Students pursuing the Master of Arts in Spanish will choose one of two concentrations. The first concentration is a traditional M.A. in Hispanic literature and culture with a strong emphasis on literary analysis. This concentration is recommended for students likely to pursue work toward a Ph.D. in literature and cultural studies after the completion of the M.A. The second concentration provides students with an alternative to the traditional M.A. in Hispanic literature and culture that places an additional emphasis on coursework in second language acquisition and language teaching. This concentration is recommended for students interested in pursuing a Ph.D. in Spanish applied linguistics after the completion of the M.A., and for those who are interested in language teaching as a career.

Requirements for the Master of Arts in Spanish: Aside from deficiencies, a minimum of 36 graduate credit hours is required for the degree. During their first semester, all students must take WLLC 5063 Teaching Foreign Languages on the College Level. In addition, 24 credit hours of Spanish literature at the 5000-level or higher is required. The remaining 9 credit hours comes from one of two concentrations listed below.

Literature concentration: Students will take SPAN 5703 Special Topics (in literature) or an equivalent research seminar, as approved by the graduate advisor. In this course, students will be required to present a research paper that meets professional research methods and standards. Students will also take an additional 6 credit hours in literature.

The comprehensive examination for the Literature concentration will include five areas of focus. This includes two periods from each tradition (Latin America and Spain) and at least two periods before 1900. The periods of concentration are Colonial, 19th century, 20th/21st century, and U.S. Latino/a for Latin America, and Medieval, Golden Age, 19th century, and 20th/21st century for Spain.

Language Learning and Teaching concentration: Students will take SPAN 5703 Special Topics (in language learning and teaching) or an equivalent research seminar, as approved by the graduate advisor. In this course, students will be required to present a research paper that meets professional research methods and standards. Students will also take an additional 6 credit hours in language learning and teaching.

For the Language Learning and Teaching concentration, the comprehensive examination will include five areas of focus. One area will be language learning and teaching. The fourth others will consist of literature and culture from four historical periods of the Hispanic world, including at least one period from each tradition (Latin America and Spain) and at least one period before 1900. The periods of concentration are Colonial, 19th century, 20th/21st century, and U.S. Latino/a for Latin America, and Medieval, Golden Age, 19th century, and 20th/21st century for Spain.

<tbody>
<tr>
<td><strong>SPAN 5073. Introduction to Hispanic Linguistics. 3 Hours.</strong></td>
</tr>
<tr>
<td>Deepens students’ knowledge of the Spanish language through an introduction to the discipline of Linguistics, which is the field of science that studies human language. Areas of Hispanic linguistics that will be covered include phonology (sound system), morphology (word structure), and syntax (sentence structure). (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5203. Medieval Spanish Literature. 3 Hours.</strong></td>
</tr>
<tr>
<td>From the ‘Jarchas’ to the Celestina. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5233. Golden Age Novel. 3 Hours.</strong></td>
</tr>
<tr>
<td>Major works of Spanish prose fiction from the 16th and 17th centuries, with close reading of major works. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5243. Golden Age Poetry and Drama. 3 Hours.</strong></td>
</tr>
<tr>
<td>History and development of those genres in the 16th and 17th centuries, with close reading of major works. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5253. Colonial Literature and Culture. 3 Hours.</strong></td>
</tr>
<tr>
<td>An introductory course to the history, culture and literature of colonial Spanish America from 1492 until 1810. The course will cover representative colonial and indigenous texts and their contexts including Renaissance, Baroque, and travel literature of the Eighteenth Century. The course will be taught in Spanish. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5273. Survey of 19th Century Spanish Literature. 3 Hours.</strong></td>
</tr>
<tr>
<td>A graduate-level survey of Spanish literature from Neoclassicism to the Generation of 1898. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5283. Survey of Contemporary Spanish Literature. 3 Hours.</strong></td>
</tr>
<tr>
<td>A graduate-level survey of Spanish literature from the Transition to the present. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5343. Survey of 20th Century Spanish Literature. 3 Hours.</strong></td>
</tr>
<tr>
<td>A graduate-level survey of Spanish literature from the Generation of 1898 to the Transition. Prerequisite: Graduate standing. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5393. 19th Century Spanish American Literature. 3 Hours.</strong></td>
</tr>
<tr>
<td>Study of representative literary works from Independence (1810) to 1900’s. The course covers Neoclassicism, Romanticism, Realism/Naturalism, and Modernism and the role of literature in the nation-building process. The course will be taught in Spanish. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5403. Spanish American Theatre. 3 Hours.</strong></td>
</tr>
<tr>
<td>Historical examination of the theatre in Spanish America, with close analysis particularly of representative works and movements in the 20th century. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5433. Cervantes: Don Quijote. 3 Hours.</strong></td>
</tr>
<tr>
<td>A close reading of Spain’s greatest literary masterpiece. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5453. Cinema and Literature. 3 Hours.</strong></td>
</tr>
<tr>
<td>This course examines several Latin American and Spanish texts and their film adaptations as well as the main film making trends in the Hispanic world. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5463. 20th Century Spanish American Literature. 3 Hours.</strong></td>
</tr>
<tr>
<td>Critical survey of major movements and outstanding and representative works in 20th century prose and poetry, from the Mexican Revolution and the avant-garde to the contemporary boom and post-boom. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5563. Latino Youth Biliteracy Service Learning Project. 3 Hours.</strong></td>
</tr>
<tr>
<td>The Latino Youth Biliteracy Project is a service learning course for students in Spanish and Latin American and Latino Studies. Readings on Latino education policies and challenges, bilingualism, and the immigrant experience. Students commit from 15 to 30 hours of mentoring Latino youth at local schools during the semester (in addition to class meeting times) and complete a research project on Latino education. Prerequisite: Graduate standing. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5703. Special Topics. 3 Hours.</strong></td>
</tr>
<tr>
<td>May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.</td>
</tr>
<tr>
<td><strong>SPAN 575V. Special Investigations. 1-6 Hour.</strong></td>
</tr>
<tr>
<td>Special investigations. (Typically offered: Irregular) May be repeated for degree credit.</td>
</tr>
<tr>
<td><strong>SPAN 5773. Indigenismo Literature. 3 Hours.</strong></td>
</tr>
<tr>
<td>A study of ‘indigenismo’, an intellectual and literary tradition in Latin America examining the history of exploitation and marginalization of indigenous peoples. Readings include texts by Mariategui, Icaza, Andrade, Asturias, Arguedas, Castellanos, and also ‘indigenista’ works in music and the plastic arts. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5883. Indigenous Literatures. 3 Hours.</strong></td>
</tr>
<tr>
<td>A study of native oral narratives, literary texts and other writing forms in the Americas, from ancient times to the present, including the Andean Khipus, Mesoamerican Codices, and Amazonian mythic narratives. (Typically offered: Irregular)</td>
</tr>
<tr>
<td><strong>SPAN 5943. U.S. Latino/a Literatures and Cultures. 3 Hours.</strong></td>
</tr>
<tr>
<td>Explores the construction and negotiation of Latino/a identities through the study of literary and filmic texts. Theoretical concepts (e.g. latinidad, latination, intra-latino, cultural remittances) will also be studied. Topics of discussion may include: transnationalism, bilingualism, and interactions between different Latino groups. Taught in Spanish. Prerequisite: Graduate standing. (Typically offered: Irregular)</td>

**Degree Conferred:**
M.Ed. in Special Education (SPED)

**Graduate Certificates Offered (non-degree):**
Applied Behavior Analysis (APBA)
Autism Spectrum Disorders (AUTS)
Program Description: The Special Education program offers a graduate degree leading to a Master of Education in Special Education. The program also offers two graduate certificates.

M.Ed. in Special Education

Program Description: The coursework for the M.Ed. in Special Education program prepares teachers to work with students with disabilities from kindergarten through grade 12 by building competencies and knowledge expected within the field of Special Education. Two special education licensure options are available: an M.Ed. leading to initial license and an M.Ed. leading to endorsement. The M.Ed. in Special Education is an on-line program, allowing students the opportunity to pursue educational goals at a time and place that fits their individual schedules. The practicum courses take place in public schools across the United States.

Special Education graduate certificates (e.g., ABA, Autism Spectrum Disorders) and other Arkansas Department of Education endorsements (e.g., Gifted, Dyslexia, Educational Examiner, Resource Room, Special Education) offered by the special education program can be embedded into the Special Education master's degree program. The College of Education and Health Professions provides the coursework needed for successful teacher candidates to submit a request for the special education license or endorsement from the Arkansas Department of Education. Prospective students not residing in Arkansas must check their own state’s requirements and reciprocity agreements. Nationally recognized faculty provide the instruction for the program.

Admission Requirements for the Master of Education in Special Education:

- A bachelor’s degree from an accredited institution of higher education. For prospective students with a bachelor's degree in a field outside education the M.Ed. with initial license is necessary. For those students with bachelor's degree in education (e.g., early childhood education, secondary education) the M.Ed. with endorsement is appropriate.
- A minimum 3.0 cumulative grade point average (GPA) during the last 60 hours of undergraduate work
- Praxis Core Exam, GRE, or other approved Standardized Core Knowledge Test
- Three reference letters
- Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Requirements for the Master of Education in Special Education:

Minimum of 36 graduate semester credit hours.

Total Hours: 36

1 Students seeking M.Ed. with initial license take SPED 5633. Students seeking M.Ed. with endorsement take SPED 6873, ESRM 5013, or ESRM 5393.

2 Students seeking M.Ed. with initial license take SPED 6803. Students seeking M.Ed. with endorsement take SPED 5883.

Graduate Certificate Program in Applied Behavior Analysis (APBA):

The Graduate Certificate in Applied Behavior Analysis is for those individuals who wish to pursue board certification in Behavior Analysis or to utilize behavioral theory in the area of autism or behavioral disorders. The program builds on candidate’s previous knowledge of effective teaching and behavioral strategies and extends knowledge and skills in the use of applied behavior analysis (ABA), positive behavior support (PBS), and functional behavioral assessments (FBAs) in teaching persons with low incidence or severe disabilities. Classes emphasize the development and ethical use of behavioral change programs which are validated by systematic evaluation of the interventions used. Ethical, professional and legal standard are discussed and applied in the use of Applied Behavior Analysis.

Admission requirements for the Graduate Certificate program include:

- A minimum 3.00 cumulative grade point average (GPA) during the last 60 hours of undergraduate work.

Candidates for the Graduate Certificate must have a B or better in the Program of Study. Courses from other institutions will not be substituted for the required courses. As of 2015, those seeking to become a National Board Certified Behavior Analyst will be required to have a degree in Education, Psychology, or Applied Behavior Analysis. Those with master's degrees in areas other than Education, Psychology, or Applied Behavior Analysis will need to consult with the Behavior Analyst Certification Board to determine if their degree program will be accepted. However, the graduate certificate in ABA can be infused into a degree program if needed.
Graduate Certificate in Autism Spectrum Disorders

Graduate Certificate Program in Autism Spectrum Disorders (AUTS):

The graduate certificate in Autism Spectrum Disorders develops professionals in the area of autism spectrum disorders. The program recognizes students who take a concentrated core of courses focused on autism spectrum disorders. Students who earn the certificate develop knowledge and skills in the areas of characteristics, assessment, and educational interventions for individuals with autism spectrum disorders.

Admission requirements for the Graduate Certificate program include:

- A minimum of a 3.0 cumulative grade point average (GPA) during the last 60 hours of undergraduate work.

Curriculum and Instruction Courses

CIED 5003. Elementary Education Seminar. 3 Hours.
This course is designed to synthesize the foundational content presented in the Master of Arts in Teaching core courses. It focuses on refinement of the generalized knowledge to accommodate specialized content children. Professional attitudes, knowledge and skills relevant to elementary students. Professional attitudes, knowledge and skills applicable to today's elementary educator are addressed. Prerequisite: Admission to the CHED M.A.T. (Typically offered: Spring)

An introduction to constructing, analyzing, and interpreting tests, types of research and the research process, qualitative and quantitative techniques for assessment, and descriptive and inferential statistics. (Typically offered: Summer)

CIED 5013. Measurement, Research and Statistical Concepts in the Schools. 3 Hours.
An introduction to constructing, analyzing, and interpreting tests; types of research and the research process; qualitative and quantitative techniques for assessment; and descriptive and inferential statistics. Prerequisite: Admission to graduate school. (Typically offered: Summer)

CIED 5022. Classroom Management Concepts. 2 Hours.
A number of different classroom management techniques are studied. It is assumed that a teacher must possess a wide range of knowledge and skills to be an effective classroom manager. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall)

CIED 5032. Curriculum Design Concepts for Teachers. 2 Hours.
The design and adaptation of curriculum for students in regular and special K-6 classrooms. Theoretical bases and curriculum models are reviewed. Concurrent clinical experiences in each area of emphasis are included. Prerequisite: Admission to the M.A.T. program. (Typically offered: Spring)

CIED 5043. Content Area Reading in Elementary Grades. 3 Hours.
This course teaches the integration of reading and writing in the content areas. Reading and writing as integrated strands of the language process is presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the focus on practical application. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall and Summer)

CIED 5052. Seminar: Multicultural Issues. 2 Hours.
This seminar provides an introduction to the major concepts and issues related to multicultural education. The ways in which race, ethnicity, class, gender, and exceptionality influence students' behavior are discussed. Prerequisite: Admission to the M.A.T. program. (Typically offered: Spring)

CIED 5053. Multicultural Issues in Elementary Education. 3 Hours.
This course provides an introduction to the major concepts and issues related to multicultural education in elementary classrooms. The ways in which race, class, gender and exceptionality influence students' behavior are discussed. Prerequisite: Admission to the M.A.T. program. (Typically offered: Spring)

CIED 5063. Disciplinary and Interdisciplinary Literacies in Education. 3 Hours.
This course teaches the integration of reading, writing, and new literacies within the discipline and across disciplines. Theory and strategy are presented as integrated strands of the language process as presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the focus on practical application. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

CIED 5073. Action Research in Elementary Education. 3 Hours.
Provides the students with experience in conducting case studies and action research related to childhood education. In addition, students gain knowledge regarding practices used in ethnographic research. Prerequisite: Admission to the M.A.T. program. (Typically offered: Spring)

CIED 508V. Elementary Education Cohort Teaching Internship. 1-6 Hour.
Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 5093. Methods of Instruction for Middle Level I. 3 Hours.
A study of methods and materials in the special content areas (math, science, English/language arts, and social studies). The planning of instruction, microteaching, and the development of middle school instructional materials are included. Prerequisite: Admission to the M.A.T. program. (Typically offered: Summer)
CIED 5103. Advanced Middle Level Principles. 3 Hours.
An in-depth examination of recent research on the major issues, practices, and policies for middle level education. Emphasis is on analysis of cutting edge issues germane to the life, education, and welfare of the early adolescent via the integration of theory and practice. Prerequisite: Admission to Masters of Arts in Teaching program. (Typically offered: Spring)

CIED 5113. Reading in Middle Schools. 3 Hours.
An overview of methods and materials for teaching reading to early adolescents. Reflective activities and site-based field experiences are integrated with course content to provide continuity between theory and practice. Portfolio expectations will be a primary means of course evaluation. Prerequisite: Admission to the middle level education program and CIED 3113. (Typically offered: Fall, Spring and Summer)

CIED 5123. Writing Process Across the Curriculum (Middle Level). 3 Hours.
This course will provide an overview of the research, and methods for incorporating writing across all curriculum. Writing as a process will be emphasized. Reflective activities and site-based field experience will be integrated into the course content. Prerequisite: Admission to M.A.T. Program. (Typically offered: Spring)

CIED 5132. Research in Middle Level Curriculum and Instruction. 2 Hours.
An introduction to inquiry and research in middle level curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Practicum in educational research and evaluation is done as part of the class. Prerequisite: Admission to the MAT program. (Typically offered: Fall)

CIED 5143. Internship: Middle Level. 3 Hours.
The internship for middle level education is an extended field experience in which a pre-service teacher integrates knowledge and skills developed in education classes with practice in the field. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)

CIED 5153. Creativity in Daily Practice. 3 Hours.
(Formerly CIED 4083.) Arts integration course including the ideas, design, and implementation of practices in the classroom, board room, and professional field that enrich the experiences of all stakeholders while building right-brain thinking skills for the new millennium. Graduate degree credit will not be given for both CIED 4083 and CIED 5153. (Typically offered: Spring Even Years) May be repeated for up to 6 hours of degree credit.

CIED 5162. Applied Practicum. 2 Hours.
Provides laboratory experiences for CIED 5173 (Literacy Assessment and Intervention) and CIED 5183 (Readings in Early Childhood Education). Corequisite: CIED 5183 and CIED 5173. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall)

CIED 5173. Literacy Assessment and Intervention. 3 Hours.
Focuses on assessment of young children's literacy skills. Techniques discussed include informal observation, miscue analysis, and portfolio assessment. Prerequisite: Admission to graduate school. (Typically offered: Fall and Summer)

CIED 5183. Readings in Early Childhood Education. 3 Hours.
Will continue to develop understandings of classic studies and will explore the impact these have had on the most recent issues in early childhood education. Prerequisite: Admission to the CHED M.A.T. (Typically offered: Fall)

CIED 5193. Methods of Instruction for Middle School II. 3 Hours.
Second special methods course for teaching at the middle level. Emphasizes further refinement of teaching skills and methods; the integration of the sciences, mathematics, and technology; science, technology, and society (STS) issues; and the integration of social studies and English language arts. Prerequisite: CIED 5093 and admission to the M.A.T. program. (Typically offered: Fall)

CIED 5203. English Language Arts/Speech & Drama Methods of Instruction. 3 Hours.
This course provides an introduction to teaching English language arts (ELA) and speech/drama in the context of elementary, middle and high school settings. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching the content area provide the major tenets of instruction. (Typically offered: Summer)

CIED 5213. Issues and Trends in Literacy. 3 Hours.
This course provides an examination of practices to teaching literacy, broadly defined. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching provide the major tenets of instruction. Prerequisite: Admission to M.A.T. (EDUCMA) Second program or instructor consent. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

CIED 5223. Learning Theory. 3 Hours.
This course provides the student with information about foundational issues in education, including history and philosophy of American Education, psychological and social theories of education, characteristics of learners, and learning processes. Prerequisite: Admission to M.A.T. degree program. (Typically offered: Summer)

CIED 5232. Interdisciplinary Studies. 2 Hours.
Introduction to the nature of interdisciplinary study: curricular content, course planning (topics and themes), instructional strategies, and evaluation and assessment. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)

CIED 5243. The Moral Mind in Action. 3 Hours.
(Formerly CIED 4433.) The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed. Graduate degree credit will not be given for both CIED 4433 and CIED 5243. (Typically offered: Fall)

CIED 5253. Moral Courage. 3 Hours.
(Formerly CIED 4443.) Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. Graduate degree credit will not be given for both CIED 4443 and CIED 5253. (Typically offered: Spring)

CIED 5263. Assessment, Evaluation, and Practitioner Research. 3 Hours.
A study of assessment, testing, and evaluative procedures in classrooms including types of tests, abuses of tests, test construction, scoring, analysis and interpretation, statistical methods, and alternative evaluation and assessment techniques. Classroom-based data collection and analysis. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall)

CIED 5273. Research in Curriculum and Instruction. 3 Hours.
An introduction to inquiry and research in curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Qualitative method in assessment and evaluation are considered. Practicum in educational research and evaluation is done as part of the class. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)
CIED 528V. Teaching Experience. 1-6 Hours.
The teaching experience is an essential component of the Masters of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to the M. A. T. Program (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 5293. Special Methods, Interdisciplinary Section. 3 Hours.
The third and final part of the middle level special methods course. Provides interns with the knowledge, dispositions, and skills for developing an interdisciplinary course of study in conjunction with the members of their interdisciplinary team. Prerequisite: CIED 5093 and admission to M.A.T. program. (Typically offered: Spring)

CIED 5303. Adolescence and Learning, 3 Hours.
Study of the developmental characteristics (physical, emotional, social and intellectual) of early and late adolescence (ages 10-18; grades 5 to 12). The progression from early to late adolescence and the implications this evolution has for learning, motivation, instruction and classroom practices are emphasized. Prerequisite: PSYC 2003. (Typically offered: Spring Odd Years)

CIED 5323. Transition Planning for Persons with Disabilities. 3 Hours.
Prepares students to plan, evaluate, and implement transition programs within both regular and special classrooms at the elementary, middle and secondary school levels. (Typically offered: Spring)

CIED 5333. Curriculum Theory and Development for Educators. 3 Hours.
The design and adaptation of curriculum for students in regular and special K-12 classrooms. Theoretical bases and curriculum models are reviewed. Concurrent clinical experiences in each area of emphasis are included. Prerequisite: Admission to the M.A.T. program. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

CIED 5353. Teaching Students with Diverse Needs in Middle Education Settings. 3 Hours.
To provide future scholar-practitioners with a knowledge base concerning the issues involved in the successful instruction of persons with special learning needs during middle school years. (Typically offered: Irregular)

CIED 5363. Methods and Assessment In K-12 Online Teaching. 3 Hours.
The study of curriculum, instructional methods and assessment techniques to facilitate student learning in K-12 virtual and hybrid teaching environments. Students enrolled in the course will be required to demonstrate knowledge of prevalent and relevant models of K-12 curriculum, web-based instructional methods, assessment techniques and utilize tools for the development and implementation of effective instruction in the K-12 virtual classroom. Prerequisite: Graduate standing. (Typically offered: Fall)

CIED 5393. Introduction to Linguistics. 3 Hours.
This course is an introduction to human language. The goal is to understand what it means to speak a language, including an introduction to phonetics and phonology (specifically the sound system of American English), morphology (the rules of English at the word level), syntax (rules that govern sentence level language), semantics (meanings of words) and sociolinguistics (or the study of language use in its social context). (Typically offered: Fall)

CIED 5403. Early Childhood Education: Rationale and Curriculum. 3 Hours.
Rationale and curriculum of an early childhood education program, with special attention given curricular frameworks and professional organization policies. (Typically offered: Irregular)

CIED 5423. Curriculum and Instruction: Models and Implementation. 3 Hours.
The study of models of curriculum and instruction and their implementation to facilitate student learning in a variety of instructional environments. (Typically offered: Spring)

CIED 5433. Methods and Materials for Teaching Children's and Adolescent Literature. 3 Hours.
Issues and trends in children's literature. Contemporary works are evaluated and reviewed based on changing social political conditions. Multicultural approach to children's literature is emphasized. Prerequisite: Undergraduate course in children's literature. (Typically offered: Irregular)

CIED 5443. Methods of Teaching Foreign Language K-12. 3 Hours.
Study of the methods and materials in the teaching of foreign language in K-12 settings as well as the theories of second language acquisition. Includes philosophical, cognitive, and psychological dimensions of teaching foreign languages. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the MAT program. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

CIED 5453. Evaluation Techniques. 3 Hours.
Evaluation of learning using traditional means of assessment as well as alternative or authentic assessment techniques. (Typically offered: Irregular)

CIED 5461. Capstone Research Seminar. 1 Hour.
This course provides students with basic knowledge and practical skills in understanding, utilizing and implementing a research design project with a focus in the discipline of curriculum and instruction with particular emphasis of some aspect of teaching and/or learning. As a part of this course students will design, conduct and report the results of an action research study undertaken in the teaching internship. Prerequisite: Admission to M.A.T. program. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

CIED 5483. Teaching Mathematics. 3 Hours.
Content, methods, and materials for teaching multiple strands of elementary school mathematics. Emphasis on principles and procedures of a conceptual and integrated approach to learning mathematics. Prerequisite: Undergraduate coursework in teaching elementary or early childhood mathematics. (Typically offered: Irregular)

CIED 5493. Teaching Social Studies. 3 Hours.
Purpose, content, psychology, materials, and methods for teaching the social sciences in the elementary school. Emphasis on principles and procedures for combining the social studies with other areas of the curriculum in broad unit instruction. Prerequisite: Undergraduate coursework in teaching elementary or early childhood social studies. (Typically offered: Irregular)

CIED 5503. Teaching Science. 3 Hours.
The influence of science on the community, on the home, and the child. Use of science in the living and learning of the child at school. (Typically offered: Spring and Summer)

CIED 5513. Sound System of American English. 3 Hours.
This course will study the structure and development of American English (AE). Topics include: 1) the structure/systems of American English pronunciation, 2) vowels, 3) consonant system (including such features as minimal pairs, 4) prosody, intonation, rhythm, and stress, and 5) regionalism and social varieties, and 6) pedagogical approaches to teaching the features of American English. (Typically offered: Fall)
CIED 5523. Instructional Practices in Teaching Foreign Language. 3 Hours.
A pedagogical studies course based on the theoretical and practical aspects of methods, techniques, and materials for effective teaching of foreign languages in K-12 schools. Prerequisite: Admission to M.A.T. Program. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

CIED 5533. Teaching Language Arts. 3 Hours.
The place of the language arts in the elementary curriculum. Exploration of materials, content, practices, and methods, used in reading, speaking, listening, and writing experiences. (Typically offered: Spring)

CIED 5543. Structures of American English. 3 Hours.
This course provides an introduction to the grammars of English, including (but not restricted to traditional, structural, and transformational-generative (universal grammar). It includes approaches to the teaching of all types of grammars. (Typically offered: Spring and Summer)

CIED 5553. Social Justice and Multicultural Issues in Education. 3 Hours.
This seminar provides an introduction to the major concepts and issues related to multicultural education and social justice in education and the ways in which race, ethnicity, class, gender, and exceptionality influence students' behavior. The course also examines the intersection of teacher and student perceptions of identity, schooling, and learning and the effects on educational systems. Prerequisite: Admission to MAT. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

CIED 5563. Teaching Internship/Action Research. 3 Hours.
During this course, Master's candidates will be provided with classroom time to prepare to teach and then will be assigned to a classroom or classrooms. During this time the candidates will have an opportunity (under supervision) to observe, to teach and to participate in classroom activities. Additionally, candidates will research some area of their own pedagogy relevant to the experience. (Typically offered: Irregular)

CIED 5573. Foundations of Literacy. 3 Hours.
Teaching of reading to children; techniques, research, and modern practices. (Typically offered: Fall, Spring and Summer)

CIED 5583. Correlates of Reading Process. 3 Hours.
The developmental program is emphasized through a student of the reading process. Learning theory and research are related to reading instruction and materials through the development and application of evaluative criteria based on an understanding of reading process. Prerequisite: CIED 5573. (Typically offered: Irregular)

CIED 5593. Advanced Diagnosis and Intervention. 3 Hours.
Emphasizes the diagnosis and remediation of reading difficulties in the classroom setting. Students are expected to become familiar with cause of reading failure, diagnosis instruments and procedures, principles of report writing, and corrective instructional methods and materials. The course is open to graduate students with instructor's consent. Enrollment limited to 20. Prerequisite: CIED 5573. (Typically offered: Irregular)

CIED 5603. Innovations in School Education. 3 Hours.
An examination of the change process in education with emphasis on those elements which support or hinder change in the schools, and the detailed study of schools innovations on national, state, and local levels. (Typically offered: Fall, Spring and Summer)

CIED 5613. Contemporary Issues in Education. 3 Hours.
A study of issues pertaining to the goals, objectives, organization, and curriculum of the schools with an analysis of the teacher's role in dealing with current concerns in these areas. (Typically offered: Fall Odd Years)

CIED 5623. The School Curriculum. 3 Hours.
General principles and techniques of selecting and organizing curricular materials. (Typically offered: Fall, Spring and Summer)

CIED 5633. Analysis of Instruction. 3 Hours.
A survey of the research and literature related to the systematic study of the field of teaching. An examination of the definitions of teaching and the knowledge base on which teaching is predicated. A study of the implications of the research of effective teaching and the key curricular and instructional issues. (Typically offered: Spring Even Years)

CIED 564V. Science Instructional Strategies. 1-6 Hour.
Methods and materials in teaching specific science content with a focus on that content and/or the pedagogical perspectives necessary for effective and engaging instruction. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CIED 5653. Methods of Middle School Instruction. 3 Hours.
Philosophy, rationale, and instructional practices of middle school instruction. Prerequisite: Graduate standing. (Typically offered: Summer)

CIED 5663. Evaluation of Instruction. 3 Hours.
Examination of methods and philosophies of evaluation. Consideration will be given to grading, techniques of grading, and construction of behavioral objectives and test items. (Typically offered: Summer Even Years)

CIED 567V. Teaching Foreign Cultures in Social Studies Curricula. 1-6 Hour.
Extensive examination of foreign cultures (West Europe, USSR, China, Latin America) and methods of teaching about them in secondary school social studies. (Typically offered: Fall, Spring and Summer)

CIED 5683. Adolescent Literature. 3 Hours.
Content course in adolescent literature including selection, reading, evaluation, and psychological basis of classic and contemporary works. (Typically offered: Fall, Spring and Summer)

CIED 5703. English Language Arts and Reading Standards: Contents and Quality. 3 Hours.
This course will (1) examine the purposes, contents, and quality of K-12 English language arts and reading standards, (2) analyze their relationship to classroom and school district curricula, student assessment, educator licensing regulations, licensure tests, and professional development, (3) and explore educational, social, and political issues raised by ELA/R standards. (Typically offered: Irregular)

CIED 5713. Integrating the Elementary Curriculum. 3 Hours.
This course focuses on meaningful integration of science, mathematics, literacy, social studies, art, and music in the elementary classroom. A strong foundation for integrating the elementary curriculum will be developed by providing students with theoretical frameworks, research, resources, and methods related to classroom practice. Strategies to coordinate the integration of these subject areas for the K-4 classroom will be modeled. (Typically offered: Summer)

CIED 5723. Nature and Needs of Persons with Mild Disabilities. 3 Hours.
Educational, psychological, and social characteristics of individuals who have mild disabilities with emphasis on educational methods and modifications. Prerequisite: CIED 3023. (Typically offered: Fall)

CIED 5739. Practicum in Literacy. 3 Hours.
Laboratory experience in which students diagnose reading difficulties and practice remedial measures under the direct supervision of the instructor. Emphasis is given to continuous diagnosis and to the use of commercially produced materials and trade books in remediation. Enrollment limited to 15. Prerequisite: CIED 5593. (Typically offered: Fall, Spring and Summer)

CIED 5803. Nature and Needs of the Gifted and Talented. 3 Hours.
Educational, psychological, and social characteristics of gifted and talented children. Prerequisite: Graduate standing. (Typically offered: Fall)

CIED 5813. Curriculum Development in Gifted and Talented. 3 Hours.
Examines the various models for developing curriculum and providing services for students identified for gifted programs. Prerequisite: CIED 5803. (Typically offered: Spring)
CIED 5923. Gifted and Talented (Structured) Practicum. 3 Hours.
Supervised field experience in gifted education programs, schools, institutions, and other facilities for gifted/talented children. Prerequisite: CIED 5813. (Typically offered: Summer)

CIED 5933. Gifted and Talented (Flex) Practicum. 3 Hours.
Students design and implement an individualized practicum experience (Type III Renzulli) that provides the opportunity to refine and enhance personal attitudes, beliefs, and skills in gifted education. Prerequisite: CIED 5923. (Typically offered: Fall)

CIED 5843. Representations of American Education in Film. 3 Hours.
This course provides an examination of students, teachers, administrators, schools, and schooling as they exist on the silver screen. Of particular interest is how film representations and misrepresentations potentially affect public perceptions of education. This course draws on educational theory and the field of cultural studies. (Typically offered: Irregular)

CIED 5853. Issues in Mathematics Education. 3 Hours.
Study of research in mathematics education and applications to classroom teaching and learning. Emphasis will be given past and current research in the areas of students' cognitive development in mathematics, mathematics curriculum development, and teaching practices and assessment. (Typically offered: Irregular)

CIED 5863. Teaching Global Issues. 3 Hours.
Global interdependence and its consequent issues have become an integral part of most social studies programs in American schools. Some schools developed specific courses, required or elective, and others include them in existing history, economics, government and civic courses. Secondary social studies teachers and their students explore these issues as part of current events discussions. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

CIED 5913. Parent/Family Engagement for Culturally & Linguistically Diverse Students. 3 Hours.
Students will investigate characteristics of family-community engagement systems and models serving culturally and linguistically diverse (CLD) students and families. Identify qualities of a welcoming, accepting environment for CLD families and implement some of these characteristics in their classroom and schools. Support communication and facilitate contributions by CLD families to the school and community including leadership roles. Demonstrate knowledge, skills, best practices and resources to enhance CLD family-community engagement by developing and implementing a service-learning project in their school or community. Prerequisite: Graduate standing. (Typically offered: Summer)

CIED 5923. Second Language Acquisition. 3 Hours.
This is one of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly ESL. (Typically offered: Fall)

CIED 5933. Second Language Methodologies. 3 Hours.
This is one of a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces the basics in approaches, methodologies, techniques, and strategies for teaching second languages, especially ESL. (Typically offered: Fall)

CIED 5943. Teaching People of Other Cultures. 3 Hours.
This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course focuses on cultural awareness, understanding cultural differences, and instruction methods for integrating second cultures, especially the culture of the United States, into the curriculum. (Typically offered: Spring)

CIED 5953. Second Language Assessment. 3 Hours.
This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces basic methods for testing, assessing and evaluating second language, especially ESL, learners for placement purposes and academic performance. (Typically offered: Spring)

CIED 5963. Reading in Middle and Secondary Schools. 3 Hours.
Methods and materials of teaching reading in secondary schools with emphasis on remedial and developmental reading problems of students. (Typically offered: Irregular)

CIED 5973. Practicum in Secondary Education. 3 Hours.
Students will engage in action research in a school setting to advance their knowledge of teaching and learning venues including schools and informal learning environments. Prerequisite: Permission. (Typically offered: Fall and Spring)

CIED 5983. Practicum in Curriculum & Instruction. 3 Hours.
This course will provide degree candidates with advance knowledge of teaching in the elementary or secondary schools. This will be accomplished through a semester-long practicum during which an action research project will be designed, enacted, and reported. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CIED 599V. Special Topics. 1-18 Hour.
Special topics. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CIED 600V. Master's Thesis. 1-6 Hour.
This course is designed for students completing a thesis at the master's level in curriculum and instruction and related programs. It may be taken multiple times for 1-6 credits but no more than 6 credits will be counted toward the degree. Prerequisite: Graduate Standing (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CIED 6013. Curriculum Theory, Development, and Evaluation. 3 Hours.
Principles and concepts of curriculum and development, with an analysis of the factors basic to planning, the aims of the educational program, the organization of the curriculum, curriculum models, and elements desirable in the curriculum of schools including evaluation. (Typically offered: Fall Odd Years)

CIED 6023. Instructional Theory. 3 Hours.
Study of psychological, anthropological, sociological, and educational theories of instruction and learning. Emphasis is placed on synthesizing a broad range of existing and emerging perspectives in understanding individual, interactional and contextual phenomena of instruction and learning. (Typically offered: Spring Even Years)

CIED 6033. Content Specific Pedagogy. 3 Hours.
This course explores the relationship between the content of courses taught in schools and the pedagogical principles that the teaching of the content requires. Students will discuss and synthesize findings from the research literature and from personal investigation. (Typically offered: Irregular)

CIED 6043. Analysis of Teacher Education. 3 Hours.
This course examines issues, problems, trends, and research associated with teacher education programs in early childhood, elementary, special education, and secondary education. Prerequisite: CIED 6023. (Typically offered: Summer Even Years)

CIED 6053. Curriculum and Instruction: Learner Assessment and Program Evaluation. 3 Hours.
This course provides an overview of designing, implementing and analyzing learner assessments as well as systemic and program evaluations in a variety of instructional environments. Prerequisite: Admissions to Ed.S. or Ph.D. program. (Typically offered: Spring Even Years)
CIED 6063. Systemic Change In Education. 3 Hours.
This course is designed to critically examine education and society and interplay their interdependence between them, to differentiate between meaningful and superficial change, and to explore the agents of change in a diverse and complex social environment. Prerequisite: Admission to Ed.S. or Ph.D. program. (Typically offered: Spring Odd Years)

CIED 6073. Seminar in Developing Creativity. 3 Hours.
A study of the facets of creativity, how they can be applied to be used in one's everyday life, how they can be applied in all classrooms, and how to encourage the development of these in students. (Typically offered: Irregular)

CIED 6083. Piaget's Theory and Instruction. 3 Hours.
Piaget's theory has been applied to classroom instruction in various settings. This course will investigate the theory in depth, study classroom application, and students will devise application. Prerequisite: CIED 6023. (Typically offered: Spring Odd Years)

CIED 6093. Vygotsky in the Classroom. 3 Hours.
This course introduces the cultural-historical theory of L. Vygotsky and considers its complexity. The comprehensive nature of Vygotsky's heritage and the importance of the sociocultural context for understanding his work is emphasized, as well as the implications of his theories for contemporary educational settings. (Typically offered: Fall Even Years)

CIED 6113. Trends and Issues in Social Studies Education. 3 Hours.
Analysis of social studies education including an examination of the historical, political and social issues that have shaped curriculum, pedagogy and the educator's role in the increasingly complex endeavor to prepare future citizens. (Typically offered: Fall Odd Years)

CIED 6123. New Literacy Studies. 3 Hours.
In the past decade scholars have expressed an interest in the diverse literacy practices in which adolescents engage outside of school. In using new media, adolescents interweave multiple sign systems, including word and image, to construct a narrative or communicate information. How do readers interpret these texts? What conventions do authors manipulate to influence the meanings they construct? This course aims to answer these and other questions. (Typically offered: Fall Odd Years) May be repeated for up to 12 hours of degree credit.

CIED 6133. Trends and Issues in Curriculum and Instruction. 3 Hours.
Analysis of trends and issues in curriculum and instruction with emphasis on political/social contexts and prevailing philosophies/theories/practices across disciplines. Prerequisite: Admittance in Ed.D., Ed.S. or Ph.D. program. (Typically offered: Fall Even Years)

CIED 6143. Differentiated Instruction for Academically Diverse Learners. 3 Hours.
Major focus of this course will be the examination of differentiated instruction, a teaching philosophy appropriate for a wide range of learners. (Typically offered: Summer Even Years)

CIED 6153. Theories of Literacy Learning. 3 Hours.
In this seminar, students consider theories of literacy learning and their implications for practice and research. Theories are viewed as historically and socially situated, and students reflect on how their own work might be situated within these theories. The ways in which theories support research methodology are also explored. (Typically offered: Spring Odd Years)

CIED 6163. Social and Emotional Components of Gifted and Talented Students. 3 Hours.
Purpose of this course is to study the theoretical and practical aspects of those affective issues, behaviors, and experiences often associated with gifted and talented students. (Typically offered: Summer Even Years)

CIED 6173. Reviews of Research in Reading Comprehension. 3 Hours.
In this online course, students will learn types of reviews of research, including qualitative systematic reviews and meta-analyses, and will conduct a review of research on a topic related to reading comprehension. Students will consider implicit and explicit definitions of comprehension and the influence various definitions have on assessment, instruction, policy and research and will examine comprehension in different contexts, disciplines, genres, and platforms. The course is a CIED Area of Study or Cognate Course (not part of the Inquiry Core). (Typically offered: Summer Even Years)

CIED 6183. Theory and Research in Arts Integration. 3 Hours.
Content course in arts integration including the pedagogy, design, and implementation of lesson plans which simultaneously address core curriculum learning targets and teach skills through the visual and performing arts in order to address the needs of the learners of the new millennium. Prerequisite: Instructor consent. (Typically offered: Spring and Summer)

CIED 6193. Teaching English Language Learners in the Content Areas. 3 Hours.
This course prepares teachers to teach English language learners in math, science, and social studies. These subject areas each have their own vocabulary that must be mastered by English language learners. The course focuses on teachers of both children and adults. (Typically offered: Spring)

CIED 6233. Organization of Reading Programs. 3 Hours.
Study of the problem of organizing the classroom, individual school, and school system, for the improvement of reading instruction. Emphasis is given to the development of program organization rationale based on requirements of the teaching-learning setting. (Typically offered: Fall, Spring and Summer)

CIED 6313. Issues, History, and Rationale of Science Education. 3 Hours.
This course is the foundation experience for those interested in the discipline of science education. It provides an overview of the fundamental issues in and vocabulary of science education. The course includes the research basis for science teaching, the literature of science education, and the issues and controversies surrounding the teaching of science. (Typically offered: Irregular)

CIED 6333. Nature of Science: Philosophy of Science for Science Educators. 3 Hours.
The Nature of Science is a hybrid arena consisting of aspects of the philosophy, history and sociology of science along with elements of the psychology of scientific observations all targeting the complete understanding of how science actually functions. Prerequisite: Admission to grad school. (Typically offered: Irregular)

CIED 6343. Advanced Science Teaching Methods. 3 Hours.
This course is designed for those educators who have had some previous instruction in science teaching methods and/or had some prior science teaching experience. Students will gain new or renewed perspectives with respect to their personal teaching ability while engaging in discussions and activities designed to assist others in professional grow in science instruction. Prerequisite: Admission to graduate school. (Typically offered: Irregular)

CIED 6443. Mixed Methods Research. 3 Hours.
This course will provide opportunities for students to acquire the skills, knowledge, and strategies necessary to design and implement a mixed methods research study. Emphasis is upon developing research questions, developing a research design, selecting a sample, and utilizing appropriate techniques for analyzing data. (Typically offered: Fall)

CIED 6503. Effective Teaching: Concepts and Processes. 3 Hours.
This course is designed to assist students in examining a variety of effective teaching practices and conditions found in classrooms and in acquiring knowledge, concepts, and ideas about ways to effectively influence the interests, learning and development of students. Prerequisite: Admission to the Ph.D. program. (Typically offered: Spring)
CIED 6533. Problem-Based Learning and Teaching. 3 Hours.  
A course in the design, development, and delivery of the problem-based learning (PBL) model. Theoretical cases and curriculum models will be centered on issues and models related to PBL. (Typically offered: Irregular)

CIED 6603. Multicultural Education. 3 Hours.  
This course is designed to trace, examine, discuss, and promote understanding of issues related to multicultural education, diverse viewpoints of multicultural education, and the impact of multicultural education upon the schooling process. Emphasis is upon school experiences of culturally diverse students, language issues, gender issues, and evaluation issues. Prerequisite: Admission to the Ed.S. or Ph.D. program. (Typically offered: Spring)

CIED 660V. Workshop. 1-18 Hour.  
Workshop. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

CIED 6623. Research Methods and Scholarship in Curriculum and Instruction. 3 Hours.  
In this course students will look at methods and practices in writing a successful dissertation proposal. Emphasis will be placed on research studies, collection of reliable and valid data, and analysis of data. Throughout the course, topics will focus on what scholarship looks like in curriculum and instruction. Prerequisite: Advanced standing in the doctoral program. (Typically offered: Fall)

CIED 674V. PhD Research Internship. 1-6 Hour.  
This research internship is for doctoral level students in curriculum and instruction. The goal is to provide research experience within the doctoral course of study. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 680V. Ed.S. Project. 1-6 Hour.  
Instructor permission required to register. Prerequisite: Instructor permission. (Typically offered: Fall, Spring and Summer)

CIED 684V. PhD Teaching Internship. 1-6 Hour.  
This teaching internship is for doctoral level students in curriculum and instruction. The goal is to provide teaching experience within the doctoral course of study. (Typically offered: Fall, Spring and Summer)

CIED 694V. Special Topics. 1-6 Hour.  
Discussion and advanced studies on selected topics in curriculum and instruction. Specific focus on recent developments. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CIED 695V. Independent Study. 1-6 Hour.  
Independent study. (Typically offered: Fall, Spring and Summer)

CIED 699V. Doctoral Seminar. 1-3 Hour.  
Doctoral seminar. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CIED 700V. Dissertation. 1-18 Hour.  
Dissertation. Prerequisite: Candidacy (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Special Education Courses

SPED 5143. Teaching Communication Skills to Persons with Autism. 3 Hours.  
This course focuses on classroom and teaching strategies for the development of communication skills with students who have autism spectrum disorders. Students will learn the characteristics of typical language development, atypical language development in autism, functional communication training and behavior analytic approaches to teaching communication. Prerequisite: Admission to the Graduate School. (Typically offered: Summer)

SPED 5173. Introduction to Dyslexia: Literacy Development & Structure of Language. 3 Hours.  
This course focuses on the assessment of students with disabilities, literacy development, skills and intervention. Students will utilize foundational concepts of oral and written language including the structure of language to assess students' difficulties and plan appropriate instruction. Techniques discussed include informal observation, miscue analysis, multisensory teaching, and portfolio assessment. Prerequisite: Admission to graduate school. (Typically offered: Spring)

SPED 532V. Practicum in Special Education. 1-6 Hour.  
Supervised field experiences in special education programs, schools, institutions, and other facilities for exceptional children. (Typically offered: Irregular)

SPED 5343. Analysis of Behavior for Teachers. 3 Hours.  
An advanced course in managing behaviors in students with exceptionalities. Students are provided with experiences in applying theoretical bases of classroom management through identifying, assessing graphing, and analyzing behavioral data and implementing management plans. Ethical issues in the use of functional analysis are addressed. (Typically offered: Fall)

SPED 5413. ABA and Classroom Management for Teachers. 3 Hours.  
(Formerly SPED 4413.) Students in this course will develop an understanding of the basic principles of Applied Behavior Analysis (ABA) and learn how to implement these principles across a Positive Behavior Support Model. Intervention plans include development of individual supports, classroom management supports, and whole school behavior supports. Graduate degree credit will not be given for both SPED 4413 and SPED 5413. (Typically offered: Fall)

SPED 5423. Technology for the Inclusive Classroom. 3 Hours.  
(Formerly SPED 4423.) A study of the use of instructional and assistive/augmentative technology for students with learning differences and special learning needs. Graduate degree credit will not be given for both SPED 4423 and SPED 5423. (Typically offered: Fall)

SPED 5433. Curriculum Development and Instructional Planning. 3 Hours.  
(Formerly SPED 4433.) Study of the research base for the design and adaptation of curriculum and instructional strategies for students with disabilities in general and special classrooms. Graduate degree credit will not be given for both SPED 4433 and SPED 5433. (Typically offered: Fall)

SPED 5443. Career Development and Transition Planning for Students with Disabilities. 3 Hours.  
(Formerly SPED 4443.) A study of career development theory and the research-based strategies for evaluating, planning, and implementing transition programs for students with disabilities. Graduate degree credit will not be given for both SPED 4443 and SPED 5443. (Typically offered: Fall)

SPED 5463. Teaching Students with Significant Disabilities. 3 Hours.  
(Formerly SPED 4463.) A study of methods and materials for teaching students (K-12) with severe disabilities, including severe mental retardation, serious emotional disturbance, other health impairments, multiple disabilities, and severe physical disabilities. Graduate degree credit will not be given for both SPED 4463 and SPED 5463. (Typically offered: Spring)

SPED 5483. Teaching Literacy Skills to Students with Disabilities. 3 Hours.  
(Formerly SPED 4483.) This course will offer a detailed study of how to systematically and explicitly teach essential reading skills to students with disabilities or those at-risk for learning difficulties. Graduate degree credit will not be given for both SPED 4483 and SPED 5483. (Typically offered: Spring)

SPED 5493. Introduction to Students with Autism Spectrum Disorder. 3 Hours.  
(Formerly SPED 4493.) The purpose of this course is to develop an understanding of autism spectrum disorders, understand the unique characteristics as they apply to the context of the classroom, be able to design an appropriate classroom setting, and use evidence based teaching practices for students with autism spectrum disorders. Graduate degree credit will not be given for both SPED 4493 and SPED 5493. (Typically offered: Spring)
SPED 5543. Dyslexia Teaching Practicum. 3 Hours.
Provides the opportunity to demonstrate and refine teaching skills with dyslexic students and others with literacy learning disabilities through case studies and structured multi-sensory teaching of reading and writing skills with grades k-12 while simultaneously developing a professional portfolio. A minimum of 82 hours of field experiences with dyslexic students is required. (Typically offered: Irregular)

SPED 5633. Curriculum Development and Instructional Planning. 3 Hours.
Study of the research base for the design and adaptation of curriculum and instructional strategies for students with disabilities in general and special classrooms. (Typically offered: Irregular)

SPED 5643. Individual Diagnostic Testing. 3 Hours.
A study of various individual diagnostic tests used to identify students with disabilities and develop individual educational programs. Prerequisite: Admission to Graduate School. (Typically offered: Irregular)

SPED 5653. Individual Intelligence Testing. 3 Hours.
A study of various individual intelligence tests, including the Wechsler series, and their use in schools to identify students with disabilities. Prerequisite: Admission to Graduate School. (Typically offered: Irregular)

SPED 5663. Teaching Science and Math to Students with Disabilities. 3 Hours.
A study of content, methods, and materials for teaching science and math courses to students with diverse learning needs and how to adapt curriculum to meet diverse needs. Prerequisite: Admission to graduate school. (Typically offered: Irregular)

SPED 5673. Teaching Students with Disabilities in the Content Areas. 3 Hours.
A study of content, methods, and materials for teaching content courses to students with diverse learning needs (K-12). (Typically offered: Irregular)

SPED 5683. Teaching Literacy Skills to Students with Disabilities. 3 Hours.
This course will offer a detailed study of how to systematically and explicitly teach essential reading skills to students with disabilities or those at-risk for learning difficulties. (Typically offered: Irregular)

SPED 5713. Career Development and Transition for People with Disabilities. 3 Hours.
This is an advanced course at the master's level in the specialty studies. The Scholar Practitioner model at this level will pursue an in-depth study of the transition process for students with disabilities including transition plan development, work based learning opportunities, developing skills in self-advocacy and self-determination using evidence based practices, family engagement, collaborative program planning and evaluation. (Typically offered: Summer)

SPED 5733. Inclusive Practices for Diverse Populations. 3 Hours.
An advanced study of the characteristics of persons with exceptional learning needs and the provision of appropriate instruction in the general education classroom including the use of current technologies including instructional media, social networking, and other educational technologies. Prerequisite: Graduate standing. (Typically offered: Fall)

SPED 5743. Teaching Persons With Physical and Health Disabilities. 3 Hours.
This course is an advanced course at the master's level in the specialty studies. The Scholar Practitioner model at this level will pursue an in-depth study of the characteristics, needs, and methods for teaching of persons with physical and health disabilities while emphasizing advance learning in the specialty studies and the social and behavioral studies in the substantive areas. Prerequisite: Graduate standing. (Typically offered: Spring)

SPED 5753. Nature and Needs of Persons with Serious Emotional Disorders. 3 Hours.
A survey of the educational, psychological, and social characteristics of individuals with serious emotional disorders. Four major categories of behaviors (personality disorders, pervasive developmental disorders, and learning/behavior disorders) are reviewed in relationship to identification, assessment, and program intervention within the public school setting. Prerequisite: CIED 3023. (Typically offered: Irregular)

SPED 5763. Teaching Individuals with Severe Disabilities. 3 Hours.
Methods and materials for teaching students with severe disabilities, including severe mental retardation, serious emotional disturbance, and severe physical disabilities. (Typically offered: Spring)

SPED 5773. Methods for Young Children with Disabilities. 3 Hours.
This course is one of the substantive core courses required of all students being recommended for the P-4 Instructional Specialist license. The Scholar Practitioner Model at this level provides an introduction to the education of young children with special learning needs and a foundation for the developing professional. (Typically offered: Irregular)

SPED 5783. Professional and Family Partnerships. 3 Hours.
This course is an advanced course at the master's level in the specialty studies. The Scholar Practitioner model at this level will pursue an in-depth study of family-school partnerships from early childhood through the transition to adulthood while emphasizing advance learning in the specialty studies and the social and behavioral studies in the substantive areas. Prerequisite: Admission to graduate school. (Typically offered: Fall)

SPED 5872. Assessment and Programming for Students with Disabilities. 3 Hours.
Methods and techniques of assessment in all areas of exceptionality with emphasis on diagnosis and classification. (Typically offered: Fall)

SPED 5883. Research in Inclusive Education. 3 Hours.
Review of research in inclusive education including all areas of exceptionality and English language learners with emphasis on research-based practices. (Typically offered: Fall)

SPED 5893. Organization, Administration and Supervision of Special Education. 3 Hours.
Procedures, responsibilities and problems of organization, administration, and supervision of special education programs. (Typically offered: Irregular)

SPED 599V. Special Topics. 1-6 Hour.
Discussion and readings on selected topics in special education. Special focus on recent and emerging topics in special education. Prerequisite: Admission to Graduate School and Special Education graduate program. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SPED 605V. Independent Study. 1-6 Hour.
Advanced studies on potential research topics for graduate students in special education. Prerequisite: Admission to the Graduate School and instructor consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SPED 6403. Emerging Issues in Special Education. 3 Hours.
A study in the complex issues with which professionals in the field of special education must be familiar and prepared to address. (Typically offered: Irregular)

SPED 641V. Special Topics in Special Education. 1-3 Hour.
Discussion and advanced studies on select topics in special education. Specific focus will include evidence-based and emerging practices in special education. (Typically offered: Irregular)

SPED 6423. Philosophical and Sociological Bases of Special Education. 3 Hours.
A study of the basic philosophical and sociological bases for current practices in special education. (Typically offered: Irregular)

SPED 6433. Legal Aspects of Special Education. 3 Hours.
A study of litigation and legislation in special education, federal and state laws and court cases, and due process hearings. (Typically offered: Irregular)

This course is cross-listed with EDLE 6433.
SPED 6453. Human Performance Improvement. 3 Hours.
This course is an introduction to Human Performance Technology, a rapidly growing field that applies the principles, methods, and empirical generalizations of Behavior Analysis to improving human performance in organizations. Working from a theoretical basis, students will learn how to diagnose performance discrepancies in organizational settings, design and evaluate appropriate behavior-based solutions. (Typically offered: Spring)

SPED 6803. Teaching Students with Autism Spectrum Disorders. 3 Hours.
This course provides students with an understanding of individuals who have been diagnosed with autism spectrum disorders. The course provides a life-span perspective by focusing on preschoolers, school-aged children, and adults. Students will study the characteristics of these individuals and general educational strategies for their education. (Typically offered: Fall)

SPED 6813. Characteristics and Assessment of Persons with ASD. 3 Hours.
This course provides an in-depth study of the characteristics and assessment of persons with autism spectrum disorders. It includes formal and informal assessment measures used to assist in the identification of students with ASD, as well as provide information for program development for this group of students. (Typically offered: Spring)

SPED 6823. Instructional Methods for Students with Autism Spectrum Disorders. 3 Hours.
This course is designed to assist professional educators in planning and implementing instructional and support services for students with autism spectrum disorders. Students will learn how to participate in collaborative family, school, and community partnerships. (Typically offered: Fall)

SPED 6833. Practicum in Autism Spectrum Disorders. 3 Hours.
Supervised field experiences in programs, schools, and other settings for children with autism spectrum disorders. (Typically offered: Fall, Spring and Summer)

SPED 6843. Basic Principles of ABA. 3 Hours.
Course provides information on: (a) the philosophical assumptions and principles of behavior analysis; (b) basic principles, processes, and concepts of applied behavior analysis; and (c) ethical and legal issues involved in its use. (Typically offered: Fall)

SPED 6853. Behavioral Assessment in ABA. 3 Hours.
Course content includes information on effective methods and the development of skills: (a) assessing, organizing, and interpreting behavior; (b) conducting task analysis and selecting intervention goals and strategies; (c) displaying data; and (d) making evidence-based decisions. Legal and ethical standards will be reviewed and applied to behavioral change procedures used. (Typically offered: Summer)

SPED 6863. Behavior Change Procedures and Supports. 3 Hours.
Course content includes (a) information on behavior change procedures; (b) activities designed to acquire skill in developing and evaluating behavioral change programs; and (c) information and activities designed to acquire skills in providing and monitoring persons and systems providing support. Legal and ethical standards will be reviewed and applied to the course content. (Typically offered: Spring)

SPED 6873. Measurement and Experimental Design. 3 Hours.
Course content includes information on and the development of skills in: (a) the measurement of the multiple dimensions of behaviors; (b) the use of methods of measuring behavior; (c) the experimental evaluation of interventions; and (d) the multiple methods of displaying and interpreting behavioral data. Legal and ethical standards will be reviewed and applied to the course content. (Typically offered: Fall)

SPED 6883. ABA Ethical, Professional, and Legal Standards. 3 Hours.
Course content includes information on the ethical, professional and legal standards in special education and, specifically, the area of applied behavior analysis. (Typically offered: Summer)

SPED 6893. Practicum in Applied Behavioral Analysis. 3 Hours.
This course is a supervised practicum that provides students with experience in applying the knowledge, skills, and dispositions by teaching individuals using Applied Behavior Analysis. Instructor approval needed for enrolling in the course. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

Statistics and Analytics (STAN)
Mark Arnold
Program Director
301 Science Engineering Building
479-575-3351
Email: arnold@uark.edu

Degree Conferred:
M.S. (STANMS)

Graduate Certificate Offered:
Graduate Certificate in Statistics and Analytics (STANGC) (Nondegree)

Program Description: The Graduate Certificate and M.S. degree in Statistics and Analytics are cross-college interdisciplinary programs that build on the university’s current strengths in the Colleges of Arts and Sciences; Business; Education and Health Professions; and Engineering. Students may choose one of six concentrations: Statistics; Biological Analytics, Business Analytics; Operations Analytics; Computational Analytics; Educational Statistics & Psychometrics; or Quantitative Social Sciences.

Primary Areas of Faculty Research: Statistics and statistical analysis and design methodologies in business analytics, operations analytics, computational analytics, educational statistics and social science research.

Admission to the Master’s Program: In addition to the requirements of the Graduate School, applicants for admission to the M.S. program in Statistics and Analytics must submit a) three letters of recommendation from persons familiar with the applicant’s previous academic and professional performance and b) official test scores as specified for the applicant’s area of interest.

Requirements for the Master of Science (M.S.) Degree
Requirements for the master’s degree are fulfilled through one of seven concentrations. Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Requirements for Concentration in Biological Analytics

Degrees Conferred:  
M.A.T. in Teacher Education (EDUC)
See Curriculum and Instruction (p. 134) for full departmental faculty listing.

The Master of Arts in Teaching program in Teacher Education prepares students for teaching math, science, social studies at the multi-level licensure level, and foreign languages, speech and drama at the secondary level. The program offers two concentrations:

• Multiple Level Education
• Secondary Education

Students in the program learn and practice pedagogy appropriate to the concentration.

Requirements for M.A.T. in Teacher Education

Students seeking admission to the Master of Arts in Teaching in Teacher Education Program at the University of Arkansas must be aware of the deadlines and admissions policies. Once all admission requirements are met by each candidate, a committee will review all applications and notify accepted and denied candidates by April 1. Each of the five content areas (English and Speech/Drama, foreign languages, mathematics, science and social studies) has a maximum number of 12 students admitted each year and up to 60 students in the overall program. If spaces remain in a particular content area and the overall program capacity has not yet been met by April 1, admissions for that area will be considered on a rolling basis until the beginning of the first summer session. These deadlines and limitations are designed to ensure that all students have a high quality experience and reflect current need for teachers in any particular content area.

Admission to the Master of Arts in Teaching in Teacher Education requires the following steps:

Step One: Pre-MAT Requirements

• Undergraduate Courses: CIED 4131, CIED 4023 or CIED 3023, and any other content specific courses required for licensure by the Arkansas Department of Education
• Completion of appropriate undergraduate degree program
• Transcript Evaluation by content area professor
• Admission to the Office of Teacher Education

Complete the application for teacher education through the Teacher Education Office by October 1 (see the Teacher Education Application Fee (https://forms.coehp.uark.edu/start?form=teaching/)). This includes passing scores on the Math, Reading and Writing sections of the Praxis Core Academic Skills for Educators, or the equivalent scores on the ACT, SAT or GRE as defined by the Arkansas Department of Education and successful completion of the Arkansas Department of Education background checks.

Step Two: Application to Graduate School

• File an application for admission to the Graduate School by December 30.
• Hold a minimum GPA of 3.0 in the last 60 hours of the completed undergraduate degree.
• Provide three letters of recommendation before the admission interview to the Graduate School.

• Provide scores on the Praxis II Content Area test for admission to the program; foreign language students must also provide scores for the Oral Proficiency Interview (OPI).

Step Three: Application to Education MAT

• Schedule and complete an admission screening interview in February.
• Submit a portfolio at the interview.

At the time of the interview, candidates must have a GPA of 3.0 on the last 60 hours of undergraduate coursework, have passed the PRAXIS CORE exam or provide equivalent scores, submitted three letters of reference, taken the Praxis II Content Area test and the OPI for foreign language students, and submitted a portfolio.

Once the program has received all application materials from the Graduate School, an admission decision will be made based on the criteria described in the admissions policy statement. The probationary status will include the content specific courses of the spring semester term. The number admitted into specific teaching fields will be determined by both availability of internship spaces in the public schools with Cohort Partnership agreements and job market potential. However, meeting or exceeding minimum requirements does not guarantee acceptance into the M.A.T.

At the completion of the first 9 hours of MAT courses (which are taken in the summer semester), the education faculty will review the status of all the students in the program. Students with unsatisfactory performance (grade C or lower) in the summer courses will not be allowed to continue with the remainder of the program.

Students should also be aware of Graduate School requirements with regard to master’s degrees (p. 457).

Requirements for the Master of Arts in Teaching Degree in Teacher Education: (Minimum 33-34 hours.)

1. Computer competencies will be demonstrated by the candidate in the admission interview portfolio or by taking an approved course.
2. CIED 4131 Practicum for Secondary and Multilevel Tracks in Education. Candidates for the M.A.T. Teacher Education program will register for this course. The requirement for this course is 60 hours of experience with children in grades K through 12. A minimum of 30 of these hours will be in a secondary school with the remaining hours in elementary or middle schools or other youth settings. These hours must be documented by the appropriate organization.
3. Students will take CIED 3023 Survey of Exceptionalities or CIED 4023 Teaching in Inclusive Secondary Settings. CIED 4023 is the preferred course.
4. Students in French, German, and Spanish will take CIED 4013 Capstone Course for Foreign Language Licensure. Students will compile a portfolio in the target language with several pieces of evidence from their content classes. In addition, students must obtain a minimum passing score of Intermediate High on the Oral Proficiency Interview prior to admission into the fall field experience.

Requirements for the Multiple Level Education Concentration:

Teaching English to Speakers of Other Languages (TESL)

Cheryl Murphy
Chair, Department of Curriculum and Instruction
206 Peabody Hall
479-575-5111
Email: cmurphy@uark.edu

Janet Penner-Williams
Program Coordinator
107 Peabody Hall
Email: jpenner@uark.edu

Degree Offered:
M.Ed. in Teaching English to Speakers of Other Languages (TESL)

Description: The program is designed to prepare teachers in the U.S. and abroad to teach English to learners whose first language is not English; graduates are also prepared to create and implement curriculum and appropriate assessments for English as a second language (ESL). It also prepares individuals for further graduate study (Education Specialist or Ph.D.). Included in the course work for the M.Ed. are the four courses required by the Arkansas Department of Education for endorsement in ESL.

M.Ed. in Teaching English to Speakers of Other Languages

Admission Requirements:
1. Students must be officially accepted by the Graduate School and accepted into the M.Ed. TESOL degree program. Once information is reviewed, the Graduate School will submit applicant’s completed packet to the program for review.
2. Students must complete an appropriate undergraduate degree with a minimum 3.0 grade-point average on the last 60 hours of the course work for the undergraduate degree.
3. GRE, Praxis Core or equivalent

Degree Requirements:
1. All students must complete 33 hours of course work

Major Required Courses

CIED 5923 Second Language Acquisition 3
CIED 5933 Second Language Methodologies 3
CIED 5943 Teaching People of Other Cultures 3
CIED 5953 Second Language Assessment 3
CIED 5393 Introduction to Linguistics 3
CIED 5543 Structures of American English 3
CIED 5313 Principles of Qualitative Research in Curriculum & Instruction 3
SPED 5883 Research in Inclusive Education 3
CIED 6193 Teaching English Language Learners in the Content Areas 3
CIED 599V Special Topics 3
CIED 600V Master's Thesis (or Elective) 3
Total Hours 33

Students are encouraged to take CIED 599V in their first semester as this course introduces students to TESOL and helps them explore the career options through field experiences.

Students who do not wish to complete a thesis may choose one elective to complete the 33 credit hour course of study.

Research Requirements: Students are required to take two research courses (CIED 5313 and SPED 5883). Students wishing not to complete a thesis are required to design and carry out an action research project or to take a comprehensive exam in the final semester of their coursework.

For students who have the experience and desire to complete a formal thesis, this option exists. In such cases, students will form a thesis committee and then propose, write and defend a thesis. The successful defense of the thesis will represent the comprehensive exam for the M.Ed. degree but students must complete at least three hours of master's thesis credit (CIED 600V).

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Theatre (THTR)

Michael Riha
Department Chair
619 Kimpel Hall
479-575-3612
Email: theatre@uark.edu

Department of Theatre Website (http://fulbright.uark.edu/departments/theatre/)

Degrees Conferred:
M.F.A. (THTR)

The Master of Fine Arts in Theatre provides a course of advanced studies within the areas of acting, directing, design, and playwriting. It aims to develop in students a high level of understanding and competence in the chosen degree concentration, leading to professional-level employment in performance and design. Considered to be the terminal degree in the creative aspects of theatre, the M.F.A. program provides a 60-hour concentration in a chosen specialty. The degree is awarded following successful fulfillment of a series of academic and performance/production requirements.

M.F.A. in Theatre

Prerequisites to the M.F.A. Program: A student entering graduate studies in the Department of Theatre should have a minimum of 24 semester hours in undergraduate drama/theatre credit. In the event a student does not satisfy this requirement, the student and an adviser will assess the student's needs and establish a plan of study that will prepare the student for advanced degree work. The GRE may be required based on the student's undergraduate GPA in accordance with Graduate School policy.

Admission Procedures: In addition to complying with all Graduate School admission procedures, M.F.A. degree applicants will present an audition and/or portfolio for assessment and evaluation prior to consideration for acceptance.

Degree Requirements: The Master of Fine Arts degree requires 60 hours of approved graduate-level coursework that is focused in one of three study tracks: Performance (Acting and Directing), Playwriting, or Design. Specific course requirements and related production requirements are determined in conference with the particular track adviser. All students will produce a thesis (6 hours credit) prior to graduation. This thesis will take the form of a performance, design or playwriting project with appropriate written research and documentation to support it. Both the proposed thesis project and the final product shall be subject to review and approval by the student's thesis committee.

Each student will be reviewed annually. Departmental faculty will determine whether sufficient progress has been made to warrant continuation into the subsequent year of study and eventual graduation.

A final examination will be administered to all graduating M.F.A. students. This examination will allow students to demonstrate their knowledge and understanding of theatre at a level appropriate to those who have reached the end of their particular course of studies.

All course credits presented for graduation must be graded "C" or better.

Up to 18 hours of credit may be waived for those students entering the M.F.A. program and already holding the M.A. degree in theatre or drama. However, a minimum of 42 hours of graduate-level courses and four regular semesters must be completed on the Fayetteville campus.

Departmental requirements may be waived by the faculty in theatre only upon receipt of evidence of equivalent learning or skill resulting from earlier education or experience. Students not holding a bachelor's degree in drama may be required to take supplemental coursework and/or demonstrate proficiency in the creative areas of drama.

Graduate Faculty

Burrow, Jason E., M.M. (Ohio University), B.M. (University of Arkansas), Assistant Professor, 2015.
Dwyer, Mavourneen, M.F.A. (University of Texas at Austin), B.A. (University of Montreal), Associate Professor, 1998.
Frank, Kate L., M.F.A. (University of Arkansas), B.F.A. (California State University-Los Angeles), Lecturer, 2006.
Hicks, Morgan, M.F.A. (University of Arkansas), M.A. (Missouri State University), B.F.A. (Arkansas State University), Assistant Professor, 2007.
Irish, Shawn D., M.F.A. (University of Arkansas), B.A. (Missouri Southern State University), Assistant Professor, 2013.
Landman, Michael, M.F.A. (Columbia University), B.A. (State University of New York at Binghamton), Associate Professor, 2004.

Martin, Patricia, M.F.A. (Purdue University), B.A. (Rollins College), Professor, 1995.
Marzolf, Steven, M.F.A. (University of San Diego), B.A. (University of Wisconsin—Green Bay), Lecturer, 2015.
Millett, Joseph D., M.F.A. (University of Southern California), B.A. (Union College), Visiting Assistant Professor, 2015.
Wade, Les, Ph.D. (University of California-Santa Barbara), M.F.A. (University of Georgia), M.A. (Duke University), B.A. (Tulane University), Assistant Professor, 2011.
Walch, John S., M.F.A. (University of Texas at Austin), B.A. (Colorado College), Assistant Professor, 2016.
Wilkerson, Weston, M.F.A. (University of Tennessee), B.A. (Texas A&M University), Assistant Professor, 2014.

Courses

THTR 5123. Theatrical Design Rendering Techniques. 3 Hours.
Investigation of drawing and painting methods and materials useful to theatrical designers. Integration of graphic communication with overall production conceptualization will be explored through examination of various theatre styles and periods. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

THTR 5133. Design Portfolio Development. 3 Hours.
Exploration and practice of the skills and techniques used to prepare and present a professional design portfolio and materials in order to successfully interview for a career in the theatre. Prerequisite: Graduate Standing in Theatre or by instructor permission. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

THTR 5143. History of Decor for the Stage. 3 Hours.
An overview of architectural decoration and its application to theatrical design from the Predynastic Period (4400-3200 B.C.) through the Art Deco period with references to contemporary decor. Prerequisite: Graduate standing. (Typically offered: Irregular)

THTR 5161. Musical Theatre Orchestra. 1 Hour.
A music ensemble class made up of students from all majors who will rehearse together and perform as the pit orchestra for the musical produced by the Department of Theatre. Instrumentation and musical styles vary from show to show. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

THTR 5173. Drafting for the Designer. 3 Hours.
Focuses on industry standard practices of drafting. Students will study and execute design drafting packages for the theatre, including but not limited to Designer Drawings, Painter's Elevations, Props Packages, Lighting Plots and Sections. Prerequisite: Graduate Standing in Theatre or by instructor permission. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

THTR 5183. Scene Design Studio. 3 Hours.
Individual and advanced projects in designing scenery for various theatrical genres as well as non-theatrical applications with emphasis on the design process involving play script analysis, text analysis, and research. Collaboration skills and advanced rendering techniques will be explored. Contributes to on-going portfolio development. Prerequisite: THTR 4653 or THTR 5653 (formerly THTR 4653) or instructor consent. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

THTR 5193. Scene Technology Studio. 3 Hours.
Individual and advanced projects in scenic techniques with emphasis on scene painting, drafting, rendering, properties design, or scenic crafts as determined by student need. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

THTR 5213. Costume Design. 3 Hours.
Advanced study of the art and practice of stage costume design. Emphasis on the expression of character through costume. Development of rendering and research skills. Portfolio development. (Typically offered: Irregular)

THTR 5283. Costume Design Studio. 3 Hours.
Individual and advanced projects in designing costumes for various theatrical genres with emphasis on the design process involving text interpretation, character analysis, and research. Collaboration skills and advanced rendering techniques will be explored. Contributes to on-going portfolio development. Prerequisite: THTR 3213 or THTR 5213 or instructor consent. (Typically offered: Fall) May be repeated for up to 9 hours of degree credit.

THTR 5293. Costume Technology Studio. 3 Hours.
Individual and advanced projects in costume construction and techniques with emphasis on flat pattern, draping, corsetry, tailoring or costume crafts as determined by student need. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

THTR 5353. Stage Lighting Technology. 3 Hours.
The thorough examination of the technology of equipment that supports the art of stage lighting design: theory, operating principles and specification of lamps, fixtures, control systems and special effect hardware will be explored. Prerequisite: Graduate standing. (Typically offered: Irregular)

THTR 5383. Lighting Technology Studio. 3 Hours.
Individual and advanced projects in lighting technology with emphasis on light sources, lighting control, equipment design and specification and the mechanics of lighting. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

THTR 5393. Lighting Design Studio. 3 Hours.
Individual projects in lighting design with emphasis on the design process involving script interpretation, design aesthetics and research. Lighting design applications to a variety of venues will be studied. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

THTR 5413. African American Theatre History 1950 to Present. 3 Hours.
(Formerly THTR 4463.) A chronological examination of African-American theatre history from 1950 to the present through the study of African-American plays and political/social conditions. Upon completion of this course the student should be familiar with the major works of African-American theatre and have a deeper understanding of American History. Graduate degree credit will not be given for both THTR 4463 and THTR 5413. (Typically offered: Spring)

THTR 542V. Graduate Acting Studio. 1-3 Hour.
Provides actors with intensive opportunities to explore specific aspects of their craft. Sample topics include characterization, Chekhov, Pinter, Brecht, improvisation and mask work. Topics vary each semester. Prerequisite: Graduate standing in Theatre. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

THTR 5432. Graduate Voice and Speech I. 2 Hours.
Teaches how to build clear vocal production using proper breath support, grounded in the Alexander technique. Emphasis on the connection between breath and thought, learning to undo inadequate vocal habits, and vocal hygiene. Prerequisite: Graduate standing in Theatre. (Typically offered: Fall) May be repeated for up to 4 hours of degree credit.
THTR 5443. Graduate Acting: Period Styles. 3 Hours.
Styles of acting in relation to French and English Dramatic Literature (16th-19th Centuries). This course also examines the historical and cultural influences that shaped each genre. A period dance component is included. Prerequisite: Graduate standing in Theatre. (Typically offered: Spring)

THTR 545V. Musical Theatre Performance. 1-3 Hour.
Theory and techniques of performing a singing role for the theatre. Integrates acting and vocal techniques and examines the relationship between score and text. Prerequisite: Graduate standing in Theatre. (Typically offered: Irregular)

THTR 5463. Audition Techniques. 3 Hours.
A thorough study and practical application of audition skills and techniques. This course will equip the student with prepared audition pieces and experience in cold reading, on-camera work, and improvisation. The course also explores the practical needs of the actor; from how to get an audition to how to prepare a resume. Prerequisite: Graduate standing in Theatre. (Typically offered: Fall, Spring and Summer)

THTR 5473. Graduate Acting: Shakespeare. 3 Hours.
Analysis of Shakespeare for performance. Work will include the plays of Shakespeare and his contemporaries, including cultural and theatrical contexts required for understanding the scripts. Prerequisite: Graduate standing in Theatre. (Typically offered: Irregular)

THTR 548V. Meisner Technique I. 1-3 Hour.
Acting theory and exercises of Sanford Meisner, including repetition work, connecting with partner, three moment game, activities, and emotional preparation. (Typically offered: Irregular)

THTR 549V. Meisner Technique II. 1-3 Hour.
Continuation of Meisner Technique I. Incorporation of theory and advanced exercises of the Meisner Technique into the playing of text. Prerequisite: THTR 548V. (Typically offered: Irregular)

THTR 5511. Alexander Technique Lessons. 1 Hour.
Students will become aware of habitual patterns of tension and how these patterns interfere with performance, learning, and overall health. The Technique offers practical skills for improving coordination and for re-gaining a sense of ease of movement in all activities. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

THTR 5523. Writing for Television and Screen. 3 Hours.
Advanced study and practice in writing for the small and big screen, with focus on writing for television. This writing workshop is an investigation into the form, structure, and vocabulary of writing for television, designed to give students tools, strategies, and practice in writing for television. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

THTR 5533. Graduate Playwriting: Special Projects. 3 Hours.
Advanced study and practice in the area of playwriting. The area of concentration will be determined by the student’s specific writing project(s). Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

THTR 5543. Creating a One-Person Show. 3 Hours.
Actors learn to use compelling personal experiences and interests in the creation of a unique one-person show. Includes exploration in characterization, staging and playwriting. Culminates in the public presentation of a short one-person show. Prerequisite: Graduate standing in Theatre. (Typically offered: Irregular)

THTR 5552. Graduate Voice and Speech II. 2 Hours.
A continuation of Graduate Voice and Speech I, exploring more closely the connection between breath support and volume, pitch, range, resonance and articulation. Prerequisite: THTR 5432. (Typically offered: Spring)

THTR 5562. Graduate Voice and Speech III. 2 Hours.
Continuation of Graduate Voice and Speech II, focusing on the classification of vowels and consonants according to the International Phonetic Alphabet (IPA). Prerequisite: THTR 5552. (Typically offered: Irregular)

THTR 5572. Graduate Voice and Speech IV. 2 Hours.
Continuation of Graduate Voice and Speech III. Extension of the application of the IPA to the analysis of different accents of individuals for whom English is a second language. Approximately eight dialects of English will be examined. Prerequisite: THTR 5562. (Typically offered: Irregular)

THTR 5593. Acting and Directing Absurdist Theatre. 3 Hours.
This course focuses on a particular dramatic style that developed following World War II: Absurdism. In scene presentation projects, students will grapple with the unusual challenges acting and directing these plays, as well as explore the cultural contexts, philosophies and theatrical traditions that led to their invention. Prerequisite: Graduate standing in Theatre. (Typically offered: Irregular)

THTR 5613. Graduate Directing Principles. 3 Hours.
Theory and technique of directing realistic drama: script analysis; spatial considerations of composition and picturization; development in production of the Aristotelian concepts of plot, character, thought, diction, music (sound), and spectacle. Prerequisite: Graduate standing. (Typically offered: Irregular)

THTR 5653. Scene Design. 3 Hours.
(Formerly THTR 4653.) Theory and practice in the art of scenic design, including historical and contemporary styles and procedures. Graduate degree credit will not be given for both THTR 4653 and THTR 5653. Prerequisite: THTR 1323, THTR 1321L, THTR 2313 and THTR 2513. (Typically offered: Fall Odd Years)

THTR 5663. Directing Modern Drama. 3 Hours.
Studio course exploring the challenges of directing post-19th Century dramatic literature. Individual projects in collaboration with actors. Sample dramatic literature includes styles such as Realism, Expressionism, Absurdism, post-Modernism and Epic Theatre. Topics vary each semester. Prerequisite: Graduate standing in Theatre. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

THTR 5673. Adapting and Directing Non-Theatrical Texts. 3 Hours.
Offers directors practice in the adaptation and staging of non-theatrical prose, poetry and current events. Individual projects in collaboration with actors. Prerequisite: Graduate standing in Theatre. (Typically offered: Irregular)

THTR 5683. Directing Studio. 3 Hours.
Hands-on exploration into the direction of historical and contemporary texts and styles, including Greek, Roman, Shakespeare, Realism, American and international scripts and the adaptation of non-theatrical material. Topics vary each semester. Includes discussion and investigation of the theatrical arts and collaborative and production processes. Prerequisite: MFA Directing student or instructor consent. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

THTR 5691. Scene Study for Directing Studio. 1 Hour.
Participation as an actor in scenes presented for the graduate Directing Studio course. Varying historical and contemporary texts and styles each semester. Class meets one hour each week, plus outside rehearsals, depending on casting. Prerequisite: Instructor consent. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.
THTR 5713. Directing Classics. 3 Hours.
Explores the challenges of directing classic texts. Individual projects in collaboration with actors on a wide variety of pre-20th Century dramatic literature. Topics vary each semester. Prerequisite: Graduate standing in Theatre. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

THTR 5723. History of the Theatre I. 3 Hours.
A comprehensive study of the theatre in different cultures and ages, as an institution, as an art, and as a vision of life. (Typically offered: Fall)

THTR 5733. History of the Theatre II. 3 Hours.
A continuation of THTR 5723. (Typically offered: Spring)

THTR 5763. Dramatic Criticism. 3 Hours.
Analysis of critical theories from Aristotle to the present; interrelationships of theatre disciplines as well as the influence of the church, state, and press on dramatic criticism. Prerequisite: Senior or graduate standing. (Typically offered: Irregular)

THTR 5773. Script Analysis. 3 Hours.
Introduces the fundamentals of dramatic structure, in plays from the classical era to the present, with emphasis on how a dramatic work conveys cultural meaning and how it informs the production approaches of actors, directors, and designers. (Typically offered: Irregular)

THTR 5783. Viewpoints. 3 Hours.
Exploration and application of the Viewpoints movement technique. Prerequisite: Graduate standing in Theatre. (Typically offered: Irregular)

THTR 5833. Scene Painting. 3 Hours.
(Formerly THTR 4833.) A studio class in painting techniques for the theatre. Exercises in color, textures, styles, and execution. Graduate degree credit will not be given for both THTR 4833 and THTR 5833. Prerequisite: THTR 1321L and THTR 2313. (Typically offered: Spring Odd Years) May be repeated for up to 6 hours of degree credit.

THTR 590V. Independent Study. 1-18 Hour.
Individually designed and conducted programs of reading and reporting under guidance of a faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

THTR 591V. Special Topics. 1-3 Hour.
Classes not listed in the regular curriculum, offered on demand on the basis of student needs and changes within the profession. Prerequisite: Graduate standing in Theatre or Instructor consent required. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

THTR 592V. Internship. 1-6 Hour.
Supervised practice in the various arts and crafts of the theatre (e.g. full design responsibility for a production; box office management; actor apprenticeship in a professional company). (Typically offered: Irregular)

THTR 5953. Theatre Study in Britain. 3 Hours.
(Formerly THTR 4953.) Study of the components of stage production through attending and critiquing a wide variety of classical, modern, and avant garde theatre productions in England; includes tours of London and historical British sites and seminars with British theatre artists. Graduate degree credit will not be given for both THTR 4953 and THTR 5953. (Typically offered: Summer)

THTR 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

World Languages, Literatures, and Cultures (WLLC) French-German-Spanish

Steven Bell
Department Chair
examination covering course work and a reading list. Upon admission to this program the candidate will be assigned an adviser who, in consultation with the candidate, will design a suitable program for the candidate. The adviser, in consultation with other members of the department, will select an examination committee for the comprehensive written and oral examinations. Detailed program descriptions, including reading lists and examination procedures, are available from the department.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

French Concentration
The Master of Arts degree in Modern Languages, French Concentration offers course work related to the literary and cultural histories of the greater Francophone world, focusing on France. The program provides advanced preparation in literary analysis and research and offers training for teaching French at the college level, including the most recent technological techniques in teaching foreign languages. Graduates of the program receive a solid preparation to pursue a Ph.D. or to teach at the college or secondary levels. Our comprehensive curriculum enables students to pursue careers in education, government, international organizations and other business opportunities either abroad or within the United States. In conjunction with the Comparative Literature and Cultural Studies program (CLCS), the program contributes to the master's and Ph.D. programs for students working in either Francophone literature, translation, French literature or French cultural studies.

Requirements for the Master of Arts Degree in Modern Languages, French Concentration: Aside from deficiencies, a minimum of 36 semester hours is required for the degree; six of the hours must be selected from the following courses: WLLC 4023, WLLC 4033, WLLC 5063 or other approved WLLC courses. Each M.A. candidate will submit a list of their course work to the graduate adviser before taking the comprehensive exam, which is comprised of a written and an oral exam. The content of the M.A. exam covers course work and the reading list. All course selections must be approved by the graduate adviser.

Students should also be aware of Graduate School requirements with regard to master's degrees (p. 457).

Program Description: Students pursuing the M.A. degree in Spanish will choose to follow one of two concentrations.

The first concentration is a traditional M.A. in Hispanic literature and culture with a strong emphasis on literary analysis. This concentration is recommended for students likely to pursue work toward a Ph.D. in literature and cultural studies after the completion of the M.A. The second concentration provides students with an alternative to the traditional M.A. in Hispanic literature and culture that places an additional emphasis on coursework in second language acquisition and language teaching. This concentration is recommended for students interested in pursuing a Ph.D. in Spanish applied linguistics after the completion of the M.A., and for those who are interested in language teaching as a career.

Requirements for the Master of Arts in Spanish: Aside from deficiencies, a minimum of 36 graduate credit hours is required for the degree. During their first semester, all students must take WLLC 5063 Teaching Foreign Languages on the College Level. In addition, 24 credit hours of Spanish literature at the 5000-level or higher is required. The remaining 9 credit hours comes from one of two concentrations listed below.

Literature concentration: Students will take SPAN 5703 Special Topics (in literature) or an equivalent research seminar, as approved by the graduate advisor. In this course, students will be required to present a research paper that meets professional research methods and standards. Students will also take an additional 6 credit hours in literature.

The comprehensive examination for the Literature concentration will include five areas of focus. This includes two periods of concentration (Latin America and Spain) and at least two periods before 1900. The periods of concentration are Colonial, 19th century, 20th century, and U.S. Latino/a for Latin America, and Medieval, Golden Age, 19th century, and 20th century for Spain.

Language Learning and Teaching concentration: Students will take SPAN 5703 Special Topics (in language learning and teaching) or an equivalent research seminar, as approved by the graduate advisor. In this course, students will be required to present a research paper that meets
professional research methods and standards. Students will also take an additional 6 credit hours in language learning and teaching.

For the Language Learning and Teaching concentration, the comprehensive examination will include five areas of focus. One area will be language learning and teaching. The four others will consist of literature and culture from four historical periods of the Hispanic world, including at least one period from each tradition (Latin America and Spain) and at least one period before 1900. The periods of concentration are Colonial, 19th century, 20th/21st century, and U.S. Latino/a for Latin America, and Medieval, Golden Age, 19th century, and 20th/21st century for Spain.

**Literature Concentration**

Requirements for the Spanish M.A. Literature Concentration:

- 6 credit hours of additional Spanish literature at the 5000-level or higher
- **SPAN 5703** Special Topics (in literature) 3
  - or an equivalent research seminar in literature, as approved by the graduate advisor

**Total Hours** 9

**Language Learning and Teaching Concentration**

Requirements for the Spanish M.A. Language Learning and Teaching Concentration:

- 6 credit hours of additional language learning and teaching courses
- **SPAN 5703** Special Topics (in language learning and teaching) 3
  - or an equivalent research seminar in language learning and teaching, as approved by the graduate advisor

**Total Hours** 9

**Graduate Faculty**

- **Almenara, Erika**, Ph.D. (University of Michigan), M.A. (University of Wisconsin-Milwaukee), B.A. (Feminine University of the Sacred Heart), Assistant Professor, 2015.
- **Arenberg, Nancy M.**, Ph.D. (University of Arizona), M.A. (University of Illinois, Champaign-Urbana), B.A. (Grinnell College), Associate Professor, 1996.
- **Bell, Steven M.**, Ph.D. (University of Kansas), M.A. (University of Kentucky), B.A. (University of Arizona), Associate Professor, 1992.
- **Berkovich, Nadja**, Ph.D. (University of Illinois), M.A. (Boston College), B.A. (St. Petersburg Pedagogical Herzen University), Clinical Assistant Professor, 2015.
- **Brito, Edvan P.**, Ph.D., M.S. (Georgetown University), M.A. (Howard University), B.A. (Universidade de São Paulo, Brazil), Assistant Professor, 2016.
- **Calabretta-Sajder, Ryan C.**, Ph.D. (Middlebury College), M.A. (Indiana University-Bloomington), B.A. (Dominican University), Assistant Professor, 2013.
- **Christiansen, Hope L.**, Ph.D. (University of Kansas), M.A., B.A. (Kansas State University), Associate Professor, 1990.
- **Clowney, Nicole**, J.D. (Yale University), M.A. (University of Kentucky), B.A. (University of Chicago), Lecturer, 2014.
- **Condray, Kathleen**, Ph.D., M.A.. (University of Illinois-Urbana-Champaign), B.A. (University of Arkansas), Associate Professor, 1999.
- **Foote, Rebecca K.**, Ph.D. (University of Illinois at Urbana-Champaign), M.A. (Rice University), B.A. (University of Houston), Assistant Professor, 2017.
- **Fredrick, David Charles**, Ph.D. (University of Southern California), M.A., B.A. (University of Kansas), Associate Professor, 1991.
- **Fukushima, Tatsuya**, Ph.D., M.A. (Oklahoma State University), B.A. (Kanto Gakuin University, Japan), Associate Professor, 2000.
- **Haydar, Paula Marie**, Ph.D., M.F.A. (University of Arkansas), M.Ed., B.S. (University of Massachusetts), Clinical Assistant Professor, 2006.
- **Hinds, Heather Rae**, M.A. (University of Arkansas), B.S. (University of Central Missouri), Instructor, 2008.
- **Hoyer, Jennifer M.**, Ph.D., M.A. (University of Minnesota-Twin Cities), B.A. (University of Tulsa), Associate Professor, 2007.
- **Jones, Linda Carol**, Ph.D. (University of New Mexico), M.A. (University of Arkansas), M.A. (University of Arizona), B.A. (Northeast Louisiana University), Associate Professor, 1988.
- **Levine, Daniel**, Ph.D. (University of Cincinnati), B.A. (University of Minnesota), University Professor, 1980.
- **Lorenzo, Violeta**, Ph.D. (University of Florida), Assistant Professor, 2014.
- **Magnetti, Brenda Monica**, M.A. (University of Arkansas), B.A. (Ouachita Baptist University), Instructor, 2007.
- **Mahmoud, Rania**, Ph.D. (University of Washington), M.A. (Old Dominion University), B.A., (University of Alexandria, Egypt), Assistant Professor, 2017.
- **Omura, Mafumi**, M.A. (University of Iowa), B.A. (Kansai Gaidai University), Instructor, 2016.
- **Ruiz, M. Reina**, Ph.D. (Washington University in St. Louis), M.A. (Kansas State University), B.A. (University of Leon, Spain), Associate Professor, 2001.
- **Sterling, Brett E.**, Ph.D., M.A. (Vanderbilt University), B.A. (University of Arkansas), Assistant Professor, 2013.
- **Su, Danjie**, Ph.D. (University of California, Los Angeles), M.A., B.A. (Sun Yatsen University, China), Assistant Professor, 2017.
- **Ten Haaf, Rachel E.**, Ph.D. (University of Michigan), M.A. (University of Illinois, Urbana-Champaign), Assistant Professor, 2016.
- **Venarucci, Rhodora**, Ph.D., M.A. (University at Buffalo), B.A. (University of Michigan), Assistant Professor, 2013.
- **Viennot, Gilles André Fernand**, Ph.D. (University of Kansas), M.A. (University of Paris VII Jussieu), M.A. (University of Besançon), Assistant Professor, 2015.
Arabic Courses
ARAB 570V. Special Topics. 1-6 Hour.
(Formerly ARAB 470V.) May be offered in a topic not specifically covered by courses otherwise listed. Graduate degree credit will not be given for both ARAB 470V and ARAB 570V. (Typically offered: Irregular) May be repeated for degree credit.

