will not be given for both HIST 4623 and HIST 5623. (Typically offered: Irregular)

HIST 5633. Heian Japan 794-1192. 3 Hours.
(Formerly HIST 4633.) A study of courtly culture and the religious world of Heian Japan. Graduate degree credit will not be given for both HIST 4633 and HIST 5633. (Typically offered: Irregular)

HIST 5643. Early American Republic, 1789-1828. 3 Hours.
(Formerly HIST 4643.) History of the early United States emphasizing social and cultural perspectives. Topics addressed will include westward expansion, slavery, religion, and economic change. Graduate degree credit will not be given for both HIST 4643 and HIST 5643. (Typically offered: Irregular)
HIST 5653. Antebellum America, 1828-1850. 3 Hours.
(Formerly HIST 4653.) History of antebellum U.S. emphasizing social and cultural perspectives. Topics addressed will include slavery, religion, gender, the market economy, regionalism, and political developments. Graduate degree credit will not be given for both HIST 4653 and HIST 5653. (Typically offered: Irregular)

HIST 5663. Rebellion to Reconstruction, 1850-1877. 3 Hours.
(Formerly HIST 4663.) A survey of political, social, and economic issues from the late antebellum period through Reconstruction. Emphasis is placed on the causes of the Civil War and the problems of postwar America. A brief examination of the Civil War is included, Graduate degree credit will not be given for both HIST 4663 and HIST 5663. (Typically offered: Fall)

HIST 5673. The American Civil War, 3 Hours.
(Formerly HIST 4673.) An intensive study of the political, social, military, and economic aspects of the American Civil War period. Graduate degree credit will not be given for both HIST 4673 and HIST 5673. (Typically offered: Fall)

HIST 5683. The American Civil Rights Movement, 3 Hours.
(Formerly HIST 4383.) Introduction to the history and development of the civil rights movement in the United States. Graduate degree credit will not be given for both HIST 4383 and HIST 5683. (Typically offered: Irregular)

HIST 5693. Late Middle Ages, 3 Hours.
(Formerly HIST 4053.) This course examines the political, social-economic, intellectual, and spiritual developments of European history, c. 1000-1400 CE. Special topics include monasticism, sacral kingship, the crusades, and the medieval university. Graduate degree credit will not be given for both HIST 4053 and HIST 5693. (Typically offered: Spring Odd Years)

HIST 570V. Special Topics. 1-6 Hour.
Special topics. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

HIST 5723. America Between the Wars, 1917-1941. 3 Hours.
(Formerly HIST 4723.) The impact of World War I, the 1920s, and the Great Depression upon American society and culture. Graduate degree credit will not be given for both HIST 4723 and HIST 5723. (Typically offered: Irregular)

HIST 573V. Readings in Global History. 1-6 Hour.
Directed readings in the field of Global history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

HIST 5753. Diplomatic History of the United States, 1776-1900. 3 Hours.
(Formerly HIST 4753.) Survey of American foreign relations from the American Revolution through the Spanish-American War. Principal topics include isolationism, freedom of the seas, manifest destiny and continental expansion, overseas expansion, and the diplomacy of war and peace. Emphasis on the relationship between domestic politics and foreign affairs. Graduate degree credit will not be given for both HIST 4753 and HIST 5753. Prerequisite: HIST 2003. (Typically offered: Fall Even Years)

HIST 5763. Diplomatic History of the United States, 1900-1945. 3 Hours.
(Formerly HIST 4763.) America's development as a world power. The course examines U.S. relations with Europe, Latin America, and East Asia, plus America's first approach to the Middle East. Particular emphasis is placed on America's involvement in World War I and World War II. Graduate degree credit will not be given for both HIST 4763 and HIST 5763. Prerequisite: HIST 2013. (Typically offered: Spring Odd Years)

HIST 5773. Diplomatic History of the US, 1945 to Present. 3 Hours.
(Formerly HIST 4773.) U.S. involvement in world affairs since WWII. The Cold War from an international perspective, including strategies, nuclear deterrence, conflicts, economic developments, cultural relations among allies and adversaries. Post-Cold War scenarios, including war on terrorism. Graduate degree credit will not be given for both HIST 4773 and HIST 5773. (Typically offered: Fall Odd Years)

HIST 5783. History of Modern Mexico. 3 Hours.
(Formerly HIST 4783.) This course examines the history of Mexico from the wars of independence to the present. Emphasis will be placed on the turbulent nineteenth century and the Mexican Revolution. Themes covered include colonial legacies, national identities, popular culture, emigration, and relations with the United States. Graduate degree credit will not be given for both HIST 4783 and HIST 5783. (Typically offered: Spring Odd Years)

HIST 5793. Colonial India, 1758-1948. 3 Hours.
(Formerly HIST 4793.) Examines the course of Indian history from the 1758 Battle of Plassey to eventual independence from Great Britain in 1948. Special attention is given to India's place within the British Empire, particularly the East Indian Company, the Indian Mutiny, the Raj, the rise of Gandhi, and India's independence movement. Graduate degree credit will not be given for both HIST 4793 and HIST 5793. (Typically offered: Irregular)

HIST 5803. Modern Scandinavia. 3 Hours.
(Formerly HIST 4803.) Examines the history of the Nordic lands, including Denmark, Finland, Iceland, Norway, and Sweden, from 1500 to the present. Graduate degree credit will not be given for both HIST 4803 and HIST 5803. (Typically offered: Irregular)

HIST 5813. Africans and Slavery in Colonial Latin America. 3 Hours.
(Formerly HIST 4813.) Explores the diverse experiences of slaves and free Blacks in colonial Spanish and Portuguese America from 1500 to around 1888, demonstrating that bondage and the practice of African slavery was a pillar of political authority in colonial Latin America. Graduate degree credit will not be given for both HIST 4813 and HIST 5813. (Typically offered: Irregular)

HIST 5823. Black Freedom in the Age of Emancipation. 3 Hours.
(Formerly HIST 4823.) This course centers on the comparative study of Atlantic World freedom movements from the perspective of the African Diaspora. It focuses on the histories, meanings, legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them. Graduate degree credit will not be given for both HIST 4823 and HIST 5823. (Typically offered: Spring)

HIST 5833. Social and Cultural History of the Modern Middle East. 3 Hours.
(Formerly HIST 4433.) An analysis of Middle East history in the 17th-20th centuries which focuses on the social transformation of urban and rural life. Particular emphasis is given to the roles of economics, genealogy, art, and popular culture. Graduate degree credit will not be given for both HIST 4433 and HIST 5833. (Typically offered: Irregular)

HIST 5843. The Atlantic World, 1400-1850. 3 Hours.
(Formerly HIST 4233.) Explores the political, economic, cultural, and social engagement of Africans, Europeans, and Native Americans across the Atlantic from 1400 to 1850. It uses a comparative lens to understand how interactions between Europe, Africa, and the Americas created enduring ties throughout the Atlantic Basin. Graduate degree credit will not be given for both HIST 4233 and HIST 5843. (Typically offered: Irregular)

HIST 5853. Early Chinese Empires: Mythology, Archeology, and Historiography. 3 Hours.
(Formerly HIST 4853.) A critical introduction to the most important sources and major themes, both textual and archæological, for the study of early China. Graduate degree credit will not be given for both HIST 4853 and HIST 5853. (Typically offered: Spring)

HIST 5863. Classical Thought in East Asia. 3 Hours.
(Formerly HIST 4863.) Introduces the major East Asian philosophical and religious traditions including Confucianism, Daoism, Buddhism, and Shintoism. Read original sources in translation, such as Analects, and explore perspectives that stem from the traditions as they bear on contemporary global issues. Graduate degree credit will not be given for both HIST 4863 and HIST 5863. (Typically offered: Fall)
HIST 5873. Germany since 1945. 3 Hours.
(Formerly HIST 4873.) Examines the history of Germany since the end of the Second World War including political division and economic recovery, dissident movements in East Germany and alternative cultures in West Germany, reunification in 1990, and the legacy of Nazism and the Holocaust. Graduate degree credit will not be given for both HIST 4873 and HIST 5873. (Typically offered: Irregular)

HIST 5883. Health and Disease: 1500 to the Present. 3 Hours.
(Formerly HIST 4883.) Explores the emergence of epidemics against the backdrop of the nation state and anxieties over women, the lower classes, and other marginalized groups. The rise of modern health programs illuminates the cultural construction of medicine, the biases of scientific inquiry, and the tensions among paternalism, liberty, and prejudice. Graduate degree credit will not be given for both HIST 4883 and HIST 5883. (Typically offered: Irregular)

HIST 5903. Music and the Arts of Edo Japan 1600-1868. 3 Hours.
(Formerly HIST 4903.) A music and arts view of urban and popular culture of the Edo period of Japan (1600-1868). Readings drawn from history, literature, aesthetics, religion and science. Graduate degree credit will not be given for both HIST 4903 and HIST 5903. (Typically offered: Irregular)

HIST 5913. Reading Japanese Noh as Cultural History. 3 Hours.
(Formerly HIST 4913.) A historical, sociocultural, and inter-arts approach to the medieval lyric-drama Japanese Noh, a form of masked theater with roots reaching beyond the 14th century. Graduate degree credit will not be given for both HIST 4913 and HIST 5913. (Typically offered: Irregular)

HIST 5923. Song China 960-1279. 3 Hours.
(Formerly HIST 4923.) Examination of the Song dynasty (960-1279) concentrating on the education and role of the scholar-official and the literatus. Readings drawn from history, literature, personal diaries, travel accounts, political memoranda, and scientific writings. Graduate degree credit will not be given for both HIST 4923 and HIST 5923. (Typically offered: Irregular)

HIST 5933. Ad Paradigm: Utopias, imaginary places, and the afterlife in East Asia. 3 Hours.
(Formerly HIST 4933.) Confucian, Daoist, and Buddhist ideas of ideal communities ('utopias'), of imaginary places ('paradise islands'), and of the afterlife ('heaven and hell') in East Asia will be traced in a broad sweep across literature, painting, and the performing arts. Graduate degree credit will not be given for both HIST 4933 and HIST 5933. (Typically offered: Irregular)

HIST 5943. U.S. Labor History, from 1877 until the present. 3 Hours.
(Formerly HIST 4943.) This course will examine the changing nature of work in U.S. history from 1877 until the present. It will pay particular attention to the ways that workers--individually and collectively--understand the meanings of their labor and to the ways that notions of class, gender, ethnicity, and race inform these understandings. Graduate degree credit will not be given for both HIST 4943 and HIST 5943. (Typically offered: Spring Even Years)

HIST 5953. The History of Sub-Saharan African Women. 3 Hours.
(Formerly HIST 4953.) Introduction to the history of women in Sub-Saharan Africa, starting in the early 18th century through the 20th century. Focus on women and the transatlantic slave trade, women's influence in pre-colonial religious, political, and cultural institutions, and women's experiences under colonial rule and in post-colonial Africa. Graduate degree credit will not be given for both HIST 4953 and HIST 5953. (Typically offered: Irregular)

HIST 5963. Third World Underdevelopment and Modernization. 3 Hours.
(Formerly HIST 4963.) Examines key issues related to societal change in the Third World, including various views and theories of international development and modernization. Other major issues explored include social inequalities, food and hunger, population, environment, trade and globalization, international aid, and the roles of state, market, and civil society. Graduate degree credit will not be given for both HIST 4963 and HIST 5963. (Typically offered: Irregular)

HIST 5973. The Civilization of the Renaissance in Italy. 3 Hours.
Important trends in Italian culture between the 14th and 16th centuries, including the birth of humanism, new understandings of the past, "new" political ideologies, scientific innovation, and famous art produced in the Western tradition. (Typically offered: Irregular)

HIST 5983. Intellectual History of Europe Since the Enlightenment. 3 Hours.
(Formerly HIST 4143.) A survey of the major developments in European thought and culture since the emergence of Romanticism. Topics include Romanticism, Darwinism, Marxism, and Modernism. Graduate degree credit will not be given for both HIST 4143 and HIST 5983. (Typically offered: Fall Even Years)

HIST 600V. Master's Thesis. 1-6 Hours.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

HIST 6013. The Era of the French Revolution. 3 Hours.
(Formerly HIST 4213.) France from the salons of the Enlightenment to the Napoleonic Wars. The French Revolution will be explored in terms of politics and personalities, ideas and symbols, class and gender relations, and violence and terror. Graduate degree credit will not be given for both HIST 4213 and HIST 6013. (Typically offered: Fall Odd Years)

HIST 6033. Society and Gender in Modern Europe. 3 Hours.
(Formerly HIST 4133.) Changing values and attitudes toward childhood, family life, sexuality, and gender roles in Europe from the Renaissance to the present. The social impact of the Industrial Revolution, urbanization, demographic change, and the two world wars. Graduate degree credit will not be given for both HIST 4133 and HIST 6033. (Typically offered: Spring Odd Years)

HIST 6063. Tudor-Stuart England, 1485-1714. 3 Hours.
(Formerly HIST 4163.) Examines the history of the British Isles from the ascension of Henry VII and the Tudor dynasty until the close of the Stuart Era in 1714. Special attention is given to the English Reformation, the Elizabethan years, the 17th Century Revolutions, and the birth of an overseas Empire. Graduate degree credit will not be given for both HIST 4163 and HIST 6063. (Typically offered: Spring Even Years)

HIST 6073. Renaissance and Reformation, 1300-1600. 3 Hours.
(Formerly HIST 4073.) Examines the history of Europe from the end of the Middle Ages through the Renaissance to the Reformation and Counter-Reformation. Special attention is paid to changes in popular piety, political thought, religious representation, and the discovery of the New World. Graduate degree credit will not be given for both HIST 4073 and HIST 6073. (Typically offered: Fall Even Years)

HIST 6083. Early Modern Europe, 1600-1800. 3 Hours.
(Formerly HIST 4083.) Begins with the upheaval of the reformation, moves through the crisis of the 17th century and culminates with the democratic revolution of the 18th century. Examines the consolidation of the European state system, the propagation of modern science, discovery of overseas worlds, and the advent of the Industrial Revolution. Graduate degree credit will not be given for both HIST 4083 and HIST 6083. (Typically offered: Spring Odd Years)

HIST 6093. The History of African Americans and Social Justice. 3 Hours.
(Formerly HIST 4093.) Explores how the United States has extended social justice to African Americans during the nation's history. Examines social justice for blacks and the impact of historic policies and practices on black life today. Graduate degree credit will not be given for both HIST 4093 and HIST 6093. (Typically offered: Irregular)
HIST 6113. Archaic Greece. 3 Hours.
(Formerly HIST 4113.) History of Greece from the late Bronze Age to the end of the Persian Wars. This class will focus particularly on the sources involved with reconstructing early Greek history, especially Herodotus and Homer, on the development of the Greek city-state or polis, and on the interaction between the Greeks and Near-eastern civilizations during this period, culminating in the wars between the Greeks and the Persian Empire. Graduate degree credit will not be given for both HIST 4113 and HIST 6113. (Typically offered: Irregular)

HIST 6173. The Latin American City. 3 Hours.
(Formerly HIST 4173.) This course examines the social, political, and cultural aspects of the modern Latin American city from an interdisciplinary perspective. The course includes an introduction to urban studies concepts, and each semester is organized around a specific set of case studies. Graduate degree credit will not be given for both HIST 4173 and HIST 6173. (Typically offered: Irregular)

HIST 6183. Great Britain 1707-1901. 3 Hours.
(Formerly HIST 4183.) Examines the history of the British Isles from the 1707 Act of Union between Scotland and England until the death of Queen Victoria in 1901. Special attention is given to the spread of Empire, industrialization, and the political, social, and cultural aspects of the Georgian and Victorian Eras. Graduate degree credit will not be given for both HIST 4183 and HIST 6183. (Typically offered: Fall Even Years)

HIST 6203. Byzantine Empire. 3 Hours.
(Formerly HIST 4103.) Examines the history and culture of the Byzantine Empire from the reign of Constantine I to the fall of Constantinople in 1453. Topics include the development of Christianity and the schism with the western church, the crusades, and Byzantine influence on Islam, Russia, the Ottomans, and the Renaissance. Graduate degree credit will not be given for both HIST 4103 and HIST 6203. (Typically offered: Irregular)

HIST 6223. France Since 1815. 3 Hours.
(Formerly HIST 4223.) Survey of French history from the overthrow of Napoleon to the 5th Republic, with emphasis on French politics, society, and culture. Graduate degree credit will not be given for both HIST 4223 and HIST 6223. (Typically offered: Spring Even Years)

HIST 6243. Germany, 1789-1918. 3 Hours.
(Formerly HIST 4243.) Study of German history from the Age of Absolutism to the collapse of the German Empire at the end of the First World War. Special attention is paid to the Enlightenment and Romantic movements; nationalism and the unification of Germany; and evolving conflicts over the political and social order. Graduate degree credit will not be given for both HIST 4243 and HIST 6243. (Typically offered: Irregular)

HIST 6263. Independence and Africa Today. 3 Hours.
(Formerly HIST 4263.) Examines the last half-century of Africa's history, focusing on the last few decades. Introduction of Africa's colonial past, revolutions and struggles for independence. Review of African development in the post-colonial and contemporary era, successes and failures of independent Africa, and the challenges the continent faces today. Graduate degree credit will not be given for both HIST 4263 and HIST 6263. (Typically offered: Spring)

HIST 6273. Comparative Slavery. 3 Hours.
(Formerly HIST 4273.) Explores the meaning of slavery around the world, both in ancient and modern times. This examination of how slavery differed in various cultures over time will allow students to explore the complexity of this labor relationship and gain a better understanding of how slavery was an integral part of world history. Graduate degree credit will not be given for both HIST 4273 and HIST 6273. (Typically offered: Irregular)

HIST 6293. Latin American Environmental History. 3 Hours.
Explores the challenges, debates, and ecologies of Latin America in order to understand the historical roots of current environmental crises. It engages a historiography on ecosystems found in the region. Uses environmental history texts and scholarly articles to build a layered and transnational approach. (Typically offered: Spring Even Years)

HIST 6303. Transatlantic Relations, 1919-Present. 3 Hours.
(Formerly HIST 4303.) US-Western European Relations, from the Wilsonian era to the present, covering strategic, economic, and cultural aspects. Graduate degree credit will not be given for both HIST 4303 and HIST 6303. (Typically offered: Irregular)

HIST 6333. Modern Islamic Thought. 3 Hours.
(Formerly HIST 4333.) Main currents in Islamic theology and political philosophy from the Ottoman Empire to the end of the twentieth century. Graduate degree credit will not be given for both HIST 4333 and HIST 6333. (Typically offered: Irregular)

HIST 6343. Golden Age Portugal and Spain. 3 Hours.
(Formerly HIST 4343.) This course will examine the diverging and converging paths of Portugal and Spain during the early modern period (15th-17th centuries). We will chart their rise as global imperial powers and their initial declines. We'll explore the political, social, and religious contexts in which Golden Age Iberia flourished. Graduate degree credit will not be given for both HIST 4343 and HIST 6343. (Typically offered: Irregular)

HIST 6453. The American Frontier. 3 Hours.
(Formerly HIST 4463.) American westward expansion and its influence on national institutions and character. Emphasis on the pioneer family and the frontier's role in shaping American society, culture, economy, and politics. Topics include exploration, the fur trade, the cattle kingdom and the mining, farming, and military frontiers. Graduate degree credit will not be given for both HIST 4463 and HIST 6463. (Typically offered: Fall Odd Years)

HIST 6473. Environmental History. 3 Hours.
(Formerly HIST 4473.) Examines the interactions between human culture and the natural environments: Concepts of nature in the West and elsewhere, dynamics of the Physical Environment, case studies in Regional Environmental History and the Politics of Environmental movements. Graduate degree credit will not be given for both HIST 4473 and HIST 6473. (Typically offered: Irregular)

HIST 6513. New Women in the Middle East. 3 Hours.
(Formerly HIST 4413.) This course covers the transformation of social and cultural roles of women in the Middle East since the 19th Century. Emphasizes include political emancipation, religious reformation, artistic representation, and gendered re-definition. Graduate degree credit will not be given for both HIST 4413 and HIST 6513. (Typically offered: Irregular)

HIST 6523. Wars of Religion: From the Crusades to 9/11. 3 Hours.
(Formerly HIST 4323.) Examines the place of religion in combat across the centuries. A case study approach is used to explore different conflicts from the twelfth century crusades against Muslim forces to 9/11. Investigates how religious motivations may or may not be related to other political, social, cultural, economic concerns. Graduate degree credit will not be given for both HIST 4323 and HIST 6523. (Typically offered: Irregular)

HIST 6543. Late Antiquity and the Early Middle Ages. 3 Hours.
(Formerly HIST 4043.) This course examines the political, spiritual, intellectual, and social-economic developments of European history, c. 300-1000 CE. Special topics include the Christianization of the late Roman Empire and Byzantium, as well as the formation of Celtic and Germanic Kingdoms in the West. Graduate degree credit will not be given for both HIST 4043 and HIST 6543. (Typically offered: Fall Even Years)
HIST 6563. The Middle East since 1914. 3 Hours.
( Formerly HIST 4563.) Middle East since 1914 addresses European colonialism, the rise of new social elites, independence, revolution, globalization, economic self-determination, persistent regional conflicts and ongoing battles over "cultural authenticity". Graduate degree credit will not be given for both HIST 4563 and HIST 6563. (Typically offered: Irregular)

HIST 6623. Africa and the Trans-Atlantic Slave Trade. 3 Hours.
(Formerly HIST 4123.) Examines the trans-Atlantic slave trade with a primary focus on the role of Africa and Africans in creating the unique economy and culture of the trans-Atlantic world. Graduate degree credit will not be given for both HIST 4123 and HIST 6623. (Typically offered: Irregular)

HIST 6643. Frontiers and Borderlands in Colonial Latin America. 3 Hours.
(Formerly HIST 4443.) This course examines frontiers and borderlands in colonial Latin America and focuses on the regions of California, New Mexico, Texas, Brazil, and the Río de la Plata. It demonstrates that frontiers and borderlands are defined by the absence of a hegemonic European power and associated with the prevalence of Indigenous norms. Graduate degree credit will not be given for both HIST 4443 and HIST 6643. (Typically offered: Odd Years)

HIST 6703. Emergence of Modern America, 1876-1917. 3 Hours.
(Formerly HIST 4703.) A survey of the impact of the Industrial Revolution, Imperialism, and progressivism upon American life and institutions. Graduate degree credit will not be given for both HIST 4703 and HIST 6703. (Typically offered: Fall)

HIST 6733. Recent America, 1941 to the Present. 3 Hours.
(Formerly HIST 4733.) A general survey of American history since World War II with emphasis upon the presidency, reform movements, the Cold War, and cultural developments. Graduate degree credit will not be given for both HIST 4733 and HIST 6733. (Typically offered: Irregular)

HIST 6743. The Cold War in Latin America: Revolutions, Violence, and Politics. 3 Hours.
(Formerly HIST 4743.) This course will trace the rise of the ideological and political struggles over social and economic development and the security regimes designed to thwart socialist revolution and political mobilization. The influence of the United States in Latin American security regimes and "containment" activities will receive special attention. Graduate degree credit will not be given for both HIST 4743 and HIST 6743. (Typically offered: Irregular)

HIST 6843. Global History of Soccer. 3 Hours.
Prompts students to explore the various historical processes related to the global diffusion of and engagement with soccer. Examines the ways soccer has reflected the broader, ongoing process of globalization, with players, ideas, tactics, and wealth circulating throughout the globe. (Typically offered: Irregular)

HIST 6993. History of the Ottoman Empire, 1300-1923. 3 Hours.
History of the Ottoman Empire from its emergence as frontier principality in Anatolia ca. 1300, through its heyday as a major imperial power on three continents in the fifteenth through the eighteenth centuries, ending with its encounter with western imperialism and nationalism in the nineteenth and early twentieth centuries. (Typically offered: Irregular)

HIST 700V. Doctoral Dissertation. 1-18 Hour.
Independent research and writing leading to the completion of a doctoral dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

HIST 7023. Historical Methods. 3 Hours.
(Formerly HIST 5023.) Practical introduction to historical research and writing. Consists of lecture, library reading, and class criticism of research papers. Prerequisite: Graduate standing. (Typically offered: Fall)

HIST 7043. Historiography. 3 Hours.
(Formerly HIST 5043.) Survey of the history of historical writing and a study of the important schools and historical interpretation. Prerequisite: Graduate standing. (Typically offered: Irregular)

HIST 7053. Reading Seminar in Asian History. 3 Hours.
(Formerly HIST 5053.) Concentrated reading in selected specialized areas of Asian history. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7103. Reading Seminar in American History. 3 Hours.
(Formerly HIST 5103.) Historiographical and bibliographical study of special areas of U.S. history, such as Antebellum America, the Civil War, etc. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7123. Research Seminar in American History. 3 Hours.
(Formerly HIST 5123.) Research projects in selected fields of American history, such as the Civil War, Antebellum America, etc. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7133. Reading Seminar in European History. 3 Hours.
(Formerly HIST 5133.) Historiographical and bibliographical study of special periods in European history, such as the Roman Empire, the late Middle Ages, the French Revolution, etc. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7143. Research Seminar in European History. 3 Hours.
(Formerly HIST 5143.) Research projects in selected fields of European history, such as the French Revolution, humanism, etc. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7153. Reading Seminar in British History. 3 Hours.
(Formerly HIST 5153.) Historiographical and bibliographical study of selected periods of British history. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7163. Research Seminar in British History. 3 Hours.
(Formerly HIST 5163.) Research projects in selected fields of British history. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7213. Reading Seminar in Middle Eastern History. 3 Hours.
(Formerly HIST 5213.) Historiographical and bibliographical study of special areas of Middle Eastern history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7233. Research Seminar in Middle Eastern History. 3 Hours.
(Formerly HIST 5233.) Research projects in selected fields of Middle Eastern history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7313. Reading Seminar in Latin American History. 3 Hours.
(Formerly HIST 5313.) Historiographical and bibliographical study of special areas in Latin American history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7323. Research Seminar in Latin American History. 3 Hours.
(Formerly HIST 5323.) A research seminar for the production of a major research project in Latin American history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7353. Reading Seminar in Medieval History. 3 Hours.
(Formerly HIST 5353.) Historiographical and bibliographical study of special areas in medieval history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.
HIST 7373. Reading Seminar in Ancient History. 3 Hours.
(Formerly HIST 5373.) Historiographical and bibliographical study of special areas in ancient history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7383. Research Seminar in Ancient History. 3 Hours.
(Formerly HIST 5383.) A research seminar for the production of a major research project in ancient history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7413. Reading Seminar in African History. 3 Hours.
(Formerly HIST 5413.) Historiographical and bibliographical study of selected periods and/or topics in African history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7423. Research Seminar in African History. 3 Hours.
(Formerly HIST 5423.) A seminar for the production of a major research project in selected fields of African history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7433. Reading Seminar in Caribbean History. 3 Hours.
(Formerly HIST 5433.) Historiographical and bibliographical study of special areas in Caribbean history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7443. Research Seminar in Caribbean History. 3 Hours.
(Formerly HIST 5443.) A research seminar for the production of a major research project in Caribbean history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7453. Reading Seminar in Global History. 3 Hours.
Graduate seminar adopting global perspectives on Europe, US, Asia, Africa, Latin America. Decentering narratives focusing on regional approaches, the course examines the global implications of various historical developments. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Horticulture (HORT)
Wayne Mackay
Department Head
316 Plant Sciences Building
479-575-2603
Email: mackay@uark.edu (mackay@uark.edu)
Department of Horticulture Website (http://Hort.uark.edu)

Degree Conferred:
M.S. in Horticulture (HORT)
Ph.D. in Agricultural, Food and Life Sciences with concentration in Horticulture (AFS)
Ph.D. in Plant Science (http://catalog.uark.edu/graduatecatalog/programsofstudy/plantsciencesptsc/) (PTSC)

The Department of Horticulture offers a thesis and non-thesis option for the M.S. degree. The non-thesis program was developed for continued and advanced education in horticulture management. The program is directed toward students entering careers in horticulture upon completion of the degree, or students requiring additional education for advancement in their careers.

Related doctoral programs are offered by the Dale Bumpers College of Agricultural, Food and Life Sciences, which offers a Ph.D. degree with a concentration in Horticulture, and by the Department of Plant Science, which offers a Ph.D. in plant science with concentrations available in horticulture or plant pathology.

Genetics and plant breeding of fruit, vegetable, or ornamental crops; physiology, management and production of fruit, vegetable, greenhouse, or ornamental crops and landscape plantings; physiology and management of turfgrasses; and biotechnology.

M.S. in Horticulture

Prerequisites to Master of Science Degree Program (Thesis Option): A candidate must have a B.S. degree from an accredited institution with a background in physical and biological sciences, horticulture, and supporting agricultural disciplines. The student will work with a major adviser, who will arrange a committee to evaluate the student's background and plan a program of study with the student.

Requirements for the Master of Science Degree (Thesis Option): A minimum of 24 semester hours of graduate level course work and 6 hours of thesis are required, in addition to any deficiency courses that may be specified. The student's advisory committee will also serve as the thesis and oral examination committee.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Prerequisites to Master of Science Degree Program (Non-thesis Option): Students seeking to pursue the non-thesis option must meet all admission criteria for the UA Graduate School. Applicants should have completed a B.S. or B.A. degree and have had course work in plant sciences, biology, botany, horticulture, or three years of experience in a plant science related career. Additionally, students seeking admission into the M.S. non-thesis option must submit three letters of reference regarding academic and professional experiences and potential. No professional examinations are required for admission.

Requirements for the Master of Science Degree (Non-thesis Option): A minimum of 30 hours of graduate course work as approved by the student's academic advising committee and within the requirements prescribed below. Specific Degree Requirements follow:

HORT 503V Special Problems Research 1-6
HORT 5001 Seminar 1
Nine hours of HORT courses 9
BIOL 4303 Plant Physiology 3
AGST 5023 Principles of Experimentation 3
or AGST 5014 Experimental Design

1. Horticulture Block – A minimum of 20-21 hours including:
2. Plant and Agricultural Science Block – A minimum of 8-9 hours including: Course work in BIOL, CSES, AGST, PLPA, PTSC, ENTO, AGEC, AGME, AGED, LARC, or HORT.
3. Students must pass a written and oral examination to be given by their advising committee upon completion of their course work and submission of special project.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

The Ph.D. program in plant science is an interdepartmental program involving the Departments of Horticulture and Plant Pathology. The dissertation and most of the course work may be completed in horticulture. Find out more in the Ph.D. requirements in Plant Science (http://catalog.uark.edu/graduatecatalog/programsofstudy/plantsciencesptsc/).
Requirements for Ph.D. in AFLS with Horticulture Concentration

Prerequisites to Degree Program: A Master of Science degree is desirable. A student with a Bachelor of Science and an exceptional record in academics and/or research may be approved for admission to the Ph.D. program in Agricultural, Food and Life Sciences if the Graduate Student Concentration Admissions Committee deems them qualified and approval is granted by the AFLSPH Steering Committee. A student admitted to the University of Arkansas, pursuing an M.S. and in good academic standing may apply to be admitted to the doctoral program and forgo completing the M.S. degree if so approved by the AFLSPH Steering Committee and the AFLSPH Graduate Concentration Admissions Committee. A minimum grade point average of 3.00 (on a 4.00 scale) on previous college-level course work is required.

Admissions Requirements for Entry: To be considered for admission, a student must submit a letter of intent, along with the application for admission indicating the desired degree concentration, areas of interest and career goals. Official transcripts of all previous college-level course work must be submitted. Three letters of recommendation are required. These letters should address the character and academic capability of the applicant. Applications will first be reviewed by the AFLSPH Steering Committee which will assign the student to the appropriate Graduate Student Concentration Admissions Committee for review. The Concentration Admissions Committee will make the final determination of admittance into the AFLSPH program and the concentration.

Requirements for Doctor of Philosophy Degree: The Ph.D. program in Agricultural, Food and Life Sciences requires a total of 72 credit hours after a Bachelor of Science or Bachelor of Arts degree or 42 hours after a Master of Science or Master of Arts degree.

General course requirements for each degree candidate are arranged on an individual basis by the Faculty Advisor, the Graduate Advisory Committee and the candidate in accordance with guidelines of their concentration. Alternate courses may be selected at the discretion of the committee.

All students must complete 6 hours of elective course hours and 2 hours of seminar. One seminar must be a research proposal presentation and the other must be an exit seminar presenting the dissertation research results. All students must complete 18 hours of doctoral dissertation hours. Students entering the doctoral program with only a B.S. or B.A. must also complete an additional 30 hours (to reach the 72 hour post B.S./B.A. requirement). Students must satisfactorily pass written and oral candidacy examinations covering their discipline and supporting areas. These examinations must be completed at least one year before completion of the Ph.D. degree program in Agricultural, Food and Life Sciences. Each candidate must complete a doctoral dissertation on an important research topic in the concentration field. The specific problem and subject of the dissertation is determined by the faculty adviser, the student and the Graduate Advisory Committee. A dissertation title must be submitted to the dean of the Graduate School at least one year before the dissertation defense. Provisional approval of the dissertation must be given by all members of the Graduate Advisory Committee prior to the dissertation defense. Students must pass the oral defense and examination of the dissertation given by the Graduate Advisory Committee. A student cannot be approved for conferment of the doctoral degree until after completion of all coursework, written and oral candidacy exams, the defense passed and dissertation accepted by the Graduate School and an application for the degree has been filed with the Registrar’s Office and the fee paid.

In addition to the general requirements for the Ph.D. program in Agricultural, Food and Life Sciences, students in the Horticulture concentration must complete 9 graduate-level credits of HORT courses.

Graduate Faculty

Carson, Janet B., M.S. (University of Arkansas), Associate Professor, 1992.
Clark, John R., Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Distinguished Professor, 1983.
Garcia, M. Elena, Ph.D., M.S. (University of Arkansas), B.A. (University of Arkansas at Little Rock), Professor, 2005.
Karcher, Douglas Edward, Ph.D., M.S. (Michigan State University), B.S. (The Ohio State University), Professor, 2000.
Lee, Jacquelyn A., Ph.D., M.S. (University of Arkansas), B.S. (Arkansas Technical University), Associate Professor, 2016.
Mackay, Wayne A., Ph.D. (University of Maryland), M.S. (University of Delaware), B.S. (Virginia Polytechnic Institute and State University), Professor, 2014.
McDonald, Garry Vernon, Ph.D., M.S., B.S.A. (Texas A&M University), Clinical Assistant Professor, 2016.
McWhirt, Amanda L., Ph.D. (North Carolina State University), M.S. (Louisiana State University), B.S. (Tarleton State University), Assistant Professor, 2016.
Richardson, Mike, Ph.D. (University of Georgia), M.S. (Louisiana State University), B.S. (Louisiana Tech University), Professor, 1998.
Robbins, James A., Ph.D. (University of California-Davis), M.S. (University of Georgia), B.S. (University of Wisconsin), Professor, 1998.
Rom, Curt R., Ph.D., M.S. (The Ohio State University), B.S. (University of Arkansas), University Professor, 1989.
Shi, Aionong, Ph.D. (North Carolina State University), M.S. (Graduate School of Chinese Academy of Agricultural Sciences), B.S. (Zhejiang University), Assistant Professor, 2013.
Worthington, Margaret L., Ph.D. (North Carolina State University), M.S. (University of California-Davis), B.S. (Duke University), Assistant Professor, 2016.

Courses

HORT 5001. Seminar. 1 Hour.
Review of scientific literature and oral reports on current research in horticulture. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

HORT 501V. Special Topics in Horticulture, Turf or Landscape. 1-6 Hour. (Formerly HORT 401V.) Topics related to horticulture, turfgrass or landscape science or management not covered in other courses or a more intensive study of a specific topic. Graduate degree credit will not be given for both HORT 401V and HORT 501V. (Typically offered: Irregular) May be repeated for degree credit.

HORT 502V. Horticulture Judging and Competition Activity. 1-6 Hour. (Formerly HORT 402V.) Training for and participation on horticultural identification, judging and competitive teams. Graduate degree credit will not be given for both HORT 402V and HORT 502V. Prerequisite: HORT 203. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HORT 503V. Special Problems Research. 1-6 Hour.
Original investigations on assigned problems in horticulture. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
HORT 5043. Advanced Plant Breeding. 3 Hours.
Application of genetic principles to the improvement of crop plants. Presentation of
conventional plant breeding methods and special techniques such as polyploidy,
interspecific hybridization and induced mutation. Lecture 3 hours per week.
Prerequisite: BIOL 2323 and BIOL 2321L or (ANSC 3123 and CSES 4103).
(Typically offered: Spring Odd Years)

HORT 5103. Plant Growth and Development. 3 Hours.
This course will focus on environmental and developmental processes of
plant growth and development. A student completing this course should have
an understanding of the developmental processes of plant growth and how
environmental factors interact to affect and control plant growth and development.
(Typically offered: Fall)

HORT 5113. Fruit Production Science and Technology. 3 Hours.
(Formerly HORT 4103.) The management technologies and cultural practices
of fruit crops including (but not limited to) blueberries, blackberries, raspberries,
strawberries, grapes, peaches, and apples will be presented. The underlying
scientific principles of crop genetics, nutrition, and physiology will be presented
as a basis for making management decisions in fruit crop productions. Graduate
degree credit will not be given for both HORT 4103 and HORT 5113. Corequisite:
Lab component. Prerequisite: HORT 2003. (Typically offered: Spring Odd Years)

HORT 5143. Professional Landscape Management. 3 Hours.
Principles and practices of landscape management and maintenance. Topics include
low maintenance and seasonal color design, pruning and hazard tree management,
water and fertilizer management, pesticide use, and other maintenance activities.
Basic elements of marketing, specifications and contracts, estimating, personnel
management, and equipment selection and acquisition relevant for landscape
services will be introduced. Preparatory training in agribusiness or business is
suggested. Prerequisite: HORT 2003 and HORT 3103. (Typically offered: Fall Odd Years)

HORT 5203. Temperature Stress Physiology. 3 Hours.
This course will teach students how to apply biological, chemical and physical
principles to models of how plants are damaged by temperature extremes and how
they change to increase resistance. Student will apply these principles to better
understand plant responses to other environmental challenges, including both biotic
and abiotic stresses. (Typically offered: Spring)

HORT 530V. Special Problems. 1-6 Hour.
(Formerly HORT 400V.) Original investigations on assigned problems in horticulture.
Graduate degree credit will not be given for both HORT 400V and HORT 530V.
(Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of
degree credit.

HORT 5333. Professional Landscape Installation and Construction. 3 Hours.
(Formerly HORT 4033.) Principles and practices involved in landscape installation
and construction. Topics covered include sequencing construction activities,
protecting existing trees, landscape soils, selecting plants, planting and transplanting
plant materials, wood construction, cement and masonry construction, and low-
voltage lighting. Lecture 3 hours per week. Preparatory training in agribusiness or
business is suggested. Graduate degree credit will not be given for both HORT 4033
and HORT 5333. Prerequisite: HORT 2003. (Typically offered: Fall Even Years)

HORT 5403. Plant Propagation. 3 Hours.
(Formerly HORT 4403.) Principles of plant propagation using seeds, cuttings,
grafting, budding, layering, and tissue culture. The physiological basis of propagation
is described. Knowledge of plant growth and physiology is needed. Lecture 2 hours,
laboratory 2 hours per week. Graduate degree credit will not be given for both
HORT 4403 and HORT 5403. Corequisite: Lab component. Prerequisite: BIOL 1613
and BIOL 1611L. (Typically offered: Spring)

HORT 5413. Horticulture Physiology. 3 Hours.
(Formerly HORT 4413.) This course provides students with a background into
the physiological processes of plants with an emphasis on horticultural crops and
how the processes relate to horticultural crop production practices. Among the
topics covered are photosynthesis, respiration, water relations and morphogenesis.
Graduate degree credit will not be given for both HORT 4413 and HORT 5413.
Prerequisite: HORT 2003 and CHEM 1073. (Typically offered: Spring)

HORT 5503. Sustainable Nursery Production. 3 Hours.
(Formerly HORT 4503.) This course addresses issues and practices involved in
production of quality woody nursery crops (e.g. trees and shrubs produced in open
field and containerized systems). Graduate degree credit will not be given for both
HORT 4503 and HORT 5503. (Typically offered: Spring Even Years)

HORT 5701L. Greenhouse Management and Controlled Environment
Horticulture Laboratory. 1 Hour.
(Formerly HORT 4701L.) Laboratory involving hands-on experiments designed to
demonstrate principles discussed in the lecture section. Includes field trips. Graduate
degree credit will not be given for both HORT 4701L and HORT 5701L. Corequisite:
HORT 5703. (Typically offered: Fall Odd Years)

HORT 5703. Greenhouse Management and Controlled Environment
Horticulture. 3 Hours.
(Formerly HORT 4703.) Operation and management of greenhouses and other
controlled environments used in horticultural production. Emphasis on system design
and construction, control of light intensity and photoperiod, heating and cooling
systems, substrates, mineral nutrition, water quality and irrigation systems. Graduate
degree credit will not be given for both HORT 4703 and HORT 5703. Prerequisite:
HORT 2003 and CHEM 1073. (Typically offered: Fall)

HORT 5801L. Greenhouse Crops Production Laboratory. 1 Hour.
(Formerly HORT 4801L.) Laboratory involving hands-on experiments designed to
demonstrate principles discussed in the lecture section. Includes field trips. Graduate
degree credit will not be given for both HORT 4801L and HORT 5801L. Corequisite:
HORT 5803. (Typically offered: Spring Even Years)

HORT 5803. Greenhouse Crops Production. 3 Hours.
(Formerly HORT 4803.) Principles and practices of production and marketing of
crops commonly grown in controlled environments including flowering containerized
herbaceous species, geophytes, annual and perennial bedding plants, hydroponic
vegetables and herbs. Graduate degree credit will not be given for both HORT 4803
and HORT 5803. Prerequisite: HORT 4703 or HORT 5703 (formerly HORT 4703).
(Typically offered: Spring Even Years)

HORT 5903. Golf and Sports Turf Management. 3 Hours.
(Formerly HORT 4903.) Turf management techniques for golf courses, and
athletic fields including species selection, root-zone construction and modification,
fertilization, mowing, irrigation and pest control. Graduate degree credit will not
be given for both HORT 4903 and HORT 5903. Corequisite: Lab component.
Prerequisite: CSES 2203 and CSES 2201L and (HORT 2303 or HORT 3403).
(Typically offered: Fall Odd Years)

HORT 5913. Rootzone Management for Golf and Sports Turf. 3 Hours.
(Formerly HORT 4913.) An overview of the fundamental concepts of the physical
and chemical properties of rootzones as related to construction and turfgrass
management. Graduate degree credit will not be given for both HORT 4913 and
HORT 5913. Prerequisite: HORT 2303. (Typically offered: Spring Odd Years)
Horticulture and Human Nutrition to Enhance Community Resilience and Food Security. 3 Hours.
This course covers three broad areas (Global Horticulture, Sustainable International Development, Human Health and Nutrition) and experts on three campuses created the instruction. The course is intended to be multi-disciplinary, and students should use their contextual knowledge to add to weekly discussions. Prerequisite: Graduate standing. (Typically offered: Spring)

M.S.H.E.S. in Human Environmental Studies

Prerequisites to Degree Program: Applicants are expected to have sufficient undergraduate preparation to be admitted to the program. An admissions committee that is appointed by the Director at the time an application for admission is received determines eligibility for admission to any of the program areas. The admissions committee specifies any deficiencies in admission requirements that must be met by students who are admitted.

Requirements for the Master of Science Degree: The School of Human Environmental Sciences requires that at least 50 percent of the course requirements be earned from courses at the 5000 or 6000 level. This degree allows for a thesis and non-thesis option. All students awarded a Graduate Assistantship are expected to complete the thesis option; students on AAES support are required to complete a thesis. The thesis option is also recommended for students who plan to continue their education beyond the Master of Science degree. There are three areas of concentration: Apparel Merchandising and Product Development; Food, Human Nutrition and Hospitality; and Human Development and Family Sciences.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Thesis Option: The thesis option requires a minimum of 30 semester hours. Of those 30 hours, six semester hours of thesis research are required and it is expected that at least 12 hours of course work originates within the area of concentration. Students must also take at least one course each in graduate statistics and research methods.

Non-thesis Option: The non-thesis option is available for students in any concentration who are pursuing their degree through distance education. Students may take any or all of their courses online. The non-thesis option requires a minimum of 33 semester hours of graduate level course work. It is expected that a minimum of 15 of the semester hours originate in the student’s area of concentration. Students must also take at least one course each in graduate statistics and research methods. Non-thesis track students are required to pass both written and oral comprehensive exams. Students are strongly encouraged to consult with their advisers and the program website for the sequencing and availability of distance education courses offered by the School of Human Environmental Sciences.

Graduate Faculty
Balasubramanian, Mahendran, Ph.D. (Oklahoma State University), M.S. (Auburn University), B.Tech. (Anna University), Assistant Professor, 2017.
Becnel, Jennifer N., Ph.D. (Arizona State University), M.A. (University of California-San Francisco), B.A. (San Diego State University), Assistant Professor, 2014.
Blalock, Lydia, Ph.D., M.S. B.G.S (Louisiana State University), Instructor, 2016.
Buckley, Nancy, M.S., B.S. (University of Arkansas), Instructor, 2014.
Cheramie, Lance M., Ph.D., M.S. (University of Arkansas), B.S. (Nicholls State University), Instructor, 2002.
Cho, Eunjoo, Ph.D. (Iowa State University), M.S., B.S. (Hanyang University, Seoul), Assistant Professor, 2013.
Fuller, Serena M., Ph.D. (University of California, Davis), Associate Professor, 2014.
Garrison, Mary Elizabeth, Ph.D., M.S. (Iowa State University), B.S. (Benedictine College), Professor, 2014.
Hamm, Cora, M.S. (New York University), Instructor, 2016.
Herold, Laura K., Ph.D., M.A. (University of Michigan), B.A. (Oberlin College), Clinical Assistant Professor, 2015.
Hubert, Stephanie K., M.S. (University of Arkansas), B.S. (Kansas State University), Instructor, 2015.
Killian, Timothy Scott, Ph.D. (University of Missouri-Columbia), M.A. (Wheaton College), B.A. (Central Bible College), Associate Professor, 2001.
Moon, Zola, Ph.D., M.A. (University of Arkansas), B.A. (Hendrix College), Clinical Associate Professor, 2001.
Mosley, Jacquelyn Dee, Ph.D. (Texas Tech University), M.S. (Arizona State University), B.A. (University of Northern Iowa), Associate Professor, 2010.
Moxley, Shari Coleman, Ph.D. (University of North Carolina), Instructor, 2013.
O’Brien, Catherine, Ph.D. (University of Illinois, Chicago), M.P.H. (San Diego State University), M.A. (University of California, San Diego), B.S.Ed. (University of Wisconsin, Madison), Instructor, 2016.
Smith, Kathy, Ed.D., M.S. (University of Arkansas), B.S. (The Ohio State University), Clinical Associate Professor, 1999.
Southward, Cheryl Leigh, Ph.D., M.S., B.S. (University of Tennessee), Associate Professor, 2008.
Traywick, La Vona, Ph.D. (University of Kentucky), Associate Professor, 2007.
Trudo, Sabrina P., Ph.D. (University of Washington), B.S. (Brigham Young University), Associate Professor, 2015.
Way, Kelly Ann, Ph.D., M.S., B.S. (Oklahoma State University), Associate Professor, 2006.

Apparel Merchandising and Product Development Courses

AMPD 5003. Apparel Sourcing and Merchandising Systems in the Global Economy. 3 Hours.
Evaluation of key issues facing textiles and apparel supply chain businesses in the global economy considering economic, political, and social perspectives and professional implications. Lecture 3 hours. (Typically offered: Fall Odd Years)

AMPD 5023. Social, Psychological and Cultural Aspects of Dress. 3 Hours.
Integration of social, psychological and cultural theories as they apply to appearance and clothing behavior. Lecture 3 hours. (Typically offered: Fall Odd Years)

AMPD 5033. Issues and Trends in Textile Studies. 3 Hours.
Studies of advances in textile science and recent developments in the textile industry. Lecture 3 hours. (Typically offered: Spring Odd Years)

AMPD 5043. Theories and Practices in Apparel Merchandising. 3 Hours.
Theoretical perspectives, concepts and current practices that influence apparel merchandising. Lecture 3 hours. (Typically offered: Spring Even Years)

AMPD 5053. Survey Design and Scale Development. 3 Hours.
This course is designed to provide the expertise required to design and conduct survey research. Students will understand the instruments (scales/questionnaire) used in data collection processes and acquire the statistical skills necessary to develop and test these survey instruments. This course uses both theory and practice. Hands-on training will be provided via SPSS package for data analyses, and Qualtrics will be used for web-based surveys. Prerequisite: 3 hours of graduate-level statistics coursework and HESC 5463 or AGED 5463 or instructor consent. (Typically offered: Spring)

AMPD 5063. Advanced Apparel Production. 3 Hours.
(Formerly AMPD 4063.) An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Graduate degree credit will not be given for both AMPD 4063 and AMPD 5263. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 3003. (Typically offered: Fall and Spring)

AMPD 5093. Apparel Merchandise Planning and Inventory Control. 3 Hours.
(Formerly AMPD 4093.) Describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Follows the evolution of the merchandising function with emphasis on production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, store design, marketing, the apparel supply chain and manufacturing functions along the way. Graduate degree credit will not be given for both AMPD 4093 and AMPD 5293. Prerequisite: AMPD 3033. (Typically offered: Fall and Spring)

AMPD 5103. Evolution of Fashion and Society Through Television Media. 3 Hours.
(Formerly AMPD 4103.) This course uses television programming from its early beginnings in the 1930s through to the twenty-first century to trace major events, societal changes, and the associated evolution of fashion. The course examines television both as an innovator and diffuser of fashion trends. Graduate degree credit will not be given for both AMPD 4103 and AMPD 5103. (Typically offered: Fall and Spring)

AMPD 5111. History of Apparel Through Film from 1900 to Present. 1 Hour.
(Formerly AMPD 4111.) This course uses historic costume films to trace the evolution of clothing from 1900 to Present. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web based course. Graduate degree credit will not be given for both AMPD 4111 and AMPD 5311. (Typically offered: Fall and Spring)

AMPD 5211. History of Apparel Through Film to 1900. 1 Hour.
(Formerly AMPD 4101.) This course uses historic costume films to trace the evolution of clothing from ancient Egypt to the Twentieth Century. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web-based course. Graduate degree credit will not be given for both AMPD 4101 and AMPD 5211. (Typically offered: Fall and Spring)

AMPD 5223. Merchandising Application for the Apparel Industry. 3 Hours.
(Formerly AMPD 4023.) Application of merchandising theory, principles and practices in a capstone class. An in-depth study of innovative apparel business concepts as applied to manufacturers and retailers of apparel including apparel classification, seasonal cycles, stock emphasis, assortment strategies, target customers, and apparel trends. Includes an overview of marketing communication including advertising, personal selling, and sales promotion. Graduate degree credit will not be given for both AMPD 4023 and AMPD 5223. Prerequisite: AMPD 3033 and AMPD 3043. (Typically offered: Fall and Spring)

AMPD 5233L. Computer Aided Textile Design. 3 Hours.
(Formerly AMPD 4033.) This course is designed to give students advanced skills in textile design using industry based computer aided design (CAD) software. Lab 4 hours per week. Graduate degree credit will not be given for both AMPD 4033L and AMPD 5233L. Prerequisite: AMPD 2033 and AMPD 2053. (Typically offered: Fall and Spring)

AMPD 5253. Historic and Contemporary Apparel. 3 Hours.
(Formerly AMPD 4053.) This course traces the evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization and includes the study of contemporary fashion as a social force including the origin, scope, theory, and history of the fashion business, the materials of fashion, the fashion producers, auxiliary fashion enterprises, designers, fashion leaders, and leading market. Cultural and economic factors affecting dress, adornment and customs associated dress will be stressed. The Lecture 3 hours per week. Graduate degree credit will not be given for both AMPD 4053 and AMPD 5253. (Typically offered: Fall and Spring)
Hospitality Courses

HOSP 5633. Hospitality Operations and Financial Analysis. 3 Hours.
In-depth comprehensive study, strategic planning and analysis of the manager's role in successful hotel operations including application of human resource management skills. Emphasis will be placed on strategic decision making, operating procedures, budgeting, financial analysis, problem solving skills, and the technical skills necessary for effective hospitality operations. (Typically offered: Spring)

HOSP 5643. Meetings and Convention Management. 3 Hours.
Focuses on the planning and management of meetings and conventions in the hospitality industry. (Typically offered: Fall)

HOSP 5653. Global Travel and Tourism Management. 3 Hours.
The course recounts the history of travel, explores the future, and discusses the components of tourism from a global perspective. (Typically offered: Spring)

HOSP 5663. Critical Issues and Trends in Hospitality and Tourism. 3 Hours.
The hospitality industry is arguably one of the most important sources of income and foreign exchange and is growing rapidly. However, national and international crises have huge negative economic consequences. This course explores change in the world and applies this to forecasting change in the hospitality and tourism industries. This course examines the current state of the industry and makes educated predictions to the future of the lodging, cruise, restaurant, technology, and travel and tourism industries. (Typically offered: Spring)

HOSP 5673. Destination Marketing and Operations. 3 Hours.
This course is designed to provide students with a basic understanding of the tasks and processes involved in running a successful destination of management organization (DMO). This course places heavy emphasis on destination marketing. Prerequisite: HOSP 1603. (Typically offered: Spring)

HOSP 5683. Food and Wine Management, Service and Evaluation. 3 Hours.
This course provides students with knowledge of the sensory relationship of wine and food and the important role this process has on gastronomic satisfaction and gastronomic tourism. Course topics will include developing and marketing the wine/food tourism product, wine and food pairing as a hierarchical process, gastronomic identity, Old and New World traditions, managing a food and wine program, trends in food and wine, and promoting Arkansas food and wine. Students must be at least 21 years old. Students are required to complete an alcohol compliance education program prior to taking course. Students who may not imbibe for any reason should speak with the instructor about an accommodation and alternative assignments. Prerequisite: HOSP graduate students only and instructor consent required. (Typically offered: Fall)

HOSP 5693. Hospitality Management Internship. 3 Hours.
Supervised experience in an instructor approved work/learning situation relating to the hospitality industry in multiple aspects of a hospitality organization. Emphasis on application of knowledge and skills to actual job roles and responsibilities. Requires employment in a hospitality setting for a minimum of 250 clock hours. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer)

Human Environmental Sciences Courses

HESC 500V. Special Problems. 1-6 Hour.
(Formerly HESC 400V.) Special problems. Graduate degree credit will not be given for both HESC 400V and HESC 500V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HESC 502V. Special Problems Research. 1-6 Hour.
Individual study or research for graduates in the field of human environmental sciences. (Typically offered: Fall, Spring and Summer)

HESC 5111. Introduction to Graduate Program. 1 Hour.
Overview of graduate program in the School of Human Environmental Sciences. 1 hour. Topics include master's program requirements; graduate student responsibilities; timetable for academic year; forms and deadlines; scheduling and time management; library searches; fundamentals of writing literature reviews; quantitative, qualitative, and mixed research methods; secondary data analyses; and tips for research presentations. Prerequisite: Departmental Consent. (Typically offered: Fall)

HESC 5211. Professional Development. 1 Hour.
Discussion of current literature and research. 1 hour. Topics include diverse research topics and methods in Human Environmental Sciences, professional development, and career opportunities in academia and industry. Prerequisite: HESC 5111 or Departmental Consent. (Typically offered: Fall)

HESC 5233. Childhood Obesity: Context and Preventions. 3 Hours.
A multidisciplinary course that focuses on the context and prevention of childhood obesity. Directed readings and discussion will center on an ecological approach: identifying the problem(s) and behavioral and environmental factors and their interactions, as well as predisposing, enabling, and reinforcing factors, and action plan(s). The issue is addressed from a multidisciplinary perspective, including economics, marketing, child development, nutrition, and health behavior. (Typically offered: Summer)

HESC 5463. Research Methodology in Social Sciences. 3 Hours.
Logical structure and the method of science. Basic elements of research design; observation, measurement, analytic method, interpretation, verification, presentation of results. Applications to research in the economic and sociological problems of agriculture and Human Environmental Sciences. Prerequisite: Graduate standing. (Typically offered: Fall)
This course is cross-listed with AGED 5463.

HESC 555V. Special Topics in Human Environmental Sciences. 1-3 Hour.
Topics not covered in other courses or a more intensive study of specific topics in the specializations of human environmental sciences. (Typically offered: Irregular)
HESC 600V. Master's Thesis. 1-6 Hour.  
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

HESC 700V. Doctoral Dissertation. 1-18 Hour.  
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

**Nutrition Courses**

NUTR 5113. Advanced Nutrition. 3 Hours.  
(Formerly NUTR 4213.) Normal nutrition with emphasis on utilization of nutrients, Lecture and reports on current literature 3 hours per week. Graduate degree credit will not be given for both NUTR 4213 and NUTR 5113. Prerequisite: CHEM 3813 and NUTR 3203. (Typically offered: Fall)

NUTR 521V. Readings in Nutrition. 1-6 Hour.  
Seminar and individual study. Prerequisite: Instructor consent. (Typically offered: Irregular)

NUTR 5223. Nutrition During the Life Cycle. 3 Hours.  
Study of normal nutrition emphasizing quantitative needs for nutrients as functions of biologic processes that vary during stages of the life cycle. Nutritive needs during pregnancy and childhood are emphasized with some attention to nourishing aging and elderly adults. Factors that affect food choices and eating behavior are also considered. Lecture 3 hours per week. On campus and web-based delivery is offered. Prerequisite: Graduate standing and consent of instructor. (Typically offered: Fall)

NUTR 5243. Community Nutrition. 3 Hours.  
(Formerly NUTR 4243.) Identifying, assessing, and developing solutions for nutritional problems encountered at the local, state, federal, and international levels. Lecture 3 hours per week. Graduate degree credit will not be given for both NUTR 4243 and NUTR 5243. (Typically offered: Spring)

NUTR 5263. Medical Nutrition Therapy I. 3 Hours.  
Principles of medical nutrition therapy with emphasis on Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Lecture 3 hours per week. Prerequisite: Graduate standing and consent of instructor. (Typically offered: Fall)

NUTR 5273. Medical Nutrition Therapy II. 3 Hours.  
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Lecture 3 hours per week. Prerequisite: NUTR 5263. (Typically offered: Spring)

Email: vmdieffe@uark.edu

**Degrees Offered:**  
M.Ed. in Human Resource and Workforce Development Education  
Ed.D. in Human Resource and Workforce Development Education

Both the master's degree and the doctoral degree are offered online. For more information about the online offerings, visit the Global Campus descriptions of the Master of Education program (http://online.uark.edu/programs/master-education-human-resource-workforce-development-education.html) or the Doctor of Education program (http://online.uark.edu/programs/doctor-education-human-resource-workforce-development-education.html).

**Program Description:** The Human Resource and Workforce Development Education program prepares scholar/practitioners to be educators, managers, and consultants in academic, public, and private settings. This program focuses on human resource and workforce development (HRD) theory and best practices. The core values are excellence, intellectual freedom, integrity, service, learning, diversity and stewardship. The M.Ed. program is a 33-hour non-thesis online program. The Ed.D. program offers a Doctor of Education degree in Human Resource and Workforce Development Education. This program is designed for students who seek leadership careers in education, business, or industry settings. The Ed.D. program is a 96-hour online program.

**M.Ed. in Human Resource and Workforce Development Education**

**Admission Requirements for the Master of Education Degree Program:** All candidates who seek admission to the program must submit an application for admission and an application fee to the Graduate School. Applicants must meet all Graduate School requirements for admission with the exception of standardized tests. A minimum grade-point average (GPA) of 3.0 on the last 60 hours of attempted course work prior to the receipt of the baccalaureate degree from a regionally accredited institution is required for admission into the program.

**Requirements for the Master of Education (M.Ed.) Degree:** The student's program of study consists of the requirements listed below. Graduation requirements include (1) completing 33 semester hours (no thesis) with a minimum cumulative GPA of 3.0 (six hours may be transferred in but will not be calculated into the GPA); and (2) passing a Capstone Course in the final academic semester.

Required Core for Human Resource and Workforce Development Education – 21 hours

Human Resource and Workforce Development Education (HRWD)

HRWD 5323  International HRWD
HRWD 5333  HRWD Technological Resources

Supplemental Courses
HRWD 571V Independent Study
HRWD 572V Workshop
HRWD 573V Experiential Learning

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Ed.D. in Human Resource and Workforce Development Education

Admission Requirements for the Doctor of Education (Ed.D.) Degree Program: Applicants may obtain detailed instructions for application to the program at the Global Campus website (http://wded.uark.edu/4529.htm). You may also email RHRCgrad@uark.edu with questions about the admissions process. The Human Resource and Workforce Development Education faculty considers the following factors important in determining admission to the program:

1. Demonstration of interest in a career in human resource and workforce development education through an interview with the department’s admissions committee.
2. Evidence of potential to contribute to the advancement of the field of workforce development education through research and professional leadership.
3. Previous work experience.
4. Commitment to an online delivery program.
5. Graduate grade point average
6. Old Graduate Record Examination Score: 1000 combined scores of verbal and quantitative, and a 4.0 on analytical writing.
7. New Graduate Record Examination Score: Verbal – 153; Quantitative – 150; and a 4.0 on analytical writing. Scores are valid for five years.

In addition to meeting university requirements for admission to the Graduate School (https://graduate-and-international.uark.edu/graduate/future-students/), applicants must apply to the Human Resource and Workforce Development Education program by submitting an application for admission specific to the Ed.D program in Human Resource and Workforce Development Education, an autobiographical sketch, and a resume via email to RHRCgrad@uark.edu.

Requirements for the Ed.D. Degree in Human Resource and Workforce Development Education: Candidates for the Doctor of Education Degree in Human Resource and Workforce Development Education must complete a minimum of 96 total semester hours of graduate study.

Human Resource and Workforce Development Education:

Research and Statistics – 33 hours (including 18 dissertation hours)

ESRM 6403  Educational Statistics and Data Processing  3
HRWD 6313  Project and Program Evaluation  3
HRWD 6323  Qualitative Research Design and Analysis  3
HRWD 6333  Quantitative Research Design and Analysis  3
HRWD 6343  Principles and Techniques of Research in HRWD  3
HRWD 700V  Doctoral Dissertation  18

Human Resource and Workforce Development Education Core – 24 hours

Career Development Pillar
HRWD 5113  Foundations of Human Resource & Workforce Development  3
HRWD 6413  Career Theory and Decision Making  3

Organizational Pillar
HRWD 6513  Organization Development  3
HRWD 6523  Leadership Models and Concepts  3
HRWD 6533  HRWD Ethical and Legal Issues  3

Training and Development Pillar
HRWD 6613  Learning and Teaching Theories  3
HRWD 6633  Technology Systems in Human Resource and Workforce Development  3
HRWD 6713  HRWD Curriculum Design  3

Electives
HRWD 6423  Practicum
HRWD 6723  Entrepreneurial Development
HRWD 6643  History and Foundations of HRWD

Any University of Arkansas HRWD master's course excluding the Supplement Courses

Or other courses approved by committee

A minimum grade point average of at least 3.25 on all course work presented as part of the degree program. No graduate degree credit will be granted for any course grade below "C."

Satisfactory completion of all requirements governing the written and oral candidacy examinations, the dissertation, and the final oral dissertation defense.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Hughes, Claretha, Ph.D. (Virginia Polytechnic Institute and State University), M.S. (North Carolina State University), M.B.A. (University of Arkansas), B.A. (Clemson University), Professor, 2004.