French Courses
FREN 5003. French Grammar and Phonetics. 3 Hours.
Systematic review of principles of French grammar and syntax; comprehensive presentation of French phonetics. (Typically offered: Irregular)

FREN 5033. Advanced French Conversation. 3 Hours.
This course will provide a small discussion environment in which graduate students will improve their command of spoken French in an interactive setting. Discussion will concentrate on current cultural issues in the French speaking world. (Typically offered: Irregular)

FREN 5213. French Culture & Civilization. 3 Hours.
An analysis of French cultural symbols and attitudes as observed in their historical, economical, political, social, educational, and linguistic aspects. (Typically offered: Irregular)

FREN 5333. Old French Literature. 3 Hours.
An intensive study of French Medieval Literature from the Chansons de Geste to Villon, including an in-depth analysis of the genres and their evolution, and of the major authors of the times. (Typically offered: Irregular)

FREN 5353. Survey of French Poetry. 3 Hours.
A comprehensive study of French poetry from the Middle Ages to the twentieth century, focusing on close readings of individual poems. This course will cover literary movements and trends of the periods and presents the terminology required to do explication de texte. (Typically offered: Irregular)

FREN 5433. French 16th-Century Literature. 3 Hours.
A survey of representative writers of the sixteenth century. (Typically offered: Irregular)

FREN 5543. French 17th-Century Literature. 3 Hours.
A survey of representative writers of the seventeenth century. (Typically offered: Irregular)

FREN 5663. French Short Story. 3 Hours.
An introduction to the French short story, focusing on close readings of a variety of contes and nouvelles from the Middle Ages through the twenty-first century. (Typically offered: Irregular)

FREN 5673. French 18th-Century Literature. 3 Hours.
French 18th-Century literature. (Typically offered: Irregular)

FREN 5703. Special Topics. 3 Hours.
May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

FREN 575V. Special Investigations. 1-6 Hour.
Special investigations. (Typically offered: Irregular) May be repeated for degree credit.

FREN 5773. Survey of Francophone Literature. 3 Hours.
A survey of representative texts in the field of sub-Saharan and North African literature concentrating on postcolonial novels using contemporary critical approaches. (Typically offered: Irregular)

FREN 5783. The French Nineteenth-Century Novel. 3 Hours.
The French Nineteenth-Century novel. (Typically offered: Irregular)

FREN 5813. French 20th-Century Theatre. 3 Hours.
French 20th-Century theatre. (Typically offered: Irregular)

German Courses
GERM 470V. Special Topics. 1-3 Hour.
May be offered in a topic not specifically covered by courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GERM 5013. Germany and the Holocaust: The Significance of the Holocaust in Differentiated Contexts. 3 Hours.
(Formerly GERM 4013.) Taught in English. Topics covering the role of the Holocaust in German history, culture, art, language and German Studies. Equal emphasis will be placed on historical competence and philosophical/theoretical inquiry, addressed from a variety of media and primary and secondary sources. Graduate degree credit will not be given for both GERM 4013 and GERM 5013. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GERM 5043. German Cinema. 3 Hours.
(Formerly GERM 4043.) Presents a range of German films in cultural-historical context; vocabulary and structures for discussing film, film history, and film theory in German. Graduate degree credit will not be given for both GERM 4043 and GERM 5043. Prerequisite: GERM 3003. (Typically offered: Irregular)

GERM 5123. The German Novella. 3 Hours.
An intensive study of the novella as a genre from its origin to the present. Prerequisite: GERM 3013. (Typically offered: Irregular)

GERM 5133. The German Drama. 3 Hours.
A study of the development of the forms and themes of the German drama from the middle ages to the present. Prerequisite: GERM 3013. (Typically offered: Irregular)

GERM 5143. German Lyric Poetry. 3 Hours.
A study of the forms and themes of German lyric poetry from the middle ages to the present. (Typically offered: Irregular)

GERM 5223. Early German Literature: Middle Ages to the Enlightenment. 3 Hours.
Early German literature. (Typically offered: Irregular)

GERM 5273. German Literature: Enlightenment, Storm and Stress, and Classicism. 3 Hours.
German literature. (Typically offered: Irregular)

GERM 5343. Early Modern German Literature: Late 19th and Early 20th Century. 3 Hours.
Early modern German literature. (Typically offered: Irregular)

GERM 5363. German Literature after 1945. 3 Hours.
German literature after 1945. (Typically offered: Irregular)

GERM 5703. Special Topics. 3 Hours.
May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Greek Courses
GREK 5003. Greek Lyric Poetry. 3 Hours.
(Formerly GREK 4003.) Readings from selected Greek lyric poems, to be chosen from several appropriate authors from the 7th through the 5th centuries BCE: Archilochus, Hipponax, Sappho, Alcaeus, Tyrtaeus, Mimnermus, Semonides, Solon, Xenophanes, Theognis, Pindar, Bacchylides. Graduate degree credit will not be given for both GREK 4003 and GREK 5003. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)
GREK 5013. Greek Epic Poetry. 3 Hours.  
(Formerly GREK 4013.) Study of the primary works of Greek hexameter poetry, including Homer, Hesiod, and/or the Homeric Hymns, with special attention to issues of oral composition and performance. Graduate degree credit will not be given for both GREK 4013 and GREK 5013. Prerequisite: GREK 2013. (Typically offered: Irregular)

GREK 5023. Greek Philosophy. 3 Hours.  
(Formerly GREK 4023.) Study of representative works of Greek philosophy, including those of the Pre-Socratics, Plato, and/or Aristotle. Graduate degree credit will not be given for both GREK 4023 and GREK 5023. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5033. Herodotus or Thucydides. 3 Hours.  
(Formerly GREK 4033.) Readings of Herodotus, Book VII, and Thucydides, Book VI; collateral readings on the Persian and Peloponnesian Wars. Graduate degree credit will not be given for both GREK 4033 and GREK 5033. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5043. Greek Drama. 3 Hours.  
(Formerly GREK 4043.) Readings of two tragedies and one comedy; a study of the Greek theatre. Graduate degree credit will not be given for both GREK 4043 and GREK 5043. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5053. Greek Syntax and Composition. 3 Hours.  
(Formerly GREK 4053.) Greek syntax and composition. Graduate degree credit will not be given for both GREK 4053 and GREK 5053. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5063. Hellenistic Poetry. 3 Hours.  
(Formerly GREK 4063.) Selections from significant post-classical authors, including Callimachus, Theocritus, Bion, Moschus, Herondas, Apollonius of Rhodes, and/or poets of the Greek Anthology. Special attention to archaic and classical influences, contemporary Hellenistic culture, and Roman responses. Graduate degree credit will not be given for both GREK 4063 and GREK 5063. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5073. Ancient Greek Novel. 3 Hours.  
(Formerly GREK 4073.) Study of the development of the Greek novel including the works of Lucian, Longus, Heliodorus, and/or Achilles Tatius. Graduate degree credit will not be given for both GREK 4073 and GREK 5073. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5083. Greek Epigraphy. 3 Hours.  
(Formerly GREK 4083.) Study of inscriptions, especially Attic, in their historical and social contexts, from the 8th century BCE to the Hellenistic/Roman period. Training in epigraphical conventions and symbols. Graduate degree credit will not be given for both GREK 4083 and GREK 5083. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5093. Biblical and Patristic Greek. 3 Hours.  
(Formerly GREK 4093.) Selected readings from appropriate texts, varying by semester, including the Septuagint, New Testament, Apostolic Fathers, and other patristic literature to the 5th century CE. Reading and discussion of selected texts in major genres. Graduate degree credit will not be given for both GREK 4093 and GREK 5093. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5103. Greek Oratory. 3 Hours.  
(Formerly GREK 4103.) Readings from selected speeches, to be chosen from one or more appropriate authors: Lysias, Antiphon, Demosthenes, Isocrates, Andocides. Study of sophism and rhetoric of Athens in the 5th and 4th centuries BCE. Graduate degree credit will not be given for both GREK 4103 and GREK 5103. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 575V. Special Investigations. 1-6 Hour. 
Special investigations. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

Japanese Courses

JAPN 5313. Language and Society of Japan. 3 Hours.  
(Formerly JAPN 4313.) The primary objective of this course is to investigate the way the Japanese language reflects the beliefs and custom of the Japanese people as a social group. For comparison purposes, this course makes reference to studies in American language and culture. Proficiency in Japanese not required. Graduate degree credit will not be given for both JAPN 4313 and JAPN 5313. (Typically offered: Fall)

JAPN 5333. Professional Japanese I: Business Writing. 3 Hours.  
(Formerly JAPN 4333.) This course aims to familiarize the students with formats, vocabulary, and expressions in Japanese business correspondence. Emphasizes career-ready Japanese language proficiency. Graduate degree credit will not be given for both JAPN 4333 and JAPN 5333. Prerequisite: JAPN 3116 or equivalent Japanese proficiency. (Typically offered: Fall)

Russian Courses

RUSS 5123. Survey of Russian Literature from Its Beginning to the 1917 Revolution. 3 Hours.  
(Formerly RUSS 4123.) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English. Graduate degree credit will not be given for both RUSS 4123 and RUSS 5123. (Typically offered: Irregular)

RUSS 5133. Survey of Russian Literature Since the 1917 Revolution. 3 Hours.  
(Formerly RUSS 4133.) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English with readings in English. Graduate degree credit will not be given for both RUSS 4133 and RUSS 5133. (Typically offered: Irregular)

This course is cross-listed with WLIT 5133.

RUSS 575V. Special Investigations. 1-6 Hour.  
Special investigations. (Typically offered: Fall and Spring) May be repeated for degree credit.

Spanish Courses

SPAN 5073. Introduction to Hispanic Linguistics. 3 Hours.  
Deepens students' knowledge of the Spanish language through an introduction to the discipline of Linguistics, which is the field of science that studies human language. Areas of Hispanic linguistics that will be covered include phonology (sound system), morphology (word structure), and syntax (sentence structure). (Typically offered: Irregular)

SPAN 5203. Medieval Spanish Literature. 3 Hours.  
From the 'Jarchas' to the Celestina. (Typically offered: Irregular)

SPAN 5233. Golden Age Novel. 3 Hours.  
Major works of Spanish prose fiction from the 16th and 17th centuries, with close reading of major works. (Typically offered: Irregular)

SPAN 5243. Golden Age Poetry and Drama. 3 Hours.  
History and development of those genres in the 16th and 17th centuries, with close reading of major works. (Typically offered: Irregular)

SPAN 5253. Colonial Literature and Culture. 3 Hours.  
An introductory course to the history, culture and literature of colonial Spanish America from 1492 until 1810. The course will cover representative colonial and indigenous texts and their contexts including Renaissance, Baroque, and travel literature of the Eighteenth Century. The course will be taught in Spanish. (Typically offered: Irregular)
SPAN 5273. Survey of 19th Century Spanish Literature. 3 Hours.
A graduate-level survey of Spanish literature from Neoclassicism to the Generation of 1898. (Typically offered: Irregular)

SPAN 5283. Survey of Contemporary Spanish Literature. 3 Hours.
A graduate-level survey of Spanish literature from the Transition to the present. (Typically offered: Irregular)

SPAN 5343. Survey of 20th Century Spanish Literature. 3 Hours.
A graduate-level survey of Spanish literature from the Generation of 1898 to the Transition. Prerequisite: Graduate standing. (Typically offered: Irregular)

SPAN 5393. 19th Century Spanish American Literature. 3 Hours.
Study of representative literary works from Independence (1810) to 1900's. The course covers Neoclassicism, Romanticism, Realism/Naturalism, and Modernism and the role of literature in the nation-building process. The course will be taught in Spanish. (Typically offered: Irregular)

SPAN 5403. Spanish American Theatre. 3 Hours.
Historical examination of the theatre in Spanish America, with close analysis particularly of representative works and movements in the 20th century. (Typically offered: Irregular)

SPAN 5433. Cervantes: Don Quijote. 3 Hours.
A close reading of Spain's greatest literary masterpiece. (Typically offered: Irregular)

SPAN 5453. Cinema and Literature. 3 Hours.
This course examines several Latin American and Spanish texts and their film adaptations as well as the mainstream film making trends in the Hispanic world. (Typically offered: Irregular)

SPAN 5463. 20th Century Spanish American Literature. 3 Hours.
Critical survey of major movements and outstanding representatives works in 20th century prose and poetry, from the Mexican Revolution and the avant-garde to the contemporary boom and post-boom. (Typically offered: Irregular)

SPAN 5563. Latino Youth Bilingual Service Learning Project. 3 Hours.
The Latino Youth Bilingual Project is a service learning course for students in Spanish and Latin American and Latin Studies. Readings on Latino education policies and challenges, bilingualism, and the immigrant experience. Students commit from 15 to 30 hours of mentoring Latino youth at local schools during the semester (in addition to class meeting times) and complete a research project on Latino education. Prerequisite: Graduate standing. (Typically offered: Irregular)

SPAN 5703. Special Topics. 3 Hours.
May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SPAN 575V. Special Investigations. 1-6 Hour.
Special investigations. (Typically offered: Irregular) May be repeated for degree credit.

SPAN 5773. Indigenismo Literature. 3 Hours.
A study of ‘indigenismo’, an intellectual and literary tradition in Latin America examining the history of exploitation and marginalization of indigenous peoples. Readings include texts by Mariategui, Icaza, Andrade, Asturias, Arguedas, Castellanos, and also ‘indigenista’ works in music and the plastic arts. (Typically offered: Irregular)

SPAN 5883. Indigenous Literatures. 3 Hours.
A study of native oral narratives, literary texts and other writing forms in the Americas, from ancient times to the present, including the Andean Khipus, Mesoamerican Codices, and Amazonian mythic narratives. (Typically offered: Irregular)

SPAN 5943. U.S. Latino/a Literatures and Cultures. 3 Hours.
Explores the construction and negotiation of Latino/a identities through the study of literary and filmic texts. Theoretical concepts (e.g. latinidad, Latinization, intra-latin, cultural remittances) will also be studied. Topics of discussion may include: transnationalism, bilingualism, and interactions between different Latino groups. Taught in Spanish. Prerequisite: Graduate standing. (Typically offered: Irregular)

World Languages, Literatures and Cultures Courses

WLLC 5023. Languages, Cultures, and Teaching with Technology. 3 Hours.
This course provides graduate students with innovative ways to teach and communicate through the use of modern technologies as applied to second languages. Topics of discussion include instructional systems design, Web 2.0 technologies, presentation technologies, online facilitation, and pedagogical strategies for using technological tools in language and culture courses. Prerequisite: Graduate standing. (Typically offered: Fall)

WLLC 5033. Languages, Cultures and Teaching with Video. 3 Hours.
This course provides graduate students with the knowledge and skills needed to teach and communicate through the use of video as applied to second languages. Topics of discussion include instructional systems design, development of strong pedagogical strategies for teaching with film, analysis of research focused on subtitling, learning strategies, mental effort, and language and culture development, as well as some videotaping and editing. (Typically offered: Spring)

WLLC 504V. Translation Workshop. 1-6 Hour.
Problems of translation and the role of the translator as both scholar and creative writer; involves primarily the discussion in workshop of the translations of poetry, drama, and fiction done by the students, some emphasis upon comparative studies of existing translations of well-known works. Primary material will vary. Prerequisite: Reading knowledge of a foreign language. (Typically offered: Irregular) This course is cross-listed with ENGL 5043.

WLLC 5063. Teaching Foreign Languages on the College Level. 3 Hours.
Focus on basic methodological concepts and their practical application to college foreign language instruction. (Typically offered: Irregular)

WLLC 5463. Descriptive Linguistics. 3 Hours.
A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Fall) This course is cross-listed with ANTH 5473, ENGL 5463.

WLLC 5723. Language Learning Research and Theory. 3 Hours.
Introduces research and theory in the field of second language learning and acquisition. Develops the ability to critically read and assess published research, while connecting with current theories of how languages are learned. Also introduces the process of carrying out research in language learning. A research project proposal is required. (Typically offered: Irregular)

WLLC 575V. Special Investigations. 1-6 Hour.
Special investigations in world languages, literatures and cultures. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WLLC 5653. Applied Linguistics Seminar. 3 Hours.
Research and discussion in areas of applied linguistics ranging from discourse analysis, literacy, language pedagogy, and language planning to translation theory. Subject matter changes depending on student interest and faculty expertise. Prerequisite: WLLC 5463 or equivalent introduction to linguistics. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
Certificate Programs

The following graduate certificate programs are offered by the University of Arkansas Graduate School:

**Graduate School of Business**
- Business (p. 390)
- Enterprise Systems (p. 401)
- Entrepreneurship (p. 390)

**Department of Computer Science and Computer Engineering (CSCE)**
- Cybersecurity (p. 356) (CYBRGC)

**Department of Curriculum & Instruction (CIED)**
- Applied Behavior Analysis (p. 326) (APBAGC)
- Arkansas Curriculum/Program Administrator (p. 352) (ACPAMC)
- Autism Spectrum Disorders (p. 326) (AUTSGC)
- Building-Level Administration (p. 353) (PSBLMC)
- District-Level Administration (p. 357) (PSDLMC)
- K-12 Online Teaching (p. 152) (ETECGC)
- Special Education Transition Services (p. 364) (SPTSGC)
- STEM Education for K-6 (p. 365) (STEMGC)
- Teaching English to Speakers of Other Languages (http://catalog.uark.edu/graduatecatalog/certificates/tesol/) (TESLGCC)

**Department of English**
- Technical Writing and Public Rhetorics (p. 164) (TWRHGC)

**Program in Educational Statistics & Research Methods (ESRM)**
- Educational Measurement (p. 358) (EDMEMC)
- Educational Psychology (p. 358) (EDPSMC)
- Educational Statistics & Research Methods (p. 358) (EDSTMC)

**Department of Geosciences**
- Geospatial Technologies (p. 181) (GISTGC)

**Department of Industrial Engineering**
- Homeland Security (p. 363) (OMHSGC)
- Lean Six Sigma (p. 363) (OMLSGC)
- Project Management (p. 364) (OMPMGC)

**Interdisciplinary Studies**
- African and African American Studies (p. 351) (AASTGC)
- Cross-Sector Alliances (p. 356) (CSALGC)
- Statistics and Analytics (p. 364) (STANGC)
- Sustainability (p. 365) (SUSTGC)

**Department of Music (MUSC)**
- Advanced Performance (p. 238) (MUSCGC)
- Music Education for Special Needs Students (p. 363) (MESNGC)

**Program in Operations Management**
- Homeland Security (p. 363) (OMHSGC)
- Lean Six Sigma (p. 363) (OMLSGC)
- Project Management (p. 364) (OMPMGC)

**School of Law**
- Business Law (p. 353) (BLAWGC)
- Criminal Law (p. 355) (CRLWGC)

**Advanced Performance (MUSC)**

479-575-4701
E-mail: ekahng@uark.edu (sgates@uark.edu)

Department of Music Website (http://www.uark.edu/depts/uamusic/)

The Graduate Certificate in Advanced Performance is a performance-intensive program for students who already possess the Master of Music or its equivalent. It is designed for all areas of applied study, and is intended for the advanced performer. (Note: The graduate certificate is not a degree.)

**Prerequisites to the Graduate Certificate:** To enter this program, students must be admitted by the Graduate School and should consult with the Director of Graduate Studies in Music for the specific area of study in which they are interested. The Department Chair and the Director of Graduate Studies in Music, in consultation with the faculty of the specific area, will determine acceptance, provisional acceptance contingent on the making up of specific deficiencies, or rejection of the student for admission to the program in the specific area of concentration.

**Requirements for the Graduate Certificate:** In addition to the general requirements of the Graduate School the following conditions must be met:

1. All students seeking admission to the program for the Graduate Certificate must show evidence of outstanding performance aptitude and proficiency and demonstrate clear potential for a career as a professional musician.
2. All applicants must present an audition with advanced repertoire encompassing four different style periods and not lasting less than 30 minutes.
3. All applicants must display proficiency in music theory and history at the Master of Music level or equivalent through transcripts or an entry examination.
4. At the end of the program the student must present a full length recital (ca. 70 min).

The programs of study are listed below. All course selections are subject to the approval of the graduate adviser in consultation with the applied teacher.

**Course Requirements:** 16 hours
I. Applied Music
MUAP 510V  Applied Voice/Instrument  9
MUAP 5201  Graduate Recital I  1

II. Electives
To be selected from music courses at the 4000-6000 level with the consent of the adviser. Possible areas of study include composition, conducting, chamber music, music theory, and music history.
Areas of applied music concentration: Piano, violin, viola, violoncello, string bass, clarinet, bassoon, flute, oboe, alto saxophone, French horn, trombone, baritone, tuba, trumpet, percussion.

African and African American Studies Website (http://aast.uark.edu/)

Graduate Certificate offered (non-degree):
African and African American Studies

Program Description: The African and African American Studies program promotes an interdisciplinary approach to the study of the history, culture, and identity of Africans and African Americans. Graduate students may pursue an African and African American Studies Graduate Certificate after making application to the African and African American Studies program and the Graduate School.

Graduate Certificate in African and African American Studies

Admission Requirements:
The following materials must be submitted to the Director of the AAST Program:

1. Application for Admission to the Certificate Program in African & African American Studies. The form is available from the Program Director and the program’s Web page.
2. Confirmation of admission to the University of Arkansas Graduate School.
3. Complete official transcripts of all undergraduate and graduate work.
4. Three letters of recommendation from former teachers, employers, or supervisors.
5. Statement of purpose describing academic interests and professional goals and how the Graduate Certificate fits into them.

Requirements for Graduate Certificate in African and African American Studies
In order to complete the Graduate Certificate in African & African American Studies, students must complete a total of 15 hours of coursework, which must include AAST 5003 Graduate Seminar in African & African American Studies.

The remaining 12 hours of coursework must be approved by the Program Director and adhere to the following stipulations:

- A maximum of 9 of the 12 may come from courses taken in a single department
- At least 9 hours must be from courses numbered 5000 or higher
- A maximum of 3 hours may be earned through AAST 5103 Graduate Readings in African & African American Studies

Possible Courses:

Additional courses numbered 4000 or higher may be approved by the Program Director for the Graduate Certificate if its subject matter focuses on the study of Africans or African Americans.

Courses

AAST 5003. Graduate Seminar in African & African American Studies. 3 Hours.
Introduction to graduate study of African & African American Studies through an interdisciplinary examination of the history of the discipline, research methods employed, and its relationship to other disciplines. (Typically offered: Irregular)

AAST 5103. Graduate Readings in African & African American Studies. 3 Hours.
An exploration of African & African American Studies topics independently with a faculty member. Topic variable with permission of faculty member. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Applied Behavior Analysis (APBA)

Graduate Certificate Offered:
Applied Behavior Analysis (non-degree)(APBA)
Graduate Certificate Program in Applied Behavior Analysis (APBA):  
The Graduate Certificate in Applied Behavior Analysis is for those individuals who wish to pursue board certification in Behavior Analysis or to utilize behavioral theory in the area of autism or behavioral disorders. The program builds on candidate’s previous knowledge of effective teaching and behavioral strategies and extends knowledge and skills in the use of applied behavior analysis (ABA), positive behavior support (PBS), and functional behavioral assessments (FBAs) in teaching persons with low incidence or severe disabilities. Classes emphasize the development and ethical use of behavioral change programs which are validated by systematic evaluation of the interventions used. Ethical, professional and legal standard are discussed and applied in the use of Applied Behavior Analysis.

**Admission requirements** for the Graduate Certificate program include:

- A minimum 3.00 cumulative grade point average (GPA) during the last 60 hours of undergraduate work.

**Program of Study:**

Candidates for the Graduate Certificate must have a B or better in the Program of Study. Courses from other institutions will not be substituted for the required courses. As of 2015, those seeking to become a National Board Certified Behavior Analyst will be required to have a degree in Education, Psychology, or Applied Behavior Analysis. Those with master’s degrees in areas other than Education, Psychology, or Applied Behavior Analysis will need to consult with the Behavior Analyst Certification Board to determine if their degree program will be accepted. However, the graduate certificate in ABA can be infused into a degree program if needed.

**Admission to the Graduate Certificate Program in Arkansas Curriculum/Program Administrator:** Applicants must meet university requirements for admission to the Graduate School as non-degree-seeking, but certificate-seeking students, and must have a master’s degree. In addition, to receive the graduate certificate in district-level administration, applicants must have a valid teaching license and a valid building-level administration license.

**Admission to the Graduate Certificate program:** Applicants must meet university requirements for admission to the Graduate School as non-degree-seeking, but certificate-seeking students, and must have a master’s degree in one of the three following fields: Education, Educational Leadership, or Special Education.

**Requirements for the Graduate Certificate in Arkansas Curriculum/Program Administrator:** The Arkansas Curriculum/Program Administrator Graduate Certificate requires 15 graduate credit hours beyond an earned master’s degree. To receive the graduate certificate in Arkansas Curriculum/Program Administrator, candidates are required to have a valid teaching license. The program of study includes 15 credit hours in a specialization that has not been covered by the candidate’s previously earned master’s degree.

Students will select between one of the three specialization areas listed below. Students are strongly encouraged to meet with an adviser to review their course history and determine the option that will help them meet licensure requirements. The successful completion of the Arkansas Curriculum/Program Administrator Certificate will lead to a specialization endorsement in either Special Education Administration or Curriculum and Instruction Administration to be added to the candidate’s existing professional educator’s license.

**Curriculum and Instruction Specialization (15 hours)**

Autism Spectrum Disorders (AUTS)  
Cheryl Murphy
Graduate Certificate Offered:
Autism Spectrum Disorders (non-degree): AUTS

Graduate Certificate Program in Autism Spectrum Disorders (AUTS):
The graduate certificate in Autism Spectrum Disorders develops professionals in the area of autism spectrum disorders. The program recognizes students who take a concentrated core of courses focused on autism spectrum disorders. Students who earn the certificate develop knowledge and skills in the areas of characteristics, assessment, and educational interventions for individuals with autism spectrum disorders.

Admission requirements for the Graduate Certificate program include:

• A minimum of a 3.0 cumulative grade point average (GPA) during the last 60 hours of undergraduate work.

Certificate in Business Law

The School of Law business law certificate is designed for those students wishing to focus on business or transactional law to prepare themselves for a business law practice or to enhance their career prospects in the business field in general. The program provides a strong framework in the fundamentals of business and transactional law and skills through coursework and related activities. The program will prepare qualified J.D. degree and post-J.D. candidates for a wide variety of business and transactional law practices and, for non-law students, it will help provide a strong foundation for legal aspects of the business environment.

Admission requirements: The student must satisfy one of the following requirements:

1. Be currently enrolled in the J.D. program at the School of Law or be admitted as a visiting J.D. student at the School of Law;
2. Hold a J.D. degree from an accredited law school;
3. Be enrolled in the LL.M. program at the School of Law; or
4. Be admitted by the Associate Dean or that dean's designee (here in after the "Associate Dean") as otherwise qualified to complete the certificate requirements successfully. The Associate Dean may limit the number of students eligible to pursue the certificate at any one time.

Course requirements:
The certificate program in Business Law requires 18 hours of coursework.

Foundational Business Law Courses
It is assumed that all students seeking the certificate will enter the program having already successfully completed, as part of their J.D. degree program or other qualifying studies, the following foundational business law courses (or equivalent):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAWW 4024</td>
<td>Contracts</td>
</tr>
<tr>
<td>LAWW 4294</td>
<td>Business Organizations</td>
</tr>
<tr>
<td>LAWW 6233</td>
<td>Federal Income Tax of Individuals</td>
</tr>
</tbody>
</table>

Required Course Categories
In addition to completing all Foundational Business Law Courses, in order to be eligible for the Business Law Certificate a student must successfully complete at least 18 credit hours of business law coursework, including at least one course from each of the following three categories:

(ULW-approved three courses are Business Drafting, Contract Drafting, and Corporate Practice.)

Business Drafting Courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAWW 406V</td>
<td>Upper Level Writing</td>
</tr>
</tbody>
</table>
Experiential Learning Business Courses:
- LAWW 4182 Upper Level Writing - Business Drafting
- LAWW 5213 Business Lawyering Skills
- LAWW 686V Corporate Counsel Externships

Public Company Courses:
- LAWW 5662 Mergers and Acquisitions
- LAWW 629V Public Corporations
- LAWW 536V Securities Regulation

Business Electives
The following courses will count toward the 18 credit hours of business law coursework needed to complete the Business Law Certificate:
- LAWW 6133 Antitrust Law 3
- LAWW 760V Bankruptcy - Business Reorganizations 2-3
- LAWW 6253 Federal Income Taxation of Business Entities 3
- LAWW 5391 Effective Corporate Compliance Program 1
- LAWW 6393 Legal Clinic: Transactional 3
- LAWW 7302 International Business Transactions 2
- LAWW 567V Nonprofit Organizations 2-3
- LAWW 500V Special Topics 1-18

Special Topics LAWW 500V Corporate Counsel Colloquium, Corporate Finance, and Representing Startups. Any courses lited in the Experiential Business, Business Drafting, or Public Company Course categories listed above.

Extracurricular Course of Study
Students must attend at least 250 minutes of extracurricular programming sponsored by the business law society or approved in advance by the Associate Dean.

Substitutions
The Associate Dean may designate a Special Topics or other course as a qualifying Business Elective, and in rare cases, with substantial justification, may allow substitution in the Experiential Business, Business Drafting, or Public Company course categories listed above.

Other requirements:

J.D. candidates
Our J.D. students must declare their intention to complete the program before the final semester of their J.D. studies by notifying the Associate Dean. The student must have a cumulative law school GPA of at least 2.75 and a GPA of 3.0 or above in certificate courses at the time he or she applies for the certificate program. In order to receive the certificate upon graduation, the student must successfully complete the required courses and earn a GPA of 3.2 or above in certificate courses, and have a cumulative GPA of 2.75 or above.

Post-J.D. candidates
Those who have already earned a J.D. degree from an accredited law school in the United States may also earn a certificate. They must apply to the Associate Dean before commencing the program.

For the purposes of this program, post-J.D. candidates can determine their GPA within the program based in part on courses completed elsewhere. All post-J.D. candidates must fulfill the requirements listed in §5-1505 of the Faculty Policies Manual, at least 12 credits of which must be taken here, and they must complete the corporate counsel externship program or other approved experiential capstone course here.

Post-J.D. candidates must have a cumulative GPA of at least 3.0 from the school that conferred their law degree. To complete the program, they must earn a GPA of 3.2 or above in certificate courses.

LL.M. candidates
Our LL.M. candidates must notify the Associate Dean one month before enrollment in the LL.M. program of their intention to complete the program and must have the approval of the director of the LL.M. program.

For the purposes of this program, LL.M. candidates can determine their GPA within the program based in part on courses completed elsewhere. LL.M. candidates must satisfy all the required courses, at least 12 credits of which must be taken here, and must take the corporate counsel externship or other approved experiential capstone course here.

To declare, an LL.M. candidate must have a cumulative GPA of at least 3.0 from the school that conferred their law degree. To complete the program, they must earn a GPA of at least 3.2 in certificate courses and have a cumulative GPA of 2.75 or above.

General Requirements (Non-J.D./Non-LL.M. Candidates)
Post-baccalaureate students who are not enrolled as J.D. or LL.M. students at the law school (and do not have a J.D. degree) may also earn a certificate. They must apply to the Associate Dean before commencing the program. If they have taken at least 12 credits of the required certificate courses at another ABA-accredited law school, their GPA in those courses must be at least 3.0 to apply. If they have not, their undergraduate cumulative GPA must be at least 3.5. For the purposes of this program, these students can determine their GPA within the program based in part on courses completed elsewhere.

To earn the certificate, these students must complete all the required courses, at least 12 credits of which must be taken here, and they must complete the approved experiential capstone course here. To complete the program, they must also earn a GPA of 3.2 or above in certificate courses.

Learning Objectives
Students who successfully complete the requirements for the Business Law Certificate will:
1. Demonstrate proficiency in explaining and analyzing the legal and regulatory implications of common business matters
2. Be able to draft documents relevant to typical business formations and basic transactions and
3. Demonstrate an understanding of the role of counsel to businesses, business owners, or business management, as well as an appreciation of the ethical implications of representing each discrete group.

Certificate in Criminal Law

The Law School offers a criminal law certificate to those students wishing to focus on criminal law during law school and prepare themselves for the practice of criminal law or policy. The program is available to J.D. candidates, LL.M. candidates, as well as other post-baccalaureate students as described below. The program requires students to develop litigation skills through at least one criminal law clinic (or other experiential capstone course approved as a substitute by the Associate Dean for Academic Affairs or that dean's designee), as well as skills courses while also providing a strong framework in the fundamentals of criminal law and procedure through coursework.

Many law schools and employers continue to seek ways to better prepare students for the practice of law immediately upon graduation, and this certificate seeks to make its graduates far more prepared to step into criminal law practice, whether at public agencies such as prosecution or public defender offices, or at firms or even in solo practice. The program seeks, through minimum requirements, to ensure qualified candidates graduate ready for a practice in criminal law. For non-law students, it will help provide a strong foundation for policy work or other criminal justice fields.

Admission requirements: The student must satisfy one of the following requirements:

1. Be currently enrolled in the J.D. program at the School of Law or be admitted as a visiting J.D. student at the School of Law.
2. Hold a J.D. degree from an accredited law school.
3. Be enrolled in the LL.M. program at the U of A School of Law.
4. Be admitted by the associate dean for academic affairs or that dean's designee as otherwise qualified to complete the certificate requirements successfully.

The associate dean for academic affairs, or designee, may limit the number of students eligible to pursue the certificate at any one time.

Course Requirements for the Certificate in Criminal Law

Students seeking the certificate generally will enter the program having already successfully completed as part of their J.D. degree program or other qualifying studies, the following basic law courses (or equivalents): LAWW 4074 Criminal Law (Irregular); LAWW 4173 Criminal Procedure I (Irregular); LAWW 6903 Basic Evidence (Irregular); and LAWW 5013 Professional Responsibility (Irregular). Students who have not already completed one or more of these courses before entering the program may, however, do so during the time they are also pursuing the certificate.

Other requirements:

J.D. Candidates: Our J.D. students must declare their intention to complete the program in the spring of their 2L year by notifying the Associate Dean.

The student must have a cumulative law school GPA of at least 2.75 and a GPA of 3.0 or above in certificate courses at the time the student declares. In order to receive the certificate upon graduation, the student must fulfill the requirements in §§5-1408 in the Faculty Policies Manual, earn a GPA of 3.2 or above in certificate courses (including Criminal Certificate prerequisites), a cumulative GPA of at least 2.75, and a B+ or above in the criminal practice clinic, or other approved experiential capstone course (if graded).

J.D. Visitors: Those currently earning a J.D. at another ABA-accredited law school but visiting here may earn the criminal law certificate. They must apply to the Associate Dean by spring of their 2L year. These students can satisfy certificate course credits with courses taken at their own law school, but must take at least 12 credits in certificate courses here. Also, they must complete the criminal clinic program or other approved experiential capstone course here.

The student must have a cumulative law school GPA of at least 2.75 and a GPA of 3.0 or above in certificate courses at the time the student applies. In order to receive the certificate upon graduation, the student must fulfill the requirements in §§5-1408 in the Faculty Policies Manual, earn a GPA of at least 3.2 in certificate courses (including Criminal Certificate prerequisites), and a B+ or above in the criminal practice clinic or other approved experiential capstone course (if graded).

Post-J.D. Candidates: Those who have already earned a J.D. degree from an accredited law school in the United States may also earn a certificate. They must apply to the Associate Dean before commencing the program.

For the purposes of this program, post-J.D. candidates can determine their GPA within the program based in part on courses completed elsewhere. All post-J.D. candidates must fulfill the requirements in §§5-1408 in the Faculty Policies Manual, at least 12 credits of which must be taken here, and they must complete or have completed the criminal clinic program or other approved experiential capstone course.

Post-J.D. candidates must have at least a cumulative GPA of 3.0 from the school that conferred their law degree. To complete the program, they must earn a GPA of 3.2 or above in certificate courses (including Criminal Certificate prerequisites) and a B+ or above in the criminal practice clinic or other approved experiential capstone course (if graded).
LL.M. Candidates: Our LL.M. candidates must notify the Associate Dean no later than one month before enrollment in the LL.M. program of their intention to complete the program and must have the approval of the director of the LL.M. program.

For the purposes of this program, LL.M. candidates can determine their GPA within the program based in part on courses completed elsewhere. LL.M. candidates must satisfy all the requirements in §5-1408 in the Faculty Policies Manual, at least 12 credits of which must be taken here, and must take the criminal practice clinic or other approved experiential capstone course here.

To declare, an LL.M. candidate must have at least a cumulative GPA of 3.0 from the school that conferred their law degree. To complete the program, they must earn a GPA of 3.2 in certificate courses (including Criminal Certificate prerequisites), a cumulative GPA of at least 2.75, and a B+ or above in the criminal practice clinic or other approved experiential capstone course (if graded).

General Requirements (Non-J.D. and Non-LL.M. Candidates): Post-baccalaureate students who are not enrolled as J.D. or LL.M. students at the law school (and do not have a J.D. degree) may also earn a certificate. They must apply to the Associate Dean before commencing the program. If they have taken at least 12 credits of the required certificate courses listed in §5-1408 in the Faculty Policies Manual at another ABA accredited law school, their GPA in those courses must be at least 3.0 to apply. If they have not, their undergraduate cumulative GPA must be at least 3.5. For the purposes of this program, these students can determine their GPA within the program based in part on courses completed elsewhere.

To earn the certificate, these students must complete all the coursework as set forth in §5-1408 of the Faculty Policies Manual, at least 12 credits of which must be taken here, and they must complete the approved experiential capstone course here. To complete the program, they must also earn a GPA of at least 3.2 in certificate courses (including Criminal Certificate prerequisites) and a B+ or above in the approved experiential capstone course (if graded).

Certificate Substitute Courses; Enrollment Limit: Each student completing the requirements will receive a certificate. If appropriate, the Associate Dean may approve any new electives proposed to satisfy the elective requirements of the program. The Associate Dean may limit the number of students eligible to pursue the certificate at any one time.

Cross-Sector Alliances (CSAL)
Pearl K. Dowe
Vice Chair, Department of Political Science
Old Main 428
479-575-5352
Email: pkford@uark.edu

Cross Sector Alliances Web Page (http://grad.uark.edu/crossSectorAlliance/)

Graduate Certificate Offered:
Cross-Sector Alliances (non-degree) (CSAL)

Program Description: A Graduate Certificate in Cross-Sector Alliances is offered collaboratively by the Master of Public Administration program in the J. William Fulbright College of Arts and Sciences and the Master of Business Administration program in the Walton College of Business. The program prepares students for a workplace in which they will be interacting with organizations from other sectors in joint projects or initiatives. Accordingly, students must understand the financial, accountability and general management challenges of the different sectors. In addition, the program also prepares students for work in different sectors and builds skills not addressed in stand-alone programs. In general, students will gain a fundamental knowledge of within-sector management issues, how those issues relate to cross-sector management and governance, and will be able to apply this understanding in practical scenarios.

Admission Requirements: Admission to the Graduate School.

Requirements for a Graduate Certificate in Cross-Sector Alliances

The graduate certification Cross-Sector Alliances requires satisfactory completion of 15 hours of coursework:

Students must register with the Graduate School separately from their chosen degrees.

- PLSC 5133 Nonprofit Management 3
- Choose one:
  - PLSC 5193 Seminar in Public Administration (for M.B.A. students) 3
  - MGMT 5223 Business Leadership and Ethics (for M.P.A. students)
- MGMT 5313 Strategic Management 3
- WCOB 5843 Cross-Sector Collaboration for Sustainability 3

Electives
- Choose one of the following: 3
  - PADM 5823 Grant Writing for the Social Sciences
  - PADM 5813 Managing Information Technologies in Public Affairs
  - PLSC 5173 Community Development
  - MGMT 4103 Special Topics in Management
  - WCOB 510V Special Topics in Business

Cybersecurity (CYBR)

Program Description: The Cybersecurity Graduate Certificate prepares students to protect valuable data assets and develop cyber-centric multidisciplinary security skills for predicting and avoiding cyber threats.

Program Requirements: Students are required to take 12 hours of coursework to complete the Cybersecurity Graduate Certificate.

Required Course
- CSCE 5323 Computer Security 3
- Choose 9 hours from the following courses: 9
  - CSCE 5333 Computer Forensics
  - CSCE 5433 Advanced Cryptography
  - CSCE 5623 Secure Digital System Design
  - CSCE 5653 Network Security
  - CSCE 5663 Database Security
  - CSCE 5753 Wireless Systems Security
  - CSCE 5763 Privacy Enhancing Technologies
  - CSCE 5833 Computer Architecture Security

Graduate Certificate Offered:
Educational Measurement (non-degree) (EDME)

Program Description: The Educational Statistics and Research Methods program develops professionals in the areas of educational research methods and policy studies, both through courses and Independent research. Graduates can obtain employment with school districts, educational agencies, and industries with internal data analysis needs.

Graduate Certificates

Admission to the Graduate Certificate Programs: In addition to meeting University requirements for admission to the Graduate School, applicants must have earned a master’s degree with a 3.25 cumulative GPA and minimum scores on the Graduate Record Examinations at the 48th percentile Verbal, the 56th percentile Quantitative and the 29th percentile on Analytic Writing OR be currently enrolled in a doctoral program at the University of Arkansas.

Certificate Requirements: Required list of courses for a certificate with a grade-point average of 3.50.

Graduate Certificate in Educational Measurement: The graduate certificate develops professionals in the areas of measurement, testing, and assessment, through courses in the area of instrument development and research design. Graduates can obtain employment with educational agencies and industries with assessment and research analysis needs.

Educational Statistics and Research Methods website (http://esrm.uark.edu)

Degrees Conferred:
Ph.D. in Educational Statistics and Research Methods (ESRM)

Graduate Certificates Offered (non-degree):
Educational Psychology (EDPS)
Educational Measurement (EDME)

Educational Statistics and Research Methods (EDST)

Program Description: The Educational Statistics and Research Methods program develops professionals in the areas of educational research methods and policy studies, both through courses and Independent research. Graduates can obtain employment with school districts, educational agencies, and industries with internal data analysis needs.

Graduate Certificates

Admission to the Graduate Certificate Programs: In addition to meeting University requirements for admission to the Graduate School, applicants must have earned a master’s degree with a 3.25 cumulative GPA and minimum scores on the Graduate Record Examinations at the 48th percentile Verbal, the 56th percentile Quantitative and the 29th percentile on Analytic Writing OR be currently enrolled in a doctoral program at the University of Arkansas.

Certificate Requirements: Required list of courses for a certificate with a grade-point average of 3.50.

Doctor of Philosophy

Doctor of Philosophy in Educational Statistics and Research Methods: The increased emphasis on educational accountability and data-driven decision making to improve public school institutions, as well as greater reliance on empirical research and analysis in public policy and educational studies, have led to a greater need for experts in educational statistics and research methods. The Educational Statistics and Research Methods doctoral program develops professionals who can lead in these areas through coursework and independent research in educational statistics, research design, assessment, and program evaluation.

Requirements for Ph.D. in Educational Statistics and Research Methods

Admission Requirements for the Ph.D. Degree: In addition to meeting University requirements for admission to the Graduate School, applicants should have an earned master’s degree with a minimum 3.25 GPA and scores on the Graduate Record Examinations at the 48th percentile Verbal, the 65th percentile Quantitative and the 48th percentile on Analytic Writing. Higher performance on the quantitative component of the GRE may compensate for a lower GPA in admissions decisions.

Requirements for the Ph.D. Degree: Students must complete all requirements of the Graduate School for the Doctor of Philosophy degree, and complete an approved program of study including a minimum of 36 credit hours of core courses, 9 hours of elective courses, and 18 credit hours of doctoral dissertation. Coursework must be completed with a cumulative grade average of at least 3.25, with no credit for courses with a grade of “C” or lower.

**Educational Foundations Courses**

EDFD 5353. Philosophy of Education. 3 Hours.
Introduction to the method and attitude essential to effective analysis and interpretation of issues and values within a society reflecting cultural, ethnic, gender, and global diversity. Prerequisite: Graduate standing. (Typically offered: Irregular)

EDFD 5373. Psychological Foundations of Teaching and Learning. 3 Hours.
Psychological principles and research applied to classroom learning and instruction. Social, emotional, and intellectual factors relevant to topics such as readiness, motivation, discipline, and evaluation in the classroom. (Typically offered: Irregular)

EDFD 5573. Life-Span Human Development. 3 Hours.
Basic principles of development throughout the human life-cycle. Physical, cognitive, social, emotional, and personality development. (Typically offered: Fall, Spring and Summer)

EDFD 5673. Principles of Motivation. 3 Hours.
This course focuses on theories and concepts of human motivation. Students explore what motivates students to learn and examine strategies, techniques, and interventions that promote and sustain learner motivation. (Typically offered: Spring)

EDFD 5683. Issues in Educational Policy. 3 Hours.
This course examines how K-12 education policy is designed and implemented in the United States. Students will develop a working knowledge of policymaking frameworks to examine major education policies of current interest and debate key policy issues that arise at each level of government. (Typically offered: Fall, Spring and Summer)

This course is cross-listed with EDRE 6413.

**Graduate Certificate in Educational Statistics and Research Methods**

Graduate Certificate in Educational Statistics and Research Methods:
The graduate certificate in Educational Statistics and Research Methods recognizes students who complete a core of courses focused on developing theoretical, application, and interpretative aspects of statistical techniques and research methods. Graduate students completing this certificate will also develop comprehensive programming and data management skills necessary for today’s academic researcher.

EDFD 5773. Advanced Topics in Educational Psychology. 3 Hours.  
This course provides an opportunity for advanced study of socio-cognitive variables that play a crucial role in working in administration, teaching, and the evaluation of the success of students and academic programs. Prerequisite: ESRM 6413 and EDFD 5373. (Typically offered: Fall Even Years)

Educational Statistics and Research Methods Courses

ESRM 5013. Research Methods in Education. 3 Hours.  
General orientation course which considers the nature of research problems in education and the techniques used by investigators in solving those problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

ESRM 5393. Statistics in Education and Health Professions. 3 Hours.  
Applied statistics course for Master's degree candidates. Includes concepts and operations for frequency distributions, graphing techniques, measures of central tendency and variation, sampling, hypothesis testing, and interpretation of statistical results. (Typically offered: Fall, Spring and Summer)

ESRM 5653. Educational Assessment. 3 Hours.  
Introduction to measurement issues and basic test theory. Focus on types and usage of assessment tools, data management, and analysis and interpretation of educational data. Practical training in the utilization and interpretation of academic achievement data in Arkansas. (Typically offered: Irregular)

ESRM 599V. Seminar. 1-6 Hour.  
Seminar. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ESRM 600V. Master's Thesis. 1-6 Hour.  
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ESRM 605V. Independent Study. 1-6 Hour.  
Independent study. (Typically offered: Fall, Spring and Summer)

ESRM 6403. Educational Statistics and Data Processing. 3 Hours.  
Theory and application of frequency distributions, graphical methods, central tendency, variability, simple regression and correlation indexes, chi-square, sampling, and parameter estimation, and hypothesis testing. Use of the computer for the organization, reduction, and analysis of data (required of doctoral candidates). Prerequisite: ESRM 5013 or equivalent. (Typically offered: Fall and Spring)

ESRM 6413. Experimental Design in Education. 3 Hours.  
Principles of experimental design as applied to educational situations. Special emphasis on analysis of variance techniques used in educational research. Prerequisite: ESRM 6403 or equivalent. (Typically offered: Spring)

ESRM 6423. Multiple Regression Techniques for Education. 3 Hours.  
Introduction to multiple regression procedures for analyzing data as applied in educational settings, including multicollearity, dummy variables, analysis of covariance, curvi-linear regression, and path analysis. Prerequisite: ESRM 6403. (Typically offered: Fall)

ESRM 6453. Applied Multivariate Statistics. 3 Hours.  
Multivariate statistical procedures as applied to educational research settings including discriminant analysis, principal components analysis, factor analysis, canonical correlation, and cluster analysis. Emphasis on use of existing computer statistical packages. Prerequisite: ESRM 6413. (Typically offered: Spring)

ESRM 6513. Hierarchical Linear Modeling. 3 Hours.  
This course covers the theory and applications of hierarchical linear modeling (HLM) also known as multilevel modeling. Both the conceptual and methodological issues for analyses of nested (clustered) data in using HLM will be reviewed, including linear models, non-linear models, growth models, and some alternative designs. Prerequisite: ESRM 6413 and ESRM 6423. (Typically offered: Fall Even Years)

ESRM 6523. Structural Equation Modeling. 3 Hours.  
This course provides a detailed introduction to structural equation modeling (SEM) based on students’ previous knowledge of multiple linear regression. Topics include path analysis, confirmatory factor analysis, full latent variable models, estimation techniques, data-model fit analysis, model comparison, and other topics, potentially equivalent models, specification searches, latent mean models, parameter invariance, multi-group models, and models of discrete data. Prerequisite: ESRM 6423. (Typically offered: Spring)

ESRM 6533. Qualitative Research. 3 Hours.  
Introduction of non-quantitative methods, including data collection through interviews, field observation, records research, internal and external validity problems in qualitative research. Prerequisite: ESRM 6403. (Typically offered: Fall and Spring)

ESRM 6543. Advanced Qualitative Research. 3 Hours.  
Preparation for the conduct of qualitative research, structuring, literature reviews, data collection and analysis, and reporting results. Prerequisite: ESRM 6533. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

ESRM 6553. Advanced Multivariate Statistics. 3 Hours.  
Builds on the foundation provided in Multivariate and introduces techniques that extend methodological elements of canonical, discriminant, factor analytic, and longitudinal analyses, providing the mathematical and theoretical foundations necessary for these designs. Prerequisite: ESRM 6453. (Typically offered: Spring Even Years)

ESRM 6613. Evaluation of Policies, Programs, and Projects. 3 Hours.  
Introduction to evaluation in social science research, including why and how evaluations of programs, projects, and policies are conducted; includes analysis of actual evaluations in a variety of disciplines. Prerequisite: ESRM 6403. (Typically offered: Fall)  
This course is cross-listed with EDRE 6213.

ESRM 6623. Techniques of Research in Education. 3 Hours.  
Use of scientific method in attacking educational problems. Emphasis placed on the planning and design of research studies, collection of reliable and valid data, sampling methods, and analysis and interpretation of data. Prerequisite: ESRM 6403. (Typically offered: Spring and Summer)

ESRM 6633. Survey Research Methods. 3 Hours.  
The course addresses all phases of conducting a survey research study, including conceptualization, sample selection, instrument development, and analysis and reporting of findings. Prerequisite: ESRM 6403. (Typically offered: Spring Even Years)

ESRM 6653. Measurement and Evaluation. 3 Hours.  
Fundamentals of measurement: scales, scores, norms, reliability, validity, test and scale construction and item analysis. Standardized measures and program evaluation models in decision making. Prerequisite: ESRM 6403. (Typically offered: Fall)

ESRM 6668V. Practicum in Research. 1-6 Hour.  
Practical experience in educational research on campus, in school systems, or in other agencies in educational program development. (Typically offered: Irregular)

ESRM 6753. Item Response Theory. 3 Hours.  
Topics of measurement in the psychometric field focusing on item response theory; item level and test level analyses including differential item functioning, test dimensionality, computer adaptive testing, equating, and general evaluation and usage of measurement instruments. Prerequisite: ESRM 6653. (Typically offered: Spring Odd Years)

ESRM 699V. Seminar. 1-6 Hour.  
Seminar. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
The Graduate Certificate in Enterprise Systems is a part-time program offered on campus, blended, and online. It is designed to provide graduate students with knowledge and experience in information systems used in modern enterprise environments. The demand for skilled professionals in information systems continues to outpace the supply of qualified applicants. Students may choose one of three concentrations for the Graduate Certificate in Enterprise Systems: Enterprise Information Systems, Business Analytics, or Enterprise Resource Planning. The certificate program is intended to be completed part-time (ordinarily no more than six hours per semester), and is open to individuals with backgrounds in any discipline.

**Admission Requirements:** The Graduate Certificate in Enterprise Systems is a part-time program open to individuals with backgrounds in any discipline. Students must apply and be admitted to the Graduate School of Business; the GMAT/GRE requirement is waived for the Graduate Certificate in Enterprise Systems degree program. (Students who have earned a GPA 3.5 or better upon completion of the certificate program and subsequently apply to the part-time Master of Information Systems program (Professional M.I.S.) will not be required to submit a test score.) Information regarding Graduate School of Business admission requirements can be found earlier in this chapter.

**Requirements for the Graduate Certificate in Enterprise Systems: (12 hours)**

To receive the Graduate Certificate in Enterprise Systems, students must select one of the tracks below. Students are required to take 9 hours of coursework in the Walton College of Business and 3 hours of electives related to Enterprise Systems in either the Walton College or in another college at the University of Arkansas. Elective courses other than those listed below must be approved by the director of the certificate program. Some elective courses have prerequisites that are not met by courses in the certificate program. Students are advised to check prerequisites prior to enrolling in a course.

**Required Course**

Choose at least one of the following depending on the track chosen:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISYS 5173</td>
<td>Blockchain Fundamentals</td>
<td>3</td>
</tr>
<tr>
<td>ISYS 5103</td>
<td>Data Analytics Fundamentals</td>
<td>3</td>
</tr>
<tr>
<td>ISYS 5213</td>
<td>ERP Fundamentals</td>
<td>3</td>
</tr>
</tbody>
</table>

**Blockchain Enterprise Systems Track**

This track is open to individuals with backgrounds in fields other than Information Systems and is designed to provide non-IS graduate students with the fundamental knowledge and skills needed to successfully transition to a career in the Information Systems field. Students who complete this track will have exposure to fundamental principles of blockchain, enterprise information systems, and techniques for management and development of blockchain projects.

**Required Courses (9 hours)**

<table>
<thead>
<tr>

<td>3</td>
</tr>
<tr>
<td>ISYS 5933</td>
<td>Global Technology and Analytics Seminar</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Hours** 12

**Business Analytics Track**

This track is open to individuals with backgrounds in any discipline and is designed to give business and non-business graduate student’s knowledge and experience in the management and use of enterprise data for operations and decision-making. The ability to effectively manage and analyze increasingly large and complex sets of data is highly valued among employers in all disciplines, as “business intelligence” becomes a primary source of competitive advantage in many organizations. Students who complete this track will have a foundation in the effective management and use of relational and dimensional data, the application of statistical decision-making theory, and the exploration and exploitation of data using advanced data mining tools and techniques. Students completing this track may be eligible to receive a certificate endorsed by the SAS Institute.

**Required Courses (9 hours)**

</tbody>
</table>

**Total Hours** 12

**Enterprise Resource Planning Track**

This track is open to individuals with backgrounds in any discipline and is designed to provide business and non-business graduate students a foundation in the effective use, implementation, and customization of Enterprise Resource Planning (ERP) systems. ERP systems support integrated core business processes in nearly every large organization, and knowledge of and experience with these systems are highly valued among employers in all business disciplines. Students who complete this track will have exposure to fundamental principles of ERP and techniques for configuration, implementation, and development of ERP systems. Students completing this track may be eligible to receive a certificate endorsed by SAP America and the SAP University Alliances Program.

Entrepreneurship (ENTR)

Anne O’Leary-Kelly  
Associate Dean for Research and Graduate Programs  
328 Walton College of Business  
479-575-2851

Admission Requirements:
The Graduate Certificate in Entrepreneurship is open to all graduate students who are in good standing with the graduate school at their campus. Students must apply and be admitted to the Graduate School of Business. Information regarding Graduate School of Business admission requirements can be found earlier in this chapter.

Requirements for the Graduate Certificate in Entrepreneurship: To receive the Graduate Certificate in Entrepreneurship, students are required to take 9 hours of coursework in the Walton College of Business and 3 hours of electives related to entrepreneurship in either the Walton College or in another college at the University of Arkansas. Elective courses other than those listed below may be approved by the Director of the Certificate program. Some elective courses have prerequisites that are not met by courses in the certificate program. Students are advised to check prerequisites prior to enrolling in a course.

Geospatial Technologies (GIST)

Christopher L. Liner  
Department Chair and Graduate Coordinator of Geosciences  
216 Gearhart Hall  
479-575-3355  
Email: liner@uark.edu

Graduate Certificate Offered:
Geospatial Technologies (non-degree) (GIST)

The Department of Geosciences offers an online Geospatial Technologies Graduate Certificate through University of Arkansas Global Campus (http://globalcampus.uark.edu/). This certificate is designed for working professionals who wish to develop technical skills in the emerging field of geospatial technologies. The certificate provides the technical instruction needed to be employed in the geosciences and collateral disciplines as one of the American Society of Photogrammetry and Remote Sensing’s “Mapping Scientist” and as a “Certified Geographic Information Systems Professional” (GISP).

Requirements for a Geospatial Technologies Graduate Certificate

Requirements for admission: Graduate status; there are no disciplinary requirements.

A total of 12-18 hours are required for the certificate:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOS 5043</td>
<td>Foundations of Geospatial Data Analysis</td>
<td>3</td>

**Music Education for Special Needs Students (MESN)**

The Graduate Certificate in Music Education for Special Needs Students is designed for teachers who have an interest in working with students identified under the Individuals With Disabilities Act as needing accommodations, modifications, or adaptations in order to succeed in the music classroom. Coursework will focus on understanding behavior and learning characteristics of these diverse learners, creating and adapting lesson plans with appropriate modifications, adaptations, and accommodations, and using music to work with the families and communities of the special needs students in the music classroom.

**Requirements for the Graduate Certificate in Music Education for Special Needs Students:** The graduate certificate requires 15 hours of coursework in one of the following semester sequences:

Project Management (OMPM)
Gregory S. Parnell
Program Director
4207 Bell Engineering Center
479-575-3413
Email: msom@uark.edu

http://operations-management.uark.edu (http://operations-management.uark.edu/)

Graduate Certificate Offered (non-degree)
Project Management (OMPM)

Admission to the Graduate Certificate program generally follows U of A Graduate School admission policies with the following exceptions:

1. All applicants, including those with advanced degrees, will be evaluated for admission on the basis of their first baccalaureate degree.
2. Students may be eligible for admission by special consideration if the GPA is below 3.0 but above 2.5.
3. Before taking any graduate classes in the program, non-native speakers of English who do not have a conferred undergraduate degree from an accredited U.S. college or university must demonstrate minimum proficiency on one of the following tests of written English: TOEFL, IBT (26), ELPT (75) or GRE/GMAT Analytical Writing (4.5). The English Language Proficiency Policy for the Master of Science in Operations Management requires Level II non-native speakers of English to complete ELAC 4043 Research Writing in the STEM Fields no later than the first semester of graduate level courses.

Former students or alumni of the Master of Science in Operations Management program may use six credit hours (two courses) from the M.S.O.M. program toward equivalent Project Management Certificate courses. If an alumnus has completed all possible combination of courses for the Project Management Certificate, the student may petition to take one additional course chosen by the program to complete the Project Management Graduate Certificate.

Current M.S.O.M. students who are concurrently accepted into the Project Management Certificate program may use all applicable courses for both the M.S.O.M. degree and the Project Management Certificate.

Requirements for Graduate Certificate in Project Management

Required Courses
OMGT 5253 Leadership Principles and Practices 3
OMGT 5783 Project Management for Operations Managers 3
OMGT 5983 Advanced Project Management 3
Choose one elective: 3
OMGT 5373 Quality Management
OMGT 5433 Cost Estimation Models
OMGT 5463 Economic Decision Making
OMGT 5873 Organizing for Change

Total Hours 12

Special Education Transition Services

Special Education Transition Services Graduate Certificate is designed to prepare school-based professionals (social workers, school psychologists, educational leaders, school counselors, special education teachers, and general education teachers) to provide transition services to students with disabilities. To be admitted, applicants must have a 3.0 GPA or higher in their last 60 hours of course work.

SPED 5713 Career Development and Transition for People with Disabilities 3
SPED 5763 Teaching Individuals with Severe Disabilities 3
SPED 5783 Professional and Family Partnerships 3
SPED 6433 Legal Aspects of Special Education 3
SPED 532V Practicum in Special Education 3

Total Hours 15

Statistics and Analytics (STAN)
Mark Arnold
Program Director
301 Science Engineering Building
479-575-3351
E-mail: arnold@uark.edu

Program Description: The graduate certificate in Statistics and Analytics is a cross-college interdisciplinary program that builds on the university's current strengths in the colleges of Arts and Sciences; Business; Education and Health Professions; and Engineering.

Admission to the Graduate Certificate Program: Applicants to the graduate certificate in Statistics and Analytics must meet the admission requirements of the Graduate School.

Requirements for the Graduate Certificate in Statistics and Analytics:

The Graduate Certificate requires 12 hours of courses as specified below.

Choose one of the following: 3-4
STAT 4003 Statistical Methods
& STAT 4001L and Statistics Methods Laboratory

Graduate Certificate Offered:  
Sustainability (non-degree)  

Program Description:  
The Graduate Certificate in Sustainability is interdisciplinary, drawing from faculty and course work across all colleges of the University of Arkansas. The graduate certificate is accessible to all students admitted to the Graduate School, both degree-seeking and non-degree seeking, who wish to pursue advanced study in Sustainability. The purpose of the Graduate Certificate in Sustainability is to provide functional graduate-level knowledge and skills related to the emerging discipline of Sustainability organized around four thematic areas reflecting strength in scholarship of University of Arkansas academic colleges: Sustainability of Social Systems, Sustainability of Natural Systems, Sustainability of Built Systems, and Sustainability of Managed Systems. Students who complete the graduate certificate in Sustainability will be expected to:

1. Articulate commonly accepted definitions of sustainability and discuss various nuances among those definitions as well as engage in analytical thinking to enhance sustainability measures;
2. Address real-world problems of sustainability to reinforce their professional interests.
3. Have an understanding of the interdisciplinary nature of sustainability issues, particularly as they pertain to the thematic areas of knowledge addressed by the graduate certificate (sustainability of natural systems, sustainability of managed systems, sustainability of built systems, and sustainability of human social systems);
4. Be conversant regarding acquisition and analysis of data pertinent to measuring sustainability;
5. Communicate orally, and in writing organized thoughts defining sustainability measures and technical aspects of sustainability;
6. Identify potential strategies to address sustainability issues using appropriate analytical methods and data and provide results of analyses of data using novel sustainability metrics and indicators;
7. Make recommendations, based on data analysis and interpretation, to advance sustainability of individuals or institutions;
8. Develop methods, techniques and tools for implementing sustainability initiatives.

Required Courses  
Students must earn a grade of "B" or better for all courses used to fulfill requirements of the Graduate Certificate in Sustainability.  

WCOB 5023  Sustainability in Business (Required course for the Graduate Certificate)  

Elective courses with sustainability focus selected from a broad menu of offerings in four thematic areas:  

- Sustainability of Social Systems  
- Sustainability of Natural Systems  
- Sustainability of Built Systems  
- Sustainability of Managed Systems

Total Hours: 15

Elective courses must be completed in at least two thematic areas. In addition, nine of these 12 hours must be in courses numbered 5000 or above.
Courses

SUST 4603. Environmental Sociology. 3 Hours.
The course provides a sociological perspective on environmental issues. It examines the linkage between society, ecological systems, and the physical environment. It provides conceptual frameworks for analyzing environmental issues, considers the role of humans in environmental issues, and enhances understanding of the complexity of the relationship between societal organization and environmental change. Prerequisite: Junior or senior standing. (Typically offered: Fall)
This course is cross-listed with HDFS 4603, SOCI 4603.

SUST 4693. Environmental Justice. 3 Hours.
This course deals with the ethical, technological, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. (Typically offered: Spring)
This course is equivalent to GEOS 4693.

SUST 5103. Analysis and Design of Resilient Systems. 3 Hours.
Introduces students to complex systems theory, change theory, systems analysis and design theory for resilient systems. This course draws theory and heuristics from multiple disciplines, including but not limited to engineering, architecture, ecology, risk assessment, management, social sciences, political sciences, the arts and the humanities. (Typically offered: Fall)

SUST 5203. Decision Making, Analysis and Synthesis in Sustainability. 3 Hours.
Provides an applied framework for analyzing decision dynamics, supporting and promoting more sustainable decisions, and measuring the sustainability of systems. The course applies theory and heuristics of complex systems theory, organizational decision theory, social and institutional constructs of sustainability, indicator and metric development across social, ecological, and economic domains, and communication strategies. (Typically offered: Spring)

SUST 5303. Sustainable Global Food, Energy and Water Systems. 3 Hours.
Provides a detailed review of the existing global food production/distribution and water systems, with an emphasis on scarcity, equity, management, and challenges from changing global systems. This course explores the inputs and efficiencies of existing agricultural production systems, and examines equity and value in these systems. (Typically offered: Fall)

SUST 590V. Special Problems in Sustainability. 1-6 Hour.
Special Problems is intended to fulfill a need in the sustainability curriculum to offer one-time pilot course work in any semester prior to the formal curriculum approval process, offer seminars on unusual or timely topics in sustainability on a one-time basis, or independent study for students seeking additional expertise in sustainability research and scholarship. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Technical Writing and Public Rhetorics (TWRH)

Dorothy A. Stephens
Chair, Department of English
333 Kimpel Hall
479-575-4301
Email: dstephen@uark.edu (dstephen@uark.edu)

Lisa A. Hinrichsen
Director of Graduate Studies
333 Kimpel Hall
479-575-4301
Email: lhinrich@uark.edu

Certificate Offered:
Technical Writing and Public Rhetorics (TWRH) (non-degree)

For more information about the Graduate Certificate in Technical Writing and Public Rhetorics, visit the program's website (http://fulbright.uark.edu/departments/english/graduate/certificate-writing-public-rhetorics/). In addition to the general requirements of the Graduate School, the department stipulates that the following conditions must be met.

Requirements: In order to complete the Graduate Certificate in Technical Writing and Public Rhetorics, students must complete 12 credit hours of coursework, with at least 6 of these hours coming from the Technical Writing and Public Rhetorics core curriculum. The additional 6 hours of credit may come from a list of approved elective courses or from additional courses from the core curriculum. Students must earn a grade of ‘B’ or better for all courses used to fulfill the requirements of the Graduate Certificate in Technical Writing and Public Rhetorics. In addition to coursework, students are required to complete a Technical Writing and Public Rhetorics Portfolio consisting of at least 4 pieces from the student’s coursework in the program.

Other relevant graduate coursework will be allowed on a case-by-case basis, subject to administrative approval and topical relevancy to the graduate certificate and its aims.

Portfolio: Students must consult with the Director of the Graduate Certificate in Technical Writing and Public Rhetorics program during their final semester to develop and defend a portfolio. The program director will chair students' portfolio review committees; working with the director, students will choose two additional faculty members to serve on the committee and at least four pieces of writing to include in the portfolio. Students will work with the committee to polish those pieces to a level appropriate for publication or non-profit, government, or corporate use. When the portfolio is approved by the committee, students will host a public viewing of their works, and the portfolio will be added to the certificate program's online repository of student work hosted by the university library.
Graduate School of Business

310 Willard J. Walker Hall
University of Arkansas
Fayetteville, AR 72701

Telephone: 479-575-2851
Fax: 479-575-8721

E-mail: gsb@walton.uark.edu
Web: gsb.uark.edu (http://gsb.uark.edu/)

Objectives

The Graduate School of Business has as its objective the advancement and dissemination of knowledge in the business and organizational disciplines through scholarly research and excellence in its graduate management education programs.

Admission

Anyone who wishes to earn graduate-level credit, whether as a degree-seeking student or as a non-degree seeking student, must make formal application and be officially admitted by the Graduate School of Business. The Graduate School of Business offers two classifications of admission: Degree Standing and Non-Degree Standing.

1. Degree Standing

The Graduate School of Business shall admit only those applicants to Degree Standing whose enrollment the Graduate School of Business considers will contribute positively to the quality of life and educational programs of the Graduate School of Business. Unlike the Graduate School, students are simultaneously admitted to the Graduate School of Business and a degree program.

2. Non-Degree Standing

The Graduate School of Business will admit applicants to single semester Non-Degree Standing whose enrollment will not lead to a degree.

Application. Applications for admission to the Graduate School of Business must be accompanied by a $40 application fee ($50 for international applicants), which is not refundable and will not apply against the general registration fee if the applicant enrolls. Applicants will not be considered for admission until all required application materials have been received by the Graduate School of Business.

Applicants who are seeking a graduate degree must submit the following items:

1. Application form
2. Application fee ($40 domestic; $50 international)
3. Current resume
4. Three letters of recommendation
5. Official transcripts from each college or university attended
6. Two one-page essays
9. Official TOEFL or IELTS score (international applicants only)
10. Financial and Supplemental Information form (international applicants only)
11. Educational Summary form (International applicants only)

Applicants are encouraged to use our online application procedure. The application form may be obtained on the Web at http://gsb.uark.edu/, or the application packet may be obtained from and should be submitted directly to the following address:

Graduate School of Business
310 Willard J. Walker Hall
1 University of Arkansas
Fayetteville, AR 72701

Graduate School of Business

Transcripts: For applicants who desire Degree Standing: It is the responsibility of each applicant who desires full graduate standing to request of each college or university at which the student has previously attended that it send directly to the Graduate School of Business one official copy of the student’s academic record including all courses, grades, and credits attempted and indication of degree(s) earned.

Note: The fact that courses completed at one institution may be included on a transcript from another institution will not suffice; official transcripts must be received from each institution previously attended. All transcripts become the property of the Graduate School of Business and will not be released to the applicant or to any other person, institution or agency. All application materials, including all official transcripts, should be received by the Graduate School of Business by the published application deadline for the program for which the student is applying.

For students previously enrolled or currently enrolled at the University of Arkansas, Fayetteville, the Graduate School of Business obtains transcripts from the Registrar’s Office. For a graduate of the University of Arkansas, Fayetteville (baccalaureate degree), the only transcripts required are those from the University of Arkansas, Fayetteville, and those from each institution attended after completing the University of Arkansas, Fayetteville, degree. Anyone who was previously enrolled, but who is not currently enrolled in the University of Arkansas Graduate School of Business, is considered a “readmission” and is required only to submit an Application for Admission, a $25 processing fee, and official transcripts from institutions attended after the University of Arkansas Graduate School of Business enrollment. (See Classification of Admission: Readmission below.)

Deferred Admission: Admission to the Graduate School of Business is for a specific semester only and admission is not deferred. Applicants who wish to change their date of entry after submitting an application must notify the Graduate School of Business Office. Applicants who have already been admitted but who would like to change their date of entry must request that their application be held for consideration. Application materials for applicants who apply for admission, but who do not subsequently enroll, will be retained by the Graduate School of Business Office for one calendar year from the date of the applicant’s original proposed semester of entry. However, applicants must file a new Application for Admission to notify the Graduate School of Business of their request for reconsideration. Applicants who are admitted but who do not enroll for one year or more after admission must resubmit the entire application packet and follow procedures for initial admission.

Admission to Degree Standing: Official notice of the decision concerning admission will be sent from the Graduate School of Business
for admission to the Master of Business Administration, Master of Accountancy, Master of Arts in Economics, and Master of Information Systems programs as well as all Ph.D. programs.

Adviser: At the time of admission to a degree program in the Graduate School of Business, the student is assigned to a major adviser who acts as the adviser throughout the student’s program of study. The appointment of the adviser is made in the student’s major department.

International and Resident Alien Applicants: International applicants and resident aliens must submit a minimum score of 550 on the paper-based Test of English as a Foreign Language (TOEFL), 213 on the computer-based version of the TOEFL, 79 on the Internet-based TOEFL or a minimum score of 6.5 on the International English Language Training System (IELTS) taken within the preceding two years, unless their native language is English, they have received a graduate degree from an accredited U.S. graduate school, or they have demonstrated an acceptable level of language proficiency as defined in the Graduate School Handbook located on the Graduate School Web site. International applicants and resident alien applicants may refer to Admissions of this catalog for additional information related to their application.

Non-Native Speakers of English. All applicants, regardless of citizenship, whose first language is not English, must submit a minimum score of 6.5 on the International English Language Testing System (IELTS) or 79 on the Internet-based Test of English as a Foreign Language (TOEFL) or a 58 on the Pearson Test of English-Academic (PTE-A) taken within the preceding two years, unless they have received a graduate degree from an accredited U.S. graduate school, or they have demonstrated an acceptable level of language proficiency as defined in the Graduate School Handbook located on the Graduate School Web site. Students applying to a Ph.D. program in the Sam M. Walton College of Business must submit one of these tests at the time of admission. Resident aliens must submit a copy of their Resident Alien card with their application.

Additional Language Requirement for Doctoral Students: Doctoral students are normally called upon to teach an undergraduate course at some point during their program. The University of Arkansas and the Walton College of Business are committed to providing quality instruction at the undergraduate level. Non-native speakers of English, regardless of citizenship, even if eligible for a TOEFL waiver, must demonstrate competency in both spoken and written English so be eligible for a graduate assistantship that requires direct contact with students in a teaching or tutorial role, in a traditional classroom setting or via distance education.

Competency in spoken English may be demonstrated by:

1. Submitting a test score of at least 7 on the IELTS (speaking) sub-test, 26 on the Internet-based TOEFL (speaking) sub-test, 71 on the PTE-A (speaking) sub-test, or “pass” on the Spoken Language Proficiency Test (SLPT) and

Competency in written English may be demonstrated by:

1. Submitting a test score of at least 6.0 on the IELTS (writing) subtest, 26 on the Internet-based TOEFL (writing) subtest, 4.0 on the GRE, 4.5 on the GMAT (analytical writing) subtest, 71 on the PTE-A (writing) subtest, or 75 on the English Language Proficiency Test (ELPT)

OR

b. Concurrently enrolling in EASL 0033 Reading and Writing II and EASL 0021 Grammar OR ELAC 2033 Research Writing for Non-Native Speakers and ELAC 0011 Writing Workshop: Grammar through Editing via placement by test scores (5.5 IELTS writing sub-test, 23 Internet-based TOEFL writing sub-test, 3.5 GRE or 4.0 GMAT analytical writing subtest, 62 PTE-A writing sub-test, or 70 on the ELPT). The Graduate Coordinator or Department Chair must request this option.

In no case will a doctoral student be allowed to teach an undergraduate course without meeting the minimum score requirement on one of the above tests. The Walton College requires that scores demonstrating competency in spoken English be submitted as a part of the application, prior to review by the admissions committee.

English Language Use by Non-Native Speakers. Applicants, regardless of citizenship, whose first language is not English and who are admitted to graduate study at the University of Arkansas, are required to present an acceptable score on one of the following tests: TOEFL (Writing), IELTS (writing), PTE-A (writing), GRE (analytical writing), GMAT (analytical writing) or ELPT (writing). Depending upon exam scores, a student may be required to take one or more EASL course(s) during their first term of study. Students may be required to take the English Language Placement Test (ELPT) prior to the beginning of classes in their first term of study. Non-native speakers in the following categories are exempt from this requirement, although individual departments may re-quire any of these tests for admission.

1. Graduate students who earned bachelor’s or master’s degrees in U.S. institutions or in foreign institutions where the official and native language is English;
2. Graduate students with an Internet-based TOEFL writing score of 29, IELTS (writing) score of 7.0, or a PTE-A writing score of 80.
3. Graduate students with a 4.5 on the analytical writing portion of the GRE or GMAT.

Diagnostic and placement testing is designed to test students’ ability to use English effectively in an academic setting, and its purpose is to promote the success of non-native speakers in completing their chosen course of study at the University of Arkansas. Test results provide the basis for placement into English as a Second Language (EASL) support courses or course sequences. Courses are offered by the Department of World Languages, Literatures and Cultures for those students whose language skills are diagnosed as insufficient for college work at the level to which they have been admitted (undergraduate or graduate study). Credit in EASL courses does not count toward University of Arkansas degrees. Non-native speakers diagnosed as having language competence sufficient for their level of study will not be required to enroll in EASL courses.

The ELPT is administered by Testing Services during New Student Orientation and there is a $15 charge. Graduate students assessed course work as a result of performance on the ELPT, TOEFL writing, IELTS writing, PTE-A writing, GRE or GMAT analytical writing will be required to complete the EASL course(s) to support initial course work taken in their fields. Graduate departments/degree programs will have the discretion to waive either the requirement for the language evaluation or the required language courses.

TOEFL Waiver for Walton College Professional Graduate Programs.

The publication, “International Student Information,” is available from the Graduate and International Admissions Office, 213 Gearhart Hall, 1 University of Arkansas, Fayetteville, Arkansas 72701.
International applicants to a professional program may petition the Graduate School of Business for a TOEFL waiver if the following criteria are met:

1) Possess H1B, L1, Green Card or work visa equivalent, AND

2) Be 100% employed in the U.S. with English speaking companies for a minimum period of three years

The Program Director (or designee) for the professional program in which the student is seeking admission will interview the applicant and either grant or deny the waiver.

If the TOEFL waiver is denied, in order to be eligible for admission into a professional program, an official TOEFL score meeting Graduate School requirements must be submitted prior to the beginning of the term in which admission is desired.

Classifications of Admission to Graduate Standing

The Graduate School of Business admits students as either degree-seeking or as non-degree-seeking for a single semester. Degree-seeking students are simultaneously admitted to the Graduate School of Business and to the degree program in which they are seeking a degree. Each degree program in the Walton College has its own minimum admissions criteria. Meeting the minimum criteria listed below does not imply that admission will be granted. The minimum requirements for admission to the Graduate School of Business are as follows:

Degree-Seeking/Regular Standing

1. A grade-point average of 2.70 or better (A = 4.00) on all course work taken prior to receipt of a baccalaureate degree from a regionally accredited institution of higher education and an acceptable GMAT or GRE score.

2. A grade-point average of 3.20 or better on the last 60 hours of course work taken prior to the receipt of a baccalaureate degree from a regionally accredited institution of higher education and an acceptable GMAT or GRE score.

Degree-Seeking/Conditional Standing

1. A grade-point average between 2.50 and 2.69 on all course work taken prior to receipt of a baccalaureate degree from a regionally accredited institution of higher education, acceptable GMAT or GRE score.

2. Approval of the Associate Dean for Research and Graduate Programs, on condition that the student makes a cumulative grade-point average of 3.00 or better on the first 12 hours of graduate-level course work in the degree program and meets any other conditions that may be specified by the faculty of the department or program.

Any other consideration for regular admission must be by individual petition to the Associate Dean for Programs and Research and, where pertinent, a recommendation from the appropriate departmental chair will be considered on its own merits, case by case.

Non-Degree Seeking, Single Semester. Students admitted to a single semester non-degree standing must understand that any enrollment taken in this classification will not normally carry degree credit. Transcripts are not required for applicants seeking this single semester non-degree standing.

Persons who are admitted as non-degree seeking and who subsequently decide to pursue a degree must apply for and be admitted into a degree program by the appropriate admissions committee of the Graduate School of Business.

A non-degree seeking student may take no more than six semester hours of graduate-level courses that can be counted toward the requirements for a master’s degree. Students in the Information Systems ERP Certificate Program (sponsored by SAP America) and the Business Intelligence Certificate (sponsored by SAS Institute) and who are subsequently accepted into the Master of Information Degree Program will be allowed to use up to 12 graduate hours taken as a non-degree seeker toward the MIS degree.

At the time of acceptance into a degree program, the director of the appropriate degree program will recommend to the Graduate School of Business which courses previously taken, if any, are to be accepted in the degree program.

Letter of Good Standing. A graduate student who is in good standing at another regionally accredited institution in the United States may be given admission (non-degree status) to the Graduate School of Business for one semester upon submission of an Application for Admission and a letter of good standing from the dean of the Graduate School at that institution. If, at some time in the future, the student should wish to pursue a degree in the Graduate School of Business or in the University of Arkansas Graduate School, it will be necessary to follow the normal procedures for admission and to have official transcripts sent from each institution previously attended. Graduate courses transferred and used for requirements for a degree at another university cannot be used for a graduate degree at this institution.

Readmission: Readmission to the Graduate School of Business is not automatic.

A student who has not been enrolled during the previous semester (fall or spring) must submit a new application form to the Graduate School of Business along with a $25 processing fee and an official transcript from any institution attended while not enrolled in the Graduate School of Business.

At the time of readmission, the appropriate admissions committee will determine whether to readmit the student and which classes taken during previous enrollments at the Graduate School of Business will be counted toward graduation.

Transfer of Credit. The Graduate School of Business will allow transfer of credit of a maximum of six credit hours under the following circumstances:

1. The hours were earned at an AACSB-accredited school, and
2. The student earned an “A” or “B” in the courses requested for transfer credit, and
3. The master’s program coordinator approves the courses for credit toward a master’s degree.
4. The student must have graduate standing and the course(s) must be graduate level.

Academic Integrity

As a core part of its mission, the University of Arkansas provides students with the opportunity to further their educational goals through programs of study and research in an environment that promotes freedom of inquiry and academic responsibility. Accomplishing this mission is only possible
when intellectual honesty and individual integrity prevail. Each University of Arkansas student is required to be familiar with and abide by the university’s Academic Integrity Policy (http://honesty.uark.edu/policy/) at honesty.uark.edu (http://honesty.uark.edu). Students with questions about how these policies apply to a particular course or assignment should immediately contact their instructor.

**Academic Dismissal**

Students may be dropped from further study in the Graduate School of Business if, at any time, their performance is considered unsatisfactory as determined by either the program faculty or the Associate Dean for Programs and Research. Academic or research dishonesty or failure to maintain a specified cumulative grade-point average are considered to be unsatisfactory performance. The Graduate School of Business subscribes to and enforces the Academic Integrity Policy (https://honesty.uark.edu/policy/) of the University of Arkansas.

For students enrolled in the Master of Accountancy, Master of Arts in Economics or Master of Information Systems degree programs, the following academic standards apply: Whenever a student has less than a 3.00 cumulative grade-point average on graded course work taken in residence for graduate credit, the student will be placed on academic probation and warned of the possibility of academic dismissal. If the student fails to bring his/her cumulative grade-point average up to or above a 3.00 at the conclusion of the next grading period, he/she will be academically dismissed from the program.

For students enrolled in the Master of Business Administration degree programs, the following academic standards apply: Whenever a student has less than a 2.85 cumulative grade-point average on graded course work taken in residence for graduate credit, the student will be placed on academic probation for the following semester and warned of the possibility of academic dismissal. When the student has accumulated a minimum of 12 hours of graded coursework taken in residence for graduate credit with a cumulative grade-point average below 2.85 and has received at least one warning, he/she will be academically dismissed from the Graduate School of Business.

For students enrolled in the Master of Business Administration degree programs, a cumulative grade-point average of 2.85 is required to be eligible for graduation. Students may take up to an additional six credit hours of graduate coursework in an effort to raise the cumulative grade-point average to 2.85. Students who repeat a course to raise their grade must count the repetition toward the maximum of six additional hours. Using its own written procedures, the graduate faculty of each master’s degree program may recommend that the student be readmitted to the Graduate School of Business. The graduate faculty of the master’s degree programs may establish, and state in writing, the requirements for graduation. Students who repeat a course to raise their grade must count the repetition toward the maximum of six additional hours. All requirements for a master’s degree must be completed within six calendar years.

This page includes information and policies about the following:

- Academic Grievance Procedures for Graduate Students
- Grievance Policy and Procedures for Graduate Assistants
- Research and Scholarly Misconduct Policies and Procedures

**Graduate Student Grievance**

The Graduate School of Business of the Sam M. Walton College of Business recognizes that there may be occasions when a graduate student has a grievance about some aspect of his/her academic involvement. It is an objective of the University of Arkansas that a graduate student may have prompt and formal resolution of his/her academic grievances and that this be accomplished according to orderly procedures. Below are the procedures to be used when a graduate student has an academic grievance with a faculty member or administrator. If the student has a grievance against another student or another employee of the university, or if the student has a grievance that is not academic in nature, the appropriate policy may be found by contacting the Office of Affirmative Action or the Office of the Dean.

**Definition of Terms**

**Graduate Student:** Under this procedure, a graduate student is any person who has been formally admitted to the Graduate School of Business of the Sam M. Walton College of Business of the University of Arkansas, Fayetteville, and who is/was enrolled as a graduate-level student at the time the alleged grievance occurred. (Note: Students pursuing a Ph.D. in Business Administration or in Economics should follow the grievance policy of the Graduate School.)

**Academic Grievance:** An academic grievance is a dispute concerning some aspect of academic involvement arising from an administrative or faculty decision which the graduate student claims is unjust or is in violation of his/her rights and is the result of a university error. Any behavior on the part of a faculty member or administrator, which the student believes to have interfered with his/her academic progress, is subject to a grievance. While a complete enumeration of the student’s rights with regard to academic involvement is not possible or desirable, we have provided a short list as illustration. However, as in all cases involving individual rights, whether a specific behavior constitutes a violation of these rights can only be decided in context, following a review by a panel of those given the authority to make such a decision.

In general, the graduate student:

1. has the right to competent instruction;
2. is entitled to have access to the instructor at hours other than class times (office hours);
3. is entitled to know the grading system by which he/she will be judged;
4. has the right to evaluate each course and instructor;
5. has the right to be treated with respect and dignity.

In addition, an academic grievance may include alleged violations of the affirmative action plans of the university related to academic policies and regulations, as well as disputes over grades, graduate assistantship employment agreements, course requirements, graduate/degree program requirements, thesis advisory committee composition, and/or adviser decisions.

**Formal Academic Grievance:** An academic grievance is considered formal when the student notifies the Dean of the Walton College, in writing, that he/she is proceeding with such a grievance. The implications
of this declaration are: 1) all correspondence pertaining to any aspect of the grievance will be in writing and will be made available to the Dean and his/her designee; 2) all documents relevant to the case, including minutes from all relevant meetings, will be part of the complete written record and will be forwarded to the Dean and his/her designee upon receipt by any party to the grievance; 3) the policy contained therein will be strictly followed; and 4) any member of the academic community who does not follow the grievance policy will be subject to disciplinary actions. Filing a formal academic grievance is a serious matter, and the student is strongly encouraged to seek informal resolution of his/her concerns before taking such a step.

Complete Written Record: The “complete written record” refers to all documents submitted as evidence by any party to the complaint, as subject to applicable privacy considerations. (Note: Because the tape recordings of committee meetings may contain sensitive information, including private information pertaining to other students, the tape or verbatim transcription of the tape will not be part of the complete written record. However, general minutes of the meetings, documenting the action taken by the committees, will be part of the record.)

Working Days: Working days shall refer to Monday through Friday, excluding official University holidays.

Procedures

1. Individuals should attempt to resolve claimed grievances first with the person(s) involved, within the department or program, and wherever possible, without resort to formal grievance procedures. The graduate student should first discuss the matter with the faculty member or administrator involved, with the faculty member’s chairperson or degree program coordinator, or with the Walton College Dean or his/her designee. The student’s questions may be answered satisfactorily during this discussion. If the grievance is with the departmental chairperson or program coordinator, the student may choose to meet with the Walton College Dean or his/her designee for a possible informal resolution of the matter.

2. If a student chooses to file a formal academic grievance, the following procedures are to be followed. The students in the Master of Business Administration (M.B.A.) program shall take the appeal in written form to the M.B.A. Program Director. Students in the departmentally based master’s programs shall take the written appeal to the appropriate departmental chairperson. The student shall forward a copy of the written appeal to the Walton College Dean or his/her designee. In the case of a grievance against a departmental chairperson, the M.B.A. Program Director or an administrator who does not report directly to a departmental chairperson, the student will go directly to the Walton College Dean or his/her designee. The appropriate person to receive the written appeal will be referred to as the initial appellate authority. In any case, the Walton College Dean or his/her designee must be notified of the grievance. After discussion between the initial appellate authority (i.e. chairperson/M.B.A. Program Director/Dean and his/her designee) and all parties to the grievance, option 2a, 2b, or 3 may be chosen.

   a. All parties involved may agree that the grievance can be resolved by a recommendation of the initial appellate authority. In this case, the initial appellate authority will forward a written recommendation to all parties involved in the grievance within 20 working days after receipt of the written grievance. The initial appellate authority is at liberty to use any appropriate method of investigation, including personal interviews and/or referral to an appropriate departmental or program committee for recommendation.

   b. Alternatively, any party to the grievance may request that the initial appellate authority consult all statements, documents, and information gathered in his or her investigation, to the applicable reviewing body. For the M.B.A. Program the applicable reviewing body is the M.B.A. Advisory Committee; for other masters programs it is the relevant program advisory committee. The reviewing body shall, within ten working days from the time its chairperson received the request for consideration, present to the initial appellate authority its written recommendations concerning resolution of the grievance. Within ten working days after receiving these recommendations, the initial appellate authority shall provide all parties to the dispute with copies of the reviewing body’s recommendation and his or her consequent written decision on the matter.

3. If the grievance is not resolved by the procedure outlined in item 2, or if any party to the grievance chooses not to proceed as suggested in item 2, he/she will appeal directly to the Dean of the Walton College or his designee. Whenever a grievance comes to the attention of the Dean, either as a result of a direct appeal or when a grievance has not been resolved satisfactorily at the departmental/program level, the Dean and his/her designee will consult with the person alleging the grievance. If that person decides to continue the formal grievance procedure, the Dean will notify all parties named in the grievance and the relevant program administrator (i.e. departmental chairperson or the M.B.A. Program Director), that a formal grievance has been filed. Within ten working days, the Dean and his/her designee will:

   a. with the consent of the student, appoint a faculty member as the student’s advocate, and

   b. utilize an ad hoc committee of five faculty members and two graduate students, chosen to avoid obvious bias or partiality, to review the grievance and report to him/her. The Walton College Dean or his/her designee will serve as the chair of the grievance committee and will vote only in the case of a tie. A voting member of the Graduate School of Business Masters Program Committee will serve as the non-voting secretary of the committee. The committee shall have access to witnesses and records, may take testimony, and may make a record by taping the hearing. Its charge is to develop all pertinent factual information (with the exception that the student and faculty member/administrator will not be required to be present in any meeting together without first agreeing to do so) and, on the basis of this information, to make a recommendation to the Walton College Dean to either support or reject the appeal. The Dean will then make a decision based on the committee’s recommendation and all other documents submitted by the parties involved. The Dean’s decision, the committee’s written recommendation and a copy of its complete written record (excluding those in which other students have a privacy interest) shall be forwarded to the person(s) making the appeal within 20 working days from the date the committee was first convened; copies shall be sent simultaneously to other parties involved in the grievance. The Graduate School of Business, in such a way that the student’s privacy is protected, shall retain a copy.

4. Within ten working days of the receipt of the Walton College Dean’s decision, any party to the grievance may appeal to the Dean of the University of Arkansas Graduate School as described in step 3 of the procedures of Academic Grievance Procedures for Graduate Students in the Graduate School.

5. When, and only when, the grievance concerns a course grade and the committee’s recommendation is that the grade assigned by the
instructor should be changed, the following procedure applies. The committee’s recommendation that the grade should be changed shall be accompanied by a written explanation of the reasons for that recommendation and by a request that the instructor change the grade. If the instructor declines, he/she shall provide a written explanation for refusing. The committee, after considering the instructor’s explanation and upon concluding that it would be unjust to allow the original grade to stand, may then recommend to the department chair that the grade be changed. The department chair will provide the instructor with a copy of the recommendation and ask the instructor to change the grade. If the instructor continues to decline, the department chair may change the grade, notifying the instructor, the Walton College Dean or his/her designee, and the student of the action. Only the department chair, and only on recommendation of the committee, may change a grade over the objection of the instructor who assigned the original grade. For courses with a specific M.B.A. program designation (MBAD course number prefix) the Walton College Dean or his/her designee shall fulfill the department chair responsibilities described in this section. No appeal or further review is allowed from this action. All grievances concerning course grades must be filed within one calendar year of receiving that grade.

6. The Master of Arts in Economics is the only Graduate School of Business program with a thesis option. When, and only when, a student in that program brings a grievance concerning the composition of his/her thesis committee, the following procedure will apply. The Walton College Dean or his/her designee shall meet with the graduate student and the faculty member named in the grievance, and shall consult the chair of the committee, the department chairperson, and/or the program coordinator for their recommendations. In unusual circumstances, the Dean and his/her designee may remove a faculty member from a student’s thesis committee or make an alternative arrangement. With regard to the chair of the thesis committee, this is a mutual agreement between the faculty member and the student to work cooperatively on a research project of shared interest. Either the graduate student or the faculty member may dissolve this relationship by notifying the other party, the departmental chairperson, and the Walton College Dean or his/her designee. However, the student and the adviser should be warned that this may require that all data gathered for the thesis be abandoned and a new research project undertaken with a new faculty adviser.

7. If a grievance, other than those covered by step 5, is not satisfactorily resolved through steps 1 through 4 or 6, an appeal in writing and with all relevant material may be submitted for consideration and a joint decision by the Chancellor of the University of Arkansas, Fayetteville, and the Provost/Vice Chancellor for Academic Affairs. This appeal must be filed within 20 working days of receiving the decision of the Dean of the University of Arkansas Graduate School. Any appeal at this level shall be on the basis of the complete written record only, and will not involve interviews with any party to the grievance. The Chancellor of the University of Arkansas, Fayetteville, and the Provost/Vice Chancellor for Academic Affairs shall make a decision on the matter within 20 working days from the receipt of the appeal. Their decision shall be forwarded in writing to the same persons receiving such a decision in step 4. Their decision is final pursuant to the delegated authority of the Board of Trustees.

8. If any party to the grievance violates this policy, he/she will be subject to disciplinary action. When alleging such a violation, the aggrieved individual shall contact the Walton College Dean in writing, with an explanation of the violation.

**Graduate Assistant Grievance Policy**

It is the philosophy of the Graduate School that assistantships are not typical employee positions of the university. This has two implications. First, the sponsor should also serve as a mentor to the student and assist, to the extent possible, in facilitating the student’s progress toward his/her degree. Second, any questions concerning performance in or requirements of assistantships shall be directed to the Graduate School or, for master’s students in business, to the Graduate School of Business. (Note: the term “graduate assistant” will be used to refer to those on other types of appointments as well, such as fellowships, clerkships, etc.) The Graduate School has the following authority with regard to graduate assistantships:

1. All requests for new positions, regardless of the source of the funds, must be approved by the Graduate School. When the position is approved, the requesting department or faculty member must complete the form, “Request for a New Graduate Assistant Position” and submit it to the Graduate School. All proposed changes in duties for existing graduate assistantships must be approved by the Graduate School prior to their implementation.

2. The duty requirements of the graduate assistantship, including the number of hours required, must be approved by the Graduate School. Fifty percent graduate assistants may not be asked to work more than 20 hours per week (Note: this is not limited to time actually spent in the classroom or lab; the 20 hour requirement also pertains to time required to grade/compute results, develop class/lab materials, etc. Moreover, students cannot be asked to work an average of 20 hours per week, with 30 hours one week and 10 hours the next, for example. The duty hour requirement is no more than 20 hours per week for a 50 percent appointment. See the Graduate Handbook. However, it should also be noted that if the student is engaged in research which will be used in his/her required project, thesis, or dissertation, or if the student is traveling to professional meetings, data sources, etc., the student may work more than 20 hours per week.) The duty requirements must complement the degree program of the graduate student and must abide by the philosophy that the first priority of graduate students is to finish their degrees.

3. The Graduate School, in consultation with the Graduate Council, has the right to set the enrollment requirements for full-time status for graduate assistants.

4. The Graduate School sets the minimum stipend for graduate assistantships, but does not have responsibility for setting the actual stipend. Graduate assistants will be provided with a written statement of the expected duties for their positions, consistent with the duties outlined in the “Request for New Graduate Assistant Position” or any amendments submitted to the Graduate School. A copy of the written statement will be submitted to the Graduate School of Business for inclusion in the student’s file. Graduate assistants may be terminated from their positions at any time or dismissed for cause under the procedures of Board Policy No. 405.1. Termination is effected through the giving of a notice, in writing, of that action at least 60 days in advance of the date the employment is to cease. A copy of the notice must be sent to the Dean of the Walton College and to the Dean of the Graduate School.

A graduate assistant has the right to request a review of the termination by the Dean, following the procedure given below. However, a student should be warned that if the grounds for dismissal are based on any of the
following, the only defense to the termination is evidence to show that the charges are not true:

1. The student fails to meet the expectations of the assistantship positions, as outlined in the initial written statement provided to them at the beginning of the appointment.
2. The student provides fraudulent documentation for admission to their degree program and/or to their sponsor in applying for the assistantship positions.
3. The student fails to meet certain expectations which need not be explicitly stated by the sponsor, such as the expectation that a. the student has the requisite English language skills to adequately perform the duties of the position; b. the student has the appropriate experience and skills to perform the duties of the position; and c. the student maintains the appropriate ethical standards for the position. The Research Misconduct Policy provides one reference source for such ethical standards.
4. The student fails to make good progress toward the degree, as determined by the annual graduate student academic review and defined by program and Graduate School policies.

Formal grievance. A grievance concerning graduate assistantships/fellowships is considered formal when the student notifies the Dean of the Walton College, in writing, that he/she is proceeding with such a grievance. The implications of this declaration are: a) the student will be provided with an advocate; b) all correspondence pertaining to any aspect of the grievance will be in writing, and will be made available to the Dean; c) all documents relevant to the case, including minutes from all relevant meetings, will be part of the complete written record, and will be forwarded to the Dean upon receipt by any party to the grievance; d) the policy contained herein will be strictly followed; and e) any member of the academic community who does not follow the grievance policy will be subject to disciplinary actions. Filing a formal grievance is a serious matter, and the student is strongly encouraged to seek informal resolution of his/her concerns before taking such a step.

Respondent. The person who is the object of the grievance.

Procedures
Note: Grievances are confidential. Information about the grievance, including the fact that such a grievance has been filed, may never be made public to those who are not immediately involved in the resolution of the case, unless the student has authorized this release of information or has instigated a course of action which requires the respondent to respond. An exception to this confidentiality requirement is that the immediate supervisor or departmental chairperson of the respondent will be notified and will receive a copy of the resolution of the case. Since grievances against a respondent also have the potential to harm that person’s reputation, students may not disclose information about the grievance, including the fact that they have filed a grievance, to any person not immediately involved in the resolution of the case, until the matter has been finally resolved. This is not intended to preclude the student or respondent from seeking legal advice.

1. When a graduate student believes that his/her rights have been violated, as the result of action(s) pertaining to a graduate assistantship he/she holds or has held within the past year, the student shall first discuss his/her concerns with the respondent. If the concerns are not resolved to the student’s satisfaction, the student may discuss it with the Dean of the Walton College or his/her designee, and/or with the Office of Affirmative Action. If the concerns are satisfactorily resolved by any of the above discussions, the terms of the resolution shall be reduced to writing, if any of the involved parties desires to have such a written statement.
2. If the student’s concerns are not resolved by the above discussions, and he/she chooses to pursue the matter further, the student shall notify the Dean of the Walton College in writing of the nature of the complaint. This notification will include all relevant documentation and must occur within one year from the date of the occurrence. The Dean of the Walton College will inform the Graduate Dean that a grievance has been filed and will, upon request, forward the written complaint and all relevant documentation to the Graduate Dean.
3. Upon receipt of this notification and supporting documentation, the Dean of the Walton College or the Dean’s designee will meet with the graduate student. If the student agrees, the Dean or the Dean’s designee will notify the respondent of the student’s concerns. If the student does not wish for the respondent to be notified, the matter will be dropped. The respondent will be given ten working days from receipt of the Dean’s notification to respond to the concerns.
4. The Dean or the Dean’s designee will meet again with the student and make an effort to resolve the concerns in a mutually satisfactory
manner. If this is not possible, the Dean will refer the case to a committee.

5. Within ten working days from the final meeting between the student and the Dean, the Dean will notify the respondent and will appoint an ad hoc committee of five faculty members and two graduate students chosen to avoid bias or partiality. The Associate Dean of the Walton College or the Dean’s designee will serve as the chair of the grievance committee and will vote only in the case of a tie. A voting member of the Walton College Masters Advisory Committee will serve as the non-voting secretary of the committee. At this time, the Dean will also assign an advocate to the student. The advocate must be a member of the graduate faculty. The immediate supervisor of the respondent will serve as his/her advocate. Note: The student and respondent advocates will have the responsibility to help the student/respondent prepare his/her written materials and will attend committee meetings with the student/respondent. The advocate will not speak on behalf of the student/respondent and will not take part in committee discussions of the merits of the case.

6. The committee shall have access to witnesses and records, may take testimony, and may make a record by taping the hearing. Its charge is to develop all pertinent factual information (with the exception that the student and respondent will not be required to be present in any meeting together without first agreeing to do so) and, on the basis of this information, to make a recommendation to the Dean of the Walton College either to support or reject the grievance. The Dean will then make a decision based on the committee’s recommendation and all documents submitted by the parties involved. The Dean’s decision, the committee’s written recommendation, and a copy of all documents submitted as evidence by any party to the complaint, consistent with all privacy considerations, shall be forwarded to the person(s) alleging the grievance within 20 working days from the date the committee was first convened; copies shall be sent simultaneously to other parties involved in the grievance. A copy shall be retained by the Graduate School of Business in such a way that the student’s and respondent’s privacy is protected.

7. If the decision of the Dean of the Walton College is that the student’s concerns should be addressed, the respondent may appeal to the Provost/Vice Chancellor for Academic Affairs of the University, as outlined below in step 10. It should be noted that the Graduate Dean has limited authority to require a sponsor to reappoint a graduate assistant. Consequently, the redress open to the student may be limited.

8. If the decision of the Dean is that the student’s concerns should not be addressed, the student may appeal to the Graduate Dean, as outlined below in step 9.

9. If the grievance is not satisfactorily resolved through step 6, an appeal in writing and with all relevant material may be submitted for consideration to the Graduate Dean. This appeal must be filed within 20 working days of receiving the decision of the Dean of the Walton College. Any appeal at this level shall be on the basis of the complete written record and may involve interviews with any party to the grievance. The Graduate Dean shall make a decision on the matter within 20 working days from the date of receipt of the appeal. His/her decision shall be forwarded in writing to the Walton College Dean, the student, and the respondent.

10. Either party to the grievance may appeal the decision of the Graduate Dean by appealing to the Provost/Vice Chancellor for Academic Affairs of the University of Arkansas. The appeal must be submitted in writing and with all relevant material attached. This appeal must be filed within 20 working days of receiving the decision of the Graduate Dean. Any appeal at this level shall be on the basis of the complete written record only and will not involve interviews with any party to the grievance. The Provost/Vice Chancellor for Academic Affairs shall make a decision on the matter within 20 working days from the date of receipt of the appeal. His/her decision shall be forwarded in writing to the Graduate Dean, the Dean of the Walton College, the student and the respondent. This decision is final.

11. If any party to the grievance violates this policy, he/she will be subject to either losing the assistantship position or losing the assistantship. When alleging such a violation, the aggrieved individual shall contact the Walton College Dean or the Graduate Dean, in writing, with an explanation of the violation.

Research and Scholarly Misconduct Policies and Procedures

I. Introduction

A. General Policy

The University of Arkansas is committed to the highest integrity in research and scholarly activity. Actions which fail to meet this standard can undermine the quality of academic scholarship and harm the reputation of the University. This policy is designed to help ensure that all those associated with the University of Arkansas carry out their research and scholarly obligations in a manner that is consistent with the mission and values of the university, and provides a means of addressing instances of suspected research misconduct should they arise.

Principal investigators are responsible for maintaining ethical standards in the projects they direct and reporting any violations to the appropriate university official. Students charged with academic misconduct are subject to separate disciplinary rules governing students, however, such cases may also be reviewed under these policies if applicable under the provisions stated below. The Research Integrity Officer, in consultation with the student’s dean shall determine which policy is most appropriate in each case.

A charge of research misconduct is very serious, and will be reviewed carefully and thoroughly. Any allegation of research misconduct will be handled as confidentially and expeditiously as possible. Full attention will be given to the rights and responsibilities of all individuals involved. Charges of research misconduct which are determined not to be made in good faith, as provided for in this policy, may result in administrative action against the charging party.

B. Scope

This statement of policy and procedures is intended to carry out the responsibilities of the University of Arkansas, Fayetteville under the Public Health Service (PHS) Policies on Research Misconduct, 42 CFR Part 93 and the research misconduct policies of other funding agencies, as applicable to particular allegations.

This document applies to allegations of research misconduct (as defined below) involving:

• A person who, at the time of the alleged research misconduct, was employed by, was an agent of, or was affiliated by enrolled student status, contract or agreement with the University of Arkansas, Fayetteville; and
• is accused of plagiarism, fabrication, or falsification of research records produced in the course of research, research training or
II. Definitions and Standard of Review

Charge. A written allegation of misconduct that triggers the procedures described in this policy.

Complainant. A person who submits a charge of research misconduct.

Deciding Official (DO). The Provost and Vice Chancellor for Academic Affairs who is the institutional official responsible for making determinations, subject to appeal, on allegations of research misconduct and any institutional administrative actions. The Deciding Official will not be the same individual as the Research Integrity Officer and should have no direct prior involvement in the institution’s allegation assessment, inquiry, or investigation. Discussing concerns regarding suspected research misconduct, as provided for in Section IV.A. of this policy, shall not be considered direct prior involvement. If the Deciding Official is unable to serve as DO in a particular matter, the Chancellor may appoint an appropriate official to act as the DO for purposes of that matter.

Good Faith Charge. A charge of research misconduct made by a complainant who believes that research misconduct may have occurred. A charge is not in good faith if it is made with reckless disregard for or willful ignorance of facts that would disprove the charge.

Inquiry. The process under the policy for information gathering and preliminary fact-finding to determine if a charge or apparent instance of research misconduct has substance and therefore warrants an investigation.

Investigation. The process under this policy for the formal examination and evaluation of all relevant facts to determine whether research misconduct has occurred, and, if so, the responsible person and the seriousness of the misconduct.

Investigator. Any person, including but not limited to any person holding an academic or professional staff appointment at the University of Arkansas, who is engaged in the design, conduct, or reporting of research.

ORI. The Office of Research Integrity within the U.S. Department of Health and Human Services.

PHS. The Public Health Service within the U.S. Department of Health and Human Services.

Preponderance of Evidence. Evidence which is of greater weight or more convincing than evidence to the contrary; evidence which shows that something more likely than not is true.

Recklessly. To act recklessly means that a person acts in such a manner that the individual consciously disregards a substantial and unjustifiable risk or grossly deviates from the standard of conduct that a reasonable individual would observe; reckless means more than mere or ordinary negligence.

Research. A systematic investigation designed to develop or contribute to generalizable knowledge. The term includes the search for both basic and applied knowledge and well as training methods by which such knowledge may be obtained.

Research Integrity Officer (RIO) means the Chair of the Research Council who is the institutional official responsible for: (1) assessing allegations of research misconduct to determine if the allegations fall within the definition of research misconduct, are covered by 42 CFR Part 93 or other applicable federal policies, and warrant an inquiry on the basis that the allegation is sufficiently credible and specific so that potential evidence of research misconduct may be identified; (2) overseeing inquiries and investigations; and (3) the other responsibilities described in this policy. If the Research Integrity Officer is unable to serve as RIO in a particular matter, the DO may appoint an appropriate official to act as the RIO for purposes of that matter.

Research Misconduct. Research misconduct means the fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results.

1. Fabrication is making up data or results and recording or reporting them.
2. Falsification is manipulating research materials, equipment, or processes, or changing or omitting data or results such that the research is not accurately represented in the research record.
3. Plagiarism is the appropriation of another person’s ideas, processes, results, or words without giving appropriate credit.

Research misconduct does not include disputes regarding honest error or honest differences in interpretations or judgments of data, and is not intended to resolve bona fide scientific disagreement or debate. Research misconduct is also not intended to include “authorship” disputes such as complaints about appropriate ranking of co-authors in publications, presentations, or other work, unless the dispute constitutes plagiarism (as defined above).

Research Record. Any data, document, computer file, computer storage media, or any other written or non-written account or object that reasonably may be expected to provide evidence or information regarding the proposed, conducted, or reported research that constitutes the subject of a charge of research misconduct. A research record includes, but is not limited to, grant or contract applications, whether funded or unfunded; grant or contract progress and other reports; laboratory notebooks; notes; printed or electronic correspondence; memoranda of telephone calls; videos; photographs; X-ray film; slides; biological materials; computer files and printouts; manuscripts and publications; equipment use logs; laboratory procurement records; animal facility records; human and animal subject protocols; consent forms; medical charts; and patient research files.

Respondent. The person against whom a charge of research misconduct is directed, or the person whose actions are the subject of an inquiry or investigation.

Standard of Review.

A finding of research misconduct requires that:

1. There be a significant departure from accepted practices of the relevant research community; and
2. The research misconduct be committed intentionally, knowingly, or recklessly; and
3. The allegation be proven by a preponderance of the evidence.

This standard and related definitions are restated in the charge to the investigation committee located in Section V.E. of this policy.

III. Rights and Responsibilities

A. Research Integrity Officer

The Chair of the Research Council will serve as the RIO who will have primary responsibility for implementation of the institution’s policies and procedures on research misconduct. These responsibilities include the following duties related to research misconduct proceedings:

- Consult confidentially with persons uncertain about whether to submit an allegation of research misconduct;
- Receive allegations of research misconduct;
- Assess each allegation of research misconduct in accordance with Section V.A. of this policy to determine whether the allegation falls within the definition of research misconduct and warrants an inquiry;
- As necessary, take interim action and notify ORI of special circumstances, in accordance with Section IV.H. of this policy;
- Sequester research data and evidence pertinent to the allegation of research misconduct in accordance with Section V.C. of this policy and maintain it securely in accordance with this policy and applicable law and regulations;
- Provide confidentiality to those involved in the research misconduct proceeding as required by 42 CFR § 93.108 or other applicable law or regulations, or institutional policy;
- Notify the respondent and provide opportunities for him/her to review/comment/respond to allegations, evidence, and committee reports in accordance with Section III.C. of this policy.
- Inform respondents, complainants, and witnesses of the procedural steps in the research misconduct proceeding;
- Appoint the chair and members of the inquiry and investigation committees, ensure that those committees are properly staffed and that there is expertise appropriate to carry out a thorough and authoritative evaluation of the evidence;
- Determine whether each person involved in handling an allegation of research misconduct has an unresolved personal, professional, or financial conflict of interest and take appropriate action, including recusal, to ensure that no person with such conflict is involved in the research misconduct proceeding;
- In cooperation with other institutional officials, take all reasonable and practical steps to protect or restore the positions and reputations of good faith complainants, witnesses, and committee members and counter potential or actual retaliation against them by respondents or other institutional members;
- Keep the Deciding Official and others who need to know apprised of the progress of the review of the allegation of research misconduct;
- Notify and make reports to ORI or other applicable federal agencies as required by 42 CFR Part 93 or other applicable law or regulations;
- Ensure that administrative actions taken by the institution, ORI, or other appropriate agencies are enforced and take appropriate action to notify other involved parties, such as sponsors, law enforcement agencies, professional societies, and licensing boards of those actions; and
- Maintain records of the research misconduct proceeding and make them available to ORI or other appropriate agencies as applicable in accordance with Section VIII.F. of this policy.

B. Complainant

The complainant is responsible for making allegations in good faith, maintaining confidentiality to the extent permitted by law, and cooperating with the inquiry and investigation. As a matter of good practice, the complainant should be interviewed at the inquiry stage and given the transcript of the interview for comment. The complainant must be interviewed during an investigation, and be given the transcript of the interview for comment. The complainant may be provided for comment with (1) relevant portions of the inquiry report (within a time frame that permits the inquiry to be completed within 60 days of its initiation); and (2) relevant portions of the draft investigation report. In reviewing reports, the complainant must adhere to time limits set by the corresponding committee for timely completion of the inquiry or investigation.

C. Respondent

The respondent is responsible for maintaining confidentiality and cooperating with the conduct of an inquiry and investigation. The respondent is entitled to:

- A good faith effort from the RIO to notify the respondent in writing at the time of or before beginning an inquiry;
- An opportunity to comment on the inquiry report and have his/her comments attached to the report;
- Be notified of the outcome of the inquiry, and receive a copy of the inquiry report that includes a copy of, or refers to 42 CFR Part 93 or other applicable law or regulations and the institution’s policies and procedures on research misconduct;
- Be notified in writing of the allegations to be investigated within a reasonable time after the determination that an investigation is warranted, but before the investigation begins (within 30 days after the institution decides to begin an investigation), and be notified in writing of any new allegations, not addressed in the inquiry or in the initial notice of investigation, within a reasonable time after the determination to pursue those allegations;
- Be interviewed during the investigation, have the opportunity to correct the recording or transcript, and have the corrected recording or transcript included in the record of the investigation;
- Have a good faith effort made to interview during the investigation any witness who has been reasonably identified by the respondent as having information on relevant aspects of the investigation, have the recording or transcript provided to the witness, have the witness suggest any corrections in the transcript, and have the recording or corrected transcript included in the record of investigation; and
- Receive a copy of the draft investigation report and, concurrently, a copy of, or supervised access to any records or materials on which the report is based, and be notified that any comments must be submitted within 30 days of the date on which the copy was received and that the comments will be considered by the institution and addressed in the final report.
- Appeal the decision of the DO as provided in Section XIII.D.

The respondent should be given the opportunity to admit that research misconduct occurred and that he/she committed the research misconduct. With the advice of the RIO and/or other institutional officials, the Deciding Official may terminate the institution’s review of an allegation that has been admitted, if the institution’s acceptance of the admission and
any proposed resolution is approved by ORI or the appropriate federal agency, if required.

D. Deciding Official

The DO will receive the inquiry report and, after consulting with the RIO and/or other institutional officials, decide whether an investigation is warranted under this policy, the criteria in 42 CFR § 93.307(d), or other applicable law or regulations. Any finding that an investigation is warranted must be made in writing by the DO and must be provided to ORI or other federal agencies, if required, together with a copy of the inquiry report meeting the requirements of 42 CFR § 93.309, within 30 days of the finding. If it is found that an investigation is not warranted, the DO and the RIO will ensure that detailed documentation of the inquiry is retained for at least 7 years after termination of the inquiry, so that ORI or other applicable agencies may assess the reasons why the institution decided not to conduct an investigation.

The DO will receive the investigation report and, after consulting with the RIO and/or other institutional officials, decide the extent to which this institution accepts the findings of the investigation and, if research misconduct is found, decide what, if any, institutional administrative actions are appropriate. The DO shall ensure that the final investigation report, the findings of the DO and a description of any pending or completed administrative actions are provided to ORI, as required by 42 CFR § 93.315 or to other federal agencies as required by their respective misconduct policies.

IV. General Policies and Principles

A. Responsibility to Report Misconduct

All institutional members will report observed, suspected, or apparent research misconduct to the RIO, the DO, or their designees. Prior to submitting a formal charge, a potential complainant is encouraged to consult informally with the RIO, the DO, or their designees to consider whether the case involves questions of research misconduct, should be resolved by other University procedures, or does not warrant further action. Contact information for the RIO may be obtained from the Office of Research Support and Sponsored Programs or the listing of Research Council members on the Faculty Senate website. If the circumstances described by the individual do not meet the definition of research misconduct, but further action is required, the RIO will refer the individual or allegation to other offices or officials with responsibility for resolving the problem.

At any time, to the extent permitted by law, an institutional member may have confidential discussions and consultations about concerns of possible misconduct with the RIO, the DO, or their designees and will be counseled about appropriate procedures for reporting allegations and their obligation to cooperate in any inquiry or investigation that may occur.

B. Cooperation with Research Misconduct Proceedings

Institutional members shall cooperate with the RIO and other institutional officials in the review of allegations and the conduct of inquiries and investigations. Institutional members, including recipients, have an obligation to provide evidence relevant to research misconduct allegations to the RIO or other institutional officials.

C. Confidentiality

The RIO shall, as required by 42 CFR § 93.108 or other applicable law or regulation: (1) limit disclosure of the identity of respondents and complainants to those who need to know in order to carry out a thorough, competent, objective and fair research misconduct proceeding; and (2) except as otherwise prescribed by law, limit the disclosure of any records or evidence from which research subjects might be identified to those who need to know in order to carry out a research misconduct proceeding.

D. Conflicts of interest

At each stage of handling an inquiry or subsequent investigation, all persons involved shall be vigilant to prevent any real or perceived conflict of interest, or personal conflicts or relationships between colleagues, from affecting the outcome of the proceedings and resolution of the charges. Possible conflicts of interest may include co-authorship of work within the recent past with any of the individuals directly involved with the alleged misconduct, or professional or personal relationship with the respondent beyond that of mere acquaintances or colleagues. Committee members shall not have had any personal, professional or financial involvement with the matters at issue in the investigation that might create an appearance of bias or actual bias. If such relationships or involvement are present, the individual shall recuse himself or herself from any investigative or decisional role in the case. If any prospective committee member at any point in the process presents a conflict of interest, that committee member shall be replaced by another appointee. If the RIO has a conflict of interest, the DO shall appoint a replacement; if the DO has a conflict of interest, the Chancellor shall appoint a replacement. The RIO may use a written conflict of interest statement to implement this provision; a sample statement is referenced in the Appendix to this policy.

E. Protecting complainants, witnesses, and committee members

Institutional members may not retaliate in any way against complainants, witnesses, or committee members. Institutional members should immediately report any alleged or apparent retaliation against complainants, witnesses or committee members to the RIO, who shall review the matter and, as necessary, make all reasonable and practical efforts to counter any potential or actual retaliation and protect and restore the position and reputation of the person against whom the retaliation is directed.

F. Protecting the Respondent

As requested and as appropriate, the RIO and other institutional officials shall make all reasonable and practical efforts to protect or restore the reputation of persons alleged to have engaged in research misconduct, but against whom no finding of research misconduct is made. During the research misconduct proceeding, the RIO is responsible for ensuring that respondents receive all the notices and opportunities provided for in 42 CFR Part 93, or other applicable federal policies, and the policies and procedures of the institution.

G. Adviser to the Respondent

The respondent may consult with an adviser, who may or may not be an attorney. The adviser may not be a principal or witness in the case. The adviser may accompany the respondent to proceedings conducted as a part of the research misconduct proceeding, but shall not speak on behalf of the respondent or otherwise participate in the proceedings. The adviser must maintain confidentiality and be available as needed to ensure that all proceedings are completed on a timely basis.

H. Interim Administrative Actions and Notifying ORI or Other Federal Agencies of Special Circumstances

Throughout the research misconduct proceeding, the RIO will review the situation to determine if there is any threat of harm to public health,
federal funds and equipment, or the integrity of the research process. In the event of such a threat, the RIO will, in consultation with other institutional officials and ORI or other federal agencies, if applicable, take appropriate interim action to protect against any such threat. Interim action might include additional monitoring of the research process and the handling of federal funds and equipment, reassignment of personnel or of the responsibility for the handling of federal funds and equipment, additional review of research data and results or delaying publication. The RIO shall, at any time during a research misconduct proceeding, consult with appropriate university officials and legal counsel immediately if he/she has reason to believe that any of the following conditions exist:

- Health or safety of the public is at risk, including an immediate need to protect human or animal subjects;
- Federal resources or interests are threatened;
- Research activities should be suspended;
- There is a reasonable indication of possible violations of civil or criminal law;
- Federal action is required to protect the interests of those involved in the research misconduct proceeding;
- The research misconduct proceeding may be made public prematurely and federal action may be necessary to safeguard evidence and protect the rights of those involved; or
- The research community or public should be informed.

Following such consultation, the institution shall take appropriate steps to address such conditions, such as by notifying ORI or other applicable agency.

I. Computation of Time

In this policy, any reference to days shall mean calendar days. Any period of time equal to ten days or fewer shall exclude University holidays. If a deadline falls on a weekend or University holiday, the deadline shall be the next University business day.

J. Procedural Changes

1. Deadlines. Due to the sensitive nature of allegations of misconduct, each case shall be resolved as expeditiously as possible. The nature of some cases may, however, render normal deadlines difficult to meet. If at any time an established deadline cannot be met, a report shall be filed with the DO setting out the reasons why the deadline cannot be met and estimating when that stage of the process will be completed. A copy of this report shall be provided to the respondent. If PHS funding is involved, an extension must be received from the Office of Research Integrity.

2. Other Procedural Changes. Particular circumstances in an individual case may dictate variation from the procedures set out in this policy in order to ensure fair and efficient consideration of the matter. Any change in the procedures must ensure fair treatment of the respondent. Any major deviations from the procedures described in this policy shall be made only with the written approval of the DO in consultation with the respondent. Any minor deviations from the procedures described in this policy shall not require the written approval of the DO.

K. Exclusive Process

The procedures described in this policy constitute the exclusive process for raising and resolving charges of research misconduct.

V. Conducting the Assessment and Inquiry

A. Assessment of Allegations

Upon receiving an allegation of research misconduct, the RIO will immediately assess the allegation to determine whether it is sufficiently credible and specific so that potential evidence of research misconduct may be identified and further review is warranted. The RIO shall also determine whether the alleged misconduct is within the jurisdictional criteria of 42 CFR § 93.102(b), and whether the allegation falls within the definition of research misconduct in 42 CFR § 93.103. An inquiry must be conducted if these criteria are met. In conducting this assessment, the RIO may consult with the institution’s legal counsel and other appropriate University officials. If a charge is frivolous, does not raise questions of research misconduct, is more appropriately resolved by other University procedures, or does not warrant further action, the RIO may, at his or her discretion, handle the matter informally or refer it to the appropriate person or process, and will notify the complainant and anyone else known to be aware of the charge.

The assessment period should be brief, preferably concluded within a week. In conducting the assessment, the RIO need not interview the complainant, respondent, or other witnesses, or gather data beyond any that may have been submitted with the allegation, except as necessary to determine whether the allegation is sufficiently credible and specific so that potential evidence of research misconduct may be identified and further review is warranted. The RIO shall, on or before the date on which the respondent is notified of the allegation, obtain custody of, inventory, and sequester all research records and evidence needed to conduct the research misconduct proceeding, as provided in paragraph C. of this section.

B. Initiation and Purpose of the Inquiry

If the RIO determines that the criteria for an inquiry are met, he or she will immediately initiate the inquiry process. The purpose of the inquiry is to conduct an initial review of the available evidence to determine whether to conduct an investigation. An inquiry does not require a full review of all the evidence related to the allegation.

C. Notice to Respondent; Sequestration of Research Records

At the time of or before beginning an inquiry, the RIO must make a good faith effort to notify the respondent in writing, if the respondent is known. With the approval of the respondent, the RIO will also notify the dean of the school or college in which the respondent holds his or her primary appointment. If the inquiry subsequently identifies additional respondents, they must be notified in writing. On or before the date on which the respondent is notified, or the inquiry begins, whichever is earlier, the RIO must take all reasonable and practical steps to obtain custody of all the research records and evidence needed to conduct the research misconduct proceeding, inventory the records and evidence and sequester them in a secure manner, except that where the research records or evidence encompass scientific instruments shared by a number of users, custody may be limited to copies of the data or evidence on such instruments, so long as those copies are substantially equivalent to the evidentiary value of the instruments. The RIO may consult confidentially with the institution’s legal counsel and other appropriate University officials for advice and assistance in this regard. In addition, if necessary, the RIO may consult with ORI or other applicable federal agency.

D. Appointment of the Inquiry Committee
The RIO, in consultation with other institutional officials as appropriate, shall appoint an inquiry committee and committee chair as soon after the initiation of the inquiry as is practical. The inquiry committee must consist of individuals who do not have unresolved personal, professional, or financial conflicts of interest with those involved with the inquiry and should include individuals with the appropriate scientific expertise to evaluate the evidence and issues related to the allegation, interview the principals and key witnesses, and conduct the inquiry. The RIO shall notify the respondent of the proposed inquiry committee membership. The respondent may then submit a written objection to any appointed member of the inquiry committee based on bias or conflict of interest within seven days. If an objection is raised, the RIO shall determine whether to replace the challenged member with a qualified substitute. The RIO’s decision shall be final. The RIO may, with the concurrence of the DO, appoint one or more experts to assist the inquiry committee if necessary to evaluate specific allegations. The RIO shall direct the members of the committee that the investigation and all information relating to the investigation shall be kept confidential.

E. Charge to the Committee and First Meeting

The RIO will prepare a charge for the inquiry committee that:

- Sets forth the time for completion of the inquiry;
- Describes the allegations and any related issues identified during the allegation assessment;
- States that the purpose of the inquiry is to conduct an initial review of the evidence, including the testimony of the respondent, complainant and key witnesses, to determine whether an investigation is warranted, not to determine whether research misconduct definitely occurred or who was responsible;
- States that an investigation is warranted if the committee determines: (1) there is a reasonable basis for concluding that the allegation falls within the definition of research misconduct and is within the jurisdictional criteria of 42 CFR § 93.102(b), if applicable; and, (2) the allegation may have substance, based on the committee’s review during the inquiry.
- Informs the inquiry committee that they are responsible for preparing or directing the preparation of a written report of the inquiry that meets the requirements of this Policy and 42 CFR § 93.309(a), if applicable.

At the committee’s first meeting, the RIO will review the charge with the committee, discuss the allegations, any related issues, and the appropriate procedures for conducting the inquiry, assist the committee with organizing plans for the inquiry, and answer any questions raised by the committee. The RIO will be present or available throughout the inquiry to advise the committee as needed. Prior to the first meeting, the RIO shall consult with legal counsel for the institution as to the need for counsel to provide legal advice to the committee at the first meeting and in subsequent phases of the inquiry, including, but not limited to, for the purpose of reviewing institutional policies governing research misconduct proceedings, confidentiality and potential conflicts of interest.

F. Inquiry Process

The inquiry committee shall interview the complainant and the respondent, and may interview witnesses as well as examine relevant research records and materials. Then the inquiry committee will evaluate the evidence, including the testimony obtained during the inquiry. After consultation with the RIO, the committee members will decide whether an investigation is warranted based on the criteria in this policy and 42 CFR § 93.307(d) as applicable. The scope of the inquiry is not required to and does not normally include deciding whether misconduct definitely occurred, determining definitely who committed the research misconduct or conducting exhaustive interviews and analyses. However, if a legally sufficient admission of research misconduct is made by the respondent, misconduct may be determined at the inquiry stage if all relevant issues are resolved. In that case, the institution shall promptly consult with ORI or other appropriate agencies, as as required, to determine the next steps that should be taken. See Section IX.

G. Time for Completion

The inquiry, including preparation of the final inquiry report and the decision of the DO on whether an investigation is warranted, must be completed within 60 days of initiation of the inquiry, unless the RIO determines that circumstances clearly warrant a longer period. If the RIO approves an extension, the inquiry record must include documentation of the reasons for exceeding the 60-day period. The respondent will be notified of the extension.

VI. The Inquiry Report

A. Elements of the Inquiry Report

A written inquiry report must be prepared that includes the following information: (1) the name and position of the respondent; (2) a description of the allegations of research misconduct; (3) the PHS or other federal support, if any, including, for example, grant numbers, grant applications, contracts and publications listing support; (4) the basis for recommending or not recommending that the allegations warrant an investigation; (5) any comments on the draft report by the respondent or complainant. An outline for reports to be furnished to ORI is referenced in the Appendix to this policy.

Institutional counsel shall review the draft inquiry report prior to transmission of the draft to the respondent. Modifications shall be made as appropriate in consultation with the RIO and the inquiry committee. The inquiry report shall include the following information: the names and titles of the committee members and experts who conducted the inquiry; a summary of the inquiry process used; a list of the research records reviewed; summaries of any interviews; and whether any other actions should be taken if an investigation is not recommended.

B. Notification to the Respondent and Opportunity to Comment

The RIO shall notify the respondent whether the inquiry found an investigation to be warranted, together with a copy of the draft inquiry report, and a copy of or reference to 42 CFR Part 93 or other applicable federal policies and the institution’s policies and procedures on research misconduct. The report shall clearly be labeled “DRAFT” in bold and conspicuous type font. The RIO shall notify the respondent that the respondent shall have 10 days to comment on the draft inquiry report. The RIO shall also direct the respondent that the draft report shall be kept confidential.

On a case-by-case basis, the RIO may provide the complainant a copy of the draft inquiry report, or relevant portions of it, for comment. If so, the report shall clearly be labeled “DRAFT” in bold and conspicuous type font, and the complainant will be allowed no more than 10 days to submit comments to the RIO. The complainant shall be directed that the draft report shall be kept confidential.

Any comments that are submitted by the respondent or the complainant shall be attached to the final inquiry report. Based on the comments, the inquiry committee may revise the draft report as appropriate and prepare it in final form. The committee will deliver the final report to the RIO. The
RIO shall notify the complainant in writing whether the inquiry found an investigation to be warranted.

C. Institutional Decision and Notification

1. Decision by Deciding Official

The RIO will transmit the final inquiry report and any comments to the DO, who will determine in writing whether an investigation is warranted. The inquiry is completed when the DO makes this determination.

2. Notification to ORI and Respondent

Within 30 days of the DO’s decision that an investigation is warranted, the RIO will provide ORI, if required, with the DO’s written decision and a copy of the inquiry report. The RIO shall also provide a copy of the DO’s written decision and a copy of the inquiry report to the respondent within 30 days of the DO’s decision. Subject to confidentiality, the RIO will also notify those institutional officials, if any, who need to know of the DO’s decision because they will be directly involved in the investigation or otherwise have a need to know because of their official duties. The RIO must provide the following information to ORI, if required, or other applicable federal agency upon request: (1) the institutional policies and procedures under which the inquiry was conducted; (2) the research records and evidence reviewed, transcripts or recordings of any interviews, and copies of all relevant documents; and (3) the charges to be considered in the investigation.

3. Documentation of Decision Not to Investigate

If the DO decides that an investigation is not warranted, the RIO shall secure and maintain for 7 years after the termination of the inquiry sufficiently detailed documentation of the inquiry to permit a later assessment by applicable federal agencies of the reasons why an investigation was not conducted. These documents must be provided to such agencies or their authorized personnel upon request.

VII. Conducting the Investigation

A. Initiation and Purpose

The investigation must begin within 30 days, after the determination by the DO that an investigation is warranted. The purpose of the investigation is to develop a factual record by exploring the allegations in detail and examining the evidence in depth, leading to recommended findings on whether research misconduct has been committed, by whom, and to what extent. The investigation will also determine whether there are additional instances of possible research misconduct that would justify broadening the scope beyond the initial allegations. This is particularly important where the alleged research misconduct involves clinical trials or potential harm to human subjects or the general public or if it affects research that forms the basis for public policy, clinical practice, or public health practice. The findings of the investigation must be set forth in an investigation report.

B. Notifying ORI and Respondent; Sequestration of Research Records

On or before the date on which the investigation begins, the RIO must: (1) notify the ORI Director of the decision to begin the investigation and provide ORI a copy of the inquiry report, if required; and (2) notify the respondent in writing of the allegations to be investigated. The RIO must also give the respondent written notice of any new allegations of research misconduct within a reasonable amount of time of deciding to pursue allegations not addressed during the inquiry or in the initial notice of the investigation.

The RIO will, prior to notifying respondent of the allegations, take all reasonable and practical steps to obtain custody of and sequester in a secure manner all research records and evidence needed to conduct the research misconduct proceeding that were not previously sequestered during the inquiry. The need for additional sequestration of records for the investigation may occur for any number of reasons, including the institution’s decision to investigate additional allegations not considered during the inquiry stage or the identification of records during the inquiry process that had not been previously secured. The procedures to be followed for sequestration during the investigation are the same procedures that apply during the inquiry.

C. Appointment of the Investigation Committee

The RIO, in consultation with other institutional officials as appropriate, will appoint an investigation committee and the committee chair as soon after the beginning of the investigation as is practical. The investigation committee must consist of at least three individuals who do not have unresolved personal, professional, or financial conflicts of interest with those involved with the investigation and should include individuals with the appropriate scientific expertise to evaluate the evidence and issues related to the allegations, interview the respondent and complainant and conduct the investigation. Individuals appointed to the investigation committee may also have served on the inquiry committee. When necessary to secure the necessary expertise or to avoid conflicts of interest, the RIO may select committee members from outside the institution, or, with concurrence of the DO, may appoint experts to assist the committee in particular aspects of the case. The RIO will notify the respondent of the proposed investigation committee membership and any appointed experts. If the respondent then submits a written objection to any appointed member or expert based on bias or conflict of interest within seven days, the RIO will determine whether to replace the challenged member or expert with a qualified substitute, and the decision of the RIO shall be final.

D. Charge to the Committee and the First Meeting

1. Charge to the Committee

The RIO will define the subject matter of the investigation in a written charge to the committee that:

- Describes the allegations and related issues identified during the inquiry;
- Identifies the respondent;
- Informs the committee that it must conduct the investigation as prescribed in paragraph E. of this section;
- Reviews the definition of research misconduct as stated in this Policy;
- Informs the committee that it must evaluate the evidence and testimony to determine whether, based on a preponderance of the evidence, research misconduct occurred and, if so, the type and extent of it and who was responsible;
- Informs the committee that in order to determine that the respondent committed research misconduct it must find that a preponderance of the evidence establishes that: (1) research misconduct, as defined in this policy, occurred (respondent has the burden of proving by a preponderance of the evidence any affirmative defenses raised, including honest error or a difference of opinion); (2) the research misconduct is a significant departure from accepted practices of the
relevant research community; and (3) the respondent committed the research misconduct intentionally, knowingly, or recklessly; and

- Informs the committee that it must prepare or direct the preparation of a written investigation report that meets the requirements of this Policy and any other applicable federal policies, such as 42 CFR § 93.313.

2. First Meeting

The RIO will convene the first meeting of the investigation committee to review the charge, the inquiry report, and the prescribed procedures and standards for the conduct of the investigation, including the necessity for developing a specific investigation plan. The RIO shall also direct the members of the committee that the investigation and all information relating to the investigation shall be kept confidential. The investigation committee will be provided with a copy of this statement of policy and procedures and any applicable federal research misconduct policies. The RIO will be present or available throughout the investigation to advise the committee as needed. Prior to the first meeting, the RIO shall also consult with legal counsel for the institution as to the need for counsel to provide legal advice to the committee at the first meeting and in subsequent phases in the investigation, including, but not limited to, for the purpose of reviewing institutional policies governing research misconduct proceedings, confidentiality and potential conflicts of interest.

E. Investigation Process

The investigation committee and the RIO must:

- Use diligent efforts to ensure that the investigation is thorough and sufficiently documented and includes examination of all research records and evidence relevant to reaching a decision on the merits of each allegation;
- Take reasonable steps to ensure an impartial and unbiased investigation to the maximum extent practical;
- Interview each respondent, complainant, and make a good-faith effort to interview any other available person who has been reasonably identified as having information regarding any relevant aspects of the investigation, including witnesses identified by the respondent, and record or transcribe each interview, provide the recording or transcript to the interviewee for correction, and include the recording or transcript in the record of the investigation; and
- Pursue diligently all significant issues and leads discovered that are determined relevant to the investigation, including any evidence of any additional instances of possible research misconduct, and continue the investigation to completion.

F. Time for Completion

The investigation is to be completed within 120 days of the first meeting of the investigation committee, including conducting the investigation, preparing the report of findings, providing the draft report for comment and sending the final report to ORI, if applicable. However, if the RIO determines that the investigation will not be completed within this 120-day period, he/she will submit a written request for an extension to the DO and to ORI or other applicable federal agencies, setting forth the reasons for the delay. If the request for an extension is approved by the DO and applicable federal agencies, then the RIO will ensure that periodic progress reports are filed with the approving officials.

G. Amended Charges

If issues of research misconduct that fall outside of the charge arise during the course of the investigation, the committee shall so inform the RIO, including in its communication the evidence on which its concerns are based. The RIO in consultation with the DO and the investigation committee, will consider the issues raised and, in the RIO’s discretion, provide the investigation committee with an amended charge. The respondent shall be notified of any such amendments.

VIII. The Investigation Report

A. Elements of the Investigation Report

The investigation committee and the RIO are responsible for preparing a written draft report of the investigation that:

- Describes the nature of the allegation of research misconduct, including identification of the respondent and the respondent’s curriculum vitae;
- Describes and documents the federal support, if any, including, for example, the numbers of any grants that are involved, grant applications, contracts, and publications listing federal support;
- Describes the specific allegations of research misconduct considered in the investigation;
- Includes the institutional policies and procedures under which the investigation was conducted;
- Identifies and summarizes the research records and evidence reviewed and identifies any evidence taken into custody but not reviewed; and
- Includes a statement of findings for each allegation of research misconduct identified during the investigation. Each statement of findings must: (1) identify whether the research misconduct was falsification, fabrication, or plagiarism, and whether it was committed intentionally, knowingly, or recklessly; (2) summarize the facts and the analysis that support the conclusion and consider the merits of any reasonable explanation by the respondent, including any effort by respondent to establish by a preponderance of the evidence that he or she did not engage in research misconduct because of honest error or a difference of opinion; (3) identify the specific federal support, if any; (4) identify whether any publications need correction or retraction; (5) identify the person(s) responsible for the misconduct; and (6) list any current support or known applications or proposals for support that the respondent has pending with federal agencies.

- If the committee determines that any allegation of research misconduct is true, the report shall recommend appropriate institutional actions in response to the findings of research misconduct.

The report and other retained documentation must be sufficiently detailed as to permit a later assessment of the investigation. An outline for reports to be furnished to ORI is referenced in the Appendix to this Policy.

B. Comments on the Draft Report and Access to Evidence

The RIO must give the respondent a copy of the draft investigation report for comment and, concurrently, a copy of, or supervised access to the evidence on which the report is based. The report shall clearly be labeled “DRAFT” in bold and conspicuous type font. The respondent will be allowed 30 days from the date he/she received the draft report to submit comments to the RIO. The respondent’s comments must be considered and made a part of the final investigation record. The respondent shall be directed that the draft report shall be kept confidential.
On a case-by-case basis, the RIO may provide the complainant a copy of the draft investigation report, or relevant portions of it, for comment. If so, the report shall clearly be labeled “DRAFT” in bold and conspicuous type font, and the complainant will be allowed no more than 30 days from the date on which he/she received the draft report to submit comments to the RIO. The complainant’s comments must be included and considered in the final report. The complainant shall be directed that the draft report shall be kept confidential.

C. Decision by Deciding Official

The RIO will assist the investigation committee in finalizing the draft investigation report, including ensuring that the respondent’s and, if applicable, complainant’s comments are included and considered, and transmit the final investigation report to the DO, who will determine in writing: (1) whether the institution accepts the investigation report, its findings, and the recommended institutional actions; and (2) the appropriate institutional actions in response to the accepted findings of research misconduct. If this determination varies from the findings of the investigation committee, the DO will, as part of his/her written determination, explain in detail the basis for rendering a decision different from the findings of the investigation committee. Alternatively, the DO may return the report to the investigation committee with a request for further fact-finding or analysis. When a final decision on the case has been reached, whether at this stage of after a subsequent appeal, the RIO will notify the respondent in writing. If the DO’s findings are not appealed within ten days, the DO’s findings shall become the institution’s final decision. At the time of a final decision, whether at this stage or after an appeal, the RIO will also notify the complainant in writing of the final outcome of the case. After informing ORI or other applicable federal agency, as required, the DO will determine whether law enforcement agencies, professional societies, professional licensing boards, editors of journals in which falsified reports may have been published, collaborators of the respondent in the work, or other relevant parties should be notified of the outcome of the case. The RIO is responsible for ensuring compliance with all notification requirements of funding or sponsoring agencies.

D. Appeals

The respondent, within ten days of receiving written notification of the decision of the DO, may file an appeal with the Chancellor. The appeal may result in (i) a reversal or modification of the DO’s findings of research misconduct or determinations of institutional action, (ii) the Chancellor may direct the DO to return the report to the investigation committee with a request for further fact-finding or analysis, or (iii) other action the Chancellor deems appropriate. The appeal process must be completed within 120 days of the filing of the appeal unless an extension is granted by appropriate officials and federal agencies. The decision of the Chancellor shall be final.

E. Notice to Federal Agencies of Institutional Findings and Actions

Unless an extension has been granted, the RIO must, within the 120-day period for completing the investigation or the 120-day period for completion of an appeal, submit the following to any applicable federal agencies as required: (1) a copy of the investigation report with all attachments and any appeals; (2) the findings of research misconduct, including who committed the misconduct; (3) a statement of whether the institution accepts the findings of the investigation; and (4) a description of any pending or completed administrative actions against the respondent.

F. Maintaining Records for Review by Federal Agencies

If required, the RIO must maintain and provide to ORI, if required, or other applicable federal agencies upon request “records of research misconduct proceedings” as that term is defined by 42 CFR § 93.317 or other applicable policies, as appropriate. Unless custody has been transferred to an appropriate federal agency or such agency has advised in writing that the records no longer need to be retained, records of research misconduct proceedings must be maintained in a secure manner for 7 years after completion of the proceeding or the completion of any federal proceeding involving the research misconduct allegation. The RIO is also responsible for providing any information, documentation, research records, evidence or clarification requested by ORI or other appropriate federal agency to carry out its review of an allegation of research misconduct or of the institution’s handling of such an allegation.

IX. Completion of Cases; Reporting Premature Closures to Federal Agencies

Generally, all inquiries and investigations will be carried through to completion and all significant issues will be pursued diligently. A case may be closed at the inquiry stage if it is determined that an investigation is not warranted. A case may be closed at the investigation stage if there is a finding that no research misconduct was committed. If the alleged misconduct was in the jurisdiction of the ORI or other federal agency, then this finding must be reported to the applicable agency. An advance notification by the RIO to any applicable federal agency must be made if there are plans to close a case at the inquiry, investigation, or appeal stage on the basis that respondent has admitted guilt, a settlement with the respondent has been reached, or for any other reason except those noted above.

X. Institutional Administrative Actions

If the DO and any subsequent appeal determine that research misconduct is substantiated by the findings, then the DO may decide on the appropriate actions to be taken, after consultation with the RIO and the Chancellor. The administrative actions may include, but are not limited to, the following:

- Withdrawal or correction of all pending or published abstracts and papers emanating from the research where research misconduct was found;
- Removal of the responsible person from the particular project, letter of reprimand, special monitoring of future work, probation, suspension, salary reduction, or initiation of steps leading to possible rank reduction or termination of employment;
- Restitution of funds to the grantor agency as appropriate; and
- Other action appropriate to the research misconduct.

XI. Other Considerations

A. Termination or Resignation Prior to Completing Inquiry or Investigation

The termination of the respondent’s institutional employment, by resignation or otherwise, before or after an allegation of possible research misconduct has been reported, will not preclude or terminate the research misconduct proceeding or otherwise limit any of the institution’s responsibilities under 42 CFR Part 93 or the corresponding research misconduct policies of other federal agencies.

If the respondent, without admitting to the misconduct, elects to resign his or her position after the institution receives an allegation of research misconduct, the assessment of the allegation will proceed, as well as the inquiry and investigation, as appropriate based on the outcome of the preceding steps. If the respondent refuses to participate in the process
after resignation, the RIO and any inquiry or investigation committee will use their best efforts to reach a conclusion concerning the allegations, noting in the report the respondent’s failure to cooperate and its effect on the evidence.

B. Restoration of the Respondent’s Reputation

Following a final finding of no research misconduct, including ORI concurrence where required by 42 CFR Part 93 or other federal agencies, if required, the RIO must, at the request of the respondent, undertake all reasonable and practical efforts to restore the respondent’s reputation. Depending on the particular circumstances and the views of the respondent, the RIO should consider notifying those individuals aware of or involved in the investigation of the final outcome, publicizing the final outcome in any forum in which the allegation of research misconduct was previously publicized, and expunging all reference to the research misconduct allegation from the respondent’s personnel file. Any institutional actions to restore the respondent’s reputation should first be approved by the DO.

C. Protection of the Complainant, Witnesses and Committee Members

During the research misconduct proceeding and upon its completion, regardless of whether the institution or ORI determines that research misconduct occurred, the RIO must undertake all reasonable and practical efforts to protect the position and reputation of, or to counter potential or actual retaliation against, any complainant who made allegations of research misconduct in good faith and of any witnesses and committee members who cooperate in good faith with the research misconduct proceeding. The DO will determine, after consulting with the RIO, and with the complainant, witnesses, or committee members, respectively, what steps, if any, are needed to restore their respective positions or reputations or to counter potential or actual retaliation against them. The RIO is responsible for implementing any steps the DO approves.

D. Allegations Not Made in Good Faith

If relevant, the DO will determine whether the complainant’s allegations of research misconduct were made in good faith, or whether a witness or committee member acted in good faith. If the DO determines that there was an absence of good faith he/she will determine whether any administrative action should be taken against the person who failed to act in good faith.

Appendix

A. Summary of Items that must be Reported or Submitted to the ORI in those Cases Covered by 42 CFR Part 93

(Note: This list is subject to modification based on adherence to current ORI regulations.)

- An annual report containing the information specified by ORI on the institution’s compliance with the final rule. Section 93.302(b).
- Within 30 days of finding that an investigation is warranted, the written finding of the responsible official and a copy of the inquiry report. Sections 93.304(d), 93.309(a), and 93.310(a) and (b).
- Where the institution has found that an investigation is warranted, the institution must provide to ORI upon request: (1) the institutional policies and procedures under which the inquiry was conducted; (2) the research records and evidence reviewed, transcripts or recordings of any interviews, and copies of all relevant documents; and (3) the charges for the investigation to consider. Section 93.309.

- Periodic progress reports, if ORI grants an extension of the time limits on investigations or appeals and directs that such reports be submitted. Sections 93.311(c) and 93.314(c).
- Following completion of the investigation report or any appeal: (1) a copy of the investigation report with all attachments and any appeals; (2) the findings of research misconduct, including who committed the misconduct; (3) a statement of whether the institution accepts the findings of the investigation; and (4) a description of any pending or completed administrative actions against the respondent. Section 93.315.
- Upon request, custody or copies of records relevant to the research misconduct allegation, including research records and evidence. Section 93.317(c).
- Notify ORI immediately of the existence of any of the special circumstances specified in Section 93.318.
- Any information, documentation, research records, evidence or clarification requested by ORI to carry out its review of an allegation of research misconduct or the institution’s handling of such an allegation. Section 93.400(b).

B. Outline for an Inquiry/Investigation Report for ORI

(Note: A recommended outline for inquiry and investigation reports has been furnished by ORI and is available on the Research Support and Sponsored Programs web site. Committee members should consult this outline in preparing reports. The outline is subject to modification based on adherence to current ORI regulations.)

C. Conflict of Interest Statement

(Note: A sample conflict of interest statement is available on the Research Support and Sponsored Programs web site. This statement shall be provided to the RIO for use in implementing the conflict of interest portions of this policy.)

Registration and Related Topics

The Graduate School’s stance on full-time status is thus: Enrollment in nine semester hours (not including audited courses) is considered full-time for graduate students not on assistantship. For graduate assistants or students with research fellowships on 50 percent appointment or more, six semester hours (not including audited courses) of enrollment is considered full-time in the fall and spring semesters. Graduate assistants who are on a 50% appointment for a six-week summer term must earn at least three hours of graduate credit during the summer. However, these credits do not have to be earned in the same session as the appointment, and may be taken at any time during the summer. Tuition and fees for graduate assistants on 50% appointments for a six-week summer term will be paid up to a maximum of 4 hours. Students not on graduate assistantships or fellowships must be enrolled in six hours (not including audited courses) to be full time in the summer.

The Graduate School of Business adheres to the guidelines as set forth above with the exception of full-time status noted below.

Full-Time Status

Enrollment in 9 semester hours (not including audited courses) is considered full-time for graduate students unless otherwise specified by individual degree programs. For full-time enrollment in the summer, consult the Graduate School Handbook, available on the Graduate School Web site, grad.uark.edu (http://grad.uark.edu/).
Grades and Marks

Final grades for courses are “A,” “B,” “C,” “D,” and “F” (except for courses taken in the Bumpers College of Agricultural, Food, and Life Sciences). No credit is earned for courses in which a grade of “F” is recorded. For students admitted to the Graduate School in Fall 2001 or after no credit is earned for courses in which a grade of “F” or “D” is recorded.

A final grade of “F” shall be assigned to a student who is failing on the basis of work completed but who has not completed all requirements. The instructor may change an “F” so assigned to a passing grade if warranted by satisfactory completion of all requirements.

A mark of “I” may be assigned to a student who has not completed all course requirements, if the work completed is of passing quality. An “I” so assigned may be changed to a grade provided all course requirements have been completed within 12 weeks from the beginning of the next semester of the student’s enrollment after receiving the “I.” If the instructor does not report a grade within the 12-week period, the “I” shall be changed to an “F.” When the mark of “I” is changed to a final grade, this shall become the grade for the semester in which the course was originally taken.

A mark of “AU” (Audit) is given to a student who officially registers in a course for audit purposes (see Registration for Audit).

A mark of “CR” (credit) is given for a course in which the university allows credit toward a degree, but for which no grade points are earned. The mark “CR” is not normally awarded for graduate-level courses but may be granted for independent academic activities. With departmental (or program area) approval and in special circumstances, up to a maximum of six semester hours of “CR” may be accepted toward the requirements for a graduate degree.

A mixing of course letter grades and the mark “CR” is permitted only in graduate-level courses in which instruction is of an independent nature.

A mark of “R” (Registered) indicates that the student registered for master’s thesis or doctoral dissertation. The mark “R” gives neither credit nor grade points toward a graduate degree.

A mark of “S” (Satisfactory) is assigned in courses such as special problems and research when a final grade is inappropriate. The mark “S” is not assigned to courses or work for which credit is given (and thus no grade points are earned for such work). If credit is awarded upon the completion of such work, a grade or mark may be assigned at that time and, if a grade is assigned, grade points will be earned.

A mark of “W” (Withdrawal) will be given for courses from which students withdraw after the first 10 class days of the semester and before the drop deadline of the semester.

For numerical evaluation of grades, “A” is assigned 4 points for each semester hour of that grade; “B,” 3 points; “C,” 2 points; “D,” 1 point; and “F,” 0 points. Grades of plus and minus are assigned grade-point values in the Bumpers College of Agricultural, Food, and Life Sciences.

Annual Notice of Student Rights Under the Family Educational Rights And Privacy Act (FERPA)

The Graduate School of Business adheres to the Family Educational Rights and Privacy Act (FERPA) which affords students certain rights with respect to their education records, described on page 41.

Annual Graduate Student Academic Review

The Graduate School of Business implements the Graduate Council policy that any student whose program lasts more than three semesters will be reviewed annually by his/her degree program for progress toward the degree. At a minimum, the review will cover progress in the following:

a) in completing courses with an adequate grade-point average; b) in completing the thesis/dissertation/project requirements; c) in completing all of the required examinations; d) toward completing other requirements for the degree. When the review of each student is completed, the review form will be signed by the graduate student and the department/program head/chair, as well as other appropriate individuals as designated in the program review policy. This review will be forwarded to the Graduate School, to be included in the student’s file.

Administrative Requirement for Graduation

Application for graduation must be completed in the Graduate School of Business office, filed with the Registrar, and fees paid for the semester in which degree requirements will be completed and graduation effected. If a student fails to complete the degree, the student must then renew the application and pay a renewal fee.

Residency Requirements

The Graduate School of Business adheres to the residency requirements established by the Graduate School as described on page 40.

Degrees Offered

The faculty of the Graduate School, under the authorization of the Board of Trustees, grants the following degrees offered by the Graduate School of Business. The graduate faculty, as represented by the Dean of the Graduate School and through the Graduate Council, has primary responsibility for the development, operating policies, administration, and quality of these programs. Operating through the Graduate Dean, the faculty appoints committees that directly supervise the student’s program of study and committees, which, in turn, monitor research activities and approve theses and dissertations.

- Doctor of Philosophy in Economics
- Doctor of Philosophy in Business Administration:
  - Concentration Areas:
    - Accounting
    - Information Systems
    - Finance
    - Management
    - Marketing
    - Supply Chain Management
- Master of Accountancy
- Master of Arts in Economics
- Master of Business Administration
- Master of Information Systems
- Graduate Certificate in Business
- Graduate Certificate in Enterprise Systems
- Graduate Certificate in Entrepreneurship

Overview – Master’s Degrees in the Sam M. Walton College of Business
Each master’s degree in the Sam M. Walton College of Business is
designed to prepare a student for a career in the professional world
of business. The programs provide a broad-based education where
critical thinking, creative problem solving and professional resolve are
encouraged. Much of the curriculum is team-based, simulating experience
in the corporate environment. Successful students have demonstrated
potential for growth, maturity, motivation and leadership.

Overview – Ph.D. Programs in the Sam M. Walton College of
Business

The Ph.D. programs in Business Administration and Economics are
designed primarily to prepare individuals for teaching, research, service,
and collegial roles in academic and research institutions. The degree
programs provide: a) an exposure to the functional areas of business, b)
intensive study of the relevant body of knowledge in a focused area, and
c) skills and tools to conduct research in that area.

Through an agreement with the Academic Common Market, residents of
certain Southern states may qualify for graduate enrollment in this Ph.D.
degree program (with the emphasis in accounting) as in-state students
for fee purposes. Please see the Graduate School’s website for general
information regarding the declaration of intent, candidacy examinations,
dissertation requirements, and final examinations.

An M.B.A. or other appropriate master’s degree is generally required for
admission. Individuals admitted to the program may be required to take
additional courses in accounting, business law, computer information
systems, statistics, finance, economics, management, or marketing.
The additional courses will be determined by the adviser in the student’s
concentration with the approval of the Sam M. Walton College of Business
Associate Dean for Programs and Research.

Students apply for admission to one of the following concentrations:

• Accounting
• Information Systems
• Finance
• Management
• Marketing
• Supply Chain Management

Requirements for the Ph.D. Programs in the Sam M. Walton College
of Business:

1. Course work and seminars: The requirements for the Ph.D. in
Business Administration and Ph.D. in Economics will consist of
a program of research, appropriate course work, seminars, and
independent study as specified by the student’s program.

2. Comprehensive Examination: Satisfactory completion of a
comprehensive examination in the concentration is required.

3. Dissertation: A dissertation will be written and successfully defended
in the concentration.

Accounting (ACCT)

Gary Peters
Department Chair and S. Robson Walton Chair in Accounting
447 Business Building
479-575-4051

Cory Cassell
Ph.D. Program Director
479-575-4051
**Requirements for the Master of Accountancy Degree:** Students with appropriate backgrounds in business administration and economics and with an undergraduate concentration in accounting will be required to complete 30 semester hours of course work beyond the baccalaureate degree.

Ordinarily, students must be enrolled for a minimum of 12 hours during consecutive fall/spring semesters.

Eighteen semester hours of accounting are required, 12 hours of which are specified:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 5413</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 5953</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 5463</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 5873</td>
<td>3</td>
</tr>
</tbody>
</table>

A minimum of six semester hours of the student’s program must be non-accounting electives. Six semester hours may be either accounting or non-accounting electives.

To ensure that students acquire the skills necessary for career success, the M.Acc. program strongly encourages all students to obtain additional training directly related to the M.Acc. program prior to graduation. Students are strongly encouraged, but not required, to complete an accounting internship for academic credit, ACCT 535V (http://catalog.uark.edu/search/?P=ACCT%20535V/). The M.Acc. program considers this training an integral part of the curriculum that allows for the practical application of the theoretical principles taught in accounting courses.

A student may transfer to the M.Acc. program not more than six hours of graduate level credit from an AACSB-accredited graduate program, provided that each course has a grade of “B” or better, and the courses are acceptable to the departmental M.Acc. committee. Students contemplating transfer of credit should consult in advance with both the M.Acc. Adviser and the Graduate School of Business.

A cumulative grade-point average of 3.00 is required on 1) graduate work taken for the degree and 2) all accounting courses (both undergraduate and graduate) taken for the degree. At least 75 percent of the graduate credit hours submitted for the degree must be “A” or “B” grades. The M.Acc. degree program does not require a thesis. Successful completion of a Master of Accountancy Degree from the University of Arkansas will qualify a student to take relevant professional examinations.

For further information, contact the Graduate School of Business: gsb@walton.uark.edu.

**B.S.B.A./M.Acc. Integrated Program**

The integrated program to the Master of Accountancy is a five-year program of undergraduate and graduate coursework that allows outstanding students to earn the B.S.B.A. and the Master of Accountancy (M.Acc.) degrees at the same time. The professional curriculum, which usually begins in the student’s junior year, includes specially designed accounting courses taught in relatively small classes by full-time faculty members. Students accepted into the integrated degree program may concurrently enroll in undergraduate and graduate level courses.

Because M.Acc. graduates are expected to become leaders in the accounting profession, highly motivated students with the personal qualities and intellectual capacity to establish successful careers in public accounting, industry, not-for-profit organizations, and higher education are encouraged to apply.

**Admission**

Students are admitted to the integrated program according to the following requirements. Admission is granted only for the fall semester; February 15 of the Junior year is the application deadline for those who wish to begin the integrated program the following fall. Students interested in this program must have completed 90 credit hours of study towards the bachelor’s degree (including ACCT 2013, ACCT 3723 and ACCT 3843) by the February 15 deadline.

Acceptance into the integrated program is based upon the discretion of the admissions committee. The committee considers the overall quality of the applications, including the overall grade point average, the grades in ACCT 2013, ACCT 3723 and ACCT 3843, and the Graduate Management Admission Test (GMAT), as well as other relevant examples of academic ability and leadership. To receive serious consideration by the admissions committee, a student should have a minimum GPA of 3.0 within the applicant’s overall university and accounting coursework. Due to the demand for seats in the program, the admissions committee selectively restricts admission into the program based upon the availability of instructional resources. Students must complete at least two long-session semesters in residence in the M.Acc. program.

Transfer students will be handled on a case-by-case basis.

**Satisfactory Progress**

Students are expected to make continuous progress toward the degree by completing required accounting coursework each semester. Students who fail to meet the requirements for the M.Acc. program must choose another major of study or finalize their B.S.B.A. in Accounting. Students will be notified before this action is taken and should meet with an academic advisor in the Undergraduate Programs Office upon notification.

**Probation**

A student is placed on probation if his or her grade point average in core undergraduate accounting courses falls below 3.00. Except with the consent of the M.Acc. Program Director a student on probation may not take graduate accounting courses.

**Graduation**

To receive an integrated B.S.B.A/M.Acc. degree, a student must have a grade point average of at least 3.00 in all coursework taken as part of the minimum thirty hour M.Acc. degree. He or she must also have a grade point average of at least 3.00 in all coursework taken as part of the Master of Accountancy Degree.

**Degree Requirements**

The requirements of B.S.B.A./M.Acc. Integrated program are:

1. Undergraduate coursework
   a. Complete the requirements for the B.S.B.A. degree requirements and Accounting Major Requirements detailed above.
b. Students are strongly encouraged, but not required, to participate in an accounting internship, ACCT 310V.

2. Graduate coursework

Students with appropriate backgrounds in business administration and economics and with an undergraduate concentration in accounting will be required to complete 30 semester hours of course work beyond the baccalaureate degree, at least 21 semester hours of which must be in courses reserved exclusively for graduate students.

All students must be enrolled for a minimum of 12 hours during consecutive fall/spring semesters. The student must be in residence a minimum of 24 weeks (see residency requirements of the Master of Arts/Master of Science).

A minimum of 18 semester hours of accounting are required, 12 hours of which are specified:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 5413</td>
<td>Advanced Financial Accounting</td>
<td>3</td>
</tr>

<tr>
<td>ACCT 5953</td>
<td>Auditing Standards</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 5873</td>
<td>Advanced Taxation</td>
<td>3</td>
</tr>
</tbody>
</table>

A minimum of six semester hours of the student’s graduate program must be non-accounting electives.

The M.Acc. degree program does not require a thesis. Successful completion of integrated B.S.B.A/M.Acc program from the University of Arkansas will qualify a student to take relevant professional examinations.

For further information, write to the M.Acc. Adviser, Department of Accounting, Walton College of Business, University of Arkansas, Fayetteville, AR 72701 or contact the Graduate School of Business at gsb@walton.uark.edu.

Ph.D. in Business Administration, Accounting Concentration

Accounting Ph.D. Program Website (https://gsb.uark.edu/phd-programs/accounting.php)

Program Structure

The doctoral program in accounting consists of the following elements: course work, two summer papers, a comprehensive examination, and a dissertation. The latter involves an oral defense of both the dissertation proposal as well as the final dissertation. It is anticipated that all required course work, including accounting seminars, tool courses, and supporting courses, will be completed in two to two and a half years (a total of 42 hours excluding colloquium and dissertation credit). Students must recognize a joint responsibility in their preparation to perform research and, in some cases, may wish to take courses beyond those specified to strengthen their skills and abilities in fields that will contribute to successful completion of their dissertation.

The seminars will be offered in alternating years, A and B, respectively.

Year A:

- Seminar I covers research methods and research design, with an emphasis on disclosure choices and consequences.
- Seminar II presents an overview of accounting research, focusing on auditing and corporate governance.

Year B:

- Seminars III and IV present and overview of accounting research, and emphasize capital markets research and selected research topics respectively.

After these four seminars, students are able to select an area of specialization. The expectation is that students take two specialized seminars. For example, students could take seminars offered by the Finance Department.

Research Tools

</table>

Total Hours 18

Supporting Courses

Nine hours of supporting courses are selected by the student in consultation with the accounting doctoral program coordinator. Generally such courses should be concentrated in a specific field in business or outside business (e.g., psychology, sociology, etc.) to meet the objectives of the student’s program. All supporting courses taken must be completed with a grade of “B” or higher prior to sitting for the written comprehensive examination in Accounting.

Research Requirement

The Accounting Doctoral Program emphasizes the development of strong analytic skills and the mastery of sophisticated research methods. The program involves doctoral students in research at the beginning of the program. The intent of the first year research project is for students to explore an area of scholarship and to develop skills to conduct original research within a team framework. During the first and second years, under the direction of a qualified faculty member or members, the student identifies an area of interest that would lead to a summer working paper.

The summer project is a concerted scholarly effort with faculty providing broad, but detailed formal guidance. The goal is to produce a paper publishable in a highly respected, academic journal, which may be co-authored by the doctoral student and the faculty member or members.

Requirements for the research teams include highly motivated students, strong faculty involvement, structured projects, commitment to deadlines, commitment to goals, and continuous project review.
Comprehensive Examination
After satisfactory completion of all required course work, each Ph.D. student must pass a written comprehensive examination prepared by the Doctoral Program Committee of the Department of Accounting and administered on a date selected by the Doctoral Program Committee. Each student is expected to take the written comprehensive exam within 36 months after starting coursework. If the written comprehensive examination is failed, it should be retaken within 6 months after the failure on a date selected by the Doctoral Program Committee of the Department of Accounting. If the written comprehensive is failed a second time, and if the Doctoral Program Committee allows a third sitting, the examination must be retaken within 6 months after the second failure. Failure to satisfactorily complete the written comprehensive examination results in termination from the program.

Summer Paper
Students are required to complete summer papers during the first and second years of their residence. The summer papers represent an opportunity to practice the development and execution of a complete research project under the guidance and tutelage of an experienced faculty member or members. They constitute the final “practice run” before embarking on the dissertation. In addition, the summer papers provide an opportunity to explore a specific area of accounting as a potential source for dissertation research. A final benefit of the summer papers is the development of manuscripts that are expected to yield publications by the time the student completes the program or afterward.

Graduate Faculty
Allee, Kristian, Ph.D., M.B.A. (Indiana University), B.S. (Brigham Young University), Associate Professor, 2016.
Atwood, T. J., Ph.D. (University of Illinois), M.B.A. (University of Texas at Austin), B.S. (Western Kentucky University), Associate Professor, 2014.

Richardson, Vernon J., Ph.D. (University of Illinois-Urbana-Champaign), M.B.A., B.S. (Brigham Young University), Distinguished Professor, 2005.
Rowe, Stephen, Ph.D. (University of Illinois), M.S. (Loyola University Chicago), B.A. (Covenant College), Assistant Professor, 2016.
Shipman, Jonathan, Ph.D. (University of Tennessee), B.S. (University of Central Arkansas), Associate Professor, 2015.

Terrell, Katie, M.B.A. (University of Arkansas), B.A. (University of Central Arkansas), Instructor, 2012.
Thomas, JaLynn D., B.S. (Louisiana Tech College Ruston Campus), Instructor, 2011.

Courses
ACCT 510V. Special Topics in Accounting. 1-3 Hour. (Formerly ACCT 410V.) Explore current events, concepts and new developments relevant to Accounting not available in other courses. Graduate degree credit will not be given for both ACCT 410V and ACCT 510V. Prerequisite: ACCT 3723 with a grade of C or better. (Typically offered: Irregular) May be repeated for degree credit.
ACCT 5223. MBA Accounting Analysis. 3 Hours. Highlights the role played by accounting information in managing supply chains and retail operations. Provides tools for managing cost flows, including activity-based costing, retail accounting, and operational budgeting. Focuses on improving decision making processes, and linking the impact of retail/supply chain decisions to financial statements and shareholder value. (Typically offered: Fall and Spring)
ACCT 5263. Financial Statement Analysis for Executives. 3 Hours. This course provides a framework for understanding the intersection between business strategy, accounting, economics, and finance. Using historical financial statements as the primary information input, you will employ tools that enable you to better understand the drivers of current performance and risk, forecast future performance, and construct a value estimate. These tools can be applied in a number of contexts including equity valuation, project selection, and managerial evaluation. Not eligible for MAcc program students. Prerequisite: MBA Director consent. (Typically offered: Summer)
ACCT 535V. Professional Accounting Internship. 1-3 Hour. This course allows a student to experience an internship within a business and benefit from the applied experience. The internship may be designed to offer a wide range of professional accounting experiences in Industry or Public Accounting. The internship must be supervised by a faculty member as well as a member of the firm. MACC Director approval required. Prerequisite: MACC Director consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
ACCT 5413. Advanced Financial Accounting. 3 Hours. Integrated course which examines the financial reporting, tax, managerial, systems and auditing aspects of major corporate restructurings arising from events such as mergers, acquisitions, spinoffs, reorganizations and downsizing. Prerequisite: ACCT 3753 or equivalent with a grade of C or better or MACC Director consent. (Typically offered: Spring)
ACCT 5433. Fraud Prevention and Detection. 3 Hours. An examination of various aspects of fraud prevention and detection, including the sociology of fraud, elements of fraud, types of fraud involving accounting information, costs of fraud, use of controls to prevent fraud, and methods of fraud detection. (Typically offered: Irregular)
ACCT 5443. Asset Management. 3 Hours. Managing assets to achieve corporate strategy. Included are issues such as strategy formulation, acquisition processes, internal controls, system requirements, accounting measurements, inventory models, re-engineering, capital budgeting, tax issues, and discussion of current business events that have ethical implications. (Typically offered: Irregular)
ACCT 5463. Financial Statement Analysis. 3 Hours.
This course provides a framework for understanding the current economic position and future prospects of firms using corporate financial statements. Specifically, the student will study financial statements and their related footnotes in order to understand the drivers of current performance and risk, forecast future performance, and estimate the intrinsic value implied by those forecasts. These tools can be applied in a number of contexts including equity valuation, project selection, managerial evaluation, and corporate financial statement audits. Prerequisite: ACCT 3723 or equivalent with a grade of C or better. (Typically offered: Spring)

ACCT 5483. Financial Accounting Research and Theory. 3 Hours.
This course explores our contemporary understanding of financial reporting incentives and outcomes. The course draws upon existing research on the determinants and consequences of financial reporting and examines the roles of various constituents including investors, lenders, financial analysts, managers, regulators, and auditors within the financial reporting environment. Prerequisite: Graduate standing and MAcc Director consent. (Typically offered: Irregular)

ACCT 549V. Special Topics in Accounting. 1-3 Hour.
Seminar in current topics not covered in other courses. Students may enroll in one or more units. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ACCT 5523. Advanced Accounting Information Systems. 3 Hours.
This course describes accounting systems in technologically advanced environments. Controls and other technical design considerations are described for the input, processing, storage, and reporting of accounting information. Special topics, such as expert systems and artificial intelligence applications in financial accounting, auditing, and tax also receive considerable attention. Prerequisite: MAcc Director consent. (Typically offered: Regular)

ACCT 5673. Product, Project and Service Costing. 3 Hours.
(Formerly ACCT 4673.) Cost systems with emphasis on information generation for cost management of products, projects and services. The course includes spreadsheet and other computer program analysis. Graduate degree credit will not be given for both ACCT 4673 and ACCT 5673. Prerequisite: ACCT 2023 or ACCT 3613 and ACCT 3723 each with grades of C or better. (Typically offered: Fall)

ACCT 5703. Governmental/Nonprofit Accounting. 3 Hours.
The course will critically examine current issues in governmental and non-profit accounting, financial statement compliance and control for governmental and non-profit entities, and auditing for government and other non-profit organizations. Topics will include examination of state and local government accounting and reporting; sources and applications of taxes and program resources; not-for-profit organization accounting including taxation, regulatory, performance, and compliance issues; industry specific issues in accounting for health care organizations and colleges and universities; and federal governmental accounting. The course will also examine the application processes and compliance procedures for not-for-profit organizations and grants, and will provide a brief introduction to urban planning and economics. Prerequisite: MAcc Director consent. (Typically offered: Irregular)

ACCT 5873. Advanced Taxation. 3 Hours.
In-depth coverage of the tax treatment of corporations including advanced tax issues. Introduction to tax research including the organization and authority of tax law; accessing and using the tax law; and, applying tax law to taxpayer scenarios. Prerequisite: ACCT 4203 or equivalent with a grade of C or better. (Typically offered: Fall)

ACCT 5883. Tax Planning. 3 Hours.
In-depth coverage of the tax treatment of passthrough business entities including advanced tax issues. Overview of the income tax treatment of estates and trusts. Overview of the essentials of estate and gift taxation. Prerequisite: ACCT 3843 or equivalent with a grade of C or better. (Typically offered: Spring)

ACCT 5893. Multi-jurisdictional Tax Issues. 3 Hours.
This course provides an in-depth examination of multi-jurisdictional tax issues including U.S. federal income taxation of inbound and outbound transactions, state and local taxation, and multi-jurisdictional tax policy issues. Pre- or Corequisite: ACCT 5873. (Typically offered: Spring)

ACCT 5953. Auditing Standards. 3 Hours.
Professional aspects of financial statement auditing and registered auditors. Including ethics and legal responsibilities; internal control testing; critical evaluation of evidence; application of sampling; and reporting problems. Prerequisite: ACCT 4963 or equivalent with a grade of C or better. (Typically offered: Fall)

ACCT 5963. Audit and Assurance Services. 3 Hours.
(Formerly ACCT 4963.) Professional standards and procedures as applied to external and internal assurance engagements. Including coverage of the economic role of assurance providers, engagement planning, risk assessment, evidence gathering, and reporting. Graduate degree credit will not be given for both ACCT 4963 and ACCT 5963. Prerequisite: ACCT 3723 with a grade of C or better. (Typically offered: Fall and Spring)

ACCT 5993. Energy Accounting. 3 Hours.
(Formerly ACCT 4883.) This course covers the basic issues of accounting and financial reporting for energy issues including hydrocarbon production, processing and sales as well as accounting for wind, solar and other alternative energy sources. Covers national and international energy policy, relevant public policy, environmental and geological issues, and considers environmental law, climate and economic topics relevant to energy topics. Graduate degree credit will not be given for both ACCT 4883 and ACCT 5993. Prerequisite: ACCT 3723 and ACCT 3753 each with a grade of B or better, and admission to the MAcc program. (Typically offered: Regular)

ACCT 6013. Graduate Colloquium. 3 Hours.
Presentation and critique of research papers and proposals. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ACCT 6033. Accounting Research Seminar I. 3 Hours.
First course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, managerial accounting and behavioral accounting. (Typically offered: Irregular)

ACCT 6133. Accounting Research Seminar II. 3 Hours.
Second course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 6233. Accounting Research Seminar III. 3 Hours.
Third course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 636V. Special Problems in Accounting. 1-6 Hour.
Special research project under supervision of a graduate faculty member. (Typically offered: Fall and Spring)
ACCT 6433. Accounting Research Seminar IV. 3 Hours.
Fourth course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 6633. Accounting Research Seminar V. 3 Hours.
Fifth course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

Business Administration (BADM)
Alan E. Ellstrand
Associate Dean for Programs and Research
328 Walton College of Business
479-575-7105

Faculty are listed by department

Executive M.B.A. website (https://gsb.uark.edu/executive-mba/)

Degrees Conferred:
M.B.A.
Ph.D. in Business Administration

Graduate Certificates (non-degree):
Graduate Certificate in Business
Graduate Certificate in Entrepreneurship

Program Description: Designed for working professionals, the Business Administration program offers two concentrations at the master's level: the Executive M.B.A. and the Executive Healthcare M.B.A. These hybrid/online programs allow students to obtain an Executive M.B.A. or an Executive Healthcare M.B.A. in two years by attending classes approximately one Saturday each month. The Ph.D. in Business Administration is also offered as concentrations with requirements listed in the various respective departments of Walton College.

The Business Administration program also offers two graduate certificates, one in business and one in entrepreneurship.

Requirements for the Full-Time M.B.A.
Concentration
Admission to the M.B.A.: Students must be admitted to the Graduate School of Business and to the M.B.A. program by the M.B.A. Admissions Committee. Admission to the M.B.A. program is based upon an acceptable GMAT or GRE score, an acceptable grade-point average, recommendations, essays, and related work experience. For questions regarding admission requirements for the M.B.A. program, please access information online at gsb.uark.edu (http://gsb.uark.edu) or contact the Graduate School of Business at gsb@walton.uark.edu.

Prerequisites to Degree Program: Students entering the M.B.A. program are expected to have already mastered basic business concepts or, demonstrated, with an official GMAT or GRE test score, the ability to master business concepts taught in the program. Mastery of the aforementioned topics must be demonstrated before entering the program. Students without academic backgrounds in business may be required to take additional hours or noncredit preparatory classes prior to enrollment in the M.B.A. program.

Requirements for a Master of Business Administration Degree
Requirements include one or more courses from each of the following core areas: People Management, Ethics, and Leadership; Information Technology and Analytics; Accounting and Financial Capital; Marketing and Supply Chain Management; and Strategic and International Management. In addition, requirements include two to four courses from each concentration's specialization track.

Requirements for the M.B.A. are fulfilled through one of the following three concentrations: Full-Time M.B.A., Executive M.B.A., and Executive Healthcare M.B.A.

Requirements for Executive Healthcare M.B.A. Concentration

Admission to the M.B.A.: Students must be admitted to the Graduate School of Business and to the M.B.A. program by the M.B.A. Admissions Committee. Admission to the M.B.A. program is based upon an acceptable GMAT or GRE score, an acceptable grade-point average, recommendations, essays, and related work experience. For questions regarding admission requirements for the M.B.A. program, please access information online at gsb.uark.edu (http://gsb.uark.edu) or contact the Graduate School of Business at gsb@walton.uark.edu.

Prerequisites to Degree Program: Students entering the M.B.A. program are expected to have already mastered basic business concepts or, demonstrated, with an official GMAT or GRE test score, the ability to master business concepts taught in the program. Mastery of the aforementioned topics must be demonstrated before entering the program. Students without academic backgrounds in business may be required to take additional hours or noncredit preparatory classes prior to enrollment in the M.B.A. program.
Requirements for a Master of Business Administration Degree

Requirements include one or more courses from each of the following core areas: People Management, Ethics, and Leadership; Information Technology and Analytics; Accounting and Financial Capital; Marketing and Supply Chain Management; and Strategic and International Management. In addition, requirements include two to four courses from each concentration’s specialization track.

Requirements for the M.B.A. are fulfilled through one of the following three concentrations: Full-Time M.B.A., Executive M.B.A., and Executive Healthcare M.B.A.

Concentration Requirements

Core Courses

**People Management, Ethics and Leadership**
- MGMT 5613 Leadership and Organizational Behavior 3

**Information Technology and Analytics**
- SCMT 5133 Quantitative Methods and Decision Making 3
- ISYS 5603 Analytics and Visualization 3

**Accounting and Financial Capital**
- FINN 5113 Corporate Financial Management 3
- ACCT 5263 Financial Statement Analysis for Executives 3

**Marketing and Supply Chain Management**
- MKTG 5223 Marketing 3
- SCMT 5663 Retail and CPG Supply Chain Management 3

**Strategic and International Management**
- MGMT 5313 Strategic Management 3
- MGMT 537V Global Business 3

**Public Health Courses**
- MGMT 5602 Introduction to Strategy 2
- ECON 5253 Economics of Management and Strategy 3

**Public Health Courses**

Executive Healthcare M.B.A. concentration students must also complete the following courses from UAMS:
- PBHL 5123 The Health Care System 3
- PBHL 5293 Health Law 3
- PBHL 5333 Advanced Health Systems Financial Management 3
- PBHL 5533 Health Care Quality Management 3

Total Hours 44

Requirements for Ph.D. with Concentration in Accounting

Program Structure

The doctoral program in accounting consists of the following elements: course work, two summer papers, a comprehensive examination, and a dissertation. The latter involves an oral defense of both the dissertation proposal as well as the final dissertation. It is anticipated that all required course work, including accounting seminars, tool courses, and supporting courses, will be completed in two to two and a half years (a total of 42 hours excluding colloquium and dissertation credit). Students must recognize a joint responsibility in their preparation to perform research and, in some cases, may wish to take courses beyond those specified to strengthen their skills and abilities in fields that will contribute to successful completion of their dissertation.

The seminars will be offered in alternating years, A and B, respectively.

**Year A:**
- Seminar I covers research methods and research design, with an emphasis on disclosure choices and consequences.
- Seminar II presents an overview of accounting research, focusing on auditing and corporate governance.

**Year B:**
- Seminars III and IV present an overview of accounting research, and emphasize capital markets research and selected research topics respectively.

After these four seminars, students are able to select an area of specialization. The expectation is that students take two specialized seminars. For example, students could take seminars offered by the Finance Department.

**Research Tools**

**Required Courses:**
- ECON 6133 Mathematics for Economic Analysis 3
- ECON 6613 Econometrics I 3
- ECON 6623 Econometrics II 3
- ECON 6213 Microeconomic Theory I 3

**Elective Courses:**
- Select at least two courses from the following: 6
  - ECON 6223 Microeconomic Theory II
  - ECON 6633 Econometrics III
  - ECON 6713 Industrial Organization I
  - ISYS 5623 Multivariate Analysis
  - ISYS 5613 Business Applications of Nonparametric Techniques
  - ISYS 5723 Advanced Multivariate Analysis
  - MKTG 6433 Seminar in Research Methods
  - STAT 5313 Regression Analysis

Total Hours 18

**Supporting Courses**

Nine hours of supporting courses are selected by the student in consultation with the accounting doctoral program coordinator. Generally such courses should be concentrated in a specific field in business or outside business (e.g. psychology, sociology, etc.) to meet the objectives of the student’s program. All supporting courses taken must be completed with a grade of “B” or higher prior to sitting for the written comprehensive examination in Accounting.

**Research Requirement**

The Accounting Doctoral Program emphasizes the development of strong analytic skills and the mastery of sophisticated research methods. The program involves doctoral students in research at the beginning of the program. The intent of the first year research project is for students to explore an area of scholarship and to develop skills to conduct original research within a team framework. During the first and second years, under the direction of a qualified faculty member or members, the student identifies an area of interest that would lead to a summer working paper.

The summer project is a concerted scholarly effort with faculty providing broad, but detailed formal guidance. The goal is to produce a paper
publishable in a highly respected, academic journal, which may be co-authored by the doctoral student and the faculty member or members.

Requirements for the research teams include highly motivated students, strong faculty involvement, structured projects, commitment to deadlines, commitment to goals, and continuous project review.

Comprehensive Examination
After satisfactory completion of all required course work, each Ph.D. student must pass a written comprehensive examination prepared by the Doctoral Program Committee of the Department of Accounting and administered on a date selected by the Doctoral Program Committee. Each student is expected to take the written comprehensive exam within 36 months after starting coursework. If the written comprehensive examination is failed, it should be retaken within 6 months after the failure on a date selected by the Doctoral Program Committee of the Department of Accounting. If the written comprehensive is failed a second time, and if the Doctoral Program Committee allows a third sitting, the examination must be retaken within 6 months after the second failure. Failure to satisfactorily complete the written comprehensive examination results in termination from the program.