Courses
HRWD 5113. Foundations of Human Resource & Workforce Development. 3 Hours.
An overview of human resource and workforce development (HRWD) in organizations. Focus on the integration of training and development, career development, and organization development. Topics include strategic planning for human resource and workforce development, needs assessment, program development, application of workplace learning theories, career development theories and methods, and application of organization learning theories. (Typically offered: Fall, Spring and Summer)

HRWD 5123. Career Transitions. 3 Hours.
This advanced level course is intended for career development professionals and/or subject-matter experts interested in improving their career development skills within a structured or unstructured learning environment. The emphasis in this course is on gaining career development techniques and planning formal and informal career development strategies for the individual or the organization. (Typically offered: Spring)

HRWD 5133. HRWD Diversity Issues. 3 Hours.
This course emphasis is on current trends and case studies of diversity in the workplace. Prerequisite: Graduate standing. (Typically offered: Fall)
HRWD 5213. Organizational Analysis. 3 Hours.
This course introduces the analysis process in organizations. The instruction and activities will enable students to develop skills in conducting organizational needs analysis (OA) as a basis for performance improvement in the workplace. (Typically offered: Spring and Summer)

HRWD 5223. Strategic Human Resource and Workforce Development Education. 3 Hours.
A comprehensive examination of the issues, topics, principles, theories, philosophies and concepts facing tomorrow's HRD professionals. Includes the transformation of strategic HRD; the role of strategic HRD leaders as change agents; the principles of strategic HRD; professional practice do mains of strategic HRD; organizational learning, performance, and change; and analysis, design, and evaluation of HIP interventions. Students will identify practices for informing decisions related to the formation of strategic HRD planning and implementation efforts. (Typically offered: Fall)

HRWD 5233. HRWD Employment, Legal, and Ethical Issues. 3 Hours.
This course focuses on employment, legal and ethical issues within the workplace. Students will gain knowledge that should enable them to be effective in understanding current employment concerns, equal employment opportunity (EEO) laws, and ethical practices within the workplace and how these employment concerns, laws, and practices impact society. (Typically offered: Spring)

HRWD 5313. Facilitating Learning in the Workplace. 3 Hours.
Facilitation of learning and performance improvement in the workplace. Application of instructional methods, formal and informal learning strategies, coaching, team building, and formal and informal on-the-job learning tactics. Focus on facilitating individual and group learning to affect organizational change. (Typically offered: Spring)

HRWD 5323. International HRWD. 3 Hours.
Exploration of how globalization and culture affect the workplace and the human resource development profession. Difference between global HRD and HRD practiced in a single country. Impact of culture on every aspect of HRD implementation and practice. Examination of HRD practices in different regions of the world. (Typically offered: Fall)

HRWD 5333. HRWD Technological Resources. 3 Hours.
This course provides students with the tools and abilities to evaluate and understand technology resources used in HRWD. Primary course elements are instructional design characteristics of technology, theoretical and practical uses of technology resources to facilitate and manage learning, and selecting the best or most appropriate technological resources. The course uses online technologies and learning experiences. (Typically offered: Fall)

HRWD 5433. HRWD Capstone. 3 Hours.
This course is the final course for the degree in Human Resource and Workforce Development. Students will be assessed on their overall knowledge and understanding of the field. The focus of this course will be research and analysis of classic works and current trends. Prereq. or Corequisite: 27 MED credit hours completed. (Typically offered: Fall, Spring and Summer)

HRWD 571V. Independent Study. 1-3 Hour.
Independent study. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

HRWD 572V. Workshop. 1-3 Hour.
Workshop. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

HRWD 573V. Experiential Learning. 1-18 Hour.
This course is designed for the student to attain paid or unpaid experiential development. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

HRWD 6313. Project and Program Evaluation. 3 Hours.
This course is a doctoral level course designed as an introduction to project and program evaluation in human resource and workforce development. Emphasis is on (a) project design and development, (b) program development and improvement, and (c) the integration of evaluation with strategic planning and performance improvement. (Typically offered: Spring Even Years)

HRWD 6323. Qualitative Research Design and Analysis. 3 Hours.
This course is designed to introduce HRWD students to qualitative research design, data collection and data analysis. Course content includes data collection through interviews, field observation, records research, ethical issues associated with conducting research in organizational settings, and internal and external validity problems. Prerequisite: ESRM 5013 and ESRM 6403. (Typically offered: Spring Even Years)

HRWD 6333. Quantitative Research Design and Analysis. 3 Hours.
This course provides HRWD students with the tools and abilities to design and implement an original research project using quantitative measures. Primary course elements are research design application, theoretical settings of research, and nesting research within an appropriate literature base. The course uses online technologies and on-campus learning experiences. Prerequisite: ESRM 5013 and ESRM 6403. (Typically offered: Fall Even Years)

HRWD 6343. Principles and Techniques of Research in HRWD. 3 Hours.
This course addresses the principles and techniques underlying organizational research, both experimental and non-experimental. It covers the basic philosophy of science and research methods and gives attention to the practical problems of design, data collection sampling, and data analysis. Prerequisite: ESRM 5013 and ESRM 6403. (Typically offered: Fall Even Years)

HRWD 6413. Career Theory and Decision Making. 3 Hours.
This course focuses on comprehensive understanding of career theory and decision making to enhance career development that emphasizes technology, cross-cultural issues, practical application, and the global economy. Career development in both the private and public sectors will be explored. Students will gain knowledge that should enable them to be effective in developing their careers and those of others using multicultural considerations and a global perspective. (Typically offered: Fall)

HRWD 6423. Practicum. 3 Hours.
Practicum is designed to allow doctoral students in workforce development education an opportunity to apply the theoretical knowledge, skills and abilities to training, teaching, or research projects. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HRWD 6513. Organization Development. 3 Hours.
This course teaches development of organization activities that intervene in the interaction of people systems to increase the effectiveness of using a variety of applied behavioral sciences. It includes the dynamics of organizations, the genesis of organizational theory and evolution of organizational dynamics, including examination of system structure, chaos theory, group dynamics and interaction, leadership theories, diversity issues impacting organizations, and techniques of change agent intervention. (Typically offered: Summer Odd Years)

HRWD 6523. Leadership Models and Concepts. 3 Hours.
This doctoral course concentrates on using commonly accepted principles of leadership to develop skills needed in workforce development education settings. (Typically offered: Fall Odd Years)

HRWD 6533. HRWD Ethical and Legal Issues. 3 Hours.
Focuses on ethical and legal issues within the workplace and behavioral science research. Students gain knowledge that should enable them to be effective in understanding ethical and legal issues within their workplace and how they can impact society. (Typically offered: Fall)

HRWD 6613. Learning and Teaching Theories. 3 Hours.
Models and philosophies of important theorists in the field of teaching and learning. (Typically offered: Spring Odd Years)
HRWD 6643. History and Foundations of HRWD. 3 Hours.
This course focuses on the history of human resource development as a practice and a profession. Particular emphasis in this course is placed on the influence of philosophy on developing HRD theory and practice. As students progress through this course they can expect to gain greater understanding of how HRD developed as a profession, the historical root of its theory and practice, and an understanding of how to evaluate the philosophical assumptions of current HRD theory and practice. (Typically offered: Summer)

HRWD 6723. Entrepreneurial Development. 3 Hours.
An advanced graduate-level course examining the history, economics, theory and practice of developing Entrepreneurial enterprises. This course presents an overview of the business and organizational systems with which an entrepreneur should be familiar. (Typically offered: Irregular)

HRWD 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Industrial Engineering (INEG)

Haitao Liao
Graduate Coordinator
4207 Bell Engineering Center
479-575-6196
Email: liao@uark.edu

Department of Industrial Engineering website (http://industrial-engineering.uark.edu)

Degrees Conferred:
M.S.I.E. (INEG)
M.S.O.M. (OPMG) (See Operations Management (p. 266))
Ph.D. in Engineering (INEG) (See also Engineering (p. 162))

Graduate Certificates Offered:
Homeland Security (non-degree) (OMHS)

Program Description: A critical component of all graduate-level work is scholarly activity through the completion of substantive research. These activities take place through the completion of doctoral dissertations, master’s theses, and master’s research projects. The department encourages the completion of master’s theses, particularly for those students holding assistantship appointments. Research areas of concentration at both the master’s and doctoral levels include the following: artificial intelligence/expert systems, computer assisted processes, computer integrated manufacturing, financial engineering, engineering administration, facilities analysis/design, human factors/ergonomics, manufacturing automation/robotics, material handling, operations research, productivity measurement/analysis, production control/scheduling, quality control/reliability, and health care/transportation logistics.

Primary Areas of Faculty Research: Automation and robotics; economic decision analysis; electronics manufacturing; engineering and quality management; ergonomics, human factors and safety; health care; manufacturing and transportation logistics; material handling and warehousing systems; operations research; quality, reliability, maintainability; and scheduling.

M.S.I.E. in Industrial Engineering

Application to the Graduate Program: Follow the procedures outlined by the Graduate School. To receive full consideration for assistantships and other financial aid, applications must be received before February 1.

Prerequisites to the M.S.I.E. Degree Program:
1. There are no prerequisites for students with an undergraduate degree from an ABET-accredited industrial engineering program.
2. For students with a degree other than an ABET-accredited industrial engineering degree, prerequisite courses may be required.

Requirements for the Master of Science in Industrial Engineering Degree: In addition to the requirements of the Graduate School, the following departmental requirements must be satisfied by candidates for the M.S.I.E. degree:
1. Candidates who present a thesis are required to complete a minimum of 24 graduate credit hours plus six hours of INEG 600V Master’s Thesis.
2. Candidates who present a project are required to complete a minimum of 27 graduate credit hours plus three hours of INEG 513V Master’s Research Project and Report.
3. Candidates who do not present either a thesis or project are required to complete 30 semester hours of course work.
4. Candidates must successfully complete a master’s oral examination that is conducted by the candidate’s committee.
5. Courses Taken for Graduate Credit: A limited number of 4000-level courses may be taken for graduate credit.
6. Attendance at INEG graduate seminar is required of all graduate students in Industrial Engineering.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Ph.D. in Industrial Engineering

Application to the Graduate Program: Follow the procedures outlined by the Graduate School. To receive full consideration for assistantships and other financial aid, applications must be received before February 1.

In addition to the requirements of the Graduate School and those established by the College of Engineering for all doctoral graduates, the following requirements have been established for INEG doctoral graduates:
1. A minimum of 72 semester hours of graduate-level credit beyond the bachelor’s degree.
2. A minimum of 42 semester hours of graduate-level credit beyond the master's degree of which a minimum of 21 semester hours shall be approved graduate level courses and a minimum of 21 semester hours of dissertation hours (INEG 700V).

3. Students admitted with a B.S. degree must complete their initial 30 semester hours out of the 72 total at the 5000-level or above, with the remaining 42 semester hours subject to the rule stated in paragraph 2 above.

4. Ph.D. students in Industrial Engineering must pass a Qualifier Exam over a subset of topics in Industrial Engineering determined by the student's Doctoral Advisory Committee. Students may fail the exam once and retake it. Students who fail the exam twice will be dismissed from the Ph.D. program.

**Graduate Faculty**

**Cassady, Richard**, Ph.D., M.S.I.S.E., B.S.I.S.E. (Virginia Polytechnic Institute and State University), Professor, 2000.

**Chaoavilaiwongse, Wanpracha Art**, Ph.D., M.S. (University of Florida), B.Eng. (King Mongkut Institute of Technology, Ladkrabang, Thailand), Professor, 2016.

**Chimka, Justin Robert**, Ph.D., M.S.I.E., B.S.I.E. (University of Pittsburgh), Associate Professor, 2002.

**Liao, Haitao**, Ph.D., M.S., M.S.I.S.E. (Rutgers University), B.S.E.E. (Beijing Institute of Technology), Professor, 2015.

**Liu, Xiao**, Ph.D. (National University of Singapore), B.S.M.E. (Harbin Institute of Technology, China), Assistant Professor, 2017.

**Milburn, Ashlea R.**, Ph.D. (Georgia Institute of Technology). M.S.I.E. (Virginia Polytechnic Institute and State University), B.S.I.E. (University of Arkansas), Associate Professor, 2010.

**Nurre, Sarah**, Ph.D., M.Eng., B.S. (Rensselaer Polytechnic Institute), Assistant Professor, 2015.

**Parnell, Gregory S.**, Ph.D. (Stanford University), M.S. (University of Southern California), M.E.I.S.E. (University of Florida), B.S. (University of New York at Buffalo), Research Professor, 2013.

**Pierson, Harry A.**, Ph.D. (The Ohio State University), M.S.E.M., B.S.M.E. (University of Missouri, Rolla), Assistant Professor, 2014.

**Pohl, Letitia**, Ph.D. (University of Arkansas), M.S.S.E. (Air Force Institute of Technology), B.S.M.E. (Tulane University), Clinical Assistant Professor, 2013.

**Rainwater, Chase E.**, Ph.D. (University of Florida), B.S.I.E. (University of Arkansas), Associate Professor, 2009.

**Rossetti, Manuel D.**, Ph.D., P.E., M.S.I.S. (The Ohio State University), B.S.I.E. (University of Cincinnati), Professor, 1999.

**Sullivan, Kelly M.**, Ph.D. (University of Florida), M.S.I.E., B.S.I.E. (University of Arkansas), Assistant Professor, 2012.

**White, John A.**, Ph.D. (The Ohio State University), M.S.I.E. (Virginia Polytech Institute and State University), B.S.I.E. (University of Arkansas), Distinguished Professor, 1997.

**Zhang, Shengfan**, Ph.D., M.I.E. (North Carolina State University), B.M. (Fudan University, Shanghai), Assistant Professor, 2011.

**Courses**

**INEG 5123. Industrial Engineering in the Service Sector. 3 Hours.**

Review of the development of industrial engineering into the service sector, e.g., health care systems, banking, municipal services, utilities, and postal service. Emphasizes those principles and methodologies applicable to the solutions of problems within the service industries. Prerequisite: Graduate standing. (Typically offered: Irregular)

This course is cross-listed with OMGT 5133.

**INEG 513V. Master’s Research Project and Report. 1-6 Hour.**

Required course for students electing the report option. (Typically offered: Fall, Spring and Summer)

**INEG 514V. Special Topics in Industrial Engineering. 1-3 Hour.**

Consideration of current industrial engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

**INEG 515V. Individual Study in Industrial Engineering. 1-3 Hour.**

Opportunity for individual study of advanced subjects related to a graduate industrial engineering program to suit individual requirements. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

**INEG 5163. Introduction to Modern Statistical Techniques for Industrial Applications. 3 Hours.**

This application-oriented course is driven by real problems arising from industry and focuses on problem solving using both modern and classic statistical methods. For both senior undergraduate and graduate students, the main goal of this course is to provide a comprehensive introduction to those most popular statistical learning methods and tools (such as R and Apache Spark) which are widely used in industry today. For graduate students, this course will also cover the fundamental theory behind some of the methodologies. Students will not receive credit for both INEG 4103 and INEG 5103. Prerequisite: INEG 2333. (Typically offered: Spring)

**INEG 5243. Automated Manufacturing. 3 Hours.**

Introduction to manufacturing processes and concurrent engineering in the electronics industry. Survey of electronics components and products and the processes of fabrication and assembly. Principles of design, productivity, quality, and economics. Emphasis on manufacturability. (Typically offered: Irregular)

**INEG 5253. Leadership Principles and Practices. 3 Hours.**

The course is designed to expose students to multiple approaches to leadership in a wide variety of settings. Leadership styles, the knowledge areas and competencies expected of today’s leaders, the challenges leaders face, the historical and philosophical foundations of leadership, the relationships among leadership theory, leadership practice, and the moral-ethical aspects of leadership are among the topics covered in the course. A number of respected regional, national, and international leaders share “lessons learned” in their leadership journeys. Plus, a number of highly regarded leadership books and case studies on leadership are read and discussed. Students may not receive credit for INEG 4253 and INEG 5253/OMGT 5253. (Typically offered: Fall)

This course is cross-listed with OMGT 5253.

**INEG 5263. Engineering Statistics. 3 Hours.**

A graduate level engineering statistics course covering functions of random variables, properties and distributions of random samples, theory of statistical inference, and rationales of testing hypotheses and constructing confidence intervals. Prerequisite: MATH 2574 and INEG 2313. (Typically offered: Fall)

**INEG 5313. Engineering Applications of Probability Theory. 3 Hours.**

Introduction to probability, discrete random variables, continuous random variables, multiple random variables, sequences of Bernoulli trials. Applications of these topics from inventory, reliability, quality control. (Typically offered: Fall)
INEG 5323. Engineering Applications of Stochastic Processes. 3 Hours.
Renewal processes, Poisson processes, discrete-time Markov chains, continuous-
time Markov chains. Applications of these topics from inventory, reliability, quality
control, queuing. (Typically offered: Spring)

INEG 5333. Design of Industrial Experiments. 3 Hours.
Statistical analysis as applied to problems and experiments in engineering and
industrial research; experiment design and analysis; probability; and response
surface analysis. Prerequisite: INEG 2313 or equivalent. (Typically offered: Irregular)

INEG 5343. Advanced Quality Control Methods. 3 Hours.
Acceptance sampling by attributes; single, double, sequential, and multiple sampling
plans; sampling plans; sampling plans of Department of Defense; acceptance
sampling by variables; Bayesian acceptance sampling; rectifying inspection for
lot-by-lot sampling; control charts; special devices; and procedures. Prerequisite:
INEG 2313. (Typically offered: Irregular)

INEG 5373. Repairable Systems Modeling. 3 Hours.
Applications of probability, statistics, simulation and optimization to problems related to
1) modeling the performance of repairable equipment; 2) designing optimal
inspection and maintenance policies for repairable equipment; and 3) optimizing the
allocation of maintenance resources. (Typically offered: Irregular)

INEG 5383. Risk Analysis for Transportation and Logistics Systems. 3 Hours.
Fundamentals of modeling risk, analyzing risk, and managing risk in a variety of
industrial and government decision-making settings. Risk measurement and model
building, uncertainty quantification, and multi-objective trade-offs. Credit cannot be
earned for both INEG 4383 and INEG 5383. (Typically offered: Irregular)

INEG 5393. Applied Regression Analysis for Engineers. 3 Hours.
Present concepts and applications to introduce statistical tools for discovering
relationships among variables. Focus on fitting and checking linear and nonlinear
regression models. Practical tools for engineers. (Typically offered: Irregular)

INEG 5423. Advanced Engineering Economy. 3 Hours.
(Formerly INEG 4423.) Preparation of feasibility studies, including cost estimation,
risk and uncertainty, sensitivity analysis and decision making. Effects of taxes,
depreciation and financing costs on cash flows. Graduate degree credit will not be
given for both INEG 4423 and INEG 5423. Prerequisite: INEG 2313 and INEG 2413.  
(Typically offered: Irregular)

INEG 5433. Cost Estimation Models. 3 Hours.
Overview of cost estimation techniques and methodologies applied to manufacturing
and service organizations. Accomplished through detailed analysis of the cost
estimation development process and various cost estimation models. Topics include
data collection and management, learning curves, activity based costing, detailed
and parametric estimation models, and handling risk and uncertainty. Prerequisite:
INEG 2313. (Typically offered: Irregular)

This course is cross-listed with OMG 5433.

INEG 5443. Decision Models. 3 Hours.
Focus on quantitative decision models for technical and managerial problems for
private and public organizations. Topics include shareholder value, stakeholder
value, Value-Focused Thinking, axioms of decision analysis, decision making
challenges, decision traps, cognitive biases, decision processes, decision framing,
influence diagrams, value hierarchy structuring, designing creative alternatives,
singe objective models, multobjective additive value model, swing weights,
sensitivity analysis, portfolio decision models with binary linear programming,
probability elicitation, Bayes Law, decision trees, Monte Carlo simulation, expected
value, dominance (deterministic and stochastic), tornado diagrams, value of
information, risk preference, utility models, expected utility, and communicating
analysis insights. Prerequisite: INEG 2313. (Typically offered: Irregular)

This course is cross-listed with OMG 5443.

INEG 5453. Systems Engineering and Management. 3 Hours.
(Formerly INEG 4433.) Overview of the fundamental concepts underlying the
management of engineering. Reviews the engineering decision process within the
life cycle. Examines implementation of basic management functions in technical
organizations and development of strategy tools within a complex organization.
Graduate degree credit will not be given for both INEG 4433 and INEG 5453.
Prerequisite: INEG 2403. (Typically offered: Fall)

INEG 5463. Project Management. 3 Hours.
(Formerly INEG 4443.) Analysis of the strategic level of project management
including planning, organizing, and staffing for successful project execution.
Professional creativity, motivation, leadership, and ethics are also explored.
At the tactical level, project selection, control, and systems management are
analyzed. Systems development and decision support tools for project management
are studied. Graduate degree credit will not be given for both INEG 4443 and
INEG 5463. (Typically offered: Irregular)

INEG 5523. Topics in Automated Systems. 3 Hours.
To understand current developments in applications of flexible automation to
industrial processes. Robotics, machine vision and other sensors, human machine
interface, AML/2 and V+ programming languages. (Typically offered: Irregular)

INEG 5533. Network Optimization in Transportation Logistics. 3 Hours.
Focus on quantitative modeling and analysis of network optimization problems and
their application in logistics system design and operation. Topics include network
design and routing and location analysis, with emphasis on the application of both
exact and heuristic solution techniques for large-scale instances of such problems.
Prerequisite: INEG 5613. (Typically offered: Spring)

INEG 5543. Distribution Center Design & Operations. 3 Hours.
To introduce the student to the field of facility logistics, as applied to distribution
centers (DCs). The fundamental areas of facility design and operations (material
handling systems) will be covered. Prerequisite: INEG 5613. (Typically offered: 
Irregular)

INEG 5563. Industrial Robotics. 3 Hours.
An interdisciplinary treatment of industrial robotics; manipulator anatomy, control,
and programming; end-of-arm tooling; sensors & sensing; system integration and
safety; current research topics. Graduate-level lab assignments and examinations.
Significant literature review and writing assignments. Not open to students with credit
for INEG 4563. Prerequisite: Graduate standing or instructor consent. (Typically
offered: Fall)

INEG 5563. Introduction to Optimization Theory. 3 Hours.
A graduate level introduction to the foundational rationales of numerical optimization
methods including linear programming, integer programming, network flows, and
discrete dynamic programming. Model formulation and tractability, search strategies,
characterization of optimal solutions, duality and sensitivity, outcome justification.
Prerequisite: Graduate standing. (Typically offered: Fall)

INEG 5623. Analysis of Inventory Systems. 3 Hours.
Elements of production and inventory control, economic lot size models, price
breaks models using Lagrangian method, deterministic dynamic inventory model,
probabilistic one-period and multi-period models, zero and positive lead time
models, and continuous review models. Prerequisite: INEG 5313. (Typically offered:
Irregular)

INEG 5643. Optimization Theory II. 3 Hours.
Classical optimization theory, Lagrangian and Jacobian methods, Kuhn-Tucker
theory and constraint qualification, duality in nonlinear problems; separable
programming, quadratic programming, geometric programming, stochastic
programming, steepest ascent method, convex combinations method, SUMT,
Fibonacci search, and golden section method. Prerequisite: INEG 5613. (Typically
offered: Irregular)
INEG 5653. Modeling and Analysis of Semiconductor Manufacturing. 3 Hours.
Introduction to front end of semiconductor manufacturing process, water processing, topics include an introduction to wafer processing, factory and equipment capacity modeling, automated material handling, simulation, cost modeling, and production scheduling. Prerequisite: INEG 2313. (Typically offered: Irregular)

INEG 5663. Analysis of Queuing Systems. 3 Hours.
Poisson axioms, pure birth and death model, queue disciplines (M/M/1) and (M/M/c) models, machine servicing model, Pollazek-Khintchine formula, priority queues, and queues in series. Markovian analysis of (G/M/K) (M/G/1) models, and bulk queues. Reneging, balking, and jockeying phenomena. Transient behavior. Prerequisite: INEG 5313. (Typically offered: Irregular)

INEG 5683. Nonlinear Programming. 3 Hours.
An introduction to the theory and methodology of nonlinear programming. Focus on engineering and management science applications of nonlinear optimization. Both single and multi-variable as well as unconstrained and constrained problems are addressed. (Typically offered: Irregular)

INEG 5693. Heuristic Optimization. 3 Hours.
Theory and applications of methodological approaches explicitly addressed to heuristic or approximate optimization of integer and combinatorial models. Prerequisite: INEG 5613. (Typically offered: Irregular)

INEG 5803. Simulation. 3 Hours.
The development and use of discrete-event simulation models for the analysis and design of systems found in manufacturing, distribution, and service contexts. Coverage includes conceptual modeling, model translation to computer form, statistical input models, random number generation and Monte Carlo methods, experimentation and statistical output analysis, and queuing analysis. Includes the use of modern computer simulation languages. Cannot receive credit for both INEG 3623 and INEG 5803. Corequisite: Drill component. (Typically offered: Irregular)

INEG 5813. Introduction to Simulation. 3 Hours.
Development and use of discrete-event simulation models for the analysis and design of systems found in manufacturing, distribution, and service contexts. Coverage includes conceptual modeling, model translation to computer form, statistical input models, random number generation and Monte Carlo methods, experimentation and statistical output analysis, and queuing analysis. For off-campus, distance education students only. (Typically offered: Irregular)

INEG 5823. Systems Simulation I. 3 Hours.
Random number generation, random variate generation, timekeeping in simulations, discrete event modeling, construction of digital simulation models, statistical analysis of simulation results, and analysis of simulation experiments utilizing a computer programming language. (Typically offered: Irregular)

INEG 5833. Introduction to Database Concepts for Industrial Engineers. 3 Hours.
(Formerly INEG 4833.) An introduction to the basic principles of database modeling and technologies for industrial engineers. Coverage includes analyzing user requirements, representing data using conceptual modeling techniques (e.g. UML, ERD), converting conceptual models to relational implementations via database design methodologies, extracting data via structured query language processing, and understanding the role of database technology in industrial engineering application areas such as inventory systems, supply chain control, etc. The application of a desktop database application such as Access will be emphasized. Graduate degree credit will not be given for both INEG 4833 and INEG 5833. (Typically offered: Irregular)

INEG 5843. Scheduling and Sequencing I. 3 Hours.
An introduction to constructive algorithms and various operations research approaches for solving sequencing and scheduling problems. The NP-completeness of most scheduling problems leads to a discussion of computational complexity, the use of heuristic solution methods, and the development of worst case bounds. Prerequisite: INEG 3613 and computer programming proficiency. (Typically offered: Irregular)

INEG 600V. Master's Thesis. 1-9 Hours.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

INEG 6113. Linear Optimization. 3 Hours.
A precise treatment of linear programming. Theory of convex sets, linear inequalities; development of the simplex method; duality theory; post optimality application and interpretation. Variants of the simplex methods and interior-point algorithms are discussed. Prerequisite: INEG 5613. (Typically offered: Fall)

INEG 614V. Special Topics for Doctoral Students in Industrial Engineering. 1-3 Hour.
Consideration of current industrial engineering topics at the doctoral level that are not covered in other courses. Prerequisite: PhD student in Industrial Engineering or consent of the instructor. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

INEG 6213. Integer Programming. 3 Hours.
This course offers the theory needed to model and efficiently solve large-scale binary, mixed and general integer programs. The tools needed to assess the computational complexity of these problems will be fully studied. Additional topics include the conceptual foundation required for the development of cutting planes, branch-and-price, Lagrange relaxation and constraint programming approaches. Implementation considerations specific to preprocessing, valid inequality generation and solution methodology convergence will be emphasized. Prerequisite: INEG 6113. (Typically offered: Spring)

INEG 6313. Network Optimization. 3 Hours.
A theorem-proof based advanced study providing rigorous exposition of foundational network optimization concepts including relevant optimization theory, algorithm development techniques, complexity analysis, data structures, and important applications. Prerequisite: INEG 6113. (Typically offered: Fall)

INEG 6363. Generalized Linear Models. 3 Hours.
Introduce the generalized linear model (GLM), inference, likelihood and diagnostics. Apply log linear and logistic models. Develop techniques for growth curves, and longitudinal and survival data. Cover spatial and normal linear models, and dynamic GLM for dependent data. (Typically offered: Irregular)

INEG 6443. Advanced Decision Analysis. 3 Hours.
The purpose of this course is to prepare the student to perform PhD and MS level research and analysis using advanced decision analysis concepts and techniques. The course topics include the history of decision analysis, foundations of decision analysis, structuring decision problems, assessing probabilities, probability management, Bayesian networks, utility, risk preference, risk analysis for engineering applications, intelligent adversary risk analysis, behavioral and organizational context for decision analysis, and major decision analysis applications. Prerequisite: INEG 5443. (Typically offered: Spring)

INEG 6823. Systems Simulation II. 3 Hours.
Advanced topics in computer simulation including experimental design, simulation optimization, variance reduction, and statistical output analysis techniques applied to discrete event simulation. Prerequisite: INEG 5823. (Typically offered: Irregular)
INEG 6843. Scheduling Theory and Algorithms. 3 Hours.
The course will cover the theory and solution methods for scheduling several tasks over time. Topics include terminology, measures of performance, single machine sequencing, flow shop scheduling, the job shop problem, and priority dispatching. Side constraints within scheduling, such as precedence, release dates, and due dates are addressed. Integer programming, dynamic programming, and heuristic approaches to various problems are also presented. Prerequisite: INEG 5613 or equivalent, computer programming proficiency, and exposure to proofs. (Typically offered: Irregular)

INEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Interdisciplinary Studies
Kim LaScola Needy
Dean of the Graduate School and International Education
213 Gearhart Hall
479-575-4401

Patricia R. Koski
Associate Dean of the Graduate School and International Education
Chair of Interdisciplinary Studies
213 Gearhart Hall
479-575-4401
Email: gradinfo@uark.edu

http://grad.uark.edu/ (http://www.uark.edu/grad/)

Degrees Conferred:
M.S., Ph.D. in Cell and Molecular Biology (p. 90) (CEMB)
Ph.D. in Environmental Dynamics (p. 174) (ENDY)
M.S., Ph.D. in Microelectronics-Photonics (p. 232) (MEPH)
Ph.D. in Public Policy (p. 296) (PUBP)
M.S., Ph.D. in Space and Planetary Sciences (p. 322) (SPAC)
M.S. in Statistics and Analytics (p. 336) (STAN)

Graduate Certificates (non-degree) offered:
Cross-Sector Alliances (p. 356) (CSAL)

Housed in the Graduate School, the Division of Interdisciplinary Studies is the home department for the cross-college interdisciplinary graduate programs: Graduate Certificates in Cross-Sector Alliances, Preparing for the Professoriate, and Sustainability; M.S. and Ph.D. degrees in Cell & Molecular Biology; Ph.D. degree in Environmental Dynamics; M.S. and Ph.D. degrees in Microelectronics-Photonics; Ph.D. degree in Public Policy; M.S. and Ph.D. degrees in Space & Planetary Sciences; and M.S. in Statistics and Analytics. Program descriptions and course requirements may be found elsewhere in this catalog at the links above.

The common feature of these interdisciplinary programs is that their faculty members have voluntarily associated themselves with that academic community while being appointed faculty in our traditional departments. Each program operationally reports directly to the Associate Dean of the Graduate School, but works closely with the traditional departments that house actively participating program faculty members.

Courses
GRSD 400V. Research Experience Undergraduate Internship. 1-6 Hour.
Internship for students participating in an undergraduate research experience. (Typically offered: Summer) May be repeated for up to 12 hours of degree credit.

GRSD 5003. The Professoriate: Teaching, Learning and Assessment. 3 Hours.
Designed to introduce the future academic professional to the expectations of the faculty teaching role in higher education. Topics include techniques of effective teaching and learning, dealing with a variety of institutional expectations, course management issues, and using models of effective teaching across a broad spectrum of class sizes and levels. (Typically offered: Spring)

GRSD 5013. Practicum for Future Faculty. 3 Hours.
This course is designed to follow GRSD 5003 and to give participants opportunities to apply theories and methods learned in that course. To accomplish these goals, the course instructor helps the participant arrange a mentoring opportunity as part of this course. Prerequisite: GRSD 5003. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GRSD 502V. Special Topics in Preparing Future Faculty. 1-3 Hour.
Seminar on selected topics for those anticipating a career teaching in higher education. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GRSD 5033. The Professoriate: Research and Service. 3 Hours.
Designed to complement GRSD 5003 by focusing on topics of interest to future academic professionals beyond those related to instruction. Topics include developing a research statement, strategies for securing an academic position the general nature of employment and service expectations in higher education, research ethics, and funding issues, including grant proposal writing. (Typically offered: Fall)

GRSD 5041. Graduate Enrollment. 1 Hour.
This course allows a degree-seeking graduate student to continue as an active graduate student. Students should enroll in this course only when they are not enrolled in credit-bearing academic courses. This course cannot be counted for degree credit. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

School of Journalism and Strategic Media Website (http://fulbright.uark.edu/departments/journalism/)

Degree Conferred:
M.A. (JOUR)

Program Description: The purposes of the Journalism M.A. program are to refine the conceptual knowledge and skills of graduate journalism students through advanced writing, production and/or theory and methods courses, to offer comprehensive, media-related courses; and to provide expertise in an additional academic discipline.

Primary Areas of Faculty Research: Faculty produce award-winning documentary films; cover national news stories on politics, government, business, and crime; report investigative stories using government databases; and research and publish in national journals on mass media
M.A. in Journalism

Areas of Study: The purposes of the Journalism M.A. program are to refine the conceptual knowledge and skills of graduate journalism students through advanced writing, production and/or theory and methods courses, to offer comprehensive, media-related courses; and to provide expertise in an additional academic discipline. Advanced journalism studies may be supplemented with up to six hours of graduate-level courses in academic disciplines other than journalism.

Prerequisites to Degree Program: Students must have appropriate professional experience and/or an undergraduate degree in the journalism field that is approved by the graduate coordinator or the Journalism Graduate Faculty Committee as preparation for graduate study. A student must have a minimum undergraduate grade-point average of 3.00 and should earn a minimum score of 300 on the verbal and quantitative parts of the Graduate Record Examinations (including a minimum score of 151 on the verbal part), and a minimum score of 4.5 on the analytical writing section.

Requirements for the Master of Arts Degree: In addition to the requirements of the Graduate School (p. 435), the Master of Arts degree in Journalism requires a minimum of 30 semester hours with a cumulative grade-point average of 3.00. Students must complete:

1. 18 hours of graduate credit in journalism; all students must take JOUR 5023 Journalism Theory and JOUR 5043 Research Methods in Journalism.
2. The remaining 6 hours of graduate course credit can be in journalism, or in a single department other than journalism chosen by the student and approved by the graduate coordinator or the Journalism Graduate Faculty Committee, and
3. A master’s thesis (6 semester hours).

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Requirements for the Five-Year Bachelor/Master of Arts Degree: In the Five-Year Bachelor/Master of Arts program, students can complete requirements for both the B.A. and the M.A. degrees in five years. Students apply for “conditional admission” to the program before the end of the first semester of their junior year. They may then take 6 to 12 hours of graduate coursework as undergraduates, to apply exclusively toward the M.A. degree. After receiving the B.A., they spend a fifth year completing the M.A.. This may involve some summer school coursework. Requirements for conditional admission to the Five-Year B.A./M.A. program include:

- Enrollment in the Journalism B.A. program.
- A minimum GPA of 3.0 in all semesters of undergraduate study.
- All other admission requirements of the Graduate School and the Journalism M.A. program.

Students may continue into the M.A. program in the fifth-year conditional on the following:

- Completion of a Journalism B.A. degree at the UA.
- Renewal of their application to the UA Graduate School.
- Continuation of a minimum GPA of 3.0 in all semesters of undergraduate study.

- Achieving satisfactory GRE scores: a minimum of 300 on the verbal and quantitative parts of the exam (including a minimum score of 151 on the verbal part), and a minimum score of 4.5 on the analytical writing section.
- Taking all coursework in the senior year and in graduate school at the UA.

Special guidelines: Students who have maintained a GPA of 3.5 or above in all semesters of their undergraduate study may petition for admission to the program without taking the GRE. Of the maximum 12 hours of graduate courses, these students may count up to 6 hours of Journalism 5000-level coursework toward both the B.A. and the M.A. degree. However, a grade of B or better is required in the 6 hours, and the courses must be approved by a student’s Master’s Advisory Committee or the journalism graduate coordinator.

Specific guidelines for graduate courses taken by undergraduates who apply to the Five-Year program: After completing the B.A., students may request retroactive graduate credit for up to 12 hours of JOUR 5000-level courses taken in the final 12 months of their undergraduate degree. The courses will be counted if:

- The courses were taken on the UA, Fayetteville campus in the Journalism program.
- The student was in good standing.
- The courses were 5000-level or above.
- The courses were not used for the B.A. degree.
- The student earned a grade of B or better.
- The courses are approved by the student's Master’s Advisory Committee or the Journalism graduate coordinator. Petition to the Graduate School will be done either by the student’s advisory committee or the graduate coordinator.

Graduate Faculty

Brown, Lucy M., Ph.D., M.A. (University of Texas, Austin), M.S. (Pratt Institute), Dip.G.A. (Edna Manley School for the Visual Arts, Jamaica), Clinical Assistant Professor, 2013.

Carpenter, Dale, M.A. (Emory University), B.A. (Vanderbilt University), Professor, 1994.

Chung, Jee-Young, Ph.D. (University of Alabama), M.A. (University of Houston), B.S., B.A. (Seoul Women’s University), Assistant Professor, 2015.

Foley, Larry D., M.S. (University of Central Arkansas), B.A. (University of Arkansas), Professor, 1993.

Fosu, Ignatius, Ph.D., M.A. (University of Alabama), B.A. (University of Ghana, Accra), Associate Professor, 2005.

Gould, Kara, Ph.D. (University of Utah), M.A. (Wheaton College), B.A. (Wheaton College), Assistant Professor, 2016.

Jordan, Gerald Bernard, M.S.J. (Northwestern University), B.A. (University of Arkansas), Associate Professor, 1995.

King, Tiffany, M.A. (University of Arkansas), B.J. (University of Missouri), Instructor, 2014.

McCaffrey, Raymond, Ph.D. (University of Maryland), M.A. (University of Colorado), M.A. (Columbia University), B.A. (Fairfield University), Assistant Professor, 2014.

Schulte, Bret J., M.F.A. (George Mason University), B.A. (University of Nebraska-Lincoln), Associate Professor, 2008.
Watkins, Patsy, Ph.D. (University of Iowa), M.A., B.A. (University of Texas, Austin), Associate Professor, 1983.
Wells, Rob, Ph.D. (University of Maryland), M.A. (St. John's College), Assistant Professor, 2016.
Wicks, Jan L., Ph.D., M.A. (Michigan State University), B.A. (University of Southwest Louisiana), Professor, 1994.

Courses

JOUR 5003. Advanced Reporting. 3 Hours.
Stresses public affairs coverage, interpretive, investigative, and analytic journalism, involving research, work with documents, public records, and budgets and specialized reporting. (Typically offered: Irregular)

JOUR 5013. Advanced Radio News Reporting. 3 Hours.
(Formerly JOUR 4033.) Intensive training in the production of in-depth, public radio style news stories. Graduate degree credit will not be given for both JOUR 4033 and JOUR 5013. Prerequisite: JOUR 2052 and JOUR 2039L, each with a grade of C or better. (Typically offered: Spring)

JOUR 5023. Journalism Theory. 3 Hours.
Examination of the major journalism and mass media theories and conceptual perspectives regarding journalism, news, mass media, advertising and public relations relevant to industry and academic researchers and professionals. (Typically offered: Fall)

JOUR 5033. Critical and Opinion Writing and Commentary. 3 Hours.
Experience in writing and analyzing columns, editorials, criticism, and other forms of opinion and commentary in the media and in examining the media's role as a forum for opinion and commentary and its impact and influence. (Typically offered: Irregular)

JOUR 5043. Research Methods in Journalism. 3 Hours.
Research methods of utility in journalism. Emphasis on survey research, electronic data base searching, and traditional library research. Prerequisite: Graduate standing or honors program standing. (Typically offered: Spring)

JOUR 5063. Issues in Advertising and Public Relations. 3 Hours.
Seminar course involving the critical examination of the major cultural, social, political, economic, ethical, and persuasion theories and/or issues relevant to advertising and public relations affecting individuals, organizations, societies. Prerequisite: Graduate standing. (Typically offered: Fall)

JOUR 5073. Propaganda and Public Opinion. 3 Hours.
Examines and analyzes the means of influencing and measuring public opinion, with an emphasis on survey research and polling. (Typically offered: Irregular)

JOUR 508V. Graduate Journalism Internship. 1-3 Hour.
Credit for practical experience gained through a journalistic internship. Must have completed 6 hours of graduate course credit. May be repeated for up to 3 hours of degree credit. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

JOUR 5093. Business Journalism. 3 Hours.
Examines how the U.S. economy works and how to find news in business, market and government data sources. Focuses on the role of corporations, financial markets, and regulators, and benefiting students interested in sports, entertainment, political and investigative journalism. (Typically offered: Spring)

JOUR 5133. Ethics in Journalism. 3 Hours.
A seminar examining the professional ethical principles and ethical performance in the journalism field. The ethical performance of the mass media dedicated to news, public relations and advertising is evaluated based on ethical theories and industry standards. Prerequisite: Graduate standing. (Typically offered: Fall)

JOUR 5163. Computer-Assisted Publishing. 3 Hours.
(Formerly JOUR 4063.) In-depth, hands-on exploration of computer hardware and software in the design and production of media messages. Examination of developing media technologies and the computer's influence on design and conceptualization. Graduate degree credit will not be given for both JOUR 4063 and JOUR 5163. (Typically offered: Irregular)

JOUR 5173. Social Media and Journalism. 3 Hours.
(Formerly JOUR 4073.) Social Media and Journalism teaches conceptual knowledge and skills to develop news judgment and use changing technological tools to disseminate news quickly and to different audiences. The value of interacting with sources and the audience is stressed as are ethical, legal and accuracy issues. Graduate degree credit will not be given for both JOUR 4073 and JOUR 5173. Prerequisite: JOUR 2013 or JOUR 2032 with a grade of C or better. (Typically offered: Fall)

JOUR 5183. International Mass Communications. 3 Hours.
Examination of national media systems, issues in international communications, the role of the media in coverage of international affairs, and the impact of new technologies on mass communications. (Typically offered: Irregular)

JOUR 5193. Professional Journalism Seminar. 3 Hours.
Examination of complex problems encountered by professional journalists with focus on research and analysis of the role of journalism in major social, economic, and political developments. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

JOUR 5233. Media and Public Policy. 3 Hours.
Focuses on the interaction between media, politics, government, and public policy, particularly on the impact and influence of the media on the public policy agenda. (Typically offered: Irregular)

JOUR 5283. Data Journalism. 3 Hours.
Provides an in-depth experience of combining street reporting and data analysis to tell a story of significant societal importance. Students are introduced to techniques in data analysis, management, visualization and production of data-driven articles and multimedia presentations. Prerequisite: Instructor permission. (Typically offered: Fall)

JOUR 5313. Literature of Journalism. 3 Hours.
A study of superior works of non-fiction journalism, past and present. Includes authors from Daniel Defoe to John McPhee. (Typically offered: Irregular)

JOUR 5323. Documentary Production I. 3 Hours.
In-depth study of documentary film as non-fiction, long form journalism. Covers subject, funding, research and development, pre-production planning, field production, talent, music, post production, promotion, broadcast and distribution. Required trip to Hot Springs Documentary Film Festival. (Typically offered: Fall)

JOUR 5333. Documentary Production II. 3 Hours.
A continuation of JOUR 5323, Documentary Production I. Students photograph, write, and edit a documentary begun in the fall semester. Prerequisite: JOUR 5323. (Typically offered: Spring)

JOUR 5463. Campaigns. 3 Hours.
(Formerly JOUR 4463.) Applying advertising principles and techniques to preparation of a complete campaign; determining agency responsibilities, marketing objectives and research, media mix, and creative strategy. Emphasis also given to campaign presentation delivery, utilizing audio and visual techniques. Graduate degree credit will not be given for both JOUR 4463 and JOUR 5463. Prerequisite: JOUR 3723 and JOUR 3743, each with a grade of B or better, and 2.5 overall GPA. (Typically offered: Fall, Spring and Summer)
JOUR 5473. Account Planning. 3 Hours.
An introduction to applied advertising research and account planning. Integrate consumers' perspectives into creative strategy to developing brand stories for clients. Write creative briefs, positioning statements and prepare copy-testing research instruments to evaluate messages. Utilize consumer research for creating messages for diverse cultures. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

JOUR 5503. Magazine Writing. 3 Hours.
(Formerly JOUR 4503.) This intensive writing and reporting course is for students with proven feature-writing skills and an interest in the human-interest stories found in such leading magazines as The New Yorker, Esquire, Harper's, the Atlantic, and others. Students will compose magazine-length nonfiction stories on timely subjects under deadline. Stories are submitted for contests and publication, when possible. Graduate degree credit will not be given for both JOUR 4503 and JOUR 5503. Prerequisite: JOUR 2013 with a grade of C or better. (Typically offered: Spring)

JOUR 5883. Advanced Television News Production. 3 Hours.
(Formerly JOUR 4883.) Continuation of JOUR 4873. Students prepare and present television newscasts for air. Laboratory component arranged. Graduate degree credit will not be given for both JOUR 4883 and JOUR 5883. Corequisite: Lab component. Prerequisite: JOUR 4873 with a grade of C or better. (Typically offered: Irregular)

JOUR 5903. Community Journalism. 3 Hours.
(Formerly JOUR 4903.) This three-hour course will blend student reporting and editing skills with instruction on how regional newspapers select and present news to a local audience. This course will instruct students in deciding news stories for regional readers, how those stories can best be written and displayed. The semester goal is to publish a paper. Graduate degree credit will not be given for both JOUR 4903 and JOUR 5903. (Typically offered: Spring)

JOUR 5923. History of the Black Press. 3 Hours.
Covers the historic context of contributions and innovations to U.S. newspapers by African Americans. Also investigates the role of the black press from its beginnings in 1827 through the civil rights movement. (Typically offered: Spring Even Years)

JOUR 600V. Master's Thesis. 1-6 Hour.
Required of all M.A. journalism students. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Kinesiology Program Website (http://kins.uark.edu/)

Degrees Confirmed:
M.S. in Kinesiology (KINS)
Ph.D. in Health, Sport and Exercise Science (p. 192) (HSES)

Program Description: The Kinesiology program prepares students with the competencies necessary to pursue career opportunities as ACSM certified fitness directors (M.S. Exercise Science concentration), clinical directors of a hospital or a clinically based program which performs rehabilitation services in the realm of movement for people with disabilities (M.S. Adapted Movement Science concentration), as teachers/scholars and leaders in a University-housed Kinesiology/Exercise Science program and Human Performance Laboratory setting (Ph.D. Kinesiology - Exercise Science concentration), and/or Pedagogy faculty settings (Ph.D. Kinesiology - Pedagogy concentration). The minimum number of credit hours for the M.S. degree is 33 and 60 hours are required for the Ph.D.

Areas of Concentration for the Master of Science Degree: Adapted movement science. Areas of specialization within the Exercise Science Concentration include biomechanics, exercise management, and exercise physiology.

M.S. in Kinesiology with Exercise Concentration

Prerequisites to Degree Program: For acceptance to the master's degree programs, the program area requires, in addition to the general requirements for admission to the Graduate School, an undergraduate degree in kinesiology or in a related field and the following admission standards: an overall undergraduate GPA of 3.00 or if the overall undergraduate GPA is between 2.70 and 2.99, the student must have a 3.00 GPA on the last 60 hours of undergraduate course work (excluding student teaching), or a GRE score of 1000 on the verbal and quantitative parts of the general test.

Requirements for the Master of Science Degree: Candidates for the M.S. degree in kinesiology with a concentration in either adapted movement science or exercise science must complete 27 semester hours of graduate work and a thesis or 33 semester hours without a thesis. A graduate GPA of 3.0 or better is required for graduation. In addition, all degree candidates must successfully complete a written comprehensive examination.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Exercise Science Concentration: (33 hours)

M.S. in Kinesiology with Adaptive Movement Science Concentration

Prerequisites to Degree Program: For acceptance to the master's degree programs, the program area requires, in addition to the general requirements for admission to the Graduate School, an undergraduate degree in kinesiology or in a related field and the following admission standards: an overall undergraduate GPA of 3.00 or if the overall undergraduate GPA is between 2.70 and 2.99, the student must have a
3.00 GPA on the last 60 hours of undergraduate course work (excluding student teaching), or a GRE score of 1000 on the verbal and quantitative parts of the general test.

Requirements for the Master of Science Degree: Candidates for the M.S. degree in kinesiology with a concentration in either adapted movement science or exercise science must complete 27 semester hours of graduate work and a thesis or 33 semester hours without a thesis. A graduate GPA of 3.0 or better is required for graduation. In addition, all degree candidates must successfully complete a written comprehensive examination.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Adapted Movement Science Concentration: (33 hours)

Required Research Component

- ESRM 5393 or ESRM 6403: Statistics in Education and Health Professions or Educational Statistics and Data Processing (3 hours)
- HHPR 5353: Research in Health, Human Performance and Recreation (3 hours)

Required Courses

- EXSC 5323: Biomechanics I (3 hours)
- EXSC 5513: Physiology Exercise I (3 hours)
- KINS 5423: Assessment and Prescriptive Programming in Adapted Movement Science (3 hours)
- KINS 5413: Adapted Movement Science (3 hours)

Required Project or Thesis

- KINS 589V or KINS 600V: Independent Research or Master's Thesis (3-6 hours)

Approved Electives

9-12 hours

Total Hours

33 hours

Courses

KINS 5413. Adapted Movement Science. 3 Hours.
Methods and techniques for working with individuals with disabilities in an adapted movement science. (Typically offered: Fall Even Years)

KINS 5423. Assessment and Prescriptive Programming in Adapted Movement Science. 3 Hours.
Instruction in the assessment, prescription, and use of instruction methods, materials, and equipment relevant to working with people with disabilities. (Typically offered: Spring Odd Years)

KINS 5493. Practicum in Adapted Physical Education. 3 Hours.
Deals with the application of skills, knowledge and concepts necessary for planning, organizing and conducting adapted physical education programs through supervised field experiences. (Typically offered: Irregular)

KINS 574V. Internship. 1-6 Hour.
Internship. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

KINS 589V. Independent Research. 1-3 Hour.
Development, implementation, and completion of basic or applied research project. Prerequisite: Admission to the master's program in kinesiology or admission to the master's program in athletic training. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

KINS 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

KINS 605V. Independent Study. 1-3 Hour.
Provides students with an opportunity to pursue special study of educational problems. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

KINS 674V. Internship. 1-3 Hour.
Internship. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

Department of Mathematical Sciences Website (http://fulbright.uark.edu/departments/math/)

Degrees Conferred:
M.S., Ph.D. (MATH)
M.A. in Secondary Mathematics (SMTH)

Areas of Study: Mathematics and secondary mathematics for instructors planning to teach mathematics at the high school level.

Primary Areas of Faculty Research: Analysis, algebra, geometric topology, numerical analysis, statistics.

M.S. in Mathematics

Prerequisites to Degree Program: Prospective candidates for the Master of Science degree in Mathematics are expected to have completed a program equivalent to that required by the department for a B.S. degree, as set forth in the current catalog of the Fulbright College of Arts and Sciences. Deficiencies may be removed either by taking the appropriate undergraduate courses or by examination. In addition to the application for admission to the Graduate School and the transcripts required for Graduate School admission, applicants for admission to the degree programs of the Department of Mathematical Sciences must submit a) three letters of recommendation from persons familiar with the applicant’s previous academic and professional performance and b) official scores from the Graduate Record Examination (General Test).

The degree of Master of Science is intended for collegiate teachers of mathematics, non-teaching professional mathematicians, and those who desire to continue advanced study.

Requirements for the Master of Science Degree: This degree is offered under three separate options: a general option, a computational mathematics option, and a thesis option. The general and thesis options are intended for students who plan to be collegiate teachers of mathematics, continue advanced study in mathematics, or obtain a broad background for preparation as a non-teaching professional mathematician. The computational mathematics option is intended for students who intend to specialize in computational and applied mathematics in preparation for professional employment in an interdisciplinary or computationally intensive environment.
The program of a candidate will be determined in conference with the candidate’s graduate adviser. A comprehensive examination must be passed by each candidate for the Master of Science degree. It should be taken near the end of the last semester of residence. At least four weeks prior to the scheduled date, students must notify the department of their intention to take the examination. No student may take the comprehensive examination more than three times. MATH 504V, MATH 507V, MATH 5013, and MATH 5033 are not applicable to the Master of Science degree in mathematics. The program will include at least two semesters of one-hour credit in MATH 510V Mathematics Seminar.

All candidates must complete a minimum of 32 semester hours of approved graduate course work, including 12 semester hours in mathematics at the 5000-6000 level (excluding MATH 510V). All selected courses are subject to the approval of the Graduate Committee.

Students in the general option may include up to nine semester hours of graduate work in courses outside the department. The comprehensive examination for the general option will be a written exam including material covered in graduate course work.

The candidate for the computational mathematics option must include at least six but not more than twelve semester hours of graduate work in courses outside of mathematics. The comprehensive examination for the computational mathematics option will be similar to the examination for the general option but must include material covered in six semester hours of MATH 5393 (formerly MATH 4353) and MATH 5383 (formerly MATH 4363).

Students in the thesis option must complete 6 semester hours of MATH 610V with the candidate’s thesis adviser, which will count toward the 32 semester hours of approved graduate course work. In addition to a written comprehensive exam, the candidate will be required to complete an oral defense of the thesis. Reading copies of the thesis should be delivered to members of the Thesis Committee at least three weeks prior to undertaking the final examination.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

M.A. in Secondary Mathematics

Requirements for the Master of Arts Degree with a Major in Secondary Mathematics: This program is designed for secondary school teachers of mathematics. It requires 30 semester hours of graduate work.

Prospective candidates for the Master of Arts degree in secondary mathematics are expected to have earned a baccalaureate degree with a major in a mathematical science (mathematics, statistics, operations research, or computer science), engineering, or a physical science, and credit in courses equivalent to MATH 2564, MATH 3083, MATH 3113, and MATH 3773.

The program has four components in which to earn a minimum of 30 semester hours of credit:

1. Graduate course work in mathematics content and content-based pedagogy. At least 12 hours of credit in graduate course work specifically designed for preparation for teaching secondary mathematics. The content will include probability and statistics, algebra, geometry, and advanced calculus with connections to secondary school mathematics. At least one of the courses must be in probability and statistics; one in algebra; and one in advanced calculus. These courses are to be selected from:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5013</td>
<td>Abstract Algebra with Connections to School Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5023</td>
<td>Geometry with Connections to School Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5033</td>
<td>Advanced Calculus with Connections to School Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5053</td>
<td>Probability &amp; Statistics with Connections to School Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 504V</td>
<td>Special Topics for Teachers</td>
<td>1-6</td>
</tr>
</tbody>
</table>

Other graduate mathematics or statistics courses may be used in place of these courses with the approval of the student’s committee.

2. Independent study and research in mathematics or mathematics education. Up to six hours of credit is available in independent study and research under the direction of mathematical sciences faculty. The results will be evidenced by a report roughly equivalent to a master’s thesis.

3. Advanced work in professional teacher preparation. Up to six hours of credit in MATH 507V is available for advanced work in preparation for teaching AP calculus, AP statistics, International Baccalaureate (IB) mathematics, or for achieving National Board Certification in (Adolescence and Young Adulthood) Mathematics. Other professional development activities with quality control features similar to those of the AP, IB, and National Board programs may be presented for consideration for credit. All such work must be sanctioned by the sponsoring organizations.

4. Graduate courses in education. Up to six hours of credit is available in graduate courses in education. The student’s committee must approve the courses. Recommended courses include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIED 6013</td>
<td>Curriculum Theory, Development, and Evaluation</td>
<td>3</td>

<tr>
<td>CIED 6043</td>
<td>Analysis of Teacher Education</td>
<td>3</td>
</tr>
<tr>
<td>CIED 6053</td>
<td>Curriculum and Instruction: Learner Assessment and Program Evaluation</td>
<td>3</td>
</tr>
</tbody>
</table>

Other graduate courses in education may be used in place of these courses with the approval of the student’s advisory committee.

If allowed by Graduate School rules, credit previously earned may be applied to the requirements for this degree with the approval of the student’s advisory committee.

Each person receiving the Master of Arts degree in secondary mathematics must pass a written examination in three of the following areas: probability and statistics; algebra; geometry; advanced calculus; and mathematics education. No student will be allowed to take the examination more than three times. Candidates will also present a portfolio describing the body of work with samples of their work as students and explanations of connections to secondary school mathematics.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Ph.D. in Mathematics

Requirements for the Doctor of Philosophy Degree: Candidates for the degree of Doctor of Philosophy with a major in mathematics will be required to earn not less than 60 semester hours of course credit beyond the bachelor’s degree in mathematics and closely related
fields. The number of hours and the courses for each student will be determined by the advisory committee. The candidate must fulfill the course requirements for the Master of Science degree in mathematics.

The basic requirement for the Ph.D. degree is the preparation of an acceptable dissertation. This dissertation must demonstrate the candidate’s ability to do independent, original, and significant work in mathematics. It is required that this dissertation possess the degree of excellence of research papers ordinarily published in the leading mathematical journals.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

A comprehensive examination is given each year during the weeks preceding the beginning of the fall and spring semesters. This examination is taken by all students in the graduate program who have completed the course requirements for the M.S. degree. The prospective candidate for the Ph.D. will be allowed to take the examination at most two times. A second failure to qualify eliminates a student from the graduate program in mathematics. After qualifying, a candidacy examination will be given covering the intended areas of specialization beyond the level of the qualifying comprehensive examination. It may be repeated once.

Students who wish to specialize in mathematics education must complete and pass qualifying examinations in two graduate sequences in mathematics plus one in mathematics education. Students must complete two of MATH 5013, MATH 5023, and MATH 5053 that are not in the topics of the two graduate qualifying sequences in mathematics. Students must complete four education graduate courses to study quantitative methods in education research and qualitative methods in education research. The recommended courses are ESRM 6413, ESRM 6423, ESRM 6533, and ESRM 6653, although these may be altered depending on the student’s previous study of STAT courses. Students must complete 15 hours of independent study in mathematics education to prepare for dissertation research. The areas of this study are: K-14 curriculum; learning theory; art of teaching and teacher education; and assessment and technology. The 15 hours must include a three-hour research project that will result in a pre-dissertation research report.

In addition to extending knowledge by personal reading and research, a doctoral candidate in mathematics will normally communicate knowledge. In addition to extending knowledge by personal reading and research, a doctoral candidate in mathematics will normally communicate knowledge. In addition to extending knowledge by personal reading and research, a doctoral candidate in mathematics will normally communicate knowledge. In addition to extending knowledge by personal reading and research, a doctoral candidate in mathematics will normally communicate knowledge.
MATH 5033. Advanced Calculus with Connections to School Mathematics Teaching. 3 Hours.
Rigorous development of the real numbers, continuity, differentiation, and integration. Degree credit will not be awarded for both MATH 4513 (or MATH 5503) plus MATH 5001 and for MATH 5033. Prerequisite: Departmental consent. (Typically offered: Irregular)

MATH 504V. Special Topics for Teachers. 1-6 Hour.
Current topics in mathematics of interest to secondary school teachers. Prerequisite: Graduate standing or departmental consent. (Typically offered: Irregular) May be repeated for degree credit.

MATH 5053. Probability & Statistics with Connections to School Mathematics. 3 Hours.
An advanced perspective of probability and statistics as contained in the high school mathematics curriculum with connections to other components of school mathematics. The content is guided by the content of the high school probability and statistics of the Common Core State Standards for Mathematics. Prerequisite: Graduate standing. (Typically offered: Spring)

MATH 507V. Professional Development for Secondary Mathematics Teaching. 1-6 Hour.
Validated participation in professional development mathematics workshops or institutes sanctioned by national or international educational organizations such as the College Board, International Baccalaureate Program, and the National Board for Professional Teaching Standards. Prerequisite: Enrollment in Secondary Mathematics Teaching, MA degree program or departmental consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

MATH 510V. Mathematical Seminar. 1-3 Hour.
Members of the faculty and advanced students meet for presentation and discussion of topics. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

MATH 5113. Introduction to Abstract Algebra II. 3 Hours.
(Formerly MATH 4113.) Topics in abstract algebra including finite abelian groups, linear groups, factorization in commutative rings and Galois theory. Graduate degree credit will not be given for both MATH 4113 and MATH 5113. Prerequisite: MATH 3113. (Typically offered: Spring)

MATH 5123. Algebra I. 3 Hours.
What the beginning graduate student should know about algebra: groups, rings, fields, modules, algebras, categories, homological algebra, and Galois Theory. Prerequisite: MATH 3113, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall)

MATH 5133. Algebra II. 3 Hours.
Continuation of MATH 5123. Prerequisite: MATH 5123, and graduate standing in mathematics or statistics. (Typically offered: Spring)

MATH 5153. Advanced Linear Algebra. 3 Hours.
(Formerly MATH 4153.) Linear functionals, matrix representation of linear transformations, scalar product, and spectral representation of linear transformations. Graduate degree credit will not be given for both MATH 4103 and MATH 5153. Prerequisite: Graduate standing. (Typically offered: Fall)

MATH 5163. Dynamic Models in Biology. 3 Hours.
(Formerly MATH 4163.) Mathematical and computational techniques for developing, executing, and analyzing dynamic models arising in the biological sciences. Both discrete and continuous time models are studied. Applications include population dynamics, cellular dynamics, and the spread of infectious diseases. Graduate degree credit will not be given for both MATH 4163 and MATH 5163. Prerequisite: MATH 2554. (Typically offered: Irregular)

MATH 523. Advanced Calculus I. 3 Hours.
(Formerly MATH 4513.) The real and complex number systems, basic set theory and topology, sequences and series, continuity, differentiation, and Taylor's theorem. Emphasis is placed on careful mathematical reasoning. Graduate degree credit will not be given for both MATH 4513 and MATH 5213. Prerequisite: Graduate standing. (Typically offered: Fall)

MATH 5223. Advanced Calculus II. 3 Hours.
(Formerly MATH 4523.) The Riemann-Stieltjes integral, uniform convergence of functions, Fourier series, implicit function theorem, Jacobians, and derivatives of higher order. Graduate degree credit will not be given for both MATH 4523 and MATH 5223. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513). (Typically offered: Spring)

MATH 525V. Internship in Professional Practice. 1-3 Hour.
(Formerly MATH 405V.) Professional work experience involving significant use of mathematics or statistics in business, industry or government. Graduate degree credit will not be given for both MATH 405V and MATH 525V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

MATH 5263. Symbolic Logic I. 3 Hours.
(Formerly MATH 4263.) Rigorous analyses of the concepts of proof, consistency, equivalence, validity, implication, and truth. Full coverage of truth-functional logic and quantification theory (predicate calculus). Discussion of the nature and limits of mechanical procedures (algorithms) for proving theorems in logic and mathematics. Informal accounts of the basic facts about infinite sets. Graduate degree credit will not be given for both MATH 4253 and MATH 5263. Prerequisite: MATH 2603, MATH 2803, or PHIL 2203. (Typically offered: Fall)
This course is cross-listed with PHIL 5253.

MATH 5303. Ordinary Differential Equations. 3 Hours.
Existence, uniqueness, stability, qualitative behavior, and numerical solutions. Prerequisite: MATH 2584 and MATH 4513, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall)

MATH 5313. Partial Differential Equations. 3 Hours.
Laplace's equation, Heat equation, Wave Equation, Method of Characteristics. Prerequisite: MATH 4423, MATH 4513, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall)

MATH 5323. Partial Differential Equations II. 3 Hours.
Fourier Transforms, Sobolev Spaces, Elliptic Regularity. Prerequisite: MATH 5313 and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring)

MATH 5335. Mathematical Modeling. 3 Hours.
(Formerly MATH 4153.) Mathematical techniques for formulating, analyzing, and criticizing deterministic models taken from the biological, social, and physical sciences. Techniques include graphical methods, stability, optimization, and phase plane analysis. Graduate degree credit will not be given for both MATH 4153 and MATH 5335. Prerequisite: MATH 2584. (Typically offered: Irregular)

MATH 5363. Scientific Computation and Numerical Methods. 3 Hours.
An introduction to numerical methods used in solving various problems in engineering and the sciences. May not earn credit for this course and MATH 4353 or MATH 4363. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall)
This course is cross-listed with PHYS 5363.

MATH 5373. Finite Element Methods and Solution of Sparse Linear. 3 Hours.
Provides an in-depth understanding of numerical methods for the solution of partial differential equations using Finite Element Methods, Direct and Iterative Methods for the Sparse Linear Systems. Prerequisite: MATH 4353. (Typically offered: Spring)
MATH 5383. Numerical Analysis. 3 Hours.
(Formerly MATH 4363.) General iterative techniques, error analysis, root finding, interpolation, approximation, numerical integration, and numerical solution of differential equations. Graduate degree credit will not be given for both MATH 4363 and MATH 5383. Prerequisite: Graduate standing. (Typically offered: Fall)

MATH 5393. Numerical Linear Algebra. 3 Hours.
(Formerly MATH 4353.) Numerical methods for problems of linear algebra, including the solution of very large systems, eigenvalues, and eigenvectors. Graduate degree credit will not be given for both MATH 4353 and MATH 5393. Prerequisite: Graduate standing. (Typically offered: Spring)

MATH 5403. Numerical Linear Algebra II. 3 Hours.
Provides an in-depth understanding of numerical methods for the solution of large scale eigenvalue problems arising in science and engineering applications including theory, implementation and applications. Prerequisite: MATH 5393. (Typically offered: Fall)

MATH 5423. Introduction to Partial Differential Equations. 3 Hours.
Matrices, Fourier analysis, and partial differential equations. Does not count towards degree credit in MATH. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

MATH 5443. Complex Variables. 3 Hours.
(Formerly MATH 4443.) Complex analysis, series, and conformal mapping. Graduate degree credit will not be given for both MATH 4443 and MATH 5443. Prerequisite: MATH 2603 or MATH 2803, and MATH 2584 or MATH 2584C. (Typically offered: Fall)

MATH 5453. Functional Analysis I. 3 Hours.
Banach Spaces, Hilbert Spaces, operator theory, compact operators, dual spaces and adjoints, spectral theory, Hahn-Banach, open mapping and closed graph theorems, uniform boundedness principle, weak topologies. Prerequisite: MATH 5513, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring Odd Years)

MATH 5503. Theory of Functions of a Real Variable I. 3 Hours.
Real number system, Lebesque measure, Lebesque integral, convergence theorems, differentiation of monotone functions, absolute continuity and the fundamental theorem of calculus L^1 spaces, Holder and Minkowski inequalities, and bounded linear functionals on the L^p spaces. Prerequisite: MATH 4523 or MATH 5223 (formerly MATH 4523), and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall)

MATH 5513. Theory of Functions of a Real Variable II. 3 Hours.
Measure and integration on abstract measure spaces, signed measures, Hahn decomposition, Riemann integral, Radon-Nikodym theorem, Lebesque decomposition, measures on algebras and their extensions, product measures, and Fubini's theorem. Prerequisite: MATH 5503, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring)

MATH 5523. Theory of Functions of a Complex Variable I. 3 Hours.
Complex numbers, analytic functions, power series, complex integration, Cauchy's Theorem and integral formula, maximum principle, singularities, Laurent series, and Mobius maps. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513). (Typically offered: Fall)

MATH 5533. Theory of Functions of a Complex Variable II. 3 Hours.
Riemann Mapping Theorem, analytic continuation, harmonic functions, and entire functions. Prerequisite: MATH 5523, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring)

MATH 5603. Differential Geometry. 3 Hours.
(Formerly MATH 4503.) Topics include: classical differential geometry of curves and surfaces in 3-space, differential forms and vector fields. Graduate degree credit will not be given for both MATH 4503 and MATH 5603. Prerequisite: MATH 2574 or MATH 2574C. (Typically offered: Irregular)

MATH 5703. Topology I. 3 Hours.
An introduction to topology. Topics include metric spaces, topological spaces and general point-set topology, homotopy and the fundamental group, covering spaces, the classification of surfaces. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513), and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall Even Years)

MATH 5713. Topology II. 3 Hours.
The continuation of Topology I. Topics include: advanced homotopy and covering spaces, the Seifert-van Kampen theorem, homology and the Mayer-Vietoris sequence. Prerequisite: MATH 5703, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring Odd Years)

MATH 5723. Differential Topology I. 3 Hours.
An introduction to the topology of smooth manifolds: applications of the inverse function theorem to smooth maps, Sard's theorem, transversality, intersection theory, degrees of maps, vector fields and differential forms on manifolds, integration on manifolds. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513) and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall Odd Years)

MATH 5733. Differential Topology II. 3 Hours.
The continuation of Differential Topology I, with additional advanced topics. Possible advanced topics may include: Morse theory, de Rham cohomology theorem, Poincare duality, Riemannian geometry, and Lie groups and Lie algebras. Prerequisite: MATH 5723 and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring Even Years)

MATH 5803. Introduction to Point-Set Topology. 3 Hours.
(Formerly MATH 4703.) A study of topological spaces including continuous transformations, connectedness and compactness. Graduate degree credit will not be given for both MATH 4703 and MATH 5803. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513). (Typically offered: Irregular)

MATH 599V. Research Topics in Mathematics. 1-3 Hour.
(Formerly MATH 499V.) Current research interests in mathematics. Graduate degree credit will not be given for both MATH 499V and MATH 599V. Prerequisite: Departmental consent. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

MATH 609V. Topics in Math Education. 1-6 Hour.
Topics in mathematics education research including curriculum, teacher education, learning theory, and assessment. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

MATH 610V. Directed Readings. 1-6 Hour.
Directed readings. Prerequisite: Departmental consent. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

MATH 619V. Topics in Algebra. 1-6 Hour.
Current research interests in algebra. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

MATH 6203. Theory of Probability. 3 Hours.
A rigorous mathematical treatment based on measure theory of the fundamental notions and results of the theory of probability. Topics covered include laws of large numbers, central limit theorems, conditional expectations. Additional topics that may be covered include martingales, Markov chains, Brownian motion and stochastic integration. Prerequisite: MATH 5513. (Typically offered: Fall)

MATH 6213. Mathematical Statistics. 3 Hours.
A rigorous mathematical treatment of the fundamental principles and results in the theory of Statistics. Topics include exponential families of distributions, estimation of unknown parameters, the classical theory of theory of hypothesis testing, Large sample approximations, large sample properties of estimators. Prerequisite: MATH 6203. (Typically offered: Spring)
THE UNIVERSITY OF ARKANSAS

MATH 659V. Topics in Analysis. 1-6 Hour.
Current research interests in analysis. Prerequisite: Graduate standing in
mathematics or statistics, or departmental consent. (Typically offered: Fall, Spring
and Summer) May be repeated for degree credit.

MATH 679V. Topics in Topology. 1-6 Hour.
Current research interest in topology. Prerequisite: Graduate standing in
mathematics or statistics, or departmental consent. (Typically offered: Fall, Spring
and Summer) May be repeated for degree credit.

MATH 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Doctoral candidacy in mathematics. (Typically
offered: Fall, Spring and Summer) May be repeated for degree credit.

Mechanical Engineering (MEEG)

Degrees Conferred:
M.S.M.E. (MEEG)
Ph.D. in Engineering (MEEG) (See Engineering (p. 162))

Areas of Study: Thermal systems, mechanical design, nano/mesoscale
materials science, and engineering mechanics.