Summer Paper
Students are required to complete summer papers during the first and second years of their residence. The summer papers represent an opportunity to practice the development and execution of a complete research project under the guidance and tutelage of an experienced faculty member or members. They constitute the final “practice run” before embarking on the dissertation. In addition, the summer papers provide an opportunity to explore a specific area of accounting as a potential source for dissertation research. A final benefit of the summer papers is the development of manuscripts that are expected to yield publications by the time the student completes the program or afterward.

Requirements for Ph.D. with Concentration in Information Systems

Admission Requirements: In addition to the university’s Graduate School and Walton College of Business’ Graduate School of Business requirements, the ISYS Ph.D. program has the following requirement: Applicants are expected to have a background in information systems via prior courses in topics such as a programming language, systems analysis, design, and development, and database processing. Students without the background may also be admitted but will likely be required to take up to 3 master’s level courses to remedy the deficiency.

Requirements: Requirements for the Ph.D. in business administration with concentration in information systems include core courses and elective courses in information systems, research tools, and supporting fields. These 43 credit hours of courses are taken prior to advancing to candidacy and are broken down as follows: research tools (9 hours); ISYS core courses (21 hours); and supporting field courses (13 hours). Also, there is a requirement that students satisfactorily complete a one-hour Graduate Colloquium during the fall and spring semesters of each year when students are in residence on campus in pursuit of the degree. Following completion of the coursework, students must pass a comprehensive examination. The program also requires completion of 1st and 2nd year summer research projects, defense of a dissertation proposal, and successful defense of the dissertation (18 credit hours). Students are also prepared for a career in research through research assistantships, collaborative research projects with faculty members, colloquia, and classroom teaching and support.

Course Requirements

Research Tools
- ISYS 5203 Experimental Design 3
- ISYS 5623 Multivariate Analysis 3
- ISYS 5723 Advanced Multivariate Analysis 3

Information Systems Core Courses
Select seven of the following: 21
- ISYS 6133 Survey of IS Research
- ISYS 6233 IS Research Projects
- ISYS 6333 Individual-level Research in IS
- ISYS 6433 Team-level Research in IS
- ISYS 6533 Macro- and Meso-level IS Research
- ISYS 6633 Systems Development
- ISYS 6733 Emerging Topics
- ISYS 6833 Theory Development
- ISYS 601V Graduate Colloquium

Supporting Fields

In addition to the WCOB 6111 Teaching Seminar and MGMT 6213 13 Research Methods Seminar, courses to meet this requirement will be determined in consultation with the ISYS Ph.D. program committee (courses must be at the Ph.D. level, unless otherwise approved by the ISYS Ph.D. program committee). These courses are normally taken outside the ISYS Department and are in the student’s area(s) of interest.

WCOB 6111 Seminar in Business Administration Teaching I 1
MGMT 6213 Seminar in Research Methods 3

Comprehensive Examination

Written exam
- Oral exam

Summer Research Requirements

1st summer paper
- 2nd summer (to include a round of feedback and revision)

Dissertation Requirements

- Successful defense of Dissertation proposal 1
- Successful defense of Dissertation 1

Other Ph.D. Courses Taken

Students may take up to 9 hours of other Ph.D. courses, as necessary.

Masters Level Courses

Students typically without an information systems background will be required to take some Masters courses prior to taking their comprehensive examinations. These courses do not count toward the Ph.D. degree and are taken to remedy deficiencies. The ISYS Ph.D. program committee will determine whether a student needs to take one or more of these courses. The specific courses are:
- ISYS 5423 Seminar in Systems Development
- ISYS 5503 Decision Support and Analytics
- ISYS 5833 Data Management Systems

1 Minimum committee size: 4

Residence Requirement

There is a strong preference for students to be in residence — i.e., be full-time students with assistantship duties — during the entire program.
Residence requirements are intended to ensure that every student has ample opportunity for the intellectual development that can result from a sustained period of intensive study and close association with scholars in the intellectual environment of the university. The requirement recognizes that growth as an independent scholar is not merely a matter of class attendance, but rather involves a broader development of the intellect that comes through intensive study, independent research, sustained association with faculty members and other colleagues who share common scholarly and professional interests, attendance at seminars and colloquia, intensive reading and familiarization with library resources, consultation with specialists in other disciplines and resource centers, and the opportunity for broadened exposure to current intellectual issues as they are revealed in various campus offerings.

After filing a Declaration of Intent to pursue the doctoral degree, a student must fulfill a residence requirement as outlined in the Graduate Catalog (p. 435) section on directors of philosophy and education degrees.

</tbody>
</table>

**Supporting Fields**

Courses for the supporting fields requirement are selected in consultation with the student’s Ph.D. Advisory Committee. All courses taken for the Supporting Fields must be at the graduate level and/or taken for graduate credit. Statistics and methods classes cannot be used to fulfill the Supporting Fields requirement. A minimum of 6 hours and a maximum of 9 hours are to be taken in Management. These hours may include MGMT 6223, Special Topics in Management, and Special Problems.

**Research Tools**

Courses used to meet the Research Tools requirement will be selected in consultation with the student’s Ph.D. Advisory Committee and should support the student’s program of study. The courses should provide the student with a knowledge of advanced descriptive and inferential statistics, research design, and research methods.

**Comprehensive Exam**

Students will be required to take a comprehensive examination as a requirement of the Ph.D program in the Management Department. The exam will be administered over a three day period with the first day focusing on questions concerning the primary and secondary content areas, the second day being a day off to study a research article that will be covered on the research methods exam and the third day covering research methods. Successful completion of both parts of the comprehensive exam are required for admission to candidacy.

The exam will consist of three parts:

**Content:** Students will have questions from the two content areas they identified. There will be more questions on the primary area than the secondary area. Students will have some opportunity to choose among the questions. There will be some mandatory questions.

**Methods:** All students will have the same methods questions. One part of the methods exam will be an article that students review a priori and critique. Students will have some opportunity to choose among the questions. There will be some mandatory questions.

**Specialty Area:** Each student taking the comprehensive exam will select a specialty area of emphasis and a management department faculty willing to sponsor that area. This area is one that the student is expected to be an expert in, and ideally, linked to his or her future dissertation area. The last part of the comprehensive exam will comprise questions that are based on the specialty area.

**Requirements for Ph.D. with Concentration in Marketing**

**Program Requirements:** Generally, the Ph.D. Program in Business Administration with a Marketing Concentration is comprised of 60 credit hours. Up to 6 credit hours of prior coursework may be applied to the requirements for the Marketing Concentration with the recommendation and consent of the student’s Ph.D. Program Advisory Committee.

**Supporting Fields**

Courses for the supporting field requirement are made in consultation with the student’s Ph.D. Program Advisory Committee. All courses taken for the supporting fields must be at the graduate level and/or taken for graduate credit. A minimum of nine hours should be taken in graduate research seminars.

**Dissertation**

A dissertation will be written under the guidance of the marketing faculty. The dissertation committee consists of a minimum of 3 graduate faculty members. One graduate faculty member outside the Marketing Department may be chosen for this committee depending on the dissertation topic.

| Total Hours | 60 |

**Graduate Certificate in Business**

The Graduate Certificate in Business is designed to give non-business graduate students a foundation in the core aspects of business they will need to start successful commercial or non-commercial enterprises or assist in creating new products or service offerings in existing organizations. The certificate program is open to all non-business graduate students throughout the University of Arkansas, and students from all majors are encouraged to participate. Ideally, these students will be well-positioned to create knowledge-based, high-growth start-ups or assist existing companies in developing successful new product and services. Both of these goals will contribute to the economic development of the state of Arkansas.
Admission Requirements: The Graduate Certificate in Business is open to all non-business degree-seeking graduate students who are in good standing with the graduate school and admitted to the graduate school of business. Information on graduate school of business admission requirements can be found in the admissions portion of the graduate school of business section of the graduate catalog.

Requirements for the Graduate Certificate in Business: (15 hours)

To receive the Graduate Certificate in Business, students are required to take 9 hours of coursework in the Walton College of Business and 6 hours of electives related to business in either the Walton College or in another college at the University of Arkansas. Elective courses other than those listed below may be approved by the Director of the Certificate program. Some elective courses have prerequisites that are not met by courses in the certificate program. Students are advised to check prerequisites prior to enrolling in a course.

To receive the graduate Certificate in Business, students are required to take 15 hours as follows:

Graduate Certificate in Entrepreneurship

The Graduate Certificate in Entrepreneurship is designed to give graduate students a foundation in the core aspects of entrepreneurship they will need to start successful enterprises, to create and promote new products or service offerings in existing organizations, or to engage in social entrepreneurship. The Certificate program is open to all graduate students at the University of Arkansas, and graduate students from all majors are encouraged to participate. Students who complete the Graduate Certificate in Entrepreneurship will have explored the context, tools, and processes of entrepreneurial activity and will have learned how to apply them to commercial and non-commercial enterprises.

Admission Requirements: The Graduate Certificate in Entrepreneurship is open to all graduate students who are in good standing with the graduate school at their campus. Students must apply and be admitted to the Graduate School of Business. Information regarding Graduate School of Business admission requirements can be found earlier in this chapter.

Requirements for the Graduate Certificate in Entrepreneurship: (12 hours) To receive the Graduate Certificate in Entrepreneurship, students are required to take 9 hours of coursework in the Walton College of Business and 3 hours of electives related to entrepreneurship in either the Walton College or in another college at the University of Arkansas. Elective courses other than those listed below may be approved by the Director of the Certificate program. Some elective courses have prerequisites that are not met by courses in the certificate program. Students are advised to check prerequisites prior to enrolling in a course.

Master of Business Administration Courses

MBAD 5241. Ethical Decision Making. 1 Hour.
Business Ethics will address business ethics issues from a personal, professional, and organizational perspective. We will cover basic ethical decision-making frameworks to help inform students' personal moral frameworks, ethical issues that are most relevant to managers of modern organizations, and the role of business in society. (Typically offered: Fall)

MBAD 535V. MBA Internship. 1-3 Hour.
This course allows a student to experience an internship within a business and benefit from the applied experience. The internship may be designed to offer a wide range of business experiences. The internship must be supervised by a faculty member as well as a member of the firm. MBA Director approval required. (Typically offered: Summer) May be repeated for up to 3 hours of degree credit.

MBAD 536V. Study Abroad-Special Problems. 1-3 Hour.
Provides MBA students with the opportunity to explore a business problem in depth under the guidance of a graduate faculty member. MBA Director approval required. (Typically offered: Summer) May be repeated for degree credit.

MBAD 5433. Capstone Project. 3 Hours.
A large-scale project integrating various business topics. Prerequisite: MGMT 5313. (Typically offered: Summer)

MBAD 5511. Professional Development -- Special Topics In Business. 1 Hour.
A concentrated emphasis on one business topic. Corequisite: MBAD 5212, MBAD 5122 and MBAD 5232. (Typically offered: Fall and Spring) May be repeated for up to 5 hours of degree credit.

MBAD 5773. China Business Law, Regulations, and Ethics. 3 Hours.
Business law in China that is relevant to managers; Chinese regulations particularly relevant to consumer products and retail; business ethics in China. (Typically offered: Irregular)

Walton College of Business Courses

WCOB 5023. Sustainability in Business. 3 Hours.
The course focuses on theoretical and practical bases for pursuing sustainability in business and society. (Typically offered: Fall and Spring)

WCOB 510V. Special Topics in Business. 1-3 Hour.
Special business topics of an interdisciplinary nature. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WCOB 5843. Cross-Sector Collaboration for Sustainability. 3 Hours.
This course explores how organizations in the three sectors of society work together in value creation by addressing social and environmental problems. Focusing on business and nonprofit organizations, we investigate the forces that bring about and influence these collaborations from practical and theoretical perspectives, and managerial responses to collaboration challenges. Prerequisite: Graduate Status. (Typically offered: Irregular)

WCOB 6111. Seminar in Business Administration Teaching I. 1 Hour.
This course in college level teaching is designed for graduate students and new college teachers with specific emphasis on the Business Administration learning and classroom management. The purpose of this course is to introduce graduate students to principles of teaching and learning and to prepare these future teachers to lifelong learners in the classroom as teachers. Prerequisite: Graduate standing. (Typically offered: Fall)
econometrics to provide rigorous training and preparation for your chosen career.

M.A. in Economics

Prerequisites to Degree Program: Applicants for graduate studies in economics must meet the requirements of the Graduate School of Business and be accepted by the Department of Economics. The requirements are (1) a bachelor’s degree from an accredited institution with a satisfactory grade-point average, (2) a satisfactory score on the Graduate Record Examinations (GRE), and (3) satisfactory performance in the following courses: intermediate microeconomics, intermediate macroeconomics, statistics, two semesters of calculus, and linear algebra. Students from all academic backgrounds are encouraged to apply.

Degree Options: Students must select the Non-Thesis or Thesis option. Both options combine a study of economic theory, applied econometrics, and an applied field that will prepare students for careers in the private or public sector, or for doctoral programs. The Non-Thesis option can be completed in one year. The Thesis option is for students who seek more advanced skills. It requires additional coursework and a thesis, and will take three or four semesters to complete.

Common Requirements for the Master of Arts Degree, Non-Thesis and Thesis Options: All master’s students must satisfactorily complete the 30 hours of course work listed below. Students must have a 3.00 cumulative grade point average in order to graduate. If at any point, a student's cumulative GPA falls below a 3.00, the student will be placed on academic probation. A student with a cumulative GPA below 3.00 for two consecutive semesters will be dismissed from the program.

</tr>
</tbody>
</table>

Applied Field Concentration (6 hours): Each student shall complete at least six hours of coursework in one applied field. Students who seek advanced training in applied economics and business in preparation for entering business or government employment should select one of the following fields: finance, accounting, marketing, transportation, information systems, or quantitative methods. Students who plan to enter a doctoral program should choose mathematics or statistics as their field. Other concentrations are possible with the approval of the Program Coordinator.

Graduate Seminar (3 hours): Students must register for at least one hour of graduate seminar each semester they are in residence.

Additional Degree Requirements, Non-Thesis Option (30 hours): In addition to 30 hours of required coursework, students who select the non-thesis option must take a comprehensive exam. Students must pass written exams in microeconomics and macroeconomics. The final exams at the end of ECON 6223 Microeconomic Theory II and ECON 6323 Macroeconomic Theory II will be comprehensive over both Micro I & II and Macro I & II. These two exams will be taken by all students in the course and will serve as the comprehensive exam for master’s students. Each exam has three possible grades: Pass, Marginal Pass, and Fail. Students must earn at least a Marginal Pass on both exams.

Should a Ph.D. student later decide to receive the master’s degree, the master’s comprehensive examination requirement will have been satisfied if the student received at least a Marginal Pass on both exams. These exams will be developed and graded by the instructor of record for the courses. In cases where a student's performance might produce a "Fail," the instructor will consult with the faculty who normally develop the Ph.D. preliminary examination in that area.

Additional Degree Requirements, Thesis Option (Minimum of 42 hours): This option is intended for students who seek the acquisition of advanced analytical and research skills. Students who select the Thesis option must pass 30 hours of required coursework specified above, 12 additional hours of coursework – 6 hours approved by the Program Director and 6 hours of thesis credit, and pass a comprehensive exam. The comprehensive exam will take the form of a formal thesis defense.

Ph.D. in Economics

Prerequisites to Degree Program: Students may enter the program directly from a bachelor’s degree or a master’s degree program. Applicants for graduate studies in economics must meet the requirements of the Graduate School of Business and be accepted by the Department of Economics. The requirements are (1) a bachelor’s degree from an accredited institution with a satisfactory grade-point average, (2) a satisfactory score on the Graduate Record Examinations (GRE), and (3) satisfactory performance in the following courses: intermediate microeconomics, intermediate macroeconomics, statistics, two semesters of calculus, and linear algebra. Students from all academic backgrounds are encouraged to apply.

All doctoral students must satisfactorily complete the 72 hours of required courses including a graduate seminar each semester they are on graduate assistantships.

WCOB 6111 Seminar in Business Administration Teaching I 1

Research Requirements

Students on assistantship must enroll in WCOB 6111. Other students may enroll in an additional hour of ECON 643V or ECON 644V in lieu of WCOB 6111
Students must register for at least one hour of graduate seminar (ECON 643V/ECON 644V) each semester they are in residence and for three hours of ECON 643V the summer following their first year in the program.

ECON 636V     Special Problems in Economics  3
ECON 643V     Seminar in Economic Theory and Research I  7
ECON 644V     Seminar in Economic Theory and Research II  4

**Dissertation Hours (see the explanation below)**

ECON 700V     Doctoral Dissertation  18

**Total Hours**  72

**Candidacy Examinations**
All students must pass a Candidacy Exam, which consists of two components.

The first component entails written Comprehensive Examinations in microeconomics and macroeconomics. These exams will normally be taken in the summer after a student’s first year in the program. Each exam has three possible grades: Pass, Marginal Pass, and Fail. Students must earn a Pass on one of the exams and at least a Marginal Pass on the other exam. A student will normally have two opportunities to pass each Comprehensive Examination, with the second opportunity typically occurring in that January following the first attempt. If a student’s exam scores are not satisfactory, all exams for which a grade of Pass was not earned must be retaken. Only the most recent grade will be used in determining if this requirement has been met. Failure to successfully complete this requirement will result in a student being dismissed from the program.

The second component is a Field Examination. Students complete two fields of study within economics, which will normally be a) Industrial Organization and b) International Macroeconomics and Development. Other fields are possible with the approval of the Director of Graduate Studies. A field will consist of 6 hours of specialized courses (numbered 6000 or above). Students will select one of their two fields as a major field and must pass a Field Exam in that area. The Field Exam requirement is satisfied by a research paper on a topic in the student’s field of specialization. The paper is to be completed by the end of the summer following the student’s second year during which the student completes the required field courses. The field paper topic must be approved by the student’s advisor and registered with the Director of Graduate Studies. The Field Examination is satisfactorily fulfilled when the student’s advisor approves the completed paper. When feasible, the paper will be presented at a departmental seminar before it is approved by the student’s advisor or soon after. Failure to successfully complete this requirement will result in a student being dismissed from the program.

After passing the Candidacy Examination, doctoral students are required to be enrolled in a minimum of one hour of graded graduate coursework or dissertation credit each semester (Fall and Spring) while on graduate assistantship.

**Dissertation**
The dissertation demonstrates a student’s ability to select, define, organize, and complete a major research project. It should validate that the student has technical mastery of the field, is capable of doing independent scholarly research, and is able to formulate conclusions that enlarge the body of economic knowledge. Dissertation requirements include (1) a defense of proposal and (2) completion of an acceptable doctoral dissertation. Students must enroll in a total of 18 hours of dissertation credit.

**Final Examination**
The final examination is normally an oral defense of the student’s dissertation.

**Graduate Faculty Courses**

**ECON 5243. Managerial Economics. 3 Hours.**
This course will provide students with a strong foundation in core economics principles, with emphasis on industrial organization issues and applications geared toward the supply-chain and retail focus of the redesigned MBA program. (Typically offered: Fall and Spring)

**ECON 5253. Economics of Management and Strategy. 3 Hours.**
Information economics and applied game theory. (Typically offered: Irregular)

**ECON 5263. Applied Microeconomics. 3 Hours.**
The framework for this course is the economic way of thinking. Both the theory and application of important economics questions are presented, showing students the applicability of various economic methodologies in a number of different contexts. To gain competence in the applied side of economic analysis, students will use MS Excel or other software to apply class concepts to solve concrete problems. Prerequisite: ECON 5243 and ECON 5743. (Typically offered: Spring)

**ECON 537V. Global Business. 1-3 Hour.**
Integrated overview of the global business environment and the organizational challenges of a multinational firm. To enhance understanding of the business and cultural environment of prominent emerging markets, the course includes a 2-3 week overseas immersion project to fulfill a predefined goal. Project is integrated with global content upon return. (Typically offered: Fall and Spring)
This course is cross-listed with MGMT 537V.

**ECON 5423. Behavioral Economics. 3 Hours.**
(Formerly ECON 4423.) Both economics and psychology systematically study human judgment, behavior, and well-being. This course surveys attempts to incorporate psychology into economics to better understand how people make decisions in economic situations. The course will cover models of choice under uncertainty, choice over time, as well as procedural theories of decision making. Graduate degree credit will not be given for both ECON 4423 and ECON 5423. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Spring)

**ECON 5433. Experimental Economics. 3 Hours.**
(Formerly ECON 4433.) The course offers an introduction to the field of experimental economics. Included are the methodological issues associated with developing, conducting, and analyzing controlled laboratory experiments. Standard behavioral results are examined and the implications of such behavior for business and economic theory are explored. Graduate degree credit will not be given for both ECON 4433 and ECON 5433. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Fall)

**ECON 5743. Introduction to Econometrics. 3 Hours.**
(Formerly ECON 4743.) Introduction to the application of statistical methods to problems in economics. Graduate degree credit will not be given for both ECON 4743 and ECON 5743. Prerequisite: ((ECON 2013 and ECON 2023) or ECON 2143) and (MATH 2043 or MATH 2554 or higher)) and (WCOB 1033 or STAT 2303). (Typically offered: Spring)

**ECON 5753. Forecasting. 3 Hours.**
(Formerly ECON 4753.) The application of forecasting methods to economics, management, engineering, and other natural and social sciences. The student will learn how to recognize important features of time series and will be able to estimate and evaluate econometric models that fit the data reasonably well and allow the construction of forecasts. Graduate degree credit will not be given for both ECON 4753 and ECON 5753. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and (MATH 2043 or MATH 2554) and (WCOB 1033 or STAT 2303). (Typically offered: Fall)
This seminar will cover advanced fields of current research importance in economics. This will facilitate the development of research directions for doctoral study and research. Prerequisite: Graduate standing. (Typically offered: Irregular)

Use of economic theory and statistical methods to estimate economic models. The single equation model is examined emphasizing multicollinearity, autocorrelation, heteroskedasticity, binary variables and distributed lags. Prerequisite: MATH 2043 and knowledge of matrix methods, which may be acquired as a corequisite, and ECON 2023, and an introductory statistics course or equivalent. (Typically offered: Fall)

Use of economic theory and statistical methods to estimate economic models. The treatment of measurement error and limited dependent variables and the estimation of multiple equation models and basic panel data models will be covered. Additional frontier techniques may be introduced. Prerequisite: ECON 6613. (Typically offered: Spring)

Use of economic theory and statistical methods to estimate economic models. Nonlinear and semiparametric/nonparametric methods, dynamic panel data methods, and time series analysis (both stationary and nonstationary processes) will be covered. Additional frontier techniques may be covered. Prerequisite: ECON 6613. (Typically offered: Spring)

This course will develop the theory of modern industrial organization. The latest advances in microeconomic theory, including game theory, information economics and auction theory will be applied to understand the behavior and organization of firms and industries. Theory will be combined with empirical evidence on firms, industries and markets. Prerequisite: ECON 6213 and ECON 6223. (Typically offered: Fall)

This course surveys firm decisions, including setting prices, choosing product lines and product quality, employing price discrimination, and taking advantage of market structure. It will also cover behavioral IO, which reconsiders the assumption that firms and consumers are perfectly rational and examines the role of regulation. Prerequisite: ECON 6133. (Typically offered: Spring)

A second graduate level course in development economics with a focus on foundational theoretical issues. We explore the causation, implications, and remedies for pervasive and persistent poverty in low-income countries. Emphasis will be primarily on microeconomics topics. May be taken either as a precursor to International Development Economics II or stand-alone. Prerequisite: ECON 6213, (ECON 6613 or AGEC 5613) or by instructor's permission. (Typically offered: Fall)

A second graduate level course in development economics that focuses on the empirical aspect of development in low-income countries. The course explores various microeconomics topics related to poverty, human capital accumulation, and their interactions with role of public policy. Prerequisite: ECON 6213, (ECON 6613 or AGEC 5613) or instructor consent. (Typically offered: Spring)

The course develops advanced concepts in the use of controlled experiments to test economic theory and explore behavioral regularities relating to economics. The class focuses on the methodology of experimental economics while reviewing a variety of established results. Prerequisite: ECON 6213. (Typically offered: Fall)

Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall)
Finance (FINN)

Pu Liu
Department Chair
302A Business Building
479-575-4505

Wayne Y. Lee
Ph.D. Program Director
473 Business Building
479-575-4505

Degree Conferred:
Ph.D. in Business Administration (BADM)

Program Description: The Ph.D. program in Business Administration with a concentration in finance prepares students for faculty positions at academic institutions or for professional careers in private industry and government. During their course of study, students receive specialized instruction in the areas of corporate finance, investments, and financial institutions. The conceptual knowledge and methodological skills necessary to conduct independent research are acquired through courses and individual apprenticeships with faculty.

Ph.D. in Business Administration with Finance Concentration

Program Requirements:
The Ph.D. program in Finance requires 43 credit hours of coursework. Five seminars (15 credit hours) in financial theory and research are required in addition to 1 hour of WCOB 6111 Seminar in Business Administration Teaching I. The remaining credit hours, distributed across two supporting areas, economics and research, are customized in consultation with the department doctoral program adviser along with 18 hours of dissertation. In addition, students must complete a research paper requirement, pass a written and oral comprehensive exam, as well as successfully defend a dissertation.

Required Courses (34 hours)

WCOB 6111 Seminar in Business Administration Teaching I 1

Finance
FINN 6043 Finance Theory 3
FINN 6133 Seminar in Investment Theory 3
FINN 6233 Seminar in Financial Management 3
FINN 6333 Empirical Research in Finance 3
FINN 6733 Seminar in Financial Markets and Institutions 3

Economics
ECON 6133 Mathematics for Economic Analysis 3
ECON 6213 Microeconomic Theory I 3
ECON 6223 Microeconomic Theory II 3
ECON 6613 Econometrics I 3
ECON 6623 Econometrics II 3
ECON 6633 Econometrics III 3

Research Requirements (9 hours)

Students may take up to one research tool course approved by the department doctoral program adviser when the research tool course is not listed above.

Dissertation 18

Total Hours 49

Candidacy Exam

The comprehensive exam has written and oral elements. The written segment consists of two questions from each of the five doctoral seminars. Students must answer a total of seven questions with at least one question from each of the five doctoral seminars. Contingent on satisfactory performance on the written exam, students progress to the oral segment. In the oral segment, students are asked to clarify and/or expand on their answers to questions on the written exam. Students can also be asked to address questions on the written exam which were not selected. Students who successfully pass the comprehensive exam advance to the dissertation stage.

Additional requirements include a minimum of 72 graduate credit hours beyond the bachelor’s degree and 42 graduate credit hours beyond the master’s degree. For students who apply to the degree program without a master’s degree, a minimum of 11 additional credit hours in consultation with the department doctoral program adviser will be required to fulfill the full degree requirements to include approved graduate courses or a Master of Arts in Economics. Additional hours may be assessed in individual cases to meet specific coursework deficiencies.

Go to a complete list of the university’s Graduate School degree requirements (p. 430).

Graduate Faculty

Courses

FINN 4013. Seminar in Personal Financial Planning. 3 Hours.
Explores financial planning function, including contact, data acquisition, plan development and implementation; covers all areas of personal financial planning including investments, insurance, taxes, and estate planning; addresses planning techniques and financial planning ethical issues; emphasis on case studies. Pre-requisite: FINN 4733. Prerequisite: FINN 3003, FINN 3063, FINN 3623, and ACCT 3843. (Typically offered: Spring)

FINN 410V. Special Topics in Finance. 1-6 Hour.
Explores current events, new developments and special topics in Finance not covered in other courses. Prerequisite: FINN 3043. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

FINN 5113. Corporate Financial Management. 3 Hours.
Financial analysis, planning and control; decision making and modeling for financial managers; and financial policies for management. (Typically offered: Spring)

FINN 5133. Advanced Investments. 3 Hours.
(Formerly FINN 4133.) Sound training in the principles of security analysis and portfolio management and certain advanced techniques of financial management. Modern portfolio theory and its application to portfolio management practices will be emphasized. Graduate degree credit will not be given for both FINN 4133 and FINN 5133. Prerequisite: FINN 3063. (Typically offered: Fall and Spring)
FINN 5173. Energy Finance and Risk Management. 3 Hours.
This course provides an advanced introduction to energy finance, defined as the application of finance principles to energy service, and related industries, concerning all aspects of the energy value chain. Topics include: (1) physical fossil fuel markets; (2) physical electricity markets; (3) financially traded energy products; and (4) credit, counterpart, country, and enterprise risk. It also introduces students to business valuation and investment banking applications in the energy industry vertical. Prerequisite: FINN 5113 or FINN 5223. (Typically offered: Fall)

FINN 5223. Financial Markets & Valuation. 3 Hours.
Analysis of financial information by capital markets in the determination of security values with specific applications to retail and logistics companies. This course views these and other companies from the point of view of the capital markets. (Typically offered: Spring) May be repeated for degree credit.

FINN 5233. Advanced Corporate Finance. 3 Hours.
(Formerly FINN 4233.) Addresses complex and multifaceted issues and problems in financial decision-making. Graduate degree credit will not be given for both FINN 4233 and FINN 5233. Prerequisite: FINN 3603. (Typically offered: Irregular)

FINN 5303. Advanced Corporate Financial Management. 3 Hours.
Focus on financial policy issues using real situational cases. Topics include cost of capital, capital budgeting and long-term planning, value-based management, real options, as well as project financing and valuation. Prerequisite: FINN 5223. (Typically offered: Irregular)

FINN 5333. Investment Theory and Management. 3 Hours.
Integration of theory, practice of investments with solution of individual and institutional portfolio management problems; Institute of Chartered Financial Analysts' Problems; variable annuity in estate planning. Prerequisite: FINN 5223. (Typically offered: Fall)

FINN 541V. Shollmeir Investment Project. 1-3 Hours.
Provide students with the opportunity to design and apply complex investment strategies used in institutional portfolio management on the Shollmeir MBA Fund that can involve fixed income and equity securities as well as derivatives. Students will use top down asset allocation models, bottom up security selection, and hedge fund strategies. Prerequisite: FINN 5223 and FINN 5333. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

FINN 5433. Real Estate Finance and Investment. 3 Hours.
(Formerly FINN 4433.) Consideration of professional aspects of the real estate field. Emphasis is placed upon finance techniques and investment analysis. The focus is on commercial real estate. Brokerage, property management, appraisal, property development and current problems are also addressed. Students prepare a feasibly study on a commercial development project. Graduate degree credit will not be given for both FINN 4433 and FINN 5433. Prerequisite: FINN 3933. (Typically offered: Spring)

FINN 5443. Retail Finance. 3 Hours.
The financial success of retail product and service offerings depends on a clear understanding of the socio-economic as well as demographic and environmental factors that drive the changing patterns of consumption. This course introduces the fundamentals and use of consumer and trade area analysis tools, specifically geographic information systems (GIS) and psychographic market analysis, to make informed financial decisions. Extensive case studies are utilized throughout the course to learn concepts and best practices. Prerequisite: FINN 5223. (Typically offered: Spring)

FINN 550V. Independent Study. 1-3 Hour.
(Formerly FINN 450V.) Permits students on an individual basis to explore selected topics in finance, with the consent of instructor. Graduate degree credit will not be given for both FINN 450V and FINN 550V. (Typically offered: Irregular)

FINN 5703. Multinational Business Finance. 3 Hours.
Problems pertinent to managers of firms in multinational business environments, including international institutions, risks, investments and capital budgeting. (Typically offered: Irregular)

FINN 6043. Finance Theory. 3 Hours.
Provides a conceptual understanding of key theoretical developments in the field of financial economics, including firm decisions under risk within a world of uncertainty. (Typically offered: Irregular)

FINN 6133. Seminar in Investment Theory. 3 Hours.
Study advanced literature in field investments, with special reference to theory of random walks, stock valuation models, portfolio management. (Typically offered: Spring)

FINN 6233. Seminar in Financial Management. 3 Hours.
Financial management of firm with emphasis on financial theory or firm, quantitative methods used in financial analysis, planning. (Typically offered: Irregular)

FINN 6333. Empirical Research in Finance. 3 Hours.
A study of recent empirically based research in finance. (Typically offered: Irregular)

FINN 636V. Special Problems in Finance. 1-6 Hour.
Case studies in investments, corporation finance, money and banking, monetary theory, international finance, public finance. By arrangement. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

FINN 6733. Seminar in Financial Markets and Institutions. 3 Hours.
Recent developments in the literature of financial markets and institutions. Participants will be involved in the extensive study of existing theories and empirical tests of the theories. (Typically offered: Irregular)

FINN 683V. Contemporary Issues in Doctoral Colloquium. 1-3 Hour.
To explore and evaluate contemporary research issues in finance. Course content to reflect the most recent developments in theory and empirical research methodologies. Prerequisite: Doctoral student status and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

FINN 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

Information Systems (ISYS)
Rajiv Sabherwal
Department Chair
204 Business Building
479-575-4500

Pankaj Setia
Ph.D. Program Director
224 Business Building
479-575-5653

Paul Cronan
Master of Information Systems Program Director
215 Business Building

Degrees Conferred:
Ph.D. in Business Administration (BADM)
M.I.S. in Information Systems (INSY)

Graduate Certificate:
Graduate Certificate in Enterprise Systems (ISESGC)

Program Description: The Master of Information Systems is designed to provide professional preparation for positions in business and
government. It provides sufficient flexibility to meet the needs of students with various backgrounds and foster lifelong learning and innovation. Students may concentrate in one of four areas: Information Technology Management, Enterprise Resource Planning, Blockchain Enterprise Systems Management, or Software Engineering Management. The Ph.D. in Business Administration with a concentration in Information Systems is designed to produce a graduate with an understanding of the necessary subject matter required to contribute educational and research expertise to the field of information systems.

The program also offers a graduate certificate in Enterprise Systems to provide graduate students with knowledge and experience in information systems used in modern enterprise environments. The certificate includes three concentrations to allow students to focus on one facet of information systems.

**Master of Information Systems**

Master of Information Systems Program Website (https://gsb.uark.edu/master-of-information-systems/)

The Master of Information Systems is designed to provide professional preparation for positions in business and government. It provides sufficient flexibility to meet the needs of students with various backgrounds and foster lifelong learning and innovation. Students may concentrate in one of four areas: Information Technology Management, Enterprise Resource Planning (ERP) Management, Blockchain Enterprise Systems Management, or Software Engineering.

**Admission Requirements:** The Master of Information Systems program is open to students who have earned a bachelor’s degree from an accredited institution and who can present evidence of their ability to do graduate work. “Evidence of ability” means superior grade-point average, an acceptable test score on the Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE), and recommendations with respect to ability for successful pursuit of graduate-level work. International applicants and resident aliens must submit an acceptable TOEFL or IELTS score, or complete the Intensive English Language Program (Spring International Language Center) and receive an English proficiency recommendation for admission. Other admissions criteria can be considered on a case by case basis.

**Requirements for the Master of Information Systems Degree:**

Students whose previous studies have fulfilled requirements of the common body of knowledge in business and information systems will be required to complete a minimum of 30 hours of graduate work. The required common body of knowledge in Information Systems includes management information systems, systems analysis, database, and programming languages (such as Visual Basic, Java, or other).

To ensure that students acquire the skills necessary for career success, the M.I.S. program strongly encourages all students to obtain additional training directly related to the M.I.S. program prior to graduation. The M.I.S. program considers this training an integral part of the curriculum and recommends that students work for up to one year in a position (or positions) which allow for the practical application of the theoretical principles taught in M.I.S. courses.

Students who hold non-immigrant status in the United States in the F-1 or J-1 categories are responsible for coordinating any necessary authorization for employment with the Office of International Students and Scholars (ISS). F-1 and J-1 students are strongly advised to discuss training options with the M.I.S. Program Director and the ISS office early in their program, and to make themselves aware of limitations and restrictions related to F-1 or J-1 employment authorization benefits.

**M.I.S. (Part-time):** The Department of Information Systems also provides an opportunity for professionals in the workplace to complete the program
by taking 6 hours per semester; 5 semester program with Enterprise Resource Planning (ERP) Management and Blockchain Enterprise Systems (ES) Management concentrations. Contact the department for additional information or visit the Graduate School of Business website. (http://gsb.uark.edu/)

Electives are chosen by the student in consultation with the Master of Information Systems Program Director in the Department of Information Systems (ISYS). Approved electives (6 hours) may be any graduate course approved by the Master of Information Systems program director.

With the approval of the Master of Information Systems Program Director, any senior-level ISYS course (ISYS 4000 or higher) may be taken for graduate credit. After admission, the student must maintain a 3.00 grade-point average on all graduate coursework and all information systems coursework. Additionally, the student must receive a letter grade of at least a “B” in 75 percent of the courses attempted.

For the M.I.S. (part-time), approval of the Director is required to enroll in more than six hours per semester.

Ph.D. in Business Administration with Information Systems Concentration

Information Systems Ph.D. Program Website (https://gsb.uark.edu/phd-programs/information-systems.php)

Overview: The objective of the Ph.D. in business administration with a concentration in information systems is to prepare students to conduct quality research in information systems as a faculty member at a research-oriented university school of business. The program is designed to produce a graduate with an understanding of the necessary subject matter required to contribute educational and research expertise to the field of information systems. In addition to preparing students to be world-class researchers, the program seeks to prepare students to teach effectively in an information systems curriculum.

Admission Requirements: In addition to the university’s Graduate School and Walton College of Business’ Graduate School of Business requirements, the ISYS Ph.D. program has the following requirement: Applicants are expected to have a background in information systems via prior courses in topics such as a programming language, systems analysis, design, and development, and database processing. Students without the background may also be admitted but will likely be required to take up to 3 master’s level courses to remedy the deficiency.

Requirements: Requirements for the Ph.D. in business administration with concentration in information systems include core courses and elective courses in information systems, research tools, and supporting fields. These 43 credit hours of courses are taken prior to advancing to candidacy and are broken down as follows: research tools (9 hours); ISYS core courses (21 hours); and supporting field courses (13 hours). Also, there is a requirement that students satisfactorily complete a one-hour Graduate Colloquium during the fall and spring semesters of each year when students are in residence on campus in pursuit of the degree. Following completion of the coursework, students must pass a comprehensive examination. The program also requires completion of 1st and 2nd year summer research projects, defense of a dissertation proposal, and successful defense of the dissertation (18 credit hours). Students are also prepared for a career in research through research assistantships, collaborative research projects with faculty members, colloquia, and classroom teaching and support.

Course Requirements

Research Tools
ISYS 5203 Experimental Design 3
ISYS 5623 Multivariate Analysis 3
ISYS 5723 Advanced Multivariate Analysis 3

Information Systems Core Courses
Select seven of the following: 21
ISYS 6133 Survey of IS Research
ISYS 6233 IS Research Projects
ISYS 6333 Individual-level Research in IS
ISYS 6433 Team-level Research in IS
ISYS 6533 Macro- and Meso-level IS Research
ISYS 6633 Systems Development
ISYS 6733 Emerging Topics
ISYS 6833 Theory Development
ISYS 601V Graduate Colloquium

Supporting Fields
In addition to the WCOB 6111 Teaching Seminar and MGMT 6213 Research Methods Seminar, courses to meet this requirement will be determined in consultation with the ISYS Ph.D. program committee (courses must be at the Ph.D. level, unless otherwise approved by the ISYS Ph.D. program committee). These courses are normally taken outside the ISYS Department and are in the student’s area(s) of interest.

WCOB 6111 Seminar in Business Administration Teaching I 1
MGMT 6213 Seminar in Research Methods 3

Comprehensive Examination
Written exam, research tools and IS (at the end of all coursework)
Oral exam

Summer Research Requirements
1st summer paper
2nd summer (to include a round of feedback and revision)

Dissertation Requirements
Successful defense of Dissertation proposal 1
Successful defense of Dissertation 1

Other Ph.D. Courses Taken
Students may take up to 9 hours of other Ph.D. courses, as necessary.

Masters Level Courses
Students typically without an information systems background will be required to take some Masters courses prior to taking their comprehensive examinations. These courses do not count toward the Ph.D. degree and are taken to remedy deficiencies. The ISYS Ph.D. program committee will determine whether a student needs to take one or more of these courses. The specific courses are:
ISYS 5423 Seminar in Systems Development
ISYS 5503 Decision Support and Analytics
ISYS 5833 Data Management Systems

1 Minimum committee size: 4

Residence Requirement

There is a strong preference for students to be in residence — i.e., be full-time students with assistantship duties — during the entire program. Residence requirements are intended to ensure that every student has ample opportunity for the intellectual development that can result from a
sustained period of intensive study and close association with scholars in the intellectual environment of the university. The requirement recognizes that growth as an independent scholar is not merely a matter of class attendance, but rather involves a broader development of the intellect that comes through intensive study, independent research, sustained association with faculty members and other colleagues who share common scholarly and professional interests, attendance at seminars and colloquia, intensive reading and familiarization with library resources, consultation with specialists in other disciplines and resource centers, and the opportunity for broadened exposure to current intellectual issues as they are revealed in various campus offerings.

After filing a Declaration of Intent to pursue the doctoral degree, a student must fulfill a residence requirement as outlined in the Graduate Catalog (p. 435) section on doctors of philosophy and education degrees.

Graduate Certificate in Enterprise Systems

Paul Cronan
Director
WCOB 215
479-575-6130
cronan@uark.edu
Enterprise Systems Graduate Certificate Program Website (https://gsb.uark.edu/graduate-certificates/)

The Graduate Certificate in Enterprise Systems is a part-time program offered on campus, blended, and online. It is designed to provide graduate students with knowledge and experience in information systems used in modern enterprise environments. The demand for skilled professionals in information systems continues to outpace the supply of qualified applicants. Students may choose one of three concentrations for the Graduate Certificate in Enterprise Systems: Blockchain Enterprise Information Systems, Business Analytics, or Enterprise Resource Planning. The certificate program is intended to be completed part-time (ordinarily no more than six hours per semester), and is open to individuals with backgrounds in any discipline.

Admission Requirements: The Graduate Certificate in Enterprise Systems is a part-time program open to individuals with backgrounds in any discipline. Students must apply and be admitted to the Graduate School of Business; the GMAT/GRE requirement is waived for the Graduate Certificate in Enterprise Systems degree program. (Students who have earned a GPA 3.5 or better upon completion of the certificate program and subsequently apply to the part-time Master of Information Systems program (Professional M.I.S.) will not be required to submit a test score). Information regarding Graduate School of Business admission requirements can be found earlier in this chapter.

Requirements for the Graduate Certificate in Enterprise Systems: (12 hours)

To receive the Graduate Certificate in Enterprise Systems, students must select one of the tracks below. Students are required to take 9 hours of coursework in the Walton College of Business and 3 hours of electives related to Enterprise Systems in either the Walton College or in another college at the University of Arkansas. Elective courses other than those listed below must be approved by the director of the certificate program. Some elective courses have prerequisites that are not met by courses in the certificate program. Students are advised to check prerequisites prior to enrolling in a course.

Required Course

Choose at least one of the following depending on the track chosen:

- ISYS 5173 Blockchain Fundamentals
- ISYS 5103 Data Analytics Fundamentals
- ISYS 5213 ERP Fundamentals

Blockchain Enterprise Systems Track

This track is open to individuals with backgrounds in fields other than Information Systems and is designed to provide non-IS graduate students with the fundamental knowledge and skills needed to successfully transition to a career in the Information Systems field. Students who complete this track will have exposure to fundamental principles of blockchain, enterprise information systems, and techniques for management and development of blockchain projects.

Required Courses (9 hours)

- ISYS 5173 Blockchain Fundamentals 3
- ISYS 5133 Blockchain and E Business Development 3
- ISYS 5453 Blockchain and Enterprise Data 3

Students should choose 3 hours of coursework from among the following:

- ISYS 5103 Data Analytics Fundamentals (recommended) 3
- ISYS 5213 ERP Fundamentals 3
- ISYS 5463 Enterprise Transaction Systems 3
- ISYS 5833 Data Management Systems 3
- ISYS 5933 Global Technology and Analytics Seminar 3

Total Hours 12

Business Analytics Track

This track is open to individuals with backgrounds in any discipline and is designed to give business and non-business graduate student’s knowledge and experience in the management and use of enterprise data for operations and decision-making. The ability to effectively manage and analyze increasingly large and complex sets of data is highly valued among employers in all disciplines, as “business intelligence” becomes a primary source of competitive advantage in many organizations. Students who complete this track will have a foundation in the effective management and use of relational and dimensional data, the application of statistical decision-making theory, and the exploration and exploitation of data using advanced data mining tools and techniques. Students completing this track may be eligible to receive a certificate endorsed by the SAS Institute.

Required Courses (9 hours)

- ISYS 5103 Data Analytics Fundamentals 3
- ISYS 5503 Decision Support and Analytics 3
- ISYS 5843 Seminar in Business Intelligence and Knowledge Management 3

Students should choose 3 hours of coursework from among the following:

- ISYS 511V IT Toolkit & Skills Seminar (this course may not be used for the Masters of Information Systems Degree) 3
- ISYS 5133 Blockchain and E Business Development 3
- ISYS 5213 ERP Fundamentals 3
- ISYS 5423 Seminar in Systems Development 3
- ISYS 5833 Data Management Systems 3

Total Hours 12
Enterprise Resource Planning Track
This track is open to individuals with backgrounds in any discipline and
is designed to provide business and non-business graduate students
a foundation in the effective use, implementation, and customization of
Enterprise Resource Planning (ERP) systems. ERP systems support
integrated core business processes in nearly every large organization,
and knowledge of and experience with these systems are highly valued
among employers in all business disciplines. Students who complete this
track will have exposure to fundamental principles of ERP and techniques
for configuration, implementation, and development of ERP systems.
Students completing this track may be eligible to receive a certificate
endorsed by SAP America and the SAP University Alliances Program.

Graduate Faculty Courses

ISYS 5103. Data Analytics Fundamentals. 3 Hours.
Fundamental knowledge and skills in several major areas of business data
analytics. Emphasis on the management and use of data in modern organizations,
intermediate & advanced spreadsheet topics, relational databases & SQL; and
programming (such as Python). Prerequisite: MIS Director approval. (Typically offered: Fall)

ISYS 511V. IT Toolkit & Skills Seminar. 1-3 Hour.
Seminar in Information Systems solutions and concepts (such as applications
development, VB.NET, analysis of problems and design of solutions via application
systems, etc.) designed for students entering the MIS program—may not be used
for MIS degree credit. Prerequisite: MIS Director approval. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ISYS 5133. Blockchain and E Business Development. 3 Hours.
This course explores various blockchain and e-business development technologies
and then utilizes these technologies for developing a realistic application. Students
will also learn strategies and use a varied web stack to build web pages that interact
with blockchain platforms. Pre- or corequisite: ISYS 5173. (Typically offered: Fall)

ISYS 516V. Independent Study. 1-3 Hour.
(Formerly ISYS 450V.) Permits students on individual basis to explore selected
topics in data processing and/or Quantitative Analysis. Graduate degree credit will
not be given for both ISYS 450V and ISYS 516V. (Typically offered: Fall and Spring)

ISYS 5173. Blockchain Fundamentals. 3 Hours.
This course provides the fundamental concepts underpinning blockchain
technologies. The focus is on blockchain applications for business. Students will
learn about the overall blockchain landscape, including investments, the size of
markets, major players and the global reach, as well as the potential business value
of blockchain applications and the challenges that must be overcome to achieve
that value. Students will learn enough about the underlying technologies to speak
intelligently to technology experts and will be well-prepared to develop blockchain
applications in future courses. Prerequisite: Graduate standing and departmental
consent. (Typically offered: Fall and Spring)

ISYS 5203. Experimental Design. 3 Hours.
ANOVA, experimental design, introduction to basis of statistics. Prerequisite:
Graduate standing and WCOB 1033 or equivalent. (Typically offered: Fall)

ISYS 5213. ERP Fundamentals. 3 Hours.
An introduction to enterprise resource planning systems. Students should gain
an understanding of the scope of these integrated systems that reach across
organizational boundaries and can change how a company does business.
Implementation issues are covered, including the importance of change
management. Prerequisite: Graduate standing. (Typically offered: Fall and Summer)

ISYS 5223. ERP Configuration and Implementation. 3 Hours.
The process of configuring and implementing an enterprise resource planning
system. Business process analysis and integration. Students will develop a company
and set up several modules in SAP for use. Develop understanding of how the
business processes work and integrate. Prerequisite: ISYS 5213 or equivalent.
(Typically offered: Fall and Spring)

ISYS 5233. Seminar in ERP Development. 3 Hours.
ERP administration and system development practices. Advanced system support
issues related to Enterprise Resource Planning systems that are used in global
organizations. Basic ABAP programming. In addition, students will learn how to
provide basic systems administration support of the operating system, database,
and application systems software levels of ERP systems. Pre- or Corequisite:
ISYS 5223. Prerequisite: ISYS 5213. (Typically offered: Spring) May be repeated for
up to 6 hours of degree credit.

ISYS 5243. Current Topics in Computer Information. 3 Hours.
(Formerly ISYS 4243.) Intensive investigation of selected developments in computer
information systems hardware, software, and organization having current impact
on computer information systems design and application. Offering an extension
of lower-level CIS courses through individual student research and faculty team-
teaching of advanced topics. Topical selection made with each course offering.
Graduate degree credit will not be given for both ISYS 4243 and ISYS 5243.
(Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ISYS 535V. Internship Experience. 1-6 Hour.
This course allows a student to experience an internship within a business and
benefit from the work experience. The internship focuses on applications and
business problems and is supervised by a faculty member as well as a member of
the company/firm. Prerequisite: MIS Director approval is required. (Typically offered:
Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ISYS 5363. Business Analytics. 3 Hours.
This course in managerial business analytics provides future managers with the key
concepts of decision modeling and information technology management concepts.
Students will learn to utilize real time operational business data, as well as quickly
process and effectively leverage information. In addition, students will exercise
strategic IT deployment skills for supply chain and marketing processes as well as
develop strong decision modeling abilities. (Typically offered: Spring)
ISYS 5373. Application Development with Java. 3 Hours.
(Formerly ISYS 4373.) This course covers object-oriented programming concepts and illustrates them via an appropriate object-oriented programming language. Students will be exposed to the design of software objects, creation of software objects, and the use of objects in constructing an information system. Graduate degree credit will not be given for both ISYS 4373 and ISYS 5373. Prerequisite: ISYS 3293 with a grade of C or better. (Typically offered: Fall)

ISYS 5403. Qualitative Methods and Decision Making. 3 Hours.
Utilization of information, quantitative techniques, and computer application in decision making and problem solving for managers. (Typically offered: Irregular) This course is cross-listed with SCMT 5133.

ISYS 5423. Seminar in Systems Development. 3 Hours.
Advanced study of structured systems development. Emphasis on strategies and techniques of structured analysis and structured design for producing logical systems specifications and for deriving physical systems designs. Coverage of methodologies for dealing with complexity in the development of information systems. Prerequisite: ISYS 511V. (Typically offered: Fall)

ISYS 5433. Enterprise Systems. 3 Hours.
Enterprise Systems comprises the entire class of information technology and systems that support the mission of the company including decision support and business processes. This managerial enterprise systems course focuses on strategic issues of information technology. Students study the various elements and integration of an organization's business processes; as a result, students gain an understanding and working knowledge of systems used to support these business processes and their use in decision making. In addition, students will study concepts and develop skills needed to utilize decision-centric business intelligence and knowledge management applications. (Typically offered: Spring)

ISYS 5453. Blockchain and Enterprise Data. 3 Hours.
The focus of this course is to expose students to working with distributed and service oriented architectures for different applications as well as the IT infrastructure needed. The course provides the opportunity for students to gain valuable insight into blockchain as a distributed system and cloud architecture platforms with the goal of developing enterprise applications. Prerequisite: ISYS 5133. (Typically offered: Spring)

ISYS 5463. Enterprise Transaction Systems. 3 Hours.
Being able to accurately capture and store business transactions is an important processing function in many businesses. For many large companies with high volume processing, the tools of choice for transaction processing are applied. This course provides students with the necessary understanding and skills to develop advanced applications in mainframe environment. Pre- or Corequisite: ISYS 5453 or equivalent or MIS Director approval. (Typically offered: Irregular)

ISYS 5503. Decision Support and Analytics. 3 Hours.
Analysis of the highest level of information support for the manager-user. A study of systems providing analytics-based information derived from databases within and/or external to the organization and used to support management in the decision making. Application of tools in business analytics, problem solving, and decision making. Prerequisite: MIS Director approval. (Typically offered: Fall)

ISYS 5603. Analytics and Visualization. 3 Hours.
This course focuses on how to discern and tell your story visually using data based on traditional graphical data representation as well as the latest data and information technologies. Coverage includes both visualization theory and hands-on exercises using appropriate computing tools. The course will also include visualization of predictive, clustering, and association models. The opportunities and challenges of Big Data visualization will be explored. Prerequisite: (ISYS 5503) or (ISYS 5133 and departmental consent). (Typically offered: Fall)

ISYS 5613. Business Applications of Nonparametric Techniques. 3 Hours.
Consideration of business and economic research related to sampling and experimental design, testing of hypothesis, and using nonparametric tests. Prerequisite: ISYS 5203 or equivalent. (Typically offered: Spring)

ISYS 5623. Multivariate Analysis. 3 Hours.
Principal component analysis, regression analyses. Prerequisite: ISYS 5203. (Typically offered: Spring)

ISYS 5713. Seminar in IS Topics. 3 Hours.
Intensive seminar in selected information systems topics. Topical selection made with each course offering. Prerequisite: ISYS 511V or MIS Director approval. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ISYS 5723. Advanced Multivariate Analysis. 3 Hours.
Factor analysis and other advanced techniques. Prerequisite: ISYS 5623. (Typically offered: Irregular)

ISYS 5833. Data Management Systems. 3 Hours.
Investigation and application of advanced database concepts include database administration, database technology, and selection and acquisition of database management systems. Data modeling and system development in a database environment. Prerequisite: ISYS 5103. (Typically offered: Spring)

ISYS 5843. Seminar in Business Intelligence and Knowledge Management. 3 Hours.
Business intelligence focuses on assessing and creating information and knowledge from internal and external sources to support business decision making process. In this seminar, data mining and information retrieval techniques will be used to extract useful knowledge from data, which could be used for business intelligence, and knowledge management. Pre- or Corequisite: ISYS 5833 or equivalent. Prerequisite: ISYS 5503 or equivalent. (Typically offered: Spring)

ISYS 5893. Global Technology and Analytics Seminar. 3 Hours.
This course is designed to provide an updated, comprehensive, and rigorous treatment of emerging global topics. Includes, but is not limited to, global study experiences, business insights, and foundational perspectives; examines significant issues from global perspectives. Prerequisite: Graduate standing and MIS Director approval. (Typically offered: Summer)

ISYS 5943. Management of Information Technology Seminar. 3 Hours.
Presented in a way that allows you to play an active role in the design, use, and management of information technology. Using IT to transform the organization, as competitive strategy, and creating new relationship with other firms is included. Pre- or Corequisite: ISYS 5833. Prerequisite: ISYS 5423. (Typically offered: Spring)

ISYS 599V. Practicum Seminar. 3-6 Hour.
This course is designed to introduce and engage the student in the practice, application, and problem solving in the business environment. Hands-on application of a business problem. Students will gain experience working on, making decisions about, and developing solutions for business applications. Topics include but not limited to analytics, data, and information technology.Prerequisite: Graduate standing and MIS Director approval. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ISYS 601V. Graduate Colloquium. 1-6 Hour.
Presentation and critique of research papers and proposals. (Typically offered: Fall and Spring)

ISYS 6133. Survey of IS Research. 3 Hours.
This is an introductory seminar in information systems research for doctoral students. Its objective is to introduce participants to major streams of IS research and discuss many of the important roles and responsibilities of an IS researcher. Also, this course will play the important role of introducing participants to the research of the current IS faculty. (Typically offered: Fall)
ISYS 6233. IS Research Projects. 3 Hours.
The students will understand the ideas underlying a scientific contribution; understand the practical challenges in designing and executing a study; Design and execute a study; Write an empirical journal article. (Typically offered: Irregular)

ISYS 6333. Individual-level Research in IS. 3 Hours.
This course aims to expose students to individual-level research in IS. It provides a window into major streams of individual-level research in IS and reference disciplines. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

ISYS 636V. Special Problems. 1-6 Hour.
Independent reading and research under supervision of senior staff member. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ISYS 6423. Structural Equation Modeling. 3 Hours.
Structural equation modeling using current tools, such as AMOS. (Typically offered: Irregular)
This course is cross-listed with SCMT 6423.

ISYS 6433. Team-level Research in IS. 3 Hours.
This course aims to expose students to team-level research in IS. It provides a window into major streams of team-level research in IS and reference disciplines. (Typically offered: Irregular)

ISYS 6533. Macro- and Meso-level IS Research. 3 Hours.
This course aims to expose students to research at the macro- and meso-levels. For example, it could provide a window into major streams of organizational-level research in IS and reference disciplines. Topics could also include: change management, ERP research models, implementation, applications, and successes/failures, and ERP simulation models. Other topics that fall within the purview of the course are: large-scale technology and process innovations in organizations— e.g., software development process innovations and RFID will be examined at various levels (e.g., organizational). (Typically offered: Irregular)

ISYS 6633. Systems Development. 3 Hours.
The course provides an in-depth study of systems development as an area of research, understanding of the theoretical and conceptual foundations, insight into the current state of the research area, utilizes both IS and reference discipline literature as appropriate, guidance for conducting research projects and producing publishable research, an opportunity to work on cutting-edge research. (Typically offered: Irregular)

ISYS 6733. Emerging Topics. 3 Hours.
Various emerging topics, such as RFID applications and RFID supply chain, ethical decision models, behavioral modeling, piracy and privacy issues, and virtual worlds. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit.

ISYS 6833. Theory Development. 3 Hours.
To acquire theory development and writing skills, to understand challenges in developing and writing theory sections of papers, and to discuss approaches to writing good empirical journal articles. This course is suited for all social sciences students and is particularly appropriate for students conducting behavioral research in the business disciplines. (Typically offered: Irregular)

ISYS 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

J.D./M.B.A. Program

J.D./M.B.A. program
For students interested in obtaining both the M.B.A. and J.D. (law) degrees, the M.B.A./J.D. dual degree program is available. This program allows the student to receive both the M.B.A. degree and the J.D. degree. The program requires separate application and admission to both the School of Law and the Graduate School of Business and the M.B.A. degree program. Interested students should obtain bulletins and applications from both the School of Law and the Graduate School of Business. If the student is accepted into both programs, a maximum of twelve hours of approved law core courses may be used as duplicate credit toward the M.B.A. degree. These 12 hours of law core courses shall be applied to the 12 hours of career track courses within the M.B.A. degree plan. Likewise, a maximum of 12 hours of approved M.B.A. core courses may be used as duplicate credit toward the J.D. degree, thus reducing the total time necessary for the completion of both degrees.

Management (MGMT)

Degree Conferred:
Ph.D. in Business Administration (BADM)

Program Description: The primary objective of the Ph.D. program in Business Administration with a concentration in management is to prepare candidates for careers in university research and teaching. The program of study is designed to ensure that students receive an exposure to the broad areas of management, develop the conceptual skills and methodological tools necessary to design and conduct independent research, and develop the skills and experience necessary to teach at all levels of higher education.

Supporting Fields

Courses for the supporting fields requirement are selected in consultation with the student’s Ph.D. Advisory Committee. All courses taken for the Supporting Fields must be at the graduate level and/or taken for graduate credit. Statistics and methods classes cannot be used to fulfill the Supporting Fields requirement. A minimum of 6 hours and a maximum of 9 hours are to be taken in Management. These hours may include MGMT 6223, Special Topics in Management, and J.D., Special Problems.

Research Tools

Courses used to meet the Research Tools requirement will be selected in consultation with the student’s Ph.D. Advisory Committee and should support the student’s program of study. The courses should provide the student with a knowledge of advanced descriptive and inferential statistics, research design, and research methods.
Comprehensive Exam

Students will be required to take a comprehensive examination as a requirement of the PhD program in the Management Department. The exam will be administered over a three day period with the first day focusing on questions concerning the primary and secondary content areas, the second day being a day off to study a research article that will be covered on the research methods exam and the third day covering research methods. Successful completion of both parts of the comprehensive exam are required for admission to candidacy.

The exam will consist of three parts:

Content: Students will have questions from the two content areas they identified. There will be more questions on the primary area than the secondary area. Students will have some opportunity to choose among the questions. There will be some mandatory questions

Methods: All students will have the same methods questions. One part of the methods exam will be an article that students review a priori and critique. Students will have some opportunity to choose among the questions. There will be some mandatory questions.

Specialty Area: Each student taking the comprehensive exam will select a specialty area of emphasis and a management department faculty willing to sponsor that area. This area is one that the student is expected to be an expert in, and ideally, linked to his or her future dissertation area. The last part of the comprehensive exam will comprise questions that are based on the specialty area.

Graduate Faculty Courses

MGMT 5213. Business Foundations for Entrepreneurs. 3 Hours.
Introduction to the fundamental business concepts an entrepreneur needs to know to evaluate and launch a successful new venture. Topic areas include recruitment, selection, motivation and management of employees, market analysis and the marketing mix, financial strategies and accounting for funds, economic considerations, and the management of operations. Prerequisite: Graduate standing. (Typically offered: Spring)

MGMT 5223. Business Leadership and Ethics. 3 Hours.
Management for a global environment. The class will cover interpersonal workplace skills such as leadership and motivation, along with the management of human capital through well designed recruitment, selection, performance evaluation, compensation, and quality control systems. (Typically offered: Fall) May be repeated for degree credit.

MGMT 5313. Strategic Management. 3 Hours.
Strategy formulation, strategy implementation, and other topics related to the long-term success of the firm. Includes role of the general manager, international issues, and the impact of management fads on decision making. (Typically offered: Summer)

MGMT 5323. New Venture Development. 3 Hours.
Focuses on the identification and analysis of new venture opportunities and how entrepreneurs acquire the human and financial resources needed to develop successful businesses. Topics include market analysis, development of products and services, negotiation, developing and executing business plans, and new venture financing. Students are required to complete summer assignments before the course begins in the fall semester. Prerequisite: MGMT 5213 or an undergraduate degree in business or permission of the instructor. (Typically offered: Fall)

MGMT 5391. Business History and Practice. 1 Hour.
This course is cross-listed with ECON 537V.

MGMT 5413. New Venture Development II. 3 Hours.
A large-scale, real world, 10 week project involving hands-on work addressing issues faced by managers in partnering firms. Corequisite: Instructor consent. Prerequisite: MGMT 5323. (Typically offered: Spring)

MGMT 5602. Introduction to Strategy. 2 Hours.
An introduction to the value chain concept, the underlying framework of the Managerial MBA program. Topics include the primary value chain activities of inbound logistics, operations, outbound logistics, marketing and sales, and service, as well as the support activities of procurement, technology development, human resource management and firm infrastructure. (Typically offered: Fall)

MGMT 5613. Leadership and Organizational Behavior. 3 Hours.
Managing in a global workforce, including human resource issues, motivation, performance evaluation, quality concepts, transformational leadership, and selection/recruitment/development of employees. (Typically offered: Summer)

MGMT 5693. Entrepreneurship Practicum. 3 Hours.
Hands-on management of an actual on-going business. Students will gain experience in the business, making decisions about, and managing a competitive business. Students will be required to analyze the business in a term paper or other integrative assignment. Entrance by application only. (Typically offered: Fall, Spring and Summer)

MGMT 6011. Graduate Colloquium. 1 Hour.
Presentation and critique of research papers and proposals. (Typically offered: Fall and Spring) May be repeated for degree credit.

MGMT 6113. Seminar in Organizational Behavior. 3 Hours.
Survey of theoretical and empirical literature in organizational behavior. Stresses critical evaluation of current writing in the field and its integration with prior research. Covers topics relating to motivation, individual differences, job attitudes, social influence processes, and group dynamics. Prerequisite: Admission to a Ph.D. program. (Typically offered: Irregular)

MGMT 6123. Seminar in Organization Theory. 3 Hours.
This Ph.D.-level seminar presents an overview and introduction into organization theory literature. Emphasis on the development of relevant schools of thought, changes in the content of the traditional or 'mainstream' themes, current topics, schools of thought, and future directions are examined. Prerequisite: Admission to a Ph.D. program. (Typically offered: Irregular)
Ph.D. in Business Administration with Marketing Concentration

Program Requirements: Generally, the Ph.D. Program in Business Administration with a Marketing Concentration is comprised of 60 credit hours. Up to 6 credit hours of prior coursework may be applied to the requirements for the Marketing Concentration with the recommendation and consent of the student’s Ph.D. Program Advisory Committee.

Supporting Fields

Courses for the supporting field requirement are made in consultation with the student’s Ph.D. Program Advisory Committee. All courses taken for the supporting fields must be at the graduate level and/or taken for graduate credit. A minimum of nine hours should be taken in graduate research seminars.

Dissertation

A dissertation will be written under the guidance of the marketing faculty. The dissertation committee consists of a minimum of 3 graduate faculty members. One graduate faculty member outside the Marketing Department may be chosen for this committee depending on the dissertation topic.

Total Hours 60

Graduate Faculty

Allen, Bradley, Ph.D. (University of Texas at San Antonio), B.S. (Brigham Young University), Assistant Professor, 2017.
Ashton, Dub, Ph.D. (University of Georgia), M.B.A., B.S.B.A. (Memphis State University), Associate Professor, 1981.
Burton, Scot, Ph.D. (University of Houston), M.B.A., B.S.B.A. (University of Texas), Distinguished Professor, 1993.
Chen, Jialie, Ph.D. (Cornell University), B.A. (Shanghai University of Finance and Economics), Assistant Professor, 2018.
Cox, Nicole R., M.B.A. (University of Arkansas), B.S. (College of the Ozarks), Instructor, 2003.
Gauri, Dinesh K., Ph.D., M.A. (State University of New York-Buffalo), M.S. (Indian Institute of Technology, New Delhi), Professor, 2016.
Jensen, Thomas D., Ph.D., M.A., B.A. (University of Arkansas), Professor, 1982.
Jensen, Molly R., Ph.D., M.A. (University of Arkansas), B.S. (Southwest Missouri State University), Clinical Associate Professor, 2003.
Kopp, Steven W., Ph.D. (Michigan State University), M.B.A. (University of Southern Mississippi), B.S. (University of Missouri-Rolla), Associate Professor, 1992.
Murray, Jeff B., Ph.D. (Virginia Polytechnic Institute and State University), M.A., B.A. (University of Northern Colorado), Professor, 1989.
Rapert, Molly, Ph.D. (University of Memphis), M.B.A., B.S.B.A. (University of Arkansas), Associate Professor, 1991.
Smith, Ronn J., Ph.D. (Washington State University), M.S., B.S. (Montana State University), Associate Professor, 2006.

Degrees Conferred:
Ph.D. in Business Administration (BADM)

Program Description: The Ph.D. in Business Administration with a Marketing Concentration allows students to concentrate within one of three areas:

- Channels (e.g., retail, logistics, transportation, supply chain management)
- Management (e.g., strategy, international, relationship marketing)
- Communications (e.g., consumer behavior, advertising, promotion).

The student’s concentration will determine the courses taken in fulfilling the supporting fields requirement and the specialization for the comprehensive examination.
Courses

**MKTG 5103. Introduction to Marketing. 3 Hours.**
Introduction to marketing concepts and practices as applied to the retail consumer environment. Focuses on the strategic development, positioning, and management of products, promotion, distribution, pricing, and store environments in building customer relationships from retailer and supplier perspectives. (Core) (Typically offered: Fall and Spring) May be repeated for degree credit.

**MKTG 5223. Marketing. 3 Hours.**
Product management, market research, marketing communications, retailing and distribution, consumer behavior, and social and ethical implications of marketing. (Typically offered: Fall)

**MKTG 5333. Retailing Strategy and Processes. 3 Hours.**
Strategic planning and operation of retailing organizations. Investigation of the various types of retailing with emphasis on both the strategic and functional aspects in retail processes. (Typically offered: Spring)

**MKTG 5433. Consumer and Market Research. 3 Hours.**
Modern marketing research methods and analyses applied to consumers, shoppers, and buyers of goods and services sold in competitive retail environments. Attention is given to both quantitative and qualitative methods, analyses, interpretation, and decision making. Prerequisite: MKTG 5103. (Typically offered: Fall)

**MKTG 5523. Marketing Analytics. 3 Hours.**
This course is intended to teach students how to use data analytics to improve marketing decision making at every stage of the Strategic Marketing Process. The focus will be on the skills and tools needed to obtain, process, and analyze data to formulate and answer critical marketing questions and make managerial recommendations. This is a hands-on course that employs real-world databases, lectures, cases, and exercises. Prerequisite: MKTG 5103. (Typically offered: Spring)

**MKTG 5533. Strategic Category Management. 3 Hours.**
Strategic planning and management of brands and product categories from both manufacturing and retailing perspectives. Focus is on the product brand development, pricing, distribution, and promotion of brands and their strategic and functional roles in the product mix. (Typically offered: Summer)

**MKTG 5543. Category Analysis and Management. 3 Hours.**
Analysis and management of brands and product categories from supplier and retailing strategic perspectives. Focus is on brand and category strategic and functional roles in the merchandising mix as well as their development, pricing, distribution, promotion, and in-store placement. (Typically offered: Irregular) May be repeated for degree credit.

**MKTG 5553. New Product Development and Strategy. 3 Hours.**
Behavioral and social science concepts applied to retail shoppers, buyers, and consumers of products and services. Attention is given to research on the cognitive, affective, and experiential aspects involved in the acquisition, consumption, and disposal of products and services by individuals and households. Prerequisite: MKTG 5103. (Typically offered: Fall and Spring)

**MKTG 5563. Retail Strategy. 3 Hours.**
The purpose of this course is to investigate the changing landscape of the retail industry. It should be noted that "retail" is an incredibly broad topic covering everything from consumer insights to supply chain to sales management. Retail is currently experiencing somewhat of a revolution as companies experiment with new technology, innovative ways to make shopping more enjoyable, or ways of engaging the customer in a way they are not likely to forget. This course will be based on identification and discussion of new trends that emerge in the retail environment. Prerequisite: MKTG 5223. (Typically offered: Spring)

**MKTG 636V. Special Problems in Marketing. 1-6 Hour.**
Individual research problems. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

**MKTG 6413. Special Topics in Marketing. 3 Hours.**
Seminar in special topics in marketing. Topics vary depending upon the instructor. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

**MKTG 6433. Seminar in Research Methods. 3 Hours.**
Extensive review of literature illustrative of marketing research studies. Focuses upon theoretical foundations of research design, methodology, and analysis as well as interpretation of univariate, bivariate, and multivariate data in marketing theory exploration. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

**MKTG 6443. Seminar in Marketing Theory. 3 Hours.**
Comprehensive survey and critical review of the history of marketing thought and contemporary schools of thought in marketing discipline. In-depth research, review, synthesis, and a research proposal will be required in a selected topic from the perspectives of advancing marketing theory. (Typically offered: Irregular)

**MKTG 6453. Seminar in Transportation and Business Logistics. 3 Hours.**
Underlying theories and problems related to the development of logistical systems in the U.S. Attention focused on transport economics, the role of government in providing transportation facilities, and managerial issues related to integrating transportation, inventory control, warehousing, customer service levels, and facility location. (Typically offered: Summer)

**MKTG 700V. Doctoral Dissertation. 1-18 Hour.**
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

**M.B.A./M.P.S. Program**

Requirements for the concurrent M.B.A./M.P.S. Degrees: Students interested in obtaining both the Master of Business Administration (M.B.A.) and the Clinton School of Public Service Master of Public Service (M.P.S.) degrees may pursue both degrees concurrently. The programs require separate application and admission to both the Clinton School of Public Service and the Graduate School of Business M.B.A. program. Students participating in the M.B.A./M.P.S. programs concurrently must file a degree plan for both degrees and obtain prior approval to take courses to be used for reciprocal credit. Interested students should obtain applications from both the Walton College Graduate School of Business and the Clinton School of Public Service.

**Supply Chain Management (SCMT)**

Brian Fugate
Department Chair

Total Hours: 70

University of Arkansas
SCMT 5643. Transportation Strategies in the Supply Chain. 3 Hours.
This course focuses on the setting of objectives and the design of optimal transportation strategy and alternative means of implementing transportation strategies within different types of organizations. (Typically offered: Fall)

SCMT 5653. Global Logistics and Supply Chain Management. 3 Hours.
This course examines the planning and management of logistics, but emphasizes supplier selection and development, logistics options, strategic alliances, and performance measurement. Emphasis is placed on the integration of purchasing, materials management, and multi-ﬁrm logistics planning. International logistics is also addressed within each of these topics. Prerequisite: SCMT 5633. (Typically offered: Fall)

SCMT 5663. Retail and CPG Supply Chain Management. 3 Hours.
This course examines the planning and management of supply chain activities including supplier selection and development, demand management, quick response, vendor managed inventory, logistics options, strategic alliances, and performance measurement. Emphasis is placed on the integration of purchasing, materials management, and multi-ﬁrm logistics planning. (Typically offered: Fall and Spring)

SCMT 5673. Modeling Retail & Consumer Products Logistics. 3 Hours.
This is a more quantitative approach to measuring logistics performance, modeling tradeoffs and making decisions. Topics include forecasting, inventory management, network optimization, and transportation routing. Prerequisite: SCMT 5633. (Typically offered: Fall and Spring)

SCMT 5683. Supply Chain Management in Global Business. 3 Hours.
Logistics management is that part of supply chain management that plans, implements, and controls the efficient, effective forward and reverse flow and storage of goods, services and related information between the point of origin and the point of consumption in order to meet customers’ requirements. To achieve its objectives, logistics management requires the integration of business processes within and across organizations in a supply chain. Using hands on projects and class discussions based on case studies and current press articles, this course will expose participants to logistics management challenges faced by member organizations of retail supply chains competing in an omni-channel environment transformed by radical changes in consumer behavior, technology, and globalisation. Prerequisite: SCMT 5663. (Typically offered: Spring)

SCMT 5693. Predictive Supply Chain Analytics. 3 Hours.
This course will introduce students to the variety and sources of data available from different technology-enabled sources, and through cases, expose them to innovative ways in which firms are using this data to improve supply chain management processes. The course will survey standard and advanced analytical techniques used to transform this data into actionable business intelligence and students will gain hands-on experience with these techniques. They will gain an understanding of the practical considerations that arise in real-world applications by means of projects. (Typically offered: Fall)

SCMT 601V. Graduate Colloquium. 1-6 Hour.
This course familiarizes students with academic and professional issues in the discipline of supply chain management with exposure to current research and contemporary research practices, current industry trends, the publication process, professional service opportunities, and pedagogical issues. Prerequisite: Admission to the PhD program in Supply Chain Management. (Typically offered: Fall and Spring)

SCMT 636V. Special Topics in Supply Chain Management. 1-6 Hour.
Independent reading and investigation in supply chain management. Prerequisite: Doctoral standing. (Typically offered: Fall, Spring and Summer)

SCMT 6413. Fundamentals of Logistics and Supply Chain Management. 3 Hours.
Introduces students to the key substantive areas of logistics and supply chain management. Offers a combination of lectures covering topics such as inventory control and forecasting and seminars discussing associated academic literature. Prerequisite: Admission to doctoral program. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SCMT 6423. Seminar in Structural Equation Modeling. 3 Hours.
The seminar focuses on data analysis using structural equation modeling methodologies. The course will concentrate on the four basic methodologies: exploratory factor analysis, conﬁrmatory factor analysis, path analysis, structural equations modeling with latent variables and their applications in empirical research. Prerequisite: Graduate Standing and MKTG 5433 or ISYS 5623 or ISYS 5723 or PSYC 6343 or equivalent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SCMT 6433. Supply Chain Management Research. 3 Hours.
Introduces students to major streams of SCM research and discusses the interest and merit of the research question(s), the appropriateness of the theoretical framework and/or hypothesis development, the adequacy of the research design, including data collection, measurement, and analysis (methodology), the accuracy of the discussion of the results. Prerequisite: Admission to doctoral program. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SCMT 6443. Theory in Supply Chain Management. 3 Hours.
Provides an overview of theories from ﬁelds such as strategic management and marketing and explores applications of these theories to supply chain management research. Emphasis is placed on the development of theoretically grounded testable hypotheses in the context of a broad range of SCM research areas. Prerequisite: Admission to doctoral program. (Typically offered: Irregular)

SCMT 6453. Behavioral Supply Chain Management. 3 Hours.
Focuses on human behavior in supply chain management. Topics may include but will not be restricted to behavior in inventory and ordering processes, in retail store execution, in global supply chain management, in the face of adversity and catastrophic supply chain risk, and in supply chain relationships. Prerequisite: Admission to doctoral program. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SCMT 6463. Research in Retail Supply Chain Management. 3 Hours.
Focuses on retail-related supply chain management research. Seminar topics may include but will not be restricted to retail sales and order forecasting, inventory management, and store execution issues. Prerequisite: Admission to doctoral program. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SCMT 6473. Emerging Topics in Supply Chain Management. 3 Hours.
Covers various emerging topics, such as information technology applications in the supply chain, humanitarian logistics, supply chain security, and individual-level decision-making in the supply chain. Prerequisite: Admission to doctoral program. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SCMT 6483. Supply Chain Economics. 3 Hours.
This course familiarizes students with economic concepts and philosophies underlying the organization of economic activity in the discipline of supply chain management. Enables students to evaluate, critique, and judge the quality of scholarly supply chain research that is grounded on economic principles and ideas. Provides training in developing supply chain research grounded in economic principles and ideas into an academic paper. Prerequisite: Admission to PhD program in Supply Chain Management. (Typically offered: Fall and Spring)

SCMT 700V. Doctoral Dissertation. 1-18 Hour.
Dissertation studies in supply chain management. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
Admission

Anyone who wishes to earn graduate-level credit, whether as a degree-seeking or non-degree-seeking student, must make formal application to, and be officially admitted by the Graduate School.

The Graduate School offers two classifications of admission:

Degree-Seeking

This enrollment will allow degree credit to be earned if the degree program also accepts the student.

Non-Degree Seeking

This enrollment will not lead to a degree.

Application. Please submit an online application (https://application.uark.edu/). You may pay the nonrefundable $60 application fee by credit card at the time of application, or you may opt to pay later. Once your application is submitted, you will receive a series of email communications directing you to set up your uark student email account, and then you will be able to upload unofficial transcripts and other supporting documents through your Applicant Center in our UAConnect student information system. Alternatively, supporting documents may be mailed to:

GRADUATE SCHOOL ADMISSIONS OFFICE
213 Gearhart Hall
1 University of Arkansas
Fayetteville, AR 72701
Telephone: 479-575-6246

Transcripts. It is the responsibility of those applicants who desire full graduate standing to request from each college or university which the student has previously attended an official copy of the student’s academic record including all courses, grades, and credits attempted and indication of degree(s) earned. Official transcripts should be sent directly to the applicant to be included in the self-managed application package. The applicant must not open the envelopes as transcripts not in the original, sealed envelopes will not be considered official. If choosing to scan and send transcripts, students will be required to submit the official transcript(s) by mail before registration for classes will be allowed.

NOTE: The fact that courses completed at one institution may be included on a transcript from another institution will not suffice; official transcripts must be received from each institution previously attended. However, applicants with an earned post-baccalaureate graduate degree (excluding professional degrees) from a regionally accredited institution may submit an official copy of the transcript conferring the baccalaureate degree and the transcript confirming the post-baccalaureate degree. For applicants with an earned post-baccalaureate degree: A degree program may require transcripts from every institution attended in pursuit of the baccalaureate degree even though the Graduate School Admissions Office does not. Please check with the degree program for specific requirements.

All transcripts become the property of the University of Arkansas Graduate School and will not be released to the applicant or to any other person, institution, or agency.

Standardized Test Scores: All degree-seeking applicants to the University of Arkansas Graduate School must submit scores on a standardized exam that is acceptable to the degree program, unless exempted by the degree program or the Graduate School. Standardized examination scores will not be required for any of the non-degree categories of admission, including admission to graduate certificate programs.

Deadlines. The University should receive all application materials, including all official transcripts, at least one month prior to the date of registration. Absolute deadlines for admission consideration are: Fall semester, Aug. 1; Spring semester, Dec. 1; Summer sessions, April 15. International applicants must have all materials submitted by April 1 for fall semester admission, by Oct. 1 for the spring semester, and by March 1 for the summer session, but it is recommended that all materials required for application be received by the admissions office at least nine months before the applicant wishes to begin his/her studies.

Applications received after the deadline, including non-degree and readmits, will be deferred to the next available semester. Many departments/programs have earlier application deadlines. The recommended deadline for fall semester graduate assistantship consideration is Feb. 1, although departments/programs may have earlier deadlines.

Previously Enrolled or Currently Enrolled at Fayetteville. For those previously enrolled or currently enrolled at the University of Arkansas, Fayetteville, the Graduate School obtains transcripts from the Registrar’s Office. For a graduate of the University of Arkansas, Fayetteville (baccalaureate degree), the only transcripts required are those from the University of Arkansas, Fayetteville, and those from each institution attended after completing the University of Arkansas, Fayetteville, degree. Anyone who was previously enrolled but who is not currently enrolled in the University of Arkansas Graduate School is considered a “readmission” and is required only to submit an Application for Admission, $30 processing fee, and official transcripts from institutions attended after the University of Arkansas Graduate School enrollment. (See Admission Classification: Readmission.) All requirements for the master’s and specialist degrees must be completed within six years; all requirements for the doctoral degree must be completed within seven years. Absence from the University does not change these time limits.

Admission is for a Specific Semester Only. Applicants who wish to change their date of entry after submitting an application must notify the Graduate School Admissions Office; applicants who have already been admitted should also notify the program in which they plan to major. Application materials for applicants who apply for admission but who do not subsequently enroll will be retained by the Graduate School Admissions Office for one calendar year from the date of the applicant’s original proposed semester of entry. However, applicants must file a new Application for Admission (no fee) to notify the Graduate School of their request for reconsideration. Applicants who are admitted but do not enroll for one year or more after admission must submit an application for admission, application fee, and have an official copy of the student’s academic record sent from each college or university attended and follow procedures for initial admission.

Admission to Graduate Standing. Official notice of the decision concerning admission will be sent from the Graduate School. Admission will not be granted until all requirements are met, and graduate credit will not be granted retroactively except as specified in the Retroactive Graduate Credit Policy. Further, admission to graduate standing does not automatically constitute admission to a specific program of study leading to a graduate degree. Therefore, in addition to satisfying the general requirements of the Graduate School, applicants must comply
with the program requirements and have the approval of the program in which they desire to pursue graduate study. It should be emphasized that students may not earn graduate credit in any course unless they have been admitted to the Graduate School.

Adviser. At the time of admission to a degree program of the Graduate School, the student is assigned to a major adviser. The appointment of the adviser is made in the student’s major program and is determined primarily by the student’s particular areas of interest in the field. Detailed information regarding the student’s program of study may be secured from the appropriate department chairperson or program director.

Non-Native Speakers of English. All applicants, regardless of citizenship, whose first language is not English, must submit a minimum score of 8.5 on the International English Language Testing System (IELTS), 79 on the Internet-based Test of English as a Foreign Language (TOEFL), or a 58 on the Pearson Test of English Academic (PTE-A), taken within the preceding two years, unless they have received a graduate degree from an accredited U.S. graduate school, or they have demonstrated an acceptable level of language proficiency as defined in the Graduate School Handbook located on the Graduate School Web site. Individual departments may have higher requirements, and reference should be made to program descriptions. Students applying to a Ph.D. program in the Sam M. Walton College of Business must submit one of these tests at the time of admission.

Non-native speakers of English, regardless of citizenship, even if eligible for a TOEFL waiver, must demonstrate competency in both spoken and written English to be eligible for a graduate assistantship that requires direct contact with students in a teaching or tutorial role, in a traditional classroom setting or via distance education. Competency in spoken English may be demonstrated by submitting a test score of at least 7 on the IELTS (speaking) sub-test, 26 on the Internet-based TOEFL (speaking) sub-test, 71 on the PTE-A (speaking) sub-test, or “pass” on the Spoken Language Proficiency Test (SLPT). Competency in written English may be demonstrated by either 1) submitting a test score of at least 6.0 on the IELTS (writing subtest), 26 on the Internet-based TOEFL (writing subtest), a 4.0 on the GRE, a 4.5 on the GMAT (analytical writing) subtest, a 71 on the PTE-A (writing) sub-test, or a 75 on the English Language Proficiency Test (ELPT) OR 2) by concurrently enrolling in ELAC 5033 Research Writing for Non-Native Speakers OR ELAC 5043, Research Writing in the STEM Fields, and ELAC 0011 Writing Workshop: Grammar through Editing. Option 2 is available via placement by test scores (5.5 IELTS writing sub-test, 23 Internet-based TOEFL writing sub-test, 3.5 GRE or 4.0 GMAT analytical writing subtest, 62 PTE-A writing sub-test or 70 on the ELPT). The Graduate Coordinator or Department Chair/program Director must request option 2. Students applying to a Ph.D. program in the Sam M. Walton College of Business must submit one of these spoken English tests (above) at the time of admission.

English Language Use by Non-Native Speakers. Applicants, regardless of citizenship, whose first language is not English and who are admitted to graduate study at the University of Arkansas, are required to present an acceptable score on one of the following tests: TOEFL (Writing), IELTS (writing), PTE-A (writing), GRE (analytical writing), GMAT (analytical writing) or ELPT (writing). Depending upon exam scores, a student may be required to take one or more ELAC course(s) during their first term of study. Students may be required to take the English Language Placement Test (ELPT) prior to the beginning of classes in their first term of study. Non-native speakers in the following categories are exempt from this requirement, although individual departments may require any of these tests for admission. (Please note that those students who will be in graduate assistantships in which they will have direct contact with students in a teaching or tutorial role must still demonstrate proficiency in spoken English, even if they qualify for one of these exemptions.)

1. Graduate students who earned bachelor’s or master’s degrees in U.S. institutions or in foreign institutions where the official and native language is English;
2. Graduate students with an Internet-based TOEFL writing score of 29, IELTS (writing) score of 7.0, or PTE-A writing score of 80.
3. Graduate students with a 4.5 on the analytical writing portion of the GRE or a 5.0 on the writing portion of the GMAT.

Diagnostic and placement testing is designed to test students’ ability to use English effectively in an academic setting, and its purpose is to promote the success of non-native speakers in completing their chosen course of study at the University of Arkansas. Test results provide the basis for placement into English Language and Culture (ELAC) support courses or course sequences. Courses are offered by the Graduate School and International Education for those students whose language skills are diagnosed as insufficient for college work at the level to which they have been admitted (undergraduate or graduate study). Credit in ELAC courses may not count toward University of Arkansas degrees. Non-native speakers diagnosed as having language competence sufficient for their level of study will not be required to enroll in ELAC courses.

The ELPT is administered by Testing Services during New Student Orientation and there is a $15 charge. Graduate students assessed course work as a result of performance on the ELPT, TOEFL writing, IELTS writing, PTE-A writing, GRE or GMAT analytical writing will be required to complete the ELAC course(s) to support initial course work taken in their fields. Graduate departments/degree programs will have the discretion to waive either the requirement for the language evaluation or the required language courses.

The publication, “International Student Information,” is available from the Graduate and International Admissions Office, 213 Gearhart Hall, 1 University of Arkansas, Fayetteville, Arkansas 72701.

Classifications of Admission to Graduate Standing

Full Graduate Standing, Regular Admission. To be considered for full graduate standing, regular status, applicants must have earned a baccalaureate or a master’s degree from the University of Arkansas, Fayetteville, or from a regionally accredited institution in the United States with requirements for the degrees substantially equivalent to those of this University, or from a foreign institution with similar requirements for the degrees. Admission to graduate standing does not automatically constitute acceptance to a program of study leading to a graduate degree. To pursue a graduate degree, a person must also be accepted in a program of study after gaining regular admission to graduate standing. International applicants cannot be admitted to graduate standing unless they are also accepted by a degree program at the same time.

Persons who achieve regular admission but are not initially seeking a graduate degree (non-degree) and who subsequently decide to pursue a degree must apply for and be accepted in a degree program by the Graduate School. A student with regular graduate standing who has not been accepted in a program of study leading to a specific graduate degree may take no more than 12 semester hours of graduate-level courses that can be counted toward the requirements for a graduate degree (six for graduate certificate programs). At the time of acceptance
in a degree program, the chair of the appropriate department or program director will recommend to the Graduate School which courses previously taken, if any, are to be accepted in the degree program.

Requirements for admission to graduate standing and acceptance in a program of study leading to a graduate degree are:

1. For admission to graduate standing:
   a. A grade-point average of 3.0 or better (A=4.00) on the last 60 hours of course work taken prior to receipt of a baccalaureate degree from a regionally accredited institution of higher education; or
   b. Conferral of a post-baccalaureate graduate degree (excluding professional degrees) from a regionally accredited institution; and
   c. A score on a standardized examination (e.g. Graduate Record Examination, Miller Analogies Test, Praxis, Graduate Management Admission Test) that is acceptable to the degree program, unless exempted by the degree program or the Graduate School.

2. For acceptance to a graduate degree program the requirements are as follows:
   a. Fulfillment of either 1.a or 1.b, and and 1.c, if required, and recommendation of the chair of the department or program offering instruction for the degree program; or
   b. Fulfillment of 1.b, recommendation of the chair of the department or program offering instruction for the degree program and approval of the Graduate Dean. The student must also meet any other conditions that may be specified by the faculty of the department.
   Any other consideration for admission must be by individual petition to the Graduate Dean and, where pertinent, a recommendation from the appropriate program chair. Each petition will be considered on its own merits, case by case. Program requirements should be considered the minimum for admission to a degree program but do not guarantee admission. That is, fully qualified applicants who are accepted by the Graduate School will not necessarily be accepted into the degree program of their choice. It is the responsibility of the program faculty to allocate program resources in the most effective manner. To accomplish this, the program may not be able to accept every qualified applicant.

Non-Degree Seeking. If a student meets all of the requirements for regular admission to the Graduate School but chooses not to pursue a degree, he/she may be admitted as non-degree-seeking. If the student subsequently chooses to pursue a degree, only 12 of the hours taken as a non-degree-seeking student may be used to fulfill degree requirements, and those 12 hours must be approved by the advisory committee.

Non-Consecutive One Term Admission, NON-DEGREE Standing. Applicants who desire admission standing allowing them to enroll in non-consecutive single semesters must obtain from the Graduate School Admissions Office and must sign a statement of understanding. Students admitted to such non-consecutive one-term admissions must understand that any enrollment taken in this classification will not normally carry degree credit. Transcripts are not required for applicants seeking this non-degree standing.

Visiting Graduate Students. A graduate student who is in good standing at another accredited institution may be given admission (non-degree status) to the Graduate School for one semester (renewable) upon submission of an Application for Admission and a letter of good standing from the Dean of the Graduate School at that institution. If the student’s first language is not English, TOEFL requirements will apply, but programs may petition for a student to be admitted without the TOEFL score. If, sometime in the future, the student should wish to pursue a degree in the University of Arkansas Graduate School, it will be necessary to follow the normal procedures for admission, to have official transcripts sent from each institution previously attended, and to submit a TOEFL score, if appropriate.

Readmission. Readmission to the Graduate School is not automatic. Students must meet each of the following criteria and are also strongly encouraged to ensure that an adviser in the department/program is still available to them. Post-candidacy doctoral students who have not been enrolled in the preceding year must be acceptable by the program for readmission.

1. Students who have been enrolled in the Graduate School within the five preceding academic years but have not enrolled in the immediately preceding semester will be readmitted if:
   a. The student has earned at least a 2.85 cumulative grade-point average on all graduate credits attempted during all previous enrollments;
   b. A new Application for Admission form (and $30 processing fee) is filed prior to the desired registration date (preferably, at least one month prior to that date);
   c. The Graduate School has received an official transcript of all course work attempted at other institutions subsequent to the previous enrollment in the University of Arkansas Graduate School;
   d. For students initially admitted Fall 2014 or after, an official standardized test score acceptable to the degree program is on file in the Graduate School; and
   e. The student’s graduate status at the end of the previous enrollment was “good standing.”

2. All requirements for the master’s and specialist degrees must be completed within six years of the first enrollment used for the degree; all requirements for the doctoral degree must be completed within seven years from the original date of the Record of Progress. Absence from the University does not change these time limits. Students may petition for extensions to these time limits only if the course work was completed at the University of Arkansas (Fayetteville).

3. Students who have been previously admitted to and enrolled in the Graduate School but have no enrollment within the five years preceding the semester of readmission and who wish to be readmitted to pursue a graduate degree, may be considered for readmission upon a petition by the degree program to the Graduate School. Such students should contact the department/program head/director or graduate coordinator to request readmission. The department/program head/director, graduate coordinator, or major adviser of the student will petition the Director of Graduate Admissions, using the form “Request for an Exception to the Admissions Requirements of the Graduate School,” and will specify whether all of the student’s previous course work and grade points will be forfeited. (Note: Neither the degree program nor the student may petition to forfeit only some of the previous course work and grade points; rather, all or none of the course work may be forfeited.) If all of the previous course work and grade points will be forfeited, a notation on the transcript next to these courses will state: “This course may not be used for graduate credit at the University of Arkansas.” If the previous course work and
grade points will not be forfeited, the student’s major adviser must petition for a time extension. Please see the Time Extension Policy.

4. Readmission for non-degree seeking students: Non-degree-seeking students who have previously been enrolled in the Graduate School but have had a lapse in their enrollment will follow the procedures stated above, or in the policy pertaining to non-consecutive one-term admissions, whichever is most appropriate.

5. Readmission to the Graduate School under any other circumstances will be considered and decided on an individual basis. Students interested in obtaining such readmission should contact the Graduate School.

Students who were not enrolled in the Spring semester, but who were enrolled for the Summer session will have registration materials available for the Fall semester should they wish to continue their registration.

Retroactive Graduate Credit

Degree Programs

Graduate students fully admitted into a degree program at the University of Arkansas may request that up to 12 hours of courses taken in the final 12-month period of their undergraduate degree count toward their graduate degree. If these courses were taken on the University of Arkansas, Fayetteville campus. These courses may not have been used for the undergraduate degree (unless the student is in a program where this has been approved by the Graduate Council), must be approved by the student's advisory committee, and must be at the 5000 level or above. Petition will be by the student's advisory committee or major professor to the Graduate School.

Sometimes students have completed their undergraduate degrees elsewhere, but have then taken course work as undergraduate students at the University of Arkansas after completing their undergraduate degree, but before being admitted to the Graduate School. Such students may request that up to six hours of courses taken for undergraduate credit in the final 12 months prior to admission to the Graduate School count toward their degrees. All of the rules stated in this policy are also applicable to this type of situation.

If the student’s advisory committee wishes to accept courses at the 4000 level toward the graduate degree, when those courses were taken in the last 12 months of a student’s undergraduate degree at the University of Arkansas, Fayetteville, the committee may petition the Graduate School. The petition must include an explanation of why the committee considers these courses to meet graduate degree requirements and expectations for graduate-level work. The instructors for these courses must have had graduate faculty status, and these courses may not have been used for the undergraduate degree.

Courses at the 3000 level taken before the student is fully admitted to the Graduate School may not be used to fulfill graduate degree requirements.

Courses offered by institutions other than the University of Arkansas, Fayetteville, may not be counted toward the graduate degree requirements in this way.

Graduate Certificates

Graduate students fully admitted to a graduate certificate program are allowed to use six hours of credit to count for both an undergraduate degree and a graduate certificate. All requirements of this retroactive graduate credit policy will apply and a transcript notation will note that the courses may not be used to fulfill requirements for a graduate degree.

Admission to Graduate Centers

In an attempt to fulfill the recognized need for graduate education for Arkansas residents who find it impossible or inconvenient to attend classes at Fayetteville, the University of Arkansas Graduate School offers selected graduate-level courses at graduate centers throughout the state.

All courses and instructors at these centers have been individually evaluated by the University of Arkansas Graduate Council and are subject to the same standards of quality that apply to graduate faculty and graduate programs at Fayetteville.

Similarly, those desiring to enroll in these courses must follow the same admission procedures and are subject to the same admission criteria as persons admitted at Fayetteville. There are no exceptions or deviations from these policies and procedures. Admission materials, including all official transcripts, should be received in the Graduate School at least one month prior to the requested semester of entry. (See section on "Admission.")

For more comprehensive information regarding format of instruction, schedule of classes, enrollment and registration, fees, etc., contact the Global Campus, School of Continuing Education and Academic Outreach, 2 E. Center St., Fayetteville, AR 72701; 479-575-6486 or 1-800-633-2267.

Those intending to enroll for classes at the Graduate Resident Center for Engineering (University of Arkansas at Little Rock, host campus) must submit application for admission to the Graduate School at least one month prior to initial registration through:

- Graduate Resident Center for Engineering
  3189 Bell Engineering Center
  University of Arkansas
  Fayetteville, AR 72701
  Telephone: 1-800-423-1176 or 479-575-6015

To assure timely processing of the Application for Admission, a check or money order made to the University of Arkansas for the $60 application fee must accompany the application when submitted to the Graduate School.

Contact the above address for information pertaining to classes, enrollment, fees, etc.

Graduate Centers

The University of Arkansas offers graduate-level courses for residence credit at Graduate Centers located off the Fayetteville campus. There are two types of graduate centers currently in existence: Twelve-Hour Graduate Centers and Graduate Resident Centers.

Graduate courses completed at Graduate Resident Centers may be used to satisfy course work requirements for any graduate degree. Any graduate credit course offered by the University of Arkansas, Fayetteville, via distance education (regardless of class sites) will be counted as residence credit.

Twelve-Hour Graduate Centers. The University of Arkansas, Fayetteville, offers graduate courses at off-campus locations. At those locations, not defined as Graduate Resident Centers for specified degrees, a student may complete a maximum of twelve semester
hours of courses for residence credit applicable to the master’s degree
requirements at the University of Arkansas.

To obtain graduate credit for courses offered at off-campus locations, the
student must gain admission to the University of Arkansas, Fayetteville,
Graduate School. If graduate credit so received is to be applied to a
specific master’s degree, the student must be accepted in a program
of study leading to that degree. Graduate courses completed, but not
applicable to the requirements for the master’s degree the student is
pursuing, will not be accepted as part of the 30-week residence required
for that degree.

**Graduate Resident Centers.** The University of Arkansas offers graduate
level courses for residence credit off the Fayetteville campus. All of the
residence requirements for some graduate degrees may be completed off
campus at Graduate Resident Centers as indicated in the following list.

- **Graduate Resident Centers at Military Bases and the downtown
  Little Rock Graduate Resident Center**

  The Master of Science in Operations Management (M.S.O.M.) is
  offered at Graduate Resident Centers established at the Naval
  Support Activity Mid-South in Millington, Tennessee; the Hurlburt Field
  Air Force Base in Florida; and at the downtown Little Rock location.
  For further information on this degree program and a description of
courses offered, see the Operations Management page.

- **University of Arkansas Clinton School**

  All course requirements for the Master of Public Service may be
  completed at a combination of the University of Arkansas Clinton
  School of Public Service, the University of Arkansas at Little Rock,
  the University of Arkansas for Medical Sciences, and the University of
  Arkansas, Fayetteville.

The following table provides a brief outline of minimum requirements for
admission to a degree program and for graduation from the program.

See the Objectives and Regulations chapter and each degree program for
full information about admission and graduation requirements.

| Degree Program | Degree Abbr. | Test Req. for Admission | Letter of Rec. | Department Application 
<p>| Department Application &amp; Admission Requirements | Dissertation or Thesis Required | Foreign Language Required for Grad. |

Fees and General Information

Educational expenses will vary according to a student’s course of study, personal needs, and place of residence. Student progress or general course of action in pursuit of higher education at the University of Arkansas is determined during the application and acceptance process. At the conclusion of the application and acceptance process, the progress or general course of action for each student will be assigned a category, called a career.

The career categories at the University of Arkansas — in order of magnitude by the cost of tuition per credit hour — are Agricultural & Food Law, Law, Graduate, and Undergraduate. Students concurrently enrolled in multiple careers will be assigned one primary career for all tuition billing purposes, called a billing career, based on the order of magnitude listed above. The Office of the Registrar is responsible for assigning the appropriate billing career. Students pursing an Undergraduate career will also be classified by undergraduate program. The undergraduate programs of College of Education and Health Professions’ plan of Nursing and the Fay Jones School of Architecture and Design’s undergraduate program of Architecture have specific tuition rates, while all other undergraduate programs are the Undergraduate tuition rate. Similar to career, although a student may be concurrently enrolled in multiple undergraduate programs, the Office of the Registrar will assign each student only one primary undergraduate program for tuition billing purposes based on the order of magnitude by the cost of tuition per credit hour. All fees, charges, and costs quoted in this catalog are subject to change without notice. A survey tool for tuition and fee estimation is available at the Treasurer’s website (http://treasurer.uark.edu/Tuition.asp?pagestate=Estimate/).

Financial obligations to the University of Arkansas must be satisfied by the established deadlines. Payment may be made at the university Cashier’s Office in the Arkansas Union, Room 214, by cash, personal check, money order or certified check. Echeck (electronic check) and credit/debit card payments are made online at UAConnect (http://uaconnect.uark.edu). If you pay with a debit or credit card, there is a convenience fee charged of 1.8 percent.

Acceptance of payment for fees does not imply academic acceptance to the university.

Estimated Necessary Expenses for an Academic Year

* The standard graduate in-state tuition rate is $430.69 per credit hour. Students enrolled in College of Business courses are charged $587.46 per credit hour in-state tuition. Students enrolled in College of Engineering courses are charged $503.91 per credit hour in-state tuition. Nursing students are charged $573.99 per credit hour in-state tuition.

** University fees per year include the following student-initiated and student-approved fees:
- Student Activity fee, $2.64/credit hour — $63.36
- Student Health fee, $7.25/credit hour — $174.00
- Media fee, $0.88/credit hour — $21.60
- Transit fee, $3.02/credit hour — $74.16
- Network Infrastructure and Data Systems fee, $10.73/credit hour — $258.72
- Facilities fee, $17.10/credit hour — $452.40
- Library fee, $2.84/credit hour — $69.84
- College of Arts and Sciences fee, $13.77/credit hour — $338.64

*** Weighted average expenses for living in a residence hall, double occupancy, with an unlimited meal plan. Actual room and board fees vary.

**** Budget amounts were adjusted for rounding to accommodate UAConnect budgetary rules.

When paying tuition, room and board, and associated fees, anticipated financial aid for a current semester may be deducted when it is listed as anticipated aid on the student’s account. Students receiving financial aid are strongly encouraged to have sufficient personal funds available to purchase books and to meet necessary expenses for at least one month at the start of school as some aid funds may not be available for disbursement.

The latest information regarding costs and other aspects of university life may be obtained by calling or writing the Office of Graduate and International Recruitment, 213 Gearhart Hall, 1 University of Arkansas, Fayetteville, AR 72701. In Arkansas, call 479-575-6246; from outside of Arkansas, call toll-free 1-866-234-3957.

Tuition Fees

Students classified as “in-state” for fee payment purposes are assessed tuition. Students classified as “out-of-state” for fee payment purposes are assessed additional non-resident tuition.

Official policies of the University of Arkansas Board of Trustees provide the basis for classifying students as either “in-state” or “out-of-state” for purposes of paying student fees. Board policies relating to residency status for fee payment purposes are included at the end of this chapter of the catalog. Out-of-state students who question their residency classification are encouraged to contact the Registrar’s Office, 146 Silas H. Hunt Hall, for more information about residency classification review procedures.

Academic Year

Graduate students are assessed tuition of $430.69 per credit hour. Students with out-of-state residency status are assessed tuition of $1,168.40 per credit hour.
Graduate students enrolled in the Walton College of Business courses are charged tuition of $587.46 per credit hour in-state and $1,593.70 per credit hour for out-of-state students.

Graduate students enrolled in College of Engineering courses are charged tuition of $503.91 per credit hour in-state and $1,367.03 per credit hour for out-of-state students.

Graduate nursing students are assessed tuition of $573.99 per credit hour. Students with out-of-state residency status are assessed tuition of $1,557.16 per credit hour.

Graduate occupational therapy students are assessed tuition of $450.00 per credit hour. Students with out-of-state residency status are assessed tuition of $1,218.34 per credit hour.

Graduate students enrolled in the specific distance education programs of Master of Science in Engineering (M.S.E.), Master of Science in Electrical Engineering (M.S.E.E.), Master of Science in Engineering Management (M.S.E.M.), and Master of Science in Operations Management (M.S.O.M.) are assessed tuition of $303.88 per credit hour for in-state and out-of-state residency status.

Graduate students enrolled in the specific distance education program of Great Plains and Agricultural Interactive Distance Education Alliance are assessed tuition of $580.00 per credit hour for in-state and out-of-state residency status.

Graduate students enrolled in the specific distance education program of Master of Science in Food Safety are assessed tuition of $500.00 per credit hour for in-state and out-of-state residency status.

Fee Adjustments

A currently enrolled student who has registered during the advance registration period should make any necessary or desired schedule adjustments such as adding or dropping courses or changing course sections during the schedule-adjustment period of the same semester. Students who drop classes will have their fees adjusted according to Fayetteville Policies and Procedures 330.0 – Tuition and Fee Adjustment Policy for Dropping Classes (https://vcfa.uark.edu/policies/fayetteville/avcf/3300.php). Drops and withdrawals are two different functions. In a drop process, the student remains enrolled. The result of the withdrawal process is that the student is no longer enrolled for the term. Fee adjustment deadlines for an official withdrawal are noted in Fayetteville Policies and Procedures 518.0 – Tuition and Fee Adjustment Policy for Official Withdrawal (https://vcfa.uark.edu/policies/fayetteville/avcf/5180.php).

Student Invoices

Students who pre-register for a semester will be invoiced approximately six weeks prior to the first day of classes. The Treasurer’s Office will send out an e-mail notification when the student invoices are available on UAConnect. Students should log into UAConnect (http://uacnect.uark.edu), navigate to the Treasurer’s Office tile, and click the ‘Student Invoice’ link.

Late Fees

Students are required to pay all charges by the posted payment deadline. Students who fail to pay all charges or who fail to execute an installment payment plan by the deadline may be assessed a late payment fee equal to the outstanding balance, not to exceed $75.00.

Any student with an outstanding balance, to include registration-related fees and/or housing charges, by the last payment deadline will be assessed an additional late payment fee equal to the outstanding balance, not to exceed $75.00.

The late fee will not be waived because an invoice was not received.

Disbursement of Refunds

Disbursement of refunds due to overpayments by scholarships, loans, and/or grants will begin approximately five days prior to the start of classes. The University of Arkansas has partnered with BankMobile to deliver financial aid and other school refunds to University of Arkansas students. For more information, visit the BankMobile reimbursement site (http://bankmobiledisbursements.com/refundchoicessso/).

Addresses

Students may create a check address, which will be used specifically for overpayment checks. This address may be created in addition to the local and permanent addresses. If a check address is not created, the default address will be the permanent address. The student may change their address on UAConnect (http://uacnect.uark.edu) in the Student Center.

Teaching Equipment and Laboratory Enhancements Fees

These fees provide and maintain state-of-the-art classroom equipment and instructional laboratory equipment. These fees vary, based upon the student’s college of enrollment.

During the regular fall, spring and summer academic semesters, these fees are assessed on a per credit hour basis.

Students Called into Active Military Service

When a student or student’s spouse is activated for full-time military service and is required to cease attending the University of Arkansas without completing and receiving a grade in one or more courses, they shall receive compensation for the resulting monetary loss as provided by Fayetteville Policy 504.2 (http://vcfa.uark.edu/policies/fayetteville/avcf/5042.php). The student must cease attendance because 1) the student is activated or deployed by the military or 2) the student’s spouse is activated or deployed by the military and the student or student’s spouse has dependent children residing in the household.

To be eligible for the compensation, the student must provide, prior to activation or deployment for military service, an original or official copy of the military activation or deployment orders to the university’s Veterans Resource and Information Center. A student whose spouse is a service member shall provide proof of registration with the Defense Enrollment Eligibility Reporting System (DEERS) of the U.S. Department of the Defense that establishes that dependent children reside in the household of the student and the service member.
Upon leaving the University of Arkansas because of active duty or deployment, the student may choose one of three compensatory options. The student may officially withdraw and receive full adjustment and refund of tuition and non-consumable fees for the term involved; the student can remain enrolled and arrange for a mark of “incomplete” for each class and finish the courses 12 months after deactivation; or the student may receive free tuition and fees for one semester after deactivation. For more detailed information, read Fayetteville Policy 504.2 (http://vcfa.uark.edu/policies/fayetteville/avct/5042.php).

Financial Assistance
Registration (in-state tuition) fees and Non-Resident Tuition for Graduate Assistants

Registration Fee. Any graduate student appointed to the position of Graduate Assistant whose appointment is equal to or greater than 50 percent may be granted registration fees (in-state tuition) in addition to the stipend.

Non-Resident Tuition. Any graduate student appointed to the position of Graduate Assistant whose percent appointment is equal to or greater than 25 percent shall, in addition to any stipend, be treated as an in-state student for tuition and fee purposes for the semester that they are on appointment.

Graduate Assistantships

Graduate assistantships are available for qualified students in numerous fields and must be obtained from the department in which the student is majoring or another appropriate unit. Recipients of these appointments are expected to carry a limited program of graduate studies. Graduate students appointed to the position of graduate assistant whose appointment is equal to or greater than 25 percent shall, in addition to any stipend, be classified as an in-state student for tuition and fee purposes only. In addition, in-state registration (tuition) fees may be paid for appointees of 50 percent or more although tuition is normally not paid for audited courses. Successful applicants must have good academic records, adequate preparation for graduate study in their major field, regular admission to the Graduate School, and must maintain a cumulative grade-point average of at least 2.85 on all work taken for graduate credit, although some departments may require their graduate assistants to maintain a higher grade point average. See probation policy below.

Graduate students on 50 percent appointment must be enrolled in a minimum of six hours of graduate credit during the academic year and a minimum of three hours during the summer if on summer appointment. For the full policy, see the Graduate School Handbook, available on the Graduate School website at grad.uark.edu (http://grad.uark.edu/).

Master’s students may hold a graduate assistantship for no more than four major semesters; a doctoral student may hold a graduate assistantship for no more than eight major semesters; a student who enters a doctoral program with only a baccalaureate degree may hold a graduate assistantship for no more than ten major semesters. The department/program may petition the Graduate School for an extension to these time limits, on a case by case basis.

Application forms may be obtained from the Dean of the Graduate School or from the head or chair of the department in which the student seeks to do his/her major work.

Information on other financial aid (loans and employment) can be obtained at the Office of Scholarships and Financial Aid in Hunt Hall.

Graduate School Fellowships

Exceptionally promising new entrants to doctoral programs may be nominated at the time of application for University Doctoral Fellowships. These Fellowships are awarded competitively, and the stipend may be held in addition to a graduate assistantship.

Students on academic probation who have been in residence at UA Fayetteville for two or more semesters will not be allowed to receive a doctoral fellowship.

The Benjamin Franklin Lever Fellowship is designed to provide financial assistance to graduate students from under-represented groups and to provide a means by which the University can achieve greater diversity in the student body. To accomplish these purposes, the program funds a limited number of fellowships to qualified under-represented students who enroll in an on-campus program at the University of Arkansas, Fayetteville campus.

Contact the Graduate School, 346 N. Arkansas Ave., (479) 575-4401, for further information about the University Doctoral and the Benjamin Franklin Lever Fellowships.

Eligibility for Continuing Financial Aid

Graduate students are eligible for continuing financial aid through the Office of Financial Aid (e.g., student loans) if:

1. the student completes, with grades of “C” or better, 67 percent of graduate courses attempted at the University, and
2. the student has not yet completed more than 150 percent of the graduate credits required for his/her degree.

Students wishing to continue receiving financial aid who do not meet these requirements will petition the Student Aid Committee.

Academic Probation Policy for Graduate Students

While a regularly admitted graduate student earns a cumulative grade-point average below 2.85 on graded course work taken in residence for graduate credit, he/she will be warned of the possibility of academic dismissal. When a graduate student has accumulated a minimum of 15 hours of graded course work taken in residence for graduate credit with a cumulative grade-point average below 2.85 and has received at least one warning, he/she will be academically dismissed from the Graduate School. This policy is effective with students entering the Graduate School in Fall 2002, or later. For the policy in effect before this time, contact the Graduate School.

Graduate teaching and research assistants and students on Lever, Doctoral, or other Graduate School fellowships must maintain a CGPA of at least 2.85 on all course work taken for graduate credit. If a student’s CGPA falls below 2.85 on six or more hours of graduate work (one full-time semester), notification will be sent to the students and his/her department. If the CGPA is below 2.85 at the end of the next major semester (fall or spring), the department will not be allowed to appoint the student to an assistantship until such time as his/her CGPA has been raised to the required level.

Veteran Benefits
The University of Arkansas is approved by the Arkansas Department of Education for veterans and veterans' beneficiaries who are working toward a degree. Veterans of recent military service, service members, members of reserve units, and the dependents of certain other servicemen may be entitled to educational assistance payments under the following programs: Post 911, Title 38, Chapter 30, Montgomery GI Bill® for Veterans; Title 38, Chapter 32, Veterans Educational Assistance Program (VEAP); Title 38, Chapter 35, Survivors and Dependents Education; and Title 10, Chapter 106, Montgomery GI Selected Reserves.

All students must be working toward a degree and should follow the curriculum outline for their objectives since only specific courses may be applied toward VA certification and graduation. Persons eligible for educational benefits should contact the Office of the Registrar for information.

Waiver of Tuition and Fees for Senior Citizens
Arkansas residents who are 60 years of age or older and show proper proof of age may choose to have on-campus tuition and fees waived for on-campus courses under the senior citizen waiver of fees. Admission and enrollment under these conditions is open only on a “space available” basis in existing classes and students choosing to use this waiver may not register until just prior to the beginning of the term.

Room and Board
University Housing
(Rates are subject to change)

Housing for married students, students with family status, nontraditional, graduate, and law students is limited and requires early application.

Summer rates for room and board in university residence halls with unlimited meal plans for 2019 summer sessions are available through the Housing Office. Charges start on the requested move-in day and run through the date of check-out. Contact University Housing for information on meal plans 479-575-3951.

Specific questions concerning on-campus living may be directed to Residence Life and Dining Services 479-575-3951. Specific questions concerning sorority and fraternity living may be directed to the Office of Greek Affairs 479-575-4001.

Off-Campus Housing

Students eligible to live off-campus may contact local real estate offices for rental information or check offcampushousing.uark.edu (http://offcampushousing.uark.edu/).

Other General Fee Information
Checks tendered to the university are deposited immediately. The university does not accept postdated checks. Checks returned for “insufficient funds” (NSF checks) are generally presented for payment only once. Each check returned by a bank for any reason will be assessed a returned check fee. The university may, at its discretion, verify available bank funds for any checks written for payment of indebtedness before accepting a check.

The University of Arkansas reserves the right to withhold transcripts or priority registration privileges, to refuse registration, and to withhold diplomas for students or former students who have not fulfilled their financial obligations to the University. These services may also be denied

Requests for exceptions to the university’s fees, charges, and refund policies must be made in writing. Instructions for submitting requests for exceptions to the various fees, charges, and refund policies of the University may be obtained as follows:

- For residence life and dining services fees, charges, and refund policies contact Residence Life and Dining, Attention: Assistant Director for Business, Hotz Hall, Ninth Floor, (479) 575-3951.
- For parking services fees, charges, and refund policies contact: Parking and Transit, Administrative Services Building, 155 Razorback Road, (479) 575-3507.
- For all other fees, charges, and refunds, contact the Treasurer’s Office at 214 Arkansas Union, Attention: Treasurer.

Students receiving financial aid are strongly encouraged to have sufficient personal funds available to purchase books and to meet necessary expenses for at least one month at the start of school as some aid funds may not be available for disbursement.

Students are allowed to have automobiles at the university, although parking is quite limited. There is a parking permit and registration fee for each vehicle, varying in cost depending upon the parking option selected.

</thead>
<tbody>
<tr>
<td>FACILITIES FEE</td>
<td>Provides support dedicated specifically to campus facilities needs, including major projects and deferred maintenance.</td>
<td>$18.85</td>
</tr>
<tr>
<td>MEDIA FEE</td>
<td>The University’s student publications, specifically the Arkansas Traveler newspaper and the Razorback yearbook, are partially funded by the media fee. Students reserving a copy are provided with a Razorback yearbook.</td>
<td>$0.90</td>
</tr>
<tr>
<td>NETWORK INFRASTRUCTURE AND DATA SYSTEMS FEE</td>
<td>Provides support for the development and operation of the campus network, including electronic equipment, servers with software, and cabling. The network systems serve computer labs, academic and administrative buildings, residence halls and off-campus access facilities. Data systems will enable Web-based access to the University’s information systems for students, faculty, and staff. Also provides support for upgrades and replacement of the student information system.</td>
<td>$10.78</td>
</tr>
</tbody>
</table>
**STUDENT ACTIVITY FEE**  
Empowers the Associated Student Government (ASG) to make funding available to over 300 Registered Student Organizations and program activities on campus to develop lasting friendships and leadership abilities and provide all students with a unique opportunity to participate in cultural, social, educational, and recreational events throughout the year.  
$2.64

**STUDENT HEALTH FEE**  
Covers Wellness and Health Promotion educational programs and healthy student behavior programs to maintain health and safety. Covers individual consultations with a certified wellness coach, consultation with a Registered Dietitian and consultation with an Orthopedic Specialist from the community. Student Health Fee also provides students access to sexual assault counseling, prevention and advocacy services. The Student Health Fee also covers several mental health services, such as 24-hour mental health emergency care, the cost for two intake assessments with a mental health clinician per semester, most group counseling sessions, case management/referral services, psychiatric nurse consultations, refill requests and outreach/advocacy.  
$7.25

**TRANSIT FEE**  
Helps fund the Razorback Bus Transit System, which services the campus and neighboring community year round.  
$3.09

**LIBRARY FEE**  
Provides additional support for library materials acquisitions  
$2.91

* Assessed each academic semester for which the student is enrolled: fall, spring, and summer  
** Per Credit Hour

**Procedures for Professional Doctoral Degrees**

For procedures for the Doctor of Nursing Practice (p. 250) degree or the Occupational Therapy Doctor (p. 261) degree, refer to the specific program of study for degree requirements.

* Forms are available from the Graduate School website (http://grad.uark.edu/).
** Specific deadlines are available in the Graduate School
Objectives and Regulations

The Graduate School and International Education is the home for all graduate students and all international students, both graduate and undergraduate. Our vision, mission and goals encompass our dedication to the recruitment, admission, retention and graduation of students from Arkansas and across the U.S. and the world, as well as our service to the University of Arkansas. The Graduate School is an autonomous organizational unit, whose dean is responsible to the provost/vice chancellor for academic affairs. The mission statement and goals of the Graduate School may be found in the Graduate School Handbook, available at the Graduate School website (http://grad.uark.edu).

Vision
The Graduate School and International Education assists the University of Arkansas in excelling at research, teaching, training, and service while fostering student and scholar success and enhancing the overall student academic experience.

Mission
The Graduate School and International Education supports the strategic goals of the University of Arkansas to continue as a very high research university; recruits, retains and graduates high-caliber students; advocates for students and student success; facilitates intercultural and international experiences to increase global competencies; and assists in the development of international, interdisciplinary and graduate programs.

Honor Code for the Graduate School
The mission of the Graduate School is to provide post-baccalaureate students with the opportunity to further their educational goals through programs of study, teaching, and research in an environment that promotes freedom of expression, intellectual inquiry, and professional integrity. This mission is only possible when intellectual honesty and individual integrity are taken for granted.

The graduate student at the University of Arkansas is expected to know and abide by the university’s academic and research integrity policies. It is expected that graduate students will refrain from all acts of academic and research dishonesty and will furthermore report to the Graduate School any acts witnessed.

The pledge of the Honor Code is this: “On my honor as a graduate student at the University of Arkansas, I certify that I will neither give nor receive inappropriate assistance on the work I do for my degree.” Students will be asked to sign this pledge when they are admitted to the Graduate School. Faculty also may require students to sign this pledge before completing the requirements of a course or a program of study.

Registration and Related Topics
Students must register during one of the formal registration periods. Graduate students, new, returning, or currently enrolled, may register during the priority registration held each semester for the following semester. Students who have not already registered should register during the open registration session. For information on registration, consult the Schedule of Classes on the Registrar’s website (https://registrar.uark.edu/).

Enrollment Limits
Under ordinary circumstances, graduate registration is limited to 18 hours for any one semester in the fall or spring, including undergraduate courses and courses audited. Registration above 15 hours must be approved by the Graduate Dean. For registration in the summer, the enrollment limit is 12 hours without approval by the Graduate Dean.

Registration for Audit
When a student audits a course, that student must register for audit, pay the appropriate fees, and be admitted to class on a space-available basis. Students formally admitted to a degree program have priority for auditing a class. The instructor shall notify the student of the requirements for receiving the mark of “AU” for the course being audited. The instructor and the student’s dean may drop a student from a course being audited if the student is not satisfying the requirements specified by the instructor. The student is to be notified if this action is taken. The only grade or mark that can be given is “AU.” The Graduate School does not normally pay tuition for audited classes for students on assistantship.

Registration Out of Career
Students who wish to enroll in classes for credit outside of their career (e.g. graduate students who wish to enroll in undergraduate classes for undergraduate credit) should print the appropriate form from the Graduate School Web site (http://grad.uark.edu/) and return the form to the office indicated on the form. Students are not able to register themselves out of career. Graduate students taking undergraduate classes via the out-of-career registration form should be aware that those classes do not count toward their minimum number of hours required to receive financial aid. Undergraduate students who register for graduate courses out of career and subsequently are admitted to the Graduate School will not automatically be allowed to use those courses to fulfill requirements of their graduate degrees. See the policy on retroactive graduate credit.

Graduate Credit for 3000 and 4000-level Undergraduate Courses
Graduate students wishing to take 3000-level undergraduate courses for graduate credit will find the necessary forms on the Graduate School website. 3000-level courses can be taken by graduate students for graduate credit only when the courses are not in the student’s major area of study and when the courses have been approved by the Dean of the Graduate School for graduate credit. The instructor for the course must hold graduate faculty status and must certify that he/she will make appropriate adjustments in assignments and grading scales to raise the level of expectation for the student to the graduate level. No more than 20 percent of the graded course work in the degree program may be comprised of 3000-level courses carrying graduate credit. Undergraduate courses numbered below 3000 will not be allowed to carry graduate credit.

Students wishing to take 4000-level undergraduate courses for graduate credit will find the necessary forms on the Graduate School website (http://grad.uark.edu/). The instructor for the course must hold graduate faculty status and must certify that he/she will make appropriate adjustments in assignments and grading scales to raise the level of expectation for the student to the graduate level.

Students should be aware that a minimum of 50% of the semester hours presented for the graduate degree must be at the 5000 level or above and in the student’s field of study. Individual degree programs may have more stringent requirements.
Online Credit
Any student pursuing an on-campus (face-to-face) graduate degree from the University of Arkansas may take courses offered on-line or by distance, as long as the majority of credit hours presented for the degree are on-campus credit hours.

Proper Address of Students
All students are responsible for maintaining their addresses with the university and to report any change of address by update on the university’s student information system (https://uaccta.uark.edu). Failure to do so may result in undelivered grades, registration notices, invoices, invitations, or other official correspondence and announcements. It is also vitally important that students regularly check their university-assigned email account as many important notices will be sent by email.

Identification Cards
Identification cards are produced by the Campus Card Office during each registration period and at scheduled times and places during the year. Among other things, this card is used for identification as a member of the campus community, security access, enrollment verification, meal plan access and Razorback$ to purchase goods and services.

Adding and Dropping Courses
A currently enrolled student who has registered during the advance registration period should make any necessary or desired schedule adjustments such as adding or dropping courses or changing course sections during the schedule-adjustment period scheduled for the same semester. Students may also add or drop courses during the first five class days of the fall or spring semester. Students who drop classes by the end of the first week of classes in the fall and spring will have their fees adjusted. (Refer to the Treasurer’s website for summer dates.) Fee adjustments are not done for classes dropped after the first week of classes. Drops and withdrawals are two different functions. In a drop process the student remains enrolled. The result of the withdrawal process is that the student is no longer enrolled for the term. The two functions have different fee adjustment policies. Fee adjustment deadlines for official withdrawal are noted on the Treasurer’s website.

A student may drop a course during the first 10 class days of the fall or spring semester without having the drop shown on the official academic record. After the first 10 class days, and before the drop deadline of the semester, a student may drop a course, but a mark of “W,” indicating the drop, will be recorded. A student may not drop a full-semester course after the Friday of the tenth week of classes in a semester.

Drop-add deadlines for partial semester courses and summer classes are in the schedule of classes.

Withdrawal from Registration
Withdrawing from the University of Arkansas means withdrawing from all classes that have not been completed up to that time. A student who leaves the university voluntarily before the end of the semester or summer term must officially withdraw by logging onto the student information system and completing a brief online interview. Withdrawal must occur prior to the last class day of a semester. Students who do not withdraw officially from a class that they fail to complete will receive an “F” in that class.

Attendance
Students are expected to be diligent in the pursuit of their studies and in their class attendance. Students have the responsibility of making arrangements satisfactory to the instructor regarding all absences. Such arrangements should be made prior to the absence if possible. Policies of making up work missed as a result of absence are at the discretion of the instructor, and students should inform themselves at the beginning of each semester concerning the policies of their instructors.

Full-Time Status
Enrollment in nine semester hours (not including audited courses) is considered full-time for graduate students not on assistantship. For graduate assistants on 50 percent appointment or more, or on research fellowships, six semester hours (not including audited courses) of enrollment is considered full-time in the fall and spring semesters. Graduate assistants who are on a 50% appointment for a five-week summer term must earn at least three hours of graduate credit during the summer. However, these credits do not have to be earned in the same session as the appointment, and may be taken at any time during the summer. Tuition for graduate assistants on 50 percent appointments for a five-week summer term will be paid up to a maximum of 6 hours. Students not on graduate assistantships or fellowships must be enrolled in six hours (not including audited courses) to be full time in the summer.

Continuous Enrollment
After a doctoral student has passed the candidacy examinations, the student must register for at least one hour of graded graduate course credit or dissertation credit each semester and one hour during the summer session until the work is completed, whether the student is in residence or away from the campus. For each semester in which a student fails to register without prior approval of the Dean of the Graduate School, a registration of three hours may be required before the degree is granted. Please see the Graduate School Registration and Leave of Absence Policy.

Retroactive Graduate Credit
Degree Programs
Graduate students fully admitted into a degree program at the University of Arkansas may request that up to 12 hours of courses taken in the final 12-month period of their undergraduate degree count toward their graduate degree, if these courses were taken on the University of Arkansas, Fayetteville campus. These courses may not have been used for the undergraduate degree (unless the student is in a program where this has been approved by the Graduate Council), must be approved by the student’s advisory committee, and must be at the 5000 level or above. Petition will be by the student’s advisory committee or major professor to the Graduate School.

Sometimes students have completed their undergraduate degrees elsewhere, but have then taken course work as undergraduate students at the University of Arkansas after completing their undergraduate degree, but before being admitted to the Graduate School. Such students may request that up to six hours of courses taken for undergraduate credit in the final 12 months prior to admission to the Graduate School count toward their degrees. All of the rules stated in this policy are also applicable to this type of situation.

If the student’s advisory committee wishes to accept courses at the 4000 level toward the graduate degree, when those courses were taken in the last 12 months of a student’s undergraduate degree at the University of Arkansas, Fayetteville, the committee may petition the Graduate School. The petition must include an explanation of why the committee considers these courses to meet graduate degree requirements and expectations for graduate-level work. The instructors for these courses must have had
graduate faculty status, and these courses may not have been used for the undergraduate degree.

Courses at the 3000 level taken before the student is fully admitted to the Graduate School may not be used to fulfill graduate degree requirements.

Courses offered by institutions other than the University of Arkansas, Fayetteville, may not be counted toward the graduate degree requirements in this way.

Graduate Certificates

Graduate students fully admitted to a graduate certificate program are allowed to use six hours of credit to count for both an undergraduate degree and a graduate certificate. All requirements of this retroactive graduate credit policy will apply and a transcript notation will note that the courses may not be used to fulfill requirements for a graduate degree.

Use of Electronic Resources of the Library

The use of electronic resources of the University Libraries from a location outside of the library is only available to enrolled students. Students who are enrolled in the spring semester and have pre-registered for the succeeding fall semester may have access to these resources during the intervening summer. Students who are not required to be enrolled for other reasons, who are not pre-registered for the fall, and who wish to use the library resources during the summer must be enrolled in at least one hour of credit in any one of the summer sessions or be entered in the student affiliates table on UAConnect. Requests for affiliate status for graduate students must be sent from the major professor to the Graduate School.

The Research Council

The Research Council recommends policies to encourage research, establish a research environment, and provide research support facilities; serves as a review board for proposed research programs and facilities; recommends adjudication of variances to policies and procedures; supervises the approved policies; and addresses research misconduct cases at the direction of the Provost/Vice Chancellor for Academic Affairs. Membership consists of a faculty member active in research from: a) the Dale Bumpers College of Agricultural, Food and Life Sciences; b) the Sam M. Walton College of Business; c) the College of Education and Health Professions; d) the College of Engineering; and e) one from the science areas of the J. William Fulbright College of Arts and Sciences and f) one from another research area in the Fulbright College; g) non-voting, one student; h) ex officio and non-voting, the Director of Research and Sponsored Programs; and i) ex officio and non-voting, the Vice Provost for Research. A secretary (non-voting) will be provided by the Office of Research and Sponsored Programs.

Policies/Procedures for Use of Toxic Substances on Campus

The University of Arkansas is committed to the health and safety of its students, faculty, and staff. It is recognized that during their work for the university, some people will be involved in activities that require the use of substances or materials that are hazardous or toxic in nature. The Environmental Health and Safety unit of the physical plant has prepared the UAF Chemical Hygiene plan. This document addresses the safe use of toxic substances in laboratories. In addition, it defines the minimum acceptable standard safety practices for execution of laboratory work for both research and teaching. The chemical hygiene plan is available from the Office of Environmental Health and Safety (http://ehs.uark.edu/) and is the full statement of the UAF campus policy and procedures for handling toxic substances.

Travel Policy for Graduate Students

Graduate students who travel on university business must comply with the travel policies of the university. For those graduate students not on assistantships/fellowships, please see the university policy 332.4 (https://vcfa.uark.edu/policies/fayetteville/sade/3324.php).

Term Paper Assistance

The use of the services of term paper assistance companies is a violation of university policies on academic integrity. Student submission of such research or term papers to meet requirements of any class or degree program is expressly prohibited and constitutes academic dishonesty. Any violation of this prohibition will be dealt with as a violation of the academic integrity policy.

Academic Dismissal/Academic Probation

Students may be dropped from further study in the Graduate School if at any time their performance is considered unsatisfactory as determined by either the program faculty or the Dean of the Graduate School. Academic or research dishonesty and failure to maintain a specified cumulative grade-point average are considered to be unsatisfactory performance. See the Graduate Student Dismissal Policy, the Academic Probation Policy for Graduate Students, the university’s Academic Integrity Policy, and the Research and Scholarly Misconduct Policies and Procedures in this catalog.

Using its own written procedures, the graduate faculty of an academic degree program may recommend that the student be readmitted to the Graduate School after dismissal. Dismissed students with non-degree status may petition for readmission to the Graduate School by submitting a written appeal to the Dean of the Graduate School. The graduate faculty of any degree program may establish and state in writing requirements for continuation in that program.

Graduate Student Dismissal Policy

Graduate degree programs have the right to dismiss graduate students who do not make adequate academic progress or engage in illegal, fraudulent, or unethical behavior as defined in any of the university codes or policies pertaining to academic and research integrity. There may also be other unusual situations in which a student may be dismissed from a degree program. In each case, the dismissal should comply with the following procedures.

Lack of Adequate Academic Progress

Students may be dismissed per the academic probation policy of the Graduate School, and students should familiarize themselves with this policy. In addition, students who have not been placed on probation, but who are not making adequate academic progress, may also be dismissed. They must be warned in writing of the possibility of dismissal and will be given a clear statement about what must be done within a specified time period to alleviate the problem. A copy of this warning letter must be filed with the Graduate School. These expectations must be reasonable and consistent with expectations held for all students in the program. If the student does not meet the requirements within the time frame specified, he/she may be dismissed by the degree program with notification to the student and the Graduate School. Students dismissed in this way will not necessarily be dismissed by the Graduate School. Students may appeal this dismissal to the Graduate School, following the procedures outlined in the Graduate Student Grievance Policy. Students
who receive two consecutive unsatisfactory academic progress reports may be immediately dismissed by the degree program and the Graduate School.

**Academic or Research Misconduct/Illegal, Fraudulent, or Unethical Behavior**

For the process for dismissing students as a result of academic or research misconduct; or as a result of illegal, fraudulent, or unethical behavior, please see the “University of Arkansas Academic Integrity Policy,” the “Research and Scholarly Misconduct Policy and Procedures,” and the University of Arkansas Student Handbook.

**Other Situations**

Departments may dismiss students for situations other than those specified above. When doing so, the department must notify the student in writing of the possibility of dismissal and send a copy of this letter to the Graduate School. If it is possible for the student to rectify the situation, he/she must be given a clear statement about what must be done within a specified time period to alleviate the problem. These expectations must be reasonable and consistent with expectations held for all students in the program. If the student does not meet the requirements within the time frame specified, he/she may be dismissed by the degree program with notification to the student and the Graduate School. Students dismissed in this way will not necessarily be dismissed by the Graduate School.

If the situation cannot be rectified, the student will be notified in writing of the grounds for dismissal and the date when the dismissal will be effective. This will normally be the end of the semester in which the student is enrolled, but the circumstances of the dismissal will be important in determining this date.

If students feel that there has been a violation of university policy in their dismissal, they may appeal to the Graduate School, following the procedures outlined in the Graduate Student Grievance Policy.

**Academic Probation Policy for Graduate Students**

Whenever a regularly admitted graduate student earns a cumulative grade-point average below 2.85 on graded course work taken in residence for graduate credit, he/she will be warned of the possibility of academic dismissal. When a graduate student has accumulated a minimum of 15 hours of graded course work taken in residence for graduate credit with a cumulative grade-point average below 2.85, and has received at least one warning, he/she will be academically dismissed from the Graduate School. This policy is effective with students entering the Graduate School in Fall 2002 or after. For the policy in effect before that time, contact the Graduate School. If a student is originally admitted prior to Fall 2002, but does not maintain registration and applies for readmission after Fall 2002, the current policy will apply. The student’s degree program may request that the academic warning period be extended if the program can offer extenuating circumstances as a rationale and is willing to provide a plan of remediation for the student’s success.

Graduate teaching and research assistants and students on Lever, Doctoral, Chancellor, Walton or other fellowships must maintain a cumulative grade-point average of at least 2.85 on all course work taken for graduate credit. If a student’s cumulative GPA falls below 2.85 on 6 or more hours of graduate work (one full-time semester), notification will be sent to the student and his/her department. If the CGPA is below 2.85 at the end of the next major semester (fall or spring), the department will not be allowed to appoint the student to an assistantship/fellowship until such time as his/her CGPA has been raised to the required level. Note: Individual degree programs may have more stringent requirements.

The Graduate School calculates the cumulative grade-point average on all courses taken for graduate credit at the University of Arkansas. Individual degree programs have the option to calculate the cumulative grade-point average only for those graduate courses taken in residence for the current degree. Consequently, individual degree programs may academically dismiss students whose cumulative grade point average on all graduate course work is above 2.85, but whose work for the current degree is below 2.85. If a program adopts this alternative policy, it must be so stated in the departmental graduate student handbook and in the Graduate Catalog and must apply to all graduate students in that program. When the program anticipates dismissing a student whose cumulative grade-point average is above 2.85, the program must notify the student, using the same process as specified in the general probation policy and must also notify the Graduate School. This policy is effective Fall 2003.

**Annual Notice of Student Rights Under the Family Educational Rights and Privacy Act (FERPA)**

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are as follows:

1. The right to inspect and review the student’s education records, with some exceptions under the Act, within 45 days of the day the university receives a request for access. Students should submit to the Office of the Registrar written requests that identify the record(s) they wish to inspect. The university official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the university official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading. Students should write the university official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. A sample form, which may be used in making this request, is contained in the appendix to UA Systemwide Policies and Procedures 515.1 (http://www.uasys.edu/policies/ua-system-policies/).

If the university decides not to amend the record as requested by the student, the university will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing and is also contained in UA Systemwide Policies and Procedures 515.1 (http://www.uasys.edu/policies/ua-system-policies/).

3. The right to withhold consent of disclosure of directory information, defined as the following information: the student’s name; address; telephone number; email address; major field of study; classification by year; number of hours in which enrolled and number completed; participation in officially recognized activities and sports; weight and height of members of athletic teams; dates of attendance including withdrawal dates; degrees, scholarships, honors, and awards received, including type and date granted; and photograph.
This information will be subject to public disclosure unless the student restricts such information through the appropriate settings in UAConnect, the student information system, or informs the Office of the Registrar in writing that he or she does not want this information designated as directory information.

4. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

One exception, which permits disclosure without consent, is disclosure to school officials with legitimate educational interests. A school official is a person employed by the university in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the university has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an educational record to fulfill his or her professional responsibility. Upon request, the university also discloses education records without consent to officials for another school in which a student seeks or intends to enroll.

Postsecondary institutions may also disclose personally identifiable information from education records, without consent, to appropriate parties, including parents of an eligible student, in connection with a health or safety emergency. Under this provision, colleges and universities may notify parents when there is a health or safety emergency. Under this provision, colleges and universities may notify parents when there is a health or safety emergency involving their son or daughter, even if the parents do not claim the student as a dependent.

There are several other exceptions to FERPA’s prohibition against non-consensual disclosure of personally identifiable information from education records, some of which are briefly mentioned below. Under certain conditions (specified in the FERPA regulations), a school may non-consensually disclose personally identifiable information from education records:

- to authorized representatives of the Comptroller General of the United States, the Attorney General of the United States, the U.S. Secretary of Education, and State and local educational authorities for audit or evaluation of Federal or State supported education programs, or for the enforcement of or compliance with Federal legal requirements that relate to those programs;
- to the National Student Clearinghouse for enrollment and degree reporting;
- to organizations conducting studies for or on behalf of the school making the disclosure for the purposes of administering predictive tests, administering student aid programs, or improving instruction;
- to officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student’s enrollment or transfer;
- to comply with a judicial order or a lawfully issued subpoena;
- to the victim of an alleged perpetrator of a crime of violence or a non-forcible sex offense concerning the final results of a disciplinary hearing with respect to the alleged crime; and
- to any third party the final results of a disciplinary proceeding related to a crime of violence or non-forcible sex offense if the student who is the alleged perpetrator is found to have violated the school’s rules or policies. The disclosure of the final results only includes: the name of the alleged perpetrator, the violation committed, and any sanction imposed against the alleged perpetrator. The disclosure must not include the name of any other student, including a victim or witness, without the written consent of that other student.

5. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the university to comply with the requirements of FERPA. The name and address of the office that administers FERPA is as follows:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington DC 20202-4605

6. UA System Policy and Procedure 515.1 (http://www.uasys.edu/policies/ua-system-policies/) serves as a supplement to the campus FERPA policy.

7. FERPA applies to students at the University of Arkansas at the point of their enrollment into courses.

Photographic and Video Images

The university is proud to publish and display photographic and video images of U of A students, their activities and accomplishments. Any student who does not wish to be represented in such photographic and video images by the university should choose to withhold photos on the FERPA option on the university's student information system.

Annual Graduate Student Academic Review

It will be a policy of the Graduate Council that every master’s, specialist, and doctoral student will be reviewed annually by his/her degree program for progress toward the degree. At a minimum, the review will cover progress in the following: a) completing courses with an adequate grade-point average; b) completing the thesis/dissertation/project requirements; c) completing all of the required examinations; d) completing other requirements for the degree. When the review of each student is completed, the review form will be signed by the graduate student and the department/program head/chair, as well as other appropriate individuals as designated in the program review policy. This review will be forwarded to the Graduate School, to be included in the student’s file. If a student receives two consecutive reviews indicating that the student is not making adequate academic progress, the program and the Graduate School have the option to dismiss the student.

Graduate School Registration and Leave of Absence Policy

All doctoral students who have been admitted to candidacy must enroll in a minimum of one hour of course or dissertation credit every semester (fall, spring) until they graduate. Under unusual circumstances, this enrollment requirement may be waived for post-candidacy doctoral students for up to two years, with an approved request for a leave of absence. To request a leave of absence, the student’s major professor must petition the Graduate Dean, specifying the circumstances that make it necessary for the student to interrupt his/her studies. While a decision will be made on a case-by-case basis, circumstances that might be considered include serious illness of the student or his/her immediate family, serious personal problems, or job-related issues. While the student is on an approved leave of absence, he/she cannot use any university resources, such as the library or faculty time. A post-candidacy doctoral
student who takes an unauthorized break in registration by failing to maintain continuous enrollment or failing to obtain a leave of absence will no longer be considered a graduate student at the University of Arkansas. Students who wish to be reinstated will be required to file an Application for Readmission (no fee) and may be required to register for three graduate credits for each term of unauthorized break in registration. In the case of extraordinarily extenuating circumstances, students may appeal the provisions of this policy and request additional terms of leave of absence or forgiveness of the additional credits of registration. Such an appeal must be made to the Graduate Dean.

The student should be aware that the leave of absence policy does not waive the time requirements for a degree. A separate petition must be made for a time extension, if required. Also, a request for leave of absence may not be made for the semester in which the student graduates.

Time Extension
It is a requirement of the Graduate School that certificate, master’s and specialist students complete their degrees within six consecutive calendar years from the date of the first courses used to fulfill requirements for the degree and doctoral students complete the degree within seven consecutive calendar years from the semester in which the student was first admitted to the program. Requests to extend these time requirements must be reviewed and approved by the Graduate Dean, following these procedures:

1. The student’s major adviser will fill out a “Request for Time Extension” form (available on the Web site of the Graduate School) and submit this to the Graduate School.

2. For both master’s and doctoral students, the central consideration in determining whether more time can be allowed is whether the student’s knowledge of the subject matter is current at the time of graduation. Therefore, as part of the request for time extension, the major adviser will be asked to explain how this will be ensured:
   - For the certificate and master’s degree, the student’s knowledge of any course work over six years old at the time of graduation must be recertified. Please see “Recertification of Student’s Knowledge of Course Content,” below.
   - For the doctoral degree, recertification of the student’s knowledge of course work is not necessary, but the major adviser must explain how the currency of the student’s knowledge of the field will be assessed prior to graduation.

3. Requests for time extension are allowed only for course work taken at the University of Arkansas (Fayetteville). We do not allow time extensions on transfer credit.

Recertification of Student’s Knowledge of Course Content: The major adviser must specify how recertification of the student’s knowledge of course content will occur. By recertification, we mean that the student’s knowledge of the subject matter included in the course is determined to be current at the time of graduation and that the content of that course is still current. There are several ways this may be demonstrated. Examples include: The student is teaching the subject matter in a separate context; the student will be examined by the current instructor of the course to determine his/her currency of knowledge; the student will be examined on the subject matter during his/her final oral defense of the thesis or during the comprehensive exam. It is not acceptable to say only that the content of the course has not changed in the time since the student was enrolled, as the student’s knowledge of that content is also critical. Courses taken more than 10 years prior to the conferral of the degree will normally not be eligible for recertification.

Administrative Requirement for Graduation
Application for graduation must be completed through the Student Homepage in UAConnect and fees paid by the appropriate deadline in the semester in which degree requirements will be completed and graduation effected. Instructions for applying to graduate can be found at registrar.uark.edu (https://registrar.uark.edu). If a student fails to complete the degree, the student must then renew the application by contacting the Registrar’s Office. It will not be possible for a student to be cleared to graduate for a previous semester.

Students should be aware that FERPA restrictions on disclosing personally identifiable information may prevent their names being printed in the commencement program and/or being engraved on the sidewalk. Students can change their privacy settings on their Student Homepage in UAConnect. Questions about this should be directed to the Office of the Registrar.

Degrees Offered
The faculty of the Graduate School, under the authorization of the Board of Trustees, grants the degrees listed below. In addition, the Graduate School offers several non-degree graduate certificates. The graduate faculty, as represented by the Dean of the Graduate School and through the Graduate Council, has primary responsibility for the development, operating policies, administration, and quality of these programs. Operating through the Graduate Dean, the faculty appoints committees that directly supervise the student’s program of study and committees that monitor research activities and approve theses and dissertations.

- Doctor of Philosophy
- Doctor of Nursing Practice
- Doctor of Occupational Therapy
- Doctor of Education
- Educational Specialist
- Master of Accountancy
- Master of Athletic Training
- Master of Arts
- Master of Arts in Teaching
- Master of Business Administration
- Master of Design Studies
- Master of Education
- Master of Fine Arts
- Master of Information Systems
- Master of Music
- Master of Public Administration
- Master of Public Service (Clinton School)
- Master of Science
- Master of Science in Biological Engineering
- Master of Science in Biomedical Engineering
- Master of Science in Chemical Engineering
- Master of Science in Civil Engineering
- Master of Science in Computer Engineering
- Master of Science in Computer Science
- Master of Science in Electrical Engineering
• Master of Science in Engineering
• Master of Science in Environmental Engineering
• Master of Science in Industrial Engineering
• Master of Science in Mechanical Engineering
• Master of Science in Nursing
• Master of Science in Operations Management
• Master of Social Work

Graduate Certificates (Non-degree)
As defined by the Arkansas Department of Higher Education, graduate certificate programs consist of 12 to 18 hours of required course work in a focused area of study. The awarding of the certificate will be shown on the student’s transcript. Students must meet the admission requirements of the Graduate School and the certificate program. Students who enter a graduate certificate program may use up to six hours of course work taken previously at the University of Arkansas and may use up to six hours of course work taken at another accredited university to meet certificate requirements, with approval of the program faculty and the Graduate School. The Graduate School does not impose a limit on the number of hours that may be shared between graduate certificate programs, but a limit may be set by the program. Students who enter a graduate certificate program must complete all certificate requirements within six years of admission to the program. For students who have been admitted to both a degree program and a certificate program, courses taken to meet the requirements of one may also be used to meet the requirements of the other, at the discretion of the program and the student’s Advisory Committee.

Graduate Certificates are offered in the following areas:

- Advanced Instrumental Performance (p. 238)
- African and African American Studies (p. 351)
- Applied Behavior Analysis (p. 326)
- Arkansas Curriculum/Program Administrator (p. 149)
- Autism Spectrum Disorders (p. 326)
- Building-Level Administration (p. 149)
- Bioenergy and Sustainability Technology (p. 61)
- Business (p. 390)
- Business Law (p. 353)
- Criminal Law (p. 355)
- Cross-Sector Alliances (p. 356)
- District-Level Administration (p. 149)
- Educational Measurement (p. 358)
- Educational Program Evaluation (p. 358)
- Educational Psychology (p. 358)
- Educational Statistics & Research Methods (p. 358)
- Enterprise Systems (p. 401)
- Entrepreneurship (p. 390)
- Geospatial Technologies (p. 181)
- Project Management (p. 364)
- STEM Education for Early Childhood (p. 365)
- Sustainability (p. 365)
- Technical Writing and Public Rhetorics (p. 164)

Master of Arts, Master of Science
General minimum requirements of the Graduate School follow for the degrees of Master of Arts, Master of Science – including the several engineering degrees – and Master of Fine Arts. Program requirements may be higher. Note: For degree requirements in the Master of Arts in Economics, see the Graduate School of Business.

1. 24 graduate semester hours and a thesis, or 30 semester hours without a thesis. (The thesis may be a departmental requirement or may be required by the major adviser.)
2. A comprehensive examination.
3. A minimum cumulative grade-point average of 2.85. (Individual departments may have higher grade standards.)
4. Minimum residence of 24 weeks. (See Residence Requirements.)

Program of Study. At the time of admission to the Graduate School and acceptance in a program of study leading to a graduate degree, the student is assigned to a major adviser. The choice of a major adviser is largely determined by the student’s choice of a major subject.

The program of study may consist of courses chosen from one department or it may include such cognate courses from other departments as may in individual instances seem to offer greater immediate and permanent value. As a general principle, two-thirds of the courses come from the degree program in which the student is seeking a graduate degree. The program of study must be approved by the student’s Advisory Committee or, depending on program requirements, the Thesis Committee. No more than six hours of special problems (individual study) courses may count toward a 30 hour master’s degree.

A student who writes a master’s thesis must register for a minimum of six semester hours of master’s thesis. No more than six semester hours of master’s thesis enrollment may be given credit in the degree program.

Students wishing to take 3000-level undergraduate courses for graduate credit will find the necessary forms on the Graduate School website (http://grad.uark.edu/). Courses numbered at the 3000 level may be taken by graduate students for graduate credit only when the courses are not in the student’s major area of study and when the courses have been approved by the Dean of the Graduate School for graduate credit. The instructor for the course must hold graduate faculty status and must certify that he/she will make appropriate adjustments in assignments and grading scales to raise the level of expectation for the student to the graduate level. No more than 20 percent of the graded course work in the degree program may be comprised of 3000-level courses carrying graduate credit. Undergraduate courses numbered below 3000 will not be allowed to carry graduate credit.

Students wishing to take 4000-level undergraduate courses for graduate credit will find the necessary forms on the Graduate School website (http://grad.uark.edu/). The instructor for the course must hold graduate faculty status and must certify that he/she will make appropriate adjustments in assignments and grading scales to raise the level of expectation for the student to the graduate level.

Under ordinary circumstances graduate registration is limited to 18 hours for any one semester including undergraduate courses and courses audited. Registration above 15 hours must be approved by the Graduate Dean.

All requirements for a master’s degree must be satisfied within six consecutive calendar years from the first semester of enrollment in the program.

Transfer of Credit. The University of Arkansas will permit a student to transfer six hours of graduate credit from an accredited graduate school in the United States as part of the master’s program, provided that the
Transfer of Credit Regulations Established by the Graduate School for the Various Master’s Degrees:

Transfer of Credit is permissible for master’s programs only. Transfer of credit is not acceptable for doctoral degrees. For doctoral candidates, at the discretion of the advisory committee, the program of study may be adjusted in lieu of work taken at other colleges or universities and recognized by the candidate’s committee, but it will not appear on the University of Arkansas academic record.

Criteria for Acceptable Transfer Credit:

1. The course must have been regularly offered by a regionally accredited graduate school.
2. The course must have been a bona fide graduate level course, approved for graduate credit and taught by a member of the graduate faculty.
3. The student desiring to transfer graduate credit must have been enrolled as a graduate student in the graduate school at the institution offering the course.
4. The course must appear on an official transcript as graduate credit from the institution offering the course.
5. The course grade must be a “B” or “A.” (The student’s grade-point average is NOT to include grades on transfer courses.)
6. The course must be recommended by the student’s major adviser and be applicable to the degree requirement at the University of Arkansas.
7. The course must not have been taken as a self-paced online (correspondence) course or for extension credit.
8. The course must be acceptable to the department concerned and to the Graduate Dean.
9. The student must have satisfied the 24-week residence requirements. (The student must have satisfactorily completed a total of 24 hours of graded graduate course work taken in residence.)
10. The course must have been taken within the time limit of the student’s program at the University of Arkansas.
11. Credit from foreign universities is typically not acceptable for transfer because of academic and procedural differences between U.S. regionally accredited and foreign institutions, but petition may be made to the Graduate Dean on a case by case basis.

Note: Graduate credit cannot be transferred to satisfy any of the requirements for the M.B.A. degree unless the school at which the course was taken is accredited by A.A.C.S.B. This requirement is not specified by the Graduate School, but by the Graduate School of Business.

Ex Officio Committee Members: Student committees may contain ex officio members who have graduate faculty status on the University of Arkansas campus. However, when a person does not hold graduate faculty status on the University of Arkansas campus, he/she may still be allowed to hold an ex officio position on a student’s committee, in accordance with the following policy: When a committee member does not hold graduate faculty status at the University of Arkansas, he/she will be allowed to serve on a student’s master’s thesis or doctoral dissertation committee, in addition to the minimum number of members required by the Graduate School or the department/program. The ex officio member will be allowed to sign the thesis or dissertation and his/her vote will be recorded but will not be binding for conferring the degree. This use of the term ex officio will indicate that the person does not hold graduate faculty status at the University of Arkansas and is serving in an honorary role.

Conflict of Interest Policies for Graduate Committees: Students should be aware that the Graduate School has policies pertaining to the composition of advisory and thesis committees. These may be found in the Graduate Student Handbook on the Graduate School website.

Residence Requirements. The candidate must present a minimum of 24 weeks of course hours taken in residence at the University of Arkansas, Fayetteville. A total of 12 hours of residence may be accredited from University of Arkansas off-campus graduate courses (restriction does not apply to graduate degree programs offered through the Graduate Residence Centers, see page 21) or for work done in off-campus classes held in Fayetteville. Acceptance of transferred credit does not reduce the minimum residence requirement of 24 weeks of course hours taken on the University of Arkansas, Fayetteville, campus or through approved University of Arkansas, Fayetteville, distance courses.

Thesis. The title of the thesis must be recommended by the thesis director and the thesis committee and be approved by the Dean of the Graduate School at least three months before the date of the comprehensive examination. The thesis must be submitted for approval to the thesis committee consisting of a minimum of three faculty members who have been approved by the Dean of the Graduate School. This committee must receive the thesis in time for the student to defend the thesis and submit it to the Graduate School by the posted deadline date. In the situation when there is a split decision among committee members of a master’s program advisory or thesis committee, majority rules. For instructions on submitting an approved thesis, students should consult the Graduate School’s Guide to Preparing Theses and Dissertations. Students will be required to submit their theses to University Microfilms Incorporated (UMI/ProQuest). There will be an additional charge for this submission.

Comprehensive Examination/Thesis Defense. In addition to completing other requirements, the candidate for a master’s degree must take a comprehensive examination, which may be oral and/or written as recommended by the major department. If the student has completed a thesis, the final defense of the thesis must be oral. This can substitute for the comprehensive examination, if the department so chooses. If the final defense of the thesis substitutes for the comprehensive examination, the examination may include other aspects of the candidate’s graduate work. All members of the thesis committee (and advisory committee, if the thesis defense substitutes for the comprehensive examination) must participate in the thesis defense unless the Dean of the Graduate School has approved an exception. If a committee member does not participate in the final oral defense, that person will be asked by the Graduate School to resign from the committee. While this examination is typically not open to the public (unlike the doctoral dissertation defense), the student’s committee chair may, with the approval of the student, open the defense to selected members of the public. Questions from the public are at the discretion of the committee chair. The chair will insure that questions from the public are appropriate by disallowing those which are not.

Students may elect to participate by distance through electronic means in their final oral defense of the thesis, if approved by the thesis faculty.
director. In advance of the final oral defense, the student must provide to the Graduate School a written, signed statement that he/she has elected this option.

**Grade-Point Average.** To receive a master’s degree, a candidate must present a minimum cumulative grade-point average of 2.85 on all graduate courses required for the degree, unless the department requires a higher grade point average. Failing to earn such an average on the minimum number of hours, the student is permitted to present up to six additional hours of graduate credit to accumulate a grade-point average of 2.85. In the computation of grade point, all courses pursued at this institution for graduate credit (including any repeated courses) shall be considered. Students who repeat a course in an endeavor to raise their grade must count the repetition toward the maximum of six additional hours. Students should also be aware that they may not use for degree credit any course in which they received a grade of D or F. Individual departments may have higher grade standards.

**Split Decisions among Advisory and Thesis Committees.** When a split decision occurs among committee members of a master’s advisory or thesis committee, the majority decision will hold.

**Sharing Courses Between Two Degrees.** When a student earns two master’s degrees, no more than six hours of course work may be used to satisfy the requirements of both degrees, i.e. shared between the degrees. This rule pertains whether the course work is taken on the University of Arkansas campus or is transferred from another university.

**Master of Accountancy**
See the accounting program in the Graduate School of Business (p. 367).

**Master of Arts in Teaching**
See the Elementary Education (p. 159) program or the Teacher Education (p. 338) program.

**Master of Business Administration**
See the Graduate School of Business (p. 367).

**Master of Design Studies**
See the Master of Design Studies (p. 144) program.

**Master of Education**
See the Curriculum and Instruction (p. 134) program.

**Master of Fine Arts in Art**
See the Art program (p. 70).

**Master of Fine Arts in Creative Writing**
See the Creative Writing program (p. 130).

**Master of Fine Arts in Theatre**
See the Theatre program (p. 341).

**Other Requirements for M.F.A. Degrees**
The policies and procedures approved for the Master of Arts and the Master of Science degrees also apply to the Master of Fine Arts degrees. In addition to completing other requirements, the candidate must pass a comprehensive examination administered by the respective program area.

**Master of Information Systems**
See the Graduate School of Business (p. 367).

**Master of Public Service**
See the Clinton School of Public Service (p. 103).

**Master of Science in Computer Science**
See the Computer Science program (p. 120).

**Master of Science in Nursing**
See the Nursing program (p. 250).

**Master of Social Work**
See the Social Work program (p. 315).

**Education Specialist Degree**
The Educational Specialist degree (Ed.S.) has two areas of specialization – curriculum and instruction, and educational leadership – and may be issued by the Graduate School to those students whose major objective is to develop educational competency in one of these specialized areas. All graduate courses applicable to this degree must be taken on the Fayetteville campus unless otherwise specified.

All requirements for the Educational Specialist degree with specialization in educational leadership may be completed at the Graduate Resident Centers in the University of Arkansas at Pine Bluff, University of Arkansas Community College at Hope, and Phillips Community College of the University of Arkansas at Helena.

**Admission to the Program.** Admission to the Educational Specialist degree program is based on the total profile of the applicants' educational background and their career objectives. After students have been admitted to the Graduate School, they may seek acceptance in one of the program areas of specialization. All students seeking admission must meet the following admission criteria:

1. Completed a master’s degree or its equivalent in a related field.
2. Presented a Graduate Record Examinations general score on three parts (verbal, quantitative, and analytical) or a Miller Analogies Test score. These scores are considered as part of the applicant’s profile. Required scores may vary within given programs.
3. Attained a cumulative grade-point average of at least 3.25 on all graduate course work before being admitted into the Specialist program.
4. Students with a 3.00 to 3.25 cumulative grade-point average in all graduate courses must present a combined minimum Graduate Record Examinations general score of 1300 on three parts (verbal, quantitative, and analytical) or 55 on the Miller Analogies Test.
5. Two years of successful professional experience, or equivalent, in an area related to the student’s academic goals prior to the completion of the degree.
6. A minimum of three letters of recommendation from individuals capable of commenting on qualification for graduate study.
7. A personal interview with the program area graduate faculty. This evaluative process will subjectively measure factors such as poise, professional objectives, professional commitment, and ability to discuss professional problems.

**General Requirements.** All Ed.S. programs contain a minimum of 30 semester hours of graduate work beyond the master’s degree in
a planned program. The program for each student must include the requirements specified in the particular program to which the student has been accepted; assessed deficiencies in the area of specialization; assessed courses to meet current professional requirements of the Master of Education degree; a minimum of nine semester hours of graduate work in a related field(s) other than the area of specialization; a graduate course in research, statistics, or data processing applicable for educational specialists; and an original project, research paper, or report for which variable credit up to six semester hours is required. A grade-point average of 3.25 is required for the Ed.S. degree program on all work presented as part of the Ed.S. degree program.

After a student is accepted into an Ed.S. program, a committee with a minimum of three members will be appointed, and a program of study will be established outlining the minimum requirements. Only the adviser and one other member of the student’s committee may be from the program area sponsoring the program. The committee’s responsibilities include the determination of deficiencies, the acceptability of previous graduate work, the approval of the candidate’s program of study, the approval of the original project or research paper, and the conduct of a final examination. This examination will be a comprehensive oral evaluation scheduled near the end of the candidate’s program and will include one or both of the following: 1) evaluation of the original project, research paper, or report, and 2) evaluation covering material related to the background and professional preparation of the candidate. A written examination may not be taken to substitute for the oral examination. A written account of the original project, research paper, or report will be filed with the program area sponsoring the candidate’s program of study.

The last 30 hours of the program must be completed within a period of six years from the first semester of admission to the program. A minimum of 30 weeks of resident study at the University of Arkansas, Fayetteville, in an approved program is required. Credit earned in any University of Arkansas center, off-campus workshop or special course will not count as residence study in the Ed.S. program. The only exception is course work completed at the University of Arkansas at Pine Bluff Graduate Resident Center by students pursuing the Ed.S. degree in education with a specialization in educational leadership; the University of Arkansas Community College at Hope Graduate Resident Center and Phillips Community College of the University of Arkansas at Helena Graduate Resident Center by students pursuing the Ed.S. degree in education with a specialization in educational leadership.

Upon completion of all requirements, candidates are issued an Educational Specialist degree. Their names appear on the commencement program, but there is no distinctive academic regalia in connection with the Educational Specialist degree.

**Doctor of Occupational Therapy (O.T.D.)**

See the Clinical Occupational Therapy (p. 261) program.

**Doctors of Philosophy (Ph.D.) and Education (Ed.D.)**

Programs of advanced study leading to the degree of Doctor of Philosophy (Ph.D.) and Doctor of Education (Ed.D.) are offered in adult and lifelong earning, educational leadership, higher education, recreation and sport management, and human resource and workforce development education.

The degrees of Doctor of Philosophy and Doctor of Education are awarded in recognition of high scholarly attainment as evidenced by a period of successful advanced study with at least a 3.0 cumulative graduate grade-point average (2.85 for those students admitted to the Graduate School prior to Fall 2001), the satisfactory completion of certain prescribed examinations, and the development of a dissertation covering some significant aspect of a major field of learning.

Students who wish to become candidates for the degree of Doctor of Philosophy or Doctor of Education are expected to complete work equivalent to the requirements for the master’s degree as determined by program faculty and must apply to be admitted to the Graduate School and the specific program of study. A student cannot satisfy any part of the residence requirement for the doctoral degree until after he/she has been officially admitted to the doctoral degree program.

Immediately after admission to the program, with the approval of the Dean of the Graduate School, a Doctoral Program Advisory Committee will be appointed from the graduate faculty to evaluate the student’s preparation and fitness for further graduate work. This committee will serve in an advisory capacity in working out and directing a suitable program of advanced study and investigation. The student’s major adviser shall serve as chair of the committee. Appointment of this committee does not constitute admission to candidacy for the degree of Doctor of Philosophy or Doctor of Education, a very important and significant step in the student’s graduate career, which must be taken after the student has completed approximately two years of graduate work beyond the baccalaureate degree.

The degree must be completed within seven consecutive calendar years from the first semester of admission to the program.

**Program of Study.** The objectives of the program of study leading to the degree of Doctor of Philosophy or Doctor of Education shall be scholarly achievement of high order and the development of a fundamental understanding of the major field and its relation to supporting fields of knowledge, rather than the satisfactory completion of a certain number of credit hours. The nature of the program of study will vary somewhat, depending upon the major field of study and the objective of the prospective candidate.

**Ex Officio Committee Members:** Student committees may contain ex officio members who have graduate faculty status on the University of Arkansas campus. However, when a person does not hold graduate faculty status on the University of Arkansas campus, he/she may still be allowed to hold an ex officio position on a student’s committee, in accordance with the following policy:

When a committee member does not hold graduate faculty status at the University of Arkansas, he/she will be allowed to serve on a student’s master’s thesis or doctoral dissertation committee, in addition to the minimum number of members required by the Graduate School or the department/program. The ex officio member will be allowed to sign the thesis or dissertation and his/her vote will be recorded but will not be binding for conferring the degree. This use of the term ex officio will
Each doctoral candidate must register for a minimum of 18 hours of doctoral dissertation. After the student has passed the candidacy examinations, the student must register for at least one hour of dissertation (or graded course work) each semester and one hour during the summer session until the work is completed, whether the student is in residence or away from the campus. Before the final degree is conferred, registration will be assessed for each semester in which a student fails to register without prior approval of the Dean of the Graduate School.

The dissertation must be submitted for approval to the dissertation committee consisting of a minimum of three faculty members who have been approved by the Dean of the Graduate School. This committee must receive the dissertation in time for the student to defend the dissertation and submit it to the Graduate School by the posted deadline date. For instructions on submitting an approved dissertation, students should consult the Graduate School’s Guide to Preparing Theses and Dissertations. Students will be required to submit their dissertations to University Microfilms Incorporated (UMI/ProQuest).

**Final Examination.** The candidate’s final examination for the degree of Doctor of Philosophy or Doctor of Education will be oral. At least two weeks in advance, the major adviser will forward to the Dean of the Graduate School notification about the date, time and place of the final oral examination. The examination will be primarily concerned with the field of the dissertation, but may also include other aspects of the candidate’s graduate work. The doctoral dissertation committee is responsible for insuring that the dissertation contributes new knowledge of fundamental importance or significantly modifies, amplifies, or interprets existing knowledge in a new and important manner. All members of the dissertation committee must participate in the final oral defense of the dissertation unless the Dean of the Graduate School has approved an exception. This participation may be by distance. If they do not participate in the final oral defense, in person or by distance, they will be asked by the Graduate School to resign from the committee. While this examination is open to the public, the exam is controlled by the student’s committee chair. Questions from the public are at the discretion of the committee chair. If the committee chair expects to allow questions from the public, the student must be so advised. The chair will insure that questions from the public are appropriate by disallowing those which are not.

Students may elect to participate by distance through electronic means in their final oral defense of the dissertation, if approved by the dissertation faculty director. In advance of the final oral defense, the student must provide to the Graduate School a written, signed statement that he/she has elected this option.

**Split Decisions Within Advisory and Dissertation Committees.** In the situation when there is a split decision among committee members of a doctoral program advisory or dissertation committee, the situation must be resolved to the satisfaction of each committee member. In the event that each committee member is not satisfied, the committee member may insist on the necessary steps to reach a resolution or elect to step down from the committee. In unusual circumstances, the Dean of the Graduate School may remove a faculty member from a student’s thesis/dissertation or advisory committee, or make an alternative arrangement (e.g., assign a representative from the Graduate faculty to serve on the committee).

**Academic Integrity**

As a core part of its mission, the University of Arkansas provides students with the opportunity to further their educational goals through programs of study and research in an environment that promotes freedom of inquiry and academic responsibility. Accomplishing this mission is only possible when intellectual honesty and individual integrity prevail. Each University
of Arkansas student is required to be familiar with and abide by the university's Academic Integrity Policy (http://honesty.uark.edu/policy/) at honesty.uark.edu (http://honesty.uark.edu). Students with questions about how these policies apply to a particular course or assignment should immediately contact their instructor.

Grades and Marks

Final grades for courses are "A," "B," "C," "D," and "F" (except for courses taken in the Bumpers College of Agricultural, Food, and Life Sciences or the Fay Jones School of Architecture and Design, which both use a plus/minus system). No credit is earned for courses in which a grade of "D" or "F" is recorded.

A final grade of "F" shall be assigned to a student who is failing on the basis of work completed but who has not completed all requirements. The instructor may change an "F" so assigned to a passing grade if warranted by satisfactory completion of all requirements.

A mark of "I" may be assigned when a legitimate circumstance has prevented the student from completing all course requirements and the work completed at the time of assigning the "I" is of passing quality. It is the discretion of the instructor that determines what qualifies as a legitimate circumstance. It is recommended that the instructor, prior to the assignment of an "I" mark, document the legitimate circumstance and conditions for completing course requirements. An "I" so assigned may be changed to a grade provided all course requirements have been completed within 12 months after the end of the term in which the "I" was assigned. If the instructor does not report the grade within the 12-month period, the "I" shall be changed to an "F." When a mark of "I" is changed to a final grade, the grade points and academic standing are appropriately adjusted on the student's official academic records.

A mark of "AU" (Audit) is given to a student who officially registers in a course for audit purposes (see Registration for Audit).

A mark of "CR" (credit) is given for a course in which the university allows credit toward a degree, but for which no grade points are earned. The mark "CR" is not normally awarded for graduate-level courses but may be granted for independent academic activities. For a master's degree, a maximum of six semester hours of "CR" may be accepted toward the requirements for the degree.

A mixing of course letter grades and the mark "CR" is permitted only in graduate-level courses in which instruction is of an independent nature.

A mark of "R" (Registered) indicates that the student registered for master's thesis or doctoral dissertation. The mark "R" gives neither credit nor grade points toward a graduate degree.

A mark of "S" (Satisfactory) is assigned in courses such as special problems and research when a final grade is inappropriate. The mark "S" is not assigned to courses or work for which credit is given (and thus no grade points are earned for such work). If credit is awarded upon the completion of such work, a grade or mark may be assigned at that time and, if a grade is assigned, grade points will be earned. Courses with marks of S may not be used to count toward graduate degree requirements.

A mark of "W" (Withdrawal) will be given for courses from which students withdraw after the first 10 class days of the semester and before the drop deadline of the semester.

For numerical evaluation of grades, "A" is assigned 4 points for each semester hour of that grade; "B," 3 points; "C," 2 points; "D," 1 point; and "F," 0 points. Grades of plus and minus are assigned grade-point values in the Bumpers College of Agricultural, Food, and Life Sciences.

Students awarded a graduate degree must complete the minimum specified hours by the degree program and the Graduate School. Courses not marked in the course description as eligible to be repeated for degree credit may be included in this total only once.

Grade Appeal Process for Graduate Students

The Graduate School of the University of Arkansas recognizes that there may be occasions when a graduate student questions the fairness or accuracy of a grade. Situations that may result in an appeal include those where an instructor’s policy was not applied consistently to all students, the instructor’s actions differed substantially from announced policy or the syllabus, or that a policy was not announced. All grievances concerning course grades must be filed within one calendar year after the end of the term in which the grade is assigned. In such cases, the following process shall apply.

The student should first discuss the matter with the instructor involved, doing so as soon as possible after receiving the grade. If the student chooses to pursue an appeal, the student shall take the appeal in written form to the appropriate department or program chairperson of the program in which the course was instructed. The appeal should present the basis of the appeal with evidence the student may have to support the appeal. If that person determines the case has no merit, that person will inform the student and the instructor within five working days of having received the appeal from the student, or as soon thereafter as is practicable. If that person believes the complaint may have merit, that person will discuss it with the instructor. The instructor will have five working days from the date of that discussion (or as soon thereafter as is practicable) to decide whether to change the grade. In the case that the department or unit chairperson is the instructor, the student should submit an appeal in written form to the appropriate dean of the college in which the course was instructed.

If the matter remains unresolved, the department/program chair/head/director will, within 15 working days after receiving the original written approval (or as soon thereafter as is practicable), refer it to an ad hoc committee composed of programmatic or departmental faculty. This committee will be appointed by the department or program chairperson and will have at least three faculty with graduate faculty status representing the program or department in which the course was instructed. In the case where there are fewer than three faculty within the program or department to serve on the committee, graduate faculty members from a closely related discipline will be appointed to serve. In the case where the department or unit chairperson is the instructor of the appeal, the ad hoc committee will be appointed by the appropriate dean of the college in which the course was instructed. The instructor whose grade is being challenged shall not serve on this ad hoc committee.

The committee will examine available written information on the dispute, will be available to meet with the student and with the instructor, and will meet with others as it sees fit. The committee will have a maximum of 20 working days (or as soon thereafter as is practicable), from the date that the committee received the appeal, to deliberate and make a recommendation as follows.

If by majority vote, the ad hoc faculty committee determines, through its inquiries and deliberations, that the grade should not be changed, the committee shall communicate this conclusion to the student, the faculty member, and the chairperson. This will end the appeal unless the student can demonstrate a violation of University policy in the original assessment
of the grade or in the deliberation by the ad hoc committee. In such cases, the graduate student will have access to the Graduate Student Grievance policy.

If, by a majority vote, the ad hoc faculty committee determines that the grade should be changed, the committee will request that the instructor make the change and provide the instructor with a written explanation. Should the instructor decline, he or she must provide to the ad hoc faculty committee a written explanation for refusing to do so within five working days of receiving the request from the committee (or as soon thereafter as is practicable).

If the ad hoc faculty committee, after considering the instructor’s written explanation, concludes it would be inappropriate to allow the original grade to stand, it may then recommend to the department chairperson, or dean in the case where the department chairperson is the faculty whose grade is being challenged that the grade be changed. That individual (department chair or dean) will provide the instructor with a copy of the recommendation and will ask the instructor to implement it. If the instructor continues to decline, the chairperson or dean is then obligated to change the grade, notifying the instructor and the student of this action. Only the chairperson or dean has the authority to effect a grade change over the objection of the instructor who assigned the original grade, and only after the foregoing procedures have been followed. The final decision on the appeal must be made within 45 days of the student submitting it to the department/program chair/head/director (or as soon thereafter as is practicable). The instructor may appeal the decision to the academic dean or if the instructor is that person, to the Provost.

Academic Grievance Procedures for Graduate Students

The Graduate School of the University of Arkansas recognizes that there may be occasions when a graduate student has a grievance about some aspect of his/her academic involvement. It is an objective of this University that such a graduate student may have prompt and formal resolution of his or her personal academic grievances and that this be accomplished according to orderly procedures. Below are the procedures to be utilized when a graduate student has an academic grievance with a faculty member or administrator. If the student has a grievance against another student or another employee of the University, or if the student has a grievance which is not academic in nature, the appropriate policy may be found by contacting the Office of Equal Opportunity and Compliance or the office of the Graduate Dean. For policies and procedures pertaining to conduct offenses, consult the Code of Student Life.

NOTE: Master’s students in the Graduate School of Business should follow the grievance procedures for that School.

Definition of Terms

Academic grievance. An academic grievance means a dispute concerning some aspect of academic involvement arising from an administrative or faculty decision which the graduate student claims is in violation of his or her rights and is the result of a University error. The Graduate School considers any behavior on the part of a faculty member or an administrator, which the student believes to interfere with his/her academic progress, to be subject to a grievance. While an enumeration of the students’ rights with regard to their academic involvement is not possible or desirable, we have provided a short list as illustration. However, as in all cases involving individual rights, whether a specific behavior constitutes a violation of these rights can only be decided in context, following a review by a panel of those given the authority to make such a decision.

In general, we consider that the graduate student:
1. has the right to competent instruction;
2. is entitled to have access to the instructor at hours other than class times (office hours);
3. is entitled to know the grading system by which he/she will be judged;
4. has the right to evaluate each course and instructor;
5. has the right to be treated with respect and dignity.

In addition, an academic grievance may include alleged violations of the affirmative action plans of the University as related to academic policies and regulations, as well as disputes over grades, course requirements, graduation/degree program requirements, thesis/dissertation/advisory committee composition, and/or adviser decisions.

Formal academic grievance. An academic grievance is considered formal when the student notifies the Graduate Dean, in writing, that he/she is proceeding with such a grievance. The implications of this declaration are: 1) all correspondence pertaining to any aspect of the grievance will be in writing and will be made available to the Graduate Dean; 2) all documents relevant to the case, including minutes from all relevant meetings, will be part of the complete written record and will be forwarded to the Graduate Dean upon receipt by any party to the grievance; 3) the policy contained herein will be strictly followed; and 4) any member of the academic community who does not follow the grievance policy will be subject to disciplinary actions. Filing a formal academic grievance is a serious matter, and the student is strongly encouraged to seek informal resolution of his/her concerns before taking such a step.

Complete Written Record. The “complete written record” refers to all documents submitted as evidence by any party to the complaint, as subject to applicable privacy considerations.

NOTE: Because the tape recordings of committee meetings may contain sensitive information, including private information pertaining to other students, the tape or a verbatim transcription of the tape will not be part of the complete written record. However, general minutes of the meetings, documenting the action taken by the committees, will be part of the complete written record.

Graduate student. Under this procedure, a graduate student is any person who has been formally admitted into the Graduate School of the University of Arkansas, Fayetteville, and who is/was enrolled as a graduate-level student at the time the alleged grievance occurred.

Working Days. Working days shall refer to Monday through Friday, excluding official University holidays.

Procedures

NOTE: Master’s students in the Graduate School of Business should follow the grievance procedures for that School.

1. Individuals should attempt to resolve claimed grievances first with the person(s) involved, within the department, and wherever possible, without resort to formal grievance procedures. The graduate student
should first discuss the matter with the faculty member involved, or with the faculty member’s chairperson or area coordinator. The student’s questions may be answered satisfactorily during this discussion. If the grievance is with the departmental chairperson or area coordinator, the student may choose to contact the academic dean or the Graduate Dean, for a possible informal resolution of the matter.

2. If a graduate student chooses to pursue a formal grievance procedure, the student shall take the appeal in written form to the appropriate departmental chairperson/area coordinator, and forward a copy to the Graduate Dean. In the case of a grievance against a departmental chairperson or an area coordinator who does not report directly to a departmental chairperson, or in the absence of the chairperson/coordinator, the student will go directly to the dean of the college or school in which the alleged violation has occurred, or to the Graduate Dean. In any case, the Graduate Dean must be notified of the grievance. After discussion between the chairperson/coordinator/dean and all parties to the grievance, option 2a, 2b, or 3 may be chosen.

a. All parties involved may agree that the grievance can be resolved by a recommendation of the chairperson/coordinator/dean. In this case, the chairperson/coordinator/dean will forward a written recommendation to all parties involved in the grievance within 20 working days after receipt of the written grievance. The chairperson/area coordinator/dean is at liberty to use any appropriate method of investigation, including personal interviews and/or referral to an appropriate departmental committee for recommendation.

b. Alternatively, any party to the grievance may request that the departmental chairperson/area coordinator/dean at once refer the request, together with all statements, documents, and information gathered in his or her investigation, to the applicable departmental group (standing committee or all graduate faculty of the department). The reviewing body shall, within ten working days from the time its chairperson received the request for consideration, present to the department chairperson/coordinator/dean its written recommendations concerning resolution of the grievance. Within ten working days after receiving these recommendations, the department chairperson/area coordinator/dean shall provide all parties to the dispute with copies of the reviewing body’s recommendation and his or her consequent written decision on the matter.

3. If the grievance is not resolved by the procedure outlined in step 2, or if any party to the grievance chooses not to proceed as suggested in 2, he/she will appeal in writing to the Dean of the Graduate School. When, and only when, the grievance concerns the composition of the student’s thesis/dissertation committee or advisory committee, the Graduate Dean will proceed as described in step 5 (following). In all other cases, whenever a grievance comes to the attention of the Dean of the Graduate School, either as a result of a direct appeal or when a grievance has not been resolved satisfactorily at the departmental/academic dean level, the Dean of the Graduate School will consult with the person alleging the grievance. If the Graduate Dean determines that there is evidence of a university error and if that person decides to continue the formal grievance procedure, the Graduate Dean will notify all parties named in the grievance, the departmental chairperson/area coordinator, and the academic dean that a formal grievance has been filed. Within ten working days, the Dean of the Graduate School will: 1) with the consent of the student, appoint a faculty member as the student’s advocate, and 2) notify the Academic Appeals Subcommittee of the Graduate Council, which will serve as the hearing committee. The Associate Dean of the Graduate School will serve as the chair of the grievance committee and will vote only in the case of a tie. A voting member of the Graduate Council who is not a member of the Academic Appeals Subcommittee will serve as the non-voting secretary of the committee. The committee shall have access to witnesses and records, may take testimony, and may make a record by taping the hearing. Its charge is to develop all pertinent factual information (with the exception that the student and faculty member/administrator will not be required to be present in any meeting together without first agreeing to do so) and, on the basis of this information, to make a recommendation to the Graduate Dean to either support or reject the appeal. The Graduate Dean will then make a decision based on the committee’s recommendation and all documents submitted by the parties involved. The Graduate Dean’s decision, the committee’s written recommendation and a copy of its complete written record (excluding those in which other students have a privacy interest) shall be forwarded to the person(s) making the appeal within 20 working days from the date the committee was first convened; copies shall be sent simultaneously to other parties involved in the grievance and to the dean of the college in which the alleged violation occurred. A copy shall be retained by the Graduate School in such a way that the student’s privacy is protected.