Primary Areas of Faculty Research: Micro Electromechanical Systems
(MEMS); Micro and Nano Systems; Structural Dynamics and Modal
Analysis; Industrial and Commercial Energy Systems and Energy
Conservation; Machining, Advanced Tooling and Coatings; Thermal and
Mechanical Design of Electronic Packages; Material Failure Analysis
and Design of Experiments; Unsteady Aerodynamics; Computational
Materials Science; Tribology; Design Theory, Complex System Design
and Analysis; Cyberphysical System Fault Modeling and Simulation;
Energy Storage; Control Systems; Robotics; Additive Manufacturing.

M.S.M.E. in Mechanical Engineering

Program Goals and Student Learning Objectives for the Master of
Science Degree: The program goals are broad general statements
of what the Mechanical Engineering Graduate Program intends to
accomplish and describes what a student will be able to do after
completing the degree requirements. They prepare students:

1. Students will gain advanced knowledge in mechanical engineering.
2. Thesis: Students will gain a necessary understanding of their research
field; non-thesis: Students will apply advanced coursework to an
engineering problem.
3. Thesis: Students will contribute new knowledge of fundamental or
applied importance; non-thesis: Students will demonstrate important
application(s) of existing knowledge.
4. Students will be able to communicate effectively during oral
presentations.
5. Students will be able to communicate effectively in writing.

Requirements for the Master of Science Degree: In addition to the
requirements of the Graduate School and the graduate engineering
faculty, the following departmental requirements must be satisfied by
candidates for the M.S.M.E. degree.

1. Candidates who present a thesis are required to complete a minimum
of 24 semester hours of course work and six semester hours of thesis.
2. Candidates who do not present a thesis are required to complete a
minimum of 33 semester hours of course work, which is to include
at least three hours of credit for Research or Special Problems
(including a formal engineering report), completed under direction of
the candidate’s major adviser.
3. All students must present a grade-point average of 3.00 or better on
all courses included in their plan of study, with no more than 6 hours
of “C.”

Graduate Faculty

Chen, Yue, Ph.D. (Vanderbilt University), M.S. (Hong Kong Polytechnic
University), B.S. (Hunan University), Assistant Professor, 2017.

Couvillon, Rick J., Ph.D., M.S.M.E. (Georgia Institute of Technology),
B.S.M.E. (University of Arkansas), Associate Professor, 1981.

Davis, James Allen, Ph.D., M.S.M.E., B.S.M.E. (University of Arkansas),
Teaching Assistant Professor, 1997.

Huang, Po-Hao Adam, Ph.D., M.S., B.S. (University of California-Los
Angeles), Associate Professor, 2006.

Huitink, David, Ph.D., M.S.M.E., B.S.M.E. (Texas A&M University),
Assistant Professor, 2016.

Jensen, David C., Ph.D., M.S., B.S. (Oregon State University), Assistant
Professor, 2012.

Leylek, Jim, Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S.
(University of Illinois at Chicago), Professor, 2011.

Malshe, Ajay P., Ph.D., M.S., B.S. (University of Poona, India),
Distinguished Professor, 1995.

Meng, Xiangbo, Ph.D. (University of Western Ontario), M.S.E. (China
University of Petroleum), B.S.C.E. (Northwestern University), Assistant
Professor, 2016.

Millet, Paul, Ph.D., M.S. (University of Arkansas), B.E. (Vanderbilt
University), Assistant Professor, 2013.
Nair, Arun, Ph.D. (Virginia Tech), M.S. (Colorado State University), B.T. (Mahatma Gandhi University), Assistant Professor, 2013.
Nutter, Darin W., Ph.D. (Texas A&M University), M.S.M.E., B.S.M.E. (Oklahoma State University), Professor, 1994.
Roe, Larry, Ph.D. (University of Florida), M.S., B.S.M.E. (University of Mississippi), Associate Professor, 1994.
Saxen, Ashok, Ph.D., M.S. (University of Cincinnati), B.S.M.E. (Indiana Institute of Technology), Distinguished Professor, 2003.
Sha, Zhenghui, Ph.D. (Purdue University), M.S.M.E. (Xi’an Jiaotong University), B.S.M.E. (Xi’an University of Technology), Assistant Professor, 2017.
Tung, Steve, Ph.D., M.S.M.E. (University of Houston), B.S.M.E. (National Taiwan University), Professor, 2000.
Wejinya, Uchechukwu C., Ph.D., M.S., B.S. (Michigan State University), Associate Professor, 2008.
Zhou, Wenchao, Ph.D. (Georgia Institute of Technology), M.S.M.E. (Xi’an Jiaotong University, Xi’an, China), B.S.M.E. (Huazhong University of Science and Technology, Wuhan, China), Assistant Professor, 2014.
Zou, Min, Ph.D., M.S.M.E. (Georgia Institute of Technology), M.S.A.E., B.S.A.E. (Northwestern Polytechnical University), Professor, 2003.

Courses

MEEG 5033. Advanced Mechanics of Materials I. 3 Hours.
Combined stress, theories of failure, thick-walled cylinders, bending of unsymmetrical sections, torsion in noncircular section, plate stresses, and strain energy analysis. Prerequisite: MEEG 2013 and MEEG 3013. (Typically offered: Irregular)

MEEG 5123. Finite Elements Methods I. 3 Hours.
Development and application of finite element (FE) methods used to solve transient and two-dimensional boundary value problems. Applications are taken from solid and fluid mechanics, heat transfer, and acoustics. Emphasis is placed on the FE methodology in order to make accessible the research literature and commercial software manuals, and to encourage responsible use and interpretation of FE analysis. Prerequisite: MEEG 4123 and graduate standing or consent. (Typically offered: Irregular)

MEEG 5143. Advanced Machine Design. 3 Hours.
Application of advanced topics such as probability theory, fracture mechanics, and computer methods to the design and analysis of complex mechanical systems. Prerequisite: MEEG 4103 and graduate standing. (Typically offered: Irregular)

MEEG 5153. Fundamentals of Mechanical Design. 3 Hours.
(Formerly MEEG 4153.) This class is designed to provide engineering students with a head start in industry as design engineers or working in an engineering related function. The course contents cover machine design and analysis experiences as related to working in industry and performing consulting work. Major topics include the design process, design procedures, fasteners, general design and numerous consulting experiences. A concept design exercise and two special design projects will be assigned to the students as homework. Graduate degree credit will not be given for both MEEG 4153 and MEEG 5153. Prerequisite: MEEG 4103. (Typically offered: Fall)

MEEG 5163. Advanced Product Design. 3 Hours.
This course provides an in-depth and comparative study on the theories of engineering design and equips students to understand and utilize the tools and methodologies founded on those theories. (Typically offered: Fall)

MEEG 5203. Robot Modeling and Simulation. 3 Hours.
This is a graduate level course in Robotics dealing with the behavioral study of robots. Topics covered in this course will include but not limited to the following: mathematical modeling of robots, rigid motions and homogeneous transformation, forward/inverse kinematics of robots, velocity kinematics, path and trajectory planning, robot dynamics, joint control, PD/PID control, and multivariable control. Advanced topics may include passivity-based motion control, geometric nonlinear control, computer vision, vision-based control, and sensor fusion. Prerequisite: Graduate standing in MEEG or ELEG and consent of the instructor. (Typically offered: Spring)

MEEG 5253. Bio-Mems. 3 Hours.
Topics include the fundamental principles of microfluidics, Navier-Stokes Equation, bio/abio interfacing technology, bio/abio hybrid integration of microfabrication technology, and various biomedical and biological problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Lecture 3 hours per week. Prerequisite: MEEG 3503 or CVEG 3213 or CHEG 2133. (Typically offered: Spring)
This course is cross-listed with BENG 5253.

MEEG 5263. Introduction to Micro Electro Mechanical Systems. 3 Hours.
A study of mechanics and devices on the micro scale. Course topics will include: introduction to micro scales, fundamentals of microfabrication, surface and bulk micromachining, device packaging, device reliability, examples of micro sensors and actuators. Recitation three hours per week. (Typically offered: Fall)

MEEG 5273. Electronic Packaging. 3 Hours.
An introductory treatment of electronic packaging from single chip to multichip including materials, electrical design, thermal design, mechanical design, packaging modeling and simulation, processing considerations, reliability, and testing. Credit cannot be earned for both MEEG 5273 and ELEG 5273. Prerequisite: (ELEG 3214 or ELEG 3933) and MATH 2584. (Typically offered: Irregular)
This course is cross-listed with ELEG 5273.

MEEG 5303. Physical Metallurgy. 3 Hours.
Physical and chemical properties of solids and the application of materials in commerce. Prerequisite: MEEG 2303. (Typically offered: Irregular)

MEEG 5323. Physical and Chemical Vapor Deposition Processes. 3 Hours.
Fundamental principles of materials behavior in the deposition of films by PVD/CVD. Topics include kinetic theory of gases, statistical mechanics, plasmas, diagnostics, reaction rate theory, nucleation and growth, crystal structures and defects in thin films, advanced characterization techniques for thin films, and applications in microelectronics, tribology, corrosion, bio- and nano-materials. Prerequisite: Graduate standing in Engineering or consent of instructor. (Typically offered: Irregular)

MEEG 5333. Introduction to Tribology. 3 Hours.
A study of science and technology of interacting surfaces in relative motion. Topics include solid surface characterization, contact between solid surfaces, adhesion, friction, wear, lubrication, micro/nanotribology, friction and wear screening test methods, and tribological components and applications. Students may not earn credit for both MEEG 5333 and MEEG 4313. Prerequisite: Graduate standing. (Typically offered: Irregular)

MEEG 5343. Computational Material Science. 3 Hours.
This course provides students with an overview of different modeling techniques in material science. Applications will be presented on a broad range of modeling techniques including atomistic simulation methods, Monte Carlo techniques, molecular mechanics, and molecular dynamics. Prerequisite: Graduate standing. (Typically offered: Irregular)
MEEG 5403. Advanced Thermodynamics. 3 Hours.
An in-depth review of classical thermodynamics, including availability analysis, combustion, and equilibrium, with an introduction to quantum mechanics and statistical thermodynamics. Prerequisite: Graduate standing in Engineering or consent of instructor. (Typically offered: Spring)

MEEG 5423. Statistical Thermodynamics. 3 Hours.
Concepts and techniques for describing high temperature and chemically reactive gases from a molecular point of view. Introductory kinetic theory, chemical thermodynamics, and statistical mechanics applied. Prerequisite: MEEG 2403 and MATH 2574. (Typically offered: Irregular)

MEEG 5433. Combustion. 3 Hours.
Introduction to combustion of solid, liquid, and gaseous fuels. Equilibrium and kinetics of hydrocarbon oxidation, laminar and turbulent flames, premixed and non-premixed combustion processes, ignition, quenching, stability, emissions and diagnostics. Prerequisite: Graduate standing in Engineering or consent of instructor. (Typically offered: Irregular)

MEEG 5453. Advanced Heat Transfer. 3 Hours.
More in-depth study of topics covered in MEEG 4413, Heat Transfer, and coverage of some additional topics. Prerequisite: MEEG 4413 or equivalent. (Typically offered: Fall)

MEEG 5473. Radiation Heat Transfer. 3 Hours.
Spectral analysis, radiant exchange in gray and non-gray enclosures, gas radiation, and multi-mode heat transfer. Prerequisite: MEEG 5453 or equivalent. (Typically offered: Summer Even Years)

MEEG 5483. Thermal Systems Analysis and Design. 3 Hours.
(Formerly MEEG 4483.) Analysis design and optimization of thermal systems and components with examples from such areas as power generation, refrigeration, and propulsion. Availability loss characteristics of energy systems and availability conservation methods. Graduate degree credit will not be given for both MEEG 4483 and MEEG 5483. Prerequisite: MEEG 4413. (Typically offered: Fall and Summer)

MEEG 5503. Advanced Fluid Dynamics I. 3 Hours.
A basic survey of the characteristics of fluid flow under a variety of conditions with examples. Begins with a derivation of the Navier-Stokes equations and an evaluation of the dimensionless groups found from these equations. Topics to be covered include viscous laminar and turbulent boundary layers, jets and wakes, Stokes flow, inviscid flows with and without free surfaces and turbulence. Prerequisite: MEEG 3503 and MATH 2584. (Typically offered: Spring)

MEEG 5513. Introduction to Flight. 3 Hours.
(Formerly MEEG 4503.) The course will provide understanding in basic aerodynamics, airfoil design and characteristics, and flight control surfaces. Graduate degree credit will not be given for both MEEG 4503 and MEEG 5513. Prerequisite: MATH 2584, MEEG 3503. (Typically offered: Fall)

MEEG 5523. Astronautics. 3 Hours.
(Formerly MEEG 4523.) Study of spacecraft design and operations. Graduate degree credit will not be given for both MEEG 4523 and MEEG 5523. Prerequisite: MEEG 2013 and MEEG 2403 or consent of instructor. (Typically offered: Irregular)

MEEG 5533. Fundamentals of Aerodynamics. 3 Hours.
A study of external-flow fluid mechanics applied to Aerodynamics. Topics include integral and differential forms of the basic fluid equations (continuity, momentum, and energy), potential flow, and supersonic flow. Prerequisite: MEEG 3503. (Typically offered: Spring)

MEEG 5633. Additive Manufacturing. 3 Hours.
This course provides an overview of developing opportunities and critical challenges of additive manufacturing (AM, also known as 3-D printing). It covers existing and emerging additive manufacturing processes in the context of product design, materials selection and processing, and industrial and consumer applications. Students may not receive credit for both MEEG 4633 and MEEG 5633. Prerequisite: MEEG 2101, MEEG 2303, MEEG 3013, and MEEG 3503 or instructor consent. (Typically offered: Spring)

MEEG 5733. Advanced Numerical Methods. 3 Hours.
Numerical methods for the solution of linear and non-linear ordinary and partial differential equations; initial and boundary value problems; one-step and multi-step methods; predominantly finite difference but also finite element and control volume techniques; and computer applications. Graduate standing in Engineering or consent of instructor. (Typically offered: Irregular)

MEEG 5853. Aerospace Propulsion. 3 Hours.
(Formerly MEEG 4433.) Principles, operation, and characteristics of gas turbine and rocket engines. Brief study of novel spacecraft propulsion systems. Graduate degree credit will not be given for both MEEG 4433 and MEEG 5853. Prerequisite: MEEG 3503. (Typically offered: Irregular)

MEEG 5855. Industrial Waste and Energy Management. 3 Hours.
(Formerly MEEG 4453.) Applications of thermodynamics, heat transfer, fluid mechanics, and electric machinery to the analysis of waste streams and energy consumption for industrial facilities. Current techniques and technologies for waste minimization and energy conservation including energy-consuming systems and processes, utility rate analysis, economic analysis and auditing are taught. Graduate degree credit will not be given for both MEEG 4453 and MEEG 5853. Prerequisite: MEEG 4413. (Typically offered: Irregular)

MEEG 591V. Special Topics in Mechanical Engineering. 1-6 Hour.
Consideration of current advanced mechanical engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

MEEG 592V. Individual Study in Mechanical Engineering. 1-3 Hour.
Opportunity for individual study of advanced subjects related to a graduate mechanical engineering program to suit individual requirements. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

MEEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.
The course will cover the concepts of linear-elastic, elastic-plastic and time-dependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. (Typically offered: Fall and Spring)

This course is cross-listed with BMEG 5953, CVEG 5953.
Microelectronics–Photonics (MEPH)

Rick Wise
Program Director
103 Nanoscale Material Science and Engineering Building
479-575-2875
Email: microEP@uark.edu (microEP@cavern.uark.edu)

Microelectronics-Photonics Program Website (http://microEP.uark.edu/)

Degrees Conferred:
M.S., Ph.D. in Microelectronics-Photonics (MEPH)

Program Description: This multidisciplinary program prepares students for careers in the development and manufacturing of micro- to nanoscale materials, processing, and devices in such industries as biosensing, photonics, telecommunications, microelectronics, and MEMs. Typical students in this program will be full-time students residing on campus, but provisions may be made to support remotely located part-time students already engaged in professional careers.

Philosophy of Graduate Education: All entering graduate students from June 1 through May 31 of the following year are formed into a cohort. Cohort members form a natural work group during their first 24 months of graduate school, and the cohort members receive training in how to effectively apply their academic knowledge in professional group environments such as research- or teaching-based academic departments, large governmental research labs, or industrial settings. The cohort training also fosters a supportive graduate community atmosphere that enhances the likelihood of academic success of all the program’s graduate students. The techniques used for this training have been developed at the University of Arkansas under the financial sponsorship of the NSF Integrative Graduate Education and Research Training program, and the Department of Education’s Fund for Improvement of Post Secondary Education program. Through these methods, our graduate students exit our degree programs with the equivalent of one and a half years of on-the-job training in management techniques useful in a technology-based professional career setting.

M.S. in Microelectronics-Photonics

Prerequisites to Degree Program: Applicants to the program must satisfy the requirements of the Graduate School as described in this catalog and have the approval of the Graduate Studies Committee of the Microelectronics-Photonics program (GSCMEP).

Candidates typically have completed a Bachelor of Science degree in either engineering or science, and candidates’ academic backgrounds will be evaluated by the GSCMEP for suitability to the graduate program. To be admitted to graduate study in Microelectronics-Photonics (microEP) without deficiency, candidates are required to have completed a math course sequence through differential equations, an introduction to quantum mechanics through courses such as PHYS 3603, PHYS 3614, or CHEM 3504, and an introduction to electricity and magnetism or electronic circuits. Other undergraduate deficiencies may be identified during the evaluation process, and degree completion will be contingent on successful completion of these identified deficiencies.

Prospective students from foreign countries in which English is not the native language must submit nationally recognized standardized testing results on written English proficiency for consideration by the Graduate School during the admission process. Students may be given conditional admittance pending demonstration of English language skills in appropriate courses at the University of Arkansas. Students wishing to apply for graduate assistantships that require direct contact with students teaching or tutorial role must meet the Graduate School’s English Language proficiency test requirements for such GA positions.

Requirements for the Master of Science Degree: Students choosing this degree program will be assigned an initial adviser upon acceptance to the program. This adviser will be their Cohort Manager during that academic year. Students will work with the Director of the Microelectronics-Photonics program to define their M.S. path to best support their career goals after graduation, with three curricula paths available to Microelectronics-Photonics students:

• Non-thesis path: Students who are funded by personal resources or by graduate assistantships not associated with research or educational grants may complete an M.S. degree with additional course work in place of independent research. While there may be specific narrow career options where this is an appropriate path, the Microelectronics-Photonics program strongly recommends the Professional or Academic paths as providing a much better overall career preparation for working in a technical position. Students completing this path cannot be accepted for the Ph.D. Microelectronics-Photonics program.

• Professional path: Students who plan to enter the technical marketplace after M.S. completion will find this path most beneficial as it requires independent graduate-level research in collaboration with an external technical organization. The research may be in the form of a traditional M.S. six-hour research topic and thesis, or may instead be in the form of two three-hour independent research efforts resulting in written reports with the clarity, style, analysis, and conclusions expected of a journal paper submission. Both the thesis and the written reports will be orally defended before the appropriate student committee. Students in this path will also be required to complete at least one internship of at least six weeks duration to experience a non-academic technical environment. Students completing this path may be considered by the GSCMEP for admission to the Ph.D. Microelectronics-Photonics program based on the strength of their academic course grades, their independent research depth, and the quality of the written research document.
• Academic path: Students who plan to complete an academic campus-based research thesis will take this path, although the research topic may include funding and collaboration with outside technical organizations. Students who complete all requirements for M.S. graduation, including an independent research project and thesis acceptable to their thesis committee, will be eligible without GSCMEP review for admission to the Ph.D. Microelectronics-Photonics program.

Students will form either a theses committee or an advisory committee after they have chosen their M.S. path, defined any independent research areas, and been accepted into a research group if appropriate. A thesis committee will be made up of at least three faculty members, with at least one faculty member each from the Fulbright College of Arts and Sciences and the College of Engineering (the student’s research professor will chair the thesis committee). The advisory committee will include at least one GSCMEP member, the supervising faculty member for a research experience, and the student’s cohort leader. If the student is in the Professional path, then either committee must also include at least one technical professional from the partner external organization as an adjunct faculty member or an ex officio committee member.

Students in this degree program can choose an Academic path, a Professional path, or a Non-thesis path. The course hours to meet the minimum requirements for each path are as follows:

If a University of Arkansas undergraduate student is pursuing a Bachelor of Science degree in a department that has implemented an accelerated B.S./M.S. program (typically allowing six hours of graduate-level course work to be shared between the two degrees), the student may implement the same acceleration for a B.S. departmental degree/ M.S. Microelectronics-Photonics degree set. Both the undergraduate department and the Microelectronics-Photonics program Director must approve the shared courses prior to enrollment.

Each student’s curriculum must also address a need for a focus field. Each student completing a Microelectronics-Photonics degree must define a curriculum containing the following core requirements in the focus field to cover five aspects of micro- to nanoscale materials and devices. In the Applications aspect, every student must complete ELEG 5203 Semiconductor Devices. In the Materials aspect, students must take at least one course emphasizing the nature of the materials applied in their chosen focus field. In the Fabrication aspect, students must take at least one course emphasizing the theory of micro- or nanoscale fabrication in their focus field. In the Fabrication Practice aspect, all students are highly encouraged to complete at least one course containing hands-on laboratory fabrication experience. In the Management of Technology aspect, every student must complete MEPH 5383 Research Commercialization and Product Development.

The Graduate Handbook of the Microelectronics-Photonics Graduate Program will contain a current list of approved courses in each of these areas that will allow students to optimize their curriculum within their focus field. Students may choose a course not listed in the handbook to fill an aspect’s required course with the permission of their thesis committee and the Microelectronics-Photonics Director. Students who have acquired the knowledge contained in these courses through prior education may petition the Microelectronics-Photonics program Director for permission to substitute other classes for these core courses.

Additional core courses to develop operations management skills also have been defined for Microelectronics-Photonics students. During year one of their graduate studies at the University of Arkansas, students are required to take MEPH 5811 1st Year Operations Seminar - Infrastructure Management and MEPH 5911 1st Year Operations Seminar - Personnel Management in the fall and spring semesters and MEPH 5821 Ethics for Scientists and Engineers in their first summer. During year two, students are required to take MEPH 6811 and MEPH 6911 Operations Management Seminars in both fall and spring semesters and MEPH 5832 Proposal Writing and Management in their second summer. Students who begin their graduate studies at the University of Arkansas during the spring semester will be required to take MEPH 5811 in the fall semester following their completion of MEPH 6911 or to take MEPH 5811 concurrently with MEPH 6811. In addition, all cohort members participate in two days of industrial-style inventiveness and team training during the week directly preceding the start of fall classes. Three to five of these seven credit hours may be used in M.S. curricula, shown in the table,
and the remaining credit hours may be applied as Ph.D.-level technical electives.

Students are required to attend monthly Microelectronics-Photonics Research Communication Seminars during the first three semesters of their M.S. degree program, and will enroll in MEPH 5611 Research Communication Seminar of MS Students in their third semester. Students working more than 20 hours per week in a technology-based professional position approved by the Microelectronics-Photonics Director will not be required to be enrolled in this class or attend the monthly seminars as a condition for graduation.

Research thesis hours will be chosen from the department of the student’s research adviser (e.g., PHYS 600V, ELEG 600V, etc.) and will require a written thesis successfully defended in a comprehensive oral exam given by the thesis committee.

A research thesis is required for Academic path students, and is optional for Professional path students. Professional path research must include direct collaboration with an external technical organization.

A student in the Professional path may substitute two Applied Research efforts for a thesis under MEPH 5513 (External location) or MEPH 5523 (Internal on-campus location), provided each semester’s research is of graduate-level quality and is reported at the end of the semester through a written paper and oral presentation to the advisory committee (note that the written paper must match the clarity, style, analysis, and conclusions expected of a journal paper submission). Regardless of where the research is performed, it must include direct collaboration with an external technical organization.

Independent project hours in support of the Non-thesis path may be either MEPH 588V Special Problems in Microelectronics-Photonics or a departmental Special Problems course number, and will require a written project report modeled after a professional journal submission that is then defended in a comprehensive oral exam given by the advisory committee.

If a student is taking either a special problems independent study course (such as MEPH 588V) or a special topics course (such as MEPH 587V) to meet partial requirements for their M.S. degree, then the instructor must supply the Microelectronics-Photonics program office with a syllabus of that class to be included in their program records. They syllabus must include at least the course title, semester, instructor name, a list of specific course objectives, sources of content knowledge, and method by which the student’s mastery of the learning objectives is demonstrated.

Each student is required to enroll in at least one hour of course work each fall and spring semester until the M.S. degree is issued. If all required course work has been completed, the student may enroll in one hour of master’s thesis, or in one hour of a special problems course for credit only.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

**Ph.D. in Microelectronics-Photonics**

**Requirements for the Doctor of Philosophy Degree:** Students choosing this degree program will be assigned an initial adviser upon acceptance to the program. This adviser will be their Cohort manager during that academic year. Students will work with the Director of the Microelectronics-Photonics program to define their dissertation committee after they are accepted by a research faculty for a research project. This committee will be made up of at least four faculty members, with at least one faculty member each from the Fulbright College of Arts and Sciences and the College of Engineering. The student’s research professor will chair the dissertation committee.

Candidates for the Ph.D. program are expected to have completed a Master of Science degree in either engineering or science, with each candidate’s academic background being evaluated by the GSCMEP. Doctoral candidates in Microelectronics-Photonics are expected to have proficiency in the core curriculum of the Master of Science in Microelectronics-Photonics at the University of Arkansas. This core is described in detail above and in the handbook of the Microelectronics-Photonics program and is the knowledge that will be tested in the Microelectronics-Photonics specific candidacy exam administered in the spring semester of each academic year.

Students who have graduated with a Master of Science degree in Microelectronics-Photonics from the University of Arkansas will be expected to take the Microelectronics-Photonics written Ph.D. candidacy exam in the spring semester after M.S. graduation. Students requesting admission to the Ph.D. program with a Master of Science degree in another discipline will be required to take the Microelectronics-Photonics written Ph.D. candidacy exam within four semesters after M.S. graduation, but not before completing MEPH 5911 1st Year Operations Seminar - Personnel Management and MEPH 5383 Research Commercialization and Product Development.

A second part of the candidacy exam, a detailed Ph.D. research proposal, must be accepted by the student’s committee before the end of the 24th month after the start date of the student’s first semester as a Ph.D. student, or the student will be removed from the Ph.D. program. This research proposal is not linked to the written candidacy exam and may be presented to the committee any time in this 24 month period.

Students who fail to pass their written candidacy exam will have a joint consultation with their major professor and their Cohort Manager to formulate a specific action plan to correct student deficiencies identified by the exam. The student will be allowed to retake the written exam only one additional time, which must be during the next scheduled written examination period.

A Ph.D. curriculum will be designed to meet each student’s research interests as well as the Microelectronics-Photonics program’s interest in course breadth. It is to be expected that certain Master of Science degrees will be poorer matches to the Microelectronics-Photonics program focus areas and will therefore require a greater number of graduate courses in the Ph.D. curriculum as a requirement for graduation.

The course plan for each student must include a minimum of 27 hours of graduate coursework beyond the Master of Science degree requirements. Specific courses will be chosen by the student and must be approved by the student’s doctoral advisory committee. The coursework list for the Ph.D. degree will then be combined with the courses completed during the student’s Master of Science studies to assure that the combined course list includes:

1. at least 27 hours of 5000- and 6000-level courses in science and engineering,
2. at least six hours of courses relevant to the management of technology,
3. no more than six hours of special problems and no more than nine hours of special topics courses,
4. and no more than four hours of:

**MEPH 5811 1st Year Operations Seminar - Infrastructure Management**
If a student is taking either a special problems independent study course (such as MEPH 588V) or a special topics course (such as MEPH 587V) to meet partial requirements for their Ph.D. degree, then the instructor must supply the Microelectronics-Photonics program office with a syllabus of that class to be included in their program records. The syllabus must include at least the course title, semester, instructor name, a list of specific course objectives, sources of content knowledge, and method by which the student’s mastery of the learning objectives is demonstrated.

Students are required to attend monthly Microelectronics-Photonics Research Communication Seminars during the first five semesters of their Ph.D. degree program, and will enroll in MEPH 6611 Research Communication Seminar of PhD Students in their fifth semester. Students working more than 20 hours per week in a technology-based professional position approved by the Microelectronics-Photonics Director will not be required to be enrolled in this class or attend the monthly seminars as a condition for graduation.

In addition to these conditions, the 21 hours of research dissertation will be taken under departmental course numbers such as PHYS 700V, CHEG 700V, CHEM 700V, ELEG 700V, etc. as appropriate to match to the department of each student’s major research professor. The dissertation format must meet all Graduate School published guidelines and the Microelectronics-Photonics guidelines as listed in the Microelectronics-Photonics Graduate Student Handbook. A Ph.D. candidate wishing to use a compilation of published papers for the dissertation must receive explicit permission from the GSCMEP to use this style dissertation at least six months prior to his or her dissertation defense, with a meeting between the student’s committee chair and the GSCMEP required before permission can be granted.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

**Graduate Faculty**

Ang, Simon S., Ph.D. (Southern Methodist University), M.S.E.E. (Georgia Institute of Technology), B.S.E.E. (University of Arkansas), Professor, Department of Electrical Engineering, 1988.

Barraza-Lopez, Salvador, Ph.D. (University of Illinois-Urbana-Champaign), B.S. (Instituto Politecnico Nacional de Mexico), Associate Professor, Department of Physics, 2012.

Bellaiche, Laurent, Ph.D., M.S., B.S. (University of Paris VI, France), Distinguished Professor, Department of Physics, 1999.

Benamara, Mourad, Ph.D., M.S. (University of Toulouse III, France), Assistant Professor, Nanotechnology, 2007.

Beyzavi, M. Hassan, Ph.D. (Freie Universität Berlin, Germany), Assistant Professor, Department of Chemistry and Biochemistry, 2017.

Chen, Zhong, Ph.D. (North Carolina State University), Ph.D. (University of Singapore), B.S. (Zhejiang University), Assistant Professor, Department of Electrical Engineering, 2015.

Churchill, Hugh O.H., Ph.D., A.M. (Harvard University), B.A. (Oberlin College), B.M. (Oberlin Conservatory of Music), Assistant Professor, Department of Physics, 2015.

Coridan, Robert, Ph.D., M.S. (University of Illinois-Urbana-Champaign), B.S. (The Ohio State University), Assistant Professor, Department of Chemistry and Biochemistry, 2015.

Di, Jia, Ph.D. (University of Central Florida), M.S., B.S. (Tsinghua University), Professor, Department of Computer Science and Computer Engineering, 2004.

El-Shenawee, Magda O., Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Assiut University, Egypt), Professor, Department of Electrical Engineering, 2001.

Fu, Huaxiang, Ph.D., M.S. (Fudan University), B.S. (University of Science and Technology of China), Professor, Department of Physics, 2002.

Harter, William G., Ph.D. (University of California-Irvine), B.S. (Hiram College), Professor, Department of Physics, 1986.

Hestekin, Jamie A., Ph.D. (University of Kentucky), B.S.Ch.E. (University of Minnesota-Duluth), Professor, Ralph E. Martin Department of Chemical Engineering, 2006.

Heyes, Colin David, Ph.D. (Georgia Institute of Technology), B.S. (Loughborough University), Associate Professor, Department of Chemistry and Biochemistry, 2008.

Huitink, David, Ph.D., M.S.M.E., B.S.M.E. (Texas A&M University), Assistant Professor, Department of Mechanical Engineering, 2016.

Jensen, Morten O., Ph.D. (University of Aarhus, Denmark), M.Sc. (Georgia Institute of Technology), Associate Professor, Department of Biomedical Engineering, 2014.

Kumar, Pradeep, Ph.D. (Boston University), M.Sc. (Indian Institute of Technology, Mumbai, India), Assistant Professor, Department of Physics, 2013.

Malshe, Ajay P., Ph.D., M.S., B.S. (University of Poona, India), Distinguished Professor, Department of Mechanical Engineering, 1995.

Manasreh, Omar, Ph.D. (University of Arkansas), M.S. (University of Puerto Rico-Rio Piedras), B.S. (University of Jordan), Professor, Department of Electrical Engineering, 2003.

McCann, Roy A., Ph.D. (University of Dayton), M.S.E.E., B.S.E.E. (University of Illinois), Professor, Department of Electrical Engineering, 2003.

Millett, Paul, Ph.D., M.S. (University of Arkansas), B.E. (Vanderbilt University), Assistant Professor, Department of Mechanical Engineering, 2013.

Moradi, Mahmoud, Ph.D. (North Carolina State University), M.S., B.S. (Sharif University of Technology), Assistant Professor, Department of Chemistry and Biochemistry, 2015.

Muldoon, Timothy J., M.D. (Baylor College of Medicine), Ph.D. (Rice University), B.S. (Johns Hopkins University), Associate Professor, Department of Biomedical Engineering, 2012.

Nair, Arun, Ph.D. (Virginia Tech), M.S. (Colorado State University), B.T. (Mahatma Gandhi University), Assistant Professor, Department of Mechanical Engineering, 2013.

Naseem, Hameed A., Ph.D. (Virginia Polytechnic State University), M.Sc. (Panjab University), University Professor, Department of Electrical Engineering, 1985.

Pohi, Edward A., Ph.D., M.S.R.E. (University of Arizona), M.S.S.E. (Air Force Institute of Technology), M.S.E.M. (University of Dayton), B.S.E.E. (Boston University), Professor, Department of Industrial Engineering, 2004.

Porter, Errol, M.S.E.E., B.S.E.E. (University of Arkansas), Research Associate, Microelectronics-Photonics, 1997.

Salamo, Gregory J., Ph.D. (City University of New York), M.S. (Indiana University-Purdue University-Indianapolis), B.S. (City University of New York, Brooklyn College), Distinguished Professor, Department of Physics, 1975.

Selvam, R. Panneer, Ph.D. (Texas Tech University), M.S.C.E. (South Dakota School of Mines and Technology), M.E., B.E. (University of
Madras, India), University Professor, Department of Civil Engineering, 1986.

Shew, Woodrow L., Ph.D. (University of Maryland-College Park), B.A. (College of Wooster), Associate Professor, Department of Physics, 2012.

Singh, Surendra P., Ph.D., M.A. (University of Rochester), M.Sc., B.Sc. (Banaras Hindu University, India), University Professor, Department of Physics, 1982.

Tung, Steve, Ph.D., M.S.M.E. (University of Houston), B.S.M.E. (National Taiwan University), Professor, Department of Mechanical Engineering, 2000.

Wang, Yong, Ph.D., M.S. (University of California, Los Angeles), B.S. (University of Science and Technology of China), Assistant Professor, Department of Physics, 2015.

Ware, Morgan, Ph.D. (North Carolina State University), B.S. (Florida State University), Assistant Professor, Department of Electrical Engineering, 2005.

Weijinya, Uchechukwu C., Ph.D., M.S., B.S. (Michigan State University), Associate Professor, Department of Mechanical Engineering, 2008.

Xiao, Min, Ph.D. (University of Texas at Austin), B.S. (Nanjing University), Distinguished Professor, Department of Physics, 1990.

Xiao, Jie, Ph.D. (State University of New York-Binghamton), M.S., B.S. (Wuhan University), Associate Professor, Department of Chemistry and Biochemistry, 2016.

Yu, Fisher, Ph.D. (Arizona State University), M.S., B.S. (Peking University), Associate Professor, Department of Electrical Engineering, 2008.

Zhou, Wenchao, Ph.D. (Georgia Institute of Technology), M.S.M.E. (Xi’an Jiaotong University, Xi’an, China), B.S.M.E. (Huazhong University of Science and Technology, Wuhan, China), Assistant Professor, Department of Mechanical Engineering, 2014.

Zou, Min, Ph.D., M.S.M.E. (Georgia Institute of Technology), M.S.A.E., B.S.A.E. (Northwestern Polytechnical University), Professor, Department of Mechanical Engineering, 2003.

Courses

MEPH 5253. Emerging Technologies in Industry. 3 Hours.

Business leaders present technologies used by their companies. Focusing on Arkansas-based companies, technology needs for the industry and innovative ideas for solutions or advancements are discussed. Students work to develop solutions to address company needs or further develop a company’s current technology. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

MEPH 5383. Research Commercialization and Product Development. 3 Hours.

This survey course examines research commercialization through analysis of IP, technology space, market space, manufacturability, financials, and business plans. Entrepreneurial behaviors and product development within large companies are also discussed. A case study using a current UA faculty member’s research commercialization effort will be developed. Prerequisite: Graduate Standing. (Typically offered: Spring)

MEPH 5393. Product Development Process. 3 Hours.

Demonstration of a student’s technical and management knowledge integration by creating a commercially viable product development process to meet a new societal need, with the technical solution based on micro to nanoscale technology. Final grade based on a detailed written report and oral presentation to a panel. Non-thesis students only. Pre- or Corequisite: MEPH 5383. Prerequisite: Instructor permission. (Typically offered: Spring)

MEPH 5513. Applied Research in External Technical Organizations. 3 Hours.

A one semester narrow focus graduate level research effort while working at an external technical organization’s site. Requires a final report of style and quality suitable for journal submission. This course available only to Professional Path M.S. microEP students, and may substitute for an MEPH 588V External Internship. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

MEPH 5523. Applied On-Campus Collaborative Research with External Technical Organizations. 3 Hours.

A one semester narrow focus graduate level on-campus research effort performed in collaboration with an external technical organization. Requires a final report of style and quality suitable for journal submission. This course available only to Professional Path M.S. microEP students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

MEPH 555V. Internship in External Technical Organization. 1-3 Hour.

Used to document a microEP grad student internship experience in an external technical organization for a minimum duration of six weeks (6-9 weeks=one hour, 10-12 weeks=two hours, and 13-15 weeks=three hours). It may not be used to meet the research requirements of a M.S. degree. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

MEPH 5611. Research Communication Seminar of MS Students. 1 Hour.

This course serves as a forum for MS students to develop oral presentation skills and to exchange research ideas. Research presentations will be on various topics in the area of micro to nanoscale materials, processing, and devices, with research management and planning also being addressed. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

MEPH 5713. Advanced Nanomaterials Chemistry. 3 Hours.

Science and engineering graduates are using more nanomaterials, and modern industry demands that its scientists and engineers have materials chemistry knowledge. Materials from the micro to nanoscale will be examined in this course from the perspective of fundamental chemistry principles to build a picture of tomorrow’s materials. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

MEPH 573L. Fabrication at the Nanoscale. 3 Hours.

This hands-on lab course will cover the disciplines needed to make active electronic and photonic devices utilizing nanoscale structures and fabrication techniques presently used in research and industry. Prerequisite: Graduate standing and permission of the instructor. (Typically offered: Spring)

MEPH 5742. Transmission Electron Microscopy Theory and Operation. 2 Hours.

This new laboratory course will introduce students to practical electron microscopy and to the operation of the Titan S/TEM for examination of sub-angstrom examination of materials. Students will learn how to conduct a TEM study, how to operate the TEM, and how to extract and interpret useful information. Prerequisite: Graduate standing. (Typically offered: Irregular)

MEPH 5811. 1st Year Operations Seminar - Infrastructure Management. 1 Hour.

Weekly seminar for 1st year Microelectronics-Photonics graduate students to discuss issues that increase professional performance in technology-centered organizations. The discussions will focus on issues that affect organizational infrastructure, career planning, organizational structures, and may include examples from current events. Prerequisite: Graduate standing. (Typically offered: Fall)

MEPH 5821. Ethics for Scientists and Engineers. 1 Hour.

This course will introduce methods useful in the practice of ethical decision making in the high technology academic and industrial work place. An emphasis will be placed on applying the methods discussed in the text to student and instructor past professional experiences. Prerequisite: Graduate standing. (Typically offered: Summer)
MEPH 5832. Proposal Writing and Management. 2 Hours.
This course introduces factors that affect proposal success in both the academic and industrial arenas; demonstrates different approaches to writing successful proposals; and introduces students to the legal responsibilities and ramifications of proposal management. Students will write two proposals for peer review and formal evaluation. Prerequisite: Graduate standing. (Typically offered: Summer)

MEPH 587V. Special Topics in Microelectronics-Photonics. 1-4 Hour.
Consideration of current microelectronic-photonic topics not covered in other courses. One section will be created for each topic only after a syllabus is submitted to the microEP office by the faculty member teaching the course. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

MEPH 588V. Special Problems in Microelectronics-Photonics. 1-3 Hour.
Opportunity for individual study of advanced subjects related to a graduate degree in Microelectronics-Photonics to suit individual requirements. One section will be created for each student only after a syllabus is submitted to the microEP office by the supervising faculty member. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

MEPH 5911. 1st Year Operations Seminar - Personnel Management. 1 Hour.
Weekly seminar for 1st year Microelectronics-Photonics graduate students to discuss issues that increase professional performance in technology-centered organizations. The discussions will focus on issues that affect personnel management, team building and structures, and may include examples from current events. Prerequisite: Graduate standing. (Typically offered: Spring)

MEPH 626V. Emerging Technologies in Industry Practicum. 1-3 Hour.
Students engage in demand-driven research projects inspired by Arkansas companies as part of the interdisciplinary IGNITE (Industry Generating New Ideas and Technology through Education) program. These projects, which often result from interactions with companies during MEPH 5253, visit companies and include company locations; developing project goals, budgets, and timelines; and performing research. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

MEPH 6611. Research Communication Seminar of PhD Students. 1 Hour.
This course serves as a forum for Ph.D. students to develop oral presentation skills and to exchange research ideas. Research presentations will be on various topics in the area of micro to nanoscale materials, processing and devices, with research management and planning also being addressed. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

MEPH 6611. 2nd Year Operations Seminar - Management and Leadership. 1 Hour.
Weekly seminar for 2nd year Microelectronics-Photonics graduate students to discuss issues that increase professional performance in technology-centered organizations. The discussions will focus on issues that affect management and leadership effectiveness and efficiency, and may include examples from current events. Prerequisite: Graduate standing. (Typically offered: Fall)

MEPH 6911. 2nd Year Operations Seminar - Advanced Management and Leadership. 1 Hour.
Weekly seminar for 2nd year Microelectronics-Photonics graduate students to discuss advanced issues that increase professional performance in technology-centered organizations. The discussions will focus on the complex issues that affect management and leadership effectiveness and efficiency, and may include examples from current events. Prerequisite: Graduate standing. (Typically offered: Spring)

World Languages, Literatures and Cultures Website (https://fulbright.uark.edu/departments/world-languages/)

Degree Conferred:
M.A. (MLAN)

Areas of Concentration: French and German. Supporting courses are offered in Greek and Latin.

Primary Areas of Faculty Research: Please refer to the Department of World Languages, Literatures and Cultures website for detailed information on faculty members and their areas of expertise.

Degree Program: The Master of Arts Degree in Modern Languages is offered in two tracks, German and French.

M.A. in Modern Languages with French Track
Prerequisites to Degree Program: The student must have a B.A. degree or equivalent from an accredited institution with suitable preparation in the chosen foreign language and be accepted by the department. Deficiencies in undergraduate major or prerequisites for advanced courses may be included in the student’s program.

French Concentration
The Master of Arts degree in Modern Languages, French Concentration offers course work related to the literary and cultural histories of the greater Francophone world, focusing on France. The program provides advanced preparation in literary analysis and research and offers training for teaching French at the college level, including the most recent technological techniques in teaching foreign languages. Graduates of the program receive a solid preparation to pursue a Ph.D. or to teach at the college or secondary levels. Our comprehensive curriculum enables students to pursue careers in education, government, international organizations and other business opportunities either abroad or within the United States. In conjunction with the Comparative Literature and Cultural Studies program (CLCS), the program contributes to the master’s and Ph.D. programs for students working in either Francophone literature, translation, French literature or French cultural studies.

Requirements for the Master of Arts Degree in Modern Languages, French Concentration: Aside from deficiencies, a minimum of 36 semester hours is required for the degree; six of the hours must be selected from the following courses: WLLC 4023, WLLC 4033, WLLC 5063 or other approved WLLC courses. Each M.A. candidate will submit a list of their course work to the graduate adviser before taking the comprehensive exam, which is comprised of a written and an oral exam. The content of the M.A. exam covers course work and the reading list. All course selections must be approved by the graduate adviser.
Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

**M.S. in Modern Languages with German Track**

**Prerequisites to Degree Program:** The student must have a B.A. degree or equivalent from an accredited institution with suitable preparation in the chosen foreign language and be accepted by the department. Deficiencies in undergraduate major or prerequisites for advanced courses may be included in the student’s program. The Master of Arts Degree in Modern Languages is offered in two concentrations, German and French.

**German Concentration**
The Master of Arts Degree in Modern Languages, German Concentration offers course work related to the greater German-speaking world, including Germany, Austria, and Switzerland. The program offers a traditional, canon-centered degree in literary history. Students concentrate primarily on courses investigating literary epochs and particular genres that are focused on literary analysis and research.

Graduates of the program generally continue study at the doctoral level at other institutions or complete alternative licensure or the M.A.T. to teach at the secondary level. Doctoral training in cultural studies and translation is also offered in conjunction with the Comparative Literature and Cultural Studies Program.

**Requirements for the Master of Arts Degree Modern Languages, German Concentration:** Aside from deficiencies, a minimum of 36 semester hours of course work is required for the degree, six hours of which must be selected from the following courses: WLLC 4023, WLLC 4033, or WLLC 5063. Each candidate must pass a comprehensive examination covering course work and a reading list. Upon admission to this program the candidate will be assigned an adviser who, in consultation with the candidate, will design a suitable program for the candidate. The adviser, in consultation with other members of the department, will select an examination committee for the comprehensive written and oral examinations. Detailed program descriptions, including reading lists and examination procedures, are available from the department.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

**Degree Conferred:**
M.M. (MUSC)

**Graduate Certificate Offered:**

Advanced Performance (non-degree)

**Areas of Concentration for the M.M. in Music:** Applied music, composition, theory, instrumental and choral conducting, music history, and music education.

**M.M. with Performance, Instrumental Concentration**

**Prerequisites for applying to the Master of Music Degree Program:**

Applicants should possess a bachelor’s degree with a major in music from an accredited institution. The applicant must apply to both the Graduate School and the Department of Music. In addition, applicants should schedule an audition/interview with the appropriate music faculty.

The specific requirements for admission to each individual concentration of the Master of Music degree program are:

1. Performance and Collaborative Piano applicants must audition for, or submit a DVD of a recorded performance to the appropriate graduate faculty.
2. Music Education applicants are expected to have prior teaching experience and submit a DVD of a recent classroom teaching experience.
3. Music History and Music Theory applicants should submit a paper representative of their work as well as scores for the Graduate Record Exam.
4. Composition applicants are required to submit three of their compositions.

**Requirements for the Master of Music Degree:** In addition to the general requirements of the Graduate School the following must be met:

1. All candidates pursuing the degree of Master of Music with concentrations in Collaborative Piano, Composition, Conducting, Music History, Music Theory, and Performance are required to take a diagnostic exam for aural theory, written theory, and music history prior to the beginning of their first semester of study. Any student diagnosed with deficiencies will be required to register for remedial courses.
2. Candidates needing to augment their piano skills will be required to take additional piano study.
3. Candidates are required to take comprehensive written examinations followed by an oral examination after the completion of coursework.
4. All candidates must participate in at least one ensemble per semester throughout their residence unless pursuing a concentration in Composition, Music Theory, Music History, or Music Education.
5. Candidates for the Master of Music with Music History Concentration are expected to have or acquire reading and writing proficiency in the foreign language corresponding to their field of research (preferably German, Italian, or French).

The programs of study are listed below. All course selections are subject to approval of the graduate advisor in consultation with applied teacher or thesis director.

general requirements of the Graduate School the following must be met:

Requirements for the Master of Music Degree:
The specific requirements for admission to each individual concentration are:

applicant should schedule an audition/interview with the appropriate music faculty.

Applicants should possess a bachelor's degree with a major in music from an accredited institution. The applicant must apply to both the Graduate School and the Department of Music. In addition, applicants should schedule an audition/interview with the appropriate music faculty.

The specific requirements for admission to each individual concentration of the Master of Music program are:

1. Performance and Collaborative Piano applicants must audition for, or submit a DVD of a recorded performance to the appropriate graduate faculty.
2. Music Education applicants are expected to have prior teaching experience and submit a DVD of a recent classroom teaching experience.
3. Music History and Music Theory applicants should submit a paper representative of their work as well as scores for the Graduate Record Exam.
4. Composition applicants are required to submit three of their compositions.

Requirements for the Master of Music Degree: In addition to the general requirements of the Graduate School the following must be met:

1. All candidates pursuing the degree of Master of Music with concentrations in Collaborative Piano, Composition, Conducting, Music History, Music Theory, and Performance are required to take a diagnostic exam for aural theory, written theory, and music history prior to the beginning of their first semester of study. Any student diagnosed with deficiencies will be required to register for remedial courses.
2. Candidates needing to augment their piano skills will be required to take additional piano study.

3. Candidates are required to take comprehensive written examinations followed by an oral examination after the completion of coursework.
4. All candidates must participate in at least one ensemble per semester throughout their residence unless pursuing a concentration in Composition, Music Theory, Music History, or Music Education.
5. Candidates for the Master of Music with Music History Concentration are expected to have or acquire reading and writing proficiency in the foreign language corresponding to their field of research (preferably German, Italian, or French).

The programs of study are listed below. All course selections are subject to approval of the graduate adviser in consultation with the appropriate music faculty.

M.M. with Performance, Keyboard Concentration

Prerequisites for applying to the Master of Music Degree Program:

To be selected from music courses at the 4000-6000 level with the consent of the adviser and to include not more than 4 hours of ensemble.

Note: Study of the appropriate literature is required if not adequately covered in the undergraduate degree presented for admission but will count toward the degree as an elective.

I. Applied Music

MUAP 5211 Graduate Recital II 1

II. Music History, Ethnomusicology, and Music Theory

MUHS 5973 Seminar in Bibliography and Methods of Research 3
MUHS 5903 Seminar in Musicology 3

Select one of the following: 3

Music History, Ethnomusicology, and/or Music Theory to be selected from above, or:

MUHS 5253 Special Topics in Music History

III. Electives

To be selected from music courses at the 4000-6000 level with the consent of the adviser and to include not more than 4 hours of ensemble.

Note: Study of the appropriate literature is required if not adequately covered in the undergraduate degree presented for admission but will count toward the degree as an elective.

Total Hours 36

M.M. with Performance, Voice Concentration

Prerequisites for applying to the Master of Music Degree Program:

To be selected from music courses at the 4000-6000 level with the consent of the adviser and to include not more than 4 hours of ensemble.

Note: Study of the appropriate literature is required if not adequately covered in the undergraduate degree presented for admission but will count toward the degree as an elective.

Total Hours 36

M.M. with Performance, Keyboard Concentration

Prerequisites for applying to the Master of Music Degree Program:

To be selected from music courses at the 4000-6000 level with the consent of the adviser and to include not more than 4 hours of ensemble.

Note: Study of the appropriate literature is required if not adequately covered in the undergraduate degree presented for admission but will count toward the degree as an elective.

Total Hours 36
3. Music History and Music Theory applicants should submit a paper representative of their work as well as scores for the Graduate Record Exam.

4. Composition applicants are required to submit three of their compositions.

Requirements for the Master of Music Degree: In addition to the general requirements of the Graduate School the following must be met:

1. All candidates pursuing the degree of Master of Music with concentrations in Collaborative Piano, Composition, Conducting, Music History, Music Theory, and Performance are required to take a diagnostic exam for aural theory, written theory, and music history prior to the beginning of their first semester of study. Any student diagnosed with deficiencies will be required to register for remedial courses.

2. Candidates needing to augment their piano skills will be required to take additional piano study.

3. Candidates are required to take comprehensive written examinations followed by an oral examination after the completion of coursework.

4. All candidates must participate in at least one ensemble per semester throughout their residence unless pursuing a concentration in Composition, Music Theory, Music History, or Music Education.

5. Candidates for the Master of Music with Music History Concentration are expected to have or acquire reading and writing proficiency in the foreign language corresponding to their field of research (preferably German, Italian, or French).

The programs of study are listed below. All course selections are subject to approval of the graduate adviser in consultation with applied teacher or thesis director.

C. Master of Music in Performance, Voice:

I. Applied Music Requirements include:

V. Electives

Total Hours 4

M.M. with Choral Conducting Concentration

Prerequisites for applying to the Master of Music Degree Program:

Applicants should possess a bachelor’s degree with a major in music from an accredited institution. The applicant must apply to both the Graduate School and the Department of Music. In addition, applicants should schedule an audition/interview with the appropriate music faculty.

The specific requirements for admission to each individual concentration of the Master of Music degree program are:

1. Performance and Collaborative Piano applicants must audition for, or submit a DVD of a recorded performance to the appropriate graduate faculty.

2. Music Education applicants are expected to have prior teaching experience and submit a DVD of a recent classroom teaching experience.

3. Music History and Music Theory applicants should submit a paper representative of their work as well as scores for the Graduate Record Exam.

4. Composition applicants are required to submit three of their compositions.

Requirements for the Master of Music Degree: In addition to the general requirements of the Graduate School the following must be met:

1. All candidates pursuing the degree of Master of Music with concentrations in Collaborative Piano, Composition, Conducting, Music History, Music Theory, and Performance are required to take a diagnostic exam for aural theory, written theory, and music history prior to the beginning of their first semester of study. Any student diagnosed with deficiencies will be required to register for remedial courses.

2. Candidates needing to augment their piano skills will be required to take additional piano study.

3. Candidates are required to take comprehensive written examinations followed by an oral examination after the completion of coursework.

4. All candidates must participate in at least one ensemble per semester throughout their residence unless pursuing a concentration in Composition, Music Theory, Music History, or Music Education.

5. Candidates for the Master of Music with Music History Concentration are expected to have or acquire reading and writing proficiency in the foreign language corresponding to their field of research (preferably German, Italian, or French).

The programs of study are listed below. All course selections are subject to approval of the graduate adviser in consultation with applied teacher or thesis director.

II. Music History and Literature
Course Requirements:

The Graduate Certificate in Advanced Performance is a performance-intensive program for students who already possess the Master of Music or its equivalent. It is designed for all areas of applied study, and is intended for the advanced performer. (Note: The graduate certificate is not a degree.)

Prerequisites to the Graduate Certificate: To enter this program, students must be admitted by the Graduate School and should consult with the Director of Graduate Studies in Music for the specific area of study in which they are interested. Possible areas of study include composition, conducting, chamber music, music theory, and music history.

Requirements for the Graduate Certificate: In addition to the general requirements of the Graduate School the following conditions must be met:

1. All students seeking admission to the program for the Graduate Certificate must show evidence of outstanding performance aptitude and proficiency and demonstrate clear potential for a career as a professional musician.
2. All applicants must present an audition with advanced repertoire encompassing four different style periods and not lasting less than 30 minutes.
3. All applicants must display proficiency in music theory and history at the Master of Music level or equivalent through transcripts or an entry examination.
4. At the end of the program the student must present a full length recital (ca. 70 min).

The programs of study are listed below. All course selections are subject to the approval of the graduate adviser in consultation with the applied teacher.

Course Requirements: 16 hours

Music (MUSC)

Mixdorf, Cory, D.M.A., M.M. (Indiana University), B.A. (University of Northern Iowa), Assistant Professor, 2013.
Muller, Robert K., D.M.A. (University of Cincinnati), M.M. (Bowling Green State University), B.A. (Northern Michigan University), Professor, 1988.
Murdoch, Jeffrey A., Ph.D. (University of Memphis), M.M., B.M. (University of Southern Mississippi), Assistant Professor, 2015.
Na, Dominic K., D.M.A. (University of North Texas), A.D. (Southern Methodist University), Instructor, 2016.
Ortega, Catalina, M.M. (University of Arkansas), B.A. (Pontificia Universidad Javeriana, Colombia), Instructor, 2014.
Panayotova, Miroslava Saitur, Ph.D. (University of Arizona), Instructor, 2014.
Park, Moon, D.M.A. (University of Cincinnati), M.M. (Staatliche Hochschule fur Musik in Freiburg), B.M. (University of Seoul National), Assistant Professor, 2012.
Park, Joon, Ph.D. (University of Oregon), M.A., B.M. (Eastman School of Music), Assistant Professor, 2016.
Ragsdale, Chal, M.M. (East Carolina University), B.S. (Auburn University), University Professor, 1975.
Riley, Nastassja, M.M. (Florida State University), Lecturer, 2014.
Runkles, Henry S., M.M. (University of Arkansas), Lecturer, 2002.
Teal, Kimberly Hannon, Ph.D., M.M. (Eastman School of Music), B.A. (University of Oregon), Assistant Professor, 2016.
Urite, Lda, D.M.A. (University of Kansas), M.M. (University of Arkansas), B.M. (Universidad Nacional de Colombia, Bogotá), Assistant Professor, 2013.

Applied Music (Class) Courses
MUAC 5371. Teaching the High School Percussionist. 1 Hour.
(Formerly MUAC 4371.) A study of solo literature and small and large ensemble literature appropriate for the high school percussionist. Emphasis on advanced snare drum and marimba lit., timpani and the broad range of percussionist instruments. Includes study of high school band, orchestra and percussion ensemble scores. Graduate degree credit will not be given for both MUAC 4371 and MUAC 5371. Prerequisite: MUED 1371. (Typically offered: Irregular)

Applied Music (Private Inst) Courses
Private study at the graduate secondary level. (Typically offered: Fall and Spring) May be repeated for degree credit.
MUAP 510V. Applied Voice/Instrument. 1-5 Hour.
Private study at the graduate level, (Typically offered: Fall and Spring) May be repeated for degree credit.
MUAP 5201. Graduate Recital I. 1 Hour.
Preparation and performance of a public recital of a minimum of 50 minutes of music. (Typically offered: Fall and Spring) May be repeated for degree credit.
MUAP 5211. Graduate Recital II. 1 Hour.
Preparation and performance of a public recital of a minimum of 50 minutes of music. (Typically offered: Fall and Spring) May be repeated for degree credit.

Ethnomusicology Courses
MUSY 5113. Proseminar: Ethnomusicology. 3 Hours.
An introduction to ethnomusicological study, with readings and discussion of seminal writings in the field and practical experience in ethnomusicological analysis and description. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
MUSY 5313. Proseminar: Topics in Asian and Middle Eastern Musics. 3 Hours.
Research seminars on selected topics, such as The Performing Arts in East Asia; and Music and Ritual. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
MUSY 5323. Seminar: Topics in Asian and Middle Eastern Poetry and Music. 3 Hours.
A survey of performance practices from historic western art music through modern non-western music. An introductory course with readings from seventeenth- and eighteenth-century performance treatises as well as a study of written and aural traditions of non-western music. (Typically offered: Irregular)
MUSY 5413. Proseminar: Cross-cultural Performance Practices. 3 Hours.
A survey of performance practices from historic western art music through modern non-western music. An introductory course with readings from seventeenth- and eighteenth-century performance treatises as well as a study of written and aural traditions of non-western music. (Typically offered: Irregular)
MUSY 6333. Advanced Studies in Ethnomusicology. 3 Hours.
Advanced level studies, individually tailored and supervised, including Ethnomusicology (prerequisite MUSY 5113); The Music or Dance of a Selected Area (prerequisite at least one of MUSY 5313, MUSY 5323, MUSY 5943); Historic Performance Practices (prerequisite MUSY 5413); Historical East Asian Musicology (prerequisite MUSY 5313 or MUSY 5323); and Historical Central Asian or Middle- and Near-Eastern Musicology (prerequisite MUSY 5313 or MUSY 5323). (Typically offered: Irregular)

Music Education Courses
MUED 5513. Seminar: Resources in Music Education. 3 Hours.
Study of the analytical and writing skills necessary for academic research in music education. Each student identifies one problem specific to music education, finds and reviews related literature and sources, develops a comprehensive bibliography, and writes a paper which synthesizes the research. Open to graduate students and undergraduates in honors in music education. (Typically offered: Irregular)
MUED 5563. Seminar: Issues in Music Education. 3 Hours.
A seminar exploring the relationships between the profession of teaching music and selected views about learning theories, teaching methods, philosophy, psychology, and other selected topics relevant to contemporary music education. (Typically offered: Irregular)
MUED 5733. Music Education in the Elementary School. 3 Hours.
Concepts of elementary music education; methods, materials, curriculum design, and supervision in elementary school music. (Typically offered: Irregular)
MUED 5743. Characteristics of Special Needs Students in the Music Classroom. 3 Hours.
A review of characteristics and behaviors of students in the music classroom that have identified or unidentified disabilities in learning. Prerequisite: Admission into Music Education for Special Needs Students Graduate Certificate. (Typically offered: Fall)
MUED 5753. Teaching Music to Students with Special Needs. 3 Hours.
Instructs students how to construct and implement curriculum and assessments for students with special needs in a music classroom. Prerequisite: MUED 5743. (Typically offered: Spring)

MUED 5763. Practicum in Teaching Music to Students with Special Needs. 3 Hours.
Students will utilize and evaluate designed curriculum and assessment from MUED 5753 in a music classroom. Prerequisite: MUED 5743. Corequisite: MUED 5753. (Typically offered: Spring)

MUEN 5551. Percussion Ensemble. 1 Hour.
Study and performance of ensemble music for multiple percussion instruments. Rehearsal 3 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5541. Accompanying. 1 Hour.
Piano accompanying of vocal and instrumental soloists. Rehearsal 2 hours per week. Pre- or Corequisite: MUAP 510V. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5551. Percussion Ensemble. 1 Hour.
Study and performance of ensemble music for multiple percussion instruments. Rehearsal 2 hours per week. (Typically offered: Spring and Summer) May be repeated for degree credit.

MUEN 5401. Opera Theatre. 1 Hour.
Study of opera through performances of scenes, chamber and major operatic production. Admission with director's approval. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5411. Men's Chorus. 1 Hour.
Performance-based choral ensemble designed to improve individual and collective vocal skills, develop sight-reading skills, improve the individual's grasp of the essential elements of music, and expose students to repertory of the greater men's chorus canon. Admission is open to any male student on campus. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5421. Inspirational Chorale. 1 Hour.
Performance of African-American literature with particular emphasis on Negro spirituals, traditional/contemporary gospel music and sacred world music. Rehearsal 3 hours per week. (Typically offered: Fall and Spring) May be repeated for up to 2 hours of degree credit.

MUEN 5431. Symphony Orchestra. 1 Hour.
Rehearsal 3 hours per week with extra rehearsals at director's discretion. Admission with director's approval. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5441. Marching Band. 1 Hour.
Rehearsal 8 hours per week. Admission with director's approval. (Typically offered: Fall) May be repeated for degree credit.

MUEN 5451. Schola Cantorum. 1 Hour.
Vocal ensemble limited to the more experienced singers. Rehearsal 5 hours per week. Admission with director's approval. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5461. Wind Symphony. 1 Hour.
Rehearsal 3 to 5 hours per week. Admission by audition and approval of the conductor. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5471. Jazz Performance Laboratory. 1 Hour.
Training in the various styles of jazz and popular music. Rehearsal 3 hours per week. Admission by audition. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5481. Campus Band. 1 Hour.
Rehearsal 3 hours per week. Admission by audition and approval of the conductor. (Typically offered: Spring) May be repeated for degree credit.

MUEN 5491. Concert Band. 1 Hour.
Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public may be required. Admission is by audition or special approval. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

MUEN 5501. Chamber Music. 1 Hour.
Performance of small ensemble music for any combination of instruments and/or voice. Rehearsal 3 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5511. Symphonic Band. 1 Hour.
Rehearsal 3 hours per week. Admission by audition and approval of the conductor. (Typically offered: Spring) May be repeated for degree credit.

MUEN 5521. Woodwind Quintet. 1 Hour.
Study and performance of music for woodwind quintet. Weekly coaching will emphasize intonation, blend, stylistic awareness, and ensemble precision. Repertoire ranges from the 18th to the 20th centuries. 3 hours of rehearsals weekly. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5541. Accompanying. 1 Hour.
Piano accompanying of vocal and instrumental soloists. Rehearsal 2 hours per week. Pre- or Corequisite: MUAP 510V. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5551. Percussion Ensemble. 1 Hour.
Study and performance of ensemble music for multiple percussion instruments. Rehearsal 2 hours per week. (Typically offered: Spring and Summer) May be repeated for degree credit.
MUEN 5561. Musical Theater Orchestra. 1 Hour.
Instrumental ensemble with focus on the preparation and performance of musical theater pit orchestra music, in conjuction with UA Theater's mainstage musical. Admission by audition or director's approval. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 2 hours of degree credit.

MUEN 5591. Women's Chorus. 1 Hour.
Select performance-based choral ensemble designed to improve individual and collective vocal skills, develop sight-reading skills, improve the individual's grasp of the essential elements of music, and expose students to repertory of the greater treble chorus canon. (Typically offered: Fall and Spring) May be repeated for up to 2 hours of degree credit.

MUEN 5691. Wind Ensemble. 1 Hour.
Large ensemble setting performing orchestral wind and symphonic band literature with emphasis on high performance standards through style and interpretation. Concerts of high artistic merit which serve the campus community and general public are required. Admission is by audition. (Typically offered: Fall and Spring) May be repeated for up to 2 hours of degree credit.

MUEN 5711. Flute Ensemble. 1 Hour.
Study and performance of music for multiple flutes, including trios, quartets, quintets, and flute choir. Rehearsal 2 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5721. Clarinet Ensemble. 1 Hour.
Study and performance of music for multiple clarinets, including trios, quartets, quintets, and clarinet choir. Rehearsal 2 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5731. Saxophone Ensemble. 1 Hour.
Study and performance of music for multiple saxophones, including trios, quartets, quintets, and saxophone choir. Rehearsal 3 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5751. Trumpet Ensemble. 1 Hour.
Study and performance of music for multiple trumpets, including trios, quartets, quintets, and trumpet choir. Rehearsal 2 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5761. New Music Ensemble. 1 Hour.
Small, select ensemble with emphasis on music written in the last hundred years, especially by important living composers. Focus on audience engagement through high performance standards, unconventional settings, and programs unique to the region. Off-campus appearances and outreach activities are required. Admission by consent. (Typically offered: Fall and Spring)

MUEN 5771. Trombone Ensemble. 1 Hour.
Study and performance of music for multiple trombones, including trios, quartets, quintets, and trombone choir. Rehearsal 2 hours per week. (Typically offered: Irregular) May be repeated for degree credit.

MUEN 5781. Tuba Ensemble. 1 Hour.
Study and performance of music for multiple combinations of tuba and euphonium, including trios, quartets, quintets, and low brass choir. Rehearsal 2 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5881. Chamber Choir. 1 Hour.
Continuation of Chamber Choir V for graduate students. Study and performance of vocal chamber music. Rehearsal 2 hours per week for 1 hour of credit. (Typically offered: Fall and Spring)

Music History Courses

MUHS 5253. Special Topics in Music History. 3 Hours.
(Formerly MUHS 4253.) Specialized topics not extensively covered in MUHS 3703 or MUHS 3713. Satisfactory completion of the term paper in this class will fulfill the Fulbright College writing requirement. Graduate degree credit will not be given for both MUHS 4253 and MUHS 5253. Prerequisite: MUHS 3703 and MUHS 3713. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUHS 5563. Collaborative Piano Literature I, Woodwind and Brass Repertoire. 3 Hours.
Survey of collaborative literature for piano and wood or brass instruments. Focus on music for the collaborative duo (instrument and piano) including sonatas and concerti. (Typically offered: Fall Even Years)

MUHS 5573. Collaborative Piano Literature II, String Repertoire. 3 Hours.
Survey of collaborative literature for the piano. Focus on the repertoire of sonatas, concerti and concert works for the piano and instrument (violin, viola, cello, and double bass). (Typically offered: Spring Odd Years)

MUHS 5633. Survey of Symphonic Literature. 3 Hours.
(Formerly MUHS 4733.) A survey of the symphonic literature from its beginning to the present. Graduate degree credit will not be given for both MUHS 4733 and MUHS 5633. (Typically offered: Spring Even Years)

MUHS 5673. Survey of Vocal Literature II. 3 Hours.
(Formerly MUHS 4773.) A survey of vocal literature for the solo voice. Graduate degree credit will not be given for both MUHS 4773 and MUHS 5673. Prerequisite: MUHS 4763. (Typically offered: Spring Odd Years)

MUHS 5693. Band Literature. 3 Hours.
(Formerly MUHS 4793.) A study of literature written for performance by concert band, symphonic band, and wind ensemble, representative of the following five periods in Music History: Renaissance (1420-1600), Baroque (1600-1750), Classical (1750-1820), Romantic (1820-1900), and Contemporary (1900-present). Graduate degree credit will not be given for both MUHS 4793 and MUHS 5693. (Typically offered: Irregular)

MUHS 5703. Survey of String Literature. 3 Hours.
(Formerly MUHS 4703.) A survey of solo and chamber music literature involving stringed instruments. Graduate degree credit will not be given for both MUHS 4703 and MUHS 5703. Prerequisite: MUAP 110V and MUTH 3613. (Typically offered: Fall Even Years)

MUHS 5722. Directed Studies in Music Literature I. 2 Hours.
Research in music literature in the performance field of the individual student. (Typically offered: Fall and Spring)

MUHS 5732. Directed Studies in Music Literature II. 2 Hours.
Research in music literature in the performance field of the individual student. Prerequisite: MUHS 5722. (Typically offered: Fall and Spring)

MUHS 5753. Seminar in Medieval & Early Renaissance. 3 Hours.
Intensive studies in music of Western Europe from early Christian times through the 15th century. (Typically offered: Irregular)

MUHS 5763. Survey of Vocal Literature I. 3 Hours.
(Formerly MUHS 4763.) A survey of concert literature for the solo voice. Graduate degree credit will not be given for both MUHS 4763 and MUHS 5763. (Typically offered: Fall Even Years)

MUHS 5773. Seminar in Music of the 18th Century. 3 Hours.
Intensive studies of late Baroque and Classical music. (Typically offered: Irregular)

MUHS 5783. Seminar in Music of the 19th Century. 3 Hours.
Intensive studies in music of the 19th century. (Typically offered: Spring Odd Years)

MUHS 5793. Seminar in Music of the 20th Century. 3 Hours.
Intensive studies in 20th century music. (Typically offered: Fall Even Years)
MUHS 5803. Survey of Keyboard Literature I. 3 Hours.
(Formerly MUAP 4803.) A survey of the piano works of outstanding composers. Graduate degree credit will not be given for both MUAP 4803 and MUHS 5803. Prerequisite: MUAP 110V. (Typically offered: Fall Even Years)

MUHS 5913. Survey of Keyboard Literature II. 3 Hours.
(Formerly MUHS 4813.) A survey of the piano works of outstanding composers. Graduate degree credit will not be given for both MUAP 4813 and MUHS 5813. Prerequisite: MUAP 4803. (Typically offered: Spring Odd Years)

MUHS 589V. Seminar in Music History. 1-4 Hour.
(Formerly MUHS 489V.) Subject matter not covered in other courses. With permission, may be repeated for credit if topics are different. Graduate degree will not be given for both MUHS 489V and MUHS 589V. (Typically offered: Irregular) May be repeated for degree credit.

MUHS 5903. Seminar in Musicology. 3 Hours.
Focuses on specialized topics and repertoires within the history of Western music and introduces students to musicological approaches to these subjects. Prerequisite: MUHS 5973 or instructor consent. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUHS 5943. Seminar in Opera. 3 Hours.
Intensive studies in operatic literature. (Typically offered: Irregular)

MUHS 5952. Choral History and Literature I. 2 Hours.
Detailed study of choral history and literature from Gregorian chant to J.S. Bach. (Typically offered: Irregular)

MUHS 5962. Choral History and Literature II. 2 Hours.
Detailed study of choral history and literature from J.S. Bach to the present. (Typically offered: Irregular)

MUHS 5973. Seminar in Bibliography and Methods of Research. 3 Hours.
A survey of the methods and materials of musical research, including bibliography, methods of analysis, and style in the presentation of research results. Open to graduate students and to juniors in Honors. (Typically offered: Fall)

MUHS 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Music Pedagogy Courses

MUPD 5202. Voice Pedagogy I. 2 Hours.
Graduate-level study of the techniques and materials of teaching voice. (Typically offered: Irregular)

MUPD 5763. Piano Pedagogy. 3 Hours.
(Formerly MUPD 4863.) Analytical study and discussion of the various approaches to piano pedagogy and its application in individual/class instruction. Involves demonstration of principles through actual teaching of beginning, intermediate and upper level students. Graduate degree credit will not be given for both MUPD 4863 and MUPD 5763. (Typically offered: Spring Even Years)

MUPD 577V. Special Topics in Pedagogy. 1-6 Hour.
(Formerly MUPD 477V.) Subject matter not covered in other sources. With permission, may be repeated for credit if topics are different. Graduate degree credit will not be given for both MUPD 477V and MUPD 577V. (Typically offered: Irregular) May be repeated for degree credit.

MUPD 582V. Conducting. 1-4 Hour.
Private lessons of 1/2 hour and 1 hour conducting laboratory each week. Development of skills in conducting symphony, choral, opera, oratorio, ballet, and band repertoire. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

MUPD 584V. Opera Workshop. 1-2 Hour.
A basic course in every phase of opera production, including staging, set design, music coaching, voice casting, and translation. (Typically offered: Fall and Spring)

MUPD 586V. Woodwind Techniques. 1-2 Hour.
A continuation of the undergraduate courses in techniques and materials for elementary and secondary school music teaching. Prerequisite: One year of similar class instruction in the field on the undergraduate level. (Typically offered: Fall and Spring)

MUPD 587V. Brass Techniques. 1-2 Hour.
A continuation of the undergraduate class brass instrument course. Emphasis is placed on teaching methods, techniques, concepts, and materials. Prerequisite: One year of similar class instruction in the field on the undergraduate level. (Typically offered: Irregular)

MUPD 599V. Special Workshop in Music. 1-6 Hour.
Presented by visiting master artist-teacher in various fields of music performance, teaching and composition. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

Music Theory Courses

MUTH 5322. Score Reading. 2 Hours.
(Formerly MUTH 4322.) A conductor's approach to the technique of score reading and analysis of orchestra, band, and choral scores for the purpose of preparing composition for rehearsal and performance. Graduate degree credit will not be given for both MUTH 4322 and MUTH 5322. (Typically offered: Fall)

MUTH 5343. Analytical Techniques. 3 Hours.
An intensive study of selected works from music literature. Schenkerian analysis, rhythmic analysis, and set theory analytical techniques will be studied and employed in addition to traditional harmonic and formal analysis. Prerequisite: MUTH 3613 or equivalent and graduate standing. (Typically offered: Irregular)

MUTH 5612. Orchestration. 2 Hours.
(Formerly MUTH 4612.) A continuation of study of the capabilities of the various orchestral and band instruments and their use in arrangement for ensembles, band, and orchestra. Scoring for orchestra. Graduate degree credit will not be given for both MUTH 4612 and MUTH 5612. Prerequisite: MUTH 3612. (Typically offered: Spring)

MUTH 5623. Pedagogy of Theory. 3 Hours.
Detailed study of methods of teaching undergraduates courses in music theory and aural perception. Prerequisite: Graduate standing. (Typically offered: Irregular)

MUTH 5631. Music Theory Teaching Practicum. 1 Hour.
Supervised teaching of an undergraduate course in music theory or aural perception, including lesson plan and examination preparation and in-class observation. (Typically offered: Irregular)

MUTH 5643. Analysis of 20th Century Music. 3 Hours.
Study of 20th century music and analytic techniques including pitch class set theory and serial techniques. Prerequisite: Graduate standing. (Typically offered: Irregular)

MUTH 5662. Instrumental Arranging. 2 Hours.
A practical course in arranging for the various small ensembles including keyboard. Review of instrumental ranges and capabilities. Study of current trends in instrumental ranges and arranging. (Typically offered: Irregular)

MUTH 5672. Advanced Orchestration. 2 Hours.
A study of advanced principles of orchestral writing through individual projects in scoring and analysis. Prerequisite: MUTH 4612 or MUTH 5612 (formerly MUTH 4612) or equivalent. (Typically offered: Irregular)

MUTH 568V. Composition. 1-4 Hour.
Private lessons of one-half hour, and one hour of composition laboratory session each week. Development of skills in creative musical expression specifically for composition-theory majors - others admitted by consent. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.
MUTH 5703. Writing Music Analysis. 3 Hours.
(Formerly MUTH 4703.) Analysis of music with an emphasis on analytical writing skills and the use of library source materials. Graduate degree credit will not be given for both MUTH 5703 and MUTH 5703. Prerequisite: MUTH 3603. (Typically offered: Spring)

MUTH 577V. Special Topics in Music Theory. 1-4 Hour.
(Formerly MUTH 477V.) Subject matter not covered in other courses. Graduate degree credit will not be given for both MUTH 477V and MUTH 577V. Prerequisite: Instructor consent. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

MUTH 599V. Independent Study in Music Theory. 1-6 Hour.
Provides students with an opportunity to pursue special study of topics in music theory. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

MUTH 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Eleanor Mann School of Nursing website (http://nurs.uark.edu)

**Degrees Conferred:**
M.S. in Nursing (NURS)
Doctor of Nursing Practice (NURS)

**Primary Areas of Faculty Research:** Job satisfaction, recruiting and retaining nursing faculty; cooperative testing; diversity and high-risk populations, student success, emotional intelligence; patient teaching and safety in the healthcare environment; advanced practice nurses’ work environments, their interface among rural and underserved populations, and their impact on health care outcomes; fall prevention in community dwelling older adults; oral health; mobility in older adults; preventing falls in the acute care setting; transitional care; nursing education best practices; care giver issues in older adults with dementia; cultural and behavioral factors of obesity; health behaviors in children, nutrition beliefs and practices, executive function, motivational factors, cultural beliefs; research affecting the pediatric population; migrant childhood health; lactation assessment and education; infant immune system research; minority population and education; education and cultural evaluation among nursing students; infant feeding; childhood obesity; hematology; oncology; smoking cessation; improving outcomes in trauma care; rib Score and Protocol Pain management strategies in critical care; IA joint injection protocol development; CAMP Scores to measure trauma systems in US; CAMP scores to compare trauma systems in US to Brazil; pediatric autism spectrum disorders; Increasing evidence-based care in primary care clinics; promoting NP practice in Arkansas; higher education and primary/secondary level student issues/concerns; obesity; PCORI; community-engaged research; diabetes; patient/family health education; mental health; implementation of a protocol for screening at-risk walk-in clinic patients for diabetes

**Master of Science in Nursing**
The Master of Science in Nursing (M.S.N.) Program offered by the Eleanor Mann School of Nursing expands on the philosophy of the undergraduate nursing program and contributes to the mission of the College of Education and Health Professions and the University of Arkansas. Graduates of the M.S.N. are prepared to contribute to the nursing profession through the application of knowledge and skills in leadership, education, and clinical practice. Completion of the M.S.N. program provides the foundation for academic progression to a research or practice-focused doctoral program.

**Admission Requirements for the Master of Science in Nursing Degree Program**

- Admission to the University of Arkansas Graduate School (http://grad.uark.edu/) (Requires a $60 non-refundable application fee)
- Admission to the Eleanor Mann School of Nursing MSN program (https://forms.coehp.uark.edu/) (requires a $40 application fee)
- Completion of a nationally accredited professional degree program in nursing
- A 3.0 cumulative GPA on the last 60 credit hours of attempted coursework in previous nursing program
- Current unencumbered license to practice as a registered nurse
- Submission of official GRE scores taken within five years and indicating capacity for master’s level work
- Submission of curriculum vitae or professional resume
- Completion of candidate interview
- Two letters of recommendation, one from a faculty member and one from an employer
- Qualified applicants will be admitted on a space available basis
- Applicants who do not meet the above requirements may be referred to the Graduate Admissions Committee for special consideration and may be required to fulfill additional prerequisites.

**Progression Requirements for the Master of Science in Nursing Degree**

Students are responsible for meeting the standards of academic and professional performance specified by the graduate programs in nursing. In order to progress in the program, students must adhere to the following:

- Grade requirements as outlined below
- Policies of the University of Arkansas Graduate School are on the Objectives and Regulations page (http://catalog.uark.edu/grad/ecohp/objectivesandregulations/).
- Clinical Compliance Guidelines as outlined in the Eleanor Mann School of Nursing Graduate Student Handbook also in the Graduate Handbook (https://nurs.uark.edu/degrees-offered/msn/graduate-handbook.php).
• Maintenance of an unencumbered registered nurse license
• Compliance with the nurse practice act(s) which regulate(s) the student’s license(s)

Grade Requirements

1. A grade of “C” or lower may be earned in a nursing course only once.
2. A grade of “B” or better must be received upon repeat of the nursing course in order to progress in the program; courses may only be repeated once to achieve a grade of “B” or higher.
3. If a second “C” or lower is earned in a nursing course, the student will not be allowed to progress in the program, and will not be allowed to return to the program.
4. A student may only repeat a nursing course in which a “C” or lower has been received one time throughout the program. A student may only withdraw from a course one time.
5. Grades of “D” or “F” are not accepted for credit.

Doctor of Nursing Practice Programs

The Doctor of Nursing Practice provides the terminal degree for nurses who will assume leadership roles as practitioners or specialists in the field of nursing. There are two entry levels for students: 1) post completion of the baccalaureate degree in nursing and licensure as a registered nurse (RN), or 2) post completion of a master’s degree in nursing that has resulted in national certification as an advanced practice nurse (nurse practitioner, clinical nurse specialist, nurse midwife, or nurse anesthetist).

The online program is built upon the standards set forth by the American Association of Colleges of Nursing’s Essentials of Doctoral Education for Advanced Nursing Practice (2006), and incorporates specialty standards of the Acute Care Nurse Practitioner Competencies (2004) and the National Association of Clinical Nurse Specialists (2009). As such, students completing the B.S.N. to D.N.P. program of study will be eligible to sit for the adult-geriatric acute care nurse practitioner (ACNP), the adult/geriatric clinical nurse specialist (CNS), or the Family Nurse Practitioner (FNP) certification exam offered by the American Nurses Credentialing Center (ANCC) based on the concentration completed.

Students in both entry levels must complete a capstone project and 1,000 clinical hours while enrolled in a graduate program. Current advanced practice nurses who enter the program as post-master's students must complete clinical hours to supplement clinical hours taken in their master's program. A variety of distance learning methods will be used to expedite clinical requirements. However, students should anticipate at least one visit to the main campus during their program of study.

Upon completion of the program, graduates will be able to:

• Evaluate and utilize advanced knowledge and theories from nursing and related disciplines to solve complex health issues for individuals, aggregates, populations, and systems.
• Design, implement and evaluate strategies that promote and sustain quality improvement at the organizational and policy levels.
• Provide leadership in the transformation of health care through intra-professional collaboration, application of technology, and policy development.
• Incorporate evidence-based clinical prevention and health services for individuals, aggregates, and populations.
• Demonstrate clinical expertise, systems thinking, and accountability in designing, delivering, and evaluating evidence-based care to improve patient outcomes.

Areas of concentration for the B.S.N.-D.N.P. student: Adult-gerontology acute-care nurse practitioner, or family nurse practitioner.

M.S.N. with Nurse Educator Concentration

Admission Requirements for the M.S.N. and D.N.P. Degrees

1. Admission to the University of Arkansas Graduate School
2. Submission of GRE scores for M.S.N. and B.S.N.-D.N.P. students.
3. Completion of the Eleanor Mann School of Nursing (EMSON) application.
4. Completion of a baccalaureate degree in nursing from an NLNAC or CCNE accredited program and for post-M.S.N. to D.N.P. students, a master’s degree in nursing from an NLNAC or CCNE accredited program.
5. Current unencumbered licensure to practice as a registered nurse, and for M.S.N.-D.N.P. students, APN licensure, if required by student's state of residence and certification as an APRN.
6. Completion of a basic health assessment course (academic or continuing education).
7. Completion of a basic-level statistics course with a grade of “C” or above. Additionally, for M.S.N. to D.N.P. students, completion of a graduate-level health policy course with a grade of “B“ or above.
8. Evidence of current CPR (American Heart Association for Professionals) certification, TB screening, Hepatitis B vaccination or titer showing immunity, Tdap/Td, Varicella vaccination or titer showing immunity, MMR vaccination, annual flu vaccination, and health insurance.
9. Basic computer and library skills including the use of electronic databases.
10. Qualified applicants will be admitted on a space available basis.

Following admission to the program and prior to enrolling in the first clinical course (NURS 5112 Advanced Health Assessment and Diagnostic Reasoning Clinical Practicum Advanced Health Assessment for B.S.N.-D.N.P. students and NURS 6224 Specialty Practice Clinical III for M.S.N.-D.N.P. students), the students must:

• Complete a background check by Dead Day of the previous semester in which they will enroll in the clinical course.
• Provide EMSON with proof of HepB, TB, CPR, MMR, Varicella, and Tdap/Td vaccinations and proof of health insurance by Dead Day of the previous semester in which they will enroll in the clinical course.
• Provide evidence of a current license to practice as a registered nurse in the state where precepted hours will be provided by Dead Day of the previous semester in which they will enroll in the clinical course.
• Provide evidence of national certification and licensure as an advanced practice nurse – if their state of residency requires licensure – for post-MSN students in the DNP program.
• Complete a drug screen within a four week time period prior to the first day of class of the semester in which the student is enrolled in the clinical course.
• Provide any other requirements requested by the clinical institution.

Requirements for the M.S. Nursing with Nurse Educator Concentration:

In addition to the general requirements of the Graduate School, students must complete a minimum of 38 credits (41 credits with thesis option) including the following courses:
Admission Requirements for the M.S.N. and D.N.P. Degrees

Students who intend to pursue doctoral preparation are strongly urged to select the thesis option. All candidates for the Master of Science in Nursing (MSN) must successfully complete a comprehensive written exam.

M.S.N. with Clinical Nurse Specialist Concentration

Admission Requirements for the M.S.N. and D.N.P. Degrees

1. Admission to the University of Arkansas Graduate School
2. Submission of GRE scores for M.S.N. and B.S.N.-D.N.P. students.
3. Completion of the Eleanor Mann School of Nursing (EMSON) application.
4. Completion of a baccalaureate degree in nursing from an NLNAC or CCNE accredited program and for post-M.S.N. to D.N.P. students, a master’s degree in nursing from an NLNAC or CCNE accredited program.
5. Current unencumbered licensure to practice as a registered nurse, and for M.S.N.-D.N.P. students, APN licensure, if required by student’s state of residence and certification as an APRN.
6. Completion of a basic health assessment course (academic or continuing education).
7. Completion of a basic-level statistics course with a grade of “C” or above. Additionally, for M.S.N. to D.N.P. students, completion of a graduate-level health policy course with a grade of “B” or above.
8. Evidence of current CPR (American Heart Association for Professionals) certification, TB screening, Hepatitis B vaccination or titer showing immunity, Tdap/Td, Varicella vaccination or titer showing immunity, MMR vaccination, annual flu vaccination, and health insurance.
9. Basic computer and library skills including the use of electronic databases.
10. Qualified applicants will be admitted on a space available basis.

Following admission to the program and prior to enrolling in the first clinical course (NURS 5112 Advanced Health Assessment and Diagnostic Reasoning Clinical Practicum Advanced Health Assessment for B.S.N.-D.N.P. students and NURS 6224 Specialty Practice Clinical III for M.S.N.-D.N.P. students), the students must:

• Complete a background check by Dead Day of the previous semester in which they will enroll in the clinical course.
• Provide EMSON with proof of HepB, TB, CPR, MMR, Varicella, and Tdap/Td vaccinations and proof of health insurance by Dead Day of the previous semester in which they will enroll in the clinical course.
• Provide evidence of a current license to practice as a registered nurse in the state where precepted hours will be provided by Dead Day of the previous semester in which they will enroll in the clinical course.
• Provide evidence of national certification and licensure as an advanced practice nurse – if their state of residency requires licensure – for post-MSN students in the DNP program.
• Complete a drug screen within a four week time period prior to the first day of class of the semester in which the student is enrolled in the clinical course.
• Provide any other requirements requested by the clinical institution.

Requirements for the M.S. Nursing with Clinical Nurse Specialist Concentration:

In addition to the general requirements of the Graduate School, students must complete a minimum of 41 credits (44 credits with thesis option) including the following courses:

Graduate Nursing Core

NURS 5003 Theoretical and Scientific Foundations for Nursing Practice 3

NURS 5043 Concepts of Health Promotion Within Diverse Populations 3

NURS 5053 Evidence-Based Practice and Innovation in Nursing 3

NURS 5063 Health Care Policy 3

Advanced Practice Core

NURS 5033 Scientific Foundations and Role Development in Advanced Practice Nursing 3

NURS 5143 Advanced Pathophysiology 3

NURS 5102 2

NURS 5111 1

NURS 5123 Pharmacotherapeutics 3

Clinical Specialist Core

NURS 5212 2

NURS 5225 5

NURS 5232 2

NURS 5245 5

Thesis or Research Project

NURS 579V Independent Study 3-6

or NURS 600V Master's Thesis

Total Hours 41-44
Students complete a total of 500 hours of clinical practicum. Students who select the thesis option complete a minimum of six credits of thesis that will count toward the degree. As an alternative to completing a thesis, students may elect the scholarly project option and are required to complete a three-credit independent study. Students who intend to pursue doctoral preparation are strongly urged to select the thesis option. All candidates for the Master of Science in Nursing (M.S.N.) must successfully complete a comprehensive written exam.

M.S.N. with Nurse Executive Leader Concentration

Admission Requirements for the M.S.N. and D.N.P. Degrees

1. Admission to the University of Arkansas Graduate School
2. Submission of GRE scores for M.S.N. and B.S.N.-D.N.P. students.
3. Completion of the Eleanor Mann School of Nursing (EMSON) application.
4. Completion of a baccalaureate degree in nursing from an NLNAC or CCNE accredited program and for post-M.S.N. to D.N.P. students, a master's degree in nursing from an NLNAC or CCNE accredited program.
5. Current unencumbered licensure to practice as a registered nurse, and for M.S.N.-D.N.P. students, APN licensure, if required by student's state of residence and certification as an APRN.
6. Completion of a basic health assessment course (academic or continuing education).
7. Completion of a basic-level statistics course with a grade of “C” or above. Additionally, for M.S.N. to D.N.P. students, completion of a graduate-level health policy course with a grade of “B” or above.
8. Evidence of current CPR (American Heart Association for Professionals) certification, TB screening, Hepatitis B vaccination or titer showing immunity, Tdap/Td, Varicella vaccination or titer showing immunity, MMR vaccination, annual flu vaccination, and health insurance.
9. Basic computer and library skills including the use of electronic databases.
10. Qualified applicants will be admitted on a space available basis.

Following admission to the program and prior to enrolling in the first clinical course (NURS 5112 Advanced Health Assessment and Diagnostic Reasoning Clinical Practicum Advanced Health Assessment for B.S.N.-D.N.P. students and NURS 6224 Specialty Practice Clinical III for M.S.N.-D.N.P. students), the students must:

• Complete a background check by Dead Day of the previous semester in which they will enroll in the clinical course.
• Provide EMSON with proof of HepB, TB, CPR, MMR, Varicella, and Tdap/Td vaccinations and proof of health insurance by Dead Day of the previous semester in which they will enroll in the clinical course.
• Provide evidence of a current license to practice as a registered nurse in the state in which the student is enrolled in the clinical course.
• Provide evidence of national certification and licensure as an advanced practice nurse – if their state of residency requires licensure – for post-MSN students in the DNP program.
• Complete a drug screen within a four week time period prior to the first day of class of the semester in which the student is enrolled in the clinical course.
• Provide any other requirements requested by the clinical institution.

Requirements for the M.S. Nursing with Nurse Executive Leader Concentration

In addition to the general requirements of the Graduate School, students must complete a minimum of 36 credit hours (including a thesis) including the following courses:

D.N.P. with Family Nurse Practitioner Concentration

Admission Requirements for the M.S.N. and D.N.P. Degrees

1. Admission to the University of Arkansas Graduate School
2. Submission of GRE scores for M.S.N. and B.S.N.-D.N.P. students.
3. Completion of the Eleanor Mann School of Nursing (EMSON) application.
4. Completion of a baccalaureate degree in nursing from an NLNAC or CCNE accredited program and for post-M.S.N. to D.N.P. students, a master's degree in nursing from an NLNAC or CCNE accredited program.
5. Current unencumbered licensure to practice as a registered nurse, and for M.S.N.-D.N.P. students, APN licensure, if required by student's state of residence and certification as an APRN.
6. Completion of a basic health assessment course (academic or continuing education).
7. Completion of a basic-level statistics course with a grade of “C” or above. Additionally, for M.S.N. to D.N.P. students, completion of a graduate-level health policy course with a grade of “B” or above.
8. Evidence of current CPR (American Heart Association for Professionals) certification, TB screening, Hepatitis B vaccination or titer showing immunity, Tdap/Td, Varicella vaccination or titer showing immunity, MMR vaccination, annual flu vaccination, and health insurance.
9. Basic computer and library skills including the use of electronic databases.
10. Qualified applicants will be admitted on a space available basis.

Following admission to the program and prior to enrolling in the first clinical course (NURS 5112 Advanced Health Assessment and Diagnostic Reasoning Clinical Practicum Advanced Health Assessment for B.S.N.-D.N.P. students and NURS 6224 Specialty Practice Clinical III for M.S.N.-D.N.P. students), the students must:

• Complete a background check by Dead Day of the previous semester in which they will enroll in the clinical course.
• Provide EMSON with proof of HepB, TB, CPR, MMR, Varicella, and Tdap/Td vaccinations and proof of health insurance by Dead Day of the previous semester in which they will enroll in the clinical course.
• Provide evidence of a current license to practice as a registered nurse in the state in which the student is enrolled in the clinical course.
• Provide evidence of national certification and licensure as an advanced practice nurse – if their state of residency requires licensure – for post-MSN students in the DNP program.
• Complete a drug screen within a four week time period prior to the first day of class of the semester in which the student is enrolled in the clinical course.
• Provide any other requirements requested by the clinical institution.

Requirements for the Doctor of Nursing Practice: In addition to the general requirements of the Graduate School, students who have earned a Bachelor of Science in Nursing must complete the following requirements for the Doctor of Nursing Practice with a concentration in Family Nurse Practitioner. One or more campus visits may be required for program orientation, skills acquisition, and dissemination of scholarly work.

In addition to the general requirements for the D.N.P., the following courses are required to complete the Family Nurse Practitioner concentration. At least three campus visits are required for program orientation, skills acquisition, and dissemination of scholarly work.

Admission Requirements and Procedures

- Admission to the University of Arkansas Graduate School (http://grad.uark.edu) (Requires a $50 non-refundable application fee)
- Admission to the Eleanor Mann School of Nursing DNP program (https://forms.coehp.uark.edu) (requires a $40 application fee)
- Completion of a nationally accredited professional degree program in nursing
- A 3.0 cumulative GPA on the last 60 credit hours of attempted coursework in previous nursing program
- Current unencumbered license to practice as a registered nurse
- Submission of official GRE scores taken within 5 years and indicating capacity for doctoral-level work
- Submission of curriculum vitae or professional resume
- Completion of candidate interview
- Two letters of recommendation, one from a faculty member and one from an employer
- Additional Requirements for master's-prepared Advanced Practice Registered Nurse applicants:
  - Completion of a Master’s Degree in Nursing from a nationally accredited M.S.N. program
  - A.P.N. licensure – if required by student's state of residence
  - Certification as an A.P.N.
  - Qualified applicants will be admitted on a space available basis
  - Applicants who do not meet the above requirements may be referred to the Graduate Admissions Committee for special consideration and may be required to fulfill additional prerequisites.

Program Requirements

In addition to the general requirements of the Graduate School, students who have earned a Bachelor of Science in Nursing must complete a minimum of 78 hours with the following general requirements for the Doctor of Nursing Practice, while completing additional coursework in one of two advanced-practice nursing concentrations: Family Nurse Practitioner or Adult-Gerontology Acute Care Nurse Practitioner. At least three campus visits are required for program orientation, skills acquisition, and dissemination of scholarly work.

Progression Requirements for the Doctor of Nursing Practice Degree:
Students are responsible for meeting the standards of academic and professional performance specified by the graduate programs in nursing. In order to progress in the program, students must adhere to the following:

- Grade requirements as outlined below
- Policies of the University of Arkansas Graduate School, found at [http://catalog.uark.edu/graduatecatalog/objectivesandregulations/](http://catalog.uark.edu/graduatecatalog/objectivesandregulations/)
- Maintenance of an unencumbered registered nurse license
- Compliance with the nurse practice act(s) which regulate(s) the student’s license(s)

**Grade Requirement**

A. A grade of “C” or lower may be earned in a nursing course only once, with the following exception:

1. A grade of “B” or better must be earned in didactic courses with a clinical component.
2. If a grade less than “B” is earned in either the didactic or clinical course, both must be repeated concurrently. A grade of “B” or better must be received upon repeat of the course in order to progress in the program.
3. Clinical courses and their didactic components may only be repeated once to achieve a grade of “B” or higher.

B. If a second “C” or lower is earned in a nursing course, the student will not be allowed to progress in the program, and will not be allowed to return to the program.

C. A student may only repeat a nursing course in which a “C” or lower has been received one time throughout the program. A student may only withdraw from a course one time.

D. Grades of “D” or “F” are not accepted for credit.

**D.N.P. with Adult-Gerontology Acute-Care Nurse Practitioner Concentration**

**Admission Requirements for the M.S.N. and D.N.P. Degrees**

1. Admission to the University of Arkansas Graduate School
2. Submission of GRE scores for M.S.N. and B.S.N.-D.N.P. students.
3. Completion of the Eleanor Mann School of Nursing (EMSON) application.
4. Completion of a baccalaureate degree in nursing from an NLNAC or CCNE accredited program and for post-M.S.N. to D.N.P. students, a master's degree in nursing from an NLNAC or CCNE accredited program.
5. Current unencumbered licensure to practice as a registered nurse, and for M.S.N.-D.N.P. students, APN licensure, if required by student's state of residence and certification as an APRN.
6. Completion of a basic health assessment course (academic or continuing education).
7. Completion of a basic-level statistics course with a grade of “C” or above. Additionally, for M.S.N. to D.N.P. students, completion of a graduate-level health policy course with a grade of “B” or above.
8. Evidence of current CPR (American Heart Association for Professionals) certification, TB screening, Hepatitis B vaccination or titer showing immunity, Tdap/Td, Varicella vaccination or titer showing immunity, MMR vaccination, annual flu vaccination, and health insurance.
9. Basic computer and library skills including the use of electronic databases.
10. Qualified applicants will be admitted on a space available basis.

Following admission to the program and prior to enrolling in the first clinical course (NURS 5112 Advanced Health Assessment and Diagnostic Reasoning Clinical Practicum Advanced Health Assessment for B.S.N.-D.N.P. students and NURS 6224 Speciality Practice Clinical III for M.S.N.-D.N.P. students), the students must:

- Complete a background check by Dead Day of the previous semester in which they will enroll in the clinical course.
- Provide EMSON with proof of HepB, TB, CPR, MMR, Varicella, and Tdap/Td vaccinations and proof of health insurance by Dead Day of the previous semester in which they will enroll in the clinical course.
- Provide evidence of a current license to practice as a registered nurse in the state where precepted hours will be provided by Dead Day of the previous semester in which they will enroll in the clinical course.
- Provide evidence of national certification and licensure as an advanced practice nurse – if their state of residency requires licensure – for post-MSN students in the DNP program.
- Complete a drug screen within a four week time period prior to the first day of class of the semester in which the student is enrolled in the clinical course.
- Provide any other requirements requested by the clinical institution.

**Requirements for the Doctor of Nursing Practice:** In addition to the general requirements of the Graduate School, students who have earned a Bachelor of Science in Nursing degree must complete the following requirements for the Doctor of Nursing Practice with a concentration in Adult-Geriatric Acute-Care Nurse Practitioner. One or more campus visits may be required for skills acquisition.

In addition to the general requirements for the D.N.P., the following courses are required to complete the Adult-Gerontology Acute-Care Nurse Practitioner concentration. At least three campus visits are required for program orientation, skills acquisition, and dissemination of scholarly work.

Program Requirements

In addition to the general requirements of the Graduate School, students who have earned a Bachelor of Science in Nursing must complete a minimum of 78 hours with the following general requirements for the Doctor of Nursing Practice, while completing additional coursework in one of two advanced-practice nursing concentrations: Family Nurse Practitioner or Adult-Gerontology Acute Care Nurse Practitioner. At least three campus visits are required for program orientation, skills acquisition, and dissemination of scholarly work.

Progression Requirements for the Doctor of Nursing Practice Degree:

Students are responsible for meeting the standards of academic and professional performance specified by the graduate programs in nursing. In order to progress in the program, students must adhere to the following:

- Grade requirements as outlined below
- Policies of the University of Arkansas Graduate School, found at http://catalog.uark.edu/graduatecatalog/objectivesandregulations/
- Maintenance of an unencumbered registered nurse license
- Compliance with the nurse practice act(s) which regulate(s) the student’s license(s)

Grade Requirement

A. A grade of “C” or lower may be earned in a nursing course only once, with the following exception:

1. A grade of “B” or better must be earned in didactic courses with a clinical component.

2. If a grade less than “B” is earned in either the didactic or clinical course, both must be repeated concurrently. A grade of “B” or better must be received upon repeat of the course in order to progress in the program.

3. Clinical courses and their didactic components may only be repeated once to achieve a grade of “B” or higher.

B. If a second “C” or lower is earned in a nursing course, the student will not be allowed to progress in the program, and will not be allowed to return to the program.

C. A student may only repeat a nursing course in which a “C” or lower has been received one time throughout the program. A student may only withdraw from a course one time.

D. Grades of “D” or “F” are not accepted for credit.

Post-M.S.N. Doctor of Nursing Practice

Requirements for the Doctor of Nursing Practice: In addition to the general requirements of the Graduate School, students who have earned a clinical Master of Science in Nursing degree must complete the following requirements for the Doctor of Nursing Practice. One or more campus visits may be required for skills acquisition.

Admission Requirements and Procedures
• Admission to the University of Arkansas Graduate School (http://grad.uark.edu/) (Requires a $60 non-refundable application fee)
• Admission to the Eleanor Mann School of Nursing DNP program (https://forms.coehp.uark.edu/) (requires a $40 application fee)
• Completion of a nationally accredited professional degree program in nursing
• A 3.0 cumulative GPA on the last 60 credit hours of attempted coursework in previous nursing program
• Current unencumbered license to practice as a registered nurse
• Submission of official GRE scores taken within 5 years and indicating capacity for doctoral-level work
• Submission of curriculum vitae or professional resume
• Completion of candidate interview
• Two letters of recommendation, one from a faculty member and one from an employer
• Additional Requirements for master’s-prepared Advanced Practice Registered Nurse applicants:
  • Completion of a Master’s Degree in Nursing from a nationally accredited M.S.N. program
  • A.P.N. licensure – if required by student’s state of residence
  • Certification as an A.P.N.
• Qualified applicants will be admitted on a space available basis
• Applicants who do not meet the above requirements may be referred to the Graduate Admissions Committee for special consideration and may be required to fulfill additional prerequisites.

Program Requirements

In addition to the general requirements of the Graduate School, students who have earned a Bachelor of Science in Nursing must complete a minimum of 78 hours with the following general requirements for the Doctor of Nursing Practice, while completing additional coursework in one of two advanced-practice nursing concentrations: Family Nurse Practitioner or Adult-Gerontology Acute Care Nurse Practitioner. At least three campus visits are required for program orientation, skills acquisition, and dissemination of scholarly work.

Progression Requirements for the Doctor of Nursing Practice Degree:

Students are responsible for meeting the standards of academic and professional performance specified by the graduate programs in nursing. In order to progress in the program, students must adhere to the following:

• Grade requirements as outlined below
• Policies of the University of Arkansas Graduate School, found at http://catalog.uark.edu/graduatecatalog/objectivesandregulations/
• Clinical Practice Guidelines as outlined in the Handbook https://nurs.uark.edu/degrees-offered/MSN/graduate-handbook.php
• Clinical Compliance Guidelines as outlined in the Handbook https://nurs.uark.edu/degrees-offered/MSN/graduate-handbook.php
• Maintenance of an unencumbered registered nurse license
• Compliance with the nurse practice act(s) which regulate(s) the student’s license(s)

Grade Requirement

A. A grade of “C” or lower may be earned in a nursing course only once, with the following exception:

1. A grade of “B” or better must be earned in didactic courses with a clinical component.
2. If a grade less than “B” is earned in either the didactic or clinical course, both must be repeated concurrently. A grade of “B” or better must be received upon repeat of the course in order to progress in the program.
3. Clinical courses and their didactic components may only be repeated once to achieve a grade of “B” or higher.

B. If a second “C” or lower is earned in a nursing course, the student will not be allowed to progress in the program, and will not be allowed to return to the program.

C. A student may only repeat a nursing course in which a “C” or lower has been received one time throughout the program. A student may only withdraw from a course one time.

D. Grades of “D” or “F” are not accepted for credit.

Graduate Faculty

Agana, Carol E., M.N.Sc. (University of Arkansas for Medical Sciences), B.S.E. (University of Arkansas), Instructor, 1998.
Emory, DeAnna Jan, Ph.D. (University of Arkansas), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Associate Professor, 2012.
Nursing (NURS)

Hentzen, Jane, M.S.N.(University of Texas at Austin), B.S.N.(University of Nebraska), Clinical Instructor, 2017.

Jarrett, Anna Lee, Ph.D., M.S.N. (University of Missouri-Columbia), B.S.N. (Missouri Southern State College), Associate Professor, 2012.

Kilmer, Michele, D.N.P. (University of Alabama), M.S.N (Texas Tech University), B.S.N. (Harding University), Assistant Professor, 2017.

Kippenbrock, Thomas A., Ed.D. (Indiana University at Bloomington), M.S. (Indiana University-Purdue University-Indianapolis), B.S.N. (Indiana State University), Professor, 2003.

Lee, Peggy B., Ed.D. (University of Arkansas), M.S. (University of Southern Mississippi), B.S.N. (Mississippi College), Clinical Assistant Professor, 2009.

Miller, Bettie Gale, M.S.N. (University of Phoenix), M.S., B.S.E., B.S.N. (University of Arkansas), Instructor, 2003.

Murray, Lori M., D.N.P. (University of Kansas Medical Center), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Clinical Assistant Professor, 2015.

Osborne, Cara, Sc.D., M.S. (Harvard University), M.S.N. (Vanderbilt University), B.A. (Transylvania University), Assistant Professor, 2018.

Patton, Susan Kane, PhD, M.S.N. (University of Arkansas), M.H.S.A. (University of Arkansas at Little Rock), B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, 2010.

Scott, Allison L., D.N.P. (University of Missouri-Kansas City), M.S.N., B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, 2006.

Shreve, Marilou D., D.N.P., M.S.N. (University of Missouri-Kansas City), B.S.N. (University of Arkansas), Assistant Professor, 2013.

Stewart, Angela, D.N.P. (University of Arkansas), M.N.Sc., B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, 2015.

Young, Kelly, D.N.P. (University of South Alabama), M.S. (University of Oklahoma), B.S.N. (Southwestern Oklahoma State University), B.A. (Grinnell College), Assistant Professor, 2018.

Courses

NURS 5003. Theoretical and Scientific Foundations for Nursing Practice. 3 Hours.

The course utilizes the critical reasoning process to examine the element of nursing knowledge. Emphasis is placed on concept analysis and the evaluation of nursing theories. Identification of the links between theory and empirical indicators is examined. The clinical relevance of mid-range and practice theories is explored. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Fall)

NURS 5033. Scientific Foundations and Role Development in Advanced Practice Nursing. 3 Hours.

Examines development of the advanced practice nursing role and evolution of the Doctor of Nursing Practice (DNP). Concepts include scientific foundations of practice, role development, interdisciplinary collaborative strategies, advanced scope of practice, patient advocacy, and legal/ethical principles in the advanced practice role. Prereq.: Admission to the graduate program or by permission of the instructor. (Typically offered: Fall)

NURS 5043. Concepts of Health Promotion Within Diverse Populations. 3 Hours.

Provides a theoretical base for health promotion, risk reduction and disease prevention at the individual, family and community levels. A cross-disciplinary approach to achieve or preserve health is identified. Focuses on holistic plans and interventions that address the behavioral and social factors that contribute to morbidity and mortality in diverse populations. Provides opportunity to develop, implement, and evaluate health promotion interventions for selected clients. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Fall)

NURS 5053. Evidence-Based Practice and Innovation in Nursing. 3 Hours.

Examines models and strategies for leadership in evidence-based practice and innovation, outcomes management, and translational scholarship. The emphasis of this course is on problem identification, information retrieval, critical appraisal, and synthesis of a body of evidence. It provides the student with the foundation for the DNP evidence-based practice project. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Spring)

NURS 5063. Health Care Policy. 3 Hours.

Provides knowledge and understanding needed to participate in policy development analysis and implementation. Provides and overview of the political process, health care policy, advocacy, leadership roles, legislative and regulatory issues, health care financing, and evaluating outcomes. Access, cost, and quality of health care are major foci in this course. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Summer)

NURS 5073. Curriculum Design and Development in Nursing Education. 3 Hours.

This course provides the essential elements that define and operationalize the process of curriculum design and development. Students will examine curriculum theories, models, and concepts from the perspective of nursing education. They will analyze factors that influence program and curriculum development. Historical and philosophical foundations of nursing practice and educational principles are examined. The application and synthesis of curriculum theory and their application to nursing is emphasized. The role of the educator in the dynamic relationship between the practice setting, research, and curriculum is examined. Students will participate in the design of curriculum which reflects professional nursing practice, standards, theory, and research. Prerequisite: Admission to the Graduate Program or departmental consent. Completion of all general and research core classes or approval of the MSN Education Program Coordinator. (Typically offered: Fall and Spring)

NURS 5083. Methods of Assessment and Evaluation in Nursing Education. 3 Hours.

This course is one of four offered in the nursing education concentration in preparation for the role of educator in academic and clinical settings. Students explore theories, models, and evidence for best practice in assessing learning - including constructing exam items and creating tools for assessing writing assignments. Students discuss grading and other concepts related to assessment and evaluation as it relates to nursing education. Prereq.: Completion of NURS 5073 or NURS 5093. Prerequisite: Admission to the Masters of Science in Nursing or the Doctor of Nursing Practice Program. (Typically offered: Summer)

NURS 5093. Instructional Design and Delivery in Nursing Education. 3 Hours.

This course is one of four offered in the nursing education concentration in preparation for the role of educator in academic and clinical settings. Students explore teaching and learning theories and other evidence to guide practice in the advanced role of the educator. Students gain competencies in the knowledge and skills necessary for delivering evidence-based teaching and learning strategies in a variety of learning environments. Prerequisite: Admission to the Graduate Program or departmental consent. (Typically offered: Spring)
NURS 5101. Advanced Health Assessment and Diagnostic Reasoning. 1 Hour. Applies health assessment, physical examination techniques, clinical decision making, and diagnostic reasoning to formulate a culturally-sensitive, individualized plan of care, which includes health promotion and disease prevention. Corequisite: NURS 5112. (Typically offered: Fall)

NURS 5112. Advanced Health Assessment and Diagnostic Reasoning Clinical Practicum. 2 Hours. Focus is on the application of clinical decision making, diagnostic reasoning, and advanced physical examination techniques to develop differential diagnoses, problem list, and a plan of care for individual clients. Corequisite: NURS 5101. (Typically offered: Fall)

NURS 5123. Pharmacotherapeutics. 3 Hours. Provides advanced concepts and application of pharmacology for broad categories of agents used in disease management. Establishes the relationship between pharmacologic agents and physiologic/pathologic responses. It assists students with the development of knowledge and skills to prescribe and manage a client's health in a safe, high quality, and cost-effective manner. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Summer)

NURS 5143. Advanced Pathophysiology. 3 Hours. Provides a comprehensive understanding of normal physiologic and pathologic mechanisms of disease that serves as a foundation for clinical assessment, decision making, and management of individuals. Includes mechanisms of disease, genetic susceptibility, and immune responses in selected disorders. This course includes concepts of pathophysiology across the lifespan. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Spring)

NURS 5272. Clinical Practicum: Interpretive Diagnostic Reasoning. 2 Hours. Application of principles of pathologic mechanisms of disease, pharmacotherapeutics, and pharmacokinetics to refine and synthesize skills for history taking, physical examination, diagnostic reasoning, and decision making for adult and geriatric individuals. Pre- or Corequisite: NURS 5101, NURS 5112, NURS 5143 and NURS 5123. (Typically offered: Summer)

NURS 5303. Foundations of Nursing Education. 3 Hours. Considers the principles, philosophies, theories, and strategies of teaching, learning, and evaluation needed in nursing education. (Typically offered: Fall)

NURS 5313. Curriculum and Evaluation in Nursing Education. 3 Hours. Considers knowledge and skills needed for curriculum and program development and evaluation for a variety of nursing education settings. (Typically offered: Summer)

NURS 5323. Teaching in Nursing Practicum. 3 Hours. Supervised experience in the nurse educator role in both classroom and clinical settings. (Typically offered: Fall)

NURS 5332. Common Problems in Acute Care in Adult and Gerontology Populations Clinical Practicum. 2 Hours. Focuses on the management of adult-gerontology patients with common acute illnesses. Emphasizes the application of principles of pathologic mechanisms of disease, history taking, physical examination, and clinical decision making. Corequisite: NURS 5434. Prerequisite: (Completion of core courses: NURS 5003, NURS 5033, NURS 5043, NURS 5053, NURS 5143, NURS 5063, NURS 5523), and (completion of specialty clinical courses: NURS 5101 and NURS 5112). (Typically offered: Spring)

NURS 5343. Specialty Development I. 3 Hours. This course will include two foci. There will be readings focused on current topics in a specialty area. A focused field experience will allow student to integrate knowledge and skills in a specialty area of nursing for preparation for the nurse educator role. (Typically offered: Spring)

NURS 5353. Specialty Development II. 3 Hours. Building on the Independent Study: Specialty Development I, this course will include two foci. There will be readings focused on current topics in a specialty area. A focused field experience will allow student to integrate knowledge and skills in a specialty area of nursing in preparation for the nurse educator role. Prerequisite: NURS 5343. (Typically offered: Fall)

NURS 5403. Scholarly Writing. 3 Hours. This course will focus on the fundamentals of academic writing at the graduate level with the goal of honing students' critical reading and writing skills. Attention will be given to mechanics, usage, and style, as well as to handling and citing sources. The emphasis throughout is on creative thinking and precise, scholarly writing. Prerequisite: Completion of a baccalaureate degree and acceptance into the graduate program. (Typically offered: Fall and Summer)

NURS 5413. Executive Leadership in Nursing. 3 Hours. This course focuses on the health care structures and processes, human capital management, health and public policy, communication principles and styles, negotiations, leadership effectiveness, strategic visioning, ethics and advocacy, and innovation. Learning will enable the professional nurse executive to lead complex health care environments applying an advanced skill set in each of the focus areas. Prerequisite: NURS 5403, NURS 5523, NURS 5043, NURS 5053, NURS 5063, MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403. (Typically offered: Spring)

NURS 5423. Health Systems Operations. 3 Hours. This course focuses on the complex practice environment. Enables the professional nurse leader to demonstrate knowledge of care management and delivery, professional practice environment and models, and quality monitoring and improvement. Professional practice and health care delivery models and settings, role delineation, laws and regulations, accreditation, and professional practice standards will be emphasized. Prerequisite: NURS 5403, NURS 5523, NURS 5043, NURS 5053, NURS 5063, MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403. (Typically offered: Fall)

NURS 5434. Common Problems in Acute Care in Adult and Gerontology Populations. 4 Hours. Examines principles of pathologic mechanisms of disease, refine skills for history taking, physical examination, and clinical decision making for adult and geriatric individuals with common acute illnesses. Corequisite: NURS 5443. Prerequisite: (Completion of core courses: NURS 5003, NURS 5033, NURS 5043, NURS 5053, NURS 5143, NURS 5063, NURS 5523), and (completion of specialty clinical courses: NURS 5101 and NURS 5112). (Typically offered: Spring)

NURS 5443. Chronic Health Problems in Adult and Gerontology Populations. 3 Hours. Explores evidence-based models for the management of selected chronic conditions, focusing on assessment and treatment of individuals and families. Utilizes advanced theories, concepts, knowledge, and skill in the care of diverse adult and geriatric populations with complex chronic health problems. Corequisite: NURS 5454. Prerequisite: Completion of NURS 5434, and NURS 5332. (Typically offered: Fall)

NURS 5454. Chronic Health Problems in Adult and Gerontology Populations Clinical Practicum. 4 Hours. Focuses on the management of adult-gerontology populations with complex, chronic health problems. Emphasis is on the application of theoretical concepts, assessment skills, clinical decision making, and evidence-based standards to formulate diagnoses, clinical impressions, treatment, and evaluation plans in the acute or out-patient setting. Pre- or Corequisite: NURS 6123. Corequisite: NURS 5443. Prerequisite: (Completion of core courses: NURS 5003, NURS 5033, NURS 5043, NURS 5053, NURS 5143, NURS 5063, NURS 5523), and (completion of specialty clinical courses NURS 5101, NURS 5112, NURS 5434, and NURS 5332). (Typically offered: Fall)
NURS 5463. Acute and Critical Illness in Adult and Gerontology Populations. 3 Hours.
Provides an in-depth knowledge of management of acutely and critically ill adults. Emphasis is on the use of evidence-based knowledge to formulate diagnoses, treatment, evaluation plans, and referral for adults who have complex acute or critical health problems, or are at high risk for developing complications. Corequisite: NURS 5475. Prerequisite: NURS 5101, NURS 5112, NURS 5434, NURS 5532, NURS 5443, and NURS 5454. (Typically offered: Spring)

NURS 5475. Acute and Critical Illness in Adult and Gerontology Populations Clinical Practicum. 5 Hours.
Experiences allow the student to apply safe, scientifically sound, cost effective, legal and ethical management strategies to the care of adults with complex acute and critical illness. Emphasis is on the development of advanced clinical skills in acute and critical care settings. Corequisite: NURS 5463. Prerequisite: NURS 5101, NURS 5112, NURS 5423, NURS 5443 and NURS 5454. (Typically offered: Spring)

NURS 5483. Common Problems in Primary Care. 3 Hours.
Examines principles of pathological mechanisms of disease, refines knowledge for thorough history taking, physical examination, and clinical decision-making for men, women, and families with common illnesses treated in primary care. Corequisite: NURS 5495. Prerequisite: NURS 5101, NURS 5112, NURS 5543, and NURS 5683. (Typically offered: Fall)

NURS 5495. Common Problems in Primary Care Clinical Practicum. 5 Hours.
Clinical component to 5483 Common Problems Primary Care. Refines skills for thorough history taking, physical examination, and clinical decision-making for men, women, and families with common illnesses treated in primary care. Pre- or Corequisite: NURS 5483. Prerequisite: NURS 5101, NURS 5112, NURS 5543, and NURS 5683. (Typically offered: Spring)

NURS 5523. Healthcare Informatics. 3 Hours.
Explores standards and principles for selecting, using, and evaluating information systems. Discusses the application of computer programs relevant to nursing administration, education, research, and practice. Assists the student in managing individual and aggregate information, and assessing the efficacy of patient care technology appropriate to a specialized area of nursing practice. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Fall)

NURS 5543. Primary Care of Children. 3 Hours.
Focuses on evidence-based models for the management of children from diverse cultures with common conditions in primary care. Includes anticipatory guidance, health promotion, and disease prevention. Emphasis on application of theoretical concepts, assessment skills, clinical decision-making, and evidence-based standards to formulate differential diagnoses, clinical impressions, treatment, and evaluation plans in primary care. Corequisite: NURS 5683. Prerequisite: NURS 5101 and NURS 5112. (Typically offered: Spring)

NURS 5553. Specialty Development I: Nurse Executive Leader. 3 Hours.
This course will focus on microsystem level operations within the healthcare environment and issues faced by nurse administrators. Learning will enable the professional nurse to participate in operations surrounding the delivery of care in various health care organizations. This course will facilitate the application of learned theories and organizational principles. Prerequisite: NURS 5403, NURS 5523, NURS 5043, NURS 5053, NURS 5063, MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403. (Typically offered: Fall)

NURS 5563. Specialty Development II: Nurse Executive Leader. 3 Hours.
Students will complete a scholarly project or thesis synthesizing knowledge and skills from previous courses in program of study. Applied learning will focus on the development of a systems approach to nurse executive leadership and inquiry. Focus is on public and private health care delivery systems, alliances with internal and external environments, and strategic decision making and implementation in the rapidly evolving global arena of nursing leadership and practice. This course prepares professional nurses to apply leadership and evidence-based practice principles in the evaluation of quality processes encountered across health care industries. 135 contact hours. Corequisite: NURS 579V and NURS 600V.
Prerequisite: NURS 5403, NURS 5523, NURS 5043, NURS 5053, NURS 5063, MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403, NURS 5343, NURS 5533, and NURS 5423. (Typically offered: Spring)

NURS 5583. Primary Care of Children Clinical Practicum. 3 Hours.
NURS 5583 is the clinical component to NURS 5543 and focuses on the management of women and children in the clinical setting with emphasis on holistic assessment and treatment of these populations and their families. Students will engage in the assessment, diagnosis and treatment of conditions common to primary practice in women's health and pediatric clinics. This course will consist of 135 contact hours, 80 in the pediatric setting and 55 in the women's health setting. Corequisite: NURS 5543. Prerequisite: NURS 5101 and NURS 5112. (Typically offered: Spring)

NURS 579V. Independent Study. 1-3 Hour.
Independent study designed by student with faculty advisor. May be completed as alternative to thesis. (Typically offered: Fall, Spring and Summer)

NURS 5873. Complex Problems in Primary Care. 3 Hours.
Focuses on application of health promotion and chronic disease management in complex adult patients. Students will utilize evidence-based approaches to health promotion, assessment, differential diagnosis and disease management. Emphasizes clinical decision making, chronic care models, coordination of care, poly-drug therapy and information systems. Corequisite: NURS 5884. Prerequisite: NURS 5101, NURS 5112, NURS 5543, NURS 5483, and NURS 5495. (Typically offered: Spring)

NURS 5884. Complex Problems in Primary Care Clinical Practicum. 4 Hours.
Clinical component to NURS 5873 Complex Problems in Primary Care. Offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the management of care of adults experiencing complex health problems. Corequisite: NURS 5873. Prerequisite: NURS 5101, NURS 5112, NURS 5683, NURS 5495, and NURS 5483. (Typically offered: Spring)

NURS 598V. Nursing Special Topics. 1-6 Hour.
Special Topics course to fulfill national accrediting body for Family Nurse Practitioner. Prerequisite: NURSDP major. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

NURS 599V. Seminar. 1-3 Hour.
Selected topics in nursing explored in discussion format. (Typically offered: Irregular)

NURS 600V. Master's Thesis. 1-3 Hour.
Student research to fulfill degree requirement for the MSN. Prerequisite: NURS 5053. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

NURS 6123. Evaluation Methods and Translational Research for Evidence-based Practice. 3 Hours.
The translation of evidence into practice, including theoretical and practical challenges, is analyzed through the use of case studies and proposals. Uses methods of inquiry for systematic appraisal of nursing practice or healthcare programs to identify practice outcomes and create an environment to support and sustain changes. Prereq.: ESRM 6403. Prerequisite: NURS 5053. (Typically offered: Fall)
NURS 6224. DNP Clinical Practicum I. 4 Hours.
Provides an opportunity to synthesize advanced knowledge and role behaviors within a specialty concentration. Designed to apply nursing theory, translational research, epidemiologic principles, ethical/legal principles, outcome evaluations, healthcare systems thinking, and economics into a specialized clinical practice role and setting. Depending upon specialty and experience, may require travel to campus. Prerequisite: Completion of NURS 5443, NURS 5454, NURS 5463, and NURS 5475; or by permission of the instructor. (Typically offered: Summer)

NURS 6233. Healthcare Economics and Finance. 3 Hours.
Provides economic, financial, and business knowledge and skills required for a leadership role in financial planning and decision making within healthcare delivery systems. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Spring)

NURS 6244. DNP Clinical Practicum II. 4 Hours.
Allows for the continuation of specialty role development and an advanced approach to care delivery, systems thinking, and leadership. Allows for the total number of practice hours required for certification and/or degree. Prerequisite: NURS 6224. (Typically offered: Fall)

NURS 6263. Organization Management and Systems Leadership. 3 Hours.
Facilitates understanding of how to lead, advocate, and manage innovative responses to organizational needs and challenges. Emphasizes development and evaluation of care delivery models that meet the needs of targeted patient populations by enhancing accountability for effective and efficient healthcare, quality improvement, and patient safety. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Summer)

NURS 628V. DNP Clinical Practicum III. 1-8 Hour.
Allows for the continuation of specialty role development and an advanced approach to care delivery, systems thinking, and leadership. Allows for the total number of practice hours required for certification and/or degree. Pre- or Corequisite: NURS 6244. (Typically offered: Spring) May be repeated for up to 8 hours of degree credit.

NURS 6343. Analytic Methods and Epidemiology for Health Care. 3 Hours.
This course will examine the role of epidemiology and statistics in advanced nursing practice. The student will learn how the concepts of epidemiology are used to measure and describe the health of individuals and populations and apply statistical concepts and analytical methods to data encountered in practice. Major topics to be covered include sources of data, study designs, analytical strategies and interpretation of data related to disease causality, risk, and prevalence. Prerequisite: ESRM 5393. (Typically offered: Fall, Spring and Summer)

NURS 7113. Capstone Seminar I. 3 Hours.
Designed to unify and organize the student’s field of inquiry for the final Capstone Project. Emphasis is on the application of evidence-based intervention suitable to their area of focus that involves appropriate methodology and application with the goal for change in practice or outcome analysis. Prerequisite: Completion of NURS 6224 and/or permission of the instructor. (Typically offered: Fall)

NURS 7122. DNP Project Implementation I. 2 Hours.
Provides necessary support and elements for students to begin execution of the Capstone Project in collaboration with the sponsoring site. (Typically offered: Fall)

NURS 7132. Capstone Seminar II. 2 Hours.
Focuses on data exploration and analysis for the organization and refinement of all aspects of Capstone Project, emphasizing implementation and evaluation of the evidence-based intervention. Allows student to finalize the scholarly written and oral report for dissemination of results. Corequisite: NURS 7142. Prerequisite: NURS 7113 and NURS 7122. (Typically offered: Spring)

NURS 7142. DNP Project Implementation II. 2 Hours.
Provides an avenue for students to showcase the Final Capstone Project. Allows students the opportunity to synthesize and demonstrate the ability to employ effective communication and collaboration skills, leadership roles, influence healthcare quality and safety, evaluate practice, and successfully negotiate change in healthcare delivery for individuals, families, populations, or systems. Prerequisite: NURS 7122. (Typically offered: Spring)

Occupational Therapy (OCTH)
Sherry Muir
Program Director
Graduate Education Building, Room 231
751 West Maple Avenue
Fayetteville, AR
479-575-8727 (office)
Email: muir@uark.edu

Occupational Therapy Website (https://hhpr.uark.edu/ot/)

Degrees Awarded:
O.T.D. in Occupational Therapy (OCTHDP)

Program Description: The O.T.D. program is a 115-credit-hour, post-baccalaureate, 3-year (9 semester), full-time, on-campus program with an off-campus fieldwork and capstone component. Upon completion, an entry-level professional degree is awarded. This degree prepares graduates and meets requirements to sit for the National Board for the Certification of Occupational Therapy exam.

This degree is a joint offering between the College of Education and Health Professions of the University of Arkansas and the College of Health Professions of the University of Arkansas for Medical Sciences and UAMS's Northwest campus in Fayetteville. The department's mission embodies both institutions' shared aim to enhance the health, well-being, and quality of life of the people of Arkansas, our nation, and world. By enabling occupational therapy students to become innovative, caring, globally-minded scholars, practitioners, and advocates, the Department advances an inclusive, emancipatory, and participatory, vision of society situated at the intersection of UAF and UAMS's missions. This distinctive entry-level clinical doctorate in occupational therapy is consistent with the accreditation standards of the American Occupational Therapy Association.

Please direct program inquiries to otd@uark.edu or call 479-575-8727

Requirements for O.T.D. in Occupational Therapy

Admission Requirements: All prerequisites are at least 3 credits:
- Human Anatomy with lab*
- Human Physiology with lab*
- Statistics
- Terminology for Health Professions
- Abnormal Psychology
- Neuroscience of Behavior (Brain and Behavior, Behavioral or Cognitive Neuroscience, or Neuropsychology or Neuropsychology or Neurobiology, etc.)

*If Anatomy and Physiology are offered together, as one course, then two semesters must be taken.
Applicants must meet all requirements for admission to the University of Arkansas Graduate School, except the standardized test score requirement. Other admission requirements include:

- A minimum overall GPA of 3.0 on a 4.0 scale.
- International applicants must submit Test of English as a Foreign Language (TOEFL).
- 25 hours of documented volunteering, shadowing, or service learning with an occupational therapy professional in at least three different settings, with at least two different populations, e.g., children and adults. The required form for both the student and the professional can be found on the OT website (https://hprn.uark.edu/ot/admission-requirements.php) as a downloadable PDF.
- Three letters of recommendation from individuals who can address the student's potential for graduate education.
- Written personal statement.
- Eligible applicants under consideration will be required to participate in an on-campus interview and an in person scholarly writing activity.

Requirements for O.T.D. in Occupational Therapy: This program is a 115-credit-hour, post-baccalaureate, 3-year (9 semesters), full-time, on-campus program with an off-campus fieldwork and capstone component. The fieldwork experiences are integrated throughout the program to structure increasingly complex experiences. The third year of the curriculum requires a capstone experience with a culminating project.

All courses are offered one time per year for lock-step progress through the program. Students will work with their academic committee should unexpected circumstances necessitate an exception to progress through the program.