4. When, and only when, the grievance concerns a course grade and the committee’s recommendation is that the grade assigned by the instructor should be changed, the following procedure applies. The committee’s recommendation that the grade should be changed shall be accompanied by a written explanation of the reasons for that recommendation and by a request that the instructor change the grade. If the instructor declines, he or she shall provide a written explanation for refusing. The committee, after considering the instructor’s explanation and upon concluding that it would be unjust to allow the original grade to stand, may then recommend to the department chair that the grade be changed. The department chair will provide the instructor with a copy of the recommendation and ask the instructor to change the grade. If the instructor continues to decline, the department chair may change the grade, notifying the instructor, the Graduate Dean, and the student of the action. Only the department chair, and only on recommendation of the committee, may change a grade over the objection of the instructor who assigned the original grade. No appeal or further review is allowed from this action. All grievances concerning course grades must be filed within one calendar year of receiving that grade.

5. When, and only when, a student brings a grievance concerning the composition of his/her thesis/dissertation or advisory committee, the following procedure will apply. The Dean of the Graduate School shall meet with the graduate student and the faculty member named in the grievance and shall consult the chair of the committee, the departmental chairperson/area coordinator, and the academic dean, for their recommendations. In unusual circumstances, the Dean of the Graduate School may remove a faculty member from a student’s thesis/dissertation committee or advisory committee, or make an alternative arrangement (e.g., assign a representative from the Graduate faculty to serve on the committee). With regard to the chair of the dissertation/thesis committee (not the advisory committee), the Graduate School considers this to be a mutual agreement between the faculty member and the student to work cooperatively on a research project of shared interest. Either the graduate student or the faculty member may dissolve this relationship by notifying the other party, the departmental chairperson, and the Graduate Dean. However, the student and the adviser should be warned that this may
require that all data gathered for the dissertation be abandoned and a new research project undertaken, with a new faculty adviser.

6. If a grievance, other than those covered by step 4, is not satisfactorily resolved through step 3 or 5, an appeal in writing and with all relevant material may be submitted for consideration and a joint decision by the Chancellor of the University of Arkansas, Fayetteville, and the Provost/Vice Chancellor for Academic Affairs. This appeal must be filed within 20 working days of receiving the decision of the Graduate Dean. Any appeal at this level shall be on the basis of the complete written record only, and will not involve interviews with any party to the grievance. The Chancellor of the University of Arkansas, Fayetteville, and the Provost/Vice Chancellor for Academic Affairs shall make a decision on the matter within 20 working days from the date of receipt of the appeal. Their decision shall be forwarded in writing to the same persons receiving such decision in step 3. Their decision is final pursuant to the delegated authority of the Board of Trustees.

7. If any party to the grievance violates this policy, he/she will be subject to disciplinary action. When alleging such a violation, the aggrieved individual shall contact the Graduate Dean, in writing, with an explanation of the violation.

Grievance Policy and Procedures for Graduate Assistants

NOTE: Graduate Assistants in the Graduate School of Business should follow the grievance procedures for that School.

Introduction

It is the philosophy of the Graduate School that assistantships are not typical employee positions of the University. This has two implications. First, the sponsor should also serve as a mentor to the student and assist, to the extent possible, in facilitating the student’s progress toward his/her degree. Second, any questions concerning performance in or requirements of assistantships shall be directed to the Graduate School or, for master’s students in business, to the Graduate School of Business.

Note: the term graduate assistant will be used to refer to those on other or, for master’s students in business, to the Graduate School of Business. This has two implications. It is the philosophy of the Graduate School that assistantships are not typical employee positions of the University. This has two implications. First, the sponsor should also serve as a mentor to the student and assist, to the extent possible, in facilitating the student’s progress toward his/her degree. Second, any questions concerning performance in or requirements of assistantships shall be directed to the Graduate School or, for master’s students in business, to the Graduate School of Business. This has two implications. It is the philosophy of the Graduate School that assistantships are not typical employee positions of the University. This has two implications. First, the sponsor should also serve as a mentor to the student and assist, to the extent possible, in facilitating the student’s progress toward his/her degree. Second, any questions concerning performance in or requirements of assistantships shall be directed to the Graduate School or, for master’s students in business, to the Graduate School of Business.

The Graduate School has the following authority with regard to graduate assistantships:

1. All requests for new positions, regardless of the source of the funds, must be approved by the Graduate School. When the position is approved, the requesting department or faculty member must complete the form “Request for a New Graduate Assistant Position” and submit it to the Graduate School. All proposed changes in duties for existing graduate assistantships must be approved by the Graduate School prior to their implementation.

2. The duty requirements of the graduate assistantship, including the number of hours required, must be approved by the Graduate School. Fifty percent GAs may not be asked to work more than 20 hours per week (Note: this is not limited to time actually spent in the classroom or lab; the 20 hour requirement also pertains to time required to grade/compute results, develop class/lab materials, etc.). Moreover, students cannot be asked to work an average of 20 hours per week, with 30 hours one week and 10 hours the next, for example. The duty hour requirement is no more than 20 hours per week for a 50 percent appointment. See the Graduate Handbook. However, it should also be noted that if the student is engaged in research which will be used in his/her required project, thesis or dissertation, or if the student is traveling to professional meetings, data sources, etc., the student may work more than 20 hours per week.) The duty requirements must complement the degree program of the graduate student and must abide by the philosophy that the first priority of graduate students is to finish their degrees. If a student is assigned to teach, the maximum duty assignment is full responsibility for two three-hour courses per semester.

3. The Graduate School has set the following limits on holding graduate assistantships (not fellowships): Master’s students may hold a graduate assistantship for no more than four major semesters; a doctoral student may hold a graduate assistantship for no more than eight major semesters; a student who enters a doctoral program with only a baccalaureate degree may hold a graduate assistantship for no more than ten major semesters. The department/program may petition the Graduate School for extensions to these requirements on a case by case basis.

4. The Graduate School, in consultation with the Graduate Council, has the right to set the enrollment requirements for full-time status for graduate assistants (as well as graduate students in general).

5. The Graduate School sets the minimum stipend for graduate assistantships, but does not have responsibility for setting the actual stipend.

Graduate assistants will be provided with a written statement of the expected duties for their positions, consistent with the duties outlined in the “Request for New Graduate Assistant Position” or any amendments submitted to the Graduate School. A copy of the written statement will be submitted to the Graduate School for inclusion in the student’s file.

Graduate assistants may be terminated from their positions at any time, or dismissed for cause (Board Policy No. 500.1). Termination for convenience is effected through the giving of a notice, in writing, of that action at least 60 days in advance of the date the employment is to cease; termination for cause, excluding unsatisfactory work performance, or because of abandonment of the assistantship is effected immediately upon notice and no advance notice shall be required. The conditions under which a graduate assistant may be terminated for unsatisfactory work performance are described in Board Policy No. 500.1. Termination of a graduate assistantship because of the loss of funds may be effected immediately or with reduced notice. In all cases of termination of the graduate assistantship, a copy of the notice must be sent to the Graduate School.

A graduate assistant has the right to request a review of the termination by the Graduate Dean, following the procedure given below. However, a student should be warned that if the grounds for dismissal are based on any of the following, the only defense to the termination is evidence to show that the charges are not true:

1. The student fails to meet the expectations of the assistantship positions, as outlined in the initial written statement provided to him/her at the beginning of the appointment.
2. The student provides fraudulent documentation for admission to his/her degree program and/or to his/her sponsor in applying for the assistantship position.
3. The student fails to meet certain expectations, which need not be explicitly stated by the sponsor, such as the expectation that:
   a. the student has the requisite English language skills to adequately perform the duties of the position;
   b. the student has the appropriate experience and skills to perform the duties of the position; and
c. the student maintains the appropriate ethical standards for the position. The Research Misconduct Policy provides one reference source for such ethical standards.

4. The student fails to make good progress toward the degree, as determined by the annual graduate student academic review and defined by program and Graduate School policies.

5. The assistantship position expires.

Definition of Terms

Graduate Assistant. Any graduate student holding a position which requires that the student be admitted to a graduate degree program of the University of Arkansas, regardless of the source of funds, and for whom tuition is paid as a result of that position.

Sponsor. The person responsible for the funding and duty expectations for the graduate assistant.

Formal graduate assistant grievance. Any dispute concerning some aspect of the graduate assistantship, as defined above, which arises from an administrative or faculty decision that the graduate student claims is a violation of his or her rights and is the result of a university error. The formal graduate assistant grievance does not pertain to cases in which there is a dispute between co-workers.

Violation of graduate assistant's rights. An action is considered a violation of the graduate assistants’ rights if: a) it violates Graduate School policy with regard to graduate assistantships; b) it threatens the integrity of, or otherwise deems the graduate student, regardless of any other consideration; c) it illegally discriminates or asks the graduate assistant to discriminate; d) it requires the student to do something which was not communicated as a condition of holding the assistantship (or the underlying expectations outlined above); e) it terminates the student from an assistantship for behaviors which are irrelevant to the holding of the assistantship or were never included as expectations for the assistantship; f) it requires the student to do something which violates University policy, the law, or professional ethics. Note: It is impossible to state all of the conditions which might constitute a violation of graduate assistants’ rights or, conversely, which might defend a respondent against charges of such violations. Such complaints require a process of information gathering and discussion that leads to a final resolution of the matter by those who have been given the authority to do so.

Formal grievance. A grievance concerning graduate assistantships/ fellowships is considered formal when the student notifies the Graduate Dean, in writing, that he/she is proceeding with such a grievance. The implications of this declaration are: a) the student will be provided with an advocate; b) all correspondence pertaining to any aspect of the grievance will be in writing and will be made available to the Graduate Dean; c) all documents relevant to the case, including minutes from all relevant meetings, will be part of the complete written record, and will be forwarded to the Graduate Dean upon receipt by any party to the grievance; d) the policy contained herein will be strictly followed; and e) any member of the academic community who does not follow the grievance policy will be subject to disciplinary actions. Filing a formal grievance is a serious matter, and the student is strongly encouraged to seek informal resolution of his/her concerns before taking such a step.

Respondent. The person who is the object of the grievance.

Procedures

NOTE: Grievances are confidential. Information about the grievance, including the fact that such a grievance has been filed, may never be made public to those who are not immediately involved in the resolution of the case, unless the student has authorized this release of information or has instigated a course of action which requires the respondent to respond. An exception to this confidentiality requirement is that the immediate supervisor or departmental chairperson of the respondent will be notified and will receive a copy of the resolution of the case. Since grievances against a respondent also have the potential to harm that person’s reputation, students may not disclose information about the grievance, including the fact that they have filed a grievance, to any person not immediately involved in the resolution of the case, until the matter has been finally resolved. This is not intended to preclude the student or respondent from seeking legal advice.

1. (Graduate assistants who are master’s students in the Graduate School of Business should contact the Director of that School.) When a graduate student believes that his/her rights have been violated, as the result of action(s) pertaining to a graduate assistantship he/she holds or has held within the past year, the student shall first discuss his/her concerns with the respondent. If the concerns are not resolved to the student’s satisfaction, the student may discuss it with the Graduate Dean and/or with the Office of Affirmative Action. If the concerns are satisfactorily resolved by any of the above discussions, the terms of the resolution shall be reduced to writing, if any of the involved parties desires to have such a written statement.

2. If the student’s concerns are not resolved by the above discussions and he/she chooses to pursue the matter further, the student shall notify the Graduate Dean in writing of the nature of the complaint. This notification will include all relevant documentation and must occur within one year from the date of the occurrence.

3. Upon receipt of this notification and supporting documentation, the Graduate Dean will meet with the graduate student. If the student agrees, the Dean will notify the respondent of the student’s concerns. If the student does not wish for the respondent to be notified, the matter will be dropped. The respondent will be given ten working days from receipt of the Graduate Dean’s notification to respond to the concerns.

4. The Graduate Dean will meet again with the student and make an effort to resolve the concerns in a mutually satisfactory manner. If this is not possible, and if the Graduate Dean determines that there is evidence of a university error, the Graduate Dean will refer the case to a committee.

5. Within ten working days from the final meeting between the student and the Graduate Dean, the Graduate Dean will notify the respondent and the Academic Appeals Subcommittee of the Graduate Council, which will serve as the hearing committee. The Associate Dean of the Graduate School will serve as the chair of the grievance committee and will vote only in the case of a tie. A voting member of the Graduate Council who is not on the Academic Appeals Subcommittee will serve as the non-voting secretary of the committee. At this time, the Graduate Dean will also assign an advocate to the student. The advocate must be a member of the graduate faculty. The immediate supervisor of the sponsor will serve as his/her advocate. Note: The student and sponsor advocates will have the responsibility to help the student/sponsor prepare his/her written materials and will attend committee meetings with the student/sponsor. The advocate will not speak on behalf of the student/sponsor and will not take part in committee discussions of the merits of the case.

6. The committee shall have access to witnesses and records, may take testimony, and may make a record by taping the hearing. Its charge is to develop all pertinent factual information (with the exception that the student and respondent will not be required to be present in any meeting together without first agreeing to do so) and, on the basis of
this information, to make a recommendation to the Graduate Dean to either support or reject the grievance. The Graduate Dean will then make a decision based on the committee’s recommendation and all documents submitted by the parties involved. The Graduate Dean’s decision, the committee’s written recommendation and a copy of all documents submitted as evidence by any party to the complaint, consistent with all privacy considerations, shall be forwarded to the person(s) alleging the grievance within 20 working days from the date the committee was first convened; copies shall be sent simultaneously to other parties involved in the grievance. A copy shall be retained by the Graduate School in such a way that the student’s and respondent’s privacy is protected. It should be noted that the Graduate Dean has limited authority to require a sponsor to reappoint a graduate assistant. Consequently, the redress open to the student may be limited.

7. If the grievance is not satisfactorily resolved through step 6, an appeal in writing with all relevant material may be submitted by either the student or the sponsor for consideration by the Provost/Vice Chancellor for Academic Affairs of the University of Arkansas. This appeal must be filed within 20 working days of receiving the decision of the Graduate Dean. Any appeal at this level shall be on the basis of the complete written record only and will not involve interviews with any party to the grievance. The Provost/Vice Chancellor for Academic Affairs shall make a decision on the matter within 20 working days from the date of receipt of the appeal. His/her decision shall be forwarded in writing to the Graduate Dean, the student, and the respondent. This decision is final.

8. If any party to the grievance violates this policy, he/she will be subject either to losing the assistantship position or losing the assistantship. When alleging such a violation, the aggrieved individual shall contact the Graduate Dean, in writing, with an explanation of the violation.

Research and Scholarly Misconduct Policies and Procedures

I. Introduction

A. General Policy

The University of Arkansas is committed to the highest integrity in research and scholarly activity. Actions which fail to meet this standard can undermine the quality of academic scholarship and harm the reputation of the University. This policy is designed to help ensure that all those associated with the University of Arkansas carry out their research and scholarly obligations in a manner that is consistent with the mission and values of the University, and provides a means of addressing instances of suspected research misconduct should they arise.

Principal investigators are responsible for maintaining ethical standards in the projects they direct and reporting any violations to the appropriate University official. Students charged with academic misconduct are subject to separate disciplinary rules governing students, however, such cases may also be reviewed under these policies if applicable under the provisions stated below. The Research Integrity Officer, in consultation with the student’s dean shall determine which policy is most appropriate in each case.

A charge of research misconduct is very serious, and will be reviewed carefully and thoroughly. Any allegation of research misconduct will be handled as confidentially and expeditiously as possible. Full attention will be given to the rights and responsibilities of all individuals involved. Charges of research misconduct which are determined not to be made in good faith, as provided for in this policy, may result in administrative action against the charging party.

B. Scope

This statement of policy and procedures is intended to carry out the responsibilities of the University of Arkansas, Fayetteville under the Public Health Service (PHS) Policies on Research Misconduct, 42 CFR Part 93 and the research misconduct policies of other funding agencies, as applicable to particular allegations.

This document applies to allegations of research misconduct (as defined below) involving:

- A person who, at the time of the alleged research misconduct, was employed by, was an agent of, or was affiliated by enrolled student status, contract or agreement with the University of Arkansas, Fayetteville; and
- Is accused of plagiarism, fabrication, or falsification of research records produced in the course of research, research training or activities related to that research or research training. This includes any research formally proposed, performed, reviewed, or reported, or any document or record generated in connection with such research, regardless of whether an application or proposal for funds resulted in a grant, contract, cooperative agreement, or other form of support.

Severance of the respondent’s relationship with the University, whether by resignation or termination of employment, completion of or withdrawal from studies, or otherwise, before or after initiation of procedures under this policy, will not preclude or terminate research misconduct procedures.

II. Definitions and Standard of Review

Charge. A written allegation of misconduct that triggers the procedures described in this policy.

Complainant. A person who submits a charge of research misconduct.

Deciding Official (DO). The Provost and Vice Chancellor for Academic Affairs who is the institutional official responsible for making determinations, subject to appeal, on allegations of research misconduct and any institutional administrative actions. The Deciding Official will not be the same individual as the Research Integrity Officer and should have no direct prior involvement in the institution’s allegation assessment, inquiry, or investigation. Discussing concerns regarding suspected research misconduct, as provided for in Section IV.A. of this policy, shall not be considered direct prior involvement. If the Deciding Official is unable to serve as DO in a particular matter, the Chancellor may appoint an appropriate official to act as the DO for purposes of that matter.

Good Faith Charge. A charge of research misconduct made by a complainant who believes that research misconduct may have occurred. A charge is not in good faith if it is made with reckless disregard for or willful ignorance of facts that would disprove the charge.

Inquiry. The process under the policy for information gathering and preliminary fact-finding to determine if a charge or apparent instance of research misconduct has substance and therefore warrants an investigation.

Investigation. The process under this policy for the formal examination and evaluation of all relevant facts to determine whether research misconduct has occurred, and, if so, the responsible person and the seriousness of the misconduct.
Investigator. Any person, including but not limited to any person holding an academic or professional staff appointment at the University of Arkansas, who is engaged in the design, conduct, or reporting of research.

ORI. The Office of Research Integrity within the U.S. Department of Health and Human Services.

PHS. The Public Health Service within the U.S. Department of Health and Human Services.

Preponderance of Evidence. Evidence which is of greater weight or more convincing than evidence to the contrary; evidence which shows that something more likely than not is true.

Recklessly. To act recklessly means that a person acts in such a manner that the individual consciously disregards a substantial and unjustifiable risk or grossly deviates from the standard of conduct that a reasonable individual would observe; reckless means more than mere or ordinary negligence.

Research. A systematic investigation designed to develop or contribute to generalizable knowledge. The term includes the search for both basic and applied knowledge and well as training methods by which such knowledge may be obtained.

Research Integrity Officer (RIO) means the Chair of the Research Council who is the institutional official responsible for: (1) assessing allegations of research misconduct to determine if the allegations fall within the definition of research misconduct, are covered by 42 CFR Part 93 or other applicable federal policies, and warrant an inquiry on the basis that the allegation is sufficiently credible and specific so that potential evidence of research misconduct may be identified; (2) overseeing inquiries and investigations; and (3) the other responsibilities described in this policy. If the Research Integrity Officer is unable to serve as RIO in a particular matter, the DO may appoint an appropriate official to act as the RIO for purposes of that matter.

Research Misconduct. Research misconduct means the fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results.

1. Fabrication is making up data or results and recording or reporting them.
2. Falsification is manipulating research materials, equipment, or processes, or changing or omitting data or results such that the research is not accurately represented in the research record.
3. Plagiarism is the appropriation of another person’s ideas, processes, results, or words without giving appropriate credit.

Research misconduct does not include disputes regarding honest error or honest differences in interpretations or judgments of data, and is not intended to resolve bona fide scientific disagreement or debate. Research misconduct is also not intended to include “authorship” disputes such as complaints about appropriate ranking of co-authors in publications, presentations, or other work, unless the dispute constitutes plagiarism (as defined above).

Research Record. Any data, document, computer file, computer storage media, or any other written or non-written account or object that reasonably may be expected to provide evidence or information regarding the proposed, conducted, or reported research that constitutes the subject of a charge of research misconduct. A research record includes, but is not limited to, grant or contract applications, whether funded or unfunded; grant or contract progress and other reports; laboratory notebooks; notes; printed or electronic correspondence; memoranda of telephone calls; videos; photographs; X-ray film; slides; biological materials; computer files and printouts; manuscripts and publications; equipment use logs; laboratory procurement records; animal facility records; human and animal subject protocols; consent forms; medical charts; and patient research files.

Respondent. The person against whom a charge of research misconduct is directed, or the person whose actions are the subject of an inquiry or investigation.

Standard of Review.

A finding of research misconduct requires that:

1. There be a significant departure from accepted practices of the relevant research community; and
2. The research misconduct be committed intentionally, knowingly, or recklessly; and
3. The allegation be proven by a preponderance of the evidence.

This standard and related definitions are restated in the charge to the investigation committee located in section V.E. of this policy.

III. Rights and Responsibilities

A. Research Integrity Officer

The Chair of the Research Council will serve as the RIO who will have primary responsibility for implementation of the institution’s policies and procedures on research misconduct. These responsibilities include the following duties related to research misconduct proceedings:

- Consult confidentially with persons uncertain about whether to submit an allegation of research misconduct;
- Receive allegations of research misconduct;
- Assess each allegation of research misconduct in accordance with Section V.A. of this policy to determine whether the allegation falls within the definition of research misconduct and warrants an inquiry;
- As necessary, take interim action and notify ORI of special circumstances, in accordance with Section IV.H. of this policy;
- Sequester research data and evidence pertinent to the allegation of research misconduct in accordance with Section V.C. of this policy and maintain it securely in accordance with this policy and applicable law and regulation;
- Provide confidentiality to those involved in the research misconduct proceeding as required by 42 CFR § 93.108 or other applicable law or regulations, or institutional policy;
- Notify the respondent and provide opportunities for him/her to review/comment/respond to allegations, evidence, and committee reports in accordance with Section III.C. of this policy;
- Inform respondents, complainants, and witnesses of the procedural steps in the research misconduct proceeding;
- Appoint the chair and members of the inquiry and investigation committees, ensure that those committees are properly staffed and that there is expertise appropriate to carry out a thorough and authoritative evaluation of the evidence;
- Determine whether each person involved in handling an allegation of research misconduct has an unresolved personal, professional, or financial conflict of interest and take appropriate action, including recusal, to ensure that no person with such conflict is involved in the research misconduct proceeding;
• In cooperation with other institutional officials, take all reasonable and practical steps to protect or restore the positions and reputations of good faith complainants, witnesses, and committee members and counter potential or actual retaliation against them by respondents or other institutional members;
• Keep the Deciding Official and others who need to know apprised of the progress of the review of the allegation of research misconduct;
• Notify and make reports to ORI or other applicable federal agencies as required by 42 CFR Part 93 or other applicable law or regulations;
• Ensure that administrative actions taken by the institution, ORI, or other appropriate agencies are enforced and take appropriate action to notify other involved parties, such as sponsors, law enforcement agencies, professional societies, and licensing boards of those actions; and
• Maintain records of the research misconduct proceeding and make them available to ORI or other appropriate agencies as applicable in accordance with Section VIII.F. of this policy.

B. Complainant
The complainant is responsible for making allegations in good faith, maintaining confidentiality to the extent permitted by law, and cooperating with the inquiry and investigation. As a matter of good practice, the complainant should be interviewed at the inquiry stage and given the transcript of the interview for comment. The complainant must be interviewed during an investigation, and be given the transcript of the interview for comment. The complainant may be provided for comment with (1) relevant portions of the inquiry report (within a timeframe that permits the inquiry to be completed within 60 days of its initiation); and (2) relevant portions of the draft investigation report. In reviewing reports, the complainant must adhere to time limits set by the corresponding committee for timely completion of the inquiry or investigation.

C. Respondent
The respondent is responsible for maintaining confidentiality and cooperating with the conduct of an inquiry and investigation. The respondent is entitled to:
• A good faith effort from the RIO to notify the respondent in writing at the time of or before beginning an inquiry;
• An opportunity to comment on the inquiry report and have his/her comments attached to the report;
• Be notified of the outcome of the inquiry, and receive a copy of the inquiry report that includes a copy of, or refers to 42 CFR Part 93 or other applicable law or regulations and the institution’s policies and procedures on research misconduct;
• Be notified in writing of the allegations to be investigated within a reasonable time after the determination that an investigation is warranted, but before the investigation begins (within 30 days after the institution decides to begin an investigation), and be notified in writing of any new allegations, not addressed in the inquiry or in the initial notice of investigation, within a reasonable time after the determination to pursue those allegations;
• Be interviewed during the investigation, have the opportunity to correct the recording or transcript, and have the corrected recording or transcript included in the record of the investigation;
• Have a good faith effort made to interview during the investigation any witness who has been reasonably identified by the respondent as having information on relevant aspects of the investigation, have the recording or transcript provided to the witness, have the witness suggest any corrections in the transcript, and have the recording or corrected transcript included in the record of investigation; and
• Receive a copy of the draft investigation report and, concurrently, a copy of, or supervised access to any records or materials on which the report is based, and be notified that any comments must be submitted within 30 days of the date on which the copy was received and that the comments will be considered by the institution and addressed in the final report.
• Appeal the decision of the DO as provided in Section XIII.D.

The respondent should be given the opportunity to admit that research misconduct occurred and that he/she committed the research misconduct. With the advice of the RIO and/or other institutional officials, the Deciding Official may terminate the institution’s review of an allegation that has been admitted, if the institution’s acceptance of the admission and any proposed resolution is approved by ORI or the appropriate federal agency, if required.

D. Deciding Official
The DO will receive the inquiry report and after consulting with the RIO and/or other institutional officials, decide whether an investigation is warranted under this policy, the criteria in 42 CFR § 93.307(d), or other applicable law or regulations. Any finding that an investigation is warranted must be made in writing by the DO and must be provided to ORI or other federal agencies, if required, together with a copy of the inquiry report meeting the requirements of 42 CFR § 93.309, within 30 days of the finding. If it is found that an investigation is not warranted, the DO and the RIO will ensure that detailed documentation of the inquiry is retained for at least 7 years after termination of the inquiry, so that ORI or other applicable agencies may assess the reasons why the institution decided not to conduct an investigation.

The DO will receive the investigation report and, after consulting with the RIO and/or other institutional officials, decide the extent to which this institution accepts the findings of the investigation and, if research misconduct is found, decide what, if any, institutional administrative actions are appropriate. The DO shall ensure that the final investigation report, the findings of the DO and a description of any pending or completed administrative actions are provided to ORI, as required by 42 CFR § 93.315 or to other federal agencies as required by their respective misconduct policies.

IV. General Policies and Principles
A. Responsibility to Report Misconduct
All institutional members will report observed, suspected, or apparent research misconduct to the RIO, the DO, or their designees. Prior to submitting a formal charge, a potential complainant is encouraged to consult informally with the RIO, the DO, or their designees to consider whether the case involves questions of research misconduct, should be resolved by other University procedures, or does not warrant further action. Contact information for the RIO may be obtained from the Office of Research Support and Sponsored Programs or the listing of Research Council members on the Faculty Senate website. If the circumstances described by the individual do not meet the definition of research misconduct, but further action is required, the RIO will refer the individual or allegation to other offices or officials with responsibility for resolving the problem.

At any time, to the extent permitted by law, an institutional member may have confidential discussions and consultations about concerns of possible misconduct with the RIO, the DO, or their designees and will be
counseled about appropriate procedures for reporting allegations and their obligation to cooperate in any inquiry or investigation that may occur.

B. Cooperation with Research Misconduct Proceedings

Institutional members shall cooperate with the RIO and other institutional officials in the review of allegations and the conduct of inquiries and investigations. Institutional members, including respondents, have an obligation to provide evidence relevant to research misconduct allegations to the RIO or other institutional officials.

C. Confidentiality

The RIO shall, as required by 42 CFR § 93.108 or other applicable law or regulation: (1) limit disclosure of the identity of respondents and complainants to those who need to know in order to carry out a thorough, competent, objective and fair research misconduct proceeding; and (2) except as otherwise prescribed by law, limit the disclosure of any records or evidence from which research subjects might be identified to those who need to know in order to carry out a research misconduct proceeding.

D. Conflicts of interest

At each stage of handling an inquiry or subsequent investigation, all persons involved shall be vigilant to prevent any real or perceived conflict of interest, or personal conflicts or relationships between colleagues, from affecting the outcome of the proceedings and resolution of the charges. Possible conflicts of interest may include co-authorship of work within the recent past with any of the individuals directly involved with the alleged misconduct, or professional or personal relationship with the respondent beyond that of mere acquaintances or colleagues. Committee members shall not have had any personal, professional or financial involvement with the matters at issue in the investigation that might create an appearance of bias or actual bias. If such relationships or involvement are present, the individual shall recuse himself or herself from any investigative or decisional role in the case. If any prospective committee member at any point in the process presents a conflict of interest, that committee member shall be replaced by another appointee. If the RIO has a conflict of interest, the DO shall appoint a replacement; if the DO has a conflict of interest, the Chancellor shall appoint a replacement. The RIO may use a written conflict of interest statement to implement this provision; a sample statement is referenced in the Appendix to this policy.

E. Protecting complainants, witnesses, and committee members

Institutional members may not retaliate in any way against complainants, witnesses, or committee members. Institutional members should immediately report any alleged or apparent retaliation against complainants, witnesses or committee members to the RIO, who shall review the matter and, as necessary, make all reasonable and practical efforts to counter any potential or actual retaliation and protect and restore the position and reputation of the person against whom the retaliation is directed.

F. Protecting the Respondent

As requested and as appropriate, the RIO and other institutional officials shall make all reasonable and practical efforts to protect or restore the reputation of persons alleged to have engaged in research misconduct, but against whom no finding of research misconduct is made.

During the research misconduct proceeding, the RIO is responsible for ensuring that respondents receive all the notices and opportunities provided for in 42 CFR Part 93, or other applicable federal policies, and the policies and procedures of the institution.

G. Adviser to the Respondent

The respondent may consult with an adviser, who may or may not be an attorney. The adviser may not be a principal or witness in the case. The adviser may accompany the respondent to proceedings conducted as a part of the research misconduct proceeding, but shall not speak on behalf of the respondent or otherwise participate in the proceedings. The adviser must maintain confidentiality and be available as needed to ensure that all proceedings are completed on a timely basis.

H. Interim Administrative Actions and Notifying ORI or Other Federal Agencies of Special Circumstances

Throughout the research misconduct proceeding, the RIO will review the situation to determine if there is any threat of harm to public health, federal funds and equipment, or the integrity of the research process. In the event of such a threat, the RIO will, in consultation with other institutional officials and ORI or other federal agencies, if applicable, take appropriate interim action to protect against any such threat. Interim action might include additional monitoring of the research process and the handling of federal funds and equipment, reassignment of personnel or of the responsibility for the handling of federal funds and equipment, additional review of research data and results or delaying publication. The RIO shall, at any time during a research misconduct proceeding, consult with appropriate University officials and legal counsel immediately if he/she has reason to believe that any of the following conditions exist:

- Health or safety of the public is at risk, including an immediate need to protect human or animal subjects;
- Federal resources or interests are threatened;
- Research activities should be suspended;
- There is a reasonable indication of possible violations of civil or criminal law;
- Federal action is required to protect the interests of those involved in the research misconduct proceeding;
- The research misconduct proceeding may be made public prematurely and federal action may be necessary to safeguard evidence and protect the rights of those involved; or
- The research community or public should be informed.

Following such consultation, the institution shall take appropriate steps to address such conditions, such as by notifying ORI or other applicable agency.

I. Computation of Time

In this policy, any reference to days shall mean calendar days. Any period of time equal to ten days or fewer shall exclude University holidays. If a deadline falls on a weekend or University holiday, the deadline shall be the next University business day.

J. Procedural Changes

1. Deadlines. Due to the sensitive nature of allegations of misconduct, each case shall be resolved as expeditiously as possible. The nature of some cases may, however, render normal deadlines difficult to meet. If at any time an established deadline cannot be met, a report shall be filed with the DO setting out the reasons why the deadline cannot be met and estimating when that stage of the process will be completed. A copy of this report shall be provided to the respondent.
If PHS funding is involved, an extension must be received from the Office of Research Integrity.

2. Other Procedural Changes. Particular circumstances in an individual case may dictate variation from the procedures set out in this policy in order to ensure fair and efficient consideration of the matter. Any change in the procedures must ensure fair treatment of the respondent. Any major deviations from the procedures described in this policy shall be made only with the written approval of the DO in consultation with the respondent. Any minor deviations from the procedures described in this policy shall not require the written approval of the DO.

K. Exclusive Process
The procedures described in this policy constitute the exclusive process for raising and resolving charges of research misconduct.

V. Conducting the Assessment and Inquiry
A. Assessment of Allegations
Upon receiving an allegation of research misconduct, the RIO will immediately assess the allegation to determine whether it is sufficiently credible and specific so that potential evidence of research misconduct may be identified and further review is warranted. The RIO shall also determine whether the alleged misconduct is within the jurisdictional criteria of 42 CFR § 93.102(b), and whether the allegation falls within the definition of research misconduct in 42 CFR § 93.103. An inquiry must be conducted if these criteria are met. In conducting this assessment, the RIO may consult with the institution’s legal counsel and other appropriate University officials. If a charge is frivolous, does not raise questions of research misconduct, is more appropriately resolved by other University procedures, or does not warrant further action, the RIO may, at his or her discretion, handle the matter informally or refer it to the appropriate person or process, and will notify the complainant and anyone else known to be aware of the charge.

The assessment period should be brief, preferably concluded within a week. In conducting the assessment, the RIO need not interview the complainant, respondent, or other witnesses, or gather data beyond any that may have been submitted with the allegation, except as necessary to determine whether the allegation is sufficiently credible and specific so that potential evidence of research misconduct may be identified and further review is warranted. The RIO shall, on or before the date on which the respondent is notified of the allegation, obtain custody of, inventory, and sequester all research records and evidence needed to conduct the research misconduct proceeding, as provided in paragraph C. of this section.

B. Initiation and Purpose of the Inquiry
If the RIO determines that the criteria for an inquiry are met, he or she will immediately initiate the inquiry process. The purpose of the inquiry is to conduct an initial review of the available evidence to determine whether to conduct an investigation. An inquiry does not require a full review of all the evidence related to the allegation.

C. Notice to Respondent; Sequestration of Research Records
At the time of or before beginning an inquiry, the RIO must make a good faith effort to notify the respondent in writing, if the respondent is known. With the approval of the respondent, the RIO will also notify the dean of the school or college in which the respondent holds his or her primary appointment. If the inquiry subsequently identifies additional respondents, they must be notified in writing. On or before the date on which the respondent is notified, or the inquiry begins, whichever is earlier, the RIO must take all reasonable and practical steps to obtain custody of all the research records and evidence needed to conduct the research misconduct proceeding, inventory the records and evidence and sequester them in a secure manner, except that where the research records or evidence encompass scientific instruments shared by a number of users, custody may be limited to copies of the data or evidence on such instruments, so long as those copies are substantially equivalent to the evidentiary value of the instruments. The RIO may consult confidently with the institution’s legal counsel and other appropriate University officials for advice and assistance in this regard. In addition, if necessary, the RIO may consult with ORI or other applicable federal agency.

D. Appointment of the Inquiry Committee
The RIO, in consultation with other institutional officials as appropriate, shall appoint an inquiry committee and committee chair as soon after the initiation of the inquiry as is practical. The inquiry committee must consist of individuals who do not have unresolved personal, professional, or financial conflicts of interest with those involved with the inquiry and should include individuals with the appropriate scientific expertise to evaluate the evidence and issues related to the allegation, interview the principals and key witnesses, and conduct the inquiry. The RIO shall notify the respondent of the proposed inquiry committee membership. The respondent may then submit a written objection to any appointed member of the inquiry committee based on bias or conflict of interest within seven days. If an objection is raised, the RIO shall determine whether to replace the challenged member with a qualified substitute. The RIO’s decision shall be final. The RIO may, with the concurrence of the DO, appoint one or more experts to assist the inquiry committee if necessary to evaluate specific allegations. The RIO shall direct the members of the committee that the investigation and all information relating to the investigation shall be kept confidential.

E. Charge to the Committee and First Meeting
The RIO will prepare a charge for the inquiry committee that:

• Sets forth the time for completion of the inquiry;
• Describes the allegations and any related issues identified during the allegation assessment;
• States that the purpose of the inquiry is to conduct an initial review of the evidence, including the testimony of the respondent, complainant and key witnesses, to determine whether an investigation is warranted, not to determine whether research misconduct definitely occurred or who was responsible;
• States that an investigation is warranted if the committee determines: (1) there is a reasonable basis for concluding that the allegation falls within the definition of research misconduct and is within the jurisdictional criteria of 42 CFR § 93.102(b), if applicable; and, (2) the allegation may have substance, based on the committee’s review during the inquiry.
• Informs the inquiry committee that they are responsible for preparing or directing the preparation of a written report of the inquiry that meets the requirements of this Policy and 42 CFR § 93.309(a), if applicable.

At the committee’s first meeting, the RIO will review the charge with the committee, discuss the allegations, any related issues, and the appropriate procedures for conducting the inquiry, assist the committee with organizing plans for the inquiry, and answer any questions raised by the committee. The RIO will be present or available throughout the inquiry to advise the committee as needed. Prior to the first meeting, the RIO
shall also consult with legal counsel for the institution as to the need for
counsel to provide legal advice to the committee at the first meeting and
in subsequent phases of the inquiry, including, but not limited to, for the
purpose of reviewing institutional policies governing research misconduct
proceedings, confidentiality and potential conflicts of interest.

F. Inquiry Process
The inquiry committee shall interview the complainant and the
respondent, and may interview witnesses as well as examine relevant
research records and materials. Then the inquiry committee will evaluate
the evidence, including the testimony obtained during the inquiry. After
consultation with the RIO, the committee members will decide whether
an investigation is warranted based on the criteria in this policy and 42
CFR § 93.307(d) as applicable. The scope of the inquiry is not required
to and does not normally include deciding whether misconduct definitely
occurred, determining definitely who committed the research misconduct
or conducting exhaustive interviews and analyses. However, if a legally
sufficient admission of research misconduct is made by the respondent,
misconduct may be determined at the inquiry stage if all relevant issues
are resolved. In that case, the institution shall promptly consult with ORI
or other appropriate agencies, as appropriate, to determine the next steps
that should be taken. See Section IX.

G. Time for Completion
The inquiry, including preparation of the final inquiry report and the
decision of the DO on whether an investigation is warranted, must be
completed within 60 days of initiation of the inquiry, unless the RIO
determines that circumstances clearly warrant a longer period. If the RIO
approves an extension, the inquiry record must include documentation
of the reasons for exceeding the 60-day period. The respondent will be
notified of the extension.

VI. The Inquiry Report
A. Elements of the Inquiry Report
A written inquiry report must be prepared that includes the following
information: (1) the name and position of the respondent; (2) a description
of the allegations of research misconduct; (3) the PHS or other federal
support, if any, including, for example, grant numbers, grant applications,
contracts and publications listing support; (4) the basis for recommending
or not recommending that the allegations warrant an investigation; (5)
any comments on the draft report by the respondent or complainant. An
outline for reports to be furnished to ORI is referenced in the Appendix to
this policy.

Institutional counsel shall review the draft inquiry report prior to
transmission of the draft to the respondent. Modifications shall be made
as appropriate in consultation with the RIO and the inquiry committee.
The inquiry report shall include the following information: the names and
titles of the committee members and experts who conducted the inquiry;
a summary of the inquiry process used; a list of the research records
reviewed; summaries of any interviews; and whether any other actions
should be taken if an investigation is not recommended.

B. Notification to the Respondent and Opportunity to Comment
The RIO shall notify the respondent whether the inquiry found an
investigation to be warranted, together with a copy of the draft inquiry
report, and a copy of or reference to 42 CFR Part 93 or other applicable
federal policies and the institution’s policies and procedures on research
misconduct. The report shall clearly be labeled “DRAFT” in bold and
conspicuous type font. The RIO shall notify the respondent that the
respondent shall have 10 days to comment on the draft inquiry report.
The RIO shall also direct the respondent that the draft report shall be kept
confidential.

On a case-by-case basis, the RIO may provide the complainant a copy
of the draft inquiry report, or relevant portions of it, for comment. If so,
the report shall clearly be labeled “DRAFT” in bold and conspicuous type
font, and the complainant shall be allowed no more than 10 days to submit
comments to the RIO. The complainant shall be directed that the draft
report shall be kept confidential.

Any comments that are submitted by the respondent or the complainant
shall be attached to the final inquiry report. Based on the comments, the
inquiry committee may revise the draft report as appropriate and prepare
it in final form. The committee will deliver the final report to the RIO. The
RIO shall notify the complainant in writing whether the inquiry found an
investigation to be warranted.

C. Institutional Decision and Notification
1. Decision by Deciding Official
   a. The RIO will transmit the final inquiry report and any comments
to the DO, who will determine in writing whether an investigation
is warranted. The inquiry is completed when the DO makes this
determination.

2. Notification to ORI and Respondent
   a. Within 30 days of the DO’s decision that an investigation is
warranted, the RIO will provide ORI, if required, with the DO’s
written decision and a copy of the inquiry report. The RIO shall
also provide a copy of the DO’s written decision and a copy
of the inquiry report to the respondent within 30 days of the
DO’s decision. Subject to confidentiality, the RIO will also notify
those institutional officials, if any, who need to know of the DO’s
decision because they will be directly involved in the investigation
or otherwise have a need to know because of their official
duties. The RIO must provide the following information to ORI,
if required, or other applicable federal agency upon request: (1)
the institutional policies and procedures under which the inquiry
was conducted; (2) the research records and evidence reviewed,
transcripts or recordings of any interviews, and copies of all
relevant documents; and (3) the charges to be considered in the
investigation.

3. Documentation of Decision Not to Investigate
   a. If the DO decides that an investigation is not warranted, the RIO
shall secure and maintain for 7 years after the termination of the
inquiry sufficiently detailed documentation of the inquiry to permit
a later assessment by applicable federal agencies of the reasons
why an investigation was not conducted. These documents must
be provided to such agencies or their authorized personnel upon
request.

VII. Conducting the Investigation
A. Initiation and Purpose
The investigation must begin within 30 days, after the determination by
the DO that an investigation is warranted. The purpose of the investigation
is to develop a factual record by exploring the allegations in detail and
examining the evidence in depth, leading to recommended findings on
whether research misconduct has been committed, by whom, and to what
extent. The investigation will also determine whether there are additional
instances of possible research misconduct that would justify broadening
the scope beyond the initial allegations. This is particularly important
where the alleged research misconduct involves clinical trials or potential
harm to human subjects or the general public or if it affects research that forms the basis for public policy, clinical practice, or public health practice. The findings of the investigation must be set forth in an investigation report.

B. Notifying ORI and Respondent; Sequestration of Research Records

On or before the date on which the investigation begins, the RIO must: (1) notify the ORI Director of the decision to begin the investigation and provide ORI a copy of the inquiry report, if required; and (2) notify the respondent in writing of the allegations to be investigated. The RIO must also give the respondent written notice of any new allegations of research misconduct within a reasonable amount of time of deciding to pursue allegations not addressed during the inquiry or in the initial notice of the investigation.

The RIO will, prior to notifying respondent of the allegations, take all reasonable and practical steps to obtain custody of and sequester in a secure manner all research records and evidence needed to conduct the research misconduct proceeding that were not previously sequestered during the inquiry. The need for additional sequestration of records for the investigation may occur for any number of reasons, including the institution’s decision to investigate additional allegations not considered during the inquiry stage or the identification of records during the inquiry process that had not been previously secured. The procedures to be followed for sequestration during the investigation are the same procedures that apply during the inquiry.

C. Appointment of the Investigation Committee

The RIO, in consultation with other institutional officials as appropriate, will appoint an investigation committee and the committee chair as soon after the beginning of the investigation as is practical. The investigation committee must consist of at least three individuals who do not have unresolved personal, professional, or financial conflicts of interest with those involved with the investigation and should include individuals with the appropriate scientific expertise to evaluate the evidence and issues related to the allegation, interview the respondent and complainant and conduct the investigation. Individuals appointed to the investigation committee may also have served on the inquiry committee. When necessary to secure the necessary expertise or to avoid conflicts of interest, the RIO may select committee members from outside the institution, or, with concurrence of the DO, may appoint experts to assist the committee in particular aspects of the case. The RIO will notify the respondent of the proposed investigation committee membership and any appointed experts. If the respondent then submits a written objection to any appointed member or expert based on bias or conflict of interest within seven days, the RIO will determine whether to replace the challenged member or expert with a qualified substitute, and the decision of the RIO shall be final.

D. Charge to the Committee and the First Meeting

1. Charge to the Committee

The RIO will define the subject matter of the investigation in a written charge to the committee that:

- Describes the allegations and related issues identified during the inquiry;
- Identifies the respondent;
- Informs the committee that it must conduct the investigation as prescribed in paragraph E. of this section;
- Reviews the definition of research misconduct as stated in this Policy;
- Informs the committee that it must evaluate the evidence and testimony to determine whether, based on a preponderance of the evidence, research misconduct occurred and, if so, the type and extent of it and who was responsible;
- Informs the committee that in order to determine that the respondent committed research misconduct it must find that a preponderance of the evidence establishes that: (1) research misconduct, as defined in this policy, occurred (respondent has the burden of proving by a preponderance of the evidence any affirmative defenses raised, including honest error or a difference of opinion); (2) the research misconduct is a significant departure from accepted practices of the relevant research community; and (3) the respondent committed the research misconduct intentionally, knowingly, or recklessly; and
- Informs the committee that it must prepare or direct the preparation of a written investigation report that meets the requirements of this Policy and any other applicable federal policies, such as 42 CFR § 93.313.

2. First Meeting

The RIO will convene the first meeting of the investigation committee to review the charge, the inquiry report, and the prescribed procedures and standards for the conduct of the investigation, including the necessity for developing a specific investigation plan. The RIO shall also direct the members of the committee that the investigation and all information relating to the investigation shall be kept confidential. The investigation committee will be provided with a copy of this statement of policy and procedures and any applicable federal research misconduct policies. The RIO will be present or available throughout the investigation to advise the committee as needed. Prior to the first meeting, the RIO shall also consult with legal counsel for the institution as to the need for counsel to provide legal advice to the committee at the first meeting and in subsequent phases in the investigation, including, but not limited to, for the purpose of reviewing institutional policies governing research misconduct proceedings, confidentiality and potential conflicts of interest.

E. Investigation Process

The investigation committee and the RIO must:

- Use diligent efforts to ensure that the investigation is thorough and sufficiently documented and includes examination of all research records and evidence relevant to reaching a decision on the merits of each allegation;
- Take reasonable steps to ensure an impartial and unbiased investigation to the maximum extent practical;
- Interview each respondent, complainant, and make a good-faith effort to interview any other available person who has been reasonably identified as having information regarding any relevant aspects of the investigation, including witnesses identified by the respondent, and record or transcribe each interview, provide the recording or transcript to the interviewee for correction, and include the recording or transcript in the record of the investigation; and
- Pursue diligently all significant issues and leads discovered that are determined relevant to the investigation, including any evidence of any additional instances of possible research misconduct, and continue the investigation to completion.
F. Time for Completion
The investigation is to be completed within 120 days of the first meeting of the investigation committee, including conducting the investigation, preparing the report of findings, providing the draft report for comment and sending the final report to ORI, if applicable. However, if the RIO determines that the investigation will not be completed within this 120-day period, he/she will submit a written request for an extension to the DO and to ORI or other applicable federal agencies, setting forth the reasons for the delay. If the request for an extension is approved by the DO and applicable federal agencies, then the RIO will ensure that periodic progress reports are filed with the approving officials.

G. Amended Charges
If issues of research misconduct that fall outside of the charge arise during the course of the investigation, the committee shall so inform the RIO, including in its communication the evidence on which its concerns are based. The RIO in consultation with the DO and the investigation committee, will consider the issues raised and, in the RIO’s discretion, provide the investigation committee with an amended charge. The respondent shall be notified of any such amendments.

VIII. The Investigation Report
A. Elements of the Investigation Report
The investigation committee and the RIO are responsible for preparing a written draft report of the investigation that:

- Describes the nature of the allegation of research misconduct, including identification of the respondent and the respondent’s curriculum vitae;
- Describes and documents the federal support, if any, including, for example, the numbers of any grants that are involved, grant applications, contracts, and publications listing federal support;
- Describes the specific allegations of research misconduct considered in the investigation;
- Includes the institutional policies and procedures under which the investigation was conducted;
- Identifies and summarizes the research records and evidence reviewed and identifies any evidence taken into custody but not reviewed; and
- Includes a statement of findings for each allegation of research misconduct identified during the investigation. Each statement of findings must: (1) identify whether the research misconduct was falsification, fabrication, or plagiarism, and whether it was committed intentionally, knowingly, or recklessly; (2) summarize the facts and the analysis that support the conclusion and consider the merits of any reasonable explanation by the respondent, including any effort by respondent to establish by a preponderance of the evidence that he or she did not engage in research misconduct because of honest error or a difference of opinion; (3) identify the specific federal support, if any; (4) identify whether any publications need correction or retraction; (5) identify the person(s) responsible for the misconduct; and (6) list any current support or known applications or proposals for support that the respondent has pending with federal agencies.

- If the committee determines that any allegation of research misconduct is true, the report shall recommend appropriate institutional actions in response to the findings of research misconduct.

The report and other retained documentation must be sufficiently detailed as to permit a later assessment of the investigation. An outline for reports to be furnished to ORI is referenced in the Appendix to this Policy.

B. Comments on the Draft Report and Access to Evidence
The RIO must give the respondent a copy of the draft investigation report for comment and, concurrently, a copy of, or supervised access to the evidence on which the report is based. The report shall clearly be labeled “DRAFT” in bold and conspicuous type font. The respondent will be allowed 30 days from the date he/she received the draft report to submit comments to the RIO. The respondent’s comments must be considered and made a part of the final investigation record. The respondent shall be directed that the draft report shall be kept confidential.

On a case-by-case basis, the RIO may provide the complainant a copy of the draft investigation report, or relevant portions of it, for comment. If so, the report shall clearly be labeled “DRAFT” in bold and conspicuous type font, and the complainant will be allowed no more than 30 days from the date on which he/she received the draft report to submit comments to the RIO. The complainant’s comments must be included and considered in the final report. The complainant shall be directed that the draft report shall be kept confidential.

C. Decision by Deciding Official
The RIO will assist the investigation committee in finalizing the draft investigation report, including ensuring that the respondent’s and, if applicable, complainant’s comments are included and considered, and transmit the final investigation report to the DO, who will determine in writing: (1) whether the institution accepts the investigation report, its findings, and the recommended institutional actions; and (2) the appropriate institutional actions in response to the accepted findings of research misconduct. If this determination varies from the findings of the investigation committee, the DO will, as part of his/her written determination, explain in detail the basis for rendering a decision different from the findings of the investigation committee. Alternatively, the DO may return the report to the investigation committee with a request for further fact-finding or analysis. When a final decision on the case has been reached, whether at this stage of after a subsequent appeal, the RIO will notify the respondent in writing. If the DO’s findings are not appealed within ten days, the DO’s findings shall become the institution’s final decision. At the time of a final decision, whether at this stage or after an appeal, the RIO will also notify the complainant in writing of the final decision. After informing ORI or other applicable federal agency, as required, the DO will determine whether law enforcement agencies, professional societies, professional licensing boards, editors of journals in which falsified reports may have been published, collaborators of the respondent in the work, or other relevant parties should be notified of the outcome of the case. The RIO is responsible for ensuring compliance with all notification requirements of funding or sponsoring agencies.

D. Appeals
The respondent, within ten days of receiving written notification of the decision of the DO, may file an appeal with the Chancellor. The appeal may result in (i) a reversal or modification of the DO’s findings of research misconduct or determinations of institutional action, (ii) the Chancellor may direct the DO to return the report to the investigation committee with a request for further fact-finding or analysis, or (iii) other action the Chancellor deems appropriate. The appeal process must be completed within 120 days of the filing of the appeal unless an extension
E. Notice to Federal Agencies of Institutional Findings and Actions

Unless an extension has been granted, the RIO must, within the 120-day period for completion of an appeal, submit the following to any applicable federal agencies as required: (1) a copy of the investigation report with all attachments and any appeals; (2) the findings of research misconduct, including who committed the misconduct; (3) a statement of whether the institution accepts the findings of the investigation; and (4) a description of any pending or completed administrative actions against the respondent.

F. Maintaining Records for Review by Federal Agencies

If required, the RIO must maintain and provide to ORI, if required, or other applicable federal agencies upon request “records of research misconduct proceedings” as that term is defined by 42 CFR § 93.317 or other applicable policies, as appropriate. Unless custody has been transferred to an appropriate federal agency or such agency has advised in writing that the records no longer need to be retained, records of research misconduct proceedings must be maintained in a secure manner for 7 years after completion of the proceeding or the completion of any federal proceeding involving the research misconduct allegation. The RIO is also responsible for providing any information, documentation, research records, evidence or clarification requested by ORI or other appropriate federal agency to carry out its review of an allegation of research misconduct or of the institution’s handling of such an allegation.

X. Institutional Administrative Actions

If the DO and any subsequent appeal determine that research misconduct is substantiated by the findings, then the DO will decide on the following:

- Withdrawal or correction of all pending or published abstracts and papers emanating from the research where research misconduct was found;
- Removal of the responsible person from the particular project, letter of reprimand, special monitoring of future work, probation, suspension, salary reduction, or initiation of steps leading to possible rank reduction or termination of employment;
- Restitution of funds to the grantor agency as appropriate; and
- Other action appropriate to the research misconduct.

XI. Other Considerations

A. Termination or Resignation Prior to Completing Inquiry or Investigation

The termination of the respondent’s institutional employment, by resignation or otherwise, before or after an allegation of possible research misconduct has been reported, will not preclude or terminate the research misconduct proceeding or otherwise limit any of the institution’s responsibilities under 42 CFR Part 93 or the corresponding research misconduct policies of other federal agencies.

If the respondent, without admitting to the misconduct, elects to resign his or her position after the institution receives an allegation of research misconduct, the assessment of the allegation will proceed, as well as the inquiry and investigation, as appropriate based on the outcome of the preceding steps. If the respondent refuses to participate in the process after resignation, the RIO and any inquiry or investigation committee will use their best efforts to reach a conclusion concerning the allegations, noting in the report the respondent’s failure to cooperate and its effect on the evidence.

B. Restoration of the Respondent’s Reputation

Following a final finding of no research misconduct, including ORI concurrence where required by 42 CFR Part 93 or other federal agencies, if required, the RIO must, at the request of the respondent, undertake all reasonable and practical efforts to restore the respondent’s reputation. Depending on the particular circumstances and the views of the respondent, the RIO should consider notifying those individuals aware of or involved in the investigation of the final outcome, publicizing the final outcome in any forum in which the allegation of research misconduct was previously publicized, and expunging all reference to the research misconduct allegation from the respondent’s personnel file. Any institutional actions to restore the respondent’s reputation should first be approved by the DO.

C. Protection of the Complainant, Witnesses and Committee Members

During the research misconduct proceeding and upon its completion, regardless of whether the institution or ORI determines that research misconduct occurred, the RIO must undertake all reasonable and practical efforts to protect the position and reputation of, or to counter potential or actual retaliation against, any complainant who made allegations of research misconduct in good faith and of any witnesses and committee members who cooperate in good faith with the research misconduct proceeding. The DO will determine, after consulting with the RIO, and with the complainant, witnesses, or committee members, respectively, what steps, if any, are needed to restore their respective positions or reputations or to counter potential or actual retaliation against them. The RIO is responsible for implementing any steps the DO approves.

D. Allegations Not Made in Good Faith

If relevant, the DO will determine whether the complainant’s allegations of research misconduct were made in good faith, or whether a witness or committee member acted in good faith. If the DO determines that there was an absence of good faith he/she will determine whether any administrative action should be taken against the person who failed to act in good faith.
Appendix

A. Summary of Items that must be Reported or Submitted to the ORI in those Cases Covered by 42 CFR Part 93

(Note: This list is subject to modification based on adherence to current ORI regulations.)

- An annual report containing the information specified by ORI on the institution’s compliance with the final rule. Section 93.302(b).
- Within 30 days of finding that an investigation is warranted, the written finding of the responsible official and a copy of the inquiry report. Sections 93.304(d), 93.309(a), and 93.310(a) and (b).
- Where the institution has found that an investigation is warranted, the institution must provide to ORI upon request: (1) the institutional policies and procedures under which the inquiry was conducted; (2) the research records and evidence reviewed, transcripts or recordings of any interviews, and copies of all relevant documents; and (3) the charges for the investigation to consider. Section 93.309.
- Periodic progress reports, if ORI grants an extension of the time limits on investigations or appeals and directs that such reports be submitted. Sections 93.311(c) and 93.314(c).
- Following completion of the investigation report or any appeal: (1) a copy of the investigation report with all attachments and any appeals; (2) the findings of research misconduct, including who committed the misconduct; (3) a statement of whether the institution accepts the findings of the investigation; and (4) a description of any pending or completed administrative actions against the respondent. Section 93.315.
- Upon request, custody or copies of records relevant to the research misconduct allegation, including research records and evidence. Section 93.317(c).
- Notify ORI immediately of the existence of any of the special circumstances specified in Section 93.318.
- Any information, documentation, research records, evidence or clarification requested by ORI to carry out its review of an allegation of research misconduct or the institution’s handling of such an allegation. Section 93.400(b).

B. Outline for an Inquiry/Investigation Report for ORI

(Note: A recommended outline for inquiry and investigation reports has been furnished by ORI and is available on the Research Support and Sponsored Programs web site. Committee members should consult this outline in preparing reports. The outline is subject to modification based on adherence to current ORI regulations.)

C. Conflict of Interest Statement

(Note: A sample conflict of interest statement is available on the Research Support and Sponsored Programs web site. This statement shall be provided to the RIO for use in implementing the conflict of interest portions of this policy.)
Degree Requirements

The faculty of the Graduate School, under the authorization of the Board of Trustees, grants the degrees listed below. In addition, the faculty of the Graduate School offers several non-degree graduate certificates. The graduate faculty, as represented by the Dean of the Graduate School and through the Graduate Council, has primary responsibility for the development, operating policies, administration, and quality of these programs. Operating through the Graduate Dean, the faculty appoints committees that directly supervise the student's program of study and committees that monitor research activities and approve theses and dissertations.

Doctoral Degrees

The degree of Doctor of Philosophy (Ph.D.) is conferred for advanced graduate work in a variety of disciplines including animal science; anthropology; biology; business administration; cell and molecular biology; chemistry; community health promotion; comparative literature; computer science; counselor education; crop, soil and environmental science; curriculum and instruction; economics; engineering; educational statistics and research methods; English; entomology; environmental dynamics; food science; geosciences; history; kinesiology; mathematics; microelectronics-photonics; philosophy; physics; plant science; poultry science; psychology; public policy; rehabilitation; and space and planetary sciences. See the Ph.D. and Ed.D Degrees tab above for general requirements.

The degree of Doctor of Education (Ed.D.) is conferred for advanced professional proficiency in a selected field of education. See the Ph.D. and Ed.D Degrees tab above for general requirements.

The degree of Doctor of Nursing Practice (D.N.P.) is conferred for professional proficiency in the area of advanced nursing practice.

The degree of Doctor of Occupational Therapy (O.T.D.) is conferred for entry-level professional proficiency in the area of clinical occupational therapy.

Specialist Degree

The degree of Education Specialist (Ed.S.) is conferred for specialization in one of two areas: curriculum and instruction and educational leadership. See the Specialist Degrees tab above for general requirements.

Master's Degrees

The degree of Master of Arts (M.A.) is conferred for graduate work of which the major portion has been done in the liberal arts. For general degree requirements, see the Master's Degrees tab above.

The degree of Master of Science (M.S.) is conferred for graduate work of which the major portion has been done in agriculture, educational statistics and research methods, engineering, kinesiology, health science, counseling, rehabilitation, human environmental sciences, biological and physical sciences, statistics, operations management, and communication disorders. For general degree requirements, see the Master's Degrees tab above.

The degree of Master of Accountancy (M.Acc.) is conferred upon a student who completes an approved program of graduate studies in accounting. See the general degree requirements for M.Acc. degree (p. 385).

The degree of Master of Business Administration (M.B.A.) is conferred upon a student whose major work is in the field of business. See the general degree requirements for M.B.A. degree (p. 390).

The degree of Master of Education (M.Ed.) is conferred upon a student who majors in the field of education. For general degree requirements, see the Master's Degrees tab above.

The degree of Master of Information Systems (M.I.S.) is conferred upon a student who completes an approved program in information systems. See the general degree requirements for M.I.S. degree (p. 401).

The degree of Master of Music (M.M.) is conferred upon a student who completes an approved program of graduate studies in music. See the general degree requirements for M.M. degree (p. 238).

The Master of Public Administration and Nonprofit Studies (M.P.A.) is conferred upon a student who completes an approved program of graduate studies in the field of public administration. See the general degree requirements for M.P.A. degree (p. 294).

The degree of Master of Fine Arts (M.F.A.) in art, creative writing, drama, or translation is conferred upon a student who completes an approved program of graduate studies in these areas. General policies and procedures for a Master of Fine Arts degree are the same as for the Master of Arts. See the individual M.F.A. programs in Art (p. 70), Creative Writing (p. 130) and Theatre (p. 341).

The Master of Science in Nursing (M.S.N.) is conferred upon a student who completes an approved program of graduate studies in this area. See the general degree requirements for M.S.N. degree (p. 250).

The degree of Master of Social Work (M.S.W.) is conferred upon a student who completes an approved program of graduate studies in this area. See the general degree requirements for M.S.W. degree (p. 315).

Graduate Certificates (Non-degree)

As defined by the Arkansas Department of Higher Education, graduate certificate programs consist of 12 to 21 hours of required course work in a focused area of study. The awarding of the certificate will be shown on the student's transcript. Students must meet the admission requirements of the Graduate School and the certificate program. Students who enter a graduate certificate program may use up to six hours of course work taken at another accredited university to meet certificate requirements, with approval of the program faculty and the Graduate School. The Graduate School does not impose a limit on the number of hours that may be shared between graduate certificate programs, but a limit may be set by the program. Students who enter a graduate certificate program must complete all certificate requirements within six years of admission to the program. For students who have been admitted to both a graduate degree program and a graduate certificate program, courses taken to meet the requirements of one may also be used to meet the requirements of the other, at the discretion of the program and the student's Advisory Committee. Graduate students fully admitted to a graduate certificate program are allowed to use 6 hours of credit to count for both an undergraduate degree and a graduate certificate. All requirements of this retroactive graduate credit policy will apply and a transcript notation will note that the courses may not be used to fulfill
requirements for a graduate degree. See the list of Graduate Certificates (p. 48) offered.

**Master's Degrees**

**Master of Accountancy**
See the Master of Accountancy program (p. 385).

**Master of Arts and Master of Science**
General minimum requirements of the Graduate School follow for the degrees of Master of Arts and Master of Science – including the several engineering degrees. Program requirements may be higher. Note: For degree requirements in the Master of Arts in Economics, see the Graduate School of Business.

1. 24 graduate semester hours and a thesis, or 30 semester hours without a thesis. (The thesis may be a departmental requirement or may be required by the major adviser.)
2. At least 50 percent of the credits (whether coursework or research) must be at the 5000 level or above.
3. No more than 50 percent of the credits may be online unless the program has been approved for online delivery.
4. A comprehensive examination.
5. A cumulative grade-point average of 2.85. (Individual departments may have higher grade standards.)

**Program of Study.** At the time of admission to the Graduate School and acceptance in a program of study leading to a graduate degree, the student is assigned to a major adviser. The choice of a major adviser is largely determined by the student's choice of a major subject.

The program of study may consist of courses chosen from one department or it may include such cognate courses from other departments as may in individual instances seem to offer greatest immediate and permanent value. As a general principle, two-thirds of the courses come from the degree program in which the student is seeking a graduate degree. The program of study must be approved by the student's Advisory Committee or, depending on program requirements, the Thesis Committee. No more than six hours of special problems (individual study) courses may count toward a 30 hour master's degree.

A student who writes a master's thesis must register for a minimum of six semester hours of master's thesis. No more than six semester hours of master's thesis enrollment may be given credit in the degree program.

Students wishing to take 3000-level undergraduate courses for graduate credit will find the necessary forms on the Graduate School website (http://www.uark.edu/grad/). Courses numbered at the 3000 level may be taken by graduate students for graduate credit only when the courses are not in the student’s major area of study and when the courses have been approved by the Dean of the Graduate School for graduate credit. The instructor for the course must hold graduate faculty status and must certify that he/she will make appropriate adjustments in assignments and grading scales to raise the level of expectation for the student to the graduate level. However, students should be aware that a minimum of 50% of the semester hours presented for the graduate degree must be at the 5000 level or above and in the student’s field of study. Individual degree programs may have more stringent requirements.

Under ordinary circumstances graduate registration is limited to 18 hours for any one semester including undergraduate courses and courses audited. Registration above 15 hours must be approved by the Graduate Dean.

All requirements for a master's degree must be satisfied within six consecutive calendar years from the first semester of enrollment in the program.

**Transfer of Credit.** The University of Arkansas will permit a student to transfer six hours of graduate credit for a 30-hour degree program (12 hours for a 60-hour degree program) from an accredited graduate school in the United States as part of the master's program, provided that the grades are “B” or better, the courses were taken within six years previous to the conferral of the current degree, and the subjects are acceptable to the program concerned. (The transfer of graduate credit from institutions outside the United States is at the discretion of the Graduate Dean.) This does not, however, reduce the residency requirement of a minimum of 24 graduate course hours for the master's degree as set by state law. Students contemplating transfer of credit should consult with the Graduate School Office in advance. Please see transfer of credit regulations, below.

**Transfer of Credit Regulations Established by the Graduate School for the Various Master’s Degrees:**

Transfer of Credit is permissible for master's programs only. Transfer of credit is not acceptable for doctoral degrees. For doctoral candidates, at the discretion of the advisory committee, the program of study may be adjusted in lieu of work taken at other colleges or universities and recognized by the candidate's committee, but it will not appear on the University of Arkansas academic record.

**Criteria for Acceptable Transfer Credit:**

1. Only graded courses (not research hours) are subject to transfer.
2. The course must have been regularly offered (not special problems or individual study) by a regionally accredited graduate school.
3. The course must have been a bona fide graduate level course, approved for graduate credit and taught by a member of the graduate faculty.
4. The course must appear on an official transcript as graduate credit from the institution offering the course.
5. The course grade must be a "B" or "A." (The student’s grade-point average is NOT to include grades on transfer courses.)
6. The course must be recommended by the student's major adviser and be applicable to the degree requirement at the University of Arkansas.
7. The course must not have been taken by correspondence or for extension credit.
8. The course must be acceptable to the department concerned and to the Graduate Dean.
9. The student must have satisfied the 24-credit hour residence requirement. (The student must have satisfactorily completed a total of 24 hours of graduate course work taken in residence.)
10. The course must have been taken within the six-year time limit of the student’s program at the University of Arkansas.

Petition for the transfer of credit from foreign universities may be made to the Graduate Dean by the department/program.

Graduate credit cannot be transferred to satisfy any of the requirements for the Master of Accountancy, Master of Business Administration, Master of Information Systems, or M.A. in Economics degrees unless the school at which the course was taken is accredited by A.A.C.S.B. Other accredited graduate programs have the discretion to deny transfer credit from non-accredited programs.

**Ex Officio Committee Members:** Student committees may contain ex officio members who have graduate faculty status on the University of Arkansas campus. However, when a person does not hold graduate faculty status on the University of Arkansas campus, he/she may still be allowed to hold an ex officio position on a student’s committee, in accordance with the following policy: When a committee member does not hold graduate faculty status at the University of Arkansas, he/she will be allowed to serve on a student’s master’s thesis or doctoral dissertation committee, in addition to the minimum number of members required by the Graduate School or the department/program. The ex officio member will be allowed to sign the thesis or dissertation and his/her vote will be recorded but will not be binding for conferring the degree. This use of the term ex officio will indicate that the person does not hold graduate faculty status at the University of Arkansas and is serving in an honorary role.

**Conflict of Interest Policies:** Students should be aware that the Graduate School has policies pertaining to the composition of advisory and thesis committees. These may be found in the Graduate Student Handbook on the Graduate School website. It should also be noted that to avoid the perception of a conflict of interest, students are discouraged from providing refreshments and faculty are discouraged from creating the expectations that students will provide refreshments during oral defenses.

**Residence Requirements.** The candidate must present a minimum of 24 course hours taken at the University of Arkansas, Fayetteville. Acceptance of transferred credit does not reduce the minimum residence requirement of 24 course hours taken at the University of Arkansas, Fayetteville.

**Thesis.** The title of the thesis must be recommended by the thesis director and the thesis committee and be approved by the Dean of the Graduate School at least three months before the date of the comprehensive examination. The thesis must be submitted for approval to the thesis committee consisting of a minimum of three faculty members who have been approved by the Dean of the Graduate School. This committee must receive the thesis in time for the student to defend the thesis and submit it to the Graduate School by the posted deadline date. In order for a thesis to be submitted to the Graduate School, a majority of the thesis committee members, including the thesis adviser (chair of the thesis committee), must have voted to approve the thesis submission and the final oral defense of the thesis. If a student feels that the major adviser (chair of the thesis committee) is preventing completion of the thesis unreasonably, the student may appeal to the Graduate Dean for resolution of the matter. For instructions on submitting an approved thesis, students should consult the Graduate School’s Guide to Preparing Theses and Dissertations. Students will be required to submit their theses to University Microfilms Incorporated (UMI/ProQuest). There may be an additional charge for this submission. We expect the thesis to be written in English. Under exceptional circumstances, another language may be used if prior approval is obtained from the Dean of the Graduate School.

A request to write in a language other than English should be submitted to the Dean of the Graduate School by the student’s thesis committee, with endorsement by the department/program head/chair/director. The request should include a proposal and justification for the exception. In all cases, one thesis abstract must be written in English and the defense of the thesis must be in English. Programs wishing to be eligible for their students to submit theses in languages other than English shall seek approval in advance from the Graduate Council.

**Comprehensive Examination/Thesis Defense.** In addition to completing other requirements, the candidate for a master’s degree must take a comprehensive examination, which may be oral and/or written as recommended by the major department. If the student has completed a thesis, the final defense of the thesis must be oral. This can substitute for the comprehensive examination, if the department so chooses. If the final defense of the thesis substitutes for the comprehensive examination, the examination may include other aspects of the candidate’s graduate work. All members of the thesis committee (and advisory committee, if the thesis defense substitutes for the comprehensive examination) must participate in the thesis defense unless the Dean of the Graduate School has approved an exception. If a committee member does not participate in the final oral defense, that person will be asked by the Graduate School to resign from the committee. While this final oral defense will not be posted on the website of the Graduate School and open to the general public, as is allowed with the doctoral dissertation defense, members of the student’s degree program and/or department, as well as other affiliated areas, may be invited to the defense by the thesis committee chair. The thesis committee chair may disallow inappropriate questions from the guests.

Students may elect to participate by distance through electronic means in their final oral defense of the thesis, if approved by the thesis faculty director. In advance of the final oral defense, the student must provide to the Graduate School a written, signed statement that he/she has elected this option.

**Grades.** All courses included in a student’s program of study for a degree must have an acceptable grade (a letter grade of A, B, or C, or a mark of CR). A mark of “S” does not carry degree credit and any course with a mark of “S” cannot be included in the final program of study. If the course is to be included in a program of study, the mark of “S” must be changed to an acceptable grade or a mark of CR, although no more than six hours of CR may be accepted toward the requirements for a graduate degree. Please note that all work for the course must have been submitted by the student to the instructor by the last day of final examinations in order to be eligible for graduation for that specific semester.

**Grade-Point Average.** To receive a master’s degree, a candidate must present a minimum cumulative grade-point average of 2.85 on all graduate courses required for the degree, unless the department requires a higher grade point average. Failing to earn such an average on the minimum number of hours, the student is permitted to present up to six additional hours of graduate credit to accumulate a grade-point average of 2.85. In the computation of grade point, all courses pursued at this institution for graduate credit (including any repeated courses) shall be considered. Students who repeat a course in an endeavor to raise their grade must count the repetition toward the maximum of six additional hours. Students should also be aware that they may not use for degree credit any course in which they received a grade of D or F. There is no grade forgiveness policy at the graduate level at the University of Arkansas. Individual departments may have higher grade standards.
Split Decisions among Advisory and Thesis Committees. When a split decision occurs among committee members of a master’s advisory or thesis committee, the majority decision will hold.

Sharing Courses Between Two Degrees. When a student earns two master’s degrees, no more than six hours of course work may be used to satisfy the requirements of both degrees, i.e. shared between the degrees. This rule pertains whether the course work is taken on the University of Arkansas campus or is transferred from another university.

Master of Arts in Teaching
The Master of Arts in Teaching (M.A.T.) degree is the initial certification program for students at the University of Arkansas and has two areas of emphasis: childhood education and secondary education. The M.A.T is a 33 semester-hour degree offered to a cohort of students in consecutive summer, fall, and spring semesters with initial enrollment in the summer semester.

Admission Requirements: Students are selected up to the maximum number designated for each cohort area of emphasis. Admission requirements for the M.A.T. degree for initial certification are: completion of an appropriate undergraduate degree program; a minimum cumulative grade-point average of 3.0 in the last 60 hours completed for the baccalaureate degree; admission to the Graduate School; admission to a Teacher Education program; completion of the pre-education core with a minimum of a “C” grade in all courses; completion of all prerequisite courses in the teaching field; successful completion of all required Praxis I and II exams; successful completion of the required criminal background check; and payment of an internship fee. (Note: Background check materials must be submitted by May 1st prior to the student teaching/internship school year.)

Program Requirements: The M.A.T. degree requires the completion of 10 to 12 hours of core courses to be selected from the following: CIED 5012 Measurement, Research, and Statistical Concepts for Teachers; CIED 5022 Classroom Management Concepts; CIED 5032 Curriculum Design Concepts for Teachers; CIED 5043 Content Area Reading in Elementary Grades, and CIED 5052 Seminar: Multicultural Issues. In addition, students must complete course work in their areas of emphasis, and a six hour internship is required. All M.A.T. students must successfully complete a comprehensive examination and one of the following: project, internship, directed research, and/or student portfolio. To receive the degree, a candidate must present a minimum cumulative grade-point average of 3.0 on all graduate courses required for the degree. Students may not present for degree credit any course in which they earned a grade of D or F.

For information on the areas of specialization, refer to the sections of this catalog on childhood education and secondary education in the Department of Curriculum and Instruction.

Admission to candidacy, residence requirements, and other requirements are the same as for the Master of Education degree.

Teacher Licensure and Licensure of Other School Personnel: The Arkansas State Board of Education issues the regulations governing the licensure of teachers in Arkansas. The Board specifies minimum cut-off scores for the Praxis I and Praxis II exams. Each application for a teacher’s license or a request to add an additional license or endorsement area requires completion of an approved program of study and documentation of passing the Praxis exams.

The Coordinator of Teacher Education will recommend students for initial teacher license who have submitted the licensing packet and successfully completed the appropriate approved program and all state licensure requirements. Those interested in seeking an additional license or endorsement should contact the Coordinator of Teacher Education at G-22 Stone House South, 479-575-6740, or the Arkansas Department of Education, 501-682-4342 for licensure information.

Admission Process for Initial Licensure:
Stage I: Enrolling in an Undergraduate Degree Program Leading to a Potential Teacher Licensure Field. Potential fields include the following:

1. Art Education — B.F.A.
2. Career and Technical Education — B.S.E.
3. Elementary Education — B.S.E.
4. Human Environmental Sciences Education — B.S.H.E.S.
5. Kinesiology P-12 — B.S.E.
6. Middle Level Education — B.S.E.
7. Music Education — B.M.
8. Secondary Education — B.A., B.S.

Stage II: Complete an Evaluation for Internship by October 1 prior to entering the M.A.T. Art and music students should complete the evaluation by October 1 prior to a fall internship and March 1 prior to a spring internship. Satisfactory completion of this form does not guarantee admission to the M.A.T. degree program or other teacher education programs. This form can be downloaded from the College of Education and Health Professions Web site. The form must be completed and returned to the Coordinator of Teacher Education, G-22 Stone House South. All requirements must be met to be cleared for the internship.

Students must meet the following criteria to be cleared for internship:

1. Successful completion of the PRAXIS I test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken after the student has completed 30 credit hours and upon completion of ENGL 1013, ENGL 1023, and MATH 1203. Please note that several departments have additional program requirements regarding the Praxis I and II. Please consult with your adviser for additional requirements.
2. Obtain a “C” or better in the following pre-education core courses: CIED 1013, CIED 3023 (PHED 3903 for KINS K-12 majors) and CIED 3033. For Elementary Education a minimum of “C” or higher must be earned in ENGL 1013, ENGL 1023, ENGL 2003, COMM 1313, and MATH 1203 unless University of Arkansas exemption is earned in one or more of the courses.
3. Complete additional licensure requirements. COEHP majors take PBHL 1103 and PEAC 1621. PHED majors take PBHL 1103 and PHED 3043. ELED majors take HIST 3383. SEED Social Studies students take either HIST 4583 or HIST 3383 and any ECON course.
4. Secondary Education majors except for Art and Music majors, must complete the following courses with a grade of “C” or higher: CIED 3023 or CIED 4023 and CIED 4131, or present demonstration of computer competencies in a portfolio.
5. Obtain a “C” or better in the six hours of program-specific courses. (See your adviser for information.)
6. Schedule a visit with your adviser for additional requirements including admission to upper-division courses.
7. The student should consult with his/her adviser regarding PRAXIS II requirements.
8. Earn a cumulative GPA of 2.70 or higher in the undergraduate degree program (special conditional admission will be considered on a case-
by-case basis for students with a GPA between 2.5 and 2.69). Some programs require a higher GPA. Consult your adviser for the GPA requirements for your program.

Stage III: Admission to M.A.T. Degree Program

Please consult with your faculty adviser for additional requirements set by your program. The following minimum criteria are necessary to be eligible for consideration for admission:

1. Meet all requirements in Stages I & II.
2. Complete an appropriate undergraduate degree program.
3. Earn a cumulative GPA of 2.70 or higher in all previous courses completed as part of a bachelor’s degree program. Some programs require a higher GPA. Consult your adviser for the GPA requirements for your program.
4. Obtain recommendation for admission from M.A.T. program area based on successful completion of portfolios, evaluation for internship, GPA requirements, course work requirements, selected written recommendations, an interview, and other requirements specified by your program.
5. Obtain admission to the Graduate School.

Enrollment in each cohort will be limited. Transfer students will be allowed to enter the program on a space-available basis and must progress through all three admission stages.

Stage IV: Graduation requirements for the Master of Arts in Teaching (M.A.T.)

1. Meet all requirements in Stages I — III.
2. Complete a minimum of 33 graduate semester hours as specified by program area.
3. Satisfactorily complete an internship. The internship will be completed at a school/district in Benton or Washington counties that has been approved by the Northwest Arkansas Partnership Steering Committee.
4. Pass the appropriate Praxis test (see adviser for the appropriate test) by meeting or exceeding the Arkansas Department of Education cut-off scores. The test is required for most programs. Please consult with your adviser.
5. Successfully complete the comprehensive examination.
6. Consult with your adviser for other requirements.
7. Apply for degree at the Graduate School, 119 Gearhart Hall.

Licensure: Students who have completed Stages I — III must obtain a licensure packet from the Coordinator of Teacher Education, Peabody Hall room 117, prior to entering internship.

Students should always consult the Coordinator of Teacher Education for licensure requirement changes. Students will not be licensed to teach in Arkansas until they have met all requirements for licensure as set forth by the Arkansas Department of Education.

Students who have completed the B.M. or B.F.A. in music or art education and have completed the internship may obtain the licensure packet from the Coordinator of Teacher Education, Peabody Hall room 117.

Usually licensure in another state is facilitated by qualifying for a license in Arkansas. An application in another state must be made on the application form of that state, which can be obtained by request from the State Teacher Licensure office in the capital city. An official transcript should accompany the application. In many instances the applications are referred to the Coordinator of Teacher Education to verify program completion in teacher education.

Master of Athletic Training
See the Master of Athletic Training program (p. 74).

Master of Business Administration
See the Business Administration program (p. 390).

Master of Education

Programs of advanced study leading to the degree of Master of Education (M.Ed.) are offered in adult and lifelong learning, educational leadership, educational technology, elementary education, higher education, physical education, recreation and sport management, secondary education, special education, and human resource and workforce development education.

Program Requirements: General minimum requirements for the degree of Master of Education (M.Ed.) follow:

1. 27 semester hours and a thesis or 33 semester hours and no thesis.
2. A written comprehensive examination (portfolio in educational technology)
3. A cumulative grade-point average of 3.00.
4. A minimum of 24 graded UA course hours.

Admission Requirements: After a student has been admitted to the Graduate School, the student may seek acceptance into one of the M.Ed. programs. Upon acceptance to a program area, the student is assigned an adviser. Acceptance in a program should be accomplished before the completion of the first graduate course. Some programs require students to take the Graduate Record Examinations, the Miller Analogies Test, or the National Teachers Examination. All Master of Education degree programs include a minimum of 33 semester hours.

Admission to Candidacy. Admission to candidacy will be met when the following have been completed:

1. unconditionally admitted to graduate standing.
2. accepted to a program and assigned an adviser.
3. completion of 12 semester hours of graduate credit over and above any entrance deficiencies or conditions.

Transfer of Credit. Transfer of credit regulations established by the Graduate School for the Master of Arts and Master of Science degree apply to the Master of Education degree. See the Master of Arts/Master of Science section above for more information.

Residence Requirements. The candidate must present a minimum of 24 graded course hours taken in residence at the University of Arkansas, Fayetteville. Acceptance of transferred credit does not reduce the minimum residence requirement of 24 course hours taken on the University of Arkansas, Fayetteville, campus or through approved University of Arkansas, Fayetteville, distance courses.

All requirements for a master’s degree must be satisfied within six consecutive calendar years.

Other Requirements. Students who do not have a grade-point average of 3.00 upon completion of Master of Education program requirements may be allowed to submit up to six additional hours of graduate credit in
residence on the Fayetteville campus or at approved Graduate Resident Centers to accumulate a 3.00 average. Students should also be aware that they may not use for degree credit any course in which they received a grade of D or F.

The policies and procedures approved for the Master of Arts and Master of Science degrees also apply to the Master of Education degree. In addition to completing other requirements, the candidate must pass a comprehensive examination administered by the respective program area (portfolio for educational technology).

Master of Fine Arts
See the Art (p. 70), Creative Writing (p. 130) and Theatre (p. 341) programs.

Master of Information Systems
See the Information Systems program (p. 401).

Master of Music
See the Music program (p. 238).

Master of Public Administration
See the Public Administration program (p. 294).

Master of Science in Computer Science
See the Computer Science program (p. 120).

Master of Science in Nursing
See the Nursing program (p. 250).

Master of Social Work
See the Master of Social Work page (p. 315).

Specialist Degrees
Programs of advanced study leading to the degree of Educational Specialist (Ed.S.) are offered in curriculum and instruction and educational leadership, and may be issued by the Graduate School to those students whose major objective is to develop educational competency in one of these specialized areas. All graduate courses applicable to this degree must be taken on the Fayetteville campus unless otherwise specified.

Admission to the Program. Students who wish to become candidates for the degree of Educational Specialist are expected to first complete work equivalent to the requirements for the master’s degree as determined by program faculty and must apply to be admitted to the Graduate School and the specific program of study. A student cannot satisfy any part of the residence requirement for the educational specialist degree until after he/she has been officially admitted to the educational specialist program.

Program Requirements. All Ed.S. programs contain a minimum of 30 semester hours of graduate work beyond the master’s degree in a planned program. The program for each student must include the requirements specified in the particular program to which the student has been accepted; assessed deficiencies in the area of specialization; assessed courses to meet current professional requirements of the Master of Education degree; a minimum of nine semester hours of graduate work in a related field(s) other than the area of specialization; a graduate course in research, statistics, or data processing applicable for educational specialists; and an original project, research paper, or report for which variable credit up to six semester hours is required. A grade-

point average of 3.25 is required for the Educational Specialist degree program on all work presented as part of the Ed.S. degree program.

After a student is accepted into an Ed.S. program, a committee with a minimum of three members will be appointed, and a program of study will be established outlining the minimum requirements. Only the adviser and one other member of the student’s committee may be from the program area sponsoring the program. The committee’s responsibilities include the determination of deficiencies, the acceptability of previous graduate work, the approval of the candidate’s program of study, the approval of the original project or research paper, and the conduct of a final examination. This examination will be a comprehensive oral evaluation scheduled near the end of the candidate’s program and will include one or both of the following: 1) evaluation of the original project, research paper, or report, and 2) evaluation covering material related to the background and professional preparation of the candidate. A written examination may not be taken to substitute for the oral examination. A written account of the original project, research paper, or report will be filed with the program area sponsoring the candidate’s program of study.

Residence Requirements: The last 30 hours of the program must be completed within a period of six years from the first semester of admission to the program. A minimum of 30 hours of resident study at the University of Arkansas, Fayetteville, in an approved program is required. Credit earned in any University of Arkansas center, off-campus workshop or special course will not count as residence study in the Ed.S. program. The only exception is course work completed at the University of Arkansas at Pine Bluff Graduate Resident Center, the University of Arkansas Community College at Hope Graduate Resident Center and Phillips Community College of the University of Arkansas at Helena Graduate Resident Center by students pursuing the Ed.S. degree in education with a specialization in educational leadership.

Upon completion of all requirements, candidates are issued an Educational Specialist degree. Their names appear on the commencement program, but there is no distinctive academic regalia in connection with the Educational Specialist degree.

Ph.D. and Ed.D. Degrees
Programs of advanced study leading to the degree of Doctor of Philosophy (Ph.D.) are offered in: animal science, anthropology, biology, business administration, cell and molecular biology, chemistry, community health promotion, comparative literature and cultural studies, computer science, counselor education, crop, soil, and environmental sciences, curriculum & instruction, economics, engineering, education policy, educational statistics and research methods, English, entomology, environmental dynamics, food science, geosciences, history, kinesiology, mathematics, microelectronics-photonics, philosophy, physics, plant science, poultry science, psychology, public policy, rehabilitation, and space and planetary sciences. (Note: For the Ph.D. in Business Administration and Economics, see the Graduate School of Business.)

Programs of advanced study leading to the degree of Doctor of Education (Ed.D.) are offered in educational leadership, higher education, recreation and sport management, and human resource and workforce development education.

The degrees of Doctor of Philosophy and Doctor of Education are awarded in recognition of high scholarly attainment as evidenced by a period of successful advanced study with at least a 3.0 cumulative graduate grade-point average, the satisfactory completion of certain prescribed examinations, a minimum number of degree credits as specified by the Arkansas Department of Higher Education, and the
development of a dissertation covering some significant aspect of a major field of learning.

Students who wish to become candidates for the degree of Doctor of Philosophy or Doctor of Education are expected to complete work equivalent to the requirements for the master’s degree as determined by program faculty and must apply to be admitted to the Graduate School and the specific program of study.

The University of Arkansas does not recognize any official designation such as "ABD" or "Ph.D. candidate" or "Ph.D. (c)," and it is expected that if the student uses Ph.D. or Ed.D. after his/her name, it is only after the degree has been conferred. To do otherwise will be considered academic fraud.

Immediately after admission to the program, with the approval of the Dean of the Graduate School, a Doctoral Program Advisory Committee will be appointed from the graduate faculty to evaluate the student's preparation and fitness for further graduate work. This committee will serve in an advisory capacity in working out and directing a suitable program of advanced study and investigation. The student’s major adviser shall serve as chair of the committee. Appointment of this committee does not constitute admission to candidacy for the degree of Doctor of Philosophy or Doctor of Education, a very important and significant step in the student’s graduate career, which must be taken after the student has completed approximately two years of graduate work beyond the baccalaureate degree.

The degree must be completed within seven consecutive calendar years from the first semester of admission to the program.

**Program of Study.** The objectives of the program of study leading to the degree of Doctor of Philosophy or Doctor of Education shall be scholarly achievement of high order and the development of a fundamental understanding of the major field and its relation to supporting fields of knowledge. The nature of the program of study will vary somewhat, depending upon the major field of study and the objective of the prospective candidate, but will consist of a minimum of 72 graduate semester credit hours beyond the bachelor's degree and 42 graduate-only semester hours beyond the master's degree. Program requirements must balance credit hours for required coursework, research, and dissertation preparation. In addition, a minimum of 50% of the first 30 credit hours and at least 42 of the final credit hours presented for the doctoral degree must be at the 5000 level or above. No more than 50% of the credits presented for the degree may be online unless the program has been approved for online delivery.

**Ex Officio Committee Members:** Student committees may contain ex officio members who have graduate faculty status on the University of Arkansas campus. However, when a person does not hold graduate faculty status on the University of Arkansas campus, he/she may still be allowed to hold an ex officio position on a student’s committee, in accordance with the following policy:

When a committee member does not hold graduate faculty status at the University of Arkansas, he/she will be allowed to serve on a student’s master’s thesis or doctoral dissertation committee, in addition to the minimum number of members required by the Graduate School or the department/program. The ex officio member will be allowed to sign the thesis or dissertation and his/her vote will be recorded but will not be binding for conferring the degree. This use of the term ex officio will indicate that the person does not hold graduate faculty status at the University of Arkansas and is serving in an honorary role.

**Conflict of Interest Policies:** Students should be aware that the Graduate School has policies pertaining to the composition of advisory and dissertation committees. These may be found in the Graduate School Handbook on the Graduate School website. It should also be noted that to avoid the perception of a conflict of interest, students are discouraged from providing refreshments and faculty are discouraged from creating the expectation that students will provide refreshments during oral defenses.

**Transfer of Credit.** Transfer of credit is not acceptable for doctoral degrees. For doctoral candidates, at the discretion of the advisory committee, the program of study may be adjusted in lieu of work taken at other colleges or universities and recognized by the candidate’s committee, but it will not appear on the University of Arkansas academic record.

**Grades.** All courses included in a student's program of study for a degree must have an acceptable grade (a letter grade of A, B, or C) or a mark of CR. A mark of "S" does not carry degree credit and any course with a mark of "S" cannot be included in the final program of study. If the course is to be included in a program of study, the mark of "S" must be changed to an acceptable grade or a mark of CR, although no more than six hours of CR may be accepted toward the requirements for a graduate degree. Please note that all work for the course must have been submitted by the student to the instructor by the last day of final examinations in order to be eligible for graduation for that specific semester.