Total Hours 115
Courses

OCTH 5001. Introduction to an Occupational Perspective of Health. 1 Hour.
This course provides an overview of the OTD program's conceptual core and how the department's philosophy of teaching and learning supports students' personal and intellectual growth. Curricular threads, expectations and graduate level learning strategies are explored. Students will participate in a service learning activity as they begin to form an occupational perspective of health. Prerequisite: Successful completion of prerequisite courses for Occupational Therapy Doctoral program. (Typically offered: Spring)

OCTH 5103. Theory and Foundations of Occupational Therapy. 3 Hours.
Students critically analyze the historical foundation, philosophical assumptions, core concepts, theories, models and frames of reference that have shaped occupational therapy research and practice. The relationship with occupational science is discussed. Current trends and emerging practice areas are introduced. Inter-professional education and the OT/OTA collaborative process are discussed. Prerequisite: OCTH 5001. (Typically offered: Spring)

OCTH 5111. Behavioral and Mental Health Conditions. 1 Hour.
Students identify etiologies, signs, symptoms, laboratory findings, diagnosis, prognosis, course of the condition, contributing factors, influence on daily life, evidence-based medical treatment, and occupational performance impacts of behavioral and mental health conditions across the lifespan. Prerequisite: OCTH 5411 and OCTH 5472. (Typically offered: Summer)

OCTH 5112L. The Quest for Wellness Lab. 2 Hours.
This highly experiential lab accompanies the Quest for Wellness Lecture course. Students will focus on the lived experience of making personal changes to improve overall wellness, including the act of asking for help and its contexts, working in partnerships and groups, evidence-based goal setting and revision, and developmental considerations of wellness across the lifespan. This course prepares students for the Community Wellness Project in the following semester. Prerequisite: OCTH 5001. Corequisite: OCTH 5121 and OCTH 5112L. (Typically offered: Spring)

OCTH 5121. The Quest for Wellness. 1 Hour.
This course introduces students to the physical, cognitive, and emotional components of health and wellness across the life span. Students will then apply these concepts to facilitate personal wellness and professional development. Students will learn and practice multiple strategies for enhancing occupational adaptation and performance. Accompanies The Quest for Wellness Lab. Prerequisite: OCTH 5001. Corequisite: OCTH 5112L. (Typically offered: Spring)

OCTH 5132. Complexity Science & Applications to Occupational Therapy. 2 Hours.
This course will introduce principles of complexity science, including the nature of emergence, innovation, learning and adaptation. Students will apply these principles using basic knowledge of human beings, occupations, and communities. Students will compare/contrast complexity science and established science and apply findings to occupational therapy practice. Diversity, co-existence of order and disorder and functioning on the edge of chaos will be discussed. Students will be introduced to principles for managing complex adaptive systems. Prerequisite: OCTH 5001. (Typically offered: Spring)

OCTH 5141. Research Fundamentals and Scholarly Practice. 1 Hour.
This course introduces students to the techniques, methods and tools used in occupational science and occupational therapy research and their relationship to everyday practice. It focuses on the purposes and strengths and weaknesses of various forms of research relative to formulating research questions, conducting a literature search, assessing the quality of a source, and reporting evidence. Prerequisite: OCTH 5001. (Typically offered: Spring)

OCTH 5173. The Science of Wellness. 3 Hours.
This course is an introduction to national and international initiatives focused on health and wellness and the Occupational Therapy Practice Framework. Students will explore human factors, body structures and function, values, spiritual beliefs, coping strategies and responses to stress as they relate to health and occupational performance. Students will investigate the physiology of wellness and stress and the impacts of context and environment on wellness. Prerequisite: OCTH 5001. Corequisite: OCTH 5121 and OCTH 5112L. (Typically offered: Spring)

OCTH 5203. Professional Issues in Occupational Therapy. 3 Hours.
This course provides a foundation for understanding professional development as students evolve into occupational therapy practitioners. Students are introduced to the roles of professional associations, legislative processes that may impact occupational therapy practice, and requirements for initial and ongoing professional registration, certification, and licensure. Students examine how occupational therapists interface with other stakeholders within a complex healthcare environment to ensure that the occupational needs of individuals and communities are met. Group process, advocacy and ethical decision making as a part of contemporary practice are also introduced. Prerequisite: OCTH 5001 and OCTH 5103. (Typically offered: Spring)

OCTH 5212. Occupational Therapy Frameworks, Models, and Structures. 2 Hours.
This course will provide an overview and synthesis of historical and contemporary perspectives that guide OT practice and why this structure is needed for best practice. Students will understand and apply fundamental concepts and language used in current OT theories and practice models. Students will apply the OT Practice Framework as a guiding document to communicate the domains and processes of OT and will complete a review of official documents from the American Occupational Therapy Association that define new knowledge and skills required for competent OT practice. Prerequisite: OCTH 5103. (Typically offered: Summer)

OCTH 5221. Community Wellness. 1 Hour.
This project-based course challenges student groups to construct a realistic, evidence-driven, occupation-centered, community-based wellness proposal that includes a basic needs assessment, occupational profile, and suggested resources for implementation. Prerequisite: OCTH 5121 and OCTH 5112L. (Typically offered: Summer)

OCTH 5243. Evidence-based Clinical Reasoning. 3 Hours.
This course will teach students to dissect and analyze occupational therapy assessments and the process of completing an evidence based, comprehensive evaluation. Students will learn and apply principals of activity analysis to occupations and formulate implications for occupational performance across the lifespan. Students will explore the different types of clinical reasoning needed for becoming a critical and self-reflective practitioner. Prerequisite: OCTH 5141. (Typically offered: Summer)
OCTH 5293. Foundations of Communication and Advocacy. 3 Hours.
This course focuses on building effective communication and professional advocacy skills with a variety of stakeholders (i.e., funding sources, service users, policymakers, etc.) regarding the profession’s distinct value. Students will also practice building rapport, providing feedback, navigating conflict, utilizing therapeutic use of self, and self-advocacy skills. Students will identify personal, cultural, and environmental factors that may impact communication. Types of leadership and advocacy approaches within common populations are explored, while strategies for communication with multiple populations are identified and practiced. Prerequisite: OCTH 5203. (Typically offered: Summer)

OCTH 5311. Physical Conditions. 1 Hour.
This course will explore the etiologies, signs, symptoms, laboratory findings, diagnosis, prognosis, course of the condition, contributing factors, usual medical treatment of common physical disorders that impact occupational functioning across the lifespan. Prerequisite: OCTH 5173. Corequisite: OCTH 5371L and OCTH 5311. (Typically offered: Fall)

OCTH 5322. Occupational Impacts of Pharmacology I: General Medical. 2 Hours.
This course focuses on pharmacological interventions to common physical diseases and conditions that impact occupational functioning across the lifespan. Students will learn about frequently prescribed medications, their indications and side effects. Prerequisite: OCTH 5173. Corequisite: OCTH 5371L and OCTH 5311. (Typically offered: Fall)

OCTH 5332. Introduction to Occupational Science. 2 Hours.
Occupational Science is the study of humans as occupational beings. This course introduces students to the origin and evolution of occupational science and its relationship to occupational therapy. Students will examine human health and adaptation through an occupational science-oriented lens, applying their emerging critical occupational perspective of health to the determinants of occupational participation and well-being. Prerequisite: OCTH 5293. (Typically offered: Fall)

OCTH 5351. Level I Fieldwork Seminar: Physical Conditions. 1 Hour.
This fieldwork seminar emphasizes beginning clinical reasoning skills and professional documentation (specifically of basic physical assessments) using classroom analysis of observations made during the Level I Fieldwork I experience, with an emphasis on professional behaviors, communication, ethics, interdisciplinary roles, models of practice, and factors that influence engagement in occupation. Prerequisite: Successful completion of all previous skill-based competency exams, and departmental consent. Corequisite: OCTH 5361. (Typically offered: Fall)

OCTH 5361. Level I Fieldwork: Physical Conditions. 1 Hour.
Students will engage in direct observation and competency-based practice at clinical fieldwork sites to enhance professional behaviors, observation and activity analysis skills. Students will adequately perform basic assessment techniques such as an occupational profile, taking vitals, completing range of motion and manual muscle testing. Students will recognize the influence of social and environmental factors on an individual’s and group’s participation in occupations. Students will be expected to integrate knowledge, experience, and evidence while developing clinical reasoning skills. Prerequisite: Successful completion of all previous skill based competency exams and departmental consent. Corequisite: OCTH 5351. (Typically offered: Fall)

OCTH 5371L. Anatomy and Occupational Performance Lab. 1 Hour.
Using a multi-media approach, students will review body structures and functions and apply the principles of kinesiology while measuring variables that impact movement and performance across the lifespan. Concepts will be applied in co-occurring courses. Prerequisite: OCTH 5173. Corequisite: OCTH 5372. (Typically offered: Fall)

OCTH 5372. Anatomy and Occupational Performance. 2 Hours.
This course focuses on the human musculoskeletal system and its impact on physical performance in relation to participation in occupations across the lifespan. Students will review body structures and apply principles of kinesiology that impact movement across the lifespan. Human Anatomy and Performance Lab accompanies this course. Prerequisite: OCTH 5173. Corequisite: OCTH 5371L. (Typically offered: Fall)

OCTH 5384. Occupations, Adaptations, and Innovations: Physical Conditions. 4 Hours.
This course focuses on occupation centered adaptations and interventions for physical conditions. Adaptive solutions to occupational performance issues are explored and applied to authentic environments. Problem based learning incorporating previously covered material will be utilized to facilitate innovation and client-centered solutions. Prerequisite: OCTH 5173. Corequisite: OCTH 5372 and OCTH 5371L. (Typically offered: Fall)

OCTH 5393. Introduction to Health Systems and Policy. 3 Hours.
This course explores how policy and service delivery systems impact individual and population health and well-being. Factors influencing the scope and practice of occupational therapy, such as legislation, regulation, and reimbursement schemes/criteria are explored. The influence of health care trends on service delivery are examined. Prerequisite: OCTH 5132. (Typically offered: Fall)

OCTH 5411. Neurological Conditions. 1 Hour.
Students identify etiologies, signs, symptoms, laboratory findings, diagnosis, prognosis, course of the condition, contributing factors, the influence on daily life, evidence-based medical treatment, and typical occupational performance impacts of neurologic conditions across the lifespan. Prerequisite: OCTH 5311. (Typically offered: Spring)

OCTH 5422. Occupational Impacts of Pharmacology II: Neurology and Mental Health. 2 Hours.
This course focuses on pharmacological interventions to common neurological diseases and conditions that impact occupational functioning across the lifespan. Students will learn about frequently prescribed medications, their indications and side effects. Prerequisite: OCTH 5322. Corequisite: OCTH 5472, OCTH 5472L and OCTH 5411. (Typically offered: Spring)

OCTH 5443. Research Methods in Occupational Therapy. 3 Hours.
This course provides students with the opportunity to apply techniques, methods, and tools used for research in occupational science and occupational therapy. Students will deepen their understanding of the research process and scientific method, specific study designs, methods for data collection, and analysis. Prerequisite: OCTH 5243. (Typically offered: Spring)

OCTH 5451. Level I Fieldwork Seminar: Neurology. 1 Hour.
This fieldwork seminar emphasizes intermediate observation, clinical reasoning skills and professional documentation through class discussion of observations made during the Level 1 Fieldwork: Neurology experience. This course incorporates a new emphasis on interdisciplinary roles, community, cultural, and policy factors that influence engagement in occupation. Prerequisite: Successful completion of all previous skill-based competency exams and department consent. Corequisite: OCTH 5461. (Typically offered: Spring)

OCTH 5461. Level I Fieldwork: Neurology. 1 Hour.
Students participate in directed observation and competency-based participation at clinical fieldwork sites to apply knowledge related to assessment and intervention of neurological conditions. Students will observe a practitioner and dialogue with them about their process. Special attention given to the influence social, environmental, and psychological factors have on an individual’s or group’s participation in occupations. Students will be expected to integrate knowledge, experience, and evidence while applying learning to a variety of consumers. Prerequisite: Successful completion of all previous skill-based competency exams and department consent. Corequisite: OCTH 5451. (Typically offered: Spring)
OCTH 5472. Functional Neurology. 2 Hours.
This course will focus on the neurological basis for occupational performance. Students will examine physical and cognitive processes related to the brain and neural pathways. Targeted assessments for specific neurological functions and conditions will be examined. This course will accompany OCTH 5472L. Corequisite: OCTH 5372. Corequisite: OCTH 5472L. (Typically offered: Spring)

OCTH 5472L. Functional Neurology Lab. 2 Hours.
This course will focus on the assessment tools used as the neurological basis for functional activity and occupational performance. Students will learn how to evaluate standardized and non-standardized assessments for overall quality, determine the most appropriate assessments for specific functions, administer, and interpret data collected in a neurological evaluation. Prerequisite: OCTH 5372. Corequisite: OCTH 5472. (Typically offered: Spring)

OCTH 5483. Occupations, Adaptations, and Innovations: Neurological Conditions. 3 Hours.
This course focuses on occupation centered adaptations and interventions for neurologic conditions. Adaptive solutions to occupational performance issues are explored and applied to authentic environments. Problem based learning incorporating previously covered material will be utilized to facilitate innovation and client-centered solutions. Prerequisite: OCTH 5384. Corequisite: OCTH 5472, OCTH 5472L, and OCTH 5411. (Typically offered: Spring)

OCTH 5541. Integrating Creative Arts as a Modality in Practice. 1 Hour.
This course explores traditional and non-traditional applications of creative arts in practice. Students will be encouraged to employ therapeutic use of self to identify how they might use their interests, traditions and talents in their own practices. Etiquette regarding terminology that references established creative arts therapy fields; an overview of the degree and skill requirements for those fields will be discussed. Students will access and discuss literature in peer reviewed creative arts journals to identify similarities and differences in scope of practice, gain new ideas, and identify potential collaborative partners in practice and research. Prerequisite: OCTH 5332 and OCTH 5443. (Typically offered: Summer)

OCTH 5551. Level I Fieldwork Seminar: Behavioral and Mental Health. 1 Hour.
This fieldwork seminar emphasizes application of clinical reasoning skills and professional documentation (specifically of basic behavioral and mental health conditions) using classroom analysis of observations made during the Level I Fieldwork I experience, with an emphasis on professional behaviors, communication, ethics, interdisciplinary roles, models of practice, and factors that influence engagement in occupation. Prerequisite: Successful completion of all previous skill based competency exams and department consent. Corequisite: OCTH 5561. (Typically offered: Summer)

OCTH 5561. Level I Fieldwork: Behavioral and Mental Health. 1 Hour.
Students participate in directed observation and competency-based participation at clinical fieldwork sites to apply knowledge related to assessment and intervention of behavioral and mental health conditions. Students will observe a practitioner and dialogue with them about their process. Special attention given to the influence social, environmental, and psychological factors have on an individual's or group's participation in occupations. Students will be expected to integrate knowledge, experience, and evidence while applying learning to a variety of consumers. Prerequisite: Successful completion of all previous skill based competency exams and department consent. Corequisite: OCTH 5551. (Typically offered: Summer)

OCTH 5581. Upper Extremity Rehabilitation. 1 Hour.
This course focuses on the evaluation and interventions of upper extremity dysfunction from an occupational perspective. Students will learn about nerve and muscular/orthopedic issues of the upper extremity with an emphasis on the wrist and hand. Interventions to promote occupational performance are discussed. Prerequisite: OCTH 5372 and OCTH 5472. Corequisite: OCTH 5591. (Typically offered: Summer)

OCTH 5591. Occupations, Adaptations, and Innovations Upper Extremity Rehabilitation. 1 Hour.
This course focuses on the evaluation and treatment of upper extremity dysfunction, with emphasis on the wrist and hand, from an occupational perspective. Students will administer and interpret common upper extremity evaluations, develop occupation centered interventions and fabricate orthotics to promote occupational performance. This lab course accompanies OCTH 5581 Upper Extremity Rehabilitation Lecture. Prerequisite: OCTH 5384 and OCTH 5483. Corequisite: OCTH 5581. (Typically offered: Summer)

OCTH 5613. Mind, Body and Environment. 3 Hours.
This course will introduce occupation-based interventions to address the psychosocial and behavioral health conditions that impact occupational performance, focusing on the impact that environmental, developmental and personal contexts have on mental health with regard to participation and recovery. Students incorporate knowledge about human development and function across diagnosis and ages to develop individual, group, and population-based interventions. Prerequisite: OCTH 5111. (Typically offered: Summer)

OCTH 5623. Leadership and Management. 3 Hours.
This course will explore leadership theories and management approaches. Students will apply principles of leadership and management to strategic plan development, continuous quality improvement, program evaluation, and ethical service delivery. Prerequisite: OCTH 5132 and OCTH 5393. (Typically offered: Summer)

OCTH 5632. Conceptualizations of Occupational In-Justice. 2 Hours.
This course will examine the conceptual development of occupational injustice and explore the various forms of occupational injustices encountered in everyday OT practice. Students will analyze and critique occupational injustice-related concepts and themes and apply their emerging occupational justice perspective of health to critically address injustices encountered in clinical experiences and everyday practice. Prerequisite: OCTH 5332. (Typically offered: Fall)

OCTH 5643. Integrative Approaches to Teaching and Learning. 3 Hours.
The learning process and role of teacher/facilitator are explored. Evidence based learning theories and their applications across occupational therapy domains are examined. Students will apply instructional design principles to educate stakeholders and promote the profession of occupational therapy. Prerequisite: OCTH 5443. (Typically offered: Summer)

OCTH 5651. Level II Fieldwork Seminar I. 1 Hour.
This course includes discussion and reflection focused on fieldwork experiences, including a critical examination of service provision and populations served. Students will document achievement and self-evaluation throughout the fieldwork experience. Prerequisite: Successful completion of all previous coursework, skill based competencies, and department consent. Corequisite: OCTH 5666. (Typically offered: Fall and Summer)

OCTH 5666. Level II Fieldwork I. 6 Hours.
Students participate in supervised clinical placements to demonstrate competencies required for entry-level general occupational therapy practice. Students are expected to employ professional behaviors and clinical reasoning consistent with general entry-level practice. Students will complete occupational therapy evaluations, interventions, and discharge planning that is considerate of consumer and community resources, institutional policies, reimbursement systems, and roles of interdisciplinary team members throughout the process. Critical examination of service provision and populations served will be expected. Prerequisite: Successful completion of all previous coursework, skill based competencies, and department consent. Corequisite: OCTH 5651. (Typically offered: Fall, Spring and Summer)
OCTH 5683. Advanced Occupations, Adaptations and Innovations. 3 Hours.
Students will explore a variety of mid-to-high tech adaptations designed to facilitate occupational participation. Collaboration with other disciplines to develop innovative adaptive solutions is discussed. The decision-making process used in making recommendations for high tech adaptation is analyzed. Individual and contextual variables that impact access to and use of mid-to-high tech adaptations are considered. Students will develop innovative, client centered solutions to improve occupational performance and quality of life. Students will explore potential partnerships with organizations that provide resources and advocacy to enhance occupational performance through technology. Prerequisite: OCTH 5384 and OCTH 5483. (Typically offered: Fall)

OCTH 5693. Occupational Perspectives of Public Health. 3 Hours.
This course will apply an occupational perspective to public heath initiatives at local, state, federal, and global levels. Public health laws and ethics will be analyzed along with strategies used to design and evaluate community based public health programs in conjunction with service learning. Prerequisite: OCTH 5393 and OCTH 5623. (Typically offered: Fall)

OCTH 5723. Transitions and Life Design. 3 Hours.
This course focuses on the impact transitions have on habits, routines, role/identities, and meaning-making. Students will explore unplanned life transitions and their implications for health and wellness across the lifespan. Students examine theories/processes of transition from multiple disciplinary perspectives, transition planning strategies, and the potential role of occupational therapists as transition specialists. Prerequisite: OCTH 5666 and OCTH 5651. (Typically offered: Spring)

OCTH 5751. Level II Fieldwork II Seminar. 1 Hour.
This course includes discussion and reflection focused on fieldwork experiences, including a critical examination of service provision and populations served. Students will document achievement and self-evaluation throughout the Fieldwork experience. Prerequisite: Successful completion of all previous coursework, skill-based competencies, and department consent. Corequisite: OCTH 5766. (Typically offered: Spring)

OCTH 5766. Level II Fieldwork II. 6 Hours.
Students participate in supervised clinical placements to demonstrate competencies required for entry-level general occupational therapy practice. Students are expected to employ professional behaviors and clinical reasoning consistent with general entry-level practice. Students will complete occupational therapy evaluations, interventions, and discharge planning that is considerate of consumer and community resources, institutional policies, reimbursement systems, and roles of interdisciplinary team members throughout the process. Critical examination of service provision and populations served will be expected. Prerequisite: Successful completion of all previous coursework, skill-based competencies, and department consent. Corequisite: OCTH 5766. (Typically offered: Spring)

OCTH 5781. Occupational Therapy Capstone Seminar. 1 Hour.
This seminar provides students with an in-depth understanding of expectations, timelines and responsibilities as they prepare for OCTH 6966 Occupational Capstone. Students are expected to identify and initiate work with a Capstone mentor and outline a proposal for the Capstone experience and project. Prerequisite: OCTH 5666. (Typically offered: Spring)

OCTH 5793. Innovations in Community Based Practice. 3 Hours.
This course prepares the innovative future occupational therapist to envision possibilities for clinical work outside of traditional education or medical service delivery models. Students will apply an occupational justice perspective as health as they create a novel initiative that supports occupational participation. Prerequisite: OCTH 5683 and OCTH 5632. (Typically offered: Spring)

OCTH 6631. Applications of Occupational In/Justice. 1 Hour.
Students will deepen and sharpen their critical occupational perspective of health and well-being by applying occupational in/justice-related concepts to address and confront occupational injustices. Prerequisite: OCTH 5632. (Typically offered: Summer)

OCTH 6782. Occupational Therapy Capstone Independent Study. 2 Hours.
Students will complete a formal needs assessment and literature review in preparation for the Capstone project and experience. Students will collaborate with established Capstone mentors throughout this process. Prerequisite: OCTH 5781. (Typically offered: Summer)

OCTH 6882. Intentional Practitioner. 2 Hours.
This course will facilitate student synthesis learning throughout the OTD program in preparation to transition from student to professional. Students will engage in complex problem-solving tasks and reflections intended to foster mindful habits, routines and rituals to guide personal, professional, and ethical decision making. Prerequisite: OCTH 5766 and OCTH 5751. (Typically offered: Summer)

OCTH 6966. Occupational Therapy Capstone. 6 Hours.
The Occupational Therapy Capstone experience and project provides students with an in-depth exposure to clinical practice, research, administration, leadership, policy, and/or program development. Students are expected to collaborate with a mentor to design learning and performance objectives prior to initiating onsite experiences. The experience concludes with a culminating project reflecting the student’s integration of occupation centered knowledge and skills and ability to engage in critical and self-reflective inquiry. Prerequisite: Successful completion of all previous coursework, skill-based competency exams, and department consent. (Typically offered: Fall)

Operations Management (OPMG)

Also offered through Graduate Resident Centers

Gregory S. Parnell
Program Director
4207 Bell Engineering Center
479-575-3413
Email: msom@uark.edu

Operations Management Program website (http://operations-management.uark.edu/)

Degree Conferred:
M.S.O.M. (OPMG)

Graduate Certificates Offered (non-degree):
Homeland Security (OMHS)
Lean Six Sigma (OMLS)
Project Management (OPPM)

Program Description: The Operations Management program, part of the Department of Industrial Engineering, teaches the processes for improving operational decisions such as design of goods and services, management of quality, consideration of process and capacity design issues, and determination of location and layout strategy.

Master of Science in Operations Management
The Master of Science program in Operations Management is directed toward the acquisition of practical knowledge in the management of work processes, projects, and people. Areas covered include project management, quality management, economic decision-making, supply chain management, operations research, safety management, lean production and inventory control techniques, and human behavior analysis.

The operations management program is conducted at Graduate Residence Centers in Arkansas, Tennessee, and Florida, as well as at Fayetteville. Evening classes are offered in eight-week terms with five terms scheduled during an academic year. Selected courses are available online and via independent study. The operations management
curriculum is aimed at the needs of working managers of technical and logistics operations, as well as managers of production, service delivery and support functions in a wide spectrum of organizations, ranging from business/industry to military, government and non-profit. The program is open to students regardless of the major they selected as an undergraduate. The subject matter is patterned after the industrial engineering curriculum but is less technical and does not require a calculus mathematics background.

**Admission**

Admission to the program generally follows U of A Graduate School admission policies with the following exceptions:

1. The program does not permit the use of the MAT as an entrance test to compensate for undergraduate GPAs below 3.0. The GRE and GMAT are acceptable tests, but the analytical writing score must be 4.5 or above;
2. All applicants, including those with advanced degrees, will be evaluated for admission on the basis of their first baccalaureate degree.
3. OMGT 5003 must be taken in the first term of operations management graduate study.
4. Before taking any graduate classes in the program, non-native speakers of English who do not have a conferred undergraduate degree from an accredited U.S. college or university must demonstrate minimum proficiency on one of the following tests of written English: TOEFL, IBT (26), ELPT (75) or GRE/GMAT Analytical Writing (4.5). The MSOM English Language Proficiency Policy requires Level II non-native speakers of English to complete ELAC 4043 Research Writing in the STEM fields no later than the first semester of graduate level courses. In addition to course pre-requisites, before completing 12 hours of course work toward the operations management degree, students must successfully complete the following courses (or equivalent courses or demonstrate knowledge of these subject areas acceptable to the program):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>OMGT 4313</td>
<td>Law and Ethics</td>
<td>3</td>
</tr>
<tr>
<td>OMGT 4323</td>
<td>Industrial Cost Analysis</td>
<td>3</td>
</tr>
<tr>
<td>OMGT 4333</td>
<td>Applied Statistics</td>
<td>3</td>
</tr>
<tr>
<td>OMGT 4853</td>
<td>Introduction to Decision Support Tools in</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Operations Management</td>
<td></td>
</tr>
</tbody>
</table>

These courses are offered at the undergraduate level and cannot be applied toward the requirements for a Master of Science in Operations Management degree.

**Requirements for the M.S.O.M. Degree**

To fulfill requirements for the M.S.O.M. degree, a student must earn a total of 30 semester hours credit in the program. Of these hours, 12 hours consist of required courses, while the remaining 18 hours are electives.

Required courses are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>OMGT 5003</td>
<td>Introduction to Operations Management</td>
<td>3</td>
</tr>
<tr>
<td>OMGT 5783</td>
<td>Project Management for Operations Managers</td>
<td>3</td>
</tr>
<tr>
<td>OMGT 5623</td>
<td>Strategic Management</td>
<td>3</td>
</tr>
<tr>
<td>OMGT 5123</td>
<td>Finance for Operations Managers</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>or OMGT 5463 Economic Decision Making</td>
<td></td>
</tr>
</tbody>
</table>

If a core course requirement offers a choice between two options, only one can be counted as the required course. Required courses must be taken in the first 18 hours of graduate coursework and be completed with a grade of “B” or better. Students who earn a “C” or lower in a required course may repeat the course only once. Failure to earn a “B” or better in any of the four required courses will result in dismissal from the program.

A minimum grade-point average of 3.0 (A = 4.0), calculated from the University of Arkansas graduate courses in this curriculum, must be met as a graduation requirement. Please note that if a student must retake a class to meet the grade requirements of this program, both the original grade and the retaken grade will count in the calculation of the GPA for graduation purposes.

While a thesis is not required, upon approval of the program director students may take up to six thesis hours to be applied toward the 30 semester hours required for degree completion. The six hours of thesis must be completed on the Fayetteville campus.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

**Graduate Certificate in Homeland Security**

Program admission requires 3.0 GPA on the last 60 hours of undergraduate coursework. Students must complete coursework with at least a 3.0 GPA. Four courses totaling 12 credit hours must be completed. The following courses are required core courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>OMGT 5003</td>

Graduate Certificate in Project Management

Admission to the Graduate Certificate program generally follows U of A Graduate School admission policies with the following exceptions:
1. All applicants, including those with advanced degrees, will be evaluated for admission on the basis of their first baccalaureate degree.

2. Students may be eligible for admission by special consideration if the GPA is below 3.0 but above 2.5.

3. Before taking any graduate classes in the program, non-native speakers of English who do not have a conferred undergraduate degree from an accredited U.S. college or university must demonstrate minimum proficiency on one of the following tests of written English: TOEFL, IBT (26), ELPT (75) or GRE/GMAT Analytical Writing (4.5). The English Language Proficiency Policy for the Master of Science in Operations Management requires Level II non-native speakers of English to complete ELAC 4043 Research Writing in the STEM Fields no later than the first semester of graduate level courses.

Former students or alumni of the Master of Science in Operations Management program may use six credit hours (two courses) from the M.S.O.M. program toward equivalent Project Management Certificate courses. If an alumus has completed all possible combination of courses for the Project Management Certificate, the student may petition to take one additional course chosen by the program to complete the Project Management Graduate Certificate.

Current M.S.O.M. students who are concurrently accepted into the Project Management Certificate program may use all applicable courses for both the M.S.O.M. degree and the Project Management Certificate.

Graduate Faculty

Altom, Carol, M.B.A. (San Diego State University), B.S. (United States Naval Academy), Instructor, 2012.

Banton, Jeffrey, M.S.O.M. B.S. (University of Arkansas), Instructor, 2018.

Beam, Caroline, Ph.D., M.S. (University of California), B.S.(Princeton University), Clinical Assistant Professor, 2013.

Bean, Jeffrey, M.B.A. (University of Arkansas), B.A. (Rhodes College), Instructor, 2008.

Bingham, D. James, M.B.A. (Northwestern University), B.S. (Brigham Young University), Instructor, 2013.

Bresnick, Terry A., M.S. (Stanford University), M.B.A. (George Mason University), B.S. (United States Military Academy), Instructor, 2014.

Brown, Brandon, M.S., B.S. (University of Arkansas), Instructor, 2006.

Brown, Kendrick, Ph.D., (Jackson State University), M.S. ( Meharry Medical College), B.S. (Southern Illinois University), Instructor, 2017.

Burgin, James, M.B.A. (Golden Gate University), B.S. (University of Arkansas), Instructor, 2012.

Cilli, Matthew, Ph.D. (Stevens Institute of Technology), M.S. (New York University Polytechnic), M.S. (University of Pennsylvania), B.S. (Villanova University), Instructor, 2015.

Comstock, James, M.S. (Virginia Polytechnic Institute and State University), B.S. (United States Military Academy), Instructor, 2012.

DeGrange, Walter, M.S. (Naval Postgraduate School), B.E. (Vanderbilt University), Adjunct Assistant Professor, 2014.

DelCastillo, David, M.A.S. (Embry Riddle Aeronautical University), B.S (Embry Riddle Aeronautical University), Instructor, 2005.

Ellixson, Marita, M.B.A. (Andrew Jackson University), B.S. (University of Central Florida), Instructor, 2002.

Flynn, John, M.B.A., J.D. (Case Western Reserve University), B.S. (John Carroll University), Instructor, 2012.

Friscoe, Louis F., M.S., B.S. (Embry Riddle Aeronautical University), Instructor, 2014.

Garner, Jerald, M.S. (University of Arkansas), B.S. (Park University), Instructor, 1997.

Ham, Richard, Ed.D. (University of Arkansas at Little Rock), M.A.S. (Embry-Riddle Aeronautical University), B.S. (Park University), Instructor, 2014.

Hemphill, Dewey, M.S. (University of Arkansas), B.A. (Memphis State University), Instructor, 2012.

Henderson, Craig, M.B.A. (University of Nevada), B.S. (United States Naval Academy), Instructor, 2011.

Hutto, Gregory T., M.S. (Stanford University), B.S. (U.S. Naval Academy), Instructor, 2014.

Jefferis, Neal, M.S.Ed. (Old Dominion University), B.E.S.(University of Missouri), Instructor, 2017.

Jones, Phillip, M.B.A., B.S. (University of Arkansas), Instructor, 2013.

Lattanzia, Paula, J.D. (University of Arkansas), M.S. (West Virginia University), Instructor, 2008.

Livingston, Mark A., Ph.D. (University of Maryland), Instructor, 2017.

Lyons, Vincent S., M.B.A. (University of Phoenix), M.S. (Stanford University), Instructor, 2018.

Malstrom, Derek, M.S.I.E., B.S. (University of Arkansas), Instructor, 2016.

Mason, Scott, Ph.D. (Arizona State University), M.S., B.S. (University of Texas), Instructor, 2001.

McGlynn, Moira, Ph.D., M.B.A. (Union College of Union University), Instructor, 2013.

McNeal, Travis G., M.A. (University of Nevada), B.S. (Utah State University), Instructor, 2014.

Melton, Kerry D., Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Instructor, 2013.

Michealson, Kirk, M.S. (Naval Postgraduate School), B.S. (United States Naval Academy), Instructor, 2014.

Moores, John, M.A. (Ball State University), B.B.A. (Kent State University), Instructor, 2001.

Morris, Adam, Ed.D. (University of Arkansas), M.S., B.S. (Friends University), B.S. (Newman University), Instructor, 2011.

Nichols, Emily M., M.Ed. (University of Arkansas), B.A. (University of Arkansas at Fort Smith), Instructor, 2015.

Peterson, David, Ph.D. (University of North Carolina), M.S. (Air Force Institute of Technology), B.S. (Iowa State University), Instructor, 2018.

Raynor, James, M.S. (University of Arkansas), B.S. (Texas A & M University), Instructor, 2014.

Richardson, Tracey, Ed.D. (Argosy University), M.S., B.A.Sc. (Troy University), Instructor, 2009.

Rieske, David, M.S., B.S. (University of Arkansas), Instructor, 2007.

Robinson, Eddie, Ph.D. (Northcentral University), M.A.S. (Embry Riddle Aeronautical University), M.S. (University of Arkansas), B.S. (United States Air Force Academy), Instructor, 2007.

Rossetti, Amy H., M.S., B.S. (Ohio State University), Instructor, 2013.

Roy, William, M.S. (University of Arkansas), B.S. (University of Memphis), Instructor, 2002.

Schott, Elizabeth W., Ph.D., M.S. (New Mexico State University), M.S.I.E. (Georgia Institute of Technology), Instructor, 2017.

Smith, Scott, M.S. (University of Arkansas), M.S. (Air Force Institute of Technology), B.S. (United States Air Force Academy), Instructor, 2006.

Smith, Christopher, Ph.D. (University of Virginia), M.S. (University of Missouri-Rolla), M.S. (University of Texas at Austin), B.S. (U.S. Military Academy), Instructor, 2015.

Specking, Eric A., M.S.I.E., B.S. (University of Arkansas), Lecturer, 2014.

Sutton, James M., M.S. (Southern Methodist University), B.S. (University of West Florida), B.M. (University of Southern Mississippi), Instructor, 2017.

Talafuse, Thomas, Ph.D. (University of Arkansas), M.S. (Air Force Institute of Technology), B.S. (United States Air Force Academy), Instructor, 2018.

Teague, Rick, M.S. (Webster University), B.B.A. (University of Memphis), Instructor, 2001.

Ward, Cortez, M.S. (Troy University), B.S. (University of Maryland), Instructor, 2006.

Wells, Michael, M.S. (Florida State University), B.S. (East Stroudsburg University), Instructor, 2011.

Wilke, Stephen, J.D., M.P.A. (University of Memphis), Instructor, 1996.

Williams, Darron, Ph.D. (Northcentral University), M.S., M.B.A., B.S. (University of Memphis), Instructor, 2015.

Wright, Nia, M.B.A. (Tulane University), B.S. (University of Arkansas), Instructor, 2009.

Yeager, Mickey, M.S. (University of Arkansas), M.A. (Liberty Baptist Theological Seminary), B.S. (University of Southern Mississippi), Instructor, 1989.

Courses

**OMGT 5003. Introduction to Operations Management. 3 Hours.**

Provides an overview of the functional activities necessary for the creation/delivery of goods and services. Topics covered include: productivity; strategy in a global business environment; project management; quality management; location and layout strategies; human resources management; supply chain and inventory management; material requirements planning; JIT; maintenance and reliability; and other subjects relevant to the field. Required course. Prerequisite: OMGT 4853. Prerequisite: OMGT 4333, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. MSE or MSEM students may take the course with advisor consent. (Typically offered: Fall and Spring)

**OMGT 5013. Supply Chain Management for Operations Managers. 3 Hours.**

Focuses on the development and application of decision models in supply chains with emphasis on supply chain performance, cost, and metrics; demand forecasting; aggregate planning; inventory management; supply chain design and distribution; transportation modeling and analysis; supply chain coordination; the role of information technology; and sourcing decisions. Spreadsheet tools and techniques will be used to analyze supply chain performance. Prerequisite: OMGT 4333, OMGT 4853 and admitted to OPMGMS, EMGTM S, ENGRM E or OMPMGC Graduate Certificate Program, or departmental consent. (Typically offered: Fall, Spring and Summer)

**OMGT 5113. Human Resource Management. 3 Hours.**

A review of Human Resources Management functions as they apply in today’s business setting with specific emphasis on regulatory compliance, total rewards systems, recruitment, training, and employment practices. The course is designed both for HRM professionals and for line managers/professionals who need to understand the roles and responsibilities of HR as a business partner. Prerequisite: OMGT 4313, OMGT 5003 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Fall, Spring and Summer)

**OMGT 5123. Finance for Operations Managers. 3 Hours.**

Examines the scope and environment of finance for operations managers. Topics include financial markets, interest rates, financial statements, cash flows, and performance evaluation. Valuation of financial assets, using time value of money; the meaning and measurement of risk/return; capital-budgeting, cost of capital, capital structure, dividend policy, and working capital management are also covered. Required course (may substitute OMGT 5463). Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4323, OMGT 4853 and admitted to OPMGMS, EMGTM S, ENGRM E, or OMPMGC Graduate Certificate Program, or departmental consent. (Typically offered: Fall, Spring and Summer)

**OMGT 5133. Operations Management in the Service Sector. 3 Hours.**

Review of the role of the operations management in the service sector, e.g., health care systems, banking, municipal services, utilities, and postal service and others. Emphasizes the principles and methodologies applicable to the solution of problems within the service industries. Pre- or Corequisite: OMGT 5003. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)
OMGT 5143. Strategic Issues in Human Resource Management. 3 Hours.
Explores the concept of Strategic Human Resource Management with emphasis on effective partnering by various HR functions with all levels of management to support the large-scale, long-range goals of achieving success in the organization’s chosen markets. Internal and external impacts on and of HR in all areas will be examined. Students will analyze case studies to build on basic concepts acquired in OMGT 5113. Prerequisite: OMGT 5003, OMGT 4313, OMGT 5113 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5253. Leadership Principles and Practices. 3 Hours.
The course is designed to expose students to multiple approaches to leadership in a wide variety of settings. Leadership styles, the knowledge areas and competencies expected of today’s leaders, the challenges leaders face, the historical and philosophical foundations of leadership, the relationships among leadership theory, leadership practice, and the moral-ethical aspects of leadership are among the topics covered in the course. A number of respected regional, national, and international leaders share “lessons learned” in their leadership journeys. Plus, a number of highly regarded leadership books and case studies on leadership are read and discussed. Students may not receive credit for INEG 4253 and INEG 5253/OMGT 5253. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Fall, Spring and Summer)

This course is cross-listed with INEG 5253.

OMGT 5303. Health Care Policies and Issues. 3 Hours.
Explores health care management strategies and policy development with emphasis on health insurance, Medicare, Medicaid and managed care, as well as employee health benefits. The roles of government and business in policy formulation are addressed, as are the problems of financing health care, legal and ethical considerations, current healthcare issues, and quality measures. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5373. Quality Management. 3 Hours.
Introduces students to quality management concepts and their use in enhancing organizational performance and profitability. History of the quality movement, its broad application in key economic sectors, and philosophical perspectives of major quality leaders will be discussed. Focus is on continuous process improvement, using data and information to guide organizational decision-making. The Six Sigma approach and associated statistical tools, supporting process improvement, are also covered. Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4333 and OMGT 4853, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5403. Industrial Safety and Health Administration. 3 Hours.
Based on Federal Regulations for Occupational Safety and Health, the course examines current regulations, as well as their commonsense application. Covers various standards, such as those for material handling, personal protective equipment, toxic substances, and machine guarding. Uses case studies and real world scenarios to present topics and demonstrate their application. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5423. Operations Management & Global Competition. 3 Hours.
Studies of principles and cases in business/industrial administration in global competition. Survey of markets, technologies, multi-national corporations, cultures, and customs. Discussion of ethics, professionalism, difference valuing, human relations skills, and other topics relevant to global practice. Prerequisite: OMGT 5003. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Spring)

OMGT 5433. Cost Estimation Models. 3 Hours.
An examination of the methodologies for estimating and forecasting manufacturing costs. Types of cost recovery systems, work progress functions, product improvement curves, determination of hourly rates, parametric estimating systems, and the development of software for computer-assisted estimating systems. Pre- or Corequisite: OMGT 5003. Prerequisite: INEG 3513 or OMGT 4853, OMGT 4323 and OMGT 4333, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

This course is cross-listed with INEG 5433.

OMGT 5443. Decision Models. 3 Hours.
Focus on quantitative decision models for technical and managerial problems for private and public organizations. Topics include shareholder value, stakeholder value, Value-Focused Thinking, axioms of decision analysis, decision making challenges, decision traps, cognitive biases, decision processes, decision framing, influence diagrams, value hierarchy structuring, designing creative alternatives, single objective models, multibjective additive value model, swing weights, sensitivity analysis, portfolio decision models with binary linear programming, probability elicitation, Bayes Theorem, decision trees, Monte Carlo simulation, expected value, dominance (deterministic and stochastic), tornado diagrams, value of information, risk preference, utility models, expected utility, and communicating analysis insights. Prerequisite: (OMGT 5003, OMGT 4333, and OMGT 4853) or INEG 2313, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

This course is cross-listed with INEG 5443.

OMGT 5463. Economic Decision Making. 3 Hours.
Principles of economic analysis with emphasis upon discounted cash flow criteria for decision-making. Comparison of criteria such as rate of return, annual cost, and present worth for the evaluation of investment alternatives. Required course (may be substituted by OMGT 5123). Prerequisite: OMGT 5003, OMGT 4323 and OMGT 4853, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5473. Lean Six Sigma. 3 Hours.
This course covers the application of lean principles to manufacturing, service and government processes in order to improve productivity, increase value and eliminate waste as well as the use of the Six Sigma problem solving methodology to reduce variation and improve quality. Students will gain experience with the tools and analysis methods used in both approaches. The topics covered include: methods for creating Lean processes, proven lean problem-solving methodologies, managing a lean transformation, implementing a Six Sigma initiative, and executing the five phases of the Six Sigma DMAIC process, and communicating results to stakeholders and decision-makers. Prerequisite: (OMGT 5003 or departmental consent), and admitted to the (Master of Science in Operations Management Program, or the Project Management Graduate Certificate Program, or be a non-degree seeking graduate student with departmental consent). (Typically offered: Fall, Spring and Summer)
OMGT 5493. Advanced Lean Six Sigma. 3 Hours.
With an emphasis on application, this course builds upon the Lean Six Sigma and Quality Management courses and covers analysis techniques for Lean Six Sigma problem solving in the Analyze, Improve, and Control phases of the DMAIC process. The topics covered include descriptive versus inferential statistics, sampling, Hypothesis Testing with Normal and Non-Normal Data, regression analysis, design of experiments, and control charts. Prerequisite: OMGT 5473 and OMGT 5373. (Typically offered: Fall, Spring and Summer)

OMGT 5503. Maintenance Management. 3 Hours.
Principles and practices of maintenance department organization, prevention procedures, and typical equipment problems. Includes related topics such as plant protection, preventative and plant maintenance. Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4333 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5613. Lean Production and Inventory Control. 3 Hours.
Defines analytical methods used to support inventory replenishment for the production of goods and services. Operational problems of production systems are examined, including objective/subjective forecasting methods, aggregate planning of work force and production under seasonal demand; and inventory models of EOQ for known and unknown demand. Supply chain management and lean manufacturing concepts are also discussed. Prerequisite: OMGT 4333 and OMGT 5003, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5623. Strategic Management. 3 Hours.
Examines strategic management, which is defined as the art and science of formulating, implementing, and evaluating cross-functional decisions that enable an organization to achieve its long-term objectives. Principles of strategic management will be covered in conjunction with case studies to provide opportunity for analysis and experience in applying these principles in an operations management environment. Required course. Prerequisite: OMGT 5003 and OMGT 4313, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5633. Linkages among Technology, Economics and Societal Values. 3 Hours.
Addresses how macro-level change is influenced by the linkages among technology, economics and societal values. Three major course initiatives: 1) Developing a conceptual model for understanding how macro-level change has occurred over history; 2) Examining recorded history in order to develop a contextual appreciation for Society’s current situation; and 3) Using statistical data to identify six overriding world trends that are likely to greatly impact society’s goal of achieving sustainable prosperity and well being in the foreseeable future. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

This course is cross-listed with BENG 5633.

OMGT 5653. Introduction to Data Analytics for Operations Managers. 3 Hours.
Introduces data science and data analytics. Provides basic skill instruction in the statistical data analysis programming language R. Provides experience building and interpreting descriptive and predictive data analytics models. Provides operations managers with the skill and tools to use and understand advanced data analytics methods. Provides practice communicating those results to senior stakeholders and decision makers. Prerequisite: OMGT 5003 or EMGT 5033, must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5673. Principles of Operations Research. 3 Hours.
Surveys the mathematical models used to design and analyze operational systems. Includes linear programming models, waiting line models, computer simulation models, and management science. Students will be introduced to applications of operations research and solution methods, using spreadsheet software. Pre- or Corequisite: OMGT 5003 and OMGT 4853. Prerequisite: OMGT 4333 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5733. Human Behavior Analysis. 3 Hours.
Examination of the principal drivers of individual and group behavior in organizations with coverage of practical applications of concepts in organizational behavior for operations managers. In addition to group behavior and organizational processes, the course explores people management challenges that result from external pressures on stakeholders (e.g. competitive, economic, social, political, and regulatory impacts). Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4313 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 577V. Special Problems. 1-3 Hour.
Application of previous course work knowledge to problems encountered in military base and civilian operations. Problems are proposed by students according to individual interests and needs. Used for courses in specific concentration, certificate or focus areas with parenthetical titles. Maybe used for courses in development. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

OMGT 5783. Project Management for Operations Managers. 3 Hours.
An introduction to the Critical Path Method and Program Evaluation and Review Technique. Covers project planning and control methods; activity sequencing; time-cost trade-offs; allocation of manpower and equipment resources; scheduling activities and computer systems for PERT/CPM with emphasis on MS project. Case studies include topical issues combining methodologies and project management soft skills, such as conflict management, negotiation, presentations to stakeholders, and team building. Required course. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5793. Risk Management. 3 Hours.
Students will learn to apply tools to identify, assess, communicate and manage risk. Course work includes methods to identify risks, develop risk models, assess risk, and evaluate risk management options. Case studies are used to understand risk management challenges in systems development in complex organizations. Prerequisite: OMGT 5003 or EMGT 5033, must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5823. Information Technology for Operations Managers. 3 Hours.
Information Technology for the management and control of information systems and processes used in operations management. Topics covered include e-Business and e-Commerce Systems, Management Information Systems (MIS), Data Resource Management, Networking, Decision Support, Information Security, Enterprise and Global IT, and IT Strategies and Solutions for Operations Managers. Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4853 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)
OMGT 5833. Decision Support Application Development for Operations Management. 3 Hours.
Students will utilize Microsoft Excel and will write programming code in Visual Basic for Applications to develop custom solutions to challenging operations management problems. Emphasis will be placed on computing productivity in a spreadsheet-based setting to develop practical, useful decision support applications and computer programs to support operations management. Assumes basic knowledge of programming. Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4853 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5873. Organizing for Change. 3 Hours.
Provides an overview of fundamental management functions, organizational decision-making authority, structures and controls to support managing change. Topics include leadership, strategy and ethical perspectives on change management. Pre- or Corequisite: OMGT 5003. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5903. Operations Management of Unmanned Aircraft Systems. 3 Hours.
Course focuses on the fundamentals of UAS operations and the applications of UAS systems in research, government and business applications. Modules covers government compliance, licensing/certification requirements, University Policy and current events in the UAS field. Prepares students to participate in research or UAS operational roles. Discusses policy and process issues in society and considerations for ethical UAS use. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5933. Cybersecurity for Operations Managers. 3 Hours.
The cybersecurity for operations managers course introduces strategic and tactical processes to implement the National Institute of Standards and Technology (NIST) Risk Management Framework (RMF). Additionally, the Body of Knowledge for the American Society of Industrial Security is applied to each process and procedure. Managers and Leaders responsible for cybersecurity, with or without an IT background, are provided a logical RMF to establish an effective cybersecurity program in their organization. (Typically offered: Fall, Spring and Summer)

OMGT 5983. Organizing for Change. 3 Hours.
Course builds upon the project management for operations managers' course and offers students an opportunity to apply advanced project management tools to manage troubled projects. Topics include determining the project status using the schedule baseline, cost estimations, and earned value management techniques. Students will learn how to perform a project assessment/audit and will create a troubled project recovery plan. The course includes presentations of case study assignments to gain experience in communicating the status and recovery of failed and troubled projects. Prerequisite: OMGT 5783 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Fall, Spring and Summer)

OMGT 5993. Homeland Security for Operations Managers. 3 Hours.
Introduces concepts of Homeland Security in industry and government settings. Covers basic legal and compliance programs and risk management processes. Explains the continuity between critical infrastructure, government and private sector roles. Focuses on system design and understanding of the National Incident Management System protecting the homeland. Introduces cybersecurity and intelligence analysis concepts. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 600V. Master's Thesis. 1-6 Hour.
Master's thesis option for OMGT students. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Philosophy (PHIL)

Email: phildept@uark.edu

Department of Philosophy website (http://fulbright.uark.edu/departments/philosophy/)

Degrees Conferred:
M.A., Ph.D. (PHIL)

Areas of Study: History of philosophy (including ancient, medieval, modern, early analytic, and continental), metaphysics, epistemology, ethics, social and political philosophy, philosophy of language, philosophy of mind, philosophy of religion, and philosophy of science.

Prerequisites to Degree Program: Admission to the program is subject to the approval of the graduate committee of the Department of Philosophy. For the M.A., the normal expectation is 18 hours in philosophy, including logic. Students with fewer hours in philosophy may be admitted with deficiencies. In addition to the materials required by the Graduate School, at least two letters of recommendation, a sample of written work, and GRE aptitude scores (if available) should be submitted to the department chair. For the Ph.D., completion of an M.A. degree in philosophy is required.

Requirements for the Master of Arts Degree: (Min. 33 hours.)
1. 27 total hours of course work with a cumulative GPA of 3.00 or better. These hours must include:
   a. Satisfaction of the course distribution requirement, which is as follows: one course each in ancient Greek philosophy, modern philosophy, value theory, and metaphysics/epistemology. Only courses in which the student earns a grade of “B” or better will count towards fulfilling the course distribution requirement. A student may petition the graduate committee to take an exam in one or more of the above areas, which, if passed, would satisfy the distribution requirement for the area(s) in question.
   b. Symbolic Logic I or II with a grade of “C” or better, or equivalent, or exam in symbolic logic.
   c. Nine hours of course work in graduate seminars.
2. An acceptable thesis and a successful oral examination before the thesis committee. With the approval of the graduate committee, the oral exam may be taken a second time.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Requirements for the Doctor of Philosophy Degree:
1. 24 hours of course work beyond completion of the M.A. in philosophy (with the approval of the graduate committee, up to six hours may
be taken in another discipline). Course work beyond the M.A. must satisfy the following conditions:

a. Only courses in which a “B” or better is earned count toward the 24 hours of course work required for the Ph.D.

b. Symbolic Logic I or II, or equivalent, or exam in symbolic logic. (This requirement is waived for candidates who have completed the above M.A. program.)

c. At least nine hours of graduate seminar work in philosophy.

d. By the time final course work is taken, students must have satisfied course distribution requirements comparable to those for the M.A. degree (1a., above).

2. Qualifying Examinations:

a. Comprehensive Exam: The student must pass a comprehensive examination of his or her main area of specialization.

b. Prospectus Exam: The student must write a dissertation proposal and pass an oral preliminary dissertation examination covering the proposal and the topic of the dissertation.

3. An acceptable dissertation, successfully defended before the dissertation committee.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Through an agreement with the Academic Common Market (p. 495), residents of certain Southern states may qualify for graduate enrollment in the doctoral program in philosophy as in-state students for fee purposes.

M.A. in Philosophy

Prerequisites to Degree Program: Admission to the program is subject to the approval of the graduate committee of the Department of Philosophy. For the M.A., the normal expectation is 18 hours in philosophy, including logic. Students with fewer hours in philosophy may be admitted with deficiencies. In addition to the materials required by the Graduate School, at least two letters of recommendation, a sample of written work, and GRE aptitude scores (if available) should be submitted to the department chair. For the Ph.D., completion of an M.A. degree in philosophy is required.

Requirements for the Master of Arts Degree: (Min. 33 hours.)

1. 27 total hours of course work with a cumulative GPA of 3.00 or better. These hours must include:

   a. Satisfaction of the course distribution requirement, which is as follows: one course each in ancient Greek philosophy, modern philosophy, value theory, and metaphysics/epistemology. Only courses in which the student earns a grade of “B” or better will count towards fulfilling the course distribution requirement. A student may petition the graduate committee to take an exam in one or more of the above areas, which, if passed, would satisfy the distribution requirement for the area(s) in question.

   b. Symbolic Logic I or II with a grade of “C” or better, or equivalent, or exam in symbolic logic.

   c. Nine hours of course work in graduate seminars.

2. An acceptable thesis and a successful oral examination before the thesis committee. With the approval of the graduate committee, the oral exam may be taken a second time.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Ph.D. in Philosophy

Prerequisites to Degree Program: Admission to the program is subject to the approval of the graduate committee of the Department of Philosophy. In addition to the materials required by the Graduate School, at least two letters of recommendation, a sample of written work, and GRE aptitude scores (if available) should be submitted to the department chair. For the Ph.D., completion of an M.A. degree in philosophy is required.

Requirements for the Doctor of Philosophy Degree:

1. 24 hours of course work beyond completion of the M.A. in philosophy (with the approval of the graduate committee, up to six hours may be taken in another discipline). Course work beyond the M.A. must satisfy the following conditions:

   a. Only courses in which a “B” or better is earned count toward the 24 hours of course work required for the Ph.D.

   b. Symbolic Logic I or II, or equivalent, or exam in symbolic logic. (This requirement is waived for candidates who have completed the above M.A. program.)

   c. At least nine hours of graduate seminar work in philosophy.

   d. By the time final course work is taken, students must have satisfied course distribution requirements comparable to those for the M.A. degree (1a., above).

2. Qualifying Examinations:

   a. Comprehensive Exam: The student must pass a comprehensive examination of his or her main area of specialization.

   b. Prospectus Exam: The student must write a dissertation proposal and pass an oral preliminary dissertation examination covering the proposal and the topic of the dissertation.

3. An acceptable dissertation, successfully defended before the dissertation committee.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Through an agreement with the Academic Common Market (p. 495), residents of certain Southern states may qualify for graduate enrollment in the doctoral program in philosophy as in-state students for fee purposes.

Graduate Faculty

Adler, Jacob, Ph.D., A.B. (Harvard University), Associate Professor, 1984.

Funkhouser, Eric M., Ph.D. (Syracuse University), M.A., B.A. (University of Nebraska-Lincoln), Professor, 2002.

Herold, Warren, Ph.D. (University of Michigan), Assistant Professor, 2014.

Lee, Richard N., Ph.D. (Stanford University), B.A. (Luther College), Associate Professor, 1982.

Lyons, Jack C., Ph.D. (University of Arizona), B.A. (Valparaiso University), Professor, 2001.

Maksymchuk, Oksana, Ph.D. (Northwestern University), B.A. (Bryn Mawr College), Assistant Professor, 2013.

Minar, Edward H., Ph.D., A.M. (Harvard University), M.A. (University of California at Los Angeles), A.B. (Harvard University), Professor, 1994.

Senor, Thomas D., Ph.D., M.A. (University of Arizona), B.S. (University of Oregon), Professor, 1989.
Courses

PHIL 5003. Ancient Greek Philosophy. 3 Hours. (Formerly PHIL 4003.) Pre-Socratics, Socrates, Plato, and Aristotle. Graduate degree credit will not be given for both PHIL 4003 and PHIL 5003. Prerequisite: Three hours of philosophy coursework. (Typically offered: Fall)

PHIL 5013. Platonism and Origin of Christian Theology. 3 Hours. (Formerly PHIL 4013.) The study of Plato, Middle Platonism, and Neoplatonism, including Philo, Plotinus, and Proclus, and the influence of Platonism on the Greek church fathers of the 2nd-5th centuries, principally Origen and Gregory of Nyssa and also Pseudo-Dionysius. Graduate degree credit will not be given for both PHIL 4013 and PHIL 5013. Prerequisite: Three hours of philosophy coursework. (Typically offered: Irrgular)

PHIL 5023. Medieval Philosophy. 3 Hours. (Formerly PHIL 4023.) Includes Augustine, Bonaventure, Aquinas, Scotus, and Ockham. Graduate degree credit will not be given for both PHIL 4023 and PHIL 5023. (Typically offered: Irrgular)

PHIL 5033. Modern Philosophy-17th and 18th Centuries. 3 Hours. (Formerly PHIL 4033.) British and Continental philosophy, including Bacon, Descartes, Spinoza, Leibniz, Hobbies, Locke, Berkeley, Hume, and Kant. Graduate degree credit will not be given for both PHIL 4033 and PHIL 5033. (Typically offered: Spring)

PHIL 5043. Nineteenth Century Continental Philosophy. 3 Hours. (Formerly PHIL 4043.) Study of major Continental European philosophers of the 19th century including Hegel, Marx, Kierkegaard, Schopenhauer, Nietzsche. Emphasis on the nature of persons, the question of freedom, and the importance of self-expression, as well as views on knowledge, reality, and the nature of philosophy. Graduate degree credit will not be given for both PHIL 4043 and PHIL 5043. Prerequisite: 3 hours of Philosophy. (Typically offered: Irrgular)

PHIL 5053. Twentieth Century Continental Philosophy. 3 Hours. (Formerly PHIL 4053.) Study of major figures (e.g. Husserl, Heidegger, Sartre, Foucault, Derrida) and trends (phenomenology, existentialism, hermeneutics, critical theory, deconstruction) in 20th century French and German thought. Topics include human beings and their place in the world, the role of history and culture, and the possibility of critical reflection. Graduate degree credit will not be given for both PHIL 4053 and PHIL 5053. (Typically offered: Irrgular)

PHIL 5073. History of Analytic Philosophy. 3 Hours. (Formerly PHIL 4073.) From Frege to recent figures, including Russell, Moore, Wittgenstein, Schlick, Carnap, Ayer, Ryle, Strawson, Quine, including a representative sample of works on the logical analysis of language, logical positivism, and ordinary language analysis. Graduate degree credit will not be given for both PHIL 4073 and PHIL 5073. Prerequisite: 3 hours of philosophy. (Typically offered: Irrgular)

PHIL 5093. Special Topics in Philosophy. 3 Hours. (Formerly PHIL 4093.) This course will cover subject matter not covered in regularly offered courses. Graduate degree credit will not be given for both PHIL 4093 and PHIL 5093. Course cannot be repeated when topic is the same as one for which the student has previously enrolled. (Typically offered: Irrgular) May be repeated for degree credit.

PHIL 5103. Modern Jewish Thought. 3 Hours. (Formerly PHIL 4103.) A survey of the main trends in Jewish thought from the seventeenth through the nineteenth century. Graduate degree credit will not be given for both PHIL 4103 and PHIL 5103. (Typically offered: Irrgular)

PHIL 5113. Social and Political Philosophy. 3 Hours. (Formerly PHIL 4113.) Selected philosophical theories of society, the state, social justice, and their connections with individuals. Graduate degree credit will not be given for both PHIL 4113 and PHIL 5113. (Typically offered: Irrgular)

PHIL 5123. Classical Ethical Theory. 3 Hours. (Formerly PHIL 4123.) Study of classical texts in the history of philosophical ethics from Plato to Nietzsche. Philosophers covered may include Plato, Aristotle, Butler, Hume, Kant, and Mill. Graduate degree credit will not be given for both PHIL 4123 and PHIL 5123. Prerequisite: 3 hours of philosophy. (Typically offered: Irrgular)

PHIL 5133. Contemporary Ethical Theory. 3 Hours. (Formerly PHIL 4133.) A study of contemporary texts in philosophical ethics from G.E. Moore to the present. Philosophers covered may include Moore, Stevenson, Hare, Foot, and Rawls. Graduate degree credit will not be given for both PHIL 4133 and PHIL 5133. Prerequisite: 3 hours of philosophy. (Typically offered: Irrgular)

PHIL 5143. Philosophy of Law. 3 Hours. (Formerly PHIL 4143.) A philosophical consideration of the nature of law, theory of adjudication, concepts of legal responsibility, liberty and the limits of law, and selected moral-legal issues (abortion, affirmative action, punishment, etc.). Graduate degree credit will not be given for both PHIL 4143 and PHIL 5143. (Typically offered: Irrgular)

PHIL 5183. Kant's Critique of Pure Reason. 3 Hours. (Formerly PHIL 4183.) In his Critique of Pure Reason, one of the most important works in the history of philosophy, Kant describes how the mind works and claims to solve the major problems of metaphysics. The course is aimed at coming to a basic understanding of Kant's thought and at thinking critically about his claims. Graduate degree credit will not be given for both PHIL 4183 and PHIL 5183. (Typically offered: Irrgular)

PHIL 5203. Theory of Knowledge. 3 Hours. (Formerly PHIL 4203.) An examination of skepticism, the nature and structures of knowledge and epistemic justification, human rationality, and the justification of religious belief. Graduate degree credit will not be given for both PHIL 4203 and PHIL 5203. Prerequisite: 3 hours of philosophy. (Typically offered: Irrgular)

PHIL 5213. Philosophy of Science. 3 Hours. (Formerly PHIL 4213.) Examination of issues related to scientific explanation, empirical foundations of science, observation and objectivity, nature of laws and theories, realism and instrumentalism, induction and confirmation, models, causation, and simplicity, beginning with historical survey set in the context of the history of science but emphasizing works from the 1930s to the current period, often including issues in recent physics. Graduate degree credit will not be given for both PHIL 4213 and PHIL 5213. (Typically offered: Irrgular)

PHIL 5233. Philosophy of Language. 3 Hours. (Formerly PHIL 4233.) A survey of mainstream philosophical theories of meaning, reference, truth, and logical form. Attention given to the views of such figures as Frege, Russell, Tarski, Searle, Dumett, and the advocates of possible world's semantics. Graduate degree credit will not be given for both PHIL 4233 and PHIL 5233. (Typically offered: Irrgular)

PHIL 5253. Symbolic Logic I. 3 Hours. (Formerly PHIL 4253.) Rigorous analyses of the concepts of proof, consistency, equivalence, validity, implication, and truth. Full coverage of truth-functional logic and quantification theory (predicate calculus). Discussion of the nature and limits of mechanical procedures (algorithms) for proving theorems in logic and mathematics. Informal accounts of the basic facts about infinite sets. Graduate degree credit will not be given for both PHIL 4253 and PHIL 5253. Prerequisite: PHIL 2203 or MATH 2603. (Typically offered: Fall)

This course is cross-listed with MATH 5263.
PHIL 5303. Philosophy of Religion. 3 Hours.
(Formerly PHIL 4303.) Types of religious belief and critical examination of their possible validity, including traditional arguments and contemporary questions of meaning. Graduate degree credit will not be given for both PHIL 4303 and PHIL 5303. (Typically offered: Irregular)

PHIL 5313. Contemporary Jewish Thought. 3 Hours.
(Formerly PHIL 4313.) A survey of trends in Jewish thought in the twentieth and twenty-first centuries, focusing on the ways in which Jewish thinkers have responded to the events affecting Jews and the conditions of Jewish life from approximately 1900 to the present. Graduate degree credit will not be given for both PHIL 4313 and PHIL 5313. (Typically offered: Irregular)

PHIL 5403. Philosophy of Art. 3 Hours.
(Formerly PHIL 4403.) Varieties of truth and value in the arts and aesthetic experience, focusing on the creative process in the art and in other human activities. Graduate degree credit will not be given for both PHIL 4403 and PHIL 5403. (Typically offered: Spring)

PHIL 5423. Philosophy of Mind. 3 Hours.
(Formerly PHIL 4423.) An examination of such topics such as the relationship between mind and body, the mentality of machines, knowledge of other minds, the nature of psychological explanation, the relationships between psychology and the other sciences, mental representation, the nature of the self, and free will and determinism. Graduate degree credit will not be given for both PHIL 4423 and PHIL 5423. (Typically offered: Irregular)

PHIL 5603. Metaphysics. 3 Hours.
(Formerly PHIL 4603.) Theory and critical analysis of such basic metaphysical problems as mind and body, universals and particulars, space and time, determinism and free will, self-identity and individualism, with emphasis on contemporary perspectives. Graduate degree credit will not be given for both PHIL 4603 and PHIL 5603. Prerequisite: 3 hours of philosophy. (Typically offered: Irregular)

PHIL 5823. Seminar: Spinoza. 3 Hours.
Seminar: Spinoza (Typically offered: Irregular)

PHIL 5883. Seminar: Wittgenstein. 3 Hours.
Seminar: Wittgenstein (Typically offered: Irregular)

PHIL 5933. Seminar: Philosophical Theology. 3 Hours.
Seminar: Philosophical Theology (Typically offered: Irregular)

PHIL 5983. Philosophical Seminar. 3 Hours.
Various topics and issues in historical and contemporary philosophy. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

PHIL 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PHIL 690V. Graduate Readings. 1-6 Hour.
Supervised individual readings in historical and contemporary philosophy. (Typically offered: Fall, Spring and Summer)

PHIL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Health, Human Performance and Recreation Website (http://hhpr.uark.edu/)

Degrees Conferred:
M.Ed. in Physical Education (PHED)

Program Description: The Master of Education degree in Physical Education is a 33-credit-hour program that includes a 6-credit-hour research component (statistics/research) and a 27-credit-hour program core. All degree candidates must successfully pass a culminating written comprehensive examination and achieve a minimum of 3.0/4.0 GPA to graduate. Two courses using Web technology (Blackboard and other online resources) will be offered every semester (Fall, Spring, Summer) and the entire degree program can be completed in a two-year period. The online Master of Education Degree program is designed to meet the needs of current professionals in the field (physical education teachers, athletic directors, coaches) who desire to attain further education and an advanced degree in physical education.

M.Ed. in Physical Education

Prerequisites to the M.Ed. Degree Program: For acceptance to the master’s degree program in physical education, the program area stipulates, in addition to the general requirements of the Graduate School, an undergraduate degree in physical education or in a related field. Additional prerequisites may be prescribed by the program area.

Requirements for the Master’s of Education Degree: Candidates for the master’s degree in physical education must complete 27 semester hours of graduate work and a thesis or 33 semester hours without a thesis. In addition to the program requirements listed below, all candidates must successfully complete a written comprehensive examination.

Physical Education: (33 hours)

Total Hours: 33

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).
Courses

PHED 5243. Sport Skill Assessment and Instructional Strategies. 3 Hours.
The focus of this course is practical assessment techniques and instructional strategies in the area of sport and physical education activities. (Typically offered: Summer Odd Years)

PHED 5253. The Physical Education Curriculum. 3 Hours.
Principles, problems, procedures, and the influence of educational philosophy on programs in physical education and their application in the construction of a course of study for a specific situation. (Typically offered: Fall Even Years)

PHED 5273. Professional Issues in Physical Education and Sport. 3 Hours.
A review of contemporary research literature informing effective teaching practices in physical education settings. Students gain experience in critically reviewing literature and discussing current issues. (Typically offered: Summer Odd Years)

PHED 5313. Risk Management in Physical Education & Athletics. 3 Hours.
This course is designed to provide opportunities for the student to acquire an understanding of how to reduce the risk of injuries and eliminate hazards that may contribute to injuries associated with physical education and athletics. (Typically offered: Summer Even Years)

PHED 5553. Scientific Principles of Movement and Performance. 3 Hours.
This course focuses on theoretical information about sport biomechanics and movement principles, with practical applications to the physical education of coaching profession. (Typically offered: Summer Odd Years)

PHED 5643. Motor Learning. 3 Hours.
Concepts of motor learning and control are presented. Attention is given to an analysis of the literature in movement control, motor behavior, and motor learning. (Typically offered: Fall and Spring)

PHED 5753. Sport Psychology. 3 Hours.
Investigation of historical and contemporary research in sport psychology. (Typically offered: Fall and Summer)

PHED 5803. Measurement Concepts for K-12 Physical Education Teachers. 3 Hours.
This course focuses on techniques that physical education teachers can use to monitor student progress in a K-12 environment. (Typically offered: Summer)

PHED 6363. Supervision in Physical Education. 3 Hours.
The focus of this course is instructional supervision as a set of complex processes in which the supervisor works within accepted guidelines and functions to effectively supervise a teacher's pedagogical development. The Physical Education Instructional Supervision (PEIS) Model will be used to help facilitate this process. (Typically offered: Fall Odd Years)

PHED 6723. Project Implementation and Data Analysis. 3 Hours.
This course is designed to expose students to the rigors of research and will be the culminating experience of their degree program. The students will spend the majority of time developing a research topic. The research topic will be expanded into a complete research study in which the student will seek approval from the University of Arkansas IRB committee to conduct the study and then collect data. The data will be analyzed and presented at the conclusion of the class. (Typically offered: Spring and Summer)

Department of Physics Website (http://www.uark.edu/depts/physics/)

Degrees Conferred:
M.S., Ph.D. (PHYS)

Primary Areas of Faculty Research: Atomic and molecular physics; biophysics; condensed matter physics; laser physics; nanoscience; physics education; quantum optical physics; space and planetary sciences; surface physics; and theoretical physics.

Prerequisites to M.S. and Ph.D. Degree Programs: Prospective students must satisfy the requirements of the Graduate School as described in this catalog and have the approval of the Graduate Admissions Committee of the Department of Physics. In addition, to be admitted to graduate study in physics without deficiency, candidates should have an undergraduate degree with the equivalent of a 30-hour major in physics including intermediate-level courses in mechanics, electricity and magnetism, quantum physics and thermal physics, and mathematics through differential equations. Students who present less than the above may be admitted with deficiency dependent on degree track subject to the approval of the department’s Graduate Admissions Committee. Students may eliminate deficiencies while concurrently enrolling in graduate courses, provided prerequisites are met. While submission of Graduate Record Examination scores is not required for admission, students who have taken the GRE advanced physics test are urged to submit their test scores to the physics department to facilitate advising and placement.

M.S. in Physics

Requirements for the Master of Science Degree: Students may choose between two Master of Science degrees in the physics department. These are the M.S. Physics (30-hour thesis path); and the M.S. Physics (36-hour non-thesis path). Both M.S. degree curricula prepare a student for the Physics Ph.D. degree.

Incoming graduate students will be advised by a departmental graduate adviser for the first two years. Students must form their thesis or advisory committees by the end of their third academic semester and file the appropriate forms with the Graduate School. The thesis committee (thesis-path students) consists of the research adviser as chair, two members of the physics faculty, and one member of the graduate faculty not from the Physics Department. The advisory committee (for non-thesis-path students) consists of the individual study project adviser as chair and two members of the physics faculty. Students in this degree program can choose either a 30-semester-hour thesis path or a 36-semester-hour non-thesis path.

Both the thesis and non-thesis M.S. degrees share the following academic requirements: Completion of:

PHYS 5011 Introduction to Current Physics Research Seminar 1
PHYS 5073 Mathematical Methods for Physics 3
PHYS 5413 Quantum Mechanics I 3
PHYS 5313 Advanced Electromagnetic Theory I 3
PHYS 5323 Advanced Electromagnetic Theory II 3
PHYS 5111 Research Techniques Through Laboratory Rotations 1
PHYS 5041 Journal Club Seminar 1

Students who have had similar courses at another institution may substitute up to 12 credit hours of other courses in lieu of those listed
above, on a course-by-course basis, upon petitioning the Graduate Affairs Committee.

Elective courses will be used for the remaining required degree hour. The minimum number of physics elective hours, the maximum number of non-physics technical elective hours, and the minimum number of total elective hours are shown in the table.

<table>
<thead>
<tr>
<th>Degree</th>

</tr>
</thead>
<tbody>
<tr>
<td>M.S. Physics Thesis</td>
<td>9</td>
<td>0</td>
<td>9</td>
</tr>
<tr>
<td>M.S. Physics Non-Thesis</td>
<td>18</td>
<td>0</td>
<td>18</td>
</tr>
</tbody>
</table>

Students will select electives from courses listed in the graduate catalog as appropriate to their field of specialization, with course selection approved by their thesis committee. For the purposes of this degree requirement, any Astronomy (ASTR) graduate course listed in the Graduate Catalog and taught through the physics department will be considered a Physics elective.

No more than one 4000-level course may be counted toward the 30-hour requirement for the thesis option, and no more than two 4000-level courses may be counted toward the 36-hour requirement for the non-thesis option.

Requirements for Thesis-Path M.S. Degrees: Completion of six master’s thesis hours under PHYS 600V and a written thesis successfully defended in a comprehensive oral exam given by the student’s thesis committee.

Requirements for Non-thesis Path M.S. Degrees: Completion of three hours under PHYS 502V Individual Study in Advanced Physics and a written project report successfully defended in a comprehensive oral exam given by the student’s advisory committee. Students who pass the Physics Ph.D. candidacy examination will be considered to have satisfied the PHYS 502V requirement of the non-thesis path M.S. degrees.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Requirements for Ph.D. in Physics

Requirements for the Doctor of Philosophy Degree: To be admitted to candidacy for the Ph.D. degree the student must:

1. Form a dissertation committee
2. Pass the research-based candidacy exam
3. Obtain a minimum of B-grade in core physics courses and
4. File a Declaration of Intent with the Graduate School.

Incoming graduate students will be advised by a departmental adviser for the first year. Students must form their dissertation committees by the end of their second academic semester and file the appropriate forms with the Graduate School. The dissertation committee consists of the research adviser as chair and two other members of the graduate faculty.

The research-based candidacy examination, also known as the Ph.D. qualifier, consists of a written proposal and oral presentation. All students entering the Ph.D. graduate program in the fall semester must take their qualifier no later than the end of their fifth semester of graduate studies. Students entering the Ph.D. graduate program in the spring semester must take their qualifier no later than the end of their sixth semester of graduate studies. Especially well-prepared students are encouraged to take their qualifier earlier. A candidate failing the research-based qualifier in a first attempt, will have one additional semester (two if they change adviser) for a second and final attempt.

Ph.D. students must complete a minimum of 33 semester-hours in 5000- and/or 6000-level courses beyond their Bachelor of Science degrees. Courses taken to fulfill the requirements for the University of Arkansas M.S. physics degrees can be included in this 33 semester-hour requirement. Students who have had similar courses as part of an M.S. physics program at another institution may obtain a waiver, on a course-by-course basis, upon petitioning to the Physics Graduate Affairs Committee.

Ph.D. students must take:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 5011</td>
<td>Introduction to Current Physics Research Seminar</td>
<td>1</td>

<td>Advanced Electromagnetic Theory I</td>
<td></td>
</tr>
<tr>
<td>PHYS 5413</td>
<td>Quantum Mechanics I</td>
<td></td>
</tr>
</tbody>
</table>

If a minimum grade of B is not obtained, the course may be repeated once. If the student cannot obtain a minimum of B on two attempts, the student will not be allowed to continue in the Ph.D. program.

Fifteen additional semester hours in elective physics graduate courses will be required, and they must be selected from the 5000- or 6000-level courses listed in the graduate catalog appropriate to the student's field of specialization and approved by the student's dissertation advisory committee. For the purposes of this degree requirement, any Astronomy (ASTR) graduate course listed in the Graduate Catalog and taught through the physics department will be considered a physics elective. Additional elective courses outside of the physics department may be taken with dissertation committee approval.

Physics Ph.D. students may also choose one of the following concentrations by meeting its requirements: Astrophysics, Biophysics, or Neuroscience. Students who do not choose one of the three concentrations will pursue the general Physics Ph.D. requirements by default.

Requirements for Ph.D. in Physics with Astrophysics Concentration

Requirements for the Doctor of Philosophy Degree: To be admitted to candidacy for the Ph.D. degree the student must:

1. Form a dissertation committee
2. Pass the research-based candidacy exam
3. Obtain a minimum of B-grade in core physics courses and
4. File a Declaration of Intent with the Graduate School.

Incoming graduate students will be advised by a departmental adviser for the first year. Students must form their dissertation committees by the end of their second academic semester and file the appropriate forms with the Graduate School. The dissertation committee consists of the research adviser as chair and two other members of the graduate faculty.

The research-based candidacy examination, also known as the Ph.D. qualifier, consists of a written proposal and oral presentation. All students entering the Ph.D. graduate program in the fall semester must take their qualifier no later than the end of their fifth semester of graduate studies. Students entering the Ph.D. graduate program in the spring semester must take their qualifier no later than the end of their sixth semester of graduate studies. Especially well-prepared students are encouraged to take their qualifier earlier. A candidate failing the research-based qualifier in a first attempt, will have one additional semester (two if they change adviser) for a second and final attempt.

Ph.D. students must complete a minimum of 33 semester-hours in 5000- and/or 6000-level courses beyond their Bachelor of Science degrees. Courses taken to fulfill the requirements for the University of Arkansas M.S. physics degrees can be included in this 33 semester-hour requirement. Students who have had similar courses as part of an M.S. physics program at another institution may obtain a waiver, on a course-by-course basis, upon petitioning to the Physics Graduate Affairs Committee.

<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTR 5033</td>
<td>Astrophysics I: Stars and Planetary Systems</td>
<td>3</td>
</tr>
<tr>
<td>ASTR 5043</td>
<td>Astrophysics II: Galaxies and the Large-Scale Universe</td>
<td>3</td>
</tr>
</tbody>
</table>

Nine additional hours in elective coursework appropriate to the student’s field of specialization and approved by the student’s research thesis advisory committee.

Ph.D. students must also earn 18 hours of credit in Doctoral Dissertation, submit a dissertation, and defend it successfully in a comprehensive oral examination given by the dissertation committee. The doctoral degree will be awarded to students who complete a minimum of 72-graduate semester credit hours beyond the bachelor's degree.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

**Requirements for Ph.D. in Physics with Biophysics Concentration**

**Requirements for the Doctor of Philosophy Degree:** To be admitted to candidacy for the Ph.D. degree the student must:

1. Form a dissertation committee
2. Pass the research-based candidacy exam
3. Obtain a minimum of B-grade in core physics courses and
4. File a Declaration of Intent with the Graduate School.

Incoming graduate students will be advised by a departmental adviser for the first year. Students must form their dissertation committees by the end of their second academic semester and file the appropriate forms with the Graduate School. The dissertation committee consists of the research adviser as chair and two other members of the graduate faculty.

The research-based candidacy examination, also known as the Ph.D. qualifier, consists of a written proposal and oral presentation. Nine additional hours in elective coursework appropriate to the student’s field of specialization and approved by the student’s research thesis advisory committee.

Ph.D. students must also earn 18 hours of credit in Doctoral Dissertation, submit a dissertation, and defend it successfully in a comprehensive oral examination given by the dissertation committee. The doctoral degree will be awarded to students who complete a minimum of 72-graduate semester credit hours beyond the bachelor's degree.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).
course-by-course basis, upon petitioning to the Physics Graduate Affairs Committee.

Ph.D. students must take:

</tbody>
</table>

If a minimum grade of B is not obtained, the course may be repeated once. If the student cannot obtain a minimum of B on two attempts, the student will not be allowed to continue in the Ph.D. program.

Fifteen additional semester hours in elective physics graduate courses will be required, and they must be selected from the 5000- or 6000-level courses listed in the graduate catalog appropriate to the student’s field of specialization and approved by the student’s dissertation advisory committee. For the purposes of this degree requirement, any Astronomy (ASTR) graduate course listed in the Graduate Catalog and taught through the physics department will be considered a physics elective. Additional elective courses outside of the physics department may be taken with dissertation committee approval.

Physics Ph.D. students may also choose one of the following concentrations by meeting its requirements: Astrophysics, Biophysics, or Neuroscience. Students who do not choose one of the three concentrations will pursue the general Physics Ph.D. requirements by default.

Requirements for Biophysics Concentration: Students must also take:

<table>

</table>

Nine additional hours in elective coursework appropriate to the student’s field of specialization and approved by the student’s research thesis advisory committee.

Ph.D. students must also earn 18 hours of credit in Doctoral Dissertation, submit a dissertation, and defend it successfully in a comprehensive oral examination given by the dissertation committee. The doctoral degree will be awarded to students who complete a minimum of 72-graduate semester credit hours beyond the bachelor’s degree.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Requirements for Ph.D. in Physics with Neuroscience Concentration

Requirements for the Doctor of Philosophy Degree: To be admitted to candidacy for the Ph.D. degree the student must:

1. Form a dissertation committee
2. Pass the research-based candidacy exam
3. Obtain a minimum of B-grade in core physics courses and
4. File a Declaration of Intent with the Graduate School.

Incoming graduate students will be advised by a departmental adviser for the first year. Students must form their dissertation committees by the end of their second academic semester and file the appropriate forms with the Graduate School. The dissertation committee consists of the research adviser as chair and two other members of the graduate faculty.

The research-based candidacy examination, also known as the Ph.D. qualifier, consists of a written proposal and oral presentation. All students entering the Ph.D. graduate program in the fall semester must take their qualifier no later than the end of their fifth semester of graduate studies. Students entering the Ph.D. graduate program in the spring semester must take their qualifier no later than the end of their sixth semester of graduate studies. Especially well-prepared students are encouraged to take their qualifier earlier. A candidate failing the research-based qualifier in a first attempt, will have one additional semester (two if they change adviser) for a second and final attempt.

Ph.D. students must complete a minimum of 33 semester-hours in 5000- and/or 6000-level courses beyond their Bachelor of Science degrees. Courses taken to fulfill the requirements for the University of Arkansas M.S. physics degrees can be included in this 33 semester-hour requirement. Students who have had similar courses as part of an M.S. physics program at another institution may obtain a waiver, on a course-by-course basis, upon petitioning to the Physics Graduate Affairs Committee.

Graduate Faculty

Barraza-Lopez, Salvador, Ph.D. (University of Illinois-Urbana-Champaign), B.S. (Instituto Politecnico Nacional de Mexico), Associate Professor, 2011.

Bellaiche, Laurent, Ph.D., M.S., B.S. (University of Paris VI, France), Distinguished Professor, 1999.

Churchill, Hugh O.H., Ph.D., A.M. (Harvard University), B.A. (Oberlin College), B.M. (Oberlin Conservatory of Music), Assistant Professor, 2015.

Fu, Huaxiang, Ph.D., M.S. (Fudan University), B.S. (University of Science and Technology of China), Professor, 2002.

Gea-Banacloche, Julio R., Ph.D. (University of New Mexico), Licenciado en Ciencias Fisicas (Universidad Autonoma de Madrid), Professor, 1989.

Hamad, Bothina, Ph.D. (University of Jordan), Research Associate Professor, 2016.

Harter, William G., Ph.D. (University of California-Irvine), B.S. (Hiram College), Professor, 1986.

Herzog, Joseph B., Ph.D. (University of Notre Dame), B.S. (Louisiana State University), Assistant Professor, 2013.

Hu, Xin, Ph.D. (Tulane University), B.S. (University of Science and Technology of China), Assistant Professor, 2016.

Joffe Minor, Tacy Marie, Ph.D. (Northwestern University), M.A., B.S. (University of Arkansas), Visiting Assistant Professor, 2011.

Kennefick, Julia Dusk, Ph.D. (California Institute of Technology), B.S. (University of Arkansas), Associate Professor, 2003.

Kennefick, Daniel John, Ph.D., M.A. (California Institute of Technology), B.S. (University College Cork, Ireland), Associate Professor, 2004.

Kumar, Pradeep, Ph.D. (Boston University), M.Sc. (Indian Institute of Technology, Mumbai, India), Assistant Professor, 2013.

Lehmer, Bret Darby, Ph.D. (Pennsylvania State University), B.S. (University of Iowa), Assistant Professor, 2015.

Li, Jial, Ph.D., M.S. (City University of New York-City College), M.S. (University of Science and Technology of China), B.S. (Hei Long Jiang University), Professor, 2002.

Oliver, William, Ph.D., M.S. (University of Colorado-Boulder), B.S. (University of Arizona), Associate Professor, 1992.

Porsandeey, Sergey, Ph.D., M.S. (Rostov State University), Research Professor, 2005.

Salamo, Gregory J., Ph.D. (City University of New York), M.S. (Indiana University-Purdue University-Indianapolis), B.S. (City University of New York, Brooklyn College), Distinguished Professor, 1975.

Shew, Woodrow L., Ph.D. (University of Maryland-College Park), B.A. (College of Wooster), Associate Professor, 2012.

Singh, Surendra P., Ph.D., M.A. (University of Rochester), M.Sc., B.Sc. (Banaras Hindu University, India), University Professor, 1982.

Tibaldo, Paul M., Ph.D. (University of Pennsylvania), B.S. (San Diego State University), Professor, 1996.

Vyas, Reeta, Ph.D. (State University of New York at Buffalo), M.S., B.S. (Banaras Hindu University), Professor, 1984.

Wang, Yong, Ph.D., M.S. (University of California, Los Angeles), B.S. (University of Science and Technology of China), Assistant Professor, 2015.

Wis, Rick, Ph.D., M.S. (Southern Methodist University), B.S. (University of Arkansas), Research Professor, 2014.

Xiao, Min, Ph.D. (University of Texas at Austin), B.S. (Nanjing University), Distinguished Professor, 1990.

Courses

PHYS 500V. Laboratory and Classroom Practices in Physics. 1-3 Hour.
The pedagogy of curricular materials. Laboratory and demonstration techniques illustrating fundamental concepts acquired through participation in the classroom as an apprentice teacher. (Typically offered: Fall) May be repeated for up to 3 hours of degree credit.

PHYS 5011. Introduction to Current Physics Research Seminar. 1 Hour.
This seminar course introduces new Physics graduate students to the faculty of the Physics department and their current research efforts. In addition, the students will be introduced to scientific ethics, and learn communication skills. (Typically offered: Fall)

PHYS 502V. Individual Study in Advanced Physics. 1-4 Hour.
Guided study in current literature. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

PHYS 5041. Journal Club Seminar. 1 Hour.
In this seminar, the students will present talks based on published research articles. The goal of the course is to develop oral communication skills in the students. Effective literature search techniques will also be covered. (Typically offered: Spring)

PHYS 5073. Mathematical Methods for Physics. 3 Hours.
This course merges the mathematics required in classical mechanics, electrostatics, magnetostatics, and quantum mechanics into a single course. The goal is to develop physics problem-solving skills, a strong mathematical foundation, and a more unified picture of physics. (Typically offered: Fall)

PHYS 5083. Mathematical Methods of Physics II. 3 Hours.
Applications of matrices, tensors, and linear vector spaces to problems in physics. Introduction to groups and their representations, and symmetry principles in modern physics. Prerequisite: PHYS 5073. (Typically offered: Irregular)
PHYS 5093. Applications of Group Theory to Physics. 3 Hours.
Application of group theory to topics in physics, especially to atomic/molecular and solid-state physics. Prerequisite: PHYS 5073. (Typically offered: Irregular)

PHYS 5103. Advanced Mechanics. 3 Hours.
Dynamics of particles and rigid bodies. Hamilton's equations and canonical variables. Canonical transformations. Small oscillations. Prerequisite: PHYS 5073. (Typically offered: Fall)

PHYS 5111. Research Techniques Through Laboratory Rotations. 1 Hour.
Graduate students will be introduced to detailed operational aspects of two Physics research laboratories through extensive observation of those laboratory's operations during a six week rotation through each lab. Planning for starting a research project in the summer will take place in the final three week rotation period. (Typically offered: Spring)

PHYS 5213. Statistical Mechanics. 3 Hours.
Classical and quantum mechanical statistical theories of matter and radiation. Prerequisite: PHYS 5413. (Typically offered: Spring)

PHYS 5253L. Experiment and Data Analysis. 3 Hours.
This course is devoted to learning some of the frequently used experimental techniques and methods by which experimental data are analyzed to extract quantitative information on physical parameters. Students will perform experiments, analyze data, and write lab reports. Pre- or Corequisite: PHYS 5423. Prerequisite: Graduate standing or instructor consent. (Typically offered: Fall)

PHYS 5313. Advanced Electromagnetic Theory I. 3 Hours.
Electrostatics, boundary-value problems in electrostatics, electrostatics in a medium, magnetostatics, and Faraday's Law. (Typically offered: Spring)

PHYS 5323. Advanced Electromagnetic Theory II. 3 Hours.
Maxwell equations, conservation laws, wave propagation, waveguides, radiating systems, scattering, special relativity, and radiation by moving charges. (Typically offered: Fall)

PHYS 5363. Scientific Computation and Numerical Methods. 3 Hours.
An introduction to numerical methods used in solving various problems in engineering and the sciences. May not earn credit for this course and MATH 4353 or MATH 4363. (Typically offered: Fall Even Years)
This course is cross-listed with MATH 5363.

PHYS 5413. Quantum Mechanics I. 3 Hours.
Non-relativistic quantum mechanics; the Schrodinger equation; the Heisenberg matrix representation; operator formalism; transformation theory; spinors and Pauli theory; the Dirac equation; applications to atoms and molecules; collision theory; and semiclassical theory of radiation. (Typically offered: Fall)

PHYS 5423. Quantum Mechanics II. 3 Hours.
Continuation of PHYS 5413 Prerequisite: PHYS 5413. (Typically offered: Spring)

PHYS 5513. Atomic and Molecular Physics. 3 Hours.
Survey of atomic and molecular physics with emphasis on the electronic structure and spectroscopy of 1 and 2 electron atoms and diatomic molecules. Includes line and hyperfine structure, Zeeman and Stark mixing of states, collision phenomena, radiative lifetimes, and experimental techniques. Prerequisite: PHYS 5413. (Typically offered: Irregular)

PHYS 5523. Theory of Relativity. 3 Hours.
Conceptual and mathematical structure of the special and general theories of relativity with selected applications. Critical analysis of Newtonian mechanics; relativistic mechanics and electrodynamics; tensor analysis; continuous media; and gravitational theory. (Typically offered: Fall Even Years)

PHYS 5613. Introduction to Biophysics and Biophysical Techniques. 3 Hours.
Origins of biophysics, biological polymers and polymer physics, properties of DNA and proteins, techniques to study DNA and proteins, biological membrane and ion channels, biological energy, experimental techniques to study single DNA and proteins. Two experiments are included: (1) DNA Gel electrophoresis; (2) Measurement of double-stranded DNA melting point. (Typically offered: Spring)

PHYS 5653. Subatomic Physics. 3 Hours.
Nuclear structure and nuclear reactions. Nature and properties of elementary particles and resonances, their interactions and decays. Phenomenological theory and discussion of experimental evidence. (Typically offered: Fall Odd Years)

PHYS 5713. Condensed Matter Physics I. 3 Hours.
The course covers the Drude theory and the Sommerfeld theory of metals, crystal lattices, reciprocal lattices, X-ray diffraction, Bloch's theory of electrons in periodic potential, formation of band gap, lattice vibration, and cohesive energy in solids. Prerequisite: PHYS 5413. (Typically offered: Fall)

PHYS 5723. Physics at the Nanoscale. 3 Hours.
This is a cross-disciplinary course that is focused on teaching nanoscience and engineering by studying surface science, the building and analysis of quantum-confined structures, and related nanomanufacturing processes. Students will achieve an integrated knowledge of the concepts of surface science, quantum mechanics, nano processing and manipulation, and techniques of materials research. (Typically offered: Irregular)

PHYS 5734. Laser Physics. 4 Hours.
A combined lecture/laboratory course covering the theory of laser operation, laser resonators, propagation of laser beams, specific lasers such as gas, solid state, semiconductor and chemical lasers, and laser applications. (Typically offered: Spring Odd Years)

PHYS 5753. Applied Nonlinear Optics. 3 Hours.
Topics include: practical optical processes, such as electro-optic effects, acousto-optic effects, narrow-band optical filters, second harmonic generation, parametric amplification and oscillation, and other types of nonlinear optical spectroscopy techniques which are finding current practical applications in industry. (Typically offered: Irregular)

PHYS 5753. Experimental Methods for Nanoscience. 3 Hours.
Fundamentals of the selected techniques suitable for characterization on the nanoscale. Focus on diverse methods such as x-ray and neutron spectroscopy, scanning probe microscopies, optical methods, electron diffraction methods, and more. (Typically offered: Irregular)

PHYS 5773. Introduction to Optical Properties of Materials. 3 Hours.
This course covers crystal symmetry optical transmission and absorption, light scattering (Raman and Brillouin) optical constants, carrier mobility, and polarization effects in semi-conductors, quantum wells, insulators, and other optically important materials. (Typically offered: Spring Even Years)

PHYS 5783. Physics of 2D Materials. 3 Hours.
Introduction to the structures of all known layered materials, followed by mechanical, electronic, spin, optical, and topological properties of two-dimensional materials. Discussion of theoretical concepts and examination of experimental manifestations of those concepts are interwoven throughout the semester. Knowledge of solid state physics is required. Pre- or Corequisite: PHYS 5413. (Typically offered: Fall Odd Years)

PHYS 588V. Selected Topics in Physics. 1-3 Hour.
Selected topics in experimental or theoretical physics at the advanced level. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

PHYS 600V. Master of Science Thesis. 1-6 Hour.
Master of Science Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
Prerequisites to the M.S. Degree Program:

**M.S. in Plant Pathology**

- Pathogen and resistance.
- Biological control of plant diseases, genetics and physiology of parasitism.
- Nematology, virology, soil ecology, molecular biology of plant pathogens,
- Applied research on disease control methods for the major food and fiber
- Disease problems. Research projects are wide-ranging, extending from
- Studies emphasizing fungal, viral, nematode, and bacterial pathogens
- Primary Areas of Faculty Research: Research areas of the faculty of
- Of plants, as well as mission-oriented research aimed at solving specific
- Disease problems. Research projects are wide-ranging, extending from
- Basic and molecular aspects of disease and pathogenesis to more
- Applied research on disease control methods for the major food and fiber
- Specific areas include: fungal ecology and genetics, nematology, virology, soil ecology, molecular biology of plant pathogens,
- Biological control of plant diseases, genetics and physiology of parasitism and resistance.

**M.S. in Plant Pathology**

Prerequisites to the M.S. Degree Program: Specific course prerequisites are not required for admission to the M.S. program. However, a strong undergraduate background in an agricultural, biological, and/or physical science is highly desirable. Deficiencies or prerequisites for advanced courses may be included in the individual student’s academic program.

Requirements for the Master of Science Degree: A thesis reporting results of original research and a minimum of 24 semester hours of course work (including 15 semester hours in plant pathology) plus 6 semester hours of thesis credit are required. The student must pass a comprehensive oral examination and successfully defend the thesis upon its completion.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Requirements for Ph.D. in AFLS with Plant Pathology Concentration

Prerequisites to Degree Program: A Master of Science degree is desirable. A student with a Bachelor of Science and an exceptional record in academics and/or research may be approved for admission to the Ph.D. program in Agricultural, Food and Life Sciences if the Graduate Student Concentration Admissions Committee of the desired concentration deems them qualified and approval is granted by the AFLSPH Steering Committee.

A student admitted to the University of Arkansas, pursuing an M.S. and in good academic standing may apply to be admitted to the doctoral program and forgo completing the M.S. degree if so approved by the AFLSPH Steering Committee and the AFLSPH Graduate Concentration Admissions Committee. A minimum grade point average of 3.00 (on a 4.00 scale) on previous college-level course work is required.

Admissions Requirements for Entry: To be considered for admission, a student must submit a letter of intent, along with the application for admission indicating the desired degree concentration, areas of interest and career goals. Official transcripts of all previous college-level course work must be submitted. Three letters of recommendation are required. These letters should address the character and academic capability of the applicant. Applications will first be reviewed by the AFLSPH Steering Committee which will assign the student to the appropriate Graduate Student Concentration Admissions Committee for review. The Concentration Admissions Committee will make the final determination of admittance into the AFLSPH program and the concentration.

Requirements for Doctor of Philosophy Degree: The Ph.D. program in Agricultural, Food and Life Sciences requires a total of 72 credit hours after a Bachelor of Science or Bachelor of Arts degree or 42 hours after a Master of Science or Master of Arts degree.

General course requirements for each degree candidate are arranged on an individual basis by the Faculty Advisor, the Graduate Advisory Committee and the candidate in accordance with guidelines of their concentration. Alternate courses may be selected at the discretion of the committee.

All students must complete 6 hours of elective course hours and 2 hours of seminar. One seminar must be a research proposal presentation and the other must be an exit seminar presenting the dissertation research results. All students must complete 18 hours of doctoral dissertation hours. Students entering the doctoral program with only a B.S. or B.A. must also complete an additional 30 hours (to reach the 72 hour post B.S./B.A. requirement). Students must satisfactorily pass written and oral candidacy examinations covering their discipline and supporting areas. These examinations must be completed at least one year before completion of the Ph.D. degree program in Agricultural, Food and Life Sciences. Each candidate must complete a doctoral dissertation on an important research topic in the concentration field. The specific problem and subject of the dissertation is determined by the faculty adviser, the student and the Graduate Advisory Committee. A dissertation...
title must be submitted to the dean of the Graduate School at least one year before the dissertation defense. Provisional approval of the dissertation must be given by all members of the Graduate Advisory Committee prior to the dissertation defense. Students must pass the oral defense and examination of the dissertation given by the Graduate Advisory Committee. A student cannot be approved for conferment of the doctoral degree until after completion of all coursework, written and oral candidacy exams, the defense passed and dissertation accepted by the Graduate School and an application for the degree has been filed with the Registrar’s Office and the fee paid.

In addition to the general requirements for the Ph.D. program in Agricultural, Food and Life Sciences, students in the Plant Pathology concentration must also complete:

Graduate Faculty

Bateman, Nick, Ph.D. (Mississippi State University), B.S. (University of Arkansas-Monticello), Assistant Professor, 2016.

Bluhm, Burt H., Ph.D., M.S. (Purdue University), B.S. (University of Oklahoma), Associate Professor, 2008.

Correll, Jim, Ph.D., M.S. (University of California-Berkeley), B.S. (Pennsylvania State University), Distinguished Professor, 1989.

Dowling, Ashley Patrick Gregg, Ph.D. (University of Michigan-Ann Arbor), B.S. (University of Arizona), Associate Professor, 2008.

Egan, Martin J., Ph.D., B.Sc. (University of Exeter, United Kingdom), Assistant Professor, 2016.

Faske, Travis, Ph.D. (Texas A&M University), M.S. (Oklahoma State University), B.S. (Tarleton State University), Associate Professor, 2015.

Goggin, Fiona, Ph.D. (University of California-Davis), B.S. (Cornell University), Professor, 2001.

Hopkins, John D., Ph.D. (University of Arkansas), M.S., B.S. (Clemson), Associate Professor, 2002.

Johnson, Donn T., Ph.D., M.S. (Michigan State University), B.S. (University of Minnesota, Duluth), Professor, 1978.

Joshi, Neelendra, Ph.D. (Pennsylvania State University), Assistant Professor, 2015.

Kirkpatrick, Terry, Ph.D. (North Carolina State University), M.S., B.S. (University of Arkansas), Professor, 1984.

Korth, Ken L., Ph.D. (North Carolina State University), B.S. (University of Nebraska), Professor, 1999.

Loftin, Kelly M., Ph.D. (New Mexico State University), M.S. (University of Arkansas), B.S. (Arkansas Tech), Associate Professor, 2002.

Lorenz, Gus M., Ph.D., B.S.A., M.S. (University of Arkansas), Distinguished Professor, 1997.

Robbins, Robert Thomas, Ph.D. (North Carolina State University), M.S., B.S. (Kansas State University), University Professor, 1979.

Rojas, Clemencia, Ph.D. (Cornell University), M.S. (Purdue University), B.S. (Universidad de Los Andes, Colombia), Assistant Professor, 2015.

Rojas, Alejandro, Ph.D., M.S. (Michigan State University), M.S., B.S. (Los Andes University), Assistant Professor, 2018.

Rupe, John C., Ph.D., M.S. (University of Kentucky), B.S. (Colorado State University), Professor, 1984.

Spradley, J. Ples, M.S. (University of Arkansas), B.S. (Hendrix College), Extension Associate Professor, 1984.

Spurlock, Terry, Ph.D. (University of Arkansas), Extension Assistant Professor, 2015.

Steinkraus, Donald C., Ph.D. (Cornell University), M.S. (University of Connecticut), B.A. (Cornell University), Professor, 1989.

Stephen, Fred M., Ph.D. (University of California-Berkeley), B.S. (San Jose State University), University Professor, 1974.

Studebaker, Glenn, Ph.D., M.S. (University of Arkansas), B.S. (Missouri Southern State University), Associate Professor, 1993.

Szalanski, Allen Lawrence, Ph.D. (University of Nebraska-Lincoln), M.S. (Kansas State University), B.S. (University of Manitoba), Professor, 2001.

Thrash, Ben, Assistant Professor, 2018.

Tzamanakis, Ioannis E., Ph.D. (Oregon State University), M.S., B.S. (Agricultural University of Athens, Greece), Professor, 2008.

Wamishe, Yeshi Andenow, Ph.D. (University of Arkansas) M.S., B.S. (Addis Ababa University, Ethiopia), Associate Professor, 2011.

Wiedenmann, Robert N., Ph.D., B.S. (Purdue University), Professor, 2005.

Courses

PLPA 5001. Seminar. 1 Hour.

Review of scientific literature and oral reports on current research in plant pathology. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

PLPA 502V. Special Problems Research. 1-6 Hour.

Original investigations of assigned problems in plant pathology. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

PLPA 504V. Special Topics. 1-18 Hour.

Lecture topics of current interest not covered in other courses in plant pathology or other related areas. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

PLPA 5123. Bacterial Lifestyles. 3 Hours.

The course will introduce students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied in more detail to identify unique strategies that bacteria employ to thrive in their respective environment, whether they are causing diseases or establishing beneficial interactions with animal or plants or coexisting with other microorganisms in diverse ecological environments. The course will also cover special adaptations that bacteria have evolved to adapt to harsh environments and how these adaptations can be harnessed to control pollution. Prerequisite: (BIOL 2013 and BIOL 2011L) or BIOL 3123. (Typically offered: Spring Odd Years)

This course is cross-listed with BIOL 5223.

PLPA 5223. Plant Disease Control. 3 Hours.

(Formerly PLPA 4223.) Principles, methods and mechanics of plant disease control. Emphasis is given to the integration of control measures and epidemiology of plant diseases. Lecture 3 hours per week. Graduate degree credit will not be given for both PLPA 4223 and PLPA 5223. (Typically offered: Fall)
PLPA 5303. Advanced Plant Pathology: Host-Pathogen Interactions. 3 Hours.
Presentation of important contemporary concepts relative to disease resistance and the physiology, biochemistry, and molecular biology of plant-pathogen interactions. Lecture 3 hours per week. Prerequisite: PLPA 3004 or equivalent and graduate standing. (Typically offered: Spring Odd Years)

PLPA 5313. Advanced Plant Pathology: Ecology and Epidemiology. 3 Hours.
Presentation of important contemporary concepts relative to the ecology and epidemiology of foliar and soil-borne plant pathogens. Lecture 3 hours per week. Prerequisite: PLPA 3004 and graduate standing. (Typically offered: Spring Even Years)

PLPA 5324. Applied Plant Disease Management. 4 Hours.
(formerly PLPA 4304) A plant pathology course emphasizing practical understanding of the concepts and principles of agronomic and horticultural crop disease management, including disease diagnosis, monitoring, and using models to forecast disease events. Graduate degree credit will not be given for both PLPA 4304 and PLPA 5324. (Typically offered: Fall)

PLPA 5333. Biotechnology in Agriculture. 3 Hours.
(formerly PLPA 4333.) Discussion of the techniques, applications, and issues of biotechnology as it is being used in modern agriculture. Coverage includes the basics of molecular biology, production of transgenic plants and animals, and new applications in the agricultural, food, and medical marketplace. Lecture and discussion, 3 hours per week. Graduate degree credit will not be given for both PLPA 4333 and PLPA 5333. (Typically offered: Fall)

PLPA 5404. Diseases of Economic Crops. 4 Hours.
Diagnosis and management of important diseases of cotton, fruits, rice, trees, soybeans, wheat, and vegetables will be covered in a lecture, laboratory, and field format. Lecture 2 hours, laboratory 4 hours per week. Four 1-day field trips will be involved. Corequisite: Lab component. Prerequisite: PLPA 3004. (Typically offered: Summer)

PLPA 5603. Plant Pathogenic Fungi. 3 Hours.
Plant Pathogenic Fungi is structured as an integrated lecture/laboratory class designed for students that are interested in developing an understanding and appreciation for taxonomy, biology, and ecology of plant pathogenic fungi and related saprophytic fungi. Corequisite: Lab component. Prerequisite: PLPA 3004 or BiOL 4424 or graduate standing. (Typically offered: Fall Odd Years)

PLPA 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PLPA 6203. Plant Virology. 3 Hours.
Lecture emphasizing discussion of recent advances in plant virology. Laboratory concerned with techniques and equipment used in plant virus studies, including transmission of viruses, characterization utilizing ultracentrifugation, spectrophotometry, electrophoresis, electron microscopy, and serology. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CHEM 5813 or CHEM 5843 or CHEM 6873 or consent of instructor. (Typically offered: Fall Even Years)

PLPA 6303. Plant Nematology. 3 Hours.
Nematodes and their relationship to plant diseases, with consideration of identification, morphology, biology, distribution, association with disease complexes and control. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: Graduate standing. (Typically offered: Fall Even Years)

PLPA 6503. Plant Bacteriology. 3 Hours.
Current concepts and techniques in plant bacteriology, including taxonomic, ecological and molecular aspects of plant pathogenic bacteria and their interactions with hosts. Lecture 2 hours, laboratory 2 hours per weeks. Corequisite: Lab component. Prerequisite: BiOL 2013 and BiOL 2011L. (Typically offered: Spring Odd Years) May be repeated for up to 3 hours of degree credit.
Students must be admitted to the M.A. program and the School of Law. If a student seeks to enter the dual degree program after enrolling in either the law school or the M.A. program, he or she must obtain admission to the other degree program during the first year of study.

The School of Law accepts nine (9) semester hours of M.A. courses to satisfy requirements for the J.D. degree: PLSC 5503 Comparative Political Analysis, PLSC 5803 Seminar in International Politics, PLSC 5833 Seminar in Contemporary Problems, PLSC 4833 International Political Economy; and ECON 4633 International Trade are highly recommended to be part of the student's preparation.

Students admitted to the dual degree program may commence their studies in either the law school or the M.A. program but must complete first year course requirements before taking courses in the other degree program. If they do not maintain the academic or ethical standards of either degree program, students may be terminated from the dual degree program. Students in good standing in one degree program but not in the other may be allowed to continue in the other program in which they have good standing and must meet the degree requirements of that program. If for any reason a student admitted to the dual degree program does not complete the M.A. degree, he or she cannot count nine hours of M.A. courses toward the J.D. degree. Likewise, M.A. students may not be able to count certain law courses if they decide to discontinue their studies in the law school. The J.D. will be awarded upon completion of all degree requirements; the M.A. will be awarded upon completion of the comprehensive examination and all required coursework, as well as the successful defense of a master's thesis, if applicable.

Mandatory Comprehensive Exam: All students will be required to take a written comprehensive examination covering their M.A. program or a six-hour thesis. The comprehensive exam will be graded by at least a three-person faculty committee selected by the M.A. Program Director. Students pursuing the thesis option are not required to take a written examination. Successful defense of their thesis satisfies this requirement. In addition to the successful completion of all course requirements and a passing grade on the written comprehensive examination (if taken), each student must present a minimum cumulative grade-point average of 3.00.

Thesis Option: Students pursuing the thesis option should consult the graduate coordinator of the political science department. The thesis committee must be composed of faculty members from both the School of Law and the Department of Political Science. Thesis credit is 6 hours.

Internship Option: Students may pursue an internship. Internship credit is variable and depends on the number of hours worked. Students in this option must consult with their J.D. and M.A. advisers. An internship work plan and expected academic work products will be developed.

Graduate Faculty
Bayram, A. Burcu, Ph.D. (Ohio State University), M.I.S. (North Carolina State University), B.A. (Middle East Technical University), Assistant Professor, 2016.
Conge, Patrick J., Ph.D. (University of Texas at Austin), M.A., B.S. (Arizona State University), Associate Professor, 1995.
Diallo, Anne B., Ph.D., M.P.A., B.A. (University of Arkansas), Visiting Assistant Professor, 2012.
Dowdle, Andrew J., Ph.D. (Miami University), M.A. (University of Iowa), B.A. (University of Tennessee), Professor, 2003.
Dove, Pearl Karen, Ph.D. (Howard University), M.A. (Georgia Southern University), B.S. (Savannah State University), Associate Professor, 2008.
Flanigan, J. Michael, Ph.D. (University of Arkansas), M.P.H., M.A., B.A. (University of Minnesota), Lecturer, 2016.

Courses are offered in three areas of study: American politics, comparative politics and international relations, and public administration and policy. From these offerings, students must select a primary area of study. A minimum of 12 hours from the primary area of study must be completed, of which six hours will be accepted from the core. A secondary field of no less than six hours will complement the choices in the primary field, of which three hours will be accepted from the core. Selection of the areas of study should be commensurate with the professional or career goals of the student. A minimum of 27 hours must be fulfilled by 5000-level classes. Students must take a minimum of 30 of their 36 course hours in the Department of Political Science. The remaining hours may be taken in other departments.

Courses at the 4000 level may be taken with the graduate adviser's consent. Under special circumstances, students may arrange to take graduate-level directed readings or independent research courses. Such courses require an application that must be approved by the student's graduate adviser in concert with the professor from whom the course is to be taken. The student must apply for such a course before the semester in which the course is to be taken.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

**Thesis Option:** Students must take 30 hours of coursework and six hours of thesis credit. Under this option, the student's comprehensive examination will be a defense of the thesis. All M.A. candidates in this option are required to develop a prospectus for their thesis. They must then write and orally defend an acceptable thesis.

**Non-thesis Option:** Students must take 36 semester hours of coursework. Under this option, students must take a comprehensive examination in their primary field of study.

**J.D./M.A. Program**

**Degrees Conferred:**
J.D./M.A. (Dual Degree)

fulbright.uark.edu/departments/political-science/graduate-studies/jdma-dual-degree-program/index.php (http://fulbright.uark.edu/departments/political-science/graduate-studies/jdma-dual-degree-program/)

The Department of Political Science, the Graduate School, and the School of Law cooperate in offering a dual degree program that allows a student to pursue the M.A. in Political Science and the J.D. degrees concurrently.

The program described below requires 36 hours as follows: the student selects a) courses from comparative politics or international relations seminars in political science or equivalent courses in other departments approved by the graduate adviser in political science (total of 18 hours: 3 hours methods and 15 hours from a combination of international relations and comparative politics seminars); b) six additional hours of PLSC classes approved by the program's graduate director or six hours of thesis credit; and c) twelve hours of elective courses taken in the law school in an area of concentration approved by the director of the M.A. program.

Students must take 30 hours of coursework and six hours of thesis credit. Under this option, the student's comprehensive examination will be a defense of the thesis. All M.A. candidates in this option are required to develop a prospectus for their thesis. They must then write and orally defend an acceptable thesis.

**Non-thesis Option:** Students must take 36 semester hours of coursework. Under this option, students must take a comprehensive examination in their primary field of study.

**J.D./M.A. Program**

**Degrees Conferred:**
J.D./M.A. (Dual Degree)

fulbright.uark.edu/departments/political-science/graduate-studies/jdma-dual-degree-program/index.php (http://fulbright.uark.edu/departments/political-science/graduate-studies/jdma-dual-degree-program/)

The Department of Political Science, the Graduate School, and the School of Law cooperate in offering a dual degree program that allows a student to pursue the M.A. in Political Science and the J.D. degrees concurrently.

The program described below requires 36 hours as follows: the student selects a) courses from comparative politics or international relations seminars in political science or equivalent courses in other departments approved by the graduate adviser in political science (total of 18 hours: 3 hours methods and 15 hours from a combination of international relations and comparative politics seminars); b) six additional hours of PLSC classes approved by the program’s graduate director or six hours of thesis credit; and c) twelve hours of elective courses taken in the law school in an area of concentration approved by the director of the M.A. program.
PLSC 5083. The Middle East in World Affairs. 3 Hours.
An analysis of geo-political and socio-economic characteristics of Middle Eastern societies and their impact on world economic and political order. Special attention to such issues as the Arab-Israeli conflict, the promotion of lasting peace in the region, impact of oil on world politics, the involvement of superpowers, rehabilitation of Palestinian refugees and the role of the United Nations. (Typically offered: Spring)

PLSC 5103. Human Behavior in Complex Organizations. 3 Hours.
Review of the fundamental literature and a systematic analysis of various theories and research focusing on organization and behavior in public administration, including the discussion of organizational development, human motivation, leadership, rationality, efficiency and conflict management in public organizations. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years; Summer)

PLSC 5113. Seminar in Human Resource Management. 3 Hours.
Intensive study of public personnel policies and practices, including legal foundations, classification and compensation plans, recruitment and selection processes, training, employment policies and morale, employee relations and organization. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5123. Public Budgeting and Finance. 3 Hours.
Focuses on the budgeting process and governmental fiscal policy formulation, adoption, and execution. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5133. Nonprofit Management. 3 Hours.
This course provides an overview of the principal management functions in public and nonprofit organizations. Topics include financial management, HR development, program development. The relationships among volunteer boards of trustees, fund raising, public relations, and program personnel are analyzed, and the complex environments with service sector agencies are explored. (Typically offered: Fall)

PLSC 5143. Administrative Law. 3 Hours.
A seminar which examines the constitutional and statutory basis and authority of public organizations. Special attention focuses on the nature of the rule-making and adjudicatory powers of public agencies and on executive, legislative, and judicial restraints on such activities. Also considered are the role, scope, and place of public regulatory activities. Prerequisite: Graduate standing. (Typically offered: Spring)

PLSC 5153. Environmental Politics and Policy. 3 Hours.
Surveys recent patterns of environmentalism in the U.S. and explores the nature of policy making with regard to environmental and economic development issues. Several debates are presented, such as conservation vs. preservation, multiple use vs. sustainability, intergovernmental policy implementation, incentives, and free market environmentalism. (Typically offered: Fall Even Years)

PLSC 5163. Public Policy. 3 Hours.
Seminar examining the study of public policy making in complex organizations. Attention given to different theories and frameworks explaining public policy making. Prerequisite: Graduate standing. (Typically offered: Spring)

PLSC 5173. Community Development. 3 Hours.
Community development encompasses the political, social, and economic issues that shape contemporary communities. The seminar examines substantive issues in community development, related theories, and techniques. A major focus of the course will be on low-income and minority neighborhoods and efforts to create more inclusive communities in the U.S. and abroad. (Typically offered: Fall)

PLSC 5183. Comparative Governance Systems. 3 Hours.
With an emphasis on international policy settings, students are encouraged to test extant policy models and discuss policy innovations that could produce improved policy outcomes. Introduces concepts of institutional logics and how organizations and individual actors experience and respond to the presence of multiple logics prevalent in many policy fields. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)
PLSC 5193. Seminar in Public Administration. 3 Hours.
Introduction to and synthesis of public administration theory, functions, history, public accountability and management concerns, economic impact of administrative decisions, current problems, and issues in the public sector. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5203. Seminar in American Political Institutions. 3 Hours.
Research seminar dealing with selected aspects of the major governmental institutions in the United States. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5213. Seminar in American Political Behavior. 3 Hours.
Reading seminar surveying major works on representative processes in American national politics, including political opinion, political leadership, political participation, voting behavior, political parties, and interest groups. Prerequisite: Graduate standing. (Typically offered: Spring)

PLSC 5233. The American Chief Executive. 3 Hours.
Study of the origin, background, and evolution of the Office of the President of the United States, with a review of the president's powers in the areas of politics, administration, and legislation. (Typically offered: Spring Odd Years)

PLSC 5243. Seminar in State Politics and Policy. 3 Hours.
Research seminar dealing with selected aspects of state political institutions and politics such as policy diffusion, institutional professionalization, and representation. Prerequisite: Graduate standing. (Typically offered: Fall Even Years)

PLSC 5253. Politics of Race and Ethnicity. 3 Hours.
Reviews identity, political action and concepts of political activity by minority groups, focusing on contemporary political behavior, the incorporation of minority groups into the U.S. political system. (Typically offered: Spring)

PLSC 5273. The U.S. Constitution I. 3 Hours.
United States Supreme Court Decisions involving the functions and powers of Congress, the Supreme Court and the President and federalism. (Typically offered: Fall)

PLSC 5283. Federalism and Intergovernmental Relations. 3 Hours.
(Formerly PLSC 4283.) Analysis of changes in intergovernmental relations in the American federal system. Discussions will focus on political, economic/fiscal and administrative aspects of policy changes of the pre-and post-Reagan eras. Graduate degree credit will not be given for both PLSC 4283 and PLSC 5283. (Typically offered: Spring Even Years)

PLSC 5343. Money and Politics. 3 Hours.
Familiarizes students with the world of money and politics in the United States. Examines the function of money in elections, the legal aspects, and the consequences of the regulatory environment. Provides a means to gain analytic computer skills and a strong foundation for further study of political science. (Typically offered: Fall)

PLSC 5373. Political Communication. 3 Hours.
(Formerly PLSC 4373.) Study of the nature and function of the communication process as it operates in the political environment. Graduate degree credit will not be given for both PLSC 4373 and PLSC 5373. (Typically offered: Spring Even Years)

PLSC 5383. Seminar in Political Communication. 3 Hours.
Research seminar focusing on selected topics such as candidate imagery, diffusion of political information, or political symbolism. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5503. Comparative Political Analysis. 3 Hours.
A selection of topics to provide the theoretical, conceptual and methodological and foundation for the analysis of contemporary political systems. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5513. Seminar in Politics of the Middle East. 3 Hours.
Explores the major lines of inquiry on the politics of the state and society in the context of endogenous and exogenous forces that have influenced conceptions of power, legitimacy, and identity. Prerequisite: Graduate standing. (Typically offered: Irregular)

PLSC 5563. Government and Politics of Russia. 3 Hours.
(Formerly PLSC 4563.) Study of Russian and Soviet politics after 1917 and of the democratization of Russia and the other successor states. Graduate degree credit will not be given for both PLSC 4563 and PLSC 5563. Prerequisite: PLSC 2003 or PLSC 2013. (Typically offered: Spring Even Years)

PLSC 5583. Political Economy of East Asia. 3 Hours.
(Formerly PLSC 4583.) Development strategies and policies of major economies in East Asia. Topics include theories for East Asia's economic growth, dynamics and process of East Asian political and economic developments, strengths and limits of the East Asian development model, Asian values and their implications for Asian-style democracy, and dynamics of regional cooperation. Graduate degree credit will not be given for both PLSC 4583 and PLSC 5583. (Typically offered: Spring)

PLSC 5593. Islam and Politics. 3 Hours.
Compares contemporary Islamist political movements. Seeks to explain causes, debates, agendas, and strategies of Islamists in the political realm. Addresses sovereignty, the rule of law, visions of the good state and society, and relations between nationalism, religion and political development. Focus on Middle East with comparative reference to other cultures. (Typically offered: Fall)

PLSC 5703. Research Design in Political Science and Public Policy. 3 Hours.
This course is designed to introduce graduate students to fundamental research issues in the realm of applied social science while developing the ability to apply basic skills for conducting research. (Typically offered: Fall)

PLSC 5803. Seminar in International Politics. 3 Hours.
Research seminar providing comprehensive coverage of selected topics in theories of international relations, the comparative study of foreign policy making, and international organizations. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5833. Seminar in Contemporary Problems. 3 Hours.
Seminar with concentrated reading in selected and specialized areas of contemporary international relations. Prerequisite: Graduate standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

PLSC 5843. International Legal Order. 3 Hours.
Analysis of distinctive characteristics of contemporary international law. Topics include role of legal order in controlling the use of force in international relations and the impact of social and political environment on growth of international law and relations among international political systems. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5863. Political Psychology and International Relations. 3 Hours.
Examines psychological approaches to international relations and examines how these perspectives advance the study of world politics. (Typically offered: Irregular)

PLSC 5873. Inter-American Politics. 3 Hours.
An analysis of the political themes, regional organization, and hemispheric relations that constitute the inter-American system, with special emphasis on conflict and cooperation in the hemispheric policies of the American republics. (Typically offered: Irregular)

PLSC 5883. Politics of International Law. 3 Hours.
This course examines the interaction between law and politics in the international system, focusing on international law. (Typically offered: Irregular)

PLSC 590V. Directed Readings in Political Science. 1-3 Hour.
Directed readings in Political Science. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

Department of Poultry Science website (http://poultry-science.uark.edu/)

Degrees Conferred:
M.S., Ph.D. (POSC)

Primary Areas of Faculty Research: Avian parasitology, avian physiology, avian virology, food safety/microbiology, immunology, molecular biology, poultry breeding and genetics, poultry economics, poultry enterprise operations, poultry health, poultry meat quality, poultry nutrition, poultry product technology, and turkey and egg product/management.

Areas of Study: Graduate studies may be pursued in those areas of primary faculty research. Poultry and laboratory animals are available for research programs in the Poultry Science Department.

M.S. in Poultry Science

Prerequisites to Degree Program: The student pursuing a program for a Master of Science degree must meet all general requirements of the Graduate School. In addition, the student must have completed the B.S. degree in a college or university with a major or equivalent in one of the areas of the Poultry Science Department. All applicants must submit at least three letters of recommendation and scores on the Graduate Record Examinations.

For acceptance into the M.S. degree program, a grade-point average of 3.00 on all previous graduate work and scores on the Graduate Record Examinations must be presented.

Requirements for the Master of Science Degree: For the M.S. degree, at least 24 hours of course work and six hours of thesis must be completed. No more than 12 hours or three courses at the 4000 level may be used for credit. A maximum of four hours of 5000 Special Problems may be used for M.S. degree requirements. At least three courses should be taken in the Poultry Science Department. At least one seminar is required for all M.S. degree candidates. A minimum GPA of 3.0 is required for the M.S. degree. All M.S. candidates must complete a thesis based on their research and pass a final comprehensive exam with emphasis on thesis research. One manuscript suitable for publication in a refereed journal is required for each M.S. candidate to graduate.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Ph.D. in Poultry Science

Prerequisites to Degree Program: The student pursuing a program for a Master of Science degree must meet all general requirements of the Graduate School. In addition, the student must have completed the B.S. degree in a college or university with a major or equivalent in one of the areas of the Poultry Science Department. All applicants must submit at least three letters of recommendation and scores on the Graduate Record Examinations.

For acceptance into the Ph.D. degree program, a grade-point average of 3.00 on all previous graduate work and scores on the Graduate Record Examinations must be presented.

Requirements for the Doctor of Philosophy Degree: Ph.D. candidates bypassing the M.S. degree must take at least 36 hours of course work approved by the student's advisory committee with at least 24 hours of 5000 and 6000 level course work excluding Special Problems. No more than 12 hours or three courses at the 4000 level may be used for credit. A maximum of four hours of 5000 Special Problems can be used for the Ph.D. degree requirements. Students in the Ph.D. program who have an M.S. degree must take at least 12 hours of 5000 and 6000 level course work excluding Special Problems. If not taken previously, a three-hour statistics course is required for graduation for all Ph.D. candidates. A minimum of two seminars is required of all Ph.D. candidates. All Ph.D. degree candidates must take 18 hours of dissertation research. Admission to candidacy requires the candidate to take a comprehensive written exam as determined by members of the student's Graduate Advisory Committee and a preliminary oral exam given by the Graduate Advisory Committee. Any student who fails the admission to candidacy exams will not be permitted to reschedule the exams for a six-month period. A second failure will lead to termination from the program. A final oral examination will be taken that is a defense of the dissertation. A minimum GPA of 3.0 is required for the Ph.D. degree. Two manuscripts suitable for publication in a refereed journal are required for each Ph.D. student.
to graduate. These papers will be evaluated by the Graduate Advisory Committee for comments and approval.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Graduate Faculty
Anthony, Nick, Ph.D. (Virginia Polytech Institute and State University), M.S., B.S. (The Ohio State University), Professor, 1990.
Bottje, Walter G., Ph.D. (University of Illinois-Urbana-Champaign), M.S. (Southern Illinois University), B.S. (Eastern Illinois University), Professor, 1985.
Coon, Craig N., Ph.D., M.S., B.S. (Texas A&M University), Professor, 1997.
Donoghue, Dan, Ph.D. (Texas A&M University), M.S. (Brigham Young University), B.S. (Medical University of South Carolina), Professor, 2000.
Donoghue, Annie, Ph.D. (F. Edward Herbert School of Medicine), M.S. (Texas A&M University), B.S. (San Diego State University), Research Professor, 2000.
Dridi, Sami, Ph.D., M.S. (National Polytechnic Institute of Lorraine, France), B.S. (Superior Institute of Mateur, Tunisia), Professor, 2013.
Erf, Gisela F., Ph.D. (Cornell University), M.S., B.S. (University of Guelph, Canada), Professor, 1994.
Hanning, Casey Owens, Ph.D., M.S., B.S. (Texas A&M University), Professor, 2000.
Hargis, Billy M., Ph.D., D.V.M. (University of Minnesota-Twin Cities), M.S. (University of Georgia), B.S. (University of Minnesota), Distinguished Professor, 2000.
Kidd, Michael T., Ph.D. (North Carolina State University), M.S., B.S.A. (University of Arkansas), Professor, 2010.
Kong, Byungwhi, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (Korea University), Associate Professor, 2006.
Kuenzel, Wayne J., Ph.D. (University of Georgia), M.S., B.S. (Bucknell University), Professor, 2000.
Kwon, Young Min, Ph.D. (Texas A&M University), M.S., B.S. (Seoul National University), Associate Professor, 2002.
Marcy, John A., Ph.D., M.S. (Iowa State), B.S. (University of Tennessee), Extension Professor, 1993.
Rochell, Samuel J., Ph.D. (University of Illinois at Urbana-Campaign), M.S., B.S. (Auburn University), Assistant Professor, 2016.
Sun, Xiaolun, Ph.D., M.S. (Virginia Polytech Institute and State University), B.S. (Southern China Agricultural University), Assistant Professor, 2016.
Tellez-Isaias, Guillermo, Ph.D. (Texas A&M University), Visiting Professor, 2002.
Wideman, Robert F., Ph.D. (University of Connecticut), B.A. (University of Delaware), Professor, 1993.

Courses
POSC 500V. Special Problems. 1-6 Hour.
Work in special problems of poultry industry. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

POSC 5033. Statistical Process Control in the Food Industry. 3 Hours.
(Formerly POSC 4033.) Analysis of processing data related to compliance with regulatory limits, quality and safety limits and internal and external customer specifications. Emphasizes statistical process control chart development, including understanding data and chart selection, calculating statistical limits, and interpreting process performance. Graduate degree credit will not be given for both POSC 4033 and POSC 5033. Prerequisite: Instructor consent. (Typically offered: Irregular)

POSC 510V. Special Topics in Poultry Sciences. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in poultry science. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

POSC 5113. Food Toxicology and Contaminants. 3 Hours.
During this course, the student will learn basic concepts of food toxicology, study the different physiological processes involved in food borne intoxications, and learn about potential health problems associated with exposure to these compounds. Prerequisite: Graduate study. (Typically offered: Irregular)

POSC 5123. Advanced Animal Genetics. 3 Hours.
Specialized study of animal genetics. Lecture 3 hours per week. Prerequisite: POSC 3123 or ANSC 3123. (Typically offered: Fall Even Years)
This course is cross-listed with ANSC 5123.

POSC 5143. Biochemical Nutrition. 3 Hours.
Interrelationship of nutrition and physiological chemistry; structure and metabolism of physiological significant carbohydrates, lipids, and proteins; integration of metabolism with provision of tissue fuels; specie differences in regulatory control of tissue and whole body metabolism of nutrients. Prerequisite: CHEM 3813. (Typically offered: Fall Even Years)
This course is cross-listed with ANSC 5143.

POSC 5152. Protein and Amino Acid Nutrition. 2 Hours.
Students will be introduced to the basic processes of protein digestion, amino acid absorption, transport, metabolism, and utilization along with how biochemical function of proteins and their dynamic state affect nutritional status for animals and man. Prerequisite: CHEM 3813. (Typically offered: Spring Even Years)
This course is cross-listed with ANSC 5152.

POSC 5163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring)
This course is cross-listed with ANSC 5163.

POSC 5213. Integrated Poultry Management Systems. 3 Hours.
(Formerly POSC 4213.) Major managerial systems in the integrated commercial poultry industry. Development of an understanding of the basic decision making processes of poultry companies and the factors influencing those decisions. Graduate degree credit will not be given for both POSC 4213 and POSC 5213. Prerequisite: POSC 2353 and AGEC 1103 and AGEC 2303. (Typically offered: Spring)

POSC 5233. Value Added Muscle Foods. 3 Hours.
An intense study of muscle structure and how it relates to the development of further processed meat products. Muscle ultrastructure, protein functionality, product development, and quality analysis will be covered. In class hands on activities will also be included to allow students to obtain experience of producing processed meat products. (Typically offered: Spring Even Years)

POSC 5243. Legal Issues in Animal Agriculture. 3 Hours.
(Formerly POSC 4123.) An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation from local to state to federal, depending on the issue will be studied and discussed. Graduate degree credit will not be given for both POSC 4123 and POSC 5243. (Typically offered: Spring Odd Years)
POSC 5254. Egg and Meat Technology. 4 Hours.
(Formerly POSC 4314.) Study of the science and practice of processing poultry meat and egg products; examination of the physical, chemical, functional, and microbiological characteristics of value added poultry products; factors affecting consumer acceptance and marketing of poultry products and the efficiency of production. Graduate degree credit will not be given for both POSC 4314 and POSC 5254. Corequisite: Lab component. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1073 and CHEM 1071L) and BIOL 1543 and BIOL 1541L. (Typically offered: Fall)

POSC 5313. Domestic Animal Bacteriology. 3 Hours.
A study of bacteria pathogenic for domestic animals. Lecture 3 hours per week. (Typically offered: Fall)

POSC 5333. Poultry Breeding. 3 Hours.
(Formerly POSC 4333.) Application of new developments in poultry breeding for efficient egg and meat production. Not intended for students interested in a career in veterinary sciences. Lecture 3 hours per week. Graduate degree credit will not be given for both POSC 4333 and POSC 5333. (Typically offered: Fall Odd Years)

POSC 5343. Advanced Immunology. 3 Hours.
Aspects of innate, cell-mediated, and humoral immunity in mammalian and avian species. Molecular mechanisms underlying the function of the immune system are emphasized. A course in Basic Immunology prior to enrollment in Advanced Immunology is recommended but not required. Lecture 3 hours per week. (Typically offered: Spring)
This course is cross-listed with BIOL 5343.

POSC 5352L. Immunology in the Laboratory. 2 Hours.
Laboratory course on immune-diagnostic laboratory techniques and uses of antibodies as a research tool. Included are cell isolation and characterization procedures, immunochromy, flow cytometry, ELISA and cell culture assay systems. Laboratory 6 hours per week. Prerequisite: POSC 5343 or BIOL 5343 or BIOL 4713. (Typically offered: Spring)
This course is cross-listed with BIOL 5352L.

POSC 5443. Poultry Nutrition. 3 Hours.
(Formerly POSC 4343.) Principles of nutrition as applied to the formulation of practical chicken and turkey rations. Lecture 3 hours per week. Graduate degree credit will not be given for both POSC 4343 and POSC 5443. Prerequisite: CHEM 2613 or CHEM 3603. (Typically offered: Spring)

POSC 5742. Advanced Poultry Diseases. 2 Hours.
An in-depth coverage of the most important diseases of poultry with a focus on understanding mechanisms of pathogenesis, diagnostic techniques and principles of prevention. Lecture/discussion 2 hours per week. Prerequisite: POSC 3223. (Typically offered: Spring Odd Years)

POSC 5743L. Advanced Analytical Methods in Animal Sciences Laboratory. 3 Hours.
Introduction into theory and application of current advanced analytical techniques used in animal research. Two 3-hour laboratory periods per week. (Typically offered: Fall)
This course is cross-listed with ANSC 5743L.

POSC 5873. Molecular Analysis of Foodborne Pathogens. 3 Hours.
Course topics will include molecular detection and identification of foodborne pathogens, the molecular response of foodborne pathogens to their environments, functional genomic approaches, and analysis of complex microbial communities. Lecture/discussion 3 hours per week. (Typically offered: Fall)

POSC 5901. Graduate Seminar. 1 Hour.
Critical review of the current scientific literature pertaining to the field of poultry science. Oral reports. Recitation 1 hour per week. Prerequisite: Senior standing. (Typically offered: Fall and Spring)

POSC 5923. Brain and Behavior. 3 Hours.
Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory and autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042, or PSYC 2003, or BIOL 2213, or BIOL 2443, or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with ANSC 5923.

POSC 5932. Cardiovascular Physiology of Domestic Animals. 2 Hours.
Cardiovascular physiology, including mechanisms of heart function and excitation, and blood vessel mechanisms associated with the circulatory system in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042. (Typically offered: Fall)
This course is cross-listed with ANSC 5932.

POSC 5942. Endocrine Physiology of Domestic Animals. 2 Hours.
Endocrine physiology, including mechanisms of hormone secretion, function, and regulation. Mechanisms associated with the endocrine system will be discussed for domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 or POSC 3042. (Typically offered: Fall)
This course is cross-listed with ANSC 5942.

POSC 5952. Respiratory Physiology of Domestic Animals. 2 Hours.
Respiratory physiology, including mechanisms of lung function and gas exchange. Mechanisms associated with the interaction of the respiratory system with other bodily systems in domestic animals and poultry will be discussed. Lecture 3 hours; drill 1 hour per week for first 8 weeks of semester. Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 or POSC 3042. (Typically offered: Fall)
This course is cross-listed with ANSC 5952.

POSC 5962. Gastrointestinal/ Digestive Physiology of Domestic Animals. 2 Hours.
Gastrointestinal and hepatic physiology, including mechanisms of digestion, absorption of nutrients with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042. (Typically offered: Fall)
This course is cross-listed with ANSC 5962.

POSC 5972. Renal Physiology of Domestic Animals. 2 Hours.
Renal physiology, including mechanisms of renal clearance with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and POSC 3042 or POSC 3042. (Typically offered: Spring)
This course is cross-listed with ANSC 5972.

POSC 600V. Thesis. 1-6 Hour.
Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

POSC 6123. Advanced Food Animal Wellbeing. 3 Hours.
Advances in fundamentals of animal welfare including animal health, animal handling, food safety and productivity. Prerequisite: ANSC 2213 or BIOL 4833 or instructor consent. (Typically offered: Spring)
This course is cross-listed with ANSC 6123.
POSC 6343. Vitamin Nutrition in Domestic Animals. 3 Hours.
The vitamins required by domestic animals with emphasis upon their role in animal nutrition, physiological functions, and consequences of failure to meet the requirement of the animal. Lecture 3 hours per week. Prerequisite: (ANSC 3143 or POSC 4343) and CHEM 3813. (Typically offered: Spring Even Years) This course is cross-listed with ANSC 6343.

POSC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Psychological Science (PSYC)

Psychological Science Website (http://fulbright.uark.edu/departments/psychological-science/)

Degrees Conferred:
M.A., Ph.D. (PSYC) (Note: The department does not offer a terminal master's degree.)

Areas of Study: The degree of Doctor of Philosophy is offered in the fields of psychological and clinical psychology. The program is designed to produce experimental and clinical psychologists with broad knowledge of the field. Specialization for research is required during the student's last two years of study.

Program Description: The Experimental Training Program is designed to provide the basic skills and an approach to scientific investigation that will allow the graduate to engage in research in any of several broad areas. In addition to this broad training, the program provides specialty training in the subareas of social, cognitive, and developmental psychology, as well as in neuroscience. The faculty and students typically have their primary research programs within one of these subareas, although collaboration is common across these areas. Students in the Experimental Training Program are trained to have excellent statistical and writing skills, to become competent and autonomous researchers, and to contribute to the field of psychology through presentations at professional conferences and publications in scholarly journals. Opportunities for extensive supervised teaching experience are also available to our students. Graduates of the Experimental Training Program typically obtain teaching and academic positions after graduation, while others take jobs in the private sector.

The Ph.D. program in Clinical Psychology follows the scientist/practitioner model of training. Although some of our graduates obtain applied, direct service provision positions, our training curriculum is such that those students whose career aspirations have been directed toward academic and research positions also have been successful. The Clinical Training Program is based on the premise that clinical psychologists should be skilled practitioners and mental health service providers as well as competent researchers. To facilitate these goals, we strive to maximize the match between the clinical and research interests of the faculty with those of the graduate students. The academic courses and clinical experiences are designed to promote the development in both areas. The objective of the Clinical Training Program is to graduate clinical psychologists capable of applying psychological theory, research methodology, and clinical skills to complex clinical problems and diverse populations. The program is fully accredited by the American Psychological Association.

Primary Areas of Faculty Research: The faculty in the Department of Psychological Science engage in research ranging from memory to child psychology to emotion and more. Find out more about individual faculty member's interests at the Psychological Science faculty page (http://fulbright.uark.edu/departments/psychological-science/people/).

M.A. in Psychology
Prerequisites to Degree Program: The candidate for admission to graduate study in psychology must satisfy the requirements of the Graduate School and have the approval of the Admission Committee of the appropriate training program. Scores on the Graduate Record Examination General Tests must be submitted with the application. The student normally will be expected to have had at least 18 semester hours in psychology, including statistics and research methods, or their equivalents.

The program of study is designed primarily for the student who seeks the Ph.D. degree. Students interested in pursuing a terminal master's degree should not apply for admission. However, all Ph.D. candidates must complete requirements for the M.A. degree.

Requirements for the Master of Arts Degree:

Clinical – minimum 30 hours. A student who seeks only the Master of Arts degree will be advised on selection of courses that will meet specific objectives. The student must complete 24 semester hours of course work and submit a research thesis. The thesis should be finished no later than the end of the second year of study.

Experimental – minimum 30 hours. A student who seeks only the Master of Arts degree must complete 24 hours of courses, including the following required courses:

<table>

hours in psychology, including statistics and research methods, or their equivalents.

The program of study is designed primarily for the student who seeks the Ph.D. degree. Students interested in pursuing a terminal master’s degree should not apply for admission. However, all Ph.D. candidates must complete requirements for the M.A. degree.

Requirements for the Doctor of Philosophy Degree:

1. Students in the experimental psychology program must fulfill all the requirements for the Master of Arts degree and take four 6000-level experimental psychology seminars.

2. Clinical students who do not have a course in History and Systems prior to enrolling in the program will need to present evidence of having completed a course on this topic either at the University of Arkansas or another institution with a grade of B or above prior to degree completion. In addition, the clinical students must take the following required courses:

3. The clinical student must take a clinical practicum (PSYC 607V) each semester on campus and three electives as described in the Departmental Handbook (https://fulbright.uark.edu/departments/psychological-science/forms-and-resources/). The student must complete a one-year pre-doctoral internship at an approved facility. It may precede or follow completion of the dissertation at the discretion of the advisory committee, but it must be completed prior to formal granting of the degree.

4. All students must pass a written candidacy examination at a time recommended by the student’s advisory committee.

5. All students must complete a dissertation demonstrating independent scholarship and originality in research and its oral defense.