**Grade-Point Average Requirement.** A minimum cumulative graduate grade-point average of 3.0 is required to earn a Doctor of Philosophy or Doctor of Education degree. Note: For students admitted to the Graduate School prior to Fall 2001, the minimum cumulative graduate grade-point average required to earn a Doctor of Philosophy or Doctor of Education degree was 2.85. Students should also be aware that they may not present for degree credit any course in which they earned a grade of D or F.

**Language Requirement.** Foreign language requirements for the Doctor of Philosophy degree vary from department to department. For specific details see departmental statements. These requirements should be completed early in the doctoral program. The Doctor of Education degree does not have a foreign language requirement.

**Examination for Candidacy.** After completing approximately two years of graduate study, the prospective candidate must take candidacy examinations in specified fields of study in accordance with the requirements of the program/department in which the candidate is working. These examinations may be either written or written and oral, but the expectation is that their purpose is to determine if a student is prepared to move to the independent research stage of his/her degree. Upon satisfactorily completing these examinations, the student may be admitted to candidacy and may proceed to work toward completion of the remaining requirements for the degree. The Graduate School should be notified within two weeks of the student being admitted to candidacy. Note: The Graduate School considers the Advisory Committee to be responsible for administering and evaluating the candidacy examinations, but degree programs may have different structures.

**Registration.** All doctoral students who have been admitted to candidacy must enroll in a minimum of one hour of graduate course work or dissertation credit every major semester (fall, spring) until they graduate. Under unusual circumstances, this enrollment requirement may be waived for post-candidacy doctoral students for up to two years, with an approved request for a leave of absence. See the Graduate School
Registration Policy (p. 430). Note: doctoral students must also be enrolled in a minimum of one hour of graduate credit in the semester that they graduate. Students who fail to enroll each major semester after candidacy will have additional hours of dissertation credit added to the final semester of enrollment; this will be above the 18 hours of dissertation credit required for the degree.

**Dissertation.** Each candidate must complete a doctoral dissertation on some topic in the major field. The topic assignment shall be made and a title filed with the Dean of the Graduate School at least one year before the final examination, the specific problem and subject of the dissertation to be determined by the major adviser, the candidate, and the advisory committee. The completed dissertation must be a definite, scholarly contribution to the major field. This contribution may be in the form of new knowledge of fundamental importance, or of modification, amplification, and interpretation of existing significant knowledge. We expect the dissertation to be written in English. Under exceptional circumstances, another language may be used if prior approval is obtained from the Dean of the Graduate School. A request to write in a language other than English should be submitted to the Dean of the Graduate School by the student’s dissertation committee, with endorsement by the department/program head/chair/director, prior to admission to candidacy for the degree sought. The request should include a proposal and justification for the exception. In all cases, one dissertation abstract must be written in English and the defense of the dissertation must be in English. Programs wishing to be eligible for their students to submit dissertations in languages other than English shall seek approval in advance from the Graduate Council.

Each doctoral candidate must register for a minimum of 18 hours of doctoral dissertation. After the student has passed the candidacy examinations, the student must register for at least one hour of dissertation (or graded course work) each major semester and during the semester of graduation, whether the student is in residence or away from the campus. Before the final degree is conferred, registration will be assessed for each semester in which a student fails to register without prior approval of the Dean of the Graduate School.

The dissertation must be submitted for approval to the dissertation committee consisting of a minimum of three faculty members who have been approved by the Dean of the Graduate School. This committee must receive the dissertation in time for the student to defend the dissertation and submit it to the Graduate School by the posted deadline date. Students will be required to provide documentation that they did the majority of the work for each paper submitted under the published paper option where the papers have co-authors. For instructions on submitting an approved dissertation, students should consult the Graduate School’s Guide to Preparing Theses and Dissertations. Students will be required to submit their dissertations to University Microfilms Incorporated (UMI/ProQuest).

**Final Examination.** The candidate’s final examination for the degree of Doctor of Philosophy or Doctor of Education will be oral. At least two weeks in advance, the major adviser will forward to the Dean of the Graduate School notification about the date, time and place of the final oral examination. The examination will be primarily concerned with the field of the dissertation, but may also include other aspects of the candidate’s graduate work. The doctoral dissertation committee is responsible for insuring that the dissertation contributes new knowledge of fundamental importance or significantly modifies, amplifies, or interprets existing knowledge in a new and important manner. All members of the dissertation committee must participate in the final oral defense of the dissertation unless the Dean of the Graduate School has approved an exception. This participation may be by distance. If they do not participate in the final oral defense, in person or by distance, they will be asked by the Graduate School to resign from the committee. While this examination is open to the public, the exam is controlled by the student’s committee chair. Questions from the public are at the discretion of the committee chair. If the committee chair expects to allow questions from the public, the student must be so advised. The chair will insure that questions from the public are appropriate by disallowing those which are not.

Students may elect to participate by distance through electronic means in their final oral defense of the dissertation, if approved by the dissertation faculty director. In advance of the final oral defense, the student must provide to the Graduate School a written, signed statement that he/she has elected this option.

**Split Decisions Within Advisory and Dissertation Committees.** In the situation when there is a split decision among committee members of a doctoral program advisory or dissertation committee, the situation must be resolved to the satisfaction of each committee member. In the event that each committee member is not satisfied, the committee member may insist on the necessary steps to reach a resolution or elect to step down from the committee. In unusual circumstances, the Dean of the Graduate School may remove a faculty member from a student’s thesis/dissertation or advisory committee, or make an alternative arrangement (e.g., assign a representative from the Graduate faculty to serve on the committee).

**Professional Doctoral Degrees**

Currently, the University of Arkansas offers two professional doctoral degrees:

- Doctor of Nursing Practice (D.N.P.)
- Doctor of Occupational Therapy (O.T.D.)

The degree of Doctor of Nursing Practice is conferred for advanced professional proficiency in the area of nursing advanced nursing practice.

The degree of Doctor of Occupational Therapy is conferred for entry-level professional proficiency in the area of clinical occupational therapy.

The degrees of Doctor of Nursing Practice and Doctor of Occupational Therapy are awarded in recognition of high scholarly attainment and the fulfillment of expectations set by the respective professional and accrediting organizations. In each case, there will be ethical standards set in addition to the curriculum requirements.

Students who wish to become candidates for the degree of Doctor of Nursing Practice or Doctor of Occupational Therapy must apply to be admitted to the Graduate School and the specific program of study.

**Doctor of Nursing Practice:** After admission, an adviser will be assigned to guide the student’s plan of study, and a Doctoral Program Advisory Committee will be appointed from the graduate faculty to guide the development of the D.N.P. Project, the culminating experience in which students engage in practice scholarship. Refer to the Eleanor Mann School of Nursing Graduate Student Handbook for specific requirements.

**Doctor of Occupational Therapy:** The doctoral capstone provides an in-depth exposure to one or more of the following: clinical practice skills, research skills, administration, leadership, program and policy development, advocacy, education, and theory development. The doctoral capstone consists of two parts, a Capstone project and a Capstone experience. During the second year in the O.T.D. program (of three), a Doctoral Capstone Advisory Committee will be appointed from the
graduate faculty to guide the development of the O.T.D. Capstone Project. Refer to the O.T.D. Handbook for specific requirements.

**Ex Officio Committee Members.** Student committees may contain *ex officio* members who have graduate faculty status on the University of Arkansas campus. However, when a person does not hold graduate faculty status on the University of Arkansas campus, the faculty member may still be allowed to hold an *ex officio* position on a student’s committee, in accordance with the following policy:

When a committee member does not hold graduate faculty status at the University of Arkansas, he or she will be allowed to serve on a student’s advisory or project/capstone committee, in addition to the minimum number of members required by the department or program. The *ex officio* member’s vote will be recorded but will not be binding for the degree. This use of the term *ex officio* will indicate that the person does not hold graduate faculty status at the University of Arkansas and is serving in an honorary role.

**Conflict of Interest Policies.** Students should be aware that the Graduate School has policies pertaining to the composition of advisory and project/capstone committees. These may be found in the Graduate Student Handbook on the Graduate School website. It should also be noted that to avoid the perception of a conflict of interest, students are discouraged from providing refreshments and faculty are discouraged from creating the expectation that students will provide refreshments during oral defenses.

**Online Credits.** No more than 50% of the credits presented for the degree may be online unless the program has been approved for online delivery.

**Transfer of Credit.** Transfer of credit is not acceptable for doctoral degrees. For doctoral candidates, at the discretion of the advisory committee, the program of study may be adjusted in lieu of work taken at other colleges or universities and recognized by the candidate’s committee, but it will not appear on the University of Arkansas academic record.

**Grades.** All courses included in a student’s program of study for a degree must have an acceptable grade (a letter grade of A, B, or C) or a mark of CR. A mark of “S” does not carry degree credit and any course with a mark of “S” cannot be included in the final program of study. If the course is to be included in a program of study, the mark of “S” must be changed to an acceptable grade or a mark of CR. Please note that all work for the course must have been submitted by the student to the instructor by the last day of final examinations in order to be eligible for graduation for that specific semester.

**Grade-Point Average Requirement.** A minimum cumulative graduate grade-point average of 3.0 is required to earn a Doctor of Nursing Practice or Doctoral of Occupational Therapy degree. Students should also be aware that they may not present for degree credit any course in which they earned a grade of D or F.

**Split Decisions Within Advisory and Project/Capstone Committees.** In the situation when there is a split decision among committee members of a doctoral program advisory or project/capstone committee, the situation must be resolved to the satisfaction of each committee member. In the event that each committee member is not satisfied, the committee member may insist on the necessary steps to reach a resolution or elect to step down from the committee. In unusual circumstances, the Dean of the Graduate School may remove a faculty member from a student’s project/capstone or advisory committee, or make an alternative arrangement (e.g., assign a representative from the graduate faculty to serve on the committee).

The Service Learning Initiative
The Service Learning Initiative is a joint initiative between the University of Arkansas Provost Office, the Honors College, and the Division of Student Affairs. Service learning builds critical thinking skills while engaging in academic courses that promote experiential, community-based activities. Formulated service learning courses must meet the committee-approved service learning definition and criteria, and be approved for designation by the Service Learning Committee.

Service Learning Definition
Service learning is a credit-bearing, faculty-directed, teaching-learning experience that is course specific. Service Learning strengthens academic content knowledge and sense of civic responsibility. Students build critical thinking skills as they engage in experiential, community-based activities that are aligned with and integral to academic course work. At the same time, the community (real people in real situations) benefits from assistance that would otherwise not be available.

Courses Page
Students can visit the Service Learning program course page (https://servicelearning.uark.edu/courses/) to find courses that have been designated with service-learning components. Faculty can find criteria (http://servicelearning.uark.edu/) to develop courses that will be considered for designation as service learning courses.

Service Learning Steering Committee
- Alison Turner, Fay Jones School of Architecture and Design
- Casey Kayser, J. William Fulbright College of Arts and Sciences
- Fran Hagstrom, College of Education and Health Professions
- Sarah Hernandez, College of Engineering
- Lisa Wood, Dale Bumpers College of Agricultural, Food and Life Sciences
- Molly Jensen, Department of Marketing, Sam M. Walton College of Business
- Veronica Mobley, Office of Study Abroad
- Chelsea Hodge and Katie Wilson, Honors College
- Angela M. Doss, School of Law
- Lora Lennertz, University Libraries
- Lori Holyfield and Jack Kern, Teaching and Faculty Support Center
Graduate Council

Kim Needy, Dean of the Graduate School and International Education; Professor, Industrial Engineering

Patricia R. Koski, Associate Dean of the Graduate School and International Education; Associate Professor, Sociology and Criminal Justice; Chair (Ex-officio)

Vikas Anand, Associate Professor, Management

Mindy S. Bradley, Associate Professor, Sociology and Criminal Justice

Kathleen Collins, Professor, Curriculum and Instruction

T. Paul Cronan, Professor, Information Systems

Andrew J. Dowdle, Professor, Political Science

Judy Ganson, Associate Librarian, University Libraries

Valerie H. Hunt, Associate Professor, Political Science and Public Policy

Terry Martin, Associate Dean of the College of Engineering; Professor, Electrical Engineering

Michael T. Miller, Associate Dean of the College of Education and Health Professions (Ex-officio); Professor, Human Resources

Anne O’Leary-Kelly, Associate Dean of the Walton College of Business (Ex-officio); Professor, Management

Lona J. Robertson, Associate Dean, Bumpers College of Agricultural, Food and Life Sciences, Professor, Human Environmental Sciences

Melissa Harwood-Rom, Senior Associate Dean of Students (Ex-officio)

Yvette Murphy-Erby, Associate Dean of the Fulbright College of Arts and Sciences (Ex-officio); Professor, Social Work

Thad Scott, Assistant Professor, Crop, Soil and Environmental Sciences

R. Panneer Selvam, Professor, Civil Engineering

Fred Spiegel, Professor, Biological Sciences

Jacquelyn D. Wiersma, Assistant Professor, Human Environmental Sciences

Two representatives from the Graduate Dean’s Student Advisory Board
Accreditations

The University of Arkansas, Fayetteville, is accredited by the Higher Learning Commission.

Some colleges and programs are also accredited by other agencies, associations, or professional organizations, including those listed below.

Dale Bumpers College of Agricultural, Food and Life Sciences
The Jean Tyson Child Development Study Center is accredited by the National Association for the Education of Young Children (NAEYC). Teacher education programs in agriculture and family and consumer sciences are coordinated with educational programs in the College of Education and Health Professions and are accredited by the National Council for Accreditation of Teacher Education (NCATE).

J. William Fulbright College of Arts and Sciences
The Master of Music (M.M.) degree program in the Department of Music is accredited by the National Association of Schools of Music. The Doctor of Philosophy (Ph.D.) degree program in clinical psychology is accredited by the American Psychological Association. The Master of Social Work (M.S.W.) degree program is accredited by the Council of Social Work Education.

Sam M. Walton College of Business
The Sam M. Walton College of Business offers degree programs for graduate students at both the master’s and doctoral levels and has been a member of and accredited by AACSB International, the Association to Advance Collegiate Schools of Business, since 1931. The accounting program was separately accredited in 1986 at both the bachelor’s and master’s levels. The master’s in business administration program was approved in 1963. Accreditation by AACSB and membership in that organization signifies the college’s commitment to AACSB goals of promoting and achieving the highest standards of business education.

College of Education and Health Professions
The teacher education programs in the College of Education and Health Professions are accredited by the National Council for Accreditation of Teacher Education. The M.A.T. program in childhood education is in compliance with the standards of the National Association for the Education of Young Children. The various M.A.T. licensure programs in secondary education are in compliance with the standards of the specialty organizations including National Council of Teachers of English, National Council of Teachers of Mathematics, National Science Teachers Association, and National Council for the Social Studies. The Master of Science degree program in speech pathology-audiology is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association. The Master of Science degree in rehabilitation counseling is accredited by the Council on Rehabilitation Education.

College of Engineering
The College of Engineering offers the following graduate programs accredited by the Engineering Accreditation Commission of ABET (visit http://www.abet.org for more information): Master of Science in Environmental Engineering (M.S.En.E.), and Master of Science in Biomedical Engineering (M.S.B.M.E.)

School of Law
The degree programs in the School of Law on the Fayetteville campus are accredited by both the American Bar Association and the Association of American Law Schools.
Graduate Faculty

Graduate faculty are listed in alphabetical order.

A

Abraha, Daniel, Ph.D. (Oakland University), M.M. (University of Nebraska at Omaha), B.M.E. (Temple University), Assistant Professor, Department of Music, 2016.

Ackerson, Michael D., Ph.D. (University of Arkansas), M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 1986.

Acrey, Cash, M.B.A. (University of Arkansas), B.A. (University of Arkansas at Little Rock), Clinical Assistant Professor, Department of Finance, 2013.

Adams, Douglas James, Ph.D., M.A. (University of Arizona), Associate Professor, Department of Sociology and Criminology, 1995.

Adams, Paul D., Ph.D. (Case Western Reserve University), B.S. (Louisiana State University), Associate Professor, Department of Chemistry and Biochemistry, 2006.

Adams, Justin J., Ph.D. (University of South Carolina, M.Ed., B.A. (Winthrop University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2018.

Adler, Jacob, Ph.D., A.B. (Harvard University), Associate Professor, Department of Philosophy, 1984.

Agana, Carol E., M.N.Sc. (University of Arkansas for Medical Sciences), B.S.E. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 1998.

Ahrendsen, Bruce L., Ph.D., M.S. (North Carolina State University), B.S. (Iowa State University), Professor, Department of Agricultural Economics and Agribusiness, 1990.

Ahrens, Chelsey, Ph.D. (Texas Tech), M.S. (University of Georgia), B.S.A. (University of Arkansas), Assistant Professor, Department of Animal Science, 2015.

Akeroyd, John R., Ph.D., M.A. (Indiana University at Bloomington), B.A. (University of Louisville), Professor, Department of Mathematical Sciences, 1986.

Al Faouri, Radwan A., Ph.D. (University of Arkansas), Research Assistant Professor, Nanotechnology, 2015.

Allee, Kristian, Ph.D., M.B.A. (Indiana University), B.S. (Brigham Young University), Associate Professor, Department of Accounting, 2016.

Allen, Myria, Ph.D., M.A., B.A. (University of Kentucky), Professor, Department of Communication, 1993.

Allen, Bradley, Ph.D. (University of Texas at San Antonio), B.S. (Brigham Young University), Assistant Professor, Department of Marketing, 2017.

Allison, Neil T., Ph.D. (University of Florida), B.S. (Georgia College), Associate Professor, Department of Chemistry and Biochemistry, 1980.

Almenara, Erika, Ph.D. (University of Michigan), M.A. (University of Wisconsin-Milwaukee), B.A. (Feminine University of the Sacred Heart), Assistant Professor, Department of World Languages, Literatures and Cultures, 2015.

Almodovar Montanez, Jorge L., Ph.D. (Iowa State University), Assistant Professor, Ralph E. Martin Department of Chemical Engineering, 2018.

Aloia, Lindsey S., Ph.D. (Pennsylvania State University), M.A. (University of Delaware), B.A. (College of New Jersey), Assistant Professor, Department of Communication, 2017.

Aloytus, John, Ph.D. (Temple University), B.S. (University of Colombo, Sri Lanka), Professor, Department of Supply Chain Management, 1995.

Airubaye, Adnan Ali Khalaf, Ph.D., M.Ed. (University of Arkansas), M.S., B.V.M. (University of Baghdad, Iraq), Clinical Assistant Professor, Department of Biological Sciences, 2013.

Altom, Carol, M.B.A. (San Diego State University), B.S. (United States Naval Academy), Instructor, Program in Operations Management, 2012.

Alverson, Andrew James, Ph.D. (University of Texas at Austin), M.S. (Iowa State University), B.S. (Grand Valley State University), Associate Professor, Department of Biological Sciences, 2012.

Aly, Mohamed H., Ph.D. (Texas A&M), M.S., B.S. (Zagazig University), Assistant Professor, Department of Geosciences, 2013.

Aman, Trish, Ph.D. (Purdue University), M.A. (University of Kentucky), B.S.E. (University of Arkansas), Associate Professor, Department of Communication, 1994.

Anand, Vikas, Ph.D. (Arizona State University), M.B.A. (Indian Institute of Foreign Trade), M.Sc. (Birla Institute of Technology), Professor, Department of Management, 1999.

Andree, David, M.F.A. (State University of New York), B.F.A. (Minneapolis College of Art and Design), Assistant Professor, School of Art, 2015.

Andree, Kara M., M.F.A. (State University of New York at Buffalo), B.F.A. (Minneapolis College of Art and Design), Instructor, School of Art, 2016.

Andrews, David, Ph.D. (Syracuse University), M.S., B.S.E.E. (University of Missouri-Columbia), Professor, Department of Computer Science and Computer Engineering, 2008.

Ang, Simon S., Ph.D. (Southern Methodist University), M.S.E.E. (Georgia Institute of Technology), B.S.E. (University of Arkansas), Professor, Department of Electrical Engineering, 1988.

Anthony, Nick, Ph.D. (Virginia Polytech Institute and State University), M.S., B.S. (The Ohio State University), Professor, Department of Poultry Science, 1990.

Antov, Nikolay Atanasov, Ph.D. (University of Chicago), M.A. (Bilkent University, Turkey), B.A. (American University in Bulgaria), Associate Professor, Department of History, 2011.

Apple, Jason, Ph.D., M.S. (Kansas State University), B.S.A. (University of Animal Science), Professor, Department of Animal Science, 1995.

Arenberg, Nancy M., Ph.D. (University of Arizona), M.A. (University of Illinois, Champaign-Urbana), B.A. (Grinnell College), Associate Professor, Department of World Languages, Literatures and Cultures, 1996.

Arnold, Mark E., Ph.D., B.S. (Northern Illinois University), A.S. (Rock Valley College), Associate Professor, Department of Mathematical Sciences, 1993.

Ashton, Dub, Ph.D. (University of Georgia), M.B.A., B.S.B.A. (Memphis State University), Associate Professor, Department of Marketing, 1981.

Aslin, Larry W., M.A., B.A. (University of Missouri-Columbia), Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 1975.

Atungulu, Griffiths Odhiambo, Ph.D., M.S. (Iwate University, Japan), B.S. (Jomo Kenyatta University of Agriculture and Technology, Kenya), Associate Professor, Department of Food Science, 2013.

Atwood, T. J., Ph.D. (University of Illinois), M.B.A. (University of Texas at Austin), B.S. (Western Kentucky University), Associate Professor, Department of Accounting, 2014.

Austin, Shawn, Ph.D., M.A. (University of New Mexico), B.A. (Brigham Young University-Idaho), Assistant Professor, Department of History, 2015.

Avalos, Lisa, Ph.D. (Northwestern University), J.D. (New York University), M.A., B.A. (Northwestern University), Associate Professor, School of Law, 2013.

B

Bacon, Robert Keith, Ph.D. (Purdue University), M.S., B.S.A., (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 1984.

Bailey, Carlton, J.D. (University of Chicago), B.A. (Talladega College), Professor, School of Law, 1978.
Bailey, Constance, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Alcorn State University), Assistant Professor, Department of English, 2016.

Balachandran, Kartik, Ph.D., M.S. (Georgia Institute of Technology), B.S. (National University of Singapore), Associate Professor, Department of Biomedical Engineering, 2012.

Balasubramanian, Mahendran, Ph.D. (Oklahoma State University), M.S. (Auburn University), B.Tech. (Anna University), Assistant Professor, School of Human Environmental Sciences, 2017.

Balda, Juan Carlos, Ph.D. (University of Natal), B.S. (Universidad del Sur), University Professor, Department of Electrical Engineering, 1989.

Bantón, Caree A., Ph.D. (Vanderbilt University), M.A. (University of Ghana), M.A. (University of New Orleans), B.A./B.P.A. (Grambling State University), Associate Professor, Department of History, 2013.

Bantón, Robert R., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Pittsburgh), Professor, Ralph E. Martin Department of Chemical Engineering, 1993.

Bell, Steven M., Ph.D. (University of Kansas), B.A. (University of Kentucky), B.A. (University of Kansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1992.

Bell, Karmen V., M.Ed. (Indiana Wesleyan University), Clinical Instructor, Department of Curriculum and Instruction, 2015.

Bellaiche, Laurent, Ph.D., M.S., B.S. (University of Paris VI, France), Distinguished Professor, Department of Physics, 1999.

Benamara, Mourad, Ph.D., M.S. (University of Toulouse III, France), Assistant Professor, Nanotechnology, 2007.

Bengtson, Ed, Ph.D. (University of Georgia), Ed.S. (George Washington University), M.A. (California State University-San Diego), B.S. (Pennsylvania State University), Associate Professor, Department of Curriculum and Instruction, 2010.

Bergman-Lanier, Leyah, Ph.D. (Claremont Graduate University), Instructor, English Language and Cultural Studies, 2014.

Berkovich, Nadja, Ph.D. (University of Illinois), M.A. (Boston College), B.A. (St. Petersburg Pedagogical Herzen University), Clinical Assistant Professor, Department of World Languages, Literatures and Cultures, 2015.

Bernhardt-Barry, Michelle, Ph.D., M.S.C.E., B.S.C.E. (Texas A&M University), Assistant Professor, Department of Civil Engineering, 2013.

Beyzavi, M. Hassan, Ph.D. (Freie Universität Berlin, Germany), Assistant Professor, Department of Chemistry and Biochemistry, 2017.

Bhatia, Puja, Ph.D., M.A. (Ohio State University), M.S. (Indian Statistical Institute), B.S. (Presidency College), Assistant Professor, Department of Economics, 2019.

Biggs, Bobbie T., Ph.D. (Texas A&M University), M.S., B.S. (University of Arkansas), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1979.

Billig, Noah Scott, Ph.D. (Clemson University), M.Ur.P., M.L.A., B.A. (University of Minnesota), Associate Professor, Department of Landscape Architecture, 2011.

Bills, Ken, Ph.D. (University of Oklahoma), M.A., B.A. (Southern Utah University), Associate Professor, Department of Accounting, 2015.

Bingham, D. James, M.B.A. (Northwestern University), B.S. (Brigham Young University), Instructor, Program in Operations Management, 2013.

Blalock, Lydia, Ph.D., M.S. B.G.S (Louisiana State University), Instructor, School of Human Environmental Sciences, 2016.

Blishard, Paul, Ed.D. (University of Arkansas), M.C., B.S., B.S. (Southwest Missouri State University), Clinical Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.
Bluhm, Burt H., Ph.D., M.S. (Purdue University), B.S. (University of Oklahoma), Associate Professor, Department of Entomology and Plant Pathology, 2008.

Bonacci, Jeff, D.A. (Middle Tennessee State University), M.S. (West Virginia University), B.S. (University of Akron), Clinical Associate Professor, Department of Health, Human Performance and Recreation, 2000.

Booker, M. Keith, Ph.D. (University of Florida), M.S., M.A. (University of Tennessee), B.A. (Vanderbilt University), Professor, Department of English, 1990.

Boss, Steve K., Ph.D. (University of North Carolina at Chapel Hill), M.S. (Utah State University), B.S. (Bemidji State University), Professor, Department of Geosciences, 1996.

Bottle, Walter G., Ph.D. (University of Illinois-Urbana-Champaign), M.S. (Southern Illinois University), B.S. (Eastern Illinois University), Professor, Department of Poultry Science, 1985.

Bourland, Fred, Ph.D. (Texas A&M University), M.S., B.A. (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 1988.

Bowers, Lisa Marie, Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (Louisiana State University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.

Bowers, Andrew L., Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (University of Tennessee), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.

Bowles, Freddie A., Ph.D., M.A. (University of Arkansas), B.A. (Arkansas State University), Associate Professor, Department of Curriculum and Instruction, 2004.

Bradshaw, Zachary, Ph.D. (University of Virginia), B.S. (Virginia Commonwealth University), Assistant Professor, Department of Mathematical Sciences, 2017.

Brady, Robert M., Ph.D. (University of Michigan-Ann Arbor), M.A. (Western Kentucky University), B.S. (Murray State University), Associate Professor, Department of Communication, 1979.

Brady, Kevin P., Ph.D. (University of Illinois-Champaign-Urbana), M.A. (Columbia University), B.A. (Binghamton University), Associate Professor, Department of Curriculum and Instruction, 2014.

Braham, Andrew F., Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Wisconsin-Madison), Associate Professor, Department of Civil Engineering, 2010.

Brandon, Jamie, Ph.D. (University of Texas), M.A. (University of Arkansas), B.A. (University of Memphis), Associate Research Professor, Department of Anthropology, 2014.

Breaux-Soignet, Denise, Ph.D. (Florida State University), M.B.A., B.S. (Nicholls State University), Clinical Assistant Professor, Department of Management, 2010.

Bresnick, Terry A., M.S. (Stanford University), M.B.A. (George Mason University), B.S. (United States Military Academy), Instructor, Program in Operations Management, 2014.

Brewer, Lorraine C., M.S. (University of Wisconsin-Madison), Instructor, Department of Chemistry and Biochemistry, 1997.

Brewer, Dennis W., Ph.D., M.A. (University of Wisconsin), B.A. (Sterling College), Professor, Department of Mathematical Sciences, 1975.

Bridges, Ana Julia, Ph.D. (University of Rhode Island), M.S. (Illinois State University), B.S. (University of Illinois-Urbana-Champaign), Associate Professor, Department of Psychological Science, 2007.

Bright, Brittany Michelle, M.I.S. (University of Arkansas), B.S. (University of Arkansas, Fort Smith), Instructor, Department of Information Systems, 2010.

Brill, Howard W., J.D. (University of Florida), LL.M. (University of Illinois at Chicago), B.A. (Duke University), University Professor, School of Law, 1975.

Brito, Edvan P., Ph.D., M.S. (Georgetown University), M.A. (Howard University), B.A. (Universidade de São Paulo, Brazil), Assistant Professor, Department of World Languages, Literatures and Cultures, 2016.

Brock, Geoffrey Arthur, Ph.D. (University of Pennsylvania), M.F.A. (University of Florida), M.A. (University of Pennsylvania), B.A. (Florida State University), Professor, Department of English, 2005.

Brogi, Alessandro, Ph.D. (Ohio University), Ph.D. (University of Florence, Italy), M.A. (Ohio University), B.A. (University of Florence, Italy), Professor, Department of History, 2002.

Brown, Lucy M., Ph.D., M.A. (University of Texas, Austin), M.S. (Pratt Institute), Dip.G.A. (Edna Manley School for the Visual Arts, Jamaica), Clinical Assistant Professor, School of Journalism and Strategic Media, 2013.

Brown, Brandon, M.S., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2006.

Brown, Kendrick, Ph.D., (Jackson State University), M.S. (Meharry Medical College), B.S. (Southern Illinois University), Instructor, Program in Operations Management, 2017.

Brownback, Andrew P., Ph.D. (University of California, San Diego), B.A. (Kansas State University), Assistant Professor, Department of Economics, 2015.

Brubaker, Robert P., Ph.D. (University of Michigan-Ann Arbor), M.S. (University of Wisconsin-Milwaukee), B.A. (Grinnell College), Instructor, Department of History, 2009.

Bruce, David E., M.I.S. (University of Arkansas), Lecturer, Department of Information Systems, 1999.

Bryant, Kelly J., Ph.D. (Texas A&M), M.S., B.S. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 1993.

Brye, Kristofer R., Ph.D., M.S. (University of Wisconsin-Madison), B.S. (University of Wisconsin-Stevens Point), Professor, Department of Crop, Soil and Environmental Sciences, 2001.

Bryson, Sarah J., M.S.W. (Colorado State University), Lecturer, School of Social Work, 2014.

Buckley, Nancy, M.S., B.S. (University of Arkansas), Instructor, School of Human Environmental Sciences, 2014.

Burgin, James, M.B.A. (Golden Gate University), B.S. (University of Arkansas), Instructor, Program in Operations Management, 2012.

Burgin, Stephen, Ph.D., Ed.S., M.Ed., B.S. (University of Florida), Assistant Professor, Department of Curriculum and Instruction, 2014.

Burgos, Nilda Roma, Ph.D., M.S. (University of Arkansas), B.S. (Visayas State College of Agriculture-Philippines), Professor, Department of Crop, Soil and Environmental Sciences, 1998.

Burris, Sidney J., Ph.D., M.A. (University of Virginia), B.A. (Duke University), Professor, Department of English, 1986.

Burrow, Jason E., M.M. (Ohio University), B.M. (University of Arkansas), Assistant Professor, Department of Theatre, 2015.

Burton, Scot, Ph.D. (University of Houston), M.B.A., B.S.B.A. (University of Texas), Distinguished Professor, Department of Marketing, 1993.

Bustamante, Juan Jose, Ph.D. (Michigan State University), M.S., B.A. (University of Texas Pan American), Associate Professor, Department of Sociology and Criminology, 2012.

C

Calabretta-Sajder, Ryan C., Ph.D. (Middlebury College), M.A. (Indiana University-Bloomington), B.A. (Dominican University), Assistant Professor, Department of World Languages, Literatures and Cultures, 2013.
Caldwell, Stephen E., D.M.A. (Rutgers State University-New Brunswick), M.M. (Temple University), B.M.E. (University of Northern Colorado), Assistant Professor, Department of Music, 2012.
Callander, Adrienne, M.F.A. (Rutgers University), B.A. (Reed College), Visiting Assistant Professor, School of Art, 2017.
Callander, Neil, M.F.A. (Rutgers University), B.F.A. (Indiana University at Bloomington), Assistant Professor, School of Art, 2017.
Calleja, Paul C., Ph.D., M.S. (University of Arkansas), B.S. (San Jose State University), Clinical Professor, Department of Health, Human Performance and Recreation, 2003.
Camargo, Elsa, Ph.D. (Virginia Polytechnic Institute and State University), M.A., B.A. (University of Illinois at Chicago), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2018.
Candido, Joseph D., Ph.D. (Indiana University at Bloomington), M.A. (University of New Hampshire), B.A. (Colby College), Professor, Department of English, 1979.
Carbonero, Franck, Ph.D. (University of Warwick, U.K.), M.S. (Université Blaise Pascal, France), B.S.S. (Université Joseph Fourier, France), Assistant Professor, Department of Food Science, 2013.
Carpenter, Dale, M.A. (Emory University), B.A. (Vanderbilt University), Professor, School of Journalism and Strategic Media, 1994.
Carson, Janet B., M.S. (University of Arkansas), Associate Professor, Department of Horticulture, 1992.
Carter, Vinson R., Ph.D., M.A.T., B.S. (University of Arkansas), Associate Professor, Department of Curriculum and Instruction, 2008.
Cassady, Richard, Ph.D., M.S.I.S.E., B.S.I.S.E. (Virginia Polytechnic Institute and State University), Professor, Department of Industrial Engineering, 2000.
Cassell, Cory A., Ph.D. (Texas A&M University), M.S., B.S. (Trinity University), Associate Professor, Department of Accounting, 2009.
Castro Salas, Raquel, M.A. (University of Arkansas), B.A. (John Brown University), Instructor, Department of World Languages, Literatures and Cultures, 2014.
Catanzaro, Donald G., Ph.D. (University of Arkansas), A.B. (University of California, Los Angeles), Research Assistant Professor, Department of Biological Sciences, 2014.
Catron-Ping, Peggy Lee, Ed.D. (University of Arkansas), M.A. (Missouri State University), Instructor, Department of Communication, 2004.
Cavell, Timothy A., Ph.D. (Louisiana State University), M.S. (Texas A&M University), B.A. (Louisiana State University), Professor, Department of Psychological Science, 2002.
Ceballos, Ruben M., Ph.D. (University of Montana), M.A. (University of Alabama-Birmingham), B.S.(University of Alabama-Huntsville), Assistant Professor, Department of Biological Sciences, 2016.
Chakraborty, Avishek, Ph.D (Duke University), M.S., B.S. (Indian Statistical Institute), Assistant Professor, Department of Mathematical Sciences, 2014.
Chaovallitwongse, Wanpracha Art, Ph.D., M.S. (University of Florida), B.Eng. (King Mongkut Institute of Technology, Ladkrabang, Thailand), Professor, Department of Industrial Engineering, 2016.
Chapman, Kate M., Ph.D., M.S. (Penn State University), B.A. (New Florida College), Teaching Assistant Professor, Department of Psychological Science, 2016.
Chen, Jingyi, Ph.D. (University of Washington), M.A. (State University College at Buffalo), B.S. (Zhongshan University), Associate Professor, Department of Chemistry and Biochemistry, 2010.
Chen, Zhong, Ph.D. (North Carolina State University), M.Eng. (National University of Singapore), B.S. (Zhejiang University), Assistant Professor, Department of Electrical Engineering, 2015.
Chen, Yue, Ph.D. (Vanderbilt University), M.S. (Hong Kong Polytechnic University), B.S. (Hunan University), Assistant Professor, Department of Mechanical Engineering, 2017.
Chen, Jiale, Ph.D. (Cornell University), B.A. (Shanghai University of Finance and Economics), Assistant Professor, Department of Marketing, 2018.
Cheramie, Lance M., Ph.D., M.S. (University of Arkansas), B.S. (Nicholls State University), Instructor, School of Human Environmental Sciences, 2002.
Chevrier, Vincent Francois, Ph.D. (CEREGE, Aix-en-Provence, France), M.E.S. (University Paris VII), B.S. (Academy of Versaille, France), Assistant Professor, Space and Planetary Sciences, 2005.
Chick, Cathy, M.L.S. (Louisiana State University at Shreveport), B.A. (Louisiana Tech University), Associate Librarian, University Libraries, 1983.
Chimka, Justin Robert, Ph.D., M.S.I.E., B.S.I.E. (University of Pittsburgh), Associate Professor, Department of Industrial Engineering, 2002.
Chioffi, David Charles, M.A. (Wesleyan University), B.F.A. (The Rochester Institute of Technology), Professor, School of Art, 2013.
Cho, Eunjoo, Ph.D. (Iowa State University), M.S., B.S. (Hanyang University, Seoul), Assistant Professor, School of Human Environmental Sciences, 2013.
Cholthitchanta, Nophachai, D.M.A. (University of Missouri-Kansas City), M.M. (University of Northern Colorado), B.M. (Chulalongkorn University, Thailand), Associate Professor, Department of Music, 2001.
Christian, David, Ph.D., M.S. (University of North Texas), B.A. (University of Texas at Dallas), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.
Christiansen, Hope L., Ph.D. (University of Kansas), M.A., B.A. (Kansas State University), Associate Professor, Department of World Languages, Literatures and Cultures, 1990.
Christy, Kameri, Ph.D., M.S.W. (University of Kansas), B.A. (University of Missouri-Kansas City), Professor, School of Social Work, 2003.
Chung, Jee-Young, Ph.D. (University of Alabama), M.A. (University of Houston), B.S., B.A. (Seoul Women’s University), Assistant Professor, School of Journalism and Strategic Media, 2015.
Churchill, Hugh O.H., Ph.D., A.M. (Harvard University), B.A. (Oberlin College), B.M. (Oberlin Conservatory of Music), Assistant Professor, Department of Physics, 2015.
Cilli, Matthew, Ph.D. (Stevens Institute of Technology), M.S. (New York University Polytechnic), M.S. (University of Pennsylvania), B.S. (Villanova University), Instructor, Program in Operations Management, 2015.
Circo, Carl J., J.D., B.A. (University of Nebraska), Professor, School of Law, 2003.
Civelli, Andrea, Ph.D., M.A. (Princeton University), B.A. (Bocconi University, Milan), Associate Professor, Department of Economics, 2010.
Clark, John R., Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Distinguished Professor, Department of Horticulture, 1983.
Clark, Fred D., Ph.D., D.V.M., M.S., B.S. (Texas A&M University), Extension Professor, Department of Poultry Science, 1994.
Clausen, Ed., Ph.D., M.S.C.Ed., B.S.C.Ed. (University of Missouri-Rolla), University Professor, Ralph E. Martin Department of Chemical Engineering, 1981.
Clay, Matt, Ph.D., M.S. (University of Utah), B.S. (University of Oregon), Associate Professor, Department of Mathematical Sciences, 2012.
Cleveland, Todd, Ph.D. (University of Minnesota), M.A., B.A. (University of New Hampshire), Associate Professor, Department of History, 2015.
Clingan, Shelley Diane, M.S.W. (University of Arkansas at Little Rock), Lecturer, School of Social Work, 2014.
Clowney, Stephen, J.D. (Yale University), A.B. (Princeton University), Associate Professor, School of Law, 2014.

Clowney, Nicole, J.D. (Yale University), M.A. (University of Kentucky), B.A. (University of Chicago), Lecturer, Department of World Languages, Literatures and Cultures, 2014.

Cochran, Robert Brady, Ph.D. (University of Toronto), M.A., B.S. (Northwestern University), Professor, Department of English, 1976.

Cochran, Mark J., Ph.D., M.S. (Michigan State University), B.S. (New Mexico State University), Professor, Department of Agricultural Economics and Agribusiness, 1982.

Coffey, Ken, Ph.D. (University of Missouri-Columbia), M.S. (University of Kentucky), B.S. (University of Tennessee), Professor, Department of Animal Science, 1996.

Coffman, Rick, Ph.D. (University of Missouri-Columbia), M.S. (University of Texas at Austin), B.S. (University of Wyoming), Associate Professor, Department of Civil Engineering, 2009.

Coleman, James S., Ph.D., M.S., M.Phil (Yale University), B.S. (University of Maine), Professor, Department of Biological Sciences, 2017.

Collet, Vicki S., Ph.D. (State University of New York at Buffalo), M.A. (University of Northern Colorado), B.A. (University of Utah), Associate Professor, Department of Curriculum and Instruction, 2012.

Collie, Sara J., M.S.W. (University of Arkansas at Little Rock), B.A. (University of Arkansas), Associate Professor, School of Social Work, 2011.

Collins, Kathleen, Ph.D., M.A., B.A. (University of California-Santa Barbara), Professor, Department of Curriculum and Instruction, 2002.

Comfort, Kathy, Ph.D. (University of Kansas), M.A., B.A. (Illinois State University), Associate Professor, Department of World Languages, Literatures and Cultures, 2001.

Comstock, James, M.S. (Virginia Polytechnic Institute and State University), B.S. (United States Military Academy), Instructor, Program in Operations Management, 2018.

Condry, Kathleen, Ph.D., M.A., (University of Illinois-Urbana-Champaign), B.A. (University of Arkansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1999.

Connors, Sean P., Ph.D. (The Ohio State University), M.S. (Elmira College), B.A. (SUNY Geneseo), Associate Professor, Department of Curriculum and Instruction, 2010.

Cook, Aletha, M.S.A., B.A. (University of Arkansas), Clinical Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.

Coon, Lynda L., Ph.D., M.A. (University of Virginia), B.A. (James Madison University), Professor, Department of History, 1990.

Coon, Craig N., Ph.D., M.S., B.S. (Texas A&M University), Professor, Department of Poultry Science, 1997.

Coridan, Robert, Ph.D., M.S. (University of Illinois-Urbana-Champaign), B.S. (The Ohio State University), Assistant Professor, Department of Chemistry and Biochemistry, 2015.

Correll, Jim, Ph.D., M.S. (University of California-Berkeley), B.S. (Pennsylvania State University), Distinguished Professor, Department of Entomology and Plant Pathology, 1989.

Corrigan, Lisa, Ph.D., M.A. (University of Maryland-College Park), B.A. (University of Pittsburgh), Associate Professor, Department of Communication, 2007.

Costello, Thomas A., Ph.D. (Louisiana State University), M.S.Ag.E., B.S.Ag.E. (University of Missouri-Columbia), Associate Professor, Department of Biological and Agricultural Engineering, 1986.

Costrell, Robert M., Ph.D. (Harvard University), B.A. (University of Michigan), Professor, Department of Education Reform, 2006.

Cotthen, Jackson David, Ph.D., M.S. (The Ohio State University), B.S. (United States Air Force Academy), Associate Professor, Department of Geosciences, 2004.

Counce, Paul Allen, Ph.D. (University of Georgia), M.S. (Purdue University), B.S. (University of Tennessee-Martin), Professor, Department of Crop, Soil and Environmental Sciences, 1983.

Couvillion, Rick J., Ph.D., M.S.M.E. (Georgia Institute of Technology), B.S.M.E. (University of Arkansas), Associate Professor, Department of Mechanical Engineering, 1981.

Covington, Matthew D., Ph.D. (University of California-Santa Cruz), B.A. (University of Arkansas), Associate Professor, Department of Geosciences, 2012.

Cox, Nicole R., M.B.A. (University of Arkansas), B.S. (College of the Ozarks), Instructor, Department of Marketing, 2003.

Cox, Casandra Kay, M.S., B.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2003.

Crabtree, Susan, M.A., B.A. (University of Northern Colorado), Instructor, Department of Theatre, 2016.

Crandall, Philip G., Ph.D., M.S. (Purdue University), B.S. (Kansas State University), Professor, Department of Food Science, 1989.

Crawley, Michael, Ph.D. (University of Texas at Austin), M.B.A., B.S. (Indiana University), Assistant Professor, Department of Accounting, 2016.

Cromer, Jonathan Barrett, M.F.A. (University of Arkansas), Instructor, School of Art, 2016.

Cronan, Timothy P., Ph.D. (Louisiana Tech University), M.S. (South Dakota State University), B.S. (University of Southwestern Louisiana), Professor, Department of Information Systems, 1979.

D’Alisera, JoAnn, Ph.D., A.M. (University of Illinois-Urbana-Champaign), B.A. (State University of New York at New Paltz), Associate Professor, Department of Anthropology, 1999.

Daily, Cynthia, D.B.A. (Louisiana Tech University), M.B.A., B.B.A. (Henderson State University), Clinical Associate Professor, Department of Accounting, 2016.

Daniels, Michael B., Ph.D., M.S. (University of Arkansas), B.S. (Pennsylvania State University), Professor, Department of Crop, Soil and Environmental Sciences, 1996.

Datta, Jyotishka, Ph.D. (Purdue University), M.Stat., B.Stat. (Indian Statistical Institute, Kolkata, India), Assistant Professor, Department of Mathematical Sciences, 2016.

Daugherty, Michael, Ed.D., M.S., B.S. (Oklahoma State University), Professor, Department of Curriculum and Instruction, 2005.

Davidson, Fiona M., Ph.D., M.A. (University of Nebraska-Lincoln), B.A. (Newcastle Upon Tyne Polytechnic), Associate Professor, Department of Geosciences, 1992.

Davis, James Allen, Ph.D., M.S.M.E., B.S.M.E. (University of Arkansas), Teaching Assistant Professor, Department of Mechanical Engineering, 1997.

Davis, Ralph K., Ph.D., M.S., B.S. (University of Nebraska, Lincoln), Professor, Department of Geosciences, 1994.

Davis, Geoffrey, Ph.D., M.F.A., M.A. (Penn State University), B.A. (Oregon State University), Assistant Professor, Department of English, 2014.

Davis, Robert, Ph.D., M.S., B.S. (University of Mississippi), Assistant Professor, Department of Health, Human Performance and Recreation, 2018.
Day, Matthew B., Ph.D., M.S. (University of Chicago), B.S. (University of Texas), Associate Professor, Department of Mathematical Sciences, 2011.

Deaton, Sheri, M.A.T., B.S. (University of Arkansas), Instructor, Department of Curriculum and Instruction, 2016.

DeGrange, Walter, M.S. (Naval Postgraduate School), B.E. (Vanderbilt University), Adjunct Assistant Professor, Program in Operations Management, 2014.

Delaplain, Theresa R., D.M.A. (University of Cincinnati), M.M. (Bowling Green State University), B.M. (University of Michigan), Instructor, Department of Music, 1997.

DelCastillo, David, M.A.S. (Embry Riddle Aeronautical University), B.S (Embry Riddle Aeronautical University), Instructor, Program in Operations Management, 2005.

Delerly, John, Ph.D. (Texas A&M University), M.S. (Memphis State University), B.S. (Tulane University of Louisiana), Professor, Department of Management, 1992.

Delezenne, Lucas, Ph.D., M.A. (Arizona State University), B.S. (Emory University), Instructor, Department of Anthropology, 2011.

Dempsey, Sean A., Ph.D., M.A. (Boston University), B.A. (Connecticut College), Assistant Professor, Department of English, 2009.

Dennis, Norman D., Ph.D. (University of Texas at Austin), M.B.A. (Boston University), M.S.C.E., B.S.C.E. (Missouri University of Science and Technology), University Professor, Department of Civil Engineering, 1996.

DeWitt, Dylan, M.F.A. (Yale University), Assistant Professor, School of Art, 2014.

Di, Jia, Ph.D. (University of Central Florida), M.S., B.S. (Tsinghua University), Professor, Department of Computer Science and Computer Engineering, 2004.

Diallo, Anne B., Ph.D., M.P.A., B.A. (University of Arkansas), Visiting Assistant Professor, Department of Political Science, 2012.

Diaz, Eva I., Ph.D., M.Ed. (Pennsylvania State University), B.A. (University of Puerto Rico), Research Associate, Department of Curriculum and Instruction, 2014.

DiBrezzo, Rosalie, Ph.D. (Texas Woman’s University), M.S. (Indiana University), B.S. (Brooklyn College), University Professor, Department of Health, Human Performance and Recreation, 1983.

Dieffenderfer, Vicki, Ph.D., M.S., B.S. (University of Tennessee), Clinical Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.

Dingman, Shannon Wayne, Ph.D., M.S. (University of Missouri-Columbia), M.S. (Pittsburg State University), Associate Professor, Department of Mathematical Sciences, 2007.

Dittmore, Stephen W., Ph.D. (University of Louisville), M.A., B.A. (Drake University), Professor, Department of Health, Human Performance and Recreation, 2008.

Ditzfeld, Christopher, M.S. (University of Oklahoma), Instructor, Department of Psychological Science, 2011.

Dix, Jeffrey, Ph.D., M.S., B.S.E.E., (University of Tennessee, Knoxville), Assistant Professor, Department of Electrical Engineering, 2018.

Dixon, Bruce Lawrence, Ph.D., M.S. (University of California-Davis), B.A. (University of California-Santa Barbara), Professor, Department of Agricultural Economics and Agribusiness, 1984.

Dominick, John Andrew, Ph.D., M.S. (University of Alabama), B.S.B.A. (Louisiana Polytechnic Institute), Professor, Department of Finance, 1970.

Dominquez, Freddy C., Ph.D., M.A. (Princeton University), B.A. (Brown University), Assistant Professor, Department of History, 2014.

Domínguez Barajas, Elias, Ph.D., M.A., B.A. (University of Illinois at Chicago), Associate Professor, Department of English, 2011.

Donoghue, Dan, Ph.D. (Texas A&M University), M.S. (Brigham Young University), B.S. (Medical University of South Carolina), Professor, Department of Poultry Science, 2000.

Donoghue, Annie, Ph.D. (F. Edward Herbert School of Medicine), M.S. (Texas A&M University), B.S. (San Diego State University), Research Professor, Department of Poultry Science, 2000.

Douglas, David, Ph.D., M.S.I.E., B.S.I.E. (University of Arkansas), University Professor, Department of Information Systems, 1975.

Douglas, Michael Edward, Ph.D. (University of Georgia), M.S., B.S. (University of Louisville), Professor, Department of Biological Sciences, 2011.

Douglas, Marlis R., Ph.D., M.S., B.S. (University of Zurich), Professor, Department of Biological Sciences, 2012.

Dowdle, Andrew J., Ph.D. (Miami University), M.A. (University of Iowa), B.A. (University of Tennessee), Professor, Department of Political Science, 2003.

Dowdy, Gary, M.B.A. (Purdue University), B.S. (University of Arkansas), Instructor, Department of Management, 2014.

Dowe, Pearl Karen, Ph.D. (Howard University), M.A. (Georgia Southern University), B.S. (Savannah State University), Associate Professor, Department of Political Science, 2008.

Dowling, Ashley Patrick Gregg, Ph.D. (University of Michigan-Ann Arbor), B.S. (University of Arizona), Associate Professor, Department of Entomology and Plant Pathology, 2008.

Drowwe, Grant R., Ph.D. (University of Arkansas at Little Rock), M.A., B.A. (Southern Illinois University), Assistant Professor, Department of Sociology and Criminology, 2016.

Dridi, Sami, Ph.D., M.S. (National Polytechnic Institute of Lorraine, France), B.S. (Superior Institute of Mateur, Tunisia), Professor, Department of Poultry Science, 2013.

Drolen, Rebecca, M.F.A., B.A. (Indiana University, Bloomington), Assistant Professor, School of Art, 2015.

Du, Yuchun, Ph.D. (Kagoshima University, Japan), B.S. (Shaanxi University of Technology, China), Associate Professor, Department of Biological Sciences, 2007.

Dumond, Gregory, Ph.D. (University of Massachusetts), M.S. (Texas Tech University), B.S. (University of Texas El Paso), Associate Professor, Department of Geosciences, 2010.

Dunavant, Kristen, M.S.W. (Augsburg College), B.S.W. (St. Olaf College), Lecturer, School of Social Work, 2017.

Duncan, Jamal, D.M.A., B.M. (University of Michigan), Instructor, Department of Music, 2013.

Durand-Morat, Alvaro, Ph.D., M.S. (University of Arkansas), B.S.E. (National University of Entre Rios), Assistant Professor, Department of Agricultural Economics and Agribusiness, 2016.

DuRant, Sarah Elizabeth, Ph.D. (Virginia Polytechnic Institute and State University), B.S. (University of South Carolina), Assistant Professor, Department of Biological Sciences, 2017.

Durdik, Jeannine M., Ph.D. (Johns Hopkins University), B.S. (Purdue University), Professor, Department of Biological Sciences, 1994.

Dwyer, Mavourneen, Ph.D. (University of Montreal), Associate Professor, Department of Theatre, 1998.

Edmonston, Craig, M.S. (University of Kansas), B.S. (Kansas State University), Instructor, Department of Health, Human Performance and Recreation, 2016.
Edwards, Findlay, Ph.D. (New Mexico State University), M.S. (University of New Mexico), M.S.C.E. (New Mexico State University), Associate Professor, Department of Civil Engineering, 1999.

Egan, Martin J., Ph.D., B.Sc. (University of Exeter, United Kingdom), Assistant Professor, Department of Entomology and Plant Pathology, 2016.

Ehrhardt, Joseph, M.I.S. (University of Arkansas), Instructor, Department of Information Systems, 2014.

Eidelberg, Scott H., Ph.D. (University of Kansas), B.A. (University of Wisconsin-Madison), Associate Professor, Department of Psychological Science, 2008.

Eilers, Linda Hale, Ph.D. (Louisiana State University at Shreveport), M.Ed., B.S.E. (University of Arkansas at Little Rock), Clinical Associate Professor, Department of Curriculum and Instruction, 2001.

El-Ghazaly, Samir M., Ph.D. (University of Texas at Austin), M.S., B.S. (Cairo University), Distinguished Professor, Department of Electrical Engineering, 2007.

El-Shenawee, Magda O., Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Assiut University, Egypt), Professor, Department of Electrical Engineering, 2001.

Elbin, R. J., Ph.D. (Michigan State University), M.A., B.A. (University of New Orleans), Associate Professor, Department of Health, Human Performance and Recreation, 2013.

Ellixson, Marita, M.B.A. (Andrew Jackson University), B.S. (University of Central Florida), Instructor, Program in Operations Management, 2002.

Ellstrand, Alan E., Ph.D. (Indiana University at Bloomington), M.B.A. (North Illinois University), B.S. (University of Illinois-Urbana), Professor, Department of Management, 2000.

Elsass, Angela Carlton, Ed.D., Ed.S. (University of Arkansas), M.Ed. (Harding University), B.S.E. (University of Central Arkansas), Clinical Associate Professor, Department of Curriculum and Instruction, 2010.

Embaye, Abel, Ph.D. (Georgia State University), M.A. (Tilburg University), B.A. (University of Asmara), Clinical Assistant Professor, Department of Economics, 2010.

Emory, DeAnna Jan, Ph.D. (University of Arkansas), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Associate Professor, Eleanor Mann School of Nursing, 2012.

Endacott, Jason L., Ph.D., M.S. (University of Kansas), B.S. (Kansas State University), Associate Professor, Department of Curriculum and Instruction, 2011.

Engen, Mindy Sue, Ph.D., M.A. (Pennsylvania State University), B.S. (Georgia State University), Professor, Department of Sociology and Criminology, 2005.

Engen, Rodney L., Ph.D. (University of Washington), M.S., B.S. (University of Wisconsin-Milwaukee), Associate Professor, Department of Sociology and Criminology, 2009.

English, John R., Ph.D. (Oklahoma State University) P.E., M.S.O.R., B.S.E.E. (University of Arkansas), Professor, Department of Industrial Engineering, 1991.

Erf, Gisela F., Ph.D. (Cornell University), M.S., B.S. (University of Guelph, Canada), Professor, Department of Poultry Science, 1994.

 Erickson, Kirstin C., Ph.D., M.A. (University of Wisconsin-Madison), B.A. (St. Olaf College), Associate Professor, Department of Anthropology, 2001.

Esper, Terry L., Ph.D., M.B.A. (University of Arkansas), B.A. (Philander Smith College), Associate Professor, Department of Supply Chain Management, 2013.

Espinoza, Leonel A., Ph.D., M.S. (University of Florida), B.S. (Iowa State University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2003.

Etges, William J., Ph.D. (University of Rochester), M.S. (University of Georgia), B.S. (North Carolina State University), Professor, Department of Biological Sciences, 1987.

Evans, Timothy A., Ph.D. (Indiana University), B.S. (Slippery Rock University), Assistant Professor, Department of Biological Sciences, 2013.

Evans-White, Michelle Allayne, Ph.D. (University of Notre Dame), M.S., B.S. (Kansas State University), Professor, Department of Biological Sciences, 2008.

Ewelukwa, Uche U., S.J.D., LL.M. (Harvard University), LL.M. (University College, London), J.D. equivalent (University of Nigeria), Professor, School of Law, 2001.

F

Fairey, Julian, Ph.D., M.S.C.E. (University of Texas at Austin), B.S.C.E. (University of Alberta, Canada), Associate Professor, Department of Civil Engineering, 2008.

Fan, Chenguang, Ph.D. (Iowa State University), B.S. (Nanjing University), Assistant Professor, Department of Chemistry and Biochemistry, 2016.

Fang, Di, Ph.D., W.P. (Arizona State University), B.A. (Nankai University), Assistant Professor, Department of Agricultural Economics and Agribusiness, 2015.

Farmer, Amy Lynn, Ph.D., M.A. (Duke University), B.S. (Purdue University), University Professor, Department of Economics, 1999.

Faske, Travis, Ph.D. (Texas A&M University), M.S. (Oklahoma State University), B.S. (Tarleton State University), Associate Professor, Department of Entomology and Plant Pathology, 2015.

Feldman, William A., Ph.D. (Queen’s University), M.S. (Northwestern University), B.S. (Tufts University), Professor, Department of Mathematical Sciences, 1971.

Feldner, Matthew T., Ph.D. (University of Vermont), M.A. (West Virginia University), B.S. (University of Wisconsin-Stevens Point), Professor, Department of Psychological Science, 2005.

Feng, Song, Ph.D., M.S. (Chinese Academy of Sciences), B.S. (Yunnan University), Associate Professor, Department of Geosciences, 2013.

Ferguson, Alishia Juanelle, Ph.D., M.S., B.A. (University of Texas Arlington), Clinical Assistant Professor, School of Social Work, 2008.

Fernstrom, Eric, Ph.D. (University of Arkansas), Instructor, Department of Civil Engineering, 2014.

Ferrier, Gary D., Ph.D. (University of North Carolina–Chapel Hill), B.A. (University of Wisconsin-Madison), University Professor, Department of Economics, 1993.

Fitzpatrick, Kevin M., Ph.D. (State University of New York at Albany), M.A. (University of South Carolina at Columbia), B.A. (Susquehanna University), University Professor, Department of Sociology and Criminology, 2005.

Flaccus, Janet A., LL.M. (University of Illinois-Urbana-Champaign), J.D., M.A. (University of California-Davis), Professor, School of Law, 1984.

Flanagan, J. Michael, Ph.D. (University of Arkansas), M.P.H., M.A., B.A. (University of Minnesota), Lecturer, Department of Political Science, 2016.

Flynn, John, M.B.A., J.D. (Case Western Reserve University), B.S. (John Carroll University), Instructor, Program in Operations Management, 2012.

Foley, Larry D., M.S. (University of Central Arkansas), B.A. (University of Arkansas), Professor, School of Journalism and Strategic Media, 1993.

Foote, Rebecca K., Ph.D. (University of Illinois at Urbana-Champaign), M.A. (Rice University), B.A. (University of Houston), Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.

Forbess, Janet B., M.Ed. (University of Florida), B.S.E. (Georgia Southern College), Instructor, Department of Health, Human Performance and Recreation, 1978.
Ford, David M., Ph.D., M.S., B.S.Ch.E. (University of Pennsylvania), Professor, Ralph E. Martin Department of Chemical Engineering, 2017.

Foster, Sharon Elaine, Ph.D., LL.M. (University of Edinburgh, Scotland), J.D. (Loyola Marymount University), B.A. (University of California-Los Angeles), Associate Professor, School of Law, 2000.

Foster, William, LL.M. (New York University), J.D. (University of Arkansas), B.S. (University of Central Arkansas), Assistant Professor, School of Law, 2014.

Fosu, Ignatius, Ph.D., M.A. (University of Alabama), B.A. (University of Ghana, Accra), Associate Professor, School of Journalism and Strategic Media, 2005.

Frank, Kate L., M.F.A. (University of Arkansas), B.F.A. (California State University-Los Angeles), Lecturer, Department of Theatre, 2006.

Franklin, Carly T.S., M.S.W. (University of Arkansas), Clinical Assistant Professor, School of Social Work, 2014.

Frazier, Kimberly Frances, Ph.D. (University of South Carolina–Columbia), M.S., B.S.E. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2007.

Fredrick, David Charles, Ph.D. (University of Southern California), M.A., B.A. (University of Kansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1991.

Freeze, Ron, Ph.D. (Arizona State University), M.B.A. (University of Missouri-Kansas City), B.S. (General Motors Institute), Clinical Associate Professor, Department of Information Systems, 2015.

French, Mandy, B.B.A. (University of Oklahoma), Instructor, Department of Accounting, 2015.

Frentz, Tom, Ph.D., M.S., B.S. (University of Wisconsin-Madison), Professor, Department of Communication, 1985.

Friscoe, Louis F., M.S., B.S. (Embry Riddle Aeronautical University), Instructor, Program in Operations Management, 2014.

Fritsch, Ingrid, Ph.D. (University of Illinois-Urbana-Champaign), B.S. (University of Utah), Professor, Department of Chemistry and Biochemistry, 1992.

Fu, Huaxiang, Ph.D., M.S., B.S. (Fudan University), B.S. (University of Science and Technology of China), Professor, Department of Physics, 2002.

Fugate, Brian, Ph.D., M.B.A., B.S. (University of Tennessee), Professor, Department of Supply Chain Management, 2015.

Fukushima, Tatsuya, Ph.D., M.A. (Oklahoma State University), B.A. (Kanto Gakuin University, Japan), Associate Professor, Department of World Languages and Literatures, 2000.

Fuller, Serena M., Ph.D. (University of California, Davis), Associate Professor, School of Human Environmental Sciences, 2014.

Funkhouser, Eric M., Ph.D. (Syracuse University), M.A., B.A. (University of Nebraska-Lincoln), Professor, Department of Philosophy, 2002.

G

Gaber, John, Ph.D. (Columbia University), M.A. (University of Southern California), B.A. (University of California-Los Angeles), Professor, Department of Political Science, 2008.

Gadberry, M. Shane, Ph.D., M.S., B.S. (University of Arkansas), Associate Professor, Department of Animal Science, 2006.

Gaduh, Arya, Ph.D. (University of Southern California), M.Phil. (Cambridge University), B.A. (University of California-Berkeley), Associate Professor, Department of Economics, 2013.

Gallagher, Kaitlin, Ph.D., B.Sc. (University of Waterloo, Canada), Assistant Professor, Department of Health, Human Performance and Recreation, 2015.

Gallagher, John M., Ph.D., M.S.W. (Arizona State University), B.A. (State University of New York at Plattsburgh), Assistant Professor, School of Social Work, 2016.

Gallini, Brian R., J.D. (University of Michigan-Ann Arbor), LL.M. (Temple University), B.A. (College of the Holy Cross), Professor, School of Law, 2008.

Ganio, Matthew Stueck, Ph.D. (University of Connecticut), M.S., B.S. (University of Georgia), Associate Professor, Department of Health, Human Performance and Recreation, 2011.

Garcia, M. Elena, Ph.D., M.S. (University of Arkansas), B.A. (University of Arkansas at Little Rock), Professor, Department of Horticulture, 2005.

Garner, Jerald, M.S. (University of Arkansas), B.S. (Park University), Instructor, Program in Operations Management, 1997.

Garrison, Mary Elizabeth, Ph.D., M.S. (Iowa State University), B.S. (Benedictine College), Professor, School of Human Environmental Sciences, 2014.

Gattis, J. L., Ph.D. (Texas A&M University), M.S.C.E. (University of Texas Arlington), B.S.C.E. (University of Arkansas), Professor, Department of Civil Engineering, 1993.

Gauch, Susan E., Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen's University, Canada), Professor, Department of Computer Science and Computer Engineering, 2007.

Gauch, John Michael, Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen's University, Canada), Professor, Department of Computer Science and Computer Engineering, 2008.

Gauri, Dinesh K., Ph.D., M.A. (State University of New York-Buffalo), M.S. (Indian Institute of Technology, New Delhi), Professor, Department of Marketing, 2016.

Gbure, Edward E., Ph.D., M.S. (The Ohio State University), B.S. (Saint Francis University), Professor, Department of Crop, Soil and Environmental Sciences, 1987.

Gea-Banacloche, Julio R., Ph.D. (University of New Mexico), Licenciado en Ciencias Fisicas (Universidad Autonoma de Madrid), Professor, Department of Physics, 1989.

Geng, Difei, Ph.D. (Vanderbilt University), M.A. (Southern Methodist University), M.A. (Nankai University), B.A. (Tianjin University of Finance and Economics), Assistant Professor, Department of Economics, 2016.

Ghadbian, Najib, Ph.D. (City University of New York), M.A. (Rutgers University), M.A. (City University of New York), B.Sc. (United Arab Emirates University), Associate Professor, Department of Political Science, 1999.

Gibson, Kristen Elizabeth, Ph.D. (Johns Hopkins University), B.S. (University of Central Florida), Associate Professor, Department of Food Science, 2012.

Gigantino, Jim, Ph.D. (University of Georgia), B.A. (University of Richmond), Professor, Department of History, 2010.

Gilbertson, Margie, Ph.D. (University of Memphis), M.S.E., B.A. (University of Central Arkansas), Clinical Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2016.

Giade, Rachel E., Ph.D. (University of Arkansas), M.S. (University of Arkansas for Medical Sciences), M.A. (University of Arkansas), B.S. (University of Arkansas at Little Rock), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.

Goering, Christian Z., Ph.D., M.S. (Kansas State University), B.A. (Washburn University), Professor, Department of Curriculum and Instruction, 2007.

Goforth, Carol Rose, J.D., B.A. (University of Arkansas), University Professor, School of Law, 1993.

Goggin, Fiona, Ph.D. (University of California-Davis), B.S. (Cornell University), Professor, Department of Entomology and Plant Pathology, 2001.
Goodman-Strauss, Chaim, Ph.D., B.S. (University of Texas at Austin), Professor, Department of Mathematical Sciences, 1994.

Goodwin, Harold L., Ph.D., M.S., B.S. (Oklahoma State University), Professor, Department of Agricultural Economics and Agribusiness, 1996.

Gordon, Joel Samuel, Ph.D. (University of Michigan-Ann Arbor), B.A. (University of Illinois), Professor, Department of History, 1999.

Gordon, Ronald J., Ph.D. (University of Arkansas), Instructor, Department of History, 2014.

Gorman, Dean Richard, Ph.D. (University of Kansas), M.S., B.A. (Arizona State University), Professor, Department of Health, Human Performance and Recreation, 1979.

Gosman, Sara, J.D., M.P.A. (Harvard University), A.B. (Princeton University), Assistant Professor, School of Law, 2014.

Gosman, Alan R., Ph.D. (Harvard University), Associate Professor, Department of Music, 2014.

Gould, Kara, Ph.D. (University of Utah), M.A. (Wheaton College), B.A. (Wheaton College), Assistant Professor, School of Journalism and Strategic Media, 2016.

Goussevskaia, Anna, Ph.D. (University of Warwick, United Kingdom), B.Sc. (Federal University of Minas, Brazil), Clinical Assistant Professor, Department of Management, 2013.

Graham, Donna Lucas, Ph.D. (University of Maryland-College Park), M.Ed., B.S. (University of Arkansas), University Professor, Department of Agricultural Education, Communications and Technology, 1985.

Grant, Alphonso W., Ph.D. (Pennsylvania State University), Assistant Professor, School of Art, 2017.

Gray, Michelle, Ph.D. (University of Arkansas), M.S. (Ball State University), B.S. (University of Tennessee, Chattanooga), Associate Professor, Department of Health, Human Performance and Recreation, 2010.

Greathouse, Denise A., Ph.D. (University of Arkansas), Research Associate Professor, Department of Chemistry and Biochemistry, 1997.

Greene, Jay Phillip, Ph.D., A.M. (Harvard University), B.A. (Tufts University), Distinguished Professor, Department of Education Reform, 2005.

Greene, Aleza R.S., Ph.D., M.A. (Brandeis University), B.A. (Tufts University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2006.

Greene, Nicholas P., Ph.D. (Texas A&M University), M.S., B.S. (University of South Carolina), Associate Professor, Department of Health, Human Performance and Recreation, 2013.

Greenhaw, William Karl, J.D. (University of Arkansas), B.A. (Westminster College), Instructor, Department of Accounting, 2001.

Greenlee, Lauren F., Ph.D., M.S. (University of Texas, Austin), BSChE (University of Michigan), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 2015.

Grover, Varun, Ph.D. (University of Pittsburgh), M.B.A. (Southern Illinois University), B.S. (Indian Institute of Technology), Distinguished Professor, Department of Information Systems, 2017.

Gruenwald, Jeffrey A., Ph.D. (Michigan State University), Associate Professor, Department of Sociology and Criminology, 2019.

Gu, Jingping, Ph.D. (Texas A&M University), M.A. (Peking University), B.A. (Renmin University of China, Beijing), Associate Professor, Department of Economics, 2008.

Gupta, Nina, Ph.D., A.M. (University of Michigan-Ann Arbor), M.A., B.A. (University of Allahabad), Distinguished Professor, Department of Management, 1984.

H

Haggard, Brian Edward, Ph.D. (Oklahoma State University), M.S. (University of Arkansas), B.S. (Missouri University of Science and Technology), Professor, Department of Biological and Agricultural Engineering, 2006.

Hagstrom, Fran W., Ph.D. (Clark University), M.S. (University of Texas Health Science Center-Houston), M.A. (St. Louis University), B.A. (Southwest Baptist University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2002.

Halbrook, Steve A., J.D. (Drake University), Ph.D. (Iowa State University), B.A. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 2008.

Hale, Micah, Ph.D., M.S.C.E., B.S.C.E. (University of Oklahoma), Professor, Department of Civil Engineering, 2002.

Hall, Kevin D., Ph.D. (University of Illinois-Urbana-Champaign), M.S.C.E., B.S.C.E. (University of Arkansas), Professor, Department of Civil Engineering, 1993.

Hallett, LewEllyn, M.F.A. (Bowling Green State University), B.A. (University of New Mexico), Instructor, Department of English, 2013.

Ham, Richard, Ed.D. (University of Arkansas at Little Rock), M.A.S. (Emory-Riddle Aeronautical University), B.S. (Park University), Instructor, Program in Operations Management, 2014.

Ham-Holm, Lindsay S., Ph.D., M.A., B.A. (University of Nebraska-Lincoln), Associate Professor, Department of Psychological Science, 2007.

Hamad, Bothina, Ph.D. (University of Jordan), Research Associate Professor, Department of Physics, 2016.

Hamilton, John H., M.S., B.S. (University of Arkansas), Instructor, Department of Mechanical Engineering, 2002.

Hamm, Cora, M.S. (New York University), Instructor, School of Human Environmental Sciences, 2016.

Hammel, Alice, D.M.A. (Shenandoah University), M.M. (Florida State University), B.M. (Shenandoah University), Instructor, Department of Music, 2016.

Hammig, Bart, Ph.D. (University of Kansas), M.P.H. (University of Kansas Medical Center), B.S. (University of Kansas), Professor, Department of Health, Human Performance and Recreation, 2008.

Hammond, Kelly, Ph.D. (Georgetown University), M.A. (Simon Frazier University), B.A. (Bishop's University), Assistant Professor, Department of History, 2015.

Hanning, Casey Owens, Ph.D., M.S., B.S. (Texas A&M University), Professor, Department of Poultry Science, 2000.

Hanson, Alexander J., M.F.A. (University of Iowa), Instructor, School of Art, 2015.

Hapgood, Thomas Layley, M.F.A., B.A. (University of Arizona), Associate Professor, School of Art, 2005.

Hardke, Jarrod T., Ph.D. (Louisiana State University), B.S.A. (University of Arkansas), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2013.

Hare, Laurence, Ph.D., M.A. (University of North Carolina at Chapel Hill), B.A. (University of Tennessee at Chattanooga), Associate Professor, Department of History, 2010.

Hargis, Billy M., Ph.D., D.V.M. (University of Minnesota-Twin Cities), M.S. (University of Georgia), B.S. (University of Minnesota), Distinguished Professor, Department of Poultry Science, 2000.

Harrington, Phil, Ph.D., M.S. (University of Notre Dame), B.S. (Whitworth College), Associate Professor, Department of Mathematical Sciences, 2009.
Harris, Casey Taggart, Ph.D., M.A. (Pennsylvania State University), B.S. (Texas A&M University), Associate Professor, Department of Sociology and Criminology, 2011.

Harriss, Edmund O., Ph.D. (Imperial College, London), M.M. (University of Warwick), Clinical Assistant Professor, Department of Mathematical Sciences, 2010.

Harter, William G., Ph.D. (University of California-Irvine), B.S. (Hiram College), Professor, Department of Physics, 1986.

Haydar, Paula Marie, Ph.D., M.F.A. (University of Arkansas), M.Ed., B.S. (University of Massachusetts), Clinical Assistant Professor, Department of World Languages, Literatures and Cultures, 2006.

Haydar, Adnan Fuad, Ph.D. (University of California-San Diego), M.A., B.A. (American University of Beirut), Professor, Department of World Languages, Literatures and Cultures, 1993.

Hays, Phillip D., Ph.D., M.S. (Texas A&M University), B.S. (University of Arkansas), Research Professor, Department of Geosciences, 2000.

Hearne, Brittany Nicole, Ph.D., M.A. (Vanderbilt University), B.S. (Texas A&M), Assistant Professor, Department of Sociology and Criminology, 2018.

Hemphill, Dewey, M.S. (University of Arkansas), B.A. (Memphis State University), Instructor, Program in Operations Management, 2012.

Henderson, Jaye, M.S.N., B.S.N. (Arkansas Tech University), Clinical Instructor, Eleanor Mann School of Nursing, 2013.

Henderson, Craig, M.B.A. (University of Nevada), B.S. (United States Naval Academy), Instructor, Program in Operations Management, 2011.

Henry, Ralph Leroy, Ph.D., M.S. (University of Florida), B.S.E. (University of Kansas), Distinguished Professor, Department of Biological Sciences, 1996.

Henry, Leah Jean, Ph.D. (Texas Woman's University), M.A. (Michigan State University), B.S. (Texas A&M University), Associate Professor, Department of Health, Human Performance and Recreation, 2008.

Henry, Christopher Garrett, Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Kansas State University), Associate Professor, Department of Biological and Agricultural Engineering, 2011.

Hentzen, Jane, M.S.N.(University of Texas at Austin), B.S.N.(University of Nebraska), Clinical Instructor, Eleanor Mann School of Nursing, 2017.

Hernandez, Sarah, Ph.D., M.S. (University of California, Irvine), B.S. (University of Florida), Assistant Professor, Department of Civil Engineering, 2015.

Hernandez-Miranda, Michael, Ph.D., M.A. (Texas A&M University), B.A. (University of Oriente), Instructor, Department of World Languages, Literatures and Cultures, 2015.

Herold, Warren, Ph.D. (University of Michigan), Assistant Professor, Department of Philosophy, 2014.

Herold, Laura K., Ph.D., M.A. (University of Michigan), B.A. (Oberlin College), Clinical Assistant Professor, School of Human Environmental Sciences, 2015.

Herzberg, Amy, M.F.A. (California Institute of the Arts), B.A. (Arizona State University), Distinguished Professor, Department of Theatre, 1989.

Herzog, Joseph B., Ph.D. (University of Notre Dame), B.S. (Louisiana State University), Assistant Professor, Department of Physics, 2013.

Herzog, Jacob, M.M. (Manhattan School of Music), B.M. (Berklee College of Music), Instructor, Department of Music, 2016.

Hestekin, Jamie A., Ph.D. (University of Kentucky), B.S.Ch.E. (University of Minnesota-Duluth), Professor, Ralph E. Martin Department of Chemical Engineering, 2006.

Hestekin, Christa, Ph.D. (Northwestern University), B.S.Ch.E. (University of Kentucky), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 2006.

Hettiarachchy, Navam S., Ph.D. (University of Hull, England), M.S. (Edinburgh University, Scotland), B.S. (University of Madras, India), University Professor, Department of Food Science, 1992.

Hevel, Michael Stephen, Ph.D. (University of Iowa), M.A. (Bowling Green State University), B.A. (University of Kansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.

Heyes, Colin David, Ph.D. (Georgia Institute of Technology), B.S. (Loughborough University), Associate Professor, Department of Chemistry and Biochemistry, 2008.

Heymsfield, Ernie, Ph.D. (City University of New York), M.S.C.E. (Polytechnic University), Associate Professor, Department of Civil Engineering, 2001.

Hicks, Morgan, M.F.A. (University of Arkansas), M.A. (Missouri State University), B.F.A. (Arkansas State University), Assistant Professor, Department of Theatre, 2007.

Higgins, Kristin Kay, Ph.D., M.S. (University of Arkansas), B.A. (Vanderbilt University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2006.

Hinds, Heather Rae, M.A. (University of Arkansas), B.S. (University of Central Missouri), Instructor, Department of World Languages, Literatures and Cultures, 2008.

Hinrichsen, Lisa, Ph.D., M.A. (Boston University), B.A. (Wellesley College), Associate Professor, Department of English, 2008.

Hoehle, Hartmut, Ph.D., B.Com. (Victoria University of Wellington), Associate Professor, Department of Information Systems, 2013.

Hofer, Christian, Ph.D. (University of Maryland University College), B.A. (European School of Business), Associate Professor, Department of Supply Chain Management, 2007.

Hogan, Adam S., M.A. M.F.A (Washington University in St. Louis), Assistant Professor, School of Art, 2014.

Holland, Edward C., Ph.D., M.A. (University of Colorado, Boulder), B.A. (Princeton University), Assistant Professor, Department of Geosciences, 2016.

Hollingsworth, Cathy A., M.A. (University of Arkansas), Instructor, Department of Communication, 2011.

Holyfield, Lori C., Ph.D. (University of Georgia), M.A., B.S.E. (University of Arkansas), Professor, Department of Sociology and Criminology, 1995.

Holyfield, Christine E., Ph.D. (Pennsylvania State University), M.A. (University of Kansas), B.S. (Central Michigan University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2017.

Hopkins, John D., Ph.D. (University of Arkansas), M.S., B.S. (Clemson), Associate Professor, Department of Entomology and Plant Pathology, 2002.

Horowitz, Andrew W., Ph.D., M.S. (University of Wisconsin-Madison), B.S. (University of Maryland), Professor, Department of Economics, 1998.

Howard, Luke R., Ph.D., M.S. (University of Arkansas), B.S. (Purdue University), Professor, Department of Food Science, 2002.

Howie, Erin, Ph.D. (University of South Carolina), B.S. (University of Maryland), Assistant Professor, Department of Health, Human Performance and Recreation, 2016.

Howlett, Kristina-Marie, Ph.D. (University of Arkansas), M.P.S. (Manhattanville College), B.A. (University of Connecticut), Assistant Professor, Department of Curriculum and Instruction, 2016.

Hoyer, Jennifer M., Ph.D., M.A. (University of Arkansas), M.F.A. (California Institute of the Arts), B.A. (Oberlin College), Clinical Assistant Professor, School of Human Environmental Sciences, 2015.

Hu, Hung-Chia Scott, Ph.D. (University of North Carolina-Chapel Hill), M.A. (University of Southern California), B.A. (National Taiwan University), Assistant Professor, Department of Finance, 2015.

Hsu, V. Jo, Ph.D., M.F.A. (Pennsylvania State University), B.A. (Rice University), Assistant Professor, Department of English, 2017.

Hu, Jin, Ph.D. (Tulane University), B.S. (University of Science and Technology of China), Assistant Professor, Department of Physics, 2016.
Huang, Po-Hao Adam, Ph.D., M.S., B.S. (University of California-Los Angeles), Associate Professor, Department of Mechanical Engineering, 2006.

Huang, Miaqing, Ph.D. (George Washington University), B.S. (Fudan University), Associate Professor, Department of Computer Science and Computer Engineering, 2010.

Huang, Quiqiong, Ph.D. (University of California-Davis), B.S. (Remin University of China), Professor, Department of Agricultural Economics and Agribusiness, 2013.

Huang, Yan, Ph.D. (University of Wyoming), M.S. (Dankook University), B.S. (China Agricultural University), Assistant Professor, Department of Animal Science, 2015.

Hubert, Stephanie K., M.S. (University of Arkansas), B.S. (Kansas State University), Instructor, School of Human Environmental Sciences, 2015.

Hughes, Claretha, Ph.D. (Virginia Polytechnic Institute and State University), M.S. (North Carolina State University), M.B.A. (University of Arkansas), B.A. (Clemson University), Professor, Department of Human Resource and Workforce Development Education, 2004.

Huitink, David, Ph.D., M.S.M.E., B.S.M.E. (Texas A&M University), Assistant Professor, Department of Mechanical Engineering, 2016.

Hulen, Jeannie, M.F.A. (Kansas City Art Institute), Professor, School of Art, 2002.

Hunt, Valerie H., Ph.D., J.D., B.A. (University of Arkansas), Associate Professor, Department of Political Science, 2005.

Hutchins, Rhett J., Ph.D. (University of Georgia), M.Ed., B.S. (Clemson University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2014.

Hutto, Gregory T., M.S. (Stanford University), B.S. (U.S. Naval Academy), Instructor, Program in Operations Management, 2014.

Hyatt, David Graham, M.B.A., B.S.B.A. (University of Arkansas), Research Associate Professor, Department of Supply Chain Management, 2011.

Hyman, Jeremy S., C.Phil. (University of California, Los Angeles), M.A. (Princeton University), B.A. (University of Michigan), Instructor, Department of Philosophy, 2013.

Imbeau, Marcia B., Ph.D. (University of Connecticut), M.Ed. (University of Arkansas at Little Rock), B.A. (Hendrix College), Professor, Department of Curriculum and Instruction, 1991.

Irish, Shawn D., M.F.A. (University of Arkansas), B.A. (Missouri Southern State University), Assistant Professor, Department of Theatre, 2013.

Ivey, Mack, Ph.D., B.S. (University of Georgia), Associate Professor, Department of Biological Sciences, 1992.

Iyer, Shilpa, Ph.D. (University of Georgia), M.Sc., B.Sc. (University of Pune, India), Assistant Professor, Department of Biological Sciences, 2016.

Jackson, Brandon, Ph.D. (Florida State University), Associate Professor, Department of Sociology and Criminology, 2013.

Jacobs, Lynn Frances, Ph.D., M.A. (New York University), B.A. (Princeton University), Distinguished Professor, School of Art, 1989.

Jandik, Tomas, Ph.D. (University of Pittsburgh), M.S., B.S. (Czech Technical University), Professor, Department of Finance, 2000.

Janicke, Sophie H., Ph.D. (Florida State University), M.S. (Eberhard Karls University), B.A. (Friedrich Wihlhelms University), Visiting Assistant Professor, Department of Communication, 2014.

Jarnagin, Robyn, LL.M. (New York University), J.D., B.S. (University of Montana), Clinical Assistant Professor, Department of Accounting, 2016.

Jarrett, Anna Lee, Ph.D., M.S.N. (University of Missouri-Columbia), B.S.N. (Missouri Southern State College), Associate Professor, Eleanor Mann School of Nursing, 2012.

Jeffers, Neal, M.S.Ed. (Old Dominion University), B.E.S. (University of Missouri), Instructor, Program in Operations Management, 2017.

Jennings, John A., Ph.D. (University of Missouri), M.S. (University of Arkansas), B.S. (Southwest Missouri State University), Professor, Department of Animal Science, 1998.

Jensen, Thomas D., Ph.D., M.A., B.A. (University of Arkansas), Professor, Department of Marketing, 1982.

Jensen, Molly R., Ph.D., M.A. (University of Arkansas), B.S. (Southwest Missouri State University), Clinical Associate Professor, Department of Marketing, 2003.

Jensen, David C., Ph.D., M.S., B.S. (Oregon State University), Assistant Professor, Department of Mechanical Engineering, 2012.

Jensen, Toni, Ph.D. (Texas Tech University), M.A., B.A. (University of South Dakota), Assistant Professor, Department of English, 2014.

Jensen, Morten O., Ph.D. (University of Aarhus, Denmark), M.Sc. (Georgia Institute of Technology), Associate Professor, Department of Biomedical Engineering, 2014.

Jensen, Hanna Katarina, Ph.D. (University of Oulu, Finland), Research Assistant Professor, Department of Biomedical Engineering, 2015.

Joffe Minor, Tacy Marie, Ph.D. (Northwestern University), M.A., B.S. (University of Arkansas), Visiting Assistant Professor, Department of Physics, 2011.

Jogan, Kathleen, Ed.D., M.S. (University of Arkansas), B.S. (Ursinus College), Instructor, Department of Animal Science, 2015.

Johnson, Donald M., Ph.D. (University of Missouri-Columbia), M.A., B.S. (Western Kentucky University), Professor, Department of Agricultural Education, Communications and Technology, 1993.

Johnson, Jon, Ph.D. (Indiana University at Bloomington), M.B.A., B.S. (University of Arkansas), Professor, Department of Management, 1996.

Johnson, Donn T., Ph.D., M.S. (Michigan State University), B.S. (University of Minnesota, Duluth), Professor, Department of Entomology and Plant Pathology, 1978.

Johnson, Mark, Ph.D. (Michigan State University), M.S. (Purdue University), B.S. (City University of New York, Brooklyn College), Professor, Department of Mathematical Sciences, 1995.

Johnson, Michael, M.S.C.E. (University of Pittsburgh), B.S.C.E. (University of Minnesota), B.A. (Chapman College), Professor, Department of Civil Engineering, 2010.

Johnson-Carter, Charlene M., Ph.D. (Emory University), M.B.A. (Atlanta University), M.Ed., B.A. (University of Cincinnati), Associate Professor, Department of Curriculum and Instruction, 1992.

Jones, Linda Carol, Ph.D. (University of New Mexico), M.A. (University of Arkansas), M.A. (University of Arizona), B.A. (Northeast Louisiana University), Associate Professor, Department of World Languages, Literatures and Cultures, 1988.

Jones, Ches, Ph.D. (University of Alabama at Birmingham), B.S.E. (Pittsburg State University), Professor, Department of Health, Human Performance and Recreation, 1994.

Jones, Clinton, Ed.D. (Arkansas Tech University), Ed.S. (Harding University), Assistant Professor, Department of Curriculum and Instruction, 2019.

Jordan, Gerald Bernard, M.S.J. (Northwestern University), B.A. (University of Arkansas), Associate Professor, School of Journalism and Strategic Media, 1995.

Joshi, Neelendra, Ph.D. (Pennsylvania State University), Assistant Professor, Department of Entomology and Plant Pathology, 2015.
Jozkowski, Kristen N., Ph.D., M.S. (Indiana University at Bloomington), B.S. (Pennsylvania State University), Associate Professor, Department of Health, Human Performance and Recreation, 2011.

Judges, Donald P., Ph.D. (University of Tulsa), J.D. (University of Maryland University College), B.A. (Johns Hopkins University), Professor, School of Law, 1989.

Jung, Hyunsoek, Ph.D. (Syracuse University), M.A. (Korea Development Institute), B.A. (Seoul National University), Assistant Professor, Department of Economics, 2018.

K

Kacirek, Kit, Ed.D., M.Ed. (University of Arkansas), B.S. (University of Texas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1997.

Kahf, Mohja, Ph.D., B.A. (Rutgers State University-New Brunswick), Associate Professor, Department of English, 1995.

Kahng, Er-Gene, D.M. (Northwestern University), A.D., M.M. (Yale University), B.A. (University of California-Los Angeles), Associate Professor, Department of Music, 2007.

Kali, Raja, Ph.D., M.A. (University of Maryland University College), B.S.C. (University of Calcutta), Professor, Department of Economics, 1999.

Kaman, Tulin, Ph.D. (Stony Brook University), M.S. (Istanbul Technical University), B.S. (Yildiz Technical University), Assistant Professor, Department of Mathematical Sciences, 2017.

Karcher, Douglas Edward, Ph.D., M.S. (Michigan State University), B.S. (The Ohio State University), Professor, Department of Horticulture, 2000.

Kashiwagi, Tomoko, D.M.A. (University of Texas at Austin), M.M., B.M. (Indiana University), Assistant Professor, Department of Music, 2012.

Kayser, Casey Lee, Ph.D. (Louisiana State University), M.A. (University of Missouri-Columbia), B.A. (Westminster College), Assistant Professor, Department of English, 2012.

Kegley, Beth, Ph.D., M.S. (North Carolina State University), B.S. (Virginia Polytech Institute and State University), Professor, Department of Animal Science, 1996.

Keiffer, Elizabeth, Ph.D., M.A. (University of Arkansas), B.S. (East Central University), Instructor, Department of Information Systems, 2016.

Kelly, Donald R., Ph.D. (University of Indiana at Bloomington), M.A., B.A. (University of Pittsburgh), Professor, Department of Political Science, 1980.

Kelley, Christopher Rowand, LL.M. (University of Arkansas), J.D. (Howard University), B.A. (Louisiana State University at Shreveport), Associate Professor, School of Law, 1998.

Kelly, Jason, Ph.D., M.S. (Oklahoma State University), B.S. (Kansas State University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2003.

Kemper, Nathan, M.S., B.S. (University of Arkansas), Clinical Professor, Department of Agricultural Economics and Agribusiness, 2014.

Kennefick, Julia Dusk, Ph.D. (California Institute of Technology), B.S. (University of Arkansas), Associate Professor, Department of Physics, 2003.

Kennefick, Daniel John, Ph.D., M.A. (California Institute of Technology), B.S. (University College Cork, Ireland), Associate Professor, Department of Physics, 2004.

Kent, Laura B., Ph.D. (University of Wisconsin-Madison), M.S. (Purdue University Calumet), B.S. (Purdue University), Associate Professor, Department of Curriculum and Instruction, 2006.