The candidacy examination focuses upon methods characteristic of the field and upon specific content areas that are appropriate for each student. This examination may not be given until the M.A. thesis has been accepted, and it must be completed before dissertation research is begun. The final oral examination deals primarily with the dissertation research.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Graduate Faculty

- Behrend, Douglas A., Ph.D. (University of Minnesota), B.A. (Kalamazoo College), Professor, 1989.
- Beike, Denise R., Ph.D., B.A. (Indiana University), Professor, 1995.
- Bridges, Ana Julia, Ph.D. (University of Rhode Island), M.S. (Illinois State University), B.S. (University of Illinois-Urbana-Champaign), Associate Professor, 2007.
- Cavell, Timothy A., Ph.D. (Louisiana State University), M.S. (Texas A&M University), B.A. (Louisiana State University), Professor, 2002.
- Chapman, Kate M., Ph.D., M.S. (Penn State University), B.A. (New Florida College), Teaching Assistant Professor, 2016.
- Ditzfeld, Christopher, M.S. (University of Oklahoma), Instructor, 2011.
- Eidelman, Scott H., Ph.D. (University of Kansas), B.A. (University of Wisconsin-Madison), Associate Professor, 2008.
- Feldner, Matthew T., Ph.D. (University of Vermont), M.A. (West Virginia University), B.S. (University of Wisconsin-Stevens Point), Professor, 2005.
- Ham-Holm, Lindsay S., Ph.D., M.A., B.A. (University of Nebraska-Lincoln), Associate Professor, 2007.
- Lamm, Connie, Ph.D., M.A. (University of Toronto, Canada), B.A. (University of Waterloo), Assistant Professor, 2016.
- Lampinen, James Michael, Ph.D., M.S. (Northwestern University), B.S. (Elmhurst College), Distinguished Professor, 1998.
- Leen-Feldner, Ellen Winifred, Ph.D. (University of Vermont), M.A. (West Virginia University), B.A. (University of Notre Dame), Professor, 2005.
- Levine, William H., Ph.D., M.S. (State University of New York at Binghamton), B.S. (DePaul University), Associate Professor, 2001.
- Petretic, Patricia Ann Louise, Ph.D., M.A. (Bowling Green State University), B.A. (Youngstown State University), Associate Professor, 1990.
- Steinmetz, Joseph E., Ph.D. (Ohio University), M.A., B.S. (Central Michigan University), Distinguished Professor of Psychological and Brain Science, 2016.
- Veilleux, Jennifer Celene, Ph.D., M.A. (University of Illinois at Chicago), B.A. (Macalaster College), Associate Professor, 2011.
- Zabelina, Darya, Ph.D. (Northwestern University), Assistant Professor, 2017.
- Zies, Brenda June, Ph.D., M.A. (University of Arkansas), B.S. (East Texas State University), Teaching Assistant Professor, 2005.

Courses

- PSYC 4053. Psychological Tests. 3 Hours.
  Nature and theory of individual and group tests of intelligence, personality, interests, and attitudes. Prerequisite: Nine hours of psychology, including a C or better in PSYC 2013. (Typically offered: Irregular)
- PSYC 4073. Psychology of Learning. 3 Hours.
  Theories and representative research on basic principles of learning and memory in both animals and humans. Prerequisite: Six hours of psychology, not including PSYC 4073. (Typically offered: Spring)
- PSYC 5013. Advanced Developmental Psychology. 3 Hours.
  Critical examination of the research relevant to the psychological factors influencing the growth processes of the individual from birth to maturity. (Typically offered: Spring)
- PSYC 5023. Neuropsychological Assessment. 3 Hours.
  Introduction to the principles, techniques, and tools of assessment in clinical neuropsychology. Includes training in the interpretation, integration, and reporting of results. Prerequisite: PSYC 5043 and enrollment in the Psychology graduate program. (Typically offered: Irregular)
PSYC 5033. Psychopathology Theory & Assessment. 3 Hours.
Psychological and somatic factors contributing to pathological behavior. Interrelations of these factors will be analyzed in terms of how they lead to differential abnormal states. Includes guidelines for using structured interviews in the diagnosis and clinical assessment of major psychological disorders. Prerequisite: PSYC 3023 and enrollment in the Graduate Program in Psychology, or instructor consent. (Typically offered: Fall)

PSYC 5043. Assessment of Intellectual and Cognitive Abilities. 3 Hours.
Training in the theory, administration and interpretation of individual tests of intelligence and mental ability. Prerequisite: PSYC 4053 and enrollment in the Psychology Graduate Program. (Typically offered: Fall)

PSYC 5053. Advanced Social Psychology. 3 Hours.
Theory, methodology, and contemporary research in the major areas of social psychology. Topics include attitude theory and measurement, group processes, social and cultural factors. (Typically offered: Spring)

PSYC 5073. Introduction to Clinical Practice: Core Skills and Ethical Guidelines. 3 Hours.
An introduction to clinical practice focusing on a) interview methods and techniques and b) ethical principles and guidelines. Includes an introduction to clinic policies and procedures. Prerequisite: Enrollment in the Psychology graduate program. (Typically offered: Spring)

PSYC 5080. Observational Practicum. 0 Hours.
Observation of senior therapists in the provision of psychodiagnostic and psychotherapeutic techniques. Pre- or Corequisite: Doctoral students only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 0 hours of degree credit.

PSYC 5113. Theories of Learning. 3 Hours.
Major concepts in each of the important theories of learning. (Typically offered: Fall)

PSYC 5123. Cognitive Psychology. 3 Hours.
Contemporary theories and research on human information processing including topics such as memory, language, thinking, and problem solving. (Typically offered: Spring Even Years)

PSYC 5133. Inferential Statistics for Psychology. 3 Hours.
Inferential statistics, including representative parametric tests of significance. Special emphasis on analysis of variance, covariance, and component variance estimators as applied to psychological research. Prerequisite: PSYC 5133. (Typically offered: Fall)

PSYC 5143. Advanced Descriptive Statistics for Psychology. 3 Hours.
Special correlation techniques followed by a survey of representative nonparametric tests of significance. Major emphasis on advanced analysis of variance theory and designs. Prerequisite: PSYC 5133. (Typically offered: Spring)

PSYC 5153. Advanced History and Systems of Psychology. 3 Hours.
Advanced examination of the concepts, methods, and systems which have contributed to the development of modern psychology. (Typically offered: Fall)

PSYC 5163. Personality: Theory & Assessment. 3 Hours.
An introduction to empirically based theories of personality and personality disorders with an emphasis on standardized instruments in the assessment of normative and pathological personality. Includes training in the interpretation, integration, and reporting of results. Pre- or Corequisite: PSYC 5043. Prerequisite: Enrollment in the Psychology graduate program or instructor consent. (Typically offered: Spring)

PSYC 5223. Perception. 3 Hours.
(Formerly PSYC 4123.) Theories and representative research in the areas of sensation and perception. Graduate degree credit will not be given for both PSYC 4123 and PSYC 5223. Prerequisite: Six hours of psychology, not including PSYC 2013. (Typically offered: Irregular)

PSYC 523V. Research Practicum. 1-3 Hour.
Presentation, evaluation, and discussion of on-going research proposals. Required of all experimental graduate students in the first 2 years of their program. (Typically offered: Fall and Spring)

PSYC 5313. Introduction to Clinical Science: Research Design and Ethical Guidelines. 3 Hours.
Provides a) guidelines for designing and conducting empirical research in clinical psychology, b) ethical principles that regulate clinical research, and c) supervised opportunities to develop a clinical research proposal. Prerequisite: Enrollment in the Psychology graduate program. (Typically offered: Fall)

PSYC 5463. Descriptive Linguistics. 3 Hours.
This course aims to approach a scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Irregular)
This course is cross-listed with WLLC 5463, ANTH 5473, ENGL 5463.

PSYC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PSYC 602V. Seminar: Teaching Psychology. 1-3 Hour.
Survey of the literature on teaching of psychology in college. Includes: planning the course, method, examining and advising students. Prerequisite: Teaching assistant. (Typically offered: Fall and Spring)

PSYC 607V. Clinical Practicum III. 1-3 Hour.
Provides supervised experience in the application of the more complex and lesser known psychodiagnostic techniques and training and experience in psychotherapeutic techniques with the more severe functional disorders, with special topics in these domains emphasized across sections. Prerequisite: PSYC 5073; Enrollment in the Psychology graduate program. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PSYC 609V. Clinical Graduate Seminar. 1-3 Hour.
Provides intensive coverage of specialized clinical topics. Open to all graduate students. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

PSYC 611V. Individual Research. 1-18 Hour.
Individual research. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

PSYC 6133. Advanced Behavioral Neuroscience. 3 Hours.
Examination of the biological basis of behavior, with emphasis on underlying neural mechanisms. (Typically offered: Fall)

PSYC 6163. Psychotherapy. 3 Hours.
A conceptual overview of psychotherapy, with emphasis on a) common mechanisms, and b) cognitive, affective, and interpersonal approaches. Prerequisite: PSYC 5033. (Typically offered: Fall)

PSYC 6213. Psychotherapy Outcomes. 3 Hours.
Provides a critical evaluation of theory and research on empirically supported programs and interventions for major psychological disorders. Prerequisite: Enrollment in the Psychology graduate program. (Typically offered: Spring)

PSYC 6323. Seminar in Developmental Psychology. 3 Hours.
Discussion of selected topics in the area of human development. Emphasis will be on a review of current theory and empirical research. Topics selected for discussion could range from early development (child psychology), to later development (psychology of adulthood and aging-gerontology), to current attempts to integrate the field (life-span developmental psychology). (Typically offered: Fall Odd Years)
PSYC 6343. Seminar in Quantitative Methods. 3 Hours.
Discussion of selected mathematical approaches to theorizing and research in psychology. Emphasis will be on generalization of a given approach across several content areas of psychology. Hence, while each area must be treated in reasonable depth, current thinking and research spanning more than one content area will be stressed. (Typically offered: Irregular)

PSYC 6353. Seminar in Learning/Memory/Cognition. 3 Hours.
Discussion of selected topics in learning, memory, or cognition. Emphasis on current theory and empirical research. Topics selected for discussion may be in the areas of learning, memory, problem solving, or language. (Typically offered: Spring Odd Years)

PSYC 6373. Seminar in Personality and Social Psychology. 3 Hours.
Discussion of selected topics in social psychology and personality. Current theoretical positions and recent research findings are emphasized. Topics selected for discussion will be in areas of intrapersonal processes, interpersonal processes, group processes or any of various areas of personality. (Typically offered: Fall)

PSYC 6413. Seminar in Physiological Psychology. 3 Hours.
Discussion of selected topics in physiological psychology. Emphasis will be on a review of current theory and empirical research. Each offering of the seminar will examine the biological basis of a specific aspect of behavior, utilizing both animal and human data. (Typically offered: Spring Odd Years)

PSYC 698V. Field Work. 1-3 Hour.
Provides academic credit for field work in multidisciplinary setting, involving supervised experiences in assessment and psychotherapy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PSYC 699V. Clinical Psychology Internship. 1-3 Hour.
Supervised experience in a multidisciplinary setting of assessment and psychotherapy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PSYC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Master of Public Administration Program Page (http://fulbright.uark.edu/departments/political-science/graduate-studies/mpa-program/)

Degree Offered:
M.P.A. in Public Administration and Nonprofit Studies  (PADM)

Program Description: The Master of Public Administration program is administered by the Department of Political Science. The major objectives of the program are as follows:

1. To provide a broad flexible program to prepare students for careers in public service and nonprofit management;
2. To afford opportunities to practicing administrators for improving their careers and services through advanced education and training; and
3. To prepare scholars for further graduate study in the field of public administration.

A dual degree program leading to a Master of Public Administration and a Juris Doctor is also available in collaboration with the School of Law.

M.P.A. in Public Administration

Admission to the M.P.A. Degree Program:

1. Admission to the Graduate School
2. Minimum scores of 155 on the verbal portion and 145 on the quantitative portions of the current Graduate Record Examinations (GRE). (GRE scores may be waived under certain circumstances at the discretion of the PLSC Admissions Committee. Examples of possible exceptions include the successful completion of a master’s degree or the submission of GMAT or LSAT scores in lieu of GRE scores).
3. 3.20 minimum grade-point average in the last 60 hours of undergraduate coursework.
4. A written essay, submitted in accordance with standards set by the PLSC Admissions Committee.
5. Three letters of recommendation from persons competent to judge the applicant’s academic/work experience.
6. Academic prerequisites: the PLSC Admissions Committee may require appropriate coursework related to an understanding of governmental processes and activities to cover deficiencies in past education.
7. All requirements listed above must be completed and reported before the beginning of the student’s second semester or the student will not be admitted to courses that semester.

Requirements for the Master of Public Administration Degree: The M.P.A. requires a total of 36-39 semester hours of which 27 hours are to be 5000-level courses or above.

Required Courses (18 hours)

Special Interest Areas: A minimum of 9 or 12 graduate semester hours, depending on the student’s career status when admitted to the program, may be chosen in PLSC/PADM and other disciplines with approval of the Graduate Coordinator. The Graduate Coordinator, in consultation
with the student, will develop a set of relevant graduate courses that
will help the student in meeting career objectives. Focused studies
may be developed for students interested in fields such as community
development, environmental policy and sustainability, health services
administration, higher education administration, non-profit management,
public policy analysis, and recreation and tourism. Other focused studies
may be exercised with the consent, advice and approval of the Graduate
Coordinator.

**Professional Development/Internship:** (1-6 semester hours). The
professional development/internship is recommended but not required.
The number of semester credit hours depends on the length and full/
part-time nature of the internship. A maximum of six professional
development/internship credit hours may be applied toward the credit
hours required for special interest area coursework.

All students must either pass a portfolio exam (production and oral
defense of a professional portfolio) or successfully complete six hours of
thesis.

**Portfolio Exam Option:** Students must produce a complete portfolio
comprised of at least 3 separate written artifacts for examination near
the end of the M.P.A. program covering relevant content and acquired
skills and knowledge unless they choose a thesis option. Students will
develop their portfolio artifacts through a total of 3 credit-hours of graduate
independent research (i.e., PADM 589V) by taking a 1-hour independent
research during their final 3 semesters of the program under the guidance
of the appropriate faculty members. A comprehensive examination of the
completed portfolio will be assessed by a faculty committee composed of
no fewer than three members.

**Thesis Option:** Students wishing to exercise the thesis option should consult
with the graduate coordinator of the Department of Political Science. The thesis committee must be composed of at least three faculty members. The chair and another faculty members must be Political Science faculty. Thesis credit is 6 hours and may be counted toward the credit hours required for special interest area coursework. Students may not apply both internship and thesis hours to the credit hours required for special interest area coursework.

**J.D./M.P.A. Program**

**Degrees Conferred:**
J.D./M.P.A. (Dual Degree)

fulbright.uark.edu/departments/political-science/graduate-studies/jdmpa-
dual-degree-program/index.php (http://fulbright.uark.edu/departments/
political-science/graduate-studies/jdmpa-dual-degree-program/)

The Department of Political Science, the Graduate School, and the School of Law cooperate in offering a dual degree program that allows a student to pursue the M.P.A. and the J.D. degrees concurrently. Students must be admitted to the M.P.A. program and the School of Law. If a student seeks to enter the dual degree program after enrolling in either the law school or the M.P.A. program, he/she must obtain admission to the other degree program during the first year of study.

The School of Law accepts nine semester hours of M.P.A. courses to
satisfy requirements for the J.D. degree. Fifteen hours of law school
courses may be counted toward the M.P.A degree. To qualify for J.D.
credit, the M.P.A. courses must come from a set of core courses and
must be approved by the law school. Students must earn a grade of “B”
or higher in any M.P.A courses offered for credit toward the J.D. For
purposes of the M.P.A. degree, fifteen hours of elective courses may be
taken in the law school, provided they are not required for the J.D. degree
and are in an area of concentration approved by the director of the M.P.A.
program.

Students admitted to the dual degree program may commence their studies in either the law school or the M.P.A. program but must complete first year course requirements before taking courses in the other degree program. If they do not maintain the academic or ethical standards of either degree program, students can be terminated from the dual degree program. Students in good standing in one degree program but not in the other may be allowed to continue in the other program in which they have good standing and must meet the degree requirements of that program. If for any reason a student admitted to the dual degree program does not complete the M.P.A. degree, he/she cannot count nine hours of M.P.A. courses toward the J.D. degree. Likewise, M.P.A. students may not be able to count certain law courses if they decide to discontinue their studies in the law school. The J.D. will be awarded upon completion of all degree requirements; the M.P.A. will be awarded upon completion of the comprehensive examination and the internship (and internship report), or alternatively, six hours of additional coursework.

**Mandatory Comprehensive Exam:** All students will be required to take a written comprehensive examination covering their M.P.A. program. This exam will be graded by at least a three-person faculty committee selected by the M.P.A. Program Director. Students pursuing the thesis option are not required to take a written examination. Rather, successful defense of their thesis satisfies this requirement. In addition to the successful completion of all course requirements and a passing grade on the written comprehensive examination, each student must present a minimum cumulative grade-point average of 3.00. Students enrolled in law classes that are counted towards their M.P.A. degree cannot make a grade lower than a “C.” However, these courses will not be counted against the Graduate School GPA.

**Thesis Option:** Students pursuing the thesis option should consult with the graduate coordinator of the Political Science Department. The thesis committee must be composed of faculty members from both the School of Law and the Department of Political Science. Thesis credit is six hours.

**Internships:** Students may pursue an internship. Internship credit is variable and depends on the number of hours worked. Students wanting internship credit must consult with the M.P.A. adviser who will develop an internship work plan and explain expected academic work products.

- **Bayram, A. Burcu,** Ph.D. (Ohio State University), M.I.S. (North Carolina State University), B.A. (Middle East Technical University), Assistant Professor, Department of Political Science, 2016.

### Courses

**PADM 5803. Quantitative Methods Analysis. 3 Hours.**
Data analysis techniques, including descriptive and inferential statistics and packaged computer programs. Prerequisite: Graduate standing. (Typically offered: Fall)

**PADM 5813. Managing Information Technologies in Public Affairs. 3 Hours.**
Examines digital interactions between citizens, institutions, and political interests from the perspective of analysts, civic leaders, and professional non-technical administrators. Explores timely issues related to public information transactions, ethics and best practices of public information management, and the strategic positioning of public information assets. Prerequisite: Graduate standing. (Typically offered: Spring)

**PADM 5823. Grant Writing for the Social Sciences. 3 Hours.**
This course will teach students the fundamentals of obtaining grants from local, state and federal agencies. (Typically offered: Irregular)

**PADM 5833. Urban Planning. 3 Hours.**
Reviews the many forms, functions, and purposes of American cities. Covers basic planning theories, surveys the various sub-fields of planning, discusses trends in the planning field, and utilizes computer simulations. (Typically offered: Fall)

This course is cross-listed with PLSC 4103.

**PADM 5853. Performance Measurement in the Public and Nonprofit Sectors. 3 Hours.**
Provides a hands-on approach for measuring organizational performance and using performance information of decision making. Addresses components and key issues of performance measurement, such as steps in the measurement process, methods of data gathering, and analysis. Prerequisite: PLSC 5193. (Typically offered: Summer)

**PADM 5863. Issues in Public and Nonprofit Management. 3 Hours.**
Explores current developments and themes in the theory and practice of public and nonprofit management. Covers a range of contemporary issues in the field, such as managing collaborative networks, e-government, and managing for results. Emerging trends are intensively discussed at the juncture of theory and practice. (Typically offered: Spring)

**PADM 587V. Professional Development. 1-6 Hour.**
Encompasses internships, professional projects if individual is employed full-time and not eligible for an internship, conference and workshop participation, and other activities conducive to the students development as a public service professional. (Typically offered: Fall, Spring and Summer)

**PADM 588V. Directed Readings. 1-3 Hour.**
Directed readings. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

**PADM 589V. Independent Research. 1-3 Hour.**
Independent Research. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

**PADM 5903. Risk and Public Policy. 3 Hours.**
Examines how concepts of risk serve to justify and shape public policies and risk management practices. (Typically offered: Spring)

**PADM 5913. Policy Analysis: Theory and Practice. 3 Hours.**
Provides a firm theoretical foundation in, and an ability to apply, the general instruments necessary for professional practice of policy analysis. (Typically offered: Fall)

### Public Policy (PUBP)

#### Degree Conferred:
Ph.D. in Public Policy (PUBP)

#### Program Description:
This interdisciplinary policy program has a strong emphasis on public affairs and will train policy leaders to directly address the policy issues of the people of Arkansas, the region, and the nation. The program provides a vehicle for the consideration of policy issues by students, faculty, and the larger community. Therefore, students and faculty will participate in colloquia, projects, and research that contribute to successful public policy. Leadership and administrative skills are included in the course of study, along with a strong emphasis on policy analysis that recognizes the complex nature of policy problems. Such an analytical approach will prepare students for work with governmental,
educational, professional, and private sector experts who must cooperate in shaping public policy.

**Primary Areas of Faculty Research:** Faculty research areas include agricultural policy, community development and recreation policy, education policy, family policy, health policy, policy studies in aging, and public policy management, among others. Students interested in other areas policy should contact the program.

**Ph.D. in Public Policy with Agricultural Policy Concentration**

**Areas of Concentrations:** Agricultural Policy, Community Development and Recreation Policy, Education Policy, Family Policy, Health Policy, Policy Studies in Aging, Public Policy Management. (Other areas of concentration are possible. Contact us for more information.)

**Admission Requirements for Degree Program:** Applicants must have a master’s degree or equivalent completed prior to beginning the doctoral program. The master’s degree should be relevant to the policy area of their concentration. For example, students with a master’s in geology might enter the agriculture policy concentration but not the family policy concentration. If students enroll in classes designated to address deficiencies, they may enter a concentration outside of their master’s area. These decisions will be made by the program faculty. An application should include identification of the applicant’s objectives and supportive background information including three letters of recommendation evaluating the applicant’s ability to successfully pursue a Ph.D. A GPA of at least a 3.20 on a 4-point scale for all graduate course work is required. Scores from the verbal and quantitative portions of the Graduate Record Examination (GRE) must be submitted. GRE scores may not be more than five years old. Admission is competitive and based on the specialization and availability of an appropriate faculty mentor. Two students with identical packets may receive different decisions.

**Requirements for the Doctor of Philosophy Degree:** In addition to the general requirements of the Graduate School, the doctoral program consists of a minimum of 65 hours including:

<table>

**Total Hours** 65

After completing approximately two years of graduate study, and at least one year before completing all other requirements, the prospective candidate must take candidacy examinations covering core and concentration studies as well as research methods. The examinations will be both written and oral. After having been admitted to candidacy, students will be required to successfully defend a dissertation proposal in front of their dissertation committee. All students must demonstrate a capacity for research by writing an original dissertation on a topic in their area of concentration. The student’s final examination will be an oral defense of the dissertation.

Students should also be aware that the program in public policy has a residency policy. Students shall have met the residency requirement in the public policy Ph.D. program if they make satisfactory progress including positive residency evaluations in their annual review.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

**Agricultural Policy Concentration**

Course of study (12 hours)

Specific courses will be selected in consultation between the student and the student’s curriculum committee. Examples of appropriate courses are:

- AGEC 5233 Political Economy of Agriculture and Food
- AGEC 5153 The Economics of Public Policy

Through a special arrangement with the Law School, students may take courses in the Law School that are relevant to agricultural policy.

**Ph.D. in Public Policy with Community Development and Recreation Policy Concentration**

**Areas of Concentrations:** Agricultural Policy, Community Development and Recreation Policy, Education Policy, Family Policy, Health Policy, Policy Studies in Aging, Public Policy Management. (Other areas of concentration are possible. Contact us for more information.)

**Admission Requirements for Degree Program:** Applicants must have a master's degree or equivalent completed prior to beginning the doctoral program. The master’s degree should be relevant to the policy area of their concentration. For example, students with a master’s in geology might enter the agriculture policy concentration but not the family policy concentration. If students enroll in classes designated to address deficiencies, they may enter a concentration outside of their master’s area. These decisions will be made by the program faculty. An application should include identification of the applicant’s objectives and supportive background information including three letters of recommendation evaluating the applicant’s ability to successfully pursue a Ph.D. A GPA of at least a 3.20 on a 4-point scale for all graduate course work is required. Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Education Policy Concentration

Course of Study (12 hours)
Students electing the Education Policy concentration must complete a minimum of twelve graduate semester-hour credits including the following: EDFD 5683 Issues in Educational Policy.

Completion of three hours in history or philosophy to be selected from the following courses:

- EDFD 5353 Philosophy of Education
- HIED 5083 History and Philosophy of Higher Education

A minimum of six hours of committee-approved elective course work related to legal, governance, or administrative policy issues, from the following areas:

- Educational Administration (K-12 education)
- Higher Education (post-secondary education)

Ph.D. in Public Policy with Family Policy Concentration

Areas of Concentrations: Agricultural Policy, Community Development and Recreation Policy, Education Policy, Family Policy, Health Policy, Policy Studies in Aging, Public Policy Management. (Other areas of concentration are possible. Contact us for more information.)

Admission Requirements for Degree Program: Applicants must have a master’s degree or equivalent completed prior to beginning the doctoral program. The master’s degree should be relevant to the policy area of their concentration. For example, students with a master’s in geology might enter the agriculture policy concentration but not the family policy concentration. PUBP 700V Doctoral Dissertation 18

Total Hours 65

After completing approximately two years of graduate study, and at least one year before completing all other requirements, the prospective candidate must take candidacy examinations covering core and concentration studies as well as research methods. The examinations will be both written and oral. After having been admitted to candidacy, students will be required to successfully defend a dissertation proposal in front of their dissertation committee. All students must demonstrate a capacity for research by writing an original dissertation on a topic in their area of concentration. The student’s final examination will be an oral defense of the dissertation.

Students should also be aware that the program in public policy has a residency policy. Students shall have met the residency requirement in the public policy Ph.D. program if they make satisfactory progress including positive residency evaluations in their annual review.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Family Policy Concentration

Course of Study (12 hours)

This concentration requires 12 hours of post master’s studies. The three required courses are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUBP 612V</td>
<td>Research Problems in Policy</td>
<td>1-6</td>

<td>Theories and Practices in Apparel Merchandising</td>
<td></td>
</tr>
<tr>
<td>HDFS 5403</td>
<td>Family Theories and Methods</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, three hours of approved electives must be taken. This course will be chosen in consultation with the Ph.D. course committee, to fit the particular needs of the student. The following courses would meet this requirement:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

</tbody>
</table>

Ph.D. in Public Policy with Health Policy Concentration

Areas of Concentrations: Agricultural Policy, Community Development and Recreation Policy, Education Policy, Family Policy, Health Policy, Policy Studies in Aging, Public Policy Management. (Other areas of concentration are possible. Contact us for more information.)

Admission Requirements for Degree Program: Applicants must have a master’s degree or equivalent completed prior to beginning the doctoral program. The master’s degree should be relevant to the policy area of their concentration. For example, students with a master’s in geology might enter the agriculture policy concentration but not the family policy concentration. If students enroll in classes designated to address deficiencies, they may enter a concentration outside of their master’s area. These decisions will be made by the program faculty. An application should include identification of the applicant’s objectives and supportive background information including three letters of recommendation evaluating the applicant’s ability to successfully pursue a Ph.D. A GPA of at least a 3.20 on a 4-point scale for all graduate course work is required. Scores from the verbal and quantitative portions of the Graduate
Record Examination (GRE) must be submitted. GRE scores may not be more than five years old. Admission is competitive and based on the specialization and availability of an appropriate faculty mentor. Two students with identical packets may receive different decisions.

Courses

PUBP 6001. Pro-Seminar. 1 Hour.
An introduction to the field of public policy and to the program. The seminar will address topics such as the meaning of public policy, policy research, the dissertation process, and particular issues of public policy concern. Prerequisite: Admission to program. (Typically offered: Fall)

PUBP 6013. Theories of Public Policy. 3 Hours.
This seminar introduces doctoral students to the major concepts, frameworks, and theories of public policy. Emphasis is on the usefulness and limitations of these frameworks and theories in empirical research. Prerequisite: Graduate standing. (Typically offered: Fall)

PUBP 6023. Law and Public Policy. 3 Hours.
This course focuses on the legal aspects of public policy, with emphasis on the regulatory process and its legal constraints. Also considered are the process of administrative decision making, judicial review, legislative oversight, and public access to government information. (Typically offered: Fall)

PUBP 6033. Community Development Policy and Practice. 3 Hours.
This course examines multiple community development definitions, the community capitals framework as well as theories, conceptual frameworks and processes and how these are linked, both historically and currently, to broad-based US public policy and specifically, housing and workforce development policies. (Typically offered: Summer)

PUBP 604V. Special Topics in Public Policy. 1-6 Hour.
Designed to cover specialized topics not usually presented in depth in regular courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

PUBP 6103. Policy Planning, Implementation, and Evaluation. 3 Hours.
This interdisciplinary seminar will explore the relationship between policy, public administration, and organizations in the community. Stakeholder groups will be considered as part of the newer approaches to practice-driven scholarship. The class will examine innovative approaches to decision making, strategic management and policy leadership in complex interorganizational and interagency settings. (Typically offered: Fall)

PUBP 6113. Agenda Setting and Policy Formulation. 3 Hours.
Introduces agenda and policy formation focusing on the classic theoretical and empirical literature. The course is designed to introduce graduate students to a variety of theories typologies, concepts, and ideas relating to the study of public policy. (Typically offered: Fall)

PUBP 612V. Research Problems in Policy. 1-6 Hour.
Research problems. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

PUBP 6134. Capstone Seminar in Public Policy. 4 Hours.
This course is intended to integrate various policy interests in a specific community based project. Prerequisite: Instructor permission required. (Typically offered: Fall and Spring)

PUBP 6143. Mixed Method Research Design. 3 Hours.
Mixed method research is a multi-point research strategy that combines quantitative and qualitative research strategies into a single research project. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PUBP 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Health, Human Performance and Recreation Website

Degrees Conferred:
M.Ed. in Recreation and Sport Management (RESM)

Program Description: The Recreation and Sport Management program prepares students with the necessary competencies to pursue career opportunities primarily in intercollegiate athletic administration, but also more generally in public recreation administration, commercial recreation, sport management, community recreation, and outdoor recreation either in private or public sectors, including university settings. A minimum of 36 credit hours is required for the M.Ed. degree.

M.Ed. in Recreation and Sport Management

Prerequisites to Degree Program: For acceptance to the master’s degree programs, the program area requires, in addition to the general requirements for admission to the Graduate School, an undergraduate degree in recreation or sport management (or a related field) and the following admission standards: preference is given to students with a 3.20 GPA on the last 60 hours of undergraduate course work (or cumulative); a combined GRE score of 290 or higher; and submission of a current resume and statement of interest.

Requirements for the Master of Education Degree: Candidates for a Master of Education degree in Recreation and Sport Management must complete 30 semester hours of graduate course work and 6 hours of thesis or 36 semester hours without a thesis. In addition to the program requirements listed below, all candidates must successfully complete a written comprehensive examination, except those completing a thesis.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Thesis Option
RESM 5023. Outdoor Adventure Leadership. 3 Hours.
(Formerly RESM 4023.) This course considers the values and scope of outdoor recreation programs, leadership and skill development with practical experience in a wilderness environment. The course will include a canoe trip through the wilderness, and skill training in such areas as orienteering and rock climbing; and leadership development in interpersonal and processing skills. The graduate portion of the class is geared toward leading and trip planning for taking college age and older students into remote areas. Graduate degree credit will not be given for both RESM 4023 and RESM 5023. (Typically offered: Summer)

RESM 5273. The Intramural Sports Program. 3 Hours.
(Formerly RESM 4273.) Historical development, aim and objectives, organization, administration, units of competition, program of activities, schedule making, scoring plans, rules and regulations, awards, and special administrative problems. Graduate degree credit will not be given for both RESM 4273 and RESM 5273. (Typically offered: Fall Odd Years)

RESM 5283. History and Application of American Sport. 3 Hours.
This survey course will explore the historical development of sport in American culture and the processes of change in American culture and sport from the 15th century to the present. Students will learn how to apply historical concepts to current issues in recreation and sport management. (Typically offered: Irregular)

RESM 5293. Athletics and Higher Education. 3 Hours.
This course features an examination of the historical development of athletics within American institutions of higher learning with an emphasis upon concepts and ideals that underlie the developments and the major problems affecting contemporary intercollegiate athletics. The purpose of this course is to teach the learner about the development of intercollegiate athletics from the mid-19th century to today. A second purpose of this course is to examine the major issues facing sport administrators within intercollegiate athletics today. (Typically offered: Spring and Summer)

RESM 5333. Sport Media and Public Relations. 3 Hours.
The course will explore the relationship between media organizations and sport organizations, with an emphasis on the business of media rights, as well as public relations theories such as two-way symmetrical communication and agenda setting. Finally, the course will examine practical communication tactics employed by public relations practitioners such as image repair and crisis communications, and the issues presented by forms of new media. (Typically offered: Fall)

RESM 5463. Sports Facilities Management. 3 Hours.
Considers basic elements and procedures in the planning, design, construction, operation, and maintenance of sport facilities; management considerations in conducting various types of events. (Typically offered: Summer)

RESM 560V. Workshop. 1-3 Hour.
Workshop. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

RESM 574V. Internship. 1-3 Hour.
This experiential-based course requires 135 hours per semester of work in a recreation or sport setting. (Typically offered: Fall, Spring and Summer)
RESM 674V. Internship. 1-3 Hour.
Students will learn diverse teaching techniques and implement them in an ongoing undergraduate recreation and sport management class serving as the teaching laboratory. The “what” “when” and “how” relative to integrating various teaching techniques with specific content areas in the class will be explored by both the student and the instructor. (Typically offered: Fall, Spring and Summer)

Camargo, Elsa, Ph.D. (Virginia Polytechnic Institute and State University), M.A., B.A. (University of Illinois at Chicago), Assistant Professor, 2018.
Christian, David, Ph.D., M.S. (University of North Texas), B.A. (University of Texas at Dallas), Assistant Professor, 2015.
Cook, Aletha M., B.A. (University of Arkansas), Clinical Instructor, 2015.
Diefenderfer, Vicki, Ph.D., M.S., B.S. (University of Tennessee), Clinical Assistant Professor, 2015.
Frazier, Kimberly Frances, Ph.D. (University of South Carolina-Columbia), M.S., B.S.E. (University of Arkansas), Associate Professor, 2007.
Gilbertson, Margie, Ph.D. (University of Memphis), M.S.E., B.A. (University of Central Arkansas), Clinical Instructor, 2016.
Glade, Rachel E., Ph.D. (University of Arkansas), M.S. (University of Arkansas for Medical Sciences), M.A. (University of Arkansas), B.S. (University of Arkansas at Little Rock), Assistant Professor, 2015.
Hagstrom, Fran W., Ph.D. (Clark University), M.S. (University of Texas Health Science Center-Houston), M.A. (St. Louis University), B.A. (Southwest Baptist University), Associate Professor, 2002.
Hevel, Michael Stephen, Ph.D. (University of Iowa), M.A. (Bowling Green State University), B.A. (University of Kansas), Associate Professor, 2012.
Higgins, Kristin Kay, Ph.D., M.S. (University of Arkansas), B.A. (Vanderbilt University), Associate Professor, 2006.
Holyfield, Christine E., Ph.D. (Pennsylvania State University), M.A. (University of Kansas), B.S. (Central Michigan University), Assistant Professor, 2017.
Kacirek, Kit, Ed.D., M.Ed. (University of Arkansas), B.S. (University of Texas), Associate Professor, 1997.
Koch, Lynn C., Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Arizona), Professor, 2006.
Liang, Xinya, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Assistant Professor, 2014.
Lo, Wen-Juo, Ph.D., M.A. (Arizona State University), B.S. (SooChow University), Associate Professor, 2008.
Mamiseishvili, Ketevan, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Akaki Tsereteli State University), Professor, 2008.
McCray, Suzanne, Ph.D. (University of Tennessee), M.A., B.A. (University of Arkansas), Associate Professor, 2010.
Miller, Michael T., Ed.D. (University of Nebraska), M.S., B.A. (Southern Illinois University), Professor, 2003.
Perry, Kim, M.S. (University of Arkansas), Instructor, 2007.
Perryman, Kristi Leann, Ph.D. (University of Arkansas), M.S., B.S. (Southwest Missouri State University), Assistant Professor, 2014.
Popejoy, Erin O., Ph.D. (University of Texas–San Antonio), M.A. (Texas State University), B.A. (Case Western Reserve University), Assistant Professor, 2015.
Roessger, Kevin, Ph.D., M.S., B.A. (University of Wisconsin-Milwaukee), Associate Professor, 2016.
Shelton, Leslie Jo, Ph.D. (Michigan State University), M.Ed., B.A. (Ohio University), Assistant Professor, 2014.
Turner, Ronna L., Ph.D. (University of Illinois-Urbana-Champaign), M.S.E. (Missouri State University), B.S.E. (Southwest Missouri State University), Professor, 1997.
Vajda, Anthony J., Ph.D. (Old Dominion University), M.S. (La Salle University), B.A. (University of Delaware), Assistant Professor, 2018.
Williams, Brent Thomas, Ph.D. (University of Illinois, Urbana-Champaign), M.S. (University of Texas Southwestern Medical School), B.A. (Austin College), Associate Professor, 2002.

Adult and Lifelong Learning Courses
ADLL 5133. Perspectives in Adult Education. 3 Hours.
Historical overview of the evolving field of adult education and lifelong learning in responsibilities of adult education providers and reviews the expansion of adult and lifelong learning opportunities associated with societal and demographic shifts. (Typically offered: Fall and Summer)

ADLL 5123. Principles and Practices of Adult Learning. 3 Hours.
Overview of the adult learner including characteristics, motivation for participating in learning, and strategies for developing educational programs for diverse adult populations. (Typically offered: Fall and Summer)

ADLL 5133. Curriculum Development in ABE and ASE. 3 Hours.
Curriculum development in Adult Basic Education (ABE) and Adult Secondary Education (ASE) settings including the various educational functioning levels, measures to assess student levels, selection of teaching materials, and development of curriculum utilizing instructional standards for ABE and ASE programs. (Typically offered: Fall)

ADLL 5143. Instructional Strategies and Assessment in Adult Education. 3 Hours.
Selection and utilization of materials and instructional methods for use in adult learning settings. Evaluative strategies to develop or select appropriate tools and techniques predicated upon the needs and goals of adult learners. (Typically offered: Spring)

ADLL 5153. Organization and Administration of Adult and Lifelong Learning Programs. 3 Hours.
Legal, ethical, staffing, and financial considerations for the development and implementation of programs for adult and lifelong learners in various programs including literacy centers, GED centers, community education, lifelong/leisure learning, and postsecondary education. (Typically offered: Spring)

ADLL 5163. Managing Change in Adult and Lifelong Learning, 3 Hours.
Strategies for planning, organizing, and facilitating change in programs that serve adult learners from diverse populations, across varied developmental stages and geographic locations. Discussion of social change that has impacted adult education and analysis of change models relevant to individuals, groups and organizations. (Typically offered: Fall and Summer)

ADLL 5173. Program Planning. 3 Hours.
Program development process for adult and lifelong learners. Overview of assessment, developing program objectives, identifying resources, and designing program plans. (Typically offered: Summer)

ADLL 5183. Technology and Innovation in Adult Learning, 3 Hours.
Techniques for designing, developing, implementing, and assessing technology-mediated adult and lifelong learning programs. Discussion of issues relevant to the use of innovative strategies for delivering instruction via emerging technologies and their potential impact on content and learning outcomes. (Typically offered: Summer)

ADLL 5193. Seminar in Adult and Lifelong Learning. 3 Hours.
Seminars focused on topics related to adult and lifelong learning. (Typically offered: Spring and Summer)

ADLL 5213. Adult and Lifelong Learning Internship. 3 Hours.
Internship in adult and lifelong learning settings. (Typically offered: Fall and Spring)

ADLL 5223. Adult and Lifelong Learning Applied Project. 3 Hours.
Development and Implementation of a project focused on adult and lifelong learning. Consent of advisor/instructor required. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

ADLL 5233. Independent Study. 3 Hours.
Provides students with an opportunity to pursue special study in adult and lifelong learning. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ADLL 6113. Advanced Adult Learning Theory. 3 Hours.
Advanced study of theories and models of adult and lifelong learning with emphasis on current trends, recent research, and issues affecting the field. Issues covered will include critical theory and advancements in neuroscience and cognition as they relate to adult learning and lifespan development. (Typically offered: Irregular)

ADLL 6123. Leadership and Ethics in Adult and Lifelong Learning. 3 Hours.
This doctoral course focuses on leadership principles and ethical considerations that are critical to developing and sustaining adult education programs that benefit individuals, organizations, and communities. Course content will include case study analysis and lectures from scholar-practitioners from the field. (Typically offered: Irregular)

ADLL 6133. Analysis of International Adult and Lifelong Programs. 3 Hours.
Survey of the historical and philosophical events which have shaped adult and lifelong learning worldwide. Discussion of issues affecting adult education and lifelong learning including globalization, educational access, and variance in national policies. (Typically offered: Irregular)

ADLL 6143. Instructional Adaptation and Innovation in Adult and Lifelong Learning. 3 Hours.
An overview of teaching and learning methods, styles, and techniques which are applicable when facilitating adult learners across diverse settings. Content to include teaching and learning style assessment, accommodating learning styles, physical and learning disabilities, language differences and cultural norms. (Typically offered: Irregular)

ADLL 6153. Policy and Public Governance of Adult and Lifelong Learning Programs. 3 Hours.
Policy analysis and public governance issues in adult and lifelong learning with emphasis on state and federal programs. Discussions of how to evaluate, design, and implement policy focused on promoting adult and lifelong learning activities in a myriad of organizations. Overview of trends and current issues related to policy and public governance of adult and lifelong learning. (Typically offered: Irregular)

ADLL 6163. Adult Development and Psychology. 3 Hours.
Focus on adult developmental psychology with emphasis on lifespan development and specific issues related to learning in the various stages of adulthood. Work-life balance, meaning of work, generational issues. (Typically offered: Irregular)

ADLL 6173. Current Issues. 3 Hours.
Exploration and discussion of current issues relative to adult education and lifelong learning. Focus on the review and application of current research as it relates to practice. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ADLL 6183. Organization Development, Learning, and Change. 3 Hours.
Using a system perspective, this course examines the theories and practices associated with organizational development, learning and change to understand the dynamic nature of organizational life. This course examines the structural frame, the human resource frame, the political frame, and the symbolic frame that influence organizational behavior and learning. The course investigates strategies and best practices for managing and leveraging this dynamism to build organizational capacity and improve performance. (Typically offered: Fall and Spring)
ADLL 6213. Signature Pedagogy: Teaching and Learning in Community Colleges. 3 Hours.
Using a learning-centered change model, this course examines how community colleges can shift from a traditional teaching-centered paradigm to one that is learning-centered. This course examines the context of the learning college, strategic planning for a learning-outcomes approach to governance, the role of student development and technology in the learning college, and implementing and assessing learning-centered strategies. (Typically offered: Irregular)

ADLL 6223. Workforce and Community Development. 3 Hours.
This course provides an overview of how community colleges influence workforce, economic, and community development through their education missions. The course will examine the community college’s expanding role in economic and community development through workforce development programs. Emphasis will be placed on program structure, best practices in program development, and partnerships and collaboration with various stakeholders. (Typically offered: Irregular)

ADLL 6233. Survey and Significance of the American Community College. 3 Hours.
A comprehensive overview of the American community college, its history, its ever-evolving purpose and the challenges it faces. Course content will focus on the administrators and faculty who lead, the students they serve, and components such as developmental education, integrative education and transfer education. Discussion will include occupational and community education and issues related to accountability. Special attention will be paid to how this unique and complex institution remains relevant and significant to the community. (Typically offered: Irregular)

ADLL 6243. Current Trends in Community Colleges. 3 Hours.
This course examines environmental factors that influence the organization and administration of community colleges. Trends related to funding, policy, staffing, and workforce development are examined and contextualized to the evolving community college mission. (Typically offered: Irregular)

ADLL 6253. Professional Development in Adult and Lifelong Learning. 3 Hours.
This course explores career planning and development, performance management, and professional development in various settings. The focus of the course will be on concepts associated with Human Resource Development (HRD) and developing employees within an organization, as well as leading adults in transition in the community and in educational settings through the process of making career decisions. (Typically offered: Irregular)

ADLL 6313. Independent Study. 3 Hours.
Independent study of topics in adult and lifelong learning. (Typically offered: Irregular)

ADLL 6403. Quantitative Reasoning I for Adult Educators. 3 Hours.
Introduction to quantitative reasoning for educators and researchers in adult education. Topics include applying the hypothetico-deductive research process, describing data using statistical terminology, building statistical models, presenting data meaningfully, and using SPSS to analyze data from practical research problems. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. (Typically offered: Fall and Spring)

ADLL 6413. Quantitative Reasoning II in Adult and Lifelong Learning. 3 Hours.
Methodologies for designing descriptive, correlational, and experimental studies. Development of research questions, definition of variables, selection or development of instruments, data collection, analysis, interpretation and reporting of research results. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or equivalent. (Typically offered: Fall)

ADLL 6423. Qualitative Reasoning in Adult and Lifelong Learning. 3 Hours.
Methodologies for designing qualitative research studies in adult and lifelong learning settings. Selection of the appropriate qualitative tradition, selection of research subjects, development of data collection protocols, field work strategies, data analysis, data interpretation and presentation of data results. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. (Typically offered: Spring)

ADLL 6433. Program Evaluation. 3 Hours.
Overview of evaluation strategies in adult and lifelong learning programs that include: development of evaluation questions, selection or development of instrumentation, data collection methods, data analysis, and reporting of evaluation results. Emphasis on practical and ethical issues associated with evaluation processes. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or ADLL 6413 or ADLL 6423, or equivalent. (Typically offered: Spring)

ADLL 6443. Adult and Lifelong Learning Dissertation Seminar. 3 Hours.
Development of dissertation proposal. Formation of research question, selection of methodologies, development of problem statement, research questions, and identification of research variables, constructs of phenomena. Identification of data collection and data analysis procedures. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or ADLL 6413 or ADLL 6423 or ADLL 6433, or equivalent. (Typically offered: Spring)

ADLL 6463. Advanced Qualitative Reasoning in Adult and Lifelong Learning. 3 Hours.
This qualitative methods course provides students with advanced instruction in qualitative data collection, field observations, records research, data analysis, and data display. In addition to reviewing various research studies that demonstrate different qualitative research approaches, students will practice some of the activities associated with executing a qualitative research study. Prerequisite: ADLL 6423 or instructor consent. (Typically offered: Irregular)

ADLL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Communication Disorders Courses
CDIS 5103. Research Methodology in Communication Disorders. 3 Hours.
An examination of methods of research in speech-language pathology and audiology and of the use of bibliographic tools. Focuses on purposes and problems of various forms of communication disorders research, procedures and instruments employed, and reporting of research. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5113. Seminar in Early Intervention. 3 Hours.
Study of a family-centered, transdisciplinary approach to early intervention with infants and toddlers at-risk for communication disorders. Topics include early communication development, service delivery in a family context, coordination with other disciplines, legislation mandating services, and providing services to children with multiple disabilities. Prerequisite: CDIS 3223 or equivalent, and graduate standing. (Typically offered: Spring)

CDIS 5121L. Feeding and Swallowing Disorders Lab. 1 Hour.
Observation and interpretation of techniques used for assessment and remediation of feeding and swallowing disorders in children and adults. Corequisite: CDIS 5122. Prerequisite: CDIS 3213 and graduate standing. (Typically offered: Fall)
CDIS 5122. Feeding and Swallowing Disorders. 2 Hours.
Study of the etiology, assessment, and remediation of feeding and swallowing disorders in children and adults. Prerequisite: CDIS 3213 or equivalent, and graduate standing. (Typically offered: Fall)

CDIS 5143. Cognitive-Communication Development and Disorders. 3 Hours.
Study of normal cognitive development, the role of communication in this development, and shifts that may occur in conjunction with various speech, language and/or hearing disorders. Prerequisite: CDIS 3223. (Typically offered: Fall)

CDIS 5153. TBI and Right-Hemisphere Disorders. 3 Hours.
Study of the speech and language disorders commonly resulting from traumatic brain injury and right hemisphere disorders. Prerequisite: CDIS 4253 or equivalent, and graduate standing. (Typically offered: Spring)

CDIS 5163. Seminar in Language Topics. 3 Hours.
Study of selected topics in normal and disordered language acquisition and/or language use. Implications of current research are reviewed and applied to evaluation and management of language impairment(s). Prerequisite: Graduate standing. (Typically offered: Irregular)

CDIS 5173. Sign Language and Deafness. 3 Hours.
(Formerly CDIS 4103.) An introduction to American Sign Language (ASL) and the Deaf Community that uses it. This class will study expressive and sign language skills using ASL vocabulary, structure and grammar. The Deaf Community will be studied through videotapes and readings. Issues in Deaf Education will also be introduced. Graduate degree credit will not be given for both CDIS 4103 and CDIS 5173. (Typically offered: Fall, Spring and Summer)

CDIS 5181. Advanced Clinical Practicum I. 1 Hour.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5193. Seminar in Problems of Oral Communication. 3 Hours.
Investigation of research in selected problems of oral communication; recent developments in speech-language pathology and audiology; individual problems for investigation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

CDIS 5203. Introduction to Aural Rehabilitation. 3 Hours.
(Formerly CDIS 4133.) Study of the technique used in the rehabilitation of speech and language problems of the hearing impaired including the role of amplification, auditory training, and speech reading in rehabilitation. Graduate degree credit will not be given for both CDIS 4133 and CDIS 5203. Prerequisite: CDIS 3103. (Typically offered: Spring)

CDIS 5213. Voice and Resonance Disorders. 3 Hours.
Study of disorders of phonation and resonance, including etiologies, diagnosis, and intervention strategies. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5223. Fluency Disorders. 3 Hours.
An examination of fluency disorders including theory, etiological factors, and development. In addition, the course is designed to address assessment and management of fluency disorders consistent with evidence-based practice for prospective speech-language pathologists. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5233. Speech Sound Disorders. 3 Hours.
Assessment and treatment of disorders in speech articulation. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 5243. Language Disorders in Adults. 3 Hours.
Cognitive and communicative breakdown due to neurological trauma, including etiology, characteristics, assessment and treatment for aphasia, traumatic brain injury, and right hemisphere disorders. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 5253. Motor Speech Disorders. 3 Hours.
Study of motor speech production disorders related to damage to central or peripheral nervous system motor centers and pathways. Cerebral palsy, adult dysarthria, apraxia, and dysphagia are emphasized. Both theoretical and treatment considerations are addressed. Prerequisite: CDIS 4253 or equivalent, and graduate standing. (Typically offered: Spring)

CDIS 5263. Advanced Audiology. 3 Hours.
(Formerly CDIS 4263.) Study of the basic techniques used in audiological assessment of children and adults, including pure tone audiometry, speech audiometry, and special tests of hearing function. Graduate degree credit will not be given for both CDIS 4263 and CDIS 5263. Prerequisite: CDIS 3103. (Typically offered: Fall)

CDIS 5273. Language, Learning and Literacy. 3 Hours.
An examination of language-based literacy skills, including consideration of development, disorders, assessment and intervention. (Typically offered: Summer)

CDIS 5281. Advanced Clinical Practicum II. 1 Hour.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5181. (Typically offered: Spring)

CDIS 5293. Augmentative and Alternative Communication. 3 Hours.
Approaches to communication management with the severely and profoundly handicapped child or adult, with primary emphasis on augmentative and alternative communication assessment and intervention. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5303. Clinical Assessment of Speech and Language Disorders. 3 Hours.
(Formerly CDIS 4183.) Study of the basic diagnostic procedures used in speech-language pathology. Emphasis is placed on the clinical processes of assessment, including criteria for test selection, techniques in test administration, and interpretation of test. Graduate degree credit will not be given for both CDIS 4183 and CDIS 5303. Pre- or Corequisite: Prior coursework in CDIS and ANTH 1023. (Typically offered: Spring)

CDIS 5313. Introduction to Speech and Hearing Science. 3 Hours.
(Formerly CDIS 4213.) Study of the acoustic structure of oral speech and the auditory skills underlying speech perception. Graduate degree credit will not be given for both CDIS 4213 and CDIS 5313. Prerequisite: CDIS 3203, CDIS 3213, CDIS 3124 and its lab component. Pre- or Corequisite: MATH 1203 or higher. (Typically offered: Spring)

CDIS 5323. Language Disorders in Children. 3 Hours.
(Formerly CDIS 4223.) Study of disorders of language acquisition and usage in children and adolescents, with emphasis upon the nature, assessment, and treatment of such disorders. Graduate degree credit will not be given for both CDIS 4223 and CDIS 5323. Prerequisite: CDIS 3223. (Typically offered: Spring)

CDIS 5353. Neurological Bases of Communication. 3 Hours.
(Formerly CDIS 4253.) A study of the structures and functions of the central and peripheral nervous systems as they relate to human speech, language, and cognition. Graduate degree credit will not be given for both CDIS 4253 and CDIS 5353. Prerequisite: CDIS 3213. (Typically offered: Fall)

CDIS 5373. Communication Behavior and Aging. 3 Hours.
(Formerly CDIS 4273.) Study of the effects upon communication of normal aspects of the aging process, from early adulthood throughout the lifespan. Changes in speech, language, and hearing functioning are identified; common alterations in communicative disorders commonly associated with advanced age are discussed. Graduate degree credit will not be given for both CDIS 4273 and CDIS 5373. (Typically offered: Fall)

CDIS 5381. Advanced Clinical Practicum III. 1 Hour.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5281. (Typically offered: Summer)
CDIS 5391. Clinical Practicum: Hearing Disorders. 1 Hour.
Practicum in audiology. (Typically offered: Fall, Spring and Summer)

CDIS 548V. Off-Campus Practicum: Public School Site. 1-6 Hour.
Practicum activities in speech-language disorders in a public school setting.
Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CDIS 5511. Professional Issues I. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders.
(Typically offered: Fall)

CDIS 5521. Professional Issues II. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders.
(Typically offered: Spring)

CDIS 5531. Professional Issues III. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders.
(Typically offered: Fall)

CDIS 555V. Internship: Clinical Site. 3-6 Hour.
Field placement in approved clinical setting for clock hours in speech-language pathology assessment and treatment. Students in the master's program must enroll in a minimum of 3 credit hours of CDIS 555V or CDIS 557V during their last semester of graduate studies. Prerequisite: Graduate standing; Completion of one semester of either CDIS 548V or CDIS 568V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 56BV. Off-Campus Practicum: Clinical Site. 1-6 Hour.
Practicum activities in speech-language disorders in an off-campus clinical site. Prerequisite: Graduate standing and completion of at least 2 semesters of CDIS 5281. (Typically offered: Fall, Spring and Summer)

CDIS 578V. Internship: Public School Site. 3-6 Hour.
Field placement in approved public school setting for clock hours in speech-language pathology assessment and treatment. Students in the Master's program must enroll in a minimum of 3 credit hours of CDIS 578V or CDIS 558V during their last semester of graduate studies. Prerequisite: Graduate standing; Completion of one semester of either CDIS 548V or CDIS 568V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 5813. Advanced Auditory (Re)Habilitation. 3 Hours.
This course provides students with an in-depth knowledge of hearing anatomy and physiology as well as current hearing and hearing assistive technologies. The development of auditory skills across the lifespan will be discussed as well as intervention techniques to facilitate auditory, speech, and spoken language skills across the lifespan. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5823. Language Learning with Multiple Disabilities. 3 Hours.
Approaches to services (assessment and intervention) for individuals who, as a result of multiple disabilities, are in the beginning stages of language development including the preintentional and presymbolic stages. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5843. Communication and Swallowing in Dementia. 3 Hours.
This course provides an in-depth examination of the communication and feeding/swallowing factors demonstrated by patients with dementia. Etiologies, symptoms, progression, evaluation, and appropriate interventions for the most common forms of dementia are addressed. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 5883. Policies & Procedures in Educational Speech-Language Pathology. 3 Hours.
Educational Speech Pathology is designed to familiarize the student the factors related to functioning as an SLP in an educational setting, including state and federal regulations/standards, service delivery considerations, eligibility criteria, and documentation. Prerequisite: Graduate Standing. (Typically offered: Summer)

CDIS 590V. Special Problems. 1-6 Hour.
Special problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 599V. Seminar in Professional Issues. 1-3 Hour.
Selected topics in professional issues in speech-language pathology and audiology.
(Typically offered: Fall and Spring)

CDIS 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CDIS 699V. Seminar in Communication Sciences and Disorders. 1-6 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

Counselor Education Courses

CNED 5003. Counseling and Human Development. 3 Hours.
This course is intended to give students a broad overview of human nature/behavior through knowledge of lifespan developmental theory, personality development, modern & post-modern approaches to the study of human nature/behavior, and learning theory. Throughout the course, close attention will be given to human ecology or those social/historical/cultural/environmental forces furthering or impeding development. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CNED 5193. Clinical Mental Health Counseling. 3 Hours.
An introductory study of community counseling. The course content includes information concerning the educational, historical, philosophical, and psychological foundations of community counseling as well as specific traits and skills of professional community counselors. In addition, the course is designed to provide introductory level concepts and skills required for future certification and licensure as counseling professionals. Prerequisite: Graduate student status. (Typically offered: Spring)

CNED 5203. Foundations of the Counseling Profession. 3 Hours.
A study of the counseling profession applicable to school, college and community agency settings. Introduction to the basic educational, historical, philosophical foundations of counseling as well as specific traits and skills of counselors. The course is also designed to provide beginning level concepts and skills required for certification and licensure. Prerequisite: Must be taken first year in program. (Typically offered: Fall and Summer)

CNED 5213. Lifestyle & Career Development. 3 Hours.
Theories of career development and counseling, including the use of occupational information sources and career assessment tools and techniques. Prerequisite: CNED 5333. (Typically offered: Summer)

CNED 5223. Introduction to School Counseling. 3 Hours.
Philosophy, organization, and practices of a counseling program in the elementary and secondary school. The school counselor's role as counselor, consultant, and coordinator, professional identity, and legal issues are included. Includes a significant focus on ethical standards and issues. (Typically offered: Irregular)

CNED 5303. Individual Appraisal. 3 Hours.
Analysis of concepts, methods, and procedures utilized in individual appraisal. (Typically offered: Fall)
CNED 5303. Program Organization and Information Management. 3 Hours.  
This course addresses needs and strategies for effective development and  
management of school counseling programs and guidance curriculum. Prerequisite:  
CNED 5223. (Typically offered: Fall)

CNED 5323. Counseling Theory. 3 Hours.  
Introductory survey and critical analysis of major alternative theoretical perspectives  
in counseling. (Typically offered: Fall and Summer)

CNED 5333. Basic Counseling Techniques. 3 Hours.  
Introduction to basic counseling techniques and skills common to multiple theoretical  
perspectives. Prerequisite: Master's students in Counseling. (Typically offered: Fall  
and Spring)

CNED 5343. Counseling Practicum. 3 Hours.  
Supervised counseling practice. CNED faculty consent required. Pre- or Corequisite:  
CNED 5303 and CNED 5363 and CNED 5373. Prerequisite: CNED 5203,  
CNED 5232, CNED 5333, CNED 5403. (Typically offered: Fall and Spring)

CNED 5353. Psychopharmacology. 3 Hours.  
Study of theory, research, & practice issues pertaining to psychopharmacology for  
non-medical practitioners. Prerequisite: CNED 5203, CNED 5323, and CNED 5333.  
(Typically offered: Summer)

CNED 5363. Dynamics of Group Counseling. 3 Hours.  
Therapeutic and other theoretical information is presented regarding group process  
and the counselor's role in that process. An experiential group experience is  
required. Prerequisite: CNED 5333 and CNED 5323. (Typically offered: Fall and  
Spring)

CNED 5373. Ethical and Legal Issues in Counseling. 3 Hours.  
Review of ethical and legal standards governing professional counselor training,  
research, and counseling practice; including client rights; confidentiality; the  
client-counselor relationship; and counseling research, training, and supervision.  
Prerequisite: CNED 5003 and CNED 5203. (Typically offered: Fall)

CNED 5383. Crisis Intervention Counseling. 3 Hours.  
Analysis and application of short-term counseling intervention strategies in crisis  
situations, with special attention to incidents involving rape, physical, or emotional  
abuse, divorce, suicidal depression, grief, marital or family instability, and violent  
conflict. Prerequisite: CNED 5333. (Typically offered: Summer)

CNED 5403. Diagnosis and Treatment in Counseling. 3 Hours.  
Procedures in case management utilizing both clinical and interview data in assisting  
children, adolescents, and adults in educational, vocational, personal, and social  
planning. Prerequisite: CNED 5303, CNED 5323 and CNED 5333. (Typically offered:  
Fall and Spring)

CNED 5443. Vocational Rehabilitation Foundations. 3 Hours.  
Survey of the philosophy of vocational rehabilitation, including history and legislation.  
(Typically offered: Fall)

CNED 5453. Medical Aspects of Disability. 3 Hours.  
Orientation to medical and medically related aspects of various disabling conditions  
with emphasis on the severely disabled. (Typically offered: Spring)

CNED 5463. Rehabilitation Case Management. 3 Hours.  
Counseling process in the rehabilitation setting. Focusing upon effective counseling  
strategies, representative cases, and effective case management methods.  
(Typically offered: Spring)

CNED 5473. Psychological Aspects of Disability. 3 Hours.  
Intensive study of the psychological aspects of adjustment to atypical physique and  
prolonged handicapping condition. (Typically offered: Spring)

CNED 5483. Counseling Research. 3 Hours.  
An in-depth examination of counseling research methodology and issues to prepare  
students to critically evaluate and use counseling research in their professional  
practice. (Typically offered: Fall, Spring and Summer)

CNED 5493. Principles and Practices of Psychiatric Rehabilitation. 3 Hours.  
The course introduces students to the principles and practices of recovery-oriented,  
evidence-based psychiatric rehabilitation. Through lectures, guest presentations,  
films, discussions, and readings, students (a) explore the clinical, psychosocial,  
and vocational aspects of psychiatric disabilities and (b) examine psychiatric  
rehabilitation principles and practices to facilitate community integration and  
successful employment outcomes for individuals with psychiatric disabilities.  
(Typically offered: Fall)

CNED 5513. Counseling and Human Diversity. 3 Hours.  
Examination of human and cultural diversity, emphasizing issues of race, class, and  
socioeconomic status, and how they impact our clients as individuals and as family  
and society members. (Typically offered: Summer)

CNED 5523. Process and Behavioral Addictions. 3 Hours.  
This course provides an overview of non-substance related addictive disorders  
such as technology (e.g., video games, Internet, television), gambling, eating, sex,  
shopping/buying and work as well as potential treatment options for these disorders.  
(Typically offered: Irregular)

CNED 5583. Placement of Persons with Disabilities. 3 Hours.  
Focuses on placement theory and practice as they apply to persons who experience  
disabilities. Special attention is given to RehabMark approach. (Typically offered:  
Summer)

CNED 574V. Counseling Internship. 1-9 Hour.  
A 600-clock-hour field placement in an approved setting over a minimum of two  
continuous semesters. For students completing a counseling internship in a school  
setting, successful completion of a criminal background check is required before  
beginning internship. Pre- or Corequisite: CNED 5213. Prerequisite: CNED 5203,  
CNED 5303, CNED 5323, CNED 5333, CNED 5343, CNED 5363, CNED 5373,  
CNED 5403, CNED 5513. CNED faculty consent required. (Typically offered: Fall  
and Spring) May be repeated for up to 9 hours of degree credit.

CNED 599V. Seminar. 1-6 Hour.  
Seminar. (Typically offered: Irregular) May be repeated for up to 6 hours of degree  
credit.

CNED 6003. Theories and Foundations of Addictions. 3 Hours.  
A study of behavioral and substance addictions, including an overview of differential  
treatment. Prerequisite: CNED 5323 and CNED 5333, and admission to the CNED  
masters or doctoral program or departmental consent. (Typically offered: Spring and  
Summer)

CNED 600V. Master's Thesis. 1-6 Hour.  
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for  
degree credit.

CNED 6013. Advanced Counseling Theory and Methods. 3 Hours.  
Critical analysis of major theoretical perspectives in counseling, including both  
group and individual counseling strategies for dealing with affective, cognitive,  
and behavioral dysfunction. Prerequisite: CNED doctoral standing or permission.  
(Typically offered: Spring Even Years)

CNED 6023. Foundations of Marriage and Family Counseling Therapy. 3 Hours.  
Comprehensive exploration of the current theories/techniques of marriage, family  
and couples counseling. Prerequisite: CNED 5323 and CNED 5333 and CNED  
doctoral or masters standing or permission. (Typically offered: Summer)

CNED 6033. Advanced Group Theory and Methods. 3 Hours.  
Comparative study of theories and processes of group counseling. Includes  
supervised experience in group facilitation with video recording and playback.  
Prerequisite: CNED 5363 or equivalent and CNED doctoral or masters standing or  
permission. (Typically offered: Spring Odd Years)
CNED 6043. Supervision of Counselors. 3 Hours.  
Analysis, assessment, and practical application of counselor supervision techniques in treatment and training programs. Prerequisite: CNED doctoral standing and CNED faculty consent (Typically offered: Fall Even Years)

CNED 605V. Independent Study. 1-18 Hour.  
Independent study. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CNED 6073. Advanced Research in Counseling. 3 Hours.  
This course involves acquiring a knowledge and understanding of the use of research in counseling and the development of new research in the counseling profession that has heuristic value. Prerequisite: Graduate standing. (Typically offered: Spring)

CNED 6083. Consultation Theory and Methods. 3 Hours.  
Strategies, practical application, and techniques for effective consultation with parents, teachers, and community agencies. Prerequisite: CNED 5333 (preferred) CNED doctoral or masters standing or permission. (Typically offered: Summer)

CNED 6093. Counseling Children and Adolescents Through Play. 3 Hours.  
Introduction to counseling children and adolescents through play; including the process, theories, techniques, and materials applicable to children and adolescents in a pluralistic society. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or permission. (Typically offered: Spring)

CNED 6113. Theory to Practice: Working with Co-occurring Disorders. 3 Hours.  
This course is designed to demonstrate the application of theory to practice in the treatment of co-occurring disorders. Specifically, it is intended to carefully review current research and literature on counseling individuals presenting with both a substance abuse disorder and mental-emotional challenges. Pre- or Corequisite: CNED 6003. Prerequisite: Graduate or license eligible. (Typically offered: Summer)

CNED 6123. Clinical Applications of Marriage and Family Counseling and Therapy. 3 Hours.  
Advanced clinical methodology appropriate for family counseling, marriage counseling, and couples counseling (in all settings), with emphasis on solution-focused systems, Satir model and psychoeducational family work in schools. Includes supervision of clinical experience in marriage, family and couples counseling, video recording and school/community outreach. Prerequisite: CNED doctoral standing or permission. (Typically offered: Fall Odd Years)

CNED 6133. Introduction to Play Therapy. 3 Hours.  
This course is an introduction to the basic concepts of child-centered play therapy (CCPT). Students will learn the conceptual framework of child-centered play therapy, as well as the attitudes and skills necessary to establish and maintain facilitative relationships with children that encourage their self-expression and facilitate change. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or consent. (Typically offered: Irregular)

CNED 6223. Foundations of Counselor Education and Supervision. 3 Hours.  
This course is designed to enhance the professional development and acculturation of doctoral students in order to facilitate their success in professional leadership roles of counselor education, supervision, counseling practice, and research competencies. Prerequisite: CNED Doctoral status or permission. (Typically offered: Spring Odd Years)

CNED 6233. Employment Practices and Interventions. 3 Hours.  
An intensive study of the employment experiences of workers with disabilities with emphasis on disincentives and barriers to employment and interventions to enable people with disabilities to participate in employment. Prerequisite: RHAB 5493 or equivalent. (Typically offered: Irregular)

CNED 6243. Disability Policy in the U.S.. 3 Hours.  
An analysis of public policy approaches to disability in the U.S. Examines the political and philosophical origins of disability policy; reviews major disability legislation and its effects on policy stakeholders; describes recent initiatives; and analyzes evolution of disability policy within context of changing societal, economic, and political conditions. (Typically offered: Fall)

CNED 6253. Advanced Psychosocial Aspects of Disability. 3 Hours.  
A theoretical and applied study of techniques that enable people to cope with 2 major life events: disability and unemployment. (Typically offered: Fall Odd Years)

CNED 6343. Cultural Foundations and Counseling. 3 Hours.  
Provides those who work or plan to work in post secondary educational institutions with an understanding of the student population in contemporary colleges and universities. (Typically offered: Fall Even Years)

CNED 6413. Advanced Individual Appraisal. 3 Hours.  
Provides those who work or plan to work in post secondary educational institutions with an understanding of the student population in contemporary colleges and universities. (Typically offered: Fall Even Years)

CNED 6414. Advanced Individual Appraisal. 3 Hours.  
Provides those who work or plan to work in post secondary educational institutions with an understanding of the student population in contemporary colleges and universities. (Typically offered: Fall Even Years)

HIED 5003. Overview-American Higher Education. 3 Hours.  
A basic course in the study of higher education open to all students seeking careers in colleges and universities. Serves as an introduction to the programs, problems, issues, and trends in higher education. (Typically offered: Fall)

HIED 5033. Student Affairs in Higher Education. 3 Hours.  
Study of origins, functions, and policies in student personnel services in contemporary 2- and 4-year colleges and universities with emphasis on the student and student development. (Typically offered: Fall)

HIED 5043. Student Development in Higher Education. 3 Hours.  
Provides those who work or plan to work in post secondary educational institutions with an understanding of the student population in contemporary colleges and universities. (Typically offered: Spring)

HIED 504V. Practicum in Higher Education. 1-6 Hour.  
Students are assigned to a department or agency within or outside the university for professional experience under the joint supervision of on-site personnel and university faculty. Periodic meetings are scheduled for evaluation, discussion, and examination of techniques. (Typically offered: Fall, Spring and Summer)
HIED 5053. The Community College. 3 Hours.
An overview of the community college. Topics include the history and philosophy of the community college movement, students, curriculum, state and local campus governance, teaching, student personnel work, finance and issues, problems, and trends. (Typically offered: Irregular)

HIED 5063. Diversity in Higher Education. 3 Hours.
Broadly explores how sociocultural contexts influence diversity at colleges and universities. Focuses on the responsibilities of higher education leaders to be multiculturally competent professionals who foster inclusive practices for diverse student populations. (Typically offered: Irregular)

HIED 5073. Management of Higher Education Institutions. 3 Hours.
Principles and concepts of management and their application in college and university settings. (Typically offered: Fall and Summer)

HIED 5083. History and Philosophy of Higher Education. 3 Hours.
An examination of the history and development of higher education including the study of the philosophy, objectives, and functions of various types of institutions. (Typically offered: Spring)

HIED 5093. Research in Higher Education and Student Affairs. 3 Hours.
This course provides master's students an overview of research and literature applicable to the discipline; teaches students how to understand academic literature and use empirical evidence to inform practices and policies at colleges and universities. Prerequisite: MEd students in the Higher Education Program. (Typically offered: Fall, Spring and Summer)

HIED 5103. Higher Education in International Contexts. 3 Hours.
Explores various systems of higher education around the world. Equips students with the knowledge and skills to work in the increasingly internationalized field of higher education. (Typically offered: Irregular)

HIED 5303. Non-Profit Fundraising. 3 Hours.
Non-Profit Fundraising examines the theory and practice of the professional field of fundraising and development, which is dedicated to attracting philanthropic support from constituents for colleges, universities, health organizations, hospitals, non-profit organizations, museums and other philanthropic endeavors. (Typically offered: Irregular)

HIED 5643. Reflective Practice in Higher Education and Student Affairs. 3 Hours.
Provides students an opportunity to work in a functional area of higher education, reflect on how their experiences inform their career goals as higher education professionals, and learn job search strategies in higher education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HIED 574V. Internship. 1-3 Hour.
Supervised field experiences in student personnel services, college administration, academic advising, institutional research, development, or other areas of college and university work. (Typically offered: Fall, Spring and Summer)

HIED 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

HIED 6013. The Professoriate: Problems and Issues. 3 Hours.
An examination of the vital issues and trends affecting college faculty personnel with emphasis upon institutional practices and policies. (Typically offered: Irregular)

HIED 6023. Introduction to the Study of Higher Education. 3 Hours.
A requirement for all new doctoral and specialist students. Familiarization with writing requirements, library search procedures, library resources, and program requirements. Prerequisite: Admission to Higher Education Ed.D program. (Typically offered: Irregular)

HIED 605V. Independent Study. 1-6 Hour.
Provides students with an opportunity to pursue special study in higher education. (Typically offered: Fall, Spring and Summer)

HIED 6083. Management Skills for Effective Leadership. 3 Hours.
Development of management skills that enhance leadership includes understanding yourself, managing yourself, team building, personnel selection, group and individual decision-making, problem solving, managing conflict, developing valid performance appraisal systems, conducting performance appraisal interview, and other topics of current interest. Prerequisite: Doctoral students in Higher Education or permission of the instructor. (Typically offered: Irregular)

HIED 6093. Leading Change. 3 Hours.
An in-depth examination of leadership, change, and culture in postsecondary education. (Typically offered: Irregular)

HIED 6183. Organization Development and Change in Higher Education. 3 Hours.
An examination of the theory and practice of organization development as it relates to planned change in colleges and universities. (Typically offered: Irregular)

HIED 6303. Advancement in Higher Education. 3 Hours.
Advancement in Higher Education examines the theory and practice of the professional field and function referred to as "institutional advancement", which is dedicated to attracting philanthropic support as well as building attitudinal and behavioral support among key constituents for colleges and universities. (Typically offered: Irregular)

HIED 6323. Design and Evaluation of College Teaching. 3 Hours.
Theory and practice of effective college teaching. Emphasis is placed on preparation and evaluation of instruction. (Typically offered: Irregular)

HIED 6333. Curriculum Design in Higher Education. 3 Hours.
Types of undergraduate curricula and their supporting philosophies; approaches to curricula planning and assessment; curricular reforms; and factors influencing curricular policy making. (Typically offered: Irregular)

HIED 6343. Strategies for Effective College Teaching. 3 Hours.
An examination of traditional and innovative instructional strategies for use in college teaching. (Typically offered: Irregular)

HIED 6353. The College and University Presidency. 3 Hours.
The course explores the basic elements of the presidency of an academic institution and examines the critical issues facing the college and university presidents/chancellors. (Typically offered: Irregular)

HIED 6423. Trends, Issues and Problems in Higher Education. 3 Hours.
A study of the current problems and trends related to the field of higher education. (Typically offered: Irregular)

HIED 6483. Strategic Enrollment Management. 3 Hours.
An examination of admissions marketing strategies, communications plans, branding, and forecasting as well as how other areas (financial aid, honors, scholarships, and student affairs) contribute to successful recruitment efforts. Other key enrollment management areas of focus for the class include academic records, registration, degree audits, FERPA, student support, and most importantly, retention. Major state and federal legislation that underscores any of these activities will be discussed as well. (Typically offered: Irregular)

HIED 6533. Assessment of Institutional Effectiveness in Higher Education. 3 Hours.
The course examines the fundamentals of assessment of learning outcomes and institutional effectiveness and introduces assessment as a tool to inform strategic planning and data-driven decision-making in higher education. (Typically offered: Irregular)

HIED 6643. College Students in the United States. 3 Hours.
Students will engage with the leading theoretical and empirical scholarship related to college students and use this information to engage in class discussion, complete course assignments, consider implications for practice, and contemplate opportunities for new scholarship. Prerequisite: Doctoral student in the Higher Education Program or instructor consent. (Typically offered: Irregular)
HIED 6653. Legal Aspects of Higher Education. 3 Hours.
An examination of the legal status of higher education in the United States; the rights and responsibilities of educators and students including fair employment; due process; torts liability and contracts; student rights landmark court decisions; federal and state legislation having an impact on education. (Typically offered: Fall and Spring)

HIED 6663. Finance and Fiscal Management. 3 Hours.
Higher education finance and budgeting practices: problems, issues, trends, and policy issues in higher education. (Typically offered: Irregular)

HIED 6683. Governance and Policy Making in Higher Education. 3 Hours.
An analysis of governance and policy making affecting the control of colleges and universities. Attention is given to policy generation, governing board supervision, and the impact of institutional, professional, and regional groups as well as community, state, and federal pressures. (Typically offered: Irregular)

HIED 6693. Research Techniques in Higher Education. 3 Hours.
Techniques of research applicable to Higher Education. (Typically offered: Irregular)

HIED 674V. Internship. 1-6 Hour.
Supervised field experiences in student personnel services, college administration, college teaching, institutional research, development, or other areas of college and university work. (Typically offered: Fall, Spring and Summer)

HIED 699V. Seminar. 1-6 Hour.
A series of seminar for specialized study into areas of current significance in postsecondary education, such as leadership and planning; organization, development, and change; human resource development and appraisal; the student in higher education; etc. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HIED 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Human Resource and Workforce Development Education Courses

HRWD 5113. Foundations of Human Resource & Workforce Development. 3 Hours.
An overview of human resource and workforce development (HRWD) in organizations. Focus on the integration of training and development, career development, and organization development. Topics include strategic planning for human resource and workforce development, needs assessment, program development, application of workplace learning theories, career development theories and methods, and application of organization learning theories. (Typically offered: Fall, Spring and Summer)

HRWD 5123. Career Transitions. 3 Hours.
This advanced level course is intended for career development professionals and/or subject-matter experts interested in improving their career development skills within a structured or unstructured learning environment. The emphasis in this course is on gaining career development techniques and planning formal and informal career development strategies for the individual or the organization. (Typically offered: Spring)

HRWD 5133. HRWD Diversity Issues. 3 Hours.
This course emphasis is on current trends and case studies of diversity in the workplace. Prerequisite: Graduate standing. (Typically offered: Fall)

HRWD 5213. Organizational Analysis. 3 Hours.
This course introduces the analysis process in organizations. The instruction and activities will enable students to develop skills in conducting organizational needs analysis (OA) as a basis for performance improvement in the workplace. (Typically offered: Spring and Summer)

HRWD 5223. Strategic Human Resource and Workforce Development Education. 3 Hours.
A comprehensive examination of the issues, topics, principles, theories, philosophies and concepts facing tomorrow's HRD professionals. Includes the transformation of strategic HRD; the role of strategic HRD leaders as change agents; the principles of strategic HRD; professional practice do mains of strategic HRD; organizational learning, performance, and change; and analysis, design, and evaluation of HRD interventions. Students will identify practices for informing decisions related to the formation of strategic HRD planning and implementation efforts. (Typically offered: Fall)

HRWD 5233. HRWD Employment, Legal, and Ethical Issues. 3 Hours.
This course focuses on employment, legal and ethical issues within the workplace. Students will gain knowledge that should enable them to be effective in understanding current employment concerns, equal employment opportunity (EEO) laws, and ethical practices within the workplace and how these employment concerns, laws, and practices impact society. (Typically offered: Spring)

HRWD 5313. Facilitating Learning in the Workplace. 3 Hours.
Facilitation of learning and performance improvement in the workplace. Application of instructional methods, formal and informal learning strategies, coaching, team building, and formal and informal on-the-job learning tactics. Focus on facilitating individual and group learning to affect organizational change. (Typically offered: Spring)

HRWD 5323. International HRWD. 3 Hours.
Exploration of how globalization and culture affect the workplace and the human resource development profession. Difference between global HRD and HRD practiced in a single country. Impact of culture on every aspect of HRD implementation and practice. Examination of HRD practices in different regions of the world. (Typically offered: Fall)

HRWD 5333. HRWD Technological Resources. 3 Hours.
This course provides students with the tools and abilities to evaluate and understand technology resources used in HRWD. Primary course elements are instructional design characteristics of technology, theoretical and practical uses of technology resources to facilitate and manage learning, and selecting the best or most appropriate technological resources. The course uses online technologies and learning experiences. (Typically offered: Fall)

HRWD 5433. HRWD Capstone. 3 Hours.
This course is the final course for the degree in Human Resource and Workforce Development. Students will be assessed on their overall knowledge and understanding of the field. The focus of this course will be research and analysis of classic works and current trends. Pre- or Corequisite: 27 MED credit hours completed. (Typically offered: Fall, Spring and Summer)

HRWD 571V. Independent Study. 1-3 Hour.
Independent study. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

HRWD 572V. Workshop. 1-3 Hour.
Workshop. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

HRWD 573V. Experiential Learning. 1-18 Hour.
This course is designed for the student to attain paid or unpaid experiential development. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

HRWD 6313. Project and Program Evaluation. 3 Hours.
This course is a doctoral level course designed as an introduction to project and program evaluation in human resource and workforce development. Emphasis is on (a) project design and development, (b) program development and improvement, and (c) the integration of evaluation with strategic planning and performance improvement. (Typically offered: Spring Even Years)
HRWD 6323. Qualitative Research Design and Analysis. 3 Hours.
This course is designed to introduce HRWD students to qualitative research design, data collection and data analysis. Course content includes data collection through interviews, field observation, records research, ethical issues associated with conducting research in organizational settings, and internal and external validity problems. Prerequisite: ESRM 5013 and ESRM 6403. (Typically offered: Spring Even Years)

HRWD 6333. Quantitative Research Design and Analysis. 3 Hours.
This course provides HRWD students with the tools and abilities to design and implement an original research project using quantitative measures. Primary course elements are research design application, theoretical settings of research, and nesting research within an appropriate literature base. The course uses online technologies and on-campus learning experiences. Prerequisite: ESRM 5013 and ESRM 6403. (Typically offered: Fall Odd Years)

HRWD 6343. Principles and Techniques of Research in HRWD. 3 Hours.
This course addresses the principles and techniques underlying organizational research, both experimental and non-experimental. It covers the basic philosophy of science and research methods and gives attention to the practical problems of design, data collection sampling, and data analysis. Prerequisite: ESRM 5013 and ESRM 6403. (Typically offered: Fall Even Years)

HRWD 6413. Career Theory and Decision Making. 3 Hours.
This course focuses on comprehensive understanding of career theory and decision making to enhance career development that emphasizes technology, cross-cultural issues, practical application, and the global economy. Career development in both the private and public sectors will be explored. Students will gain knowledge that should enable them to be effective in developing their careers and those of others using multicultural considerations and a global perspective. (Typically offered: Fall)

HRWD 6423. Practicum. 3 Hours.
Practicum is designed to allow doctoral students in workforce development education an opportunity to apply the theoretical knowledge, skills and abilities to training, teaching, or research projects. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HRWD 6513. Organization Development. 3 Hours.
This course teaches development of organization activities that intervene in the interaction of people systems to increase the effectiveness of using a variety of applied behavioral sciences. It includes the dynamics of organizations, the genesis of organizational theory and evolution of organizational dynamics, including examination of system structure, chaos theory, group dynamics and interaction, leadership theories, diversity issues impacting organizations, and techniques of change agent intervention. (Typically offered: Summer Odd Years)

HRWD 6523. Leadership Models and Concepts. 3 Hours.
This doctoral course concentrates on using commonly accepted principles of leadership to develop skills needed in workforce development education settings. (Typically offered: Fall Odd Years)

HRWD 6533. HRWD Ethical and Legal Issues. 3 Hours.
Focuses on ethical and legal issues within the workplace and behavioral science research. Students gain knowledge that should enable them to be effective in understanding ethical and legal issues within their workplace and how they can impact society. (Typically offered: Fall)

HRWD 6613. Learning and Teaching Theories. 3 Hours.
Models and philosophies of important theorists in the field of teaching and learning. (Typically offered: Spring Odd Years)

HRWD 6633. Technology Systems in Human Resource and Workforce Development. 3 Hours.
This course provides students with the tools and abilities to evaluate and understand technology systems in HRWD. Primary course elements are instructional design characteristics of technology systems, theoretical and practical settings that use technology systems to facilitate and manage learning, and selecting the best or most appropriate system for organizational use. The course uses online technologies and learning experiences. (Typically offered: Fall Odd Years)

HRWD 6643. History and Foundations of HRWD. 3 Hours.
This course focuses on the history of human resource development as a practice and a profession. Particular emphasis in this course is placed on the influence of philosophy on developing HRD theory and practice. As students progress through this course they can expect to gain greater understanding of how HRD developed as a profession, the historical root of its theory and practice, and an understanding of how to evaluate the philosophical assumptions of current HRD theory and practice. (Typically offered: Fall Even Years)

HRWD 6713. HRWD Curriculum Design. 3 Hours.
Determining principles of curriculum development, implementation, and evaluation with emphasis in human resource development education. (Typically offered: Summer)

HRWD 6723. Entrepreneurial Development. 3 Hours.
An advanced graduate-level course examining the history, economics, theory and practice of developing Entrepreneurial enterprises. This course presents an overview of the business and organizational systems with which an entrepreneur should be familiar. (Typically offered: Irregular)

HRWD 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Rehabilitation Education Courses
RHAB 534V. Supervised Rehabilitation Counseling. 1-3 Hour.
Gives the student practice in counseling under supervision with rehabilitation clients in selected settings and agencies. (Typically offered: Fall, Spring and Summer)

RHAB 5363. Employer Relations and Placement Practicum. 3 Hours.
Students address the placement needs of rehabilitation agencies and their clients by implementing the RehabMark approach to employer development. Prerequisite: RHAB 5493. (Typically offered: Fall, Spring and Summer)

RHAB 5373. Multicultural/Gender Issues in Rehabilitation. 3 Hours.
This course examines multicultural and gender issues of importance to rehabilitation practice and research, including study of women and men with disabilities within different minority cultures. The course uses a power analysis and a minority model of disability as a basis for understanding the relationship between disability, gender, race and ethnicity. (Typically offered: Summer)

RHAB 5383. Theories and Foundations of Addiction. 3 Hours.
This course will introduce students to the field of addictions by defining clinical models of addiction, to include alcohol and other drugs, gambling, food, sex, criminal behavior and other types of addiction. This course will also introduce students to (a) key concepts of pharmacology, assessment, and diagnosis, (b) methods of prevention, intervention, treatment and care, (c) the impact of addiction on the family system, (d) ethics principles, and (e) the 12 core functions of practice for rehabilitation and clinical mental health professionals. (Typically offered: Spring)

RHAB 5493. Vocational Evaluation and Adjustment. 3 Hours.
An in-depth examination of theories and techniques related to evaluation of vocational potential and work adjustment of people with disabilities. (Typically offered: Spring)
RHAB 5513. Professional and Legal Issues in Addiction Counseling. 3 Hours.
This course introduces students to key ethical principles and values within the field of addictions treatment and counseling. The history of the implementation of ethical principles and standards as well as specific professional codes of ethics relevant to the field of addiction (i.e., APA, CRCC, NAADAC) are thoroughly covered. (Typically offered: Irregular)

RHAB 5523. Clinical Assessment and Treatment in Addictions. 3 Hours.
This course introduces students to the process of screening, evaluation/assessment, and treatment processes within the field of addiction. This course will also address special issues related to assessment and treatment such as co-occurring disorders, cultural and gender factors, and pharmacological treatment options. (Typically offered: Irregular)

RHAB 5543. Family Constructs and Addictions Counseling. 3 Hours.
This course analyzes the impact of addictions on the family system and introduces students to the theory of marriage and family approaches used in addictions counseling. Special topics covered in the course include but are not limited to counseling women, employment issues, multicultural issues, ethics, and trauma. (Typically offered: Irregular)

RHAB 574V. Internship. 1-9 Hour.
Internship. (Typically offered: Fall, Spring and Summer)

RHAB 599V. Seminar. 1-18 Hour.
Seminar. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

RHAB 605V. Independent Study. 1-18 Hour.
Independent study. (Typically offered: Fall, Spring and Summer)

RHAB 6243. Advanced Rehabilitation Research. 3 Hours.
An advanced doctoral level course to facilitate the application of scientific values, research skills, and behavior to the generation of rehabilitation knowledge and problem solving. (Typically offered: Spring)

RHAB 625V. Teaching Internship in Rehabilitation. 1-18 Hour.
Graduate teaching experience in the rehabilitation counseling curriculum. Under the supervision of a faculty member, will participate in the development of syllabi, course materials and examinations. Will teach graduate rehabilitation courses with the faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

RHAB 6263. Clinical Supervision of Practicum Students. 3 Hours.
The study and practice of supervising master's rehabilitation counseling students in a clinical practicum setting. Prerequisite: Doctoral standing. (Typically offered: Summer)

RHAB 675V. Internship. 1-18 Hour.
Advanced supervised practice in a rehabilitation setting. (Typically offered: Fall, Spring and Summer)

RHAB 699V. Seminar. 1-18 Hour.
Discussion of pertinent topics and issues in the rehabilitation field. Prerequisite: Advanced graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

RHAB 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Secondary Mathematics (SMTH)

Maria Tjani
Graduate Coordinator

Email: mtjani@uark.edu

Department of Mathematical Sciences Website (http://fulbright.uark.edu/departments/math/)

Degrees Conferred:
M.A. in Secondary Mathematics (SMTH)
The M.A. major in Secondary Mathematics is offered through the Department of Mathematical Sciences.

M.A. in Secondary Mathematics
Requirements for the Master of Arts Degree with a Major in Secondary Mathematics: This program is designed for secondary school teachers of mathematics. It requires 30 semester hours of graduate work.

Prospective candidates for the Master of Arts degree in secondary mathematics are expected to have earned a baccalaureate degree or equivalent with a major in a mathematical science (mathematics, statistics, operations research, or computer science), engineering, or a physical science, and credit in courses equivalent to MATH 2564, MATH 3083, MATH 3113, and MATH 3773.

The program has four components in which to earn a minimum of 30 semester hours of credit:

1. Graduate course work in mathematics content and content-based pedagogy. At least 12 hours of credit in graduate course work specifically designed for preparation for teaching secondary mathematics. The content will include probability and statistics, algebra, geometry, and advanced calculus with connections to secondary school mathematics. At least one of the courses must be in probability and statistics; one in algebra; and one in advanced calculus. These courses are to be selected from:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 5013</td>
<td>Abstract Algebra with Connections to School Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5023</td>
<td>Geometry with Connections to School Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5033</td>
<td>Advanced Calculus with Connections to School Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 5053</td>
<td>Probability &amp; Statistics with Connections to School Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 504V</td>
<td>Special Topics for Teachers</td>
<td>1-6</td>
</tr>
</tbody>
</table>

Other graduate mathematics or statistics courses may be used in place of these courses with the approval of the student's committee.

2. Independent study and research in mathematics or mathematics education. Up to six hours of credit is available in independent study and research under the direction of mathematical sciences faculty. The results will be evidenced by a report roughly equivalent to a master's thesis.

3. Advanced work in professional teacher preparation. Up to six hours of credit in MATH 507V is available for advanced work in preparation for teaching AP calculus, AP statistics, International Baccalaureate (IB) mathematics, or for achieving National Board Certification in (Adolescence and Young Adulthood) Mathematics. Other professional development activities with quality control features similar to those
of the AP, IB, and National Board programs may be presented for consideration for credit. All such work must be sanctioned by the sponsoring organizations.

4. Graduate courses in education. Up to six hours of credit is available in graduate courses in education. The student’s committee must approve the courses. Recommended courses include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIED 6013</td>
<td>Curriculum Theory, Development, and Evaluation</td>
<td>3</td>

<td>Analysis of Teacher Education</td>
<td>3</td>
</tr>
<tr>
<td>CIED 6053</td>
<td>Curriculum and Instruction: Learner Assessment and Program Evaluation</td>
<td>3</td>
</tr>
</tbody>
</table>

Other graduate courses in education may be used in place of these courses with the approval of the student’s advisory committee.

If allowed by Graduate School rules, credit previously earned may be applied to the requirements for this degree with the approval of the student’s advisory committee.

Each person receiving the Master of Arts degree in secondary mathematics must pass a written examination in three of the following areas: probability and statistics; algebra; geometry; advanced calculus; and mathematics education. No student will be allowed to take the examination more than three times. Candidates will also present a portfolio describing the body of work with samples of their work as students and explanations of connections to secondary school mathematics.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

School of Social Work Website (http://fulbright.uark.edu/departments/social-work/)

Degree Conferred:
Master of Social Work (M.S.W.)

Program Description: Professional social workers promote human well-being by strengthening opportunities, resources, and capacities of people in their environments and by creating policies and services to correct conditions that limit human rights and the quality of life. The social work profession works to eliminate poverty, discrimination, and oppression. Guided by a person-in-environment perspective and respect for human diversity, the profession works to effect social and economic justice worldwide. The purpose of the graduate social work program at the University of Arkansas is to prepare advanced-level professional social workers as leader/practitioners with the capacity to address complex personal, social, community, and economic problems preventing so many of Arkansas’ people (and people across the country and globally) from moving out of poverty to self-sufficiency. The M.S.W. program is accredited by the Council on Social Work Education (CSWE).

Areas of Study: The School of Social Work offers focused studies in multi-system life-course. The multi-system life-course perspective prepares students for advanced social work practice with a range of systems (individuals, families, groups, organizations, and communities) and for practice with individuals across the life course as they interact with multiple systems.

Primary Areas of Faculty Research: Healthy aging; human behavior and the social environment theory; gerontology; addictions; health and health disparities; poverty reduction; human diversity; international social work; social work history; women and asset development; children and families; domestic violence; and human trafficking.

M.S.W. in Social Work
Admission Requirements: Admission to the University of Arkansas Graduate School as well as admission to the School of Social Work M.S.W. program is required. Admission requirements for all of the M.S.W. programs include: a baccalaureate degree with a liberal arts perspective from an accredited college or university (official transcripts must be provided). A personal statement of motivation for and experiences supporting admission to the MSW program; a social needs paper that discusses a current social need that is of concern and interest to the applicant; three professional reference letters (faculty, employers, supervisors); a basic statistics course; and computer literacy demonstrated through prior course work.

Admission to the Advanced Standing Program (on campus or online). Applicants must have a Bachelor of Social Work from a CSWE accredited University in the past six years. If the bachelor's degree was earned over six years ago, the applicant may submit a petition for exception, demonstrating a significant history of social work employment and continuing education. Applicants must have a minimum 3.00 undergraduate GPA on a four-point scale for the last 60 hours of the first bachelor's degree. Applicants are exempt from taking the GRE or MAT.

Admission to the two and three year programs. A minimum 3.00 undergraduate GPA on a four-point scale for the last 60 hours of the first bachelor's degree. Two and three year students may be considered for conditional admission with a 2.75-2.99 GPA with the submission of the Graduate Record Examination (GRE) or Millers Analogies Test (MAT) to the graduate school.

Two-year Program Option: This option is available for students without a baccalaureate degree from a program accredited by the Council on Social Work Education (CSWE). Students in the two-year option must successfully complete a total of 63 credit hours. The following are required:

<table>
<thead>
<tr>
<th>Course</th>

</tbody>
</table>
Students may electives (9 credit hours). Electives are chosen in consultation with and with approval from the student's major faculty adviser. Students may enroll in electives outside the School of Social Work, with faculty adviser approval.

Each student is required to successfully complete a population-specific practice course (3 credit hours) from either SCWK 6233 or SCWK 6243. Students may choose to take the other population-specific practice course as an elective.

Graduate social work electives include:

SCWK 5143 Global Social and Economic Justice and Oppression 3
SCWK 5153 Children, Youth, and Family 3
SCWK 5163 Social Work Management, Administration and Supervision 3
SCWK 5173 Advanced Practice with Families and Couples 3
SCWK 5183 Advanced Practice with Individuals 3
SCWK 5193 Advanced Practice and Policy in Aging 3
SCWK 5213 Advanced Practice in Behavioral and Mental Health 3
SCWK 5253 Spirituality and Social Work Practice 3
SCWK 5343 Advanced Practice with Groups 3

Elective topics often change from semester to semester based on faculty expertise and student interest. Therefore, it is not possible to guarantee specific electives.

Other Requirements: M.S.W. students are required to complete a capstone paper and presentation. The capstone project is a research experience in the area of practice/program evaluation, guided and evaluated by a panel of faculty and senior social work practitioners from the community. Students may choose instead, with faculty approval, to complete a thesis. The thesis option is guided by the student's thesis committee, resulting in a final paper and oral defense. Both options are completed in conjunction with the three-hour Research and Technology course. Only those choosing the thesis option must enroll in thesis hours in their advanced year.

John M. Gallagher
Faculty Adviser
479-575-2368
Email: jmgallag@uark.edu

The Department of Social Work and the School of Law cooperate in offering a dual degree program that allows a student to pursue the Master of Social Work and the Juris Doctor degrees concurrently in order to achieve the following program objectives:

1. To educate practitioners in social work and law to be able to effectively utilize the problem-solving strategies and techniques of both disciplines to the benefit of their clients, their colleagues, and the community.
2. To provide the core curriculum necessary for the education of students in each profession while enabling them to focus on areas of knowledge and practice that correspond to their professional goals.
3. To facilitate integration of the two disciplines through experiential learning opportunities.
4. To promote a philosophy of interdisciplinary collaboration between law and social work professionals and create a collaborative learning environment.

Advanced Standing Option: Students with a baccalaureate degree from a program accredited by CSWE are eligible to apply for Advanced Standing. This option requires a total of 39 credit hours including SCWK 5013, SCWK 5442, SCWK 5444, and the advanced course work listed above for the two- and three-year options. Students may complete the advanced standing option on campus or online.

Electives: Each student is required to successfully complete three electives (9 credit hours). Electives are chosen in consultation with and with approval from the student’s major faculty adviser. Students may complete the required foundation courses:

Three-year Extended Program Option: This option is available for students without a baccalaureate degree from a program accredited by the Council on Social Work Education (CSWE). Students in the three-year extended program must successfully complete a total of 63 credit hours. The following are required foundation courses:

Social Work Practice III 3
SCWK 5003 Foundations of Culturally Competent Social Work Practice 3
SCWK 5013 Bridge Course: Evidenced Based Social Work 3
SCWK 5412 Foundation Field Seminar 2
SCWK 5434 Foundation Field Internship 4

The following are required advanced courses:

SCWK 5073 Social Work Research and Technology II 3
SCWK 6003 Advanced Social Work Practice Using the MSLC Perspective 3
SCWK 6442 Advanced Field Seminar I 2
SCWK 6444 Advanced Field Internship I 4
SCWK 6452 Advanced Field Seminar II 2
SCWK 6454 Advanced Field Internship II 4

Three-year Extended Program Option: This option is available for students without a baccalaureate degree from a program accredited by the Council on Social Work Education (CSWE). Students in the three-year extended program must successfully complete a total of 63 credit hours. The following are required foundation courses:

Social Work Practice III 3
SCWK 5003 Foundations of Culturally Competent Social Work Practice 3
SCWK 5013 Bridge Course: Evidenced Based Social Work 3
SCWK 5412 Foundation Field Seminar 2
SCWK 5434 Foundation Field Internship 4

The following are required advanced courses:

SCWK 5073 Social Work Research and Technology II 3
SCWK 6003 Advanced Social Work Practice Using the MSLC Perspective 3
SCWK 6442 Advanced Field Seminar I 2
SCWK 6444 Advanced Field Internship I 4
SCWK 6452 Advanced Field Seminar II 2
SCWK 6454 Advanced Field Internship II 4

Please note that the three-year extended program accepts students every other year (e.g. Fall 2009, 2011, 2013, 2015, etc.)
5. To prepare practitioners who have a commitment to a human condition that is free from violence, oppression, and discrimination, and that protects and promotes the development of all people.

**J.D./M.S.W. Program**

The Juris Doctor/Master of Social Work dual degree is awarded after completion of a four-year integrated course of study. This eliminates approximately one year of study, while meeting all accreditation requirements of the American Bar Association and Council on Social Work Education.

Upon completion of the dual degree, students have earned a total of 135 credit hours (as opposed to 153 credit hours if the degrees are earned separately). A total of 12 hours credit earned in the M.S.W. program count toward completion of the J.D. degree. A total of 6 hours credit earned in the J.D. program count toward completion of the M.S.W. degree. In order to receive dual credit, minimum grade standards for each program must be met.

Students who do not maintain the academic or ethical standards of either degree program may be terminated from the dual degree program. Students in good standing in one degree program but not the other may be allowed to continue in the program in which they have good standing and must meet the degree requirements of that program. If for any reason a student admitted to the dual degree program does not complete the M.S.W. degree, the student cannot count the 12 hours of M.S.W. courses toward the J.D. degree. If for any reason a student admitted to the dual degree program does not complete the J.D. degree, the elective policy for the School of Social Work applies.

To be eligible for admission to the J.D./M.S.W. Dual Degree Program, students must apply separately and be admitted to the master’s program at the School of Social Work, to the juris doctor program at the School of Law, and to the joint program. As such, applicants must meet all of the requirements for admission to each program. Upon application to the J.D./M.S.W. dual degree, the applicant shall provide a statement of intent for admission that includes a brief explanation of the reasons for pursuing this dual degree program as well as goals upon completion of the program. Each degree will be conferred when the student has met all the requirements of that degree.

Should a student enter one program and later become aware of the availability of the joint program, the student must be admitted to both programs and to the joint program during his or her first year of class work in the program of original enrollment.

**Graduate Faculty**

Bryson, Sarah J., M.S.W. (Colorado State University), Lecturer, 2014.
Christy, Kameri, Ph.D., M.S.W. (University of Kansas), B.A. (University of Missouri-Kansas City), Professor, 2003.
Clingan, Shelley Diane, M.S.W. (University of Arkansas at Little Rock), Lecturer, 2014.
Collie, Sara J., M.S.W. (University of Arkansas at Little Rock), B.A. (University of Arkansas), Associate Professor, 2011.
Dunavant, Kristen, M.S.W. (Augustsburg College), B.S.W. (St. Olaf College), Lecturer, 2017.
Ferguson, Alisha Juanelle, Ph.D., M.S., B.A. (University of Texas Arlington), Clinical Assistant Professor, 2008.
Franklin, Carly T.S., M.S.W. (University of Arkansas), Clinical Assistant Professor, 2014.
Gallagher, John M., Ph.D., M.S.W. (Arizona State University), B.A. (State University of New York at Plattsburgh), Assistant Professor, 2016.
Kimbrough, Hanna A.D., M.S.W. (University of Arkansas), Lecturer, 2014.
Murphy-Erby, Yvette, Ph.D. (University of North Carolina at Greensboro), M.S.W. (University of North Carolina, Chapel Hill), B.A. (University of North Carolina, Charlotte), Professor, 2004.
Scott, Adrienne R., M.S.W. (University of Texas, Arlington), B.A. (University of Arkansas), Lecturer, 2014.
Shobe, Marcia A., Ph.D. (University of Kansas), M.S.W. (University of Hawaii at Manoa), B.A. (State University of New York at Plattsburgh), Professor, 2007.
Shuler, Kimberly M., M.S.W. (University of Arkansas at Little Rock), B.S.W. (University of Arkansas), Instructor, 2015.
Sites, Joanna, M.S.W., B.A. (University of Arkansas), Lecturer, 2016.
Spears, Kari R., M.S.W., B.A. (University of Arkansas), Lecturer, 2016.
Stauss, Kim, Ph.D. (University of Utah), M.S.W. (California State University at Sacramento), B.S. (Stephen F. Austin State University), Associate Professor, 2006.
Thomas, Johanna, Ph.D., M.S.W. (Louisiana State University), B.A. (University of Akron), Assistant Professor, 2015.
Tonymon, Susan, M.S.W. (University of Arkansas at Little Rock), B.S.W. (Arkansas State University), Instructor, 2014.
Valandra, Ph.D., M.S.W. (University of Minnesota), M.B.A., B.S. (University of Nebraska at Omaha), Assistant Professor, 2013.

**Courses**

SCWK 5003. Foundations of Culturally Competent Social Work Practice. 3 Hours.
The purpose of this course is the acquisition and demonstration of beginning graduate-level social work values and ethics, knowledge, and skills necessary for cultural competence in work with individuals, families, groups, organizations, communities, and global contexts. A multi-systems life-course conceptual framework is used. Prerequisite: Admission to the two-year or part-time MSW program. (Typically offered: Fall)

SCWK 5013. Bridge Course: Evidenced Based Social Work. 3 Hours.
This course prepares MSW students to transition from the foundation course to the advanced concentration courses. Students will become familiar with the mission and conceptual framework underlying the advanced concentration and develop beginning knowledge of traditional and alternative approaches to client system assessment. Prerequisite: Admission into the advanced standing MSW program or completion of foundation courses. (Typically offered: Summer)

SCWK 505V. Special Topics in Social Work. 1-6 Hour.
(Formerly SCWK 405V.) Comprehensive study of various topics of importance in contemporary social welfare and social work practice. Graduate degree credit will not be given for both SCWK 405V and SCWK 505V. (Typically offered: Irregular) May be repeated for degree credit.

SCWK 5073. Social Work Research and Technology II. 3 Hours.
This course is intended to build the advanced research skills necessary to develop a research proposal and complete a thesis or capstone project. Students will plan the project, collect and analyze data and write a research report of their findings. Projects will focus on systematic evaluation of service delivery and personal professional practice. Corequisite: SCWK 6000L. Prerequisite: Completion of year one for two-year students or summer semester for advanced standing students. (Typically offered: Fall)

SCWK 5083. Social Work With Elders. 3 Hours.
(Formerly SCWK 4183.) Survey of theories of gerontology, service programs and unmet needs of the aging citizen. Graduate degree credit will not be given for both SCWK 4183 and SCWK 5083. (Typically offered: Irregular)
SCWK 5093. Human Behavior and the Social Environment I. 3 Hours. 
(Formerly SCWK 4093.) Provides a conceptual framework for knowledge of human behavior and the social environment with a focus on individuals. Social systems, life-course, assets, and resiliency-based approaches are presented. Special attention is given to the impact of discrimination and oppression on the ability to reach or maintain optimal health and well-being. Graduate degree credit will not be given for both SCWK 4093 and SCWK 5093. Prerequisite: COMM 1313, PSYC 2003, SOCI 2013, SCWK 2133, and SCWK 3193 and (BIOL 1543 and BIOL 1541L, or ANTH 1013 and ANTH 1011L). (Typically offered: Fall and Spring)

SCWK 5103. Human Behavior and the Social Environment II. 3 Hours. 
(Formerly SCWK 4103.) This course applies the basic framework for creating and organizing knowledge of human behavior and the social environment acquired in HBSE I to the understanding of family, group, organizational, community, and global systems. Attention is given to discrimination, oppression, the impact of technology, and poverty at each system level. Graduate degree credit will not be given for both SCWK 4103 and SCWK 5103. Prerequisite: SCWK 4093 or SCWK 5093 (formerly SCWK 4093) and SCWK 4153 or SCWK 5353 (formerly SCWK 4153). (Typically offered: Fall and Spring)

SCWK 5143. Global Social and Economic Justice and Oppression. 3 Hours. 
The role and responsibilities of the social work profession are examined in an international comparative context. Particular emphasis is given to social workers' responsibilities to advance global social and economic justice and reduce human oppression through community, social, economic, and organizational development strategies. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5153. Children, Youth, and Family. 3 Hours. 
This course focuses on the development, revision, and impact of policy and practice in children, youth, and family services. Current issues in policy and practice will be examined. Students will interact with community agencies and utilize class assignments to advocate improvements in current policy and practice. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5163. Social Work Management, Administration and Supervision. 3 Hours. 
This course develops advanced skills in management, administration, and supervision in social work organizations. Emphasis is placed on developing leadership skills in ethics, budgeting, finance, resource development, information management, evaluation, staff hiring, supervision and development, and the use of technology in organizational leadership, development, and maintenance. Prerequisite: Graduate standing and SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5173. Advanced Practice with Families and Couples. 3 Hours. 
The purpose of this course is to provide advanced understanding of the knowledge, skills and values needed to assess and intervene effectively with traditional and non-traditional families and couples. The course will examine social systems and life-course strengths approaches to understand how families and couples function. Students will design interventions. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5183. Advanced Practice with Individuals. 3 Hours. 
This course develops advanced skills in social work practice on a micro level. Students learn to analyze and compare practice models. They gain skills in selecting a practice model and integrating multiple models based on client needs. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5193. Advanced Practice and Policy in Aging. 3 Hours. 
This course focuses on social work practice with, and policies for, older persons. Current, past, and future practices and policies for older persons across systems and the life course are explored. Emphasis is placed on the influences of personal, social, economic, and cultural diversity on the well-being of older persons. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5213. Advanced Practice in Behavioral and Mental Health. 3 Hours. 
This advanced course prepares students to identify mental disorders, plan intervention strategies with clients from a strengths perspective, and understand mental health programs through which services are delivered. Differential diagnosis and the impact of socioeconomic status, gender, race, and sexual orientation on diagnosis and treatment decisions are addressed. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5253. Spirituality and Social Work Practice. 3 Hours. 
This course prepares students to respond competently and ethically to diverse spiritual and religious perspectives. Utilizing social work ethics and values as a guide, students will develop a comparative, critically reflective approach to practice. Prerequisite: SCWK 4103 or SCWK 5103 (formerly SCWK 4103) or SCWK 5003 or SCWK 5013. (Typically offered: Fall and Spring)

SCWK 5273. Social Work Research and Technology I. 3 Hours. 
(Formerly SCWK 4073.) An overview of forms and sources of social work research including existing social data, techniques for collecting original social data, and techniques of organization, interpretation, and presentation of data. Students will also become proficient in the use of current technology for social work research and practice. Graduate degree credit will not be given for both SCWK 4073 and SCWK 5273. Prerequisite: SCWK 4093 or SCWK 5093 (formerly SCWK 4093) and SCWK 4153 or SCWK 5353 (formerly SCWK 4153). Pre- or Corequisite: One of the following: STAT 2303, SOCI 3303 and SOCI 3301L, PSYC 2013, or ESRM 2403. (Typically offered: Fall and Spring)

SCWK 5333. Social Work Practice I. 3 Hours. 
(Formerly SCWK 4333.) This is the first in the sequence of practice courses introducing students to the generalist approach to micro social work. This course focuses on developing a solid foundation for practice with individuals, including learning basic communication and helping skills, values, principles, and the connection of theory to practice. Graduate degree credit will not be given for both SCWK 4333 and SCWK 5333. Prerequisite: SCWK 4093 or SCWK 5093 (formerly SCWK 4093) and SCWK 4153 or SCWK 5353 (formerly SCWK 4153). Pre- or Corequisite: SCWK 4103 or SCWK 5103 (formerly SCWK 4103). (Typically offered: Fall and Spring)

SCWK 5343. Advanced Practice with Groups. 3 Hours. 
This course provides advanced knowledge, skills, and values needed to assess and intervene effectively with populations seen in the social work practice of group therapy. This course examines group dynamics, life-course and strengths perspectives, and client-centered assessment of needs and their application in agency settings. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5353. Social Welfare Policy. 3 Hours. 
(Formerly SCWK 4153.) Describes and analyzes the policies and services rendered by local, state, regional, national, and international agencies as well as the policy implications for social work practice. Students prepare to advocate social policy changes designed to improve social conditions, promote social and economic justice, and to empower at-risk populations. Graduate degree credit will not be given for both SCWK 4153 and SCWK 5353. Prerequisite: COMM 1313, PLSC 2003, SCWK 2133, and SCWK 3193. (Typically offered: Fall and Spring)

SCWK 5412. Foundation Field Seminar. 2 Hours. 
A required course for MSW students without an accredited undergraduate degree in social work. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to learn peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 5434. (Typically offered: Spring and Summer)
SCWK 5434. Foundation Field Internship. 4 Hours.
This course is required of all graduate students entering the MSW program without an accredited undergraduate degree in social work. Minimum of 330 clock hours of agency-based professional social work practicum experience, supervised by a licensed MSW, is required. Corequisite: SCWK 5412. Prerequisite: SCWK 5003, SCWK 5333 (formerly SCWK 4333), SCWK 5273 (formerly SCWK 4073), SCWK 5093 (formerly SCWK 4093), and SCWK 5353 (formerly SCWK 4153). (Typically offered: Spring and Summer)

SCWK 5442. Field Seminar III. 2 Hours.
This seminar is required of all graduate students entering the MSW program with advanced standing. Students integrate classroom content with experiences in the field, learn peer supervision and consultation, and learn from the experience of other students in the field. Corequisite: SCWK 5444. Prerequisite: Admission to graduate program with advanced standing. (Typically offered: Summer)

SCWK 6003. Advanced Social Work Practice Using the MSLC Perspective. 3 Hours.
This course focuses on the development, revision, and impact of practice with children and youth from a Multi-Systems Life Course (MSLC) perspective. Historical trends as well as current practices will be examined with a focus on learning and improving social work practice skills. Prerequisite: SCWK 6003. (Typically offered: Spring)

SCWK 6233. Advanced Social Work Practice With Children And Youth Using the MSLC Perspective. 3 Hours.
This course focuses on the development, revision, and impact of practice with children and youth from a Multi-Systems Life Course (MSLC) perspective. Historical trends as well as current practices will be examined with a focus on learning and improving social work practice skills. Prerequisite: SCWK 6003. (Typically offered: Spring)

SCWK 6423. Advanced Social Work Practice With Adults Using the MSLC Perspective. 3 Hours.
This course focuses on the development, revision, and impact of practice with adults from a Multi-Systems Life Course (MSLC) perspective. Historical trends as well as current practices will be examined with a focus on learning and improving social work practice skills. Prerequisite: SCWK 6003. (Typically offered: Spring)

SCWK 6444. Advanced Field Internship I. 4 Hours.
This is the first of two advanced field internships required of all graduate students in the MSW program. A minimum of 330 clock hours of agency-based professional social work practicum experience, supervised by a licensed MSW, is required. Corequisite: SCWK 6442. Prerequisite: SCWK 5434 or SCWK 5444. (Typically offered: Fall)

SCWK 6444. Advanced Field Internship II. 4 Hours.
This is the second of two advanced field internships required of all graduate students in the MSW program. A minimum of 330 clock hours of agency-based professional social work practicum experience, supervised by a licensed MSW, is required. Corequisite: SCWK 6442. Prerequisite: SCWK 5434 or SCWK 5444. (Typically offered: Fall)

SCWK 6452. Advanced Field Seminar II. 2 Hours.
This is the second of two advanced field seminars required of all students in the MSW program. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to demonstrate peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 6444. Prerequisite: SCWK 5412 or SCWK 5442. (Typically offered: Fall)

SCWK 6454. Advanced Field Internship II. 4 Hours.
This is the second of two advanced Field Internship courses required of all graduate students in the MSW program. A minimum of 330 clock hours of agency-based professional social work practicum experience supervised by a licensed MSW is required. Corequisite: SCWK 6452. Prerequisite: SCWK 6442. (Typically offered: Spring)

SCWK 5543. Social Work Practice II. 3 Hours.
(Formerly SCWK 4343.) This is the second course in the social work practice sequence, emphasizing theories, models, and techniques related to generalist practice with families and groups. This course elaborates on system theory as it impacts groups and families, and use of experiential teaching methods. Graduate degree credit will not be given for both SCWK 4343 and SCWK 5543. Prerequisite: SCWK 4103 or SCWK 5103 (formerly SCWK 4103) and SCWK 4333 or SCWK 5333 (formerly SCWK 4333). (Typically offered: Fall and Spring)

SCWK 5733. Social Work Practice III. 3 Hours.
(Formerly SCWK 4733.) Students acquire and practice the skills, knowledge, and values necessary for culturally competent generalist social work practice with organizations and communities. Special attention is given to the implications of discrimination and oppression for attaining social and economic justice. Graduate degree credit will not be given for both SCWK 4733 and SCWK 5733. Prerequisite: SCWK 4333 or SCWK 5333 (formerly SCWK 4333). Pre- or Corequisite: SCWK 4103 or SCWK 5103 (formerly SCWK 4103) and SCWK 4343 or SCWK 5543 (formerly SCWK 4343). (Typically offered: Fall and Spring)

SCWK 596V. Independent Study. 1-6 Hour.
Independent study designed to meet the particular needs of individual graduate students. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SCWK 6000L. Thesis Laboratory. 0 Hours.
This laboratory is required for completion of the thesis, which is developed through components of the graduate Research & Technology sequence. Other courses in the graduate curriculum provide support for the conceptualization and development of the thesis. (Typically offered: Field)

SCWK 6442. Advanced Field Seminar I. 2 Hours.
The first of two advanced field seminars required of all students in the MSW program. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to demonstrate peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 6444. Prerequisite: SCWK 5412 or SCWK 5442. (Typically offered: Fall)

SCWK 6444. Advanced Field Seminar II. 2 Hours.
This is the second of two advanced field seminars required of all students in the MSW program. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to demonstrate peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 6444. Prerequisite: SCWK 5412 or SCWK 5442. (Typically offered: Spring)

SCWK 6733. Social Work Practice III. 3 Hours.
This course focuses on the development, revision, and impact of practice with adults and children and youth from a Multi-Systems Life Course (MSLC) perspective. Historical trends as well as current practices will be examined with a focus on learning and improving social work practice skills. Prerequisite: SCWK 6003. (Typically offered: Spring)

Sociology and Criminology (SOCl)

Sociology and Criminal Justice Website (https://fulbright.uark.edu/departments/sociology/)

Degree Conferred:
M.A. in Sociology (SOCl)

Primary Areas of Faculty Research:
Community; crime, health and well-being; terrorism; social inequality, organization and change; social data analytics using qualitative and quantitative methods.
Areas of Concentration: General sociology and criminology.

M.A. in Sociology with General Sociology Concentration

Application Requirements for the MA in Sociology Program:
Applicants for graduate studies in sociology must be admitted to the Graduate School and must also submit the following: 1) at least two letters of recommendation from people who can judge the applicant’s academic potential as a graduate student; 2) a sample of written academic work (i.e., a research paper); 3) a one page statement in which the applicant discusses the educational objectives sought by entering our graduate program; 4) satisfactory GRE scores.

Prerequisites to Degree Program: Prior undergraduate work in social theory, research methods, statistics, and writing is considered necessary for successful performance at the graduate level. SOCI 3303 (or an approved equivalent), SOCI 3313 and SOCI 3423 (or an approved equivalent) are required to eliminate deficiencies. Additionally, students applying to the criminology concentration must show prior undergraduate work in introductory criminal justice or criminology. SOCI 3023/CRIM 3023 (or an approved equivalent) is required to eliminate deficiencies for students pursuing the criminology concentration. Undergraduate deficiencies must be removed by taking the appropriate undergraduate courses during the first twelve hours of graduate work or the first time the courses are offered.

Requirements for the Master of Arts Degree: (Minimum 32 hours.)

Total Hours 12

In addition to these common core courses, the courses required in a specific concentration, and the six hours of specialization-specific restricted electives, the student must take sufficient hours of electives to reach 32 semester hours total. The Department of Sociology and Criminology retains the right to make exceptions to the list of concentration-specific electives. Such exceptions must be approved by the Graduate Committee and authorized in writing by the Graduate Director. A maximum of three elective credit hours may be taken at the 4000 level without prior approval by the Graduate Committee. Students may apply three hours of independent study toward the degree provided that a research proposal is approved by the instructor prior to enrollment in the course. The student’s adviser must authorize courses outside of the department. Except for rare circumstances, no more than three hours of credit outside of the department will count for the degree.

The Department of Sociology and Criminology offers a thesis and non-thesis option. Completion of the program for all students is contingent upon passing a comprehensive examination covering major course work.

Thesis Option: Students must take 26 hours of course work and six hours of thesis credit. All M.A. candidates in this option are required to develop and present a prospectus of the thesis to their thesis committee. They must also write and orally defend their thesis, including research methods, theory, and the area of thesis concentration.

Non-Thesis Option: Students must take 32 hours of course work. Students must select an area of study as listed in the departmental graduate handbook. Under this option, students must take a written comprehensive examination in theory, research methods, and the area of study.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

M.A. in Sociology with Criminology Concentration

Application Requirements for the MA in Sociology Program:
Applicants for graduate studies in sociology must be admitted to the Graduate School and must also submit the following: 1) at least two letters of recommendation from people who can judge the applicant’s academic potential as a graduate student; 2) a sample of written academic work (i.e., a research paper); 3) a one page statement in which the applicant discusses the educational objectives sought by entering our graduate program; 4) satisfactory GRE scores.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Graduate Faculty

Adams, Douglas James, Ph.D., M.A. (University of Arizona), Associate Professor, 1995.

Barnum, Anthony Justin, Ph.D. (Howard University), M.A. (University of Arkansas), B.A. (Hendrix College), Visiting Assistant Professor, 2016.

Bustamante, Juan Jose, Ph.D. (Michigan State University), M.S., B.A. (University of Texas Pan American), Associate Professor, 2012.

Drawve, Grant R., Ph.D. (University of Arkansas at Little Rock), M.A., B.A. (Southern Illinois University), Assistant Professor, 2016.

Engen, Mindy Sue, Ph.D., M.A. (Pennsylvania State University), B.S. (Georgia State University), Professor, 2005.

Engen, Rodney L., Ph.D. (University of Washington), M.S., B.S. (University of Wisconsin-Milwaukee), Associate Professor, 2009.

Fitzpatrick, Kevin M., Ph.D. (State University of New York at Albany), M.A. (University of South Carolina at Columbia), B.A. (Susquehanna University), University Professor, 2005.

Gruenwald, Jeffrey A., Ph.D. (Michigan State University), Associate Professor, 2019.

Harris, Casey Taggart, Ph.D., M.A. (Pennsylvania State University), B.S. (Texas A&M University), Associate Professor, 2011.

Hearne, Brittany Nicole, Ph.D., M.A., (Vanderbilt University), B.S. (Texas A&M), Assistant Professor, 2018.

Holyfield, Lori C., Ph.D. (University of Georgia), M.A., B.S.E. (University of Arkansas), Professor, 1995.

Jackson, Brandon, Ph.D. (Florida State University), Associate Professor, 2013.

Koski, Patricia, B.A., M.A., Ph.D. (Washington State University), Associate Professor, 1984.

Morimoto, Shauna, Ph.D., M.S. (University of Wisconsin-Madison), B.A. (University of Pittsburgh), Associate Professor, 2008.

Park, Kiwoong, Ph.D. (University of Albany), Assistant Professor, 2019.

Saban, Lauren, Ph.D. (University of Tennessee-Knoxville), M.S/M.A. (Marshall University), B.S., A.A. (West Virginia University), Clinical Assistant Professor, 2014.

Schwab, Bill, Ph.D., M.A. (The Ohio State University), M.A. (University of Akron), B.A. (Miami University), University Professor, 1976.

Shields, Christopher A., Ph.D., J.D. (University of Arkansas), M.A. (Arkansas State University), Clinical Assistant Professor, 2003.

Smith, Brent Lamar, Ph.D., M.S. (Purdue University), B.A. (Ouachita Baptist University), Distinguished Professor, 2003.

Thomas, Shaun A., Ph.D., M.A. (Louisiana State University), B.A. (University of Akron), Associate Professor, 2015.

Worden, Steven K., Ph.D. (University of Texas at Austin), M.A., B.A. (Portland State University), Associate Professor, 1986.

Yang, Song, Ph.D., M.S. (University of Minnesota-Twin Cities), M.A. (Nankai University, China), B.A. (Branch College of Nankai, China), Professor, 2002.

Zajicek, Anna, Ph.D. (Virginia Polytechnic Institute and State University), M.S., B.S. (University of Silesia, Poland), Professor, 1994.

Courses

SOCI 5001. Proseminar. 1 Hour.
An informal forum for graduate students and faculty to present and discuss ongoing research interests as well as the current state of the discipline. Prerequisite: Graduate standing. (Typically offered: Fall)

SOCI 500V. Advanced Problems in Sociology. 1-3 Hour.
Individual research on problems or problem areas. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

SOCI 5013. Advanced Social Research. 3 Hours.
An examination of experimental and quasi-experimental designs used in the analysis of sociological data with focus upon appropriate units of analysis and design selection, sampling, interview techniques, and questionnaire construction. Prerequisite: Graduate standing or instructor consent. (Typically offered: Fall)

SOCI 503V. Special Topics. 1-6 Hour.
Designed to cover specialized topics not usually presented in depth in regular courses. Prerequisite: Graduate Standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
SOCI 5043. Public Policy, Children and Families. 3 Hours.
The study of the impact of public policy on children and families, and the ways in which policies are created, modified, and changed. Includes the history of public policy concerning children and families. Prerequisite: Graduate standing. (Typically offered: Irregular)

SOCI 5083. Applied Qualitative Research. 3 Hours.
An introduction to research strategies including intensive interviewing, participant observational fieldwork, content analysis, historical analysis, and comparative research. Emphasis on the practical aspects of designing and executive research involving multiple methods of data gathering and analysis. Prerequisite: Graduate standing. (Typically offered: Fall)

SOCI 5113. Seminar in Social Inequality. 3 Hours.
Major theories of stratification; types of stratification systems, comparisons of modern and traditional systems; emergent trends. Prerequisite: Graduate standing. (Typically offered: Irregular)

SOCI 5133. The Community. 3 Hours.
A sociological analysis of the theory, methods and materials used in the study of the community. Prerequisite: Graduate standing. (Typically offered: Irregular)

SOCI 5153. Sociological Perspective on Social Psychology. 3 Hours.
Principles, concepts and methods used in analyzing effects of social structures and processes on the self and interaction. Topics include exchange theory, role analysis, symbolic interactionism, social construction of reality, socialization, interpersonal competence, organizational and leadership development, social dislocation, and stress. Prerequisite: Graduate standing. (Typically offered: Irregular)

SOCI 5233. Theories of Deviance. 3 Hours.
A survey of major theories-classical, developmental, ecological, functionalist, conflict, subcultural, control, and phenomenological-explaining morally condemned differences in society. Particular emphasis is on practical implications of each perspective for policy and social control. Prerequisite: Graduate standing. (Typically offered: Irregular)

SOCI 5253. Classical Social Theory. 3 Hours.
A survey of social theory up to the late 20th century. An introduction to the classical sociological themes that continue to inform research, analysis, and policy formation. Major issues will include the relationship between the individual and the community, and the sources of stability, conflict, and change. Prerequisite: Graduate standing. (Typically offered: Fall)

SOCI 5263. Contemporary Social Theory. 3 Hours.
Analysis of contemporary social theories & major theoretical debates. Emphasis is on critical evaluation & application of theoretical perspectives to current social issues affecting families and communities. Prerequisite: Graduate standing. (Typically offered: Spring)

SOCI 5311L. Applied Data Analysis Laboratory. 1 Hour.
Provides instruction for data transformations required for the advanced statistical procedures used in the Statistical Package for the Social Sciences (SPSS). Also provides instruction in the use of advanced statistical procedures covered in SOCI 5313. Prerequisite: Graduate standing. (Typically offered: Spring)

SOCI 5313. Applied Data Analysis. 3 Hours.
Covers basic concepts and applications of the general linear model to a variety of sociological research issues and problems. Also provides an introduction to binary dependent and multivariate categorical data analysis for sociological research. Prerequisite: Graduate standing. Familiarity with statistical computer programs is assumed. (Typically offered: Spring)

SOCI 5413. Seminar in Criminological Theory. 3 Hours.
An examination of the causation of crime, focusing primarily on sociological theories. Prerequisite: Graduate standing. (Typically offered: Spring)
instrumentation and design, astrobiology, applications to Mars, Venus, Pluto, and ice worlds.

**M.S. in Space and Planetary Sciences**

**Admission to Degree Program:** Students wishing to apply for admission to the graduate degrees in space and planetary sciences should contact the Space and Planetary Science Center’s graduate coordinator at jcdixon@uark.edu. Applicants should prepare to have transcripts, two letters of recommendation, and a statement of purpose sent to the center. Applicants are encouraged to submit scores from the Graduate Record Examination, including the writing score.

**Basic Requirements for the Master’s Degree:** At least 24 semester hours of courses plus at least six hours of SPAC 600V are required for a total of at least 30 hours beyond the baccalaureate degree. Students are required to take the following courses:

- **Non-Core Courses**
  - SPAC 5211 SPAC Proseminar 1

- **Core Courses**
  - Select three of the following: 3
    - SPAC 5033 Astrophysics I: Stars and Planetary Systems
    - SPAC 5313 Planetary Atmospheres
    - SPAC 5413 Planetary Geology
    - SPAC 5553 Astrobiology
    - SPAC 5613 Astronautics

- **Space and Planetary Electives**
  (see list below) - Must take at least three courses (10 hours). 10
  Substitutions may be made with the approval of the committee.

- **Other Electives**
  - SPAC 5161 Seminar (must take every semester) 4

- **Thesis**
  - SPAC 600V Master’s Thesis 6

- **Total Hours**
  - 24

**Requirements for the Doctor of Philosophy Degree:** Students are required to take a minimum of 72 hours beyond the baccalaureate degree to include a minimum 34 hours of required course work and 18 hours of SPAC 700V. Course requirements are given below.

- **Non-Core Courses**
  - SPAC 5211 SPAC Proseminar 1
  - SPAC 5123 Internship 3

- **Core Courses**
  - Select four of the following: 12
    - SPAC 5033 Astrophysics I: Stars and Planetary Systems
    - SPAC 5313 Planetary Atmospheres
    - SPAC 5413 Planetary Geology
    - SPAC 5553 Astrobiology
    - SPAC 5613 Astronautics

- **Space and Planetary Electives**
  (see list below) – Must take at least three courses. Substitutions may be made with the approval of the committee. 9

- **Other Electives**
  - SPAC 5161 Seminar (must take every semester) 4

- **Dissertation**
  - SPAC 700V Doctoral Dissertation 18

- **Total Hours**
  - 47

**Space and Planetary Electives**

Note: Other courses may count as electives with the approval of the student’s research adviser and committee. No more than two 4000-level courses may be counted toward the Ph.D. degree.

- **Planetary Astronomy**
  - ASTR 5043 Astrophysics II: Galaxies and the Large-Scale Universe 3
  - CHEM 5263 Nuclear Chemistry 3
  - CHEM 5273 Cosmochemistry 3
  - PHYS 5513 Atomic and Molecular Physics 3

- **Planetary Geology**
  - GEOS 5123 Stratigraphic Principles and Practice 3
  - GEOS 5423 Remote Sensing of Natural Resources 3
  - GEOS 560V Graduate Special Problems 2-6

- **Planetary Atmospheres**
  - GEOS 5353 Meteorology 3
  - GEOS 5363 Climatology 3
  - GEOS/ENDY 5113 Global Change 3

- **Origin and Evolution of Life**
  - BIOL 4233 Genomics and Bioinformatics 3
  - BIOL 4263 Cell Physiology 3
  - BIOL 4353 Ecological Genetics/Genomics 3
  - BIOL 5463 Physiological Ecology 3
  - CHEM 5813 Biochemistry I 3
  - CHEM 5843 Biochemistry II 3

- **Astronautics and Orbital Mechanics**
  - CSCE 5043 Advanced Artificial Intelligence 3
MEEG 4233 Microprocessors in Mechanical Engineering I: Electromechanical Systems 3
MEEG 5833 Aerospace Propulsion 3
MEEG 5273 Electronic Packaging 3

Additional Requirements: Students are required to complete a thesis or dissertation describing original research work in the space and planetary sciences that must be presented to and successfully defended before their committee. In addition, Ph.D. students must pass a candidacy examination.

The Ph.D. candidacy examination is administered by the student’s committee and is designed to test the student's ability to assimilate, integrate and interpret material learned in the core required courses:

SPAC/ASTR 5033 Astrophysics I: Stars and Planetary Systems 3
SPAC/GEOS 5313 Planetary Geology 3
SPAC 5413 Planetary Geology 3
SPAC/CHEM/BIOL 5513 Biochemical Evolution 3
SPAC 5613 Astronautics 3

While at the same time having a depth of understanding in the area of the student’s research. Thus the candidacy examination will be in two parts: (1) a 2500-word integrative essay on a theme chosen by the committee, and (2) an oral defense of the thesis before the committee. Part (1) will be assigned six weeks before the candidacy defense and shall be presented to the committee two weeks before that defense. The defense will be held at a date determined by the committee but usually before the end of the student’s second year in graduate school. The committee will judge the examination as pass/fail and in the case of failure – and at the discretion of the committee – a second attempt to pass the qualifying examination is permitted within a period of time determined by the committee.

Students should also be aware of Graduate School requirements with regard to doctoral degrees (p. 461).

Chevrier, Vincent Francois, Ph.D. (CEREGE, Aix-en-Provence, France), M.E.S. (University Paris VII), B.S. (Academy of Versailles, France), Assistant Professor, Space and Planetary Sciences, 2005.
Kennefick, Julia Dusk, Ph.D. (California Institute of Technology), B.S. (University of Arkansas), Associate Professor, Department of Physics, 2003.
Kennefick, Daniel John, Ph.D., M.A. (California Institute of Technology), B.S. (University College Cork, Ireland), Associate Professor, Department of Physics, 2004.
Roe, Larry, Ph.D. (University of Florida), M.S., B.S.M.E. (University of Mississippi), Associate Professor, Department of Mechanical Engineering, 1994.

Courses
SPAC 5033 Astrophysics I: Stars and Planetary Systems. 3 Hours.
Stellar structure and evolution, the properties of the solar system, and extrasolar planetary systems. (Typically offered: Fall Odd Years)
This course is cross-listed with ASTR 5033.

SPAC 5111L. Space and Planetary Lab. 1 Hour.
Laboratory course in space and planetary sciences consisting of experiments in the five major areas of space and planetary sciences: planetary astronomy, planetary geology, planetary atmospheres, origin and evolution of life and orbital mechanics and astronautics. Intended for students enrolled in the graduate programs in space and planetary sciences. (Typically offered: Fall)

SPAC 5123. Internship. 3 Hours.
Internship for graduate students in the space and planetary sciences graduate degree programs and concentrations in the graduate programs in physics, biology, geosciences and mechanical engineering. Students conduct a phase of their research, normally for one month, at a national or industrial laboratory in North America or overseas. (Typically offered: Fall and Spring)

SPAC 5161. Seminar. 1 Hour.
Seminars organized by the Arkansas-Oklahoma Center for Space and Planetary Sciences covering topics on the cutting edge of research in the field for graduate students conducting research with a faculty member in the space and planetary sciences as part of their graduate degree programs or concentrations in the graduate programs in physics, biology, geology, geography and mechanical engineering. (Typically offered: Fall and Spring)

SPAC 5211. SPAC Proseminar. 1 Hour.
Introductory course consisting of discourses and case studies in ethics, communications and public policy in the administration of space and planetary sciences. Prerequisite: Admission to program or instructor consent. (Typically offered: Spring)

SPAC 5313. Planetary Atmospheres. 3 Hours.
Origins of planetary atmospheres, structures of atmospheres, climate evolution, dynamics of atmospheres, levels in the atmosphere, the upper atmosphere, escape of atmospheres, and comparative planetology of atmospheres. (Typically offered: Irregular)

SPAC 5413. Planetary Geology. 3 Hours.
Exploration of the solar system, geology and stratigraphy, meteorite impacts, planetary surfaces, planetary crusts, basaltic volcanism, planetary interiors, chemical composition of the planets, origin and evolution of the Moon and planets. (Typically offered: Spring Even Years)

SPAC 5513. Biochemical Evolution. 3 Hours.
Abiotic synthesis of biomolecules on Earth, the origin of cells; genetic information, origin of life on Earth and elsewhere, evolution and diversity, ecological niches, bacteria, archaea, and eukaryotic, novel metabolic reshaping of the environment, life being reshaped by the environment, molecular data, and evolution. Prerequisite: CHEM 5813. (Typically offered: Spring Odd Years)

SPAC 5553. Astrobiology. 3 Hours.
Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth, possibility of life elsewhere in the solar system (including Mars, and the possibility of life on planets around other stars. Prerequisite: Instructor consent. (Typically offered: Spring Even Years)
This course is cross-listed with BIOL 5553.

SPAC 5613. Astronautics. 3 Hours.
Study of spacecraft design and operations. Prerequisite: Admission to program or instructor consent. (Typically offered: Irregular)

SPAC 600V. Master’s Thesis. 1-10 Hour.
Master’s thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

SPAC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
Detailed program descriptions, including reading lists and examination procedures, are available from the department.