Kern, Jack C., Ph.D. (Texas Woman's University), M.Ed. (Texas State University-San Marcos), B.S. (University of Wisconsin-LaCrosse), Clinical Professor, Department of Health, Human Performance and Recreation, 1996.

Kerr, Grace R., M.A. (Texas A&M University), B.A. (Sam Houston State University), Clinical Instructor, Department of Curriculum and Instruction, 2006.

Kerr, Brinck, Ph.D. (Texas A&M University), B.A. (University of Texas at Austin), Professor, Department of Political Science, 1994.

Keskek, Sami, Ph.D. (Texas A&M University), M.S. (Fatih University), B.S. (Bogazici University), Assistant Professor, Department of Accounting, 2011.

Kidd, Michael T., Ph.D. (North Carolina State University), M.S., B.S.A. (University of Arkansas), Professor, Department of Poultry Science, 2010.

Killenbeck, Mark R., J.D., Ph.D. (University of Nebraska-Lincoln), B.A. (Boston College), Distinguished Professor, School of Law, 1988.

Killenbeck, Ann Mallatt, Ph.D. (University of Michigan-Ann Arbor), J.D. (University of Nebraska-Lincoln), Associate Professor, School of Law, 2003.

Kilian, Timothy Scott, Ph.D. (University of Missouri-Columbia), M.A. (Wheaton College), B.A. (Central Bible College), Associate Professor, School of Human Environmental Sciences, 2001.

Kilmer, Michele, D.N.P. (University of Alabama), M.S.N (Texas Tech University), B.S.N. (Harding University), Assistant Professor, Eleanor Mann School of Nursing, 2017.

Klyanek, Stefan M., Ph.D., M.S. (University of Chicago), B.S. (Grand Valley State University), Assistant Professor, Department of Chemistry and Biochemistry, 2014.

Kim, Jin-Woo, Ph.D. (Texas A&M University), M.S. (University of Wisconsin-La Crosse), B.S. (University of Iowa), Professor, Department of Biological and Agricultural Engineering, 2001.

Kim, Myunghee Michelle, Ph.D., B.S. (University of Texas at Austin), Clinical Assistant Professor, Department of Biomedical Engineering, 2013.

Kimbrough, Hanna A.D., M.S.W. (University of Arkansas), Lecturer, School of Social Work, 2014.

Kindy, Phillip D., M.I.S. (University of Arkansas), B.S. (DeVry Institute of Technology), Instructor, Department of Information Systems, 2012.

King, Sam, M.F.A. (Indiana University at Bloomington), B.F.A. (University of Tulsa), Assistant Professor, School of Art, 2011.

King, Tiffany, M.A.T., B.S.E. (University of Arkansas), Clinical Instructor, Department of Curriculum and Instruction, 2015.

Kippenbrock, Thomas A., Ed.D. (University of Indiana at Bloomington), M.S. (Indiana University-Purdue University-Indianapolis), B.S.N. (Indiana State University), Professor, Eleanor Mann School of Nursing, 2003.

Kirkpatrick, Terry, Ph.D. (North Carolina State University), M.S., B.S. (University of Arkansas), Professor, Department of Entomology and Plant Pathology, 1984.

Kish-Gephart, Jennifer, Ph.D. (Pennsylvania State University), M.B.A., B.S. (Drexel University), Associate Professor, Department of Management, 2010.

Knighten, Chris, D.M.A., M.M. (University of Colorado), B.M. (Baylor University), Associate Professor, Department of Music, 2009.

Knighten, Janet Whitman, M.M., B.M. (East Carolina University), Assistant Professor, Department of Music, 2009.

Koch, Lynn C., Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Arizona), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2006.

Koch, Mark, O.T.D. (Saint Louis University), Clinical Assistant Professor, Department of Occupational Therapy, 2018.

Koepp, Roger E., Ph.D. (California Institute of Technology), A.B. (Haverford College), Distinguished Professor, Department of Chemistry and Biochemistry, 1979.
Koh, Dongy, Ph.D. (Washington University-St. Louis), M.A. (Boston University), B.A. (Keio University), Assistant Professor, Department of Economics, 2014.

Koltes, Dawn A., Ph.D. (Iowa State University), Adjunct Assistant Professor, Department of Animal Science, 2015.

Kong, Byungwhi, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (Korea University), Associate Professor, Department of Poultry Science, 2006.

Kopp, Steven W., Ph.D. (Michigan State University), M.B.A. (University of Southern Mississippi), B.S. (University of Missouri-Rolla), Associate Professor, Department of Marketing, 1992.

Korth, Ken L., Ph.D. (North Carolina State University), B.S. (University of Nebraska), Professor, Department of Entomology and Plant Pathology, 1999.

Korth, Deborah, Ed.D. (University of Arkansas), M.Ed. (North Carolina State University), B.S. (University of Nebraska-Lincoln), Clinical Associate Professor, J. William Fulbright College of Arts and Sciences, 2004.

Koski, Patricia, B.A., M.A., Ph.D. (Washington State University), Associate Professor, Department of Sociology and Criminology, 1984.

Kovacs, Kent F., Ph.D. (University of California-Davis), B.A. (Vassar College), Associate Professor, Department of Agricultural Economics and Agribusiness, 2012.

Kral, Timothy Alan, Ph.D. (University of Florida), B.S. (John Carroll University), Professor, Department of Biological Sciences, 1981.

Kucharzyk, Suzanne, Ed.D. (Columbia University Teacher’s College), M.Ed., B.S. (University of Illinois-Urbana-Champaign), Assistant Professor, Department of Curriculum and Instruction, 2014.

Kuenzel, Wayne J., Ph.D. (University of Georgia), M.S., B.S. (Bucknell University), Professor, Department of Poultry Science, 2000.

Kumar, Pradeep, Ph.D. (Boston University), M.Sc. (Indian Institute of Technology, Mumbai, India), Assistant Professor, Department of Physics, 2013.

Kutz, Bryan Richard, M.S. (Western Kentucky University), B.S. (Oklahoma State University), A.S. (Northern Oklahoma College), Instructor, Department of Animal Science, 1997.

Kvamm, Kenneth L., Ph.D. (University of California-Santa Barbara), M.A., B.A. (Colorado State University), Professor, Department of Anthropology, 1999.

Kwon, Young Min, Ph.D. (Texas A&M University), M.S., B.S. (Seoul National University), Associate Professor, Department of Poultry Science, 2002.

L

Lacity, Mary, Ph.D. (University of Houston), B.S.B.A. (Pennsylvania State University), Professor, Department of Information Systems, 2018.

Lamb, Andrew P., Ph.D. (Boise State University), M.S. (Florida Institute of Technology), B.S. (University of Dublin, Trinity), Assistant Professor, Department of Geosciences, 2017.

Lamm, Connie, Ph.D., M.A. (University of Toronto, Canada), B.A. (University of Waterloo), Assistant Professor, Department of Psychological Science, 2016.

Lampinen, James Michael, Ph.D., M.S. (Northwestern University), B.S. (Elmhurst College), Distinguished Professor, Department of Psychological Science, 1998.

Landman, Michael, M.F.A. (Columbia University), B.A. (State University of New York at Binghamton), Associate Professor, Department of Theatre, 2004.

Lane, Valerie Jean, M.F.A. (Pennsylvania State University), B.F.A. (Memphis College of Art), Instructor, Department of Theatre, 2008.

Lane, Marty Maxwell, M.G.D. (North Carolina State University), B.F.A. (University of Illinois at Chicago), Associate Professor, School of Art, 2014.

Langsner, Steve, Ph.D. (Indiana University at Bloomington), M.S. (University of Baltimore), B.S. (Springfield College), Associate Professor, Department of Health, Human Performance and Recreation, 1989.

LaPorte, Angela M., Ph.D. (Pennsylvania State University), M.A. (Arizona State University), B.S. (La Roche College), Professor, School of Art, 1998.

Lasater, Kara A., Ed.D. (University of Arkansas), Ed.S., M.S. (Pittsburgh State University), B.A. (Drury University), Assistant Professor, Department of Curriculum and Instruction, 2014.

Lattanzi, Paula, J.D. (University of Arkansas), M.S. (West Virginia University), Instructor, Program in Operations Management, 2008.

Lau, Wing, Ph.D. (University of Oregon), M.M. (Indiana University), Lecturer, Department of Music, 2016.

Lay, Jackson, Ph.D. (University of Nebraska-Lincoln), Professor, Department of Chemistry and Biochemistry, 2002.

Lee, Richard N., Ph.D. (Stanford University), B.A. (Luther College), Associate Professor, Department of Philosophy, 1982.

Lee, Wayne Y., Ph.D. (University of California-Los Angeles), M.B.A. (Santa Clara University), B.S.M.E. (De La Salle College, Philippines), Professor, Department of Finance, 1998.

Lee, Sun-Ok, Ph.D., M.S. (Iowa State University), M.S., B.S. (Dongduk Women’s University), Associate Professor, Department of Food Science, 2008.

Lee, Peggy B., Ed.D. (University of Arkansas), M.S. (University of Southern Mississippi), B.S.N. (Mississippi College), Clinical Assistant Professor, Eleanor Mann School of Nursing, 2009.

Lee, Jacquelyn A., Ph.D., M.S. (University of Arkansas), B.S. (Arkansas Technical University), Associate Professor, Department of Horticulture, 2016.

Leeds, Stacy, LL.M. (University of Wisconsin-Madison), J.D. (University of Tulsa), M.B.A. (University of Tennessee), B.A. (Washington University in St. Louis), Professor, School of Law, 2011.

Leen-Feldner, Ellen Winifred, Ph.D. (University of Vermont), M.A. (West Virginia University), B.A. (University of Notre Dame), Professor, Department of Psychological Science, 2005.

Leflar, Rob, M.P.H., J.D., A.B. (Harvard University), Professor, School of Law, 1982.

Leflar, Charles Joseph, Ph.D., M.A. (University of Missouri-Columbia), B.S.B.A. (University of Arkansas), Clinical Professor, Department of Accounting, 1993.

Leftwich, Gail, B.S. (University of Arkansas), Lecturer, Department of Theatre, 1997.

Lehmann, Michael Herbert, Ph.D., Diploma in Biology (Philips University Marburg, Germany), Professor, Department of Biological Sciences, 2002.

Lehmer, Bret Darby, Ph.D. (Pennsylvania State University), B.S. (University of Iowa), Assistant Professor, Department of Physics, 2015.

Lens, Joshua, J.D. (University of Iowa), B.A. (University of Northern Iowa), Clinical Assistant Professor, Department of Health, Human Performance and Recreation, 2018.

Lessner, Daniel J., Ph.D. (University of Iowa), B.S. (University of Wisconsin-Stevens Point), Associate Professor, Department of Biological Sciences, 2008.

Levenson, Abra, Ph.D., M.A. (Princeton), B.A. (University of California, Berkeley), Assistant Professor, School of Art, 2018.

Levine, Daniel, Ph.D. (University of Cincinnati), B.A. (University of Minnesota), University Professor, Department of World Languages, Literatures and Cultures, 1980.

Levine, William H., Ph.D., M.S. (State University of New York at Binghamton), B.S. (DePaul University), Associate Professor, Department of Psychological Science, 2001.
Lewis, Jeffrey A., Ph.D. (University of Wisconsin-Madison), B.S. (University of California-Santa Barbara), Assistant Professor, Department of Biological Sciences, 2013.

Leylek, Jim, Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Illinois at Chicago), Professor, Department of Mechanical Engineering, 2011.

Li, Wing Ning, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (University of Iowa), Professor, Department of Computer Science and Computer Engineering, 1989.

Li, Yanbin, Ph.D. (Pennsylvania State University), M.S. (University of Nebraska-Lincoln), B.S. (Shenyang Agricultural University), Distinguished Professor, Department of Biological and Agricultural Engineering, 1989.

Li, Jiali, Ph.D., M.S. (City University of New York-City College), M.S. (University of Science and Technology of China), B.S. (Hei Long Jiang University), Professor, Department of Physics, 2002.

Li, Qinghua, Ph.D. (Pennsylvania State University), M.S. (Tsinghua University), B.E. (Xi’an Jiaotong University), Assistant Professor, Department of Computer Science and Computer Engineering, 2013.

Li, Xin "Sherry", Ph.D. (University of Michigan), M.A. (Syracuse University), M.A., B.A. (Renmin People’s University of China), Professor, Department of Economics, 2018.

Liang, Yi, Ph.D. (University of Alberta, Canada), M.S., B.S. (China Agricultural University, Beijing, China), Associate Professor, Department of Biological and Agricultural Engineering, 2007.

Liang, Xinya, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.

Liao, Haitao, Ph.D., M.S., M.S.I.S.E. (Rutgers University), B.S.E.E. (Beijing Institute of Technology), Professor, Department of Industrial Engineering, 2015.

Limp, Fred, Ph.D., M.A., B.A. (Indiana University at Bloomington), University Professor, Department of Geosciences, 1979.

Lin, Christopher L., Ph.D. (Colorado School of Mines), M.S. (University of Tulsa), B.S. (University of Arkansas), Professor, Department of Geosciences, 2012.

Lirgg, Cathy D., Ph.D. (Michigan State University), M.S. (Indiana State University), B.A. (Muskingum College), Professor, Department of Health, Human Performance and Recreation, 1991.

Li, Pu, Ph.D., M.B.A. (Indiana University at Bloomington), B.S. (National Cheng Kung University), Professor, Department of Finance, 1984.

Li, Xiaoping Frank, Ph.D. (Texas A&M University), M.S. (Southeast University, China), B.S. (National University of Defense Technology, China), Professor, Department of Computer Science and Computer Engineering, 2015.

Li, Xiao, Ph.D. (National University of Singapore), B.S.M.E. (Harbin Institute of Technology, China), Assistant Professor, Department of Industrial Engineering, 2017.

Livingston, Mark A., Ph.D. (University of Maryland), Instructor, Program in Operations Management, 2017.

Lo, Wen-Juo, Ph.D., M.A. (Arizona State University), B.S. (SooChow University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2008.

Loewer, Otto J., Ph.D. (Purdue University), M.S. (Michigan State University), B.S. (Louisiana State University), Professor, Department of Biological and Agricultural Engineering, 1996.

Loftin, Kelly M., Ph.D. (New Mexico State University), M.S. (University of Arkansas), B.S. (Arkansas Tech), Associate Professor, Department of Entomology and Plant Pathology, 2002.

Long, Mary Beth, Ph.D., M.A. (University of Massachusetts, Amherst), B.A. (Ouachita Baptist University), Assistant Professor, Department of English, 2014.

Looper, Michael L., Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Professor, Department of Animal Science, 2011.

Lorah, Elizabeth R., Ph.D., M.S.Ed., B.A. (Temple University), Associate Professor, Department of Curriculum and Instruction, 2013.

Lovrenz, Gus M., Ph.D., B.S.A., M.S. (University of Arkansas), Distinguished Professor, Department of Entomology and Plant Pathology, 1997.

Lorenzo, Violeta, Ph.D. (University of Toronto), M.A., B.A. (University of Florida), Assistant Professor, Department of World Languages, Literatures and Cultures, 2014.

Lorenzo, Benjamin, D.M.A., M.M. (University of Texas), B.M. (Florida International University), Assistant Professor, Department of Music, 2015.

Luckstead, Jeff A., Ph.D. (Washington State University), M.S., B.S. (University of Idaho), Associate Professor, Department of Agricultural Economics and Agribusiness, 2013.

Luecking, Daniel H., Ph.D., M.S., B.A. (University of Illinois-Urbana-Champaign), Professor, Department of Mathematical Sciences, 1981.

Luo, Fang, Ph.D. (Huazhong University of Science and Technology), Assistant Professor, Department of Electrical Engineering, 2017.

Luu, Khoa, Ph.D. (Concordia University), Assistant Professor, Department of Computer Science and Computer Engineering, 2018.

Lyons, Jack C., Ph.D. (University of Arizona), B.A. (Valparaiso University), Professor, Department of Philosophy, 2001.

Lyons, Vincent S., M.B.A. (University of Phoenix), M.S. (Stanford University), Instructor, Program in Operations Management, 2018.

M

Ma, Xiao, Ph.D. (University of Wisconsin), M.A. (Syracuse University), B.A. (Nanjing University), Assistant Professor, Department of Information Systems, 2014.

Mackay, Wayne A., Ph.D. (University of Maryland), M.S. (University of Delaware), B.S. (Virginia Polytechnic Institute and State University), Professor, Department of Horticulture, 2014.

Mackey, Andrew, M.S. (University of Arkansas), Instructor, Department of Information Systems, 2014.

MacRae, Christopher J., D.M.A. (Boston University), Instructor, Department of Music, 2015.

Madison, Karen, Ph.D., M.A., B.A. (University of Arkansas), Instructor, Department of English, 2008.

Madison, Robert Durwood, Ph.D. (Northwestern University), M.A. (Clark University), B.A. (University of Rhode Island), Instructor, Department of English, 2009.

Magnetti, Brenda Monica, M.A. (University of Arkansas), B.A. (Ouachita Baptist University), Instructor, Department of World Languages, Literatures and Cultures, 2007.

Magoullick, Daniel D., Ph.D. (University of Pittsburgh), M.S. (Eastern Michigan University), B.S. (Michigan State University), Research Professor, Department of Biological Sciences, 2000.

Mahmoud, Rania, Ph.D. (University of Washington), M.A. (Old Dominion University), B.A., (University of Alexandria, Egypt), Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.

Mains, Ronda M., D.M.A. (University of Oregon), M.A., B.M. (Boise State University), Professor, Department of Music, 1987.

Maksymchuk, Oksana, Ph.D. (Northwestern University), B.A. (Bryn Mawr College), Assistant Professor, Department of Philosophy, 2013.
Malakhov, Alexey, Ph.D. (Northwestern University), Ph.D. (University of North Carolina at Charlotte), M.S. (Moscow State University), Associate Professor, Department of Finance, 2006.
Malis, David, M.M. (University of Cincinnati), Assistant Professor, Department of Music, 2013.
Malladi, Suresh, Ph.D. (University of Michigan), M.S. (Carnegie Mellon University), M.B.A. (National Institute of Technology), B.E. (Osmania University), Assistant Professor, Department of Information Systems, 2014.
Malshe, Ajay P., Ph.D., M.S., B.S. (University of Poona, India), Distinguished Professor, Department of Mechanical Engineering, 1995.
Malstrom, Derek, M.S.I.E., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2016.
Mamiseishvili, Ketevan, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Akaki Tsereteli State University), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2008.
Manasreh, Omar, Ph.D. (University of Arkansas), M.S. (University of Puerto Rico-Rio Piedras), B.S. (University of Jordan), Professor, Department of Electrical Engineering, 2003.
Manter, Matthew, Ph.D. (Purdue University), M.Sc., B.Sc. (University of Genova, Italy), Assistant Professor, Department of Mathematical Sciences, 2015.
Mantooth, Alan, Ph.D. (Georgia Institute of Technology), M.S., B.S. (University of Arkansas), Distinguished Professor, Department of Electrical Engineering, 1998.
Maranto, Robert Anthony, Ph.D. (University of Minnesota), B.S. (University of Maryland), Professor, Department of Education Reform, 2008.
Marcy, John A., Ph.D., M.S. (Iowa State), B.S. (University of Tennessee), Extension Professor, Department of Poultry Science, 1993.
Margulis, Jura, Graduate Performance Diploma (Peabody Conservatory of Music, Johns Hopkins University) M.M. (Musikhochschule Freiburg, Germany), B.M. (Musikhochschule Freiburg, Germany), Professor, Department of Music, 1999.
Margulis, Elizabeth Hellmuth, Ph.D., M.A., M.Phil. (Columbia University), B.M. (Peabody Conservatory), Professor, Department of Music, 2006.
Marion, Jonathan S., Ph.D., M.A. (University of California-San Diego), B.A. (University of Redlands), Associate Professor, Department of Anthropology, 2012.
Marren, Susan M., Ph.D., M.A. (University of Michigan-Ann Arbor), B.A. (Cornell University), Associate Professor, Department of English, 1995.
Marshfield, Jonathan, LL.M. (New York University), J.D. (Rutgers University-Camden), B.A. (Cedarville University), Associate Professor, School of Law, 2013.
Martin, Kim I., M.A., B.S.Ed. (University of Arkansas), Instructor, School of Journalism and Strategic Media, 1997.
Martin, Patricia, M.F.A. (Purdue University), B.A. (Rollins College), Professor, Department of Theatre, 1995.
Martin, Terry W., Ph.D., M.S.E.E., B.S.E.E. (University of Arkansas), Professor, Department of Electrical Engineering, 1990.
Marzolf, Steven, M.F.A. (University of San Diego), B.A. (University of Wisconsin–Green Bay), Lecturer, Department of Theatre, 2015.
Mason, Scott, Ph.D. (Arizona State University), M.S., B.S. (University of Texas), Instructor, Program in Operations Management, 2001.
Mason, Richard Esten, Ph.D., B.A. (Texas A&M University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2010.
Matlock, Marty D., Ph.D., M.S., B.S. (Oklahoma State University), Professor, Department of Biological and Agricultural Engineering, 2001.
Matthews, Mary Beth, J.D., B.S.E. (University of Arkansas), Professor, School of Law, 1981.
Mauromoustakos, Andy, Ph.D., M.S. (Oklahoma State University), B.S. (Oral Roberts University), Professor, Department of Crop, Soil and Environmental Sciences, 1989.
Maxwell, Charles, Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Georgia), Professor, Department of Animal Science, 1996.
Maxwell, Angie, Ph.D., M.A. (University of Texas at Austin), B.A. (University of Arkansas), Associate Professor, Department of Political Science, 2008.
McCaffrey, Raymond, Ph.D. (University of Maryland), M.A. (University of Colorado), M.A. (Columbia University), B.A. (Fairfield University), Assistant Professor, School of Journalism and Strategic Media, 2014.
McConn, Roy A., Ph.D. (University of Dayton), M.S.E.E., B.S.E.E. (University of Illinois), Professor, Department of Electrical Engineering, 2003.
McComas, William, Ph.D. (University of Iowa), M.S. (West Chester University of Pennsylvania), B.S. (Lock Haven University of Pennsylvania), Distinguished Professor, Department of Curriculum and Instruction, 2006.
McConnell, Mathew S., M.F.A. (University of Colorado-Boulder), B.F.A. (Valdosta State University), Associate Professor, School of Art, 2011.
McCray, Suzanne, Ph.D. (University of Tennessee), M.A., B.A. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2010.
McDermott, Brendon P., Ph.D. (University of Connecticut), M.S. (Indiana University at Bloomington), B.S. (Northeastern University), Associate Professor, Department of Health, Human Performance and Recreation, 2012.
McDonald, Garry Vernon, Ph.D., M.S., B.S.A. (Texas A&M University), Clinical Assistant Professor, Department of Horticulture, 2016.
McGee, Peter J., Ph.D. (Ohio State University), B.S. (Tulane University), Associate Professor, Department of Economics, 2014.
McGlynn, Moira, Ph.D., M.B.A. (Union College of Union University), Instructor, Program in Operations Management, 2013.
McIntosh, Matt, Ph.D. (Pennsylvania State University), B.A. (Virginia Tech), Professor, Department of Chemistry and Biochemistry, 1996.
McKenzie, Andrew Malcolm, Ph.D. (North Carolina State University), M.Sc. (Stirling University), B.Admin. (University of Dundee), Professor, Department of Agricultural Economics and Agribusiness, 1998.
McKenzie, Sarah C., Ph.D. (University of Arkansas), M.A. (Mills College), B.A. (Claremont McKenna College), Clinical Assistant Professor, Department of Education Reform, 2018.
Mckinney, Nathan, Ph.D. (Kansas State University), M.S., B.S. (University of Arkansas), Professor, 2008.
McKnight, Jennifer Ann, M.F.A., B.A. (University of Alabama), Instructor, Department of Theatre, 2015.
McKnight, Rebecca, M.B.A. (University of Arkansas), Instructor, Department of Management, 2016.
McMahon, Bree, Ph.D., M.S. (North Carolina State University), Assistant Professor, Department of Animal Science, 2010.
McMaon, Bree, M.A., B.A. (University of North Carolina), Assistant Professor, School of Art, 2018.
McNabb, David S., Ph.D. (Louisiana State University Health Sciences Center), B.S. (University of Texas at Arlington), Associate Professor, Department of Biological Sciences, 2000.
McNeel, Travis G., M.A. (University of Nevada), B.S. (Utah State University), Instructor, Program in Operations Management, 2014.
McWhirt, Amanda L., Ph.D. (North Carolina State University), M.S. (Louisiana State University), B.S. (Tarleton State University), Assistant Professor, Department of Horticulture, 2016.

Meares, Ian, M.F.A (Penn State), M.F.A (University of California at Irvine), Instructor, School of Art, 2017.

Mears, Derrick, Ph.D. (University of Arkansas), M.S., B.S. (University of Central Missouri), Clinical Associate Professor, Department of Curriculum and Instruction, 2014.

Medina Vidal, D. Xavier, Ph.D. (University of California-Riverside), M.A., B.A. (University of New Mexico), Assistant Professor, Department of Political Science, 2015.

Melton, Kerry D., Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2013.

Meng, Xiangbo, Ph.D. (University of Western Ontario), M.S.E.E. (China University of Petroleum), B.S.C.E. (Northwestern University), Assistant Professor, Department of Mechanical Engineering, 2016.

Messadi, Tahar, Ed.D., M.Arch. (University of Michigan-Ann Arbor), B.Arch. (Université de Constantine, Algeria), Associate Professor, Department of Architecture, 2003.

Meullenet, Jean-François, Ph.D. (University of Georgia), M.S. (National Superior School of Agronomy and Food Science, Nancy, France), Professor, Department of Food Science, 1996.

Michealson, Kirk, M.S. (Naval Postgraduate School), B.S. (United States Naval Academy), Instructor, Program in Operations Management, 2014.

Micheel, Tyler, M.F.A., B.F.A. (Dakota State University), Instructor, Department of Theatre, 2016.

Mihalika, Matthew W., Ph.D. (University of Minnesota), M.A. (University of Minnesota-Duluth), M.A. (University of Minnesota-Twin Cities), Instructor, Department of Music, 2011.

Milburn, Ashlea R., Ph.D. (Georgia Institute of Technology), M.S.I.E. (Virginia Polytechnic Institute and State University), B.S.I.E. (University of Arkansas), Associate Professor, Department of Industrial Engineering, 2010.

Miller, David M., Ph.D. (University of Georgia), M.S., B.S. (Purdue University), Professor, Department of Crop, Soil and Environmental Sciences, 1988.

Miller, Bettie Gale, M.S.N. (University of Phoenix), M.S., B.S.E., B.S.N. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2003.

Miller, Jefferson Davis, Ph.D., M.A. (Oklahoma State University), B.A. (Northeastern State University), Professor, Department of Agricultural Education, Communications and Technology, 2001.

Miller, Michael T., Ed.D. (University of Nebraska), M.S., B.A. (Southern Illinois University), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2003.

Miller, Wayne P., Ph.D. (University of Wisconsin), M.S. (University of Illinois), B.S. (Purdue University), Extension Professor, Department of Agricultural Economics and Agribusiness, 1992.

Miller, Lance E., Ph.D. (University of Connecticut), M.S. (New Mexico State University), Assistant Professor, Department of Mathematical Sciences, 2013.

Miller, Rene P., Ed.D. (Texas Tech University/Texas A&M University), Lecturer, Department of Agricultural Education, Communications and Technology, 2013.

Millett, Francis, Ph.D. (Columbia University), B.S. (University of Wisconsin), Distinguished Professor, Department of Chemistry and Biochemistry, 1972.

Millett, Paul, Ph.D., M.S. (University of Arkansas), B.E. (Vanderbilt University), Assistant Professor, Department of Mechanical Engineering, 2013.

Millett, Joseph D., M.F.A. (University of Southern California), B.A. (Union College), Visiting Assistant Professor, Department of Theatre, 2015.

Mills, Jonathan, Ph.D. (University of Arkansas), M.A., B.S. (University of Missouri-Columbia), Research Associate, Department of Education Reform, 2018.

Minar, Edward H., Ph.D., A.M. (Harvard University), M.A. (University of California at Los Angeles), A.B. (Harvard University), Professor, Department of Philosophy, 1994.

Minor, Ray, M.A. (Northwestern University), B.A. (University of Arkansas), Instructor, School of Journalism and Strategic Media, 2012.

Misenhelter, Dale D., Ph.D. (Florida State University), M.A. (University of Wyoming), B.M. (Florida State University), Professor, Department of Music, 2002.

Mitchell, Joshua Lee, Ph.D. (Southern Illinois University), M.P.A., B.S. (Murray State University), Assistant Professor, Department of Political Science, 2010.

Mitchell, Marc E., M.F.A. (Boston University), Associate Professor, School of Art, 2014.

Mixdorff, Cory, D.M.A., M.M. (Indiana University), B.A. (University of Northern Iowa), Assistant Professor, Department of Music, 2013.

Moiseichik, Merry Lynn, J.D. (University of Arkansas), R.Ed. (Indiana University at Bloomington), M.S., B.S.E. (State University of New York at Cortland), Professor, Department of Health, Human Performance and Recreation, 1989.

Moldenhauer, Karen Ann-Kuenzel, Ph.D. (Iowa State University), M.S. (North Carolina State University), B.S. (Iowa State University), Professor, Department of Crop, Soil and Environmental Sciences, 1982.

Moon, Zola, Ph.D., M.A. (University of Arkansas), B.A. (Hendrix College), Clinical Associate Professor, School of Human Environmental Sciences, 2001.

Moores, John, M.A. (Ball State University), B.B.A. (Kent State University), Instructor, Program in Operations Management, 2001.

Moradi, Mahmoud, Ph.D. (North Carolina State University), M.S., B.S. (Sharif University of Technology), Assistant Professor, Department of Chemistry and Biochemistry, 2015.

Morawicki, Ruben O., Ph.D. (Pennsylvania State University), M.Eng. (State University of New York-Buffalo), B.S. (Universidad Nacional de Misiones, Argentina), Associate Professor, Department of Food Science, 2006.

Morimoto, Shauna, Ph.D., M.S. (University of Wisconsin-Madison), B.A. (University of Pittsburgh), Associate Professor, Department of Sociology and Criminology, 2008.

Morris, Adam, Ed.D. (University of Arkansas), M.S., B.S. (Friends University), B.S. (Newman University), Instructor, Program in Operations Management, 2011.

Morrissey, Sean P., M.F.A. (University of Nebraska-Lincoln), B.F.A. (Bowling Green State University), Assistant Professor, School of Art, 2014.

Mosley, Jacquelyn Dee, Ph.D. (Texas Tech University), M.S. (Arizona State University), B.A. (University of Northern Iowa), Associate Professor, School of Human Environmental Sciences, 2010.

Mounts, Denise Ann, Ed.D. (Saint Louis University), B.S.E. (Northwest Missouri State University), Clinical Associate Professor, Department of Curriculum and Instruction, 2005.

Moxley, Shari Coleman, Ph.D. (University of North Carolina), Instructor, School of Human Environmental Sciences, 2013.
Mozaffari, Morteza, Ph.D. (University of Delaware), M.S., B.S. (University of Massachusetts), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2002.

Muir, Sherry, Ph.D. (Walden University), Associate Professor, Department of Occupational Therapy, 2017.

Muldoon, Timothy J., M.D. (Baylor College of Medicine), Ph.D. (Rice University), B.S. (Johns Hopkins University), Associate Professor, Department of Biomedical Engineering, 2012.

Mullins, Jeff, M.A., B.S. (University of Arkansas), Assistant Professor, Department of Information Systems, 2006.

Muntz, Charles E., Ph.D. (Duke University), B.A. (Swarthmore College), Associate Professor, Department of History, 2008.

Murdock, Jeffrey A., Ph.D. (University of Memphis), M.M., B.M. (University of Southern Mississippi), Assistant Professor, Department of Music, 2015.

Murff, Zora J., M.F.A. (University of Nebraska), Assistant Professor, School of Art, 2018.

Murphey, William C., M.S. (National Defenses University), M.A. (George Washington University), Instructor, Department of Supply Chain Management, 2014.

Murphy, Cheryl Ann, Ed.D., M.A., B.A. (West Virginia University), Professor, Department of Curriculum and Instruction, 1996.

Murphy, Tiffany, J.D., B.A. (University of Michigan), Associate Professor, School of Law, 2014.

Murray, Jeff B., Ph.D. (Virginia Polytechnic Institute and State University), M.A., B.A. (University of Northern Colorado), Professor, Department of Marketing, 1989.

Murray, Lori M., D.N.P. (University of Kansas Medical Center), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Clinical Assistant Professor, Eleanor Mann School of Nursing, 2015.

Musgnug, Kristin Ann, M.F.A. (Indiana University at Bloomington), B.A. (Williams College), Associate Professor, School of Art, 1991.

N

Na, Dominic K., D.M.A. (University of North Texas), A.D. (Southern Methodist University), Instructor, Department of Music, 2016.

Nachtmann, Heather, Ph.D., M.S.I.E., B.S.I.E. (University of Pittsburgh), Professor, Department of Industrial Engineering, 2000.

Nair, Arun, Ph.D. (Virginia Tech), M.S. (Colorado State University), B.T. (Mahatma Gandhi University), Assistant Professor, Department of Mechanical Engineering, 2013.

Naithani, Kusum, Ph.D. (University of Wyoming), M.Sc. (G.B. Pant University of Agriculture and Technology-India), B.Sc. (University of Lucknow-India), Assistant Professor, Department of Biological Sciences, 2014.

Nakamura, Brian S., Ph.D., M.P.A. (University of Southern California), B.A. (California State University), Lecturer, Department of Political Science, 2017.

Nakanishi, Nagayasu, Ph.D. (University of California, Los Angeles), B.S. (University of California, San Diego), Assistant Professor, Department of Biological Sciences, 2017.

Nalley, Lawton Lanier, Ph.D. (Kansas State University), M.S. (Mississippi State University), B.S. (The Ohio State University), Professor, Department of Agricultural Economics and Agribusiness, 2008.

Nance, Cynthia, M.A., J.D. (University of Iowa), B.S. (Chicago State University), Professor, School of Law, 1994.

Naseem, Hameed A., Ph.D., M.S. (Virginia Polytechnic State University), M.Sc. (Panjab University), University Professor, Department of Electrical Engineering, 1985.

Natarajan, Venkatesan Ram, Ph.D., M.A. (New York University), B.A. (Johns Hopkins University), Assistant Professor, Department of Anthropology, 2015.

Nayga, Rudy, Ph.D. (Texas A&M University), M.S. (University of Delaware), B.S. (Foreign Institution), Distinguished Professor, Department of Agricultural Economics and Agribusiness, 2009.

Needy, Kim LaScola, Ph.D. (Wichita State University), P.E., M.S.I.E., B.S.I.E. (University of Pittsburgh), Professor, Department of Industrial Engineering, 2008.

Nelson, Alexander H., Ph.D. (University of Maryland), M.S., B.S. (University of Arkansas), Assistant Professor, Department of Computer Science and Computer Engineering, 2017.

Neville-Shepard, Meredith D., Ph.D. (University of Kansas), Clinical Assistant Professor, Department of Communication, 2016.

Neville-Shepard, Ryan M., Ph.D. (University of Kansas), Assistant Professor, Department of Communication, 2016.

Nichols, Emily M., M.Ed. (University of Arkansas), B.A. (University of Arkansas at Fort Smith), Instructor, Program in Operations Management, 2015.

Niu, Wenbo, Ph.D. (University of Illinois at Chicago), M.S., B.S. (Fudan University, China), Assistant Professor, Department of Mathematical Sciences, 2015.

Nolan, Justin Murphy, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Westminster College), Associate Professor, Department of Anthropology, 2002.

Norman, Richard J., Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Missouri), Professor, Department of Crop, Soil and Environmental Sciences, 1983.

Norsworthy, Jason Keith, Ph.D., M.S. (University of Arkansas), B.S. (Louisiana Tech University), Professor, Department of Crop, Soil and Environmental Sciences, 2006.

Norvell, Phillip E., J.D. (University of Oklahoma), B.A. (University of Oklahoma), Professor, School of Law, 1975.

Norwood, John Martel, J.D. (Tulane University), M.B.A., B.A. (Louisiana State University), Professor, Department of Accounting, 1981.

Nugent, Russell A., Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Pennsylvania State University), Adjunct Professor, Department of Animal Science, 2011.

Nurre, Sarah, Ph.D., M.Ed., B.S. (Rensselaer Polytechnic Institute), Assistant Professor, Department of Industrial Engineering, 2015.

Nutter, Darin W., Ph.D. (Texas A&M University), M.S.M.E., B.S.M.E. (Oklahoma State University), Professor, Department of Mechanical Engineering, 1994.

O

O’Brien, Catherine, Ph.D. (University of Illinois, Chicago), M.P.H. (San Diego State University), M.A. (University of California, San Diego), B.S.Ed. (University of Wisconsin, Madison), Instructor, School of Human Environmental Sciences, 2016.

O’Leary-Kelly, Anne M., Ph.D. (Michigan State University), B.A. (University of Michigan), Professor, Department of Management, 1997.
O’Loughlin, J. Brian, Ph.D. (University of Alabama), M.A. (Syracuse University), B.S. (Boston College), Visiting Assistant Professor, Department of Communication, 2016.

Oliver, William, Ph.D., M.S. (University of Colorado-Boulder), B.S. (University of Arizona), Associate Professor, Department of Physics, 1992.

Omura, Mafumi, M.A. (University of Iowa), B.A. (Kansai Gaidai University), Instructor, Department of World Languages, Literatures and Cultures, 2016.

Oommen, Thomas, Ph.D. (Tufts University), Visiting Assistant Professor, Department of Communication, 2015.

Orr, Betsy, Ed.D., M.Ed. (University of Arkansas), B.A. (University of Arkansas at Monticello), Associate Professor, Department of Curriculum and Instruction, 1989.

Ortega, Catalina, M.M. (University of Arkansas), B.A. (Pontificia Universidad Javeriana, Colombia), Instructor, Department of Music, 2014.

Osborn, G. Scott, Ph.D. (North Carolina State University), M.S., Ag.E., B.S. (University of Kentucky), Associate Professor, Department of Biological and Agricultural Engineering, 2001.

Osborne, Cara, Sc.D., M.S. (Harvard University), M.S.N. (Vanderbilt University), B.A. (Transylvania University), Assistant Professor, Eleanor Mann School of Nursing, 2018.

Owen, Donna S., M.S., B.S., B.A. (University of Arkansas), Clinical Instructor, Department of Curriculum and Instruction, 2005.

P

Padilla, Yajaira, Ph.D. (University of California, San Diego), B.A. (University of California, Santa Cruz), Associate Professor, Department of English, 2013.

Panayotova, Miroslava Saifur, Ph.D. (University of Arizona), Instructor, Department of Music, 2014.

Panda, Brajendra Nath, Ph.D. (North Dakota St. University), M.S. (Utkal University, India), Professor, Department of Computer Science and Computer Engineering, 2001.

Paradise, Thomas R., Ph.D. (Arizona State University), M.A. (Georgia State University), F.G.A., G.G. (Gemological Institute of America), B.S. (University of Nevada), University Professor, Department of Geosciences, 2000.

Park, Moon, D.M.A. (University of Cincinnati), M.M. (Staatliche Hochschule fur Musik in Freiburg), B.M. (University of Seoul National), Assistant Professor, Department of Music, 2012.

Park, Joong, Ph.D. (University of Oregon), M.A., B.M. (Eastman School of Music), Assistant Professor, Department of Music, 2016.

Park, Kiwoong, Ph.D. (University of Albany), Assistant Professor, Department of Sociology and Criminology, 2019.

Parkerson, Pat, Ph.D., B.S. (University of Arkansas), Associate Professor, Department of Computer Science and Computer Engineering, 1999.

Parnell, Gregory S., Ph.D. (Stanford University), M.S. (University of Southern California), M.E.I.S.E. (University of Florida), B.S. (University of New York at Buffalo), Research Professor, Department of Industrial Engineering, 2013.

Parry, Janine A., Ph.D., M.A. (Washington State University), B.A. (Western Washington University), Professor, Department of Political Science, 1998.

Patitz, Matthew J., Ph.D., M.S., B.S. (Iowa State University), Associate Professor, Department of Computer Science and Computer Engineering, 2012.

Patton, Susan Kane, Ph.D., M.S.N. (University of Arkansas), M.H.S.A. (University of Arkansas at Little Rock), B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, Eleanor Mann School of Nursing, 2010.

Paul, David W., Ph.D. (University of Cincinnati), B.S. (Southwestern University), Associate Professor, Department of Chemistry and Biochemistry, 1980.

Peng, Yarui, Ph.D., M.S. (Georgia Institute of Technology), B.S. (Tsinghua University), Assistant Professor, Department of Computer Science and Computer Engineering, 2017.

Penner-Williams, Janet, Ed.D., M.Ed., B.S.E. (University of Houston), Associate Professor, Department of Curriculum and Instruction, 2005.

Pepitone, Lauren, Ph.D., M.A. (Johns Hopkins University), B.A., Vassar University, Assistant Professor, Department of History, 2016.

Pereira, Andy, Ph.D. (Iowa State University), M.S. (Indian Agricultural Research Institute, India), B.Sc.Ag. (Govind Ballabh Pant University of Agriculture and Technology, India), Professor, Department of Crop, Soil and Environmental Sciences, 2011.

Perry, Kim, M.S. (University of Arkansas), Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2007.

Perryman, Kristi Leann, Ph.D. (University of Arkansas), M.S., B.S. (Southwest Missouri State University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.

Peters, Gary F., Ph.D. (University of Oregon), M.S. (University of Missouri-Columbia), B.S. (Arkansas Tech University), Professor, Department of Accounting, 2003.

Peterson, David, Ph.D. (University of North Carolina), M.S. (Air Force Institute of Technology), B.S. (Iowa State University), Instructor, Program in Operations Management, 2018.

Petretic, Patricia Ann Louise, Ph.D., M.A. (Bowling Green State University), B.A. (Youngstown State University), Associate Professor, Department of Psychological Science, 1990.

Petris, Giovanni, Ph.D., M.S. (Duke University), B.S. (Universita degli Studi di Milano, Italy), Professor, Department of Mathematical Sciences, 1999.

Petrone, Kim, J.D. (Northwestern University), B.A. (Southern Methodist University), Instructor, Department of Accounting, 2012.

Philipp, Dirk, Ph.D. (Texas Tech University), M.S., B.S. (University of Leizig, Germany), Associate Professor, Department of Animal Science, 2007.

Pierce, Michael C., Ph.D., M.A. (The Ohio State University), B.A. (Kenyon College), Associate Professor, Department of History, 2001.

Pierson, Harry A., Ph.D. (The Ohio State University), M.S.E.M., B.S.M.E. (University of Missouri, Rolla), Assistant Professor, Department of Industrial Engineering, 2014.

Pijanowski, John C., Ph.D., M.S. (Cornell University), B.A. (Brown University), Professor, Department of Curriculum and Instruction, 2007.

Pinto, Ines, Ph.D. (Louisiana State University Health Sciences Center), M.S., B.S. (University of Chile), Associate Professor, Department of Biological Sciences, 2000.

Pittman, Harrison Mauzy, LL.M. (University of Arkansas), J.D., B.A. (University of Arkansas at Little Rock), Assistant Professor, 2001.

Place, Alison L., M.F.A (Miami University), Assistant Professor, School of Art, 2017.

Plavcan, Joseph M., Ph.D., B.A. (Duke University), Professor, Department of Anthropology, 2001.

Pohl, Edward A., Ph.D., M.S.R.E. (University of Arizona), M.S.E.M. (University of Dayton), B.S.E.E. (Boston University), Professor, Department of Industrial Engineering, 2004.

Pohl, Letitia, Ph.D. (University of Arkansas), M.S.E. (Air Force Institute of Technology), B.S.M.E. (Tulane University), Clinical Assistant Professor, Department of Industrial Engineering, 2013.

Ross, Jeremy, Ph.D, M.S., B.S. (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 1996.
Rossetti, Manuel D., Ph.D., P.E., M.S.I.S. (The Ohio State University), B.S.I.E. (University of Cincinnati), Professor, Department of Industrial Engineering, 1999.
Rossetti, Amy H., M.S., B.S. (Ohio State University), Instructor, Program in Operations Management, 2013.
Rossiter-Hofer, Adriana, Ph.D. (University of Maryland-College Park), M.S. (Federal University of Rio de Janeiro, Brazil), B.S. (Federal University of Pernambuco, Brazil), Associate Professor, Department of Supply Chain Management, 2008.
Rosteck, Thomas, Ph.D. (University of Wisconsin-Madison), M.A. (Brown University), A.B. (Washington University), Associate Professor, Department of Communication, 1990.
Rowe, Stephen, Ph.D. (University of Illinois), M.S. (Loyola University Chicago), B.A. (Covenant College), Assistant Professor, Department of Accounting, 2016.
Roy, William, M.S. (University of Arkansas), B.S. (University of Memphis), Instructor, Program in Operations Management, 2002.
Rozier, Louise L., D.M.L. (Middlebury College), M.A. (University of Arkansas), B.A. (Licence es Lettres, Université de Besançon, France), Associate Professor, Department of World Languages, Literatures and Cultures, 1991.
Rucker, Kathryn Jill, Ph.D., M.B.A., B.S. (Oklahoma State University), Associate Professor, Department of Agricultural Education, Communications and Technology, 2013.
Ruiz, M. Reina, Ph.D. (Washington University in St. Louis), M.A. (Kansas State University), B.A. (University of Leon, Spain), Associate Professor, Department of World Languages, Literatures and Cultures, 2001.
Rumley, Elizabeth Rebecca, LL.M. (University of Arkansas), J.D. (University of Toledo), B.A. (Michigan State University), Research Assistant Professor, Department of Agricultural Economics and Agribusiness, 2008.
Rumley, Rusty W., J.D. (University of Oklahoma), Research Assistant Professor, Department of Agricultural Economics and Agribusiness, 2009.
Runkle, Benjamin R.K., Ph.D., M.S. (University of California–Berkeley), B.S. (Princeton University), Assistant Professor, Department of Biological and Agricultural Engineering, 2014.
Runkles, Henry S., M.M. (University of Arkansas), Lecturer, Department of Music, 2002.
Rupe, John C., Ph.D., M.S. (University of Kentucky), B.S. (Colorado State University), Professor, Department of Entomology and Plant Pathology, 1984.
Russell, Mark, Ed.D. (Texas Tech University), M.S., B.S. (Colorado State University), Assistant Professor, Department of Animal Science, 2010.
Ryan, Jeffrey J., Ph.D., M.A. (Rice University), B.A. (Colorado State University), Associate Professor, Department of Political Science, 1990.
Ryan, John, Ph.D. (University of York), M.Sc. (University of Warwick), B.A. (University of York, Britain), Professor, Department of Mathematical Sciences, 1990.
S
Sabatini, Lindsey Rachel, D.N.P., M.S., B.S.N., B.S. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2012.
Sahberwal, Rajiv, Ph.D. (University of Pittsburgh), P.G.D.M. (Indian Institute of Management), B.S.E.E. (Regional Engineering College, India), Distinguished Professor, Department of Information Systems, 2011.
Sabo, George, Ph.D., M.A., B.S. (Michigan State University), Professor, Department of Anthropology, 1980.
Sabon, Lauren, Ph.D. (University of Tennessee-Knoxville), M.S.M.A. (Marshall University), B.S., B.A. (West Virginia University), Clinical Assistant Professor, Department of Sociology and Criminology, 2014.

Sadaka, Sammy, Ph.D. (Dalhousie University, Canada, and Alexandria University, Egypt), M.S., B.S. (Alexandria University, Egypt), Associate Professor, Department of Biological and Agricultural Engineering, 2007.

Saeidi, Shirin, Ph.D. (University of Cambridge, United Kingdom), M.A. (George Mason University), B.A. (University of Maryland-College Park), Assistant Professor, Department of Political Science, 2018.

Sakon, Joshua, Ph.D. (University of Wisconsin-Madison), B.S. (Southern Oregon University), Professor, Department of Chemistry and Biochemistry, 1997.

Salamo, Gregory J., Ph.D. (City University of New York), M.S. (Indiana University-Purdue University-Indianapolis), B.S. (City University of New York, Brooklyn College), Distinguished Professor, Department of Physics, 1975.

Salonen, Rick, Ed.D., M.M. (University of Arkansas), B.M. (Central Michigan University), Instructor, Department of Music, 2008.

Salter, Kandy S.L., O.T.H. (University of Kansas), M.S. (University of Central Arkansas), Clinical Assistant Professor, Department of Occupational Therapy, 2018.

Saunders, Robert F., M.S.E.E., M.S. (University of Arkansas), Instructor, Department of Electrical Engineering, 2012.

Savin, Mary Cathleen, Ph.D., M.S. (University of Notre Dame), Professor, Department of Crop, Soil and Environmental Sciences, 2002.

Saxena, Ashok, Ph.D., M.S. (University of Cincinnati), B.S.M.E. (Indiana Institute of Technology), Distinguished Professor, Department of Mechanical Engineering, 2003.

Schafer-Whitby, Peggy, Ph.D. (University of Central Florida), M.A. (University of Houston-Clear Lake), B.A. (St. Cloud State University), Associate Professor, Department of Curriculum and Instruction, 2012.

Scheide, Frank Milo, Ph.D. (University of Wisconsin-Madison), M.A. (New York University), B.S. (University of Wisconsin-River Falls), Professor, Department of Communication, 1977.

Schneider, Susan, L.L.M. (University of Arkansas), J.D. (University of Minnesota-Twin Cities), B.A. (College of Saint Catherine), Professor, School of Law, 1998.

Schott, Elizabeth W., Ph.D., M.S. (New Mexico State University), M.S.I.E. (Georgia Institute of Technology), Instructor, Program in Operations Management, 2017.

Schreckhise, William D., Ph.D., M.A., B.A. (Washington State University), Associate Professor, Department of Political Science, 1998.

Schulte, Stephanie Ricker, Ph.D., M.A. (George Washington University), B.A. (University of Arkansas), Associate Professor, Department of Communication, 2008.

Schulte, Brett J., M.F.A. (George Mason University), B.A. (University of Nebraska-Lincoln), Associate Professor, School of Journalism and Strategic Media, 2008.

Schwab, Bill, Ph.D., M.A. (The Ohio State University), M.A. (University of Akron), B.A. (Miami University), University Professor, Department of Sociology and Criminology, 1976.

Scott, Allison L., D.N.P. (University of Missouri-Kansas City), M.S.N., B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, Eleanor Mann School of Nursing, 2006.

Scott, Robert C., Ph.D. (Mississippi State University), M.S., B.S. (Oklahoma State University), Professor, Department of Crop, Soil and Environmental Sciences, 2002.

Scott, Adrianne R., M.S.W. (University of Texas, Arlington), B.A. (University of Arkansas), Lecturer, School of Social Work, 2014.

Scott, Marc, Ph.D. (North Dakota State University), M.S., B.S. (South Carolina State University), Clinical Assistant Professor, Department of Supply Chain Management, 2016.

Sebold, Karen Denice, Ph.D., M.A. (University of Arkansas), B.S. (Campbell College), B.S. (Rogers State University), Clinical Assistant Professor, Department of Political Science, 2011.

Selvam, R. Panneer, Ph.D. (Texas Tech University), M.S.C.E. (South Dakota School of Mines and Technology), M.E., B.E. (University of Madras, India), University Professor, Department of Civil Engineering, 1986.

Senor, Thomas D., Ph.D., M.A. (University of Arizona), B.S. (University of Oregon), Professor, Department of Philosophy, 1989.

Seo, Han-Seok, Dr.rer.Medic. (Technische Universität Dresden, Germany), Ph.D., M.Sc. (Seoul National University), B.S. (Korea University, Seoul), Associate Professor, Department of Food Science, 2012.

Serrano, Christina, Ph.D. (University of Georgia), B.B.A. (Armstrong Atlantic State University), Assistant Professor, Department of Information Systems, 2011.

Servoss, Shannon, Ph.D. (Northwestern University), B.S.Ch.E. (University of Michigan-Ann Arbor), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 2007.

Setia, Pankaj, Ph.D. (Michigan State University), M.B.A. (Management Development Institute), B.S. (University of Delhi, India), Associate Professor, Department of Information Systems, 2008.

 Sexton, Kim, Ph.D., M.A., M.Phil. (Yale University), B.A. (State University of New York at Binghampton), Associate Professor, Department of Architecture, 1999.

Sha, Xueyan, Ph.D. (Louisiana State University), Professor, Department of Crop, Soil and Environmental Sciences, 2012.

Sha, Zhenghui, Ph.D. (Purdue University), M.S.M.E. (Xi’an Jiaotong University), B.S.M.E. (Xi’an University of Technology), Assistant Professor, Department of Mechanical Engineering, 2017.

Shakiba, Ehsan, Ph.D., M.S. (University of Arkansas), M.S., B.S. (Azad University, Iran), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2015.

Shanks, Bruce C., Ph.D. (South Dakota State University), M.S. (Montana State University), B.S. (Missouri State University), Adjunct Assistant Professor, Department of Animal Science, 2011.

Sharman, Glenn R., Ph.D. (Stanford University), B.S. (Wheaton College), Assistant Professor, Department of Geosciences, 2017.

Sharpley, Andrew N., Ph.D. (Massey University, New Zealand), B.S. (University College of North Wales), Distinguished Professor, Department of Crop, Soil and Environmental Sciences, 2006.

Shaw, John B., Ph.D. (University of Texas at Austin), B.A. (Oberlin College), Assistant Professor, Department of Geosciences, 2014.

Shelton, Leslie Jo, Ph.D. (Michigan State University), M.Ed., B.A. (Ohio University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.

Shew, Woodrow L., Ph.D. (University of Maryland-College Park), B.A. (College of Wooster), Associate Professor, Department of Physics, 2012.

Shi, Wei, Ph.D. (University of Alberta), M.S. (East China University of Science and Technology), B.S. (Shanghai Jiao Tong University), Assistant Professor, Department of Chemistry and Biochemistry, 2012.

Shi, Xuan, Ph.D. (West Virginia University), M.S. (Indiana University of Pennsylvania), B.S. (Hubei University), Assistant Professor, Department of Geosciences, 2012.

Shi, Ainong, Ph.D. (North Carolina State University), M.S. (Graduate School of Chinese Academy of Agricultural Sciences), B.S. (Zhejiang University), Assistant Professor, Department of Horticulture, 2013.
Shields, Christopher A., Ph.D., J.D. (University of Arkansas), M.A., B.A. (Arkansas State University), Clinical Assistant Professor, Department of Sociology and Criminology, 2003.

Shields, Todd G., Ph.D., M.A. (University of Kentucky), B.A. (Miami University), Professor, Department of Political Science, 1994.

Shipman, Jonathan, Ph.D. (University of Tennessee), B.S. (University of Central Arkansas), Associate Professor, Department of Accounting, 2015.

Shobe, Marcia A., Ph.D. (University of Kansas), M.S.W. (University of Hawaii at Manoa), B.A. (State University of New York at Plattsburgh), Professor, School of Social Work, 2007.

Shook, Carole, M.S.B.A., B.S.B.A. (University of Arkansas), Instructor, Department of Supply Chain Management, 1999.

Shoulders, Kate, Ph.D. (University of Florida), M.S., M.A. (Murray State University), Associate Professor, Department of Agricultural Education, Communications and Technology, 2012.

Shreve, Marilou D., D.N.P., M.S.N. (University of Missouri-Kansas City), B.S.N. (University of Arkansas), Assistant Professor, Eleanor Mann School of Nursing, 2013.

Shuler, Kimberly M., M.S.W. (University of Arkansas at Little Rock), B.S.W. (University of Arkansas), Instructor, School of Social Work, 2015.

Siebenmorgen, Terrence J., Ph.D. (University of Nebraska-Lincoln), M.S.Ag.E. (Purdue University), B.S.Ag.E. (University of Arkansas), Distinguished Professor, Department of Food Science, 1984.

Siepielski, Adam M., Ph.D. (University of Wyoming-Laramie), M.S. (New Mexico State University), B.S. (Pennsylvania State University-University Park), Assistant Professor, Department of Biological Sciences, 2015.

Singh, Surendra P., Ph.D., M.A. (University of Rochester), M.Sc., B.Sc. (Banaras Hindu University, India), University Professor, Department of Physics, 1982.

Sirmans, Corbitt Stace, Ph.D., B.S. (Florida State University), Assistant Professor, Department of Finance, 2014.

Sites, Joanna, M.S.W., B.A. (University of Arkansas), Lecturer, School of Social Work, 2016.

Skinner, Jerral V., Ph.D. (University of Arkansas), Lecturer, Department of Crop, Soil and Environmental Sciences, 1990.

Slaton, Nathan A., Ph.D., M.S. (University of Arkansas), B.S. (Murray State University), Professor, Department of Crop, Soil and Environmental Sciences, 2001.

Slattery, Patrick Joseph, Ph.D. (Indiana University at Bloomington), A.B. (College of the Holy Cross), Associate Professor, Department of English, 1991.

Sloan, Kathryn Ann, Ph.D., M.A., M.B.A. (University of Kansas), B.A. (Kansas State University), Professor, Department of History, 2004.

Sline, Ryan B., B.F.A (University of Arkansas), Instructor, School of Art, 2001.

Smith, Kathy, Ed.D., M.S. (University of Arkansas), B.S. (The Ohio State University), Clinical Associate Professor, School of Human Environmental Sciences, 1999.

Smith, Brent Lamar, Ph.D., M.S. (Purdue University), B.A. (Ouachita Baptist University), Distinguished Professor, Department of Sociology and Criminology, 2003.

Smith, Ronn J., Ph.D. (Washington State University), M.S., B.S. (Montana State University), Associate Professor, Department of Marketing, 2006.

Smith, Carl Alan, Ph.D., M.A. (University of Sheffield), B.Sc. (University of Lancaster), Associate Professor, Department of Landscape Architecture, 2008.

Smith, Joshua Byron, Ph.D., M.A. (Northwestern University), B.A. (University of Illinois at Chicago), Assistant Professor, Department of English, 2011.

Smith, Annie B., LL.M. (George Washington University), J.D. (University of Wisconsin-Madison), Associate Professor, School of Law, 2012.

Smith, Tom E.C., Ed.D. (Texas Tech University), M.Ed., B.S.E. (University of Mississippi), University Professor, Department of Curriculum and Instruction, 2002.

Smith, Scott, M.S. (University of Arkansas), M.S. (Air Force Institute of Technology), B.S. (United States Air Force Academy), Instructor, Program in Operations Management, 2006.

Smith, Christopher, Ph.D. (University of Virginia), M.S. (University of Missouri-Rolla), M.S. (University of Texas at Austin), B.S. (U.S. Military Academy), Instructor, Program in Operations Management, 2015.

Smith-Nix, Angela, Ph.D. (University of Arkansas), M.Ed., B.S.E. (Arkansas State University), Clinical Assistant Professor, Department of Health, Human Performance and Recreation, 1989.

Snyder, Gerry, M.A. (New York University), B.F.A. (University of Oregon), Distinguished Professor, School of Art, 2019.

Sodero, Annibal Camara, Ph.D. (Arizona State University), M.S.C. (Warkwick University), B.S.C. (UFMG-Brazil), Assistant Professor, Department of Supply Chain Management, 2013.

Song, Geoboo, Ph.D. (University of Oklahoma), B.A. (Korea University), B.A. (Hanyang University), Assistant Professor, Department of Political Science, 2012.

Sonnenberg, Anthony, M.F.A, M.A (University of Washington), B.F.A (University of Texas at Austin), Assistant Professor, 2009.

Southward, Cheryl Leigh, Ph.D., M.S., B.S. (University of Tennessee), Associate Professor, School of Human Environmental Sciences, 2008.

Soysal, Gonca, Ph.D. (Northwestern University), M.S. (Northwestern University), M.E. (University of Florida), B.S. (Middle East Technical University), Assistant Professor, Department of Marketing, 2017.

Sparks, Leigh Pryor, Ph.D. (University of Arkansas), M.A., B.A. (Stanford University), Instructor, Department of English, 2009.

Spears, Kari R., M.S.W., B.A. (University of Arkansas), Lecturer, School of Social Work, 2016.

Specking, Eric A., M.S.I.E., B.S. (University of Arkansas), Lecturer, Program in Operations Management, 2014.

Spialek, Matthew L., Ph.D. (University of Missouri), Assistant Professor, Department of Communication, 2017.

Spicer, Tom O., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Professor, Ralph E. Martin Department of Chemical Engineering, 1981.

Spiegel, Frederick W., Ph.D. (University of North Carolina at Chapel Hill), B.A. (Drew University), Distinguished Professor, Department of Biological Sciences, 1982.

Spießhoefer, Silke, Ph.D., M.S.E.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, Department of Electrical Engineering, 2014.

Spradley, J. Ples, M.S. (University of Arkansas), B.S. (Hendrix College), Extension Associate Professor, Department of Entomology and Plant Pathology, 1984.

Springer, Bethany Lynn, M.F.A. (University of Georgia), B.A. (Virginia Polytechnic Institute and State University), Associate Professor, School of Art, 2006.

Spurlock, Terry, Ph.D. (University of Arkansas), Extension Assistant Professor, Department of Entomology and Plant Pathology, 2015.

Srivastava, Vibha, Ph.D. (Jawaharlal Nehru University, New Delhi), M.S. (Govind Ballabh Pant University of Agriculture and Technology), B.S. (D.E.I. University), Professor, Department of Crop, Soil and Environmental Sciences, 2001.

Stahle, David William, Ph.D. (Arizona State University), M.A. (University of Arkansas), Distinguished Professor, Department of Geosciences, 1982.

Stapp, Robert Bruce, Ph.D., M.S. (Oklahoma State University), B.S.B.A. (Oklahoma City University), Clinical Professor, Department of Economics, 1995.
Starks, Trish, Ph.D., M.A. (The Ohio State University), B.A. (University of Missouri), Professor, Department of History, 2000.

Starling-Ledbetter, Robyn M., M.A., B.A. (University of Arkansas), Instructor, School of Journalism and Strategic Media, 2007.

Stassen, Robert E., Ph.D., M.B.A. (University of Nebraska-Lincoln), B.S. (University of Minnesota), Associate Professor, Department of Marketing, 1989.

Stauss, Kim, Ph.D. (University of Utah), M.S.W. (California State University at Sacramento), B.S. (Stephen F. Austin State University), Associate Professor, School of Social Work, 2006.

Steinkraus, Donald C., Ph.D. (Cornell University), M.S. (University of Connecticut), B.A. (Cornell University), Professor, Department of Entomology and Plant Pathology, 1989.

Steinmetz, Joseph E., Ph.D. (Ohio University), M.A., B.S. (Central Michigan University), Distinguished Professor of Psychological and Brain Science, Department of Psychological Science, 2016.

Stenken, Julie A., Ph.D. (University of Kansas), B.S. (University of Akron), Professor, Department of Chemistry and Biochemistry, 2007.

Stephen, Fred M., Ph.D. (University of California-Berkeley), B.S. (San Jose State University), University Professor, Department of Entomology and Plant Pathology, 1974.

Stephens, Dorothy Anne, Ph.D. (University of California-Berkeley), M.A. (University of Illinois-Chicago), B.A. (Northwestern University), Professor, Department of English, 1992.

Stephenson, Steven Lee, Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Lynchburg College), Research Professor, Department of Biological Sciences, 2003.

Sterling, Brett E., Ph.D., M.A. (Vanderbilt University), B.A. (University of Arkansas), Assistant Professor, Department of World Languages, Literatures and Cultures, 2013.

Stevens, Christopher W., Ph.D. (University of Maryland College Park), M.A. (City University of New York-The Graduate Center), B.A. (Humboldt State University), Instructor, Department of Philosophy, 2015.

Stewart, Patrick A., Ph.D., (Northern Illinois University), M.A., B.A. (University of Central Florida), Associate Professor, Department of Political Science, 2008.

Stewart, Angela, D.N.P. (University of Arkansas), M.N.Sc., B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, Eleanor Mann School of Nursing, 2015.

Stites, Wesley, Ph.D. (Massachusetts Institute of Technology), M.A., B.A. (Johns Hopkins University), Professor, Department of Chemistry and Biochemistry, 1991.

Stokowski, Sarah, Ph.D. (University of Tennessee), M.Ed. (University of Oklahoma), B.S.E. (University of Kansas), Assistant Professor, Department of Health, Human Performance and Recreation, 2014.

Stoner, Wesley, Ph.D., M.A. (University of Kentucky), B.A. (Pennsylvania State University), Assistant Professor, Department of Anthropology, 2014.

Striegler, Susanne, Ph.D., M.S., B.S. (Ulm University, Germany), Professor, Department of Chemistry and Biochemistry, 2012.

Studebaker, Glenn, Ph.D., M.S. (University of Arkansas), B.S. (Missouri Southern State University), Associate Professor, Department of Entomology and Plant Pathology, 1993.

Su, Danjie, Ph.D. (University of California, Los Angeles), M.A., B.A. (Sun Yat-sen University, China), Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.

Suarez, Celina A., Ph.D. (University of Kansas), M.S. (Temple University), B.S. (Trinity University), Associate Professor, Department of Geosciences, 2012.

Sui, Daniel, Ph.D. (University of Georgia), M.S., B.S. (Peking University), Distinguished Professor, Department of Geosciences, 2018.

Sullivan, Amanda Lynn, Ph.D., M.A.T., B.S.E. (University of Arkansas), Clinical Associate Professor, Department of Health, Human Performance and Recreation, 2010.

Sullivan, Kelly M., Ph.D. (University of Florida), M.S.I.E., B.S.I.E. (University of Arkansas), Assistant Professor, Department of Industrial Engineering, 2012.

Sun, Xiaolun, Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Southern China Agricultural University), Assistant Professor, Department of Poultry Science, 2016.

Sutherland, Daniel E., Ph.D., M.A., B.A. (Wayne State University), Distinguished Professor, Department of History, 1989.

Sutton, James M., M.S. (Southern Methodist University), B.S. (University of West Florida), B.M. (University of Southern Mississippi), Instructor, Program in Operations Management, 2017.

Swedenburg, Ted R., Ph.D., M.A., (University of Texas at Austin), B.A. (University of Beirut), Professor, Department of Anthropology, 1996.

Sykes, Tracy Ann, Ph.D. (University of Arkansas), B.S. (University of Maryland-College Park), Associate Professor, Department of Information Systems, 2011.

Syler, Rhonda A., Ph.D. (Auburn University), M.B.A. (Columbus State University), M.S. (Kansas State University), B.S. (Middle Tennessee State University), Clinical Assistant Professor, Department of Information Systems, 2016.

Sysma, Janine A., Ph.D. (University of Wisconsin-Madison), M.A. (University of Denver), B.A. (Arizona State University), Assistant Professor, School of Art, 2016.

Szalanski, Allen Lawrence, Ph.D. (University of Nebraska-Lincoln), M.S. (Kansas State University), B.S. (University of Minnesota), Professor, Department of Entomology and Plant Pathology, 2001.

Szwydky-Davis, Lissette López, Ph.D., M.A. (Penn State University), B.A. (University of Miami), Assistant Professor, Department of English, 2013.

T

Talafuse, Thomas, Ph.D. (University of Arkansas), M.S. (Air Force Institute of Technology), B.S. (United States Air Force Academy), Instructor, Program in Operations Management, 2018.

Taoka, Loring, M.F.A (University of North Texas), Instructor, School of Art, 2012.

Tarvin, Tim, J.D. (University of Arkansas), B.A. (Hendrix College), Associate Professor, School of Law, 1993.

Taylor, Jennifer, Ph.D. (University of Missouri-Kansas City), M.A. (University of Northern Iowa), B.A. (University of Kentucky), Research Professor, Department of Marketing, 2014.

Teague, Rick, M.S. (Webster University), B.B.A. (University of Memphis), Instructor, Program in Operations Management, 2001.

Teal, Kimberly Hannon, Ph.D., M.M. (Eastman School of Music), B.A. (University of Oregon), Assistant Professor, Department of Music, 2016.

Tellez-Isaias, Guillermo, Ph.D. (Texas A&M University), Visiting Professor, Department of Poultry Science, 2002.

Ten Haaf, Rachel E., Ph.D. (University of Michigan), M.A. (University of Illinois, Urbana-Champaign), Assistant Professor, Department of World Languages, Literatures and Cultures, 2016.

Terhune, Claire E., Ph.D., M.A. (Arizona State University), B.A., B.S. (College of Charleston), Assistant Professor, Department of Anthropology, 2013.

Terrell, Katie, M.B.A. (University of Arkansas), B.A. (University of Central Arkansas), Instructor, Department of Accounting, 2012.

Teuton, Sean Kicummah, Ph.D., M.A. (Cornell University), B.A. (University of Colorado-Boulder), Professor, Department of English, 2013.

Thallapuram, Suresh, Ph.D. (Osmania University), Professor, Department of Chemistry and Biochemistry, 2003.
Thibado, Paul M., Ph.D. (University of Pennsylvania), B.S. (San Diego State University), Professor, Department of Physics, 1996.

Thoma, Greg, Ph.D. (Louisiana State University), M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Professor, Ralph E. Martin Department of Chemical Engineering, 1993.

Thomas, JaLynn D., B.S. (Louisiana Tech College Ruston Campus), Instructor, Department of Accounting, 2011.

Thomas, Shaun A., Ph.D., M.A. (Louisiana State University), B.A. (University of Akron), Associate Professor, Department of Sociology and Criminology, 2015.

Thomas, Johanna, Ph.D., M.S.W. (Louisiana State University), B.A. (University of Akron), Assistant Professor, School of Social Work, 2015.

Thomas, Rodney W., Ph.D., M.B.A. (University of Tennessee), B.S.B.A. (Greensboro College), Associate Professor, Department of Supply Chain Management, 2017.

Thompson, Timothy F., D.M.A., M.M. (University of Wisconsin-Madison), Professor, Department of Music, 1979.

Thompson, Dale R., Ph.D. (North Carolina State University), M.S., B.S. (Mississippi State University), Associate Professor, Department of Computer Science and Computer Engineering, 2000.

Thompson, Randy, J.D. (University of Illinois-Urbana-Champaign), M.L.S., B.A. (Indiana University), Associate Professor, School of Law, 2008.

Thompson, Audie K., Ph.D (University of Mississippi Medical Center), Assistant Professor, Ralph E. Martin Department of Chemical Engineering, 2018.

Thomsen, Michael R., Ph.D. (University of Minnesota-Morris), M.S., B.S. (Utah State University), Professor, Department of Agricultural Economics and Agribusiness, 1998.

Thrash, Ben, Assistant Professor, Department of Entomology and Plant Pathology, 2018.

Tian, Ryan, Ph.D. (University of Connecticut), B.S. (Fudan University, Shanghai), Associate Professor, Department of Chemistry and Biochemistry, 2004.

Tipsmark, Christian K., Ph.D., M.S. (University of Southern Denmark), Associate Professor, Department of Biological Sciences, 2010.

Tjani, Maria, Ph.D. (Michigan State University), M.S. (Purdue University), B.S. (University of Ioannina, Greece), Associate Professor, Department of Mathematical Sciences, 2003.

Tonynon, Susan, M.S.W. (University of Arkansas at Little Rock), B.S.W. (Arkansas State University), Instructor, School of Social Work, 2014.

Traywick, La Vona, Ph.D. (University of Kentucky), Associate Professor, School of Human Environmental Sciences, 2007.

Trivitt, Julie R., Ph.D., M.A. (University of Arkansas), M.A. (Southwest Missouri State University), Clinical Associate Professor, Department of Education Reform, 2012.

Trudo, Sabrina P., Ph.D. (University of Washington), B.S. (Brigham Young University), Associate Professor, School of Human Environmental Sciences, 2015.

Tullis, Jason A., Ph.D., M.S. (University of South Carolina at Columbia), B.S. (Brigham Young University), Professor, Department of Geosciences, 2004.

Tung, Steve, Ph.D., M.S.M.E. (University of Houston), B.S.M.E. (National Taiwan University), Professor, Department of Mechanical Engineering, 2000.

Turner, Ronna L., Ph.D. (University of Illinois-Urbana-Champaign), M.S.E. (Missouri State University), B.S.E. (Southwest Missouri State University), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1997.

Turner, Aaron, M.F.A (Rutgers State University), B.A (University of Memphis), Research Associate, School of Art, 2016.

Tzanetakis, Ioannis E., Ph.D. (Oregon State University), M.S., B.S. (Agricultural University of Athens, Greece), Professor, Department of Entomology and Plant Pathology, 2008.

U

Ungar, Peter S., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (State University of New York, Binghamton), Distinguished Professor, Department of Anthropology, 1995.

Urbe, Lia, D.M.A. (University of Kansas), M.M. (University of Arkansas), B.M. (Universidad Nacional de Colombia, Bogotá), Assistant Professor, Department of Music, 2013.

V

Vajda, Anthony J., Ph.D. (Old Dominion University), M.S. (La Salle University), B.A. (University of Delaware), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2018.

Valandra, Ph.D., M.S.W. (University of Minnesota), M.B.A., B.S. (University of Nebraska at Omaha), Assistant Professor, School of Social Work, 2013.

Van Hoek, Remko, Ph.D. (University of Ultrecht), M.B.A.(London School of Economics), B.S.B.A. (Vanderbilt University), Clinical Professor, Department of Supply Chain Management, 2018.

Van Horn-Morris, Jeremy, Ph.D. (University of Texas at Austin), B.S. (University of Oregon), Associate Professor, Department of Mathematical Sciences, 2012.

Van Winkle, Holly M., M.S.N., B.S. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2013.

Vanderventer, Kari, Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Professor, Department of Biological and Agricultural Engineering, 1995.

Veilleux, Jennifer Celene, Ph.D., M.A. (University of Illinois at Chicago), B.A. (Macalaster College), Associate Professor, Department of Psychological Science, 2011.

Velliquette, Anne M., Ph.D. (University of Arkansas), M.A.B., B.S. (Southwest Missouri State University), Clinical Assistant Professor, Department of Marketing, 2014.

Venkatesh, Viswanath, Ph.D. (University of Minnesota-Twin Cities), B.E. (Bharathiar University, India), Distinguished Professor, Department of Information Systems, 2004.

Vennarucci, Rhodora, Ph.D., M.A. (University at Buffalo, New York), B.A. (University of Michigan), Assistant Professor, Department of World Languages, Literatures and Cultures, 2013.

Verma, Lalit R., Ph.D. (University of Montana), B. Tech. (J.N. Agricultural University, Jabalpur, India), Professor, Department of Biological and Agricultural Engineering, 2000.

Viennot, Gilles André Fernand, Ph.D. (University of Kansas), M.A. (University of Paris VII Jussieu), M.A. (University of Besançon), Assistant Professor, Department of World Languages, Literatures and Cultures, 2015.

Villanova, Daniel, Ph.D. (Virginia Tech University), B.S.B.A. (Appalachian State University), Assistant Professor, Department of Marketing, 2018.

Vining, Benjamin R., Ph.D., M.A. (Boston University), B.A. Colgate University, Assistant Professor, Department of Anthropology, 2016.

Viswanathan, Padma, M.F.A. (University of Arizona), M.A. (Johns Hopkins University), B.A. (University of Alberta), Associate Professor, Department of English, 2010.
Vyas, Reeta, Ph.D. (State University of New York at Buffalo), M.S., B.S. (Banaras Hindu University), Professor, Department of Physics, 1984.

Wade, Les, Ph.D. (University of California-Santa Barbara), M.F.A. (University of Georgia), M.A. (Duke University), B.A. (Tulane University), Professor, Department of Theatre, 2011.

Wai, Jonathan, Ph.D., M.S. (Vanderbilt University), M.A. (Claremont Graduate University), B.A. (Claremont McKenna College), Assistant Professor, Department of Education Reform, 2018.

Walch, John S., M.F.A. (University of Texas at Austin), B.A. (Colorado College), Assistant Professor, Department of Theatre, 2016.

Walker, Heather L., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, Ralph E. Martin Department of Chemical Engineering, 2008.

Walker, James M., Ph.D. (University of Colorado-Boulder), M.S., B.S. (Louisiana Polytechnic Institute), Professor, Department of Biological Sciences, 1965.

Wall, William A., Dr. (University of Florida), M.A. (University of Texas, Austin), Alumni Distinguished Professor, Department of History, 1990.

Walsh, Lora, Ph.D. (Northwestern University), M.Sc. (University of Edinburgh), B.A. (Pepperdine University), Visiting Assistant Professor, 2014.

Wamishe, Yeshe Andenow, Ph.D. (University of Arkansas) M.S., B.S. (Addis Ababa University, Ethiopia), Associate Professor, Department of Entomology and Plant Pathology, 2011.

Wang, Feng, Ph.D. (University of Pittsburgh), Ph.D. (Kutztown University of Pennsylvania), Associate Professor, Department of Chemistry and Biochemistry, 2012.

Wang, Ya-Jane, Ph.D. (Iowa State University), M.S. (University of Minnesota-Twin Cities), B.S. (National Taiwan University), Professor, Department of Food Science, 1999.

Wang, Yong, Ph.D., M.S. (University of California, Los Angeles), Assistant Professor, Department of Physics, 2015.

Warren, W. Dale, M.M. (University of Kentucky), B.S. (Austin Peay State University), Professor, Department of Music, 1991.

Warren, Ron, Ph.D. (Indiana University), M.A. (Colorado State University), B.A. (Michigan State University), Associate Professor, Department of Communication, 1997.

Washington, Tyrone A., Ph.D., B.S. (University of South Carolina at Columbia), Associate Professor, Department of Health, Human Performance and Recreation, 2011.

Watkins, Kenton Bradley, Ph.D. (Oklahoma State University), M.S., B.A. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 2002.

Watkins, Patsy, Ph.D. (University of Iowa), M.A., B.A. (University of Texas, Austin), Associate Professor, School of Journalism and Strategic Media, 1983.

Way, Kelly Ann, Ph.D., M.S., B.S. (Oklahoma State University), Associate Professor, School of Human Environmental Sciences, 2006.

Weatherby, Danielle, J.D. (University of Florida), B.A. (Franklin and Marshall College), Associate Professor, School of Law, 2013.

Webb, Jennifer D., Ph.D. (Oklahoma State University), M.S., B.S. (University of Tennessee), Associate Professor, Department of Interior Design, 1999.

Wejinya, Uchechukwu C., Ph.D., M.S., B.S. (Michigan State University), Associate Professor, Department of Mechanical Engineering, 2008.

Wells, Michael, M.S. (Florida State University), B.S. (East Stroudsburg University), Instructor, Program in Operations Management, 2011.

Wells, Rob, Ph.D. (University of Maryland), M.A. (St. John's College), Assistant Professor, School of Journalism and Strategic Media, 2016.

West, Elliott, Ph.D., M.A. (University of Colorado-Boulder), B.A. (University of Texas, Austin), Alumni Distinguished Professor, Department of History, 1979.

Westerman, Erica L., Ph.D. (Yale University), M.Sc. (University of New Hampshire), B.S. (Yale University), Assistant Professor, Department of Biological Sciences, 2016.

Whayne, Jeannie, Ph.D., M.A., B.A. (University of California-San Diego), University Professor, Department of History, 1990.

White, John A., Ph.D. (The Ohio State University), M.S.I.E. (Virginia Polytechnic Institute and State University), B.S.I.E. (University of Arkansas), Distinguished Professor, Department of Industrial Engineering, 1997.

White, Calvin, Ph.D. (University of Central Arkansas), Associate Professor, Department of History, 2007.

Wickramasinghe, Ranil, Ph.D. (University of Minnesota-Twin Cities), M.S., B.S. (University of Melbourne, Australia), Professor, Ralph E. Martin Department of Chemical Engineering, 2011.

Wicks, Robert Howard, Ph.D. (Michigan State University), M.A. (University of Missouri-Columbia), B.A. (American University), Professor, Department of Communication, 1994.

Wicks, Jan L., Ph.D., M.A. (Michigan State University), B.A. (University of Illinois at Urbana-Champaign), Professor, School of Journalism and Strategic Media, 1994.

Wideman, Robert F., Ph.D. (University of Connecticut), B.A. (University of Delaware), Professor, Department of Poultry Science, 1993.

Wiedenmann, Robert N., Ph.D., B.S. (Purdue University), Professor, Department of Entomology and Plant Pathology, 2005.

Wilke, Stephen, J.D., M.P.A. (University of Memphis), Instructor, Program in Operations Management, 1996.

Wilkinson, Weston, M.F.A. (University of Tennessee), B.A. (Texas A&M University), Assistant Professor, Department of Theatre, 2014.

Wilkins, Charles L., Ph.D. (University of Oregon), B.S. (Chapman College), Distinguished Professor, Department of Chemistry and Biochemistry, 1998.

Willett, Cammy, Ph.D., M.S. (University of Missouri), B.S. (Evangel University), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2016.

Williams, Stacy Goad, Ph.D., M.S.C.E., B.S.C.E. (University of Arkansas), Associate Professor, Department of Civil Engineering, 1997.

Williams, Rodney D., Ph.D., M.S., B.S.C.E. (University of Arkansas), Assistant Professor, Department of Civil Engineering, 1998.

Williams, Patrick George, Ph.D., M.A. (Columbia University), B.A. (University of Texas at Austin), Professor, Department of History, 1998.
Williams, Brent Thomas, Ph.D. (University of Illinois, Urbana-Champaign), M.S. (University of Texas Southwestern Medical School), B.A. (Austin College), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2002.

Williams, Brent D., Ph.D., M.S. (University of Arkansas), B.A. (Lyon College), Associate Professor, Department of Supply Chain Management, 2011.

Williams, Darron, Ph.D. (Northcentral University), M.S., M.B.A., B.S. (University of Memphis), Instructor, Program in Operations Management, 2015.

Williams, Donnie F., Ph.D. (Georgia Southern University), Clinical Assistant Professor, Department of Supply Chain Management, 2019.

Willson, John David, Ph.D. (University of Georgia), B.S. (Davidson College), Associate Professor, Department of Biological Sciences, 2012.

Wilson, Charles E., Ph.D., M.S. (University of Arkansas), B.S. (Arkansas State University), Professor, Department of Crop, Soil and Environmental Sciences, 2011.

Wise, Rick, Ph.D., M.S. (Southern Methodist University), B.S. (University of Arkansas), Research Professor, Department of Physics, 2014.

Wissehr, Cathy, Ed.D. (University of Missouri-Columbia), M.N.S.Ed., B.S. (Southeast Missouri State University), Clinical Associate Professor, Department of Curriculum and Instruction, 2009.

Wolchok, Jeffrey Collins, Ph.D. (University of Utah), M.S., B.S. (University of California at Davis), Associate Professor, Department of Biomedical Engineering, 2011.

Wolf, Patrick J., Ph.D., M.A. (Harvard University), B.A. (University of Saint Thomas), Distinguished Professor, Department of Education Reform, 2006.

Wood, Lisa S., Ph.D., M.S., B.S. (University of Arkansas), Clinical Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2012.

Wood, Clinton M., Ph.D. (University of Texas at Austin), M.S.C.E., B.S.C.E. (University of Arkansas), Assistant Professor, Department of Civil Engineering, 2013.

Woodland, Janet C., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (King's College), Clinical Assistant Professor, Department of Mathematical Sciences, 1993.

Woods, Randall B., Ph.D., M.A., B.A. (University of Texas at Austin), Distinguished Professor, Department of History, 1971.

Woods, Jordan Blair, Ph.D., M.Phil (University of Cambridge), J.D. (University of California, Los Angeles), Assistant Professor, School of Law, 2016.

Worden, Steven K., Ph.D. (University of Texas at Austin), M.A., B.A. (Portland State University), Associate Professor, Department of Sociology and Criminology, 1986.

Worrell, Dan, Ph.D., M.S., B.S. (Louisiana State University), Professor, Department of Management, 2005.

Worthington, Margaret L., Ph.D. (North Carolina State University), M.S. (University of California–Davis), B.S. (Duke University), Assistant Professor, Department of Horticulture, 2016.

Wright, Nia, M.B.A. (Tulane University), B.S. (University of Arkansas), Instructor, Program in Operations Management, 2009.

Wu, Jingxian, Ph.D. (University of Missouri-Columbia), M.S. (Tsinghua University), B.S. (Beijing University of Aeronautics and Astronautics), Associate Professor, Department of Electrical Engineering, 2008.

Wu, Xintao, Ph.D. (George Mason University), M.E. (Chinese Academy of Space Technology), B.S. (University of Science and Technology), Professor, Department of Computer Science and Computer Engineering, 2014.

X

Xiao, Min, Ph.D. (University of Texas at Austin), B.S. (Nanjing University), Distinguished Professor, Department of Physics, 1990.

Xiao, Jie, Ph.D. (State University of New York–Binghamton), M.S., B.S. (Wuhan University), Associate Professor, Department of Chemistry and Biochemistry, 2016.

Xinya, Liang, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Assistant Professor, ESMR, 2014.

Y

Yandell, Kay, Ph.D., M.A. (Cornell University), B.A. (University of Arkansas), Associate Professor, Department of English, 2013.

Yang, Song, Ph.D., M.S. (University of Minnesota-Twin Cities), M.A. (Nankai University, China), B.A. (Branch College of Nankai, China), Professor, Department of Sociology and Criminology, 2002.

Yazwinski, Tom, Ph.D. (North Carolina State University), M.S. (University of Maine), B.S. (University of Vermont), University Professor, Department of Animal Science, 1977.

Yeager, Timothy J., Ph.D., M.A. (Washington University in St. Louis), Professor, Department of Finance, 2006.

Yeager, Mickey, M.S. (University of Arkansas), M.A. (Liberty Baptist Theological Seminary), B.S. (University of Southern Mississippi), Instructor, Program in Operations Management, 1989.

Yoon, InJeong, Ph.D. (University of Arizona), Assistant Professor, School of Art, 2017.

Young, Elizabeth Lee, J.D. (George Washington University), B.A. (Hendrix College), Associate Professor, School of Law, 2008.

Young, Heather D., Ph.D. (University of Arkansas), M.S. (University of Tennessee), B.S. (Arkansas Tech University), Associate Professor, Department of Curriculum and Instruction, 2007.

Young, Kelly, D.N.P. (University of South Alabama), M.S. (University of Oklahoma), B.S.N. (Southwestern Oklahoma State University), B.A. (Grinnell College), Assistant Professor, Eleanor Mann School of Nursing, 2018.

Yu, Fisher, Ph.D. (Arizona State University), M.S., B.S. (Peking University), Associate Professor, Department of Electrical Engineering, 2008.

Z

Zabelina, Darya, Ph.D. (Northwestern University), Assistant Professor, Department of Psychological Science, 2017.

Zajicek, Anna, Ph.D. (Virginia Polytechnic Institute and State University), M.S., B.S. (University of Silesia, Poland), Professor, Department of Sociology and Criminology, 1994.

Zamarro Rodriguez, Gema, Ph.D., M.S. (Centro de Estudios Monetarios y Financieros, Spain), B.A. (Universidad Carlos III de Madrid, Spain), Professor, Department of Education Reform, 2014.

Zeng, Ka, Ph.D. (University of Virginia), M.A. (Virginia Polytechnic Institute and State University), B.A. (Foreign Affairs College, Beijing), Professor, Department of Political Science, 2000.

Zhang, Shengfan, Ph.D., M.I.E. (North Carolina State University), B.M. (Fudan University, Shanghai), Assistant Professor, Department of Industrial Engineering, 2011.

Zhang, Wen, Ph.D. (Purdue University), M.S. (University of Kansas), Assistant Professor, Department of Civil Engineering, 2011.

Zhang, Qingyang, Ph.D. (Northwestern University), M.S. (Loyola University–Chicago), B.S. (Beijing Normal University), Assistant Professor, Department of Mathematical Sciences, 2015.

Zhao, Jiangchao, Ph.D. (University of Wisconsin-Madison), M.S., B.S. (China Agricultural University), Assistant Professor, Department of Animal Science, 2015.
Zhao, Yue, Ph.D. (University of Nebraska-Lincoln), B.S. (Beijing University), Assistant Professor, Department of Electrical Engineering, 2015.

Zheng, Nan, Ph.D. (University of Michigan-Ann Arbor), M.S. (University of Rochester), B.S. (University of Science and Technology of China), Associate Professor, Department of Chemistry and Biochemistry, 2008.

Zhou, Wenchao, Ph.D. (Georgia Institute of Technology), M.S.M.E. (Xi’an Jiaotong University, Xi’an, China), B.S.M.E. (Huazhong University of Science and Technology, Wuhan, China), Assistant Professor, Department of Mechanical Engineering, 2014.

Zhu, Jun, Ph.D. (University of Illinois at Urbana-Champaign), M.S., B.S. (Zhejiang University, Hangzhou, China), Professor, Department of Biological and Agricultural Engineering, 2013.

Zies, Brenda June, Ph.D., M.A. (University of Arkansas), B.S. (East Texas State University), Teaching Assistant Professor, Department of Psychological Science, 2005.

Zou, Min, Ph.D., M.S.M.E. (Georgia Institute of Technology), M.S.A.E., B.S.A.E. (Northwestern Polytechnical University), Professor, Department of Mechanical Engineering, 2003.
The Academic Common Market

The Academic Common Market is an interstate agreement among Southern states for sharing uncommon academic programs. Participating states are able to make arrangements for their residents who qualify for admission to enroll as in-state students for fee purposes.

The Common Market concept recognizes that it is impractical for every state to attempt development of programs in every field of knowledge. Each Southern state has programs which are not offered in some of the other states and which can accommodate additional students. Through the sharing of such programs, the market assists in eliminating unnecessary duplication and in increasing access to programs which meet the educational needs of the citizens of the South.

To enroll as an Academic Common Market student, you must:

1. Be accepted for admission into a program to which your state has obtained access for its residents through the Academic Common Market. Applications for admission should be made directly to the institution offering the program.
2. Obtain certification of residency from the Common Market coordinator for certification information.

The opportunities presently available at the University of Arkansas, Fayetteville, at in-state rates to residents of Southern states through the Academic Common Market are listed in the column to the right.

Student Residence Status for Tuition and Fee Purposes

Board Policy 520.8 (Revised January 18, 1985)

The full text of the University of Arkansas Board of Trustees policy statement 520.8, Student Resident Status for Tuition and Fee Purposes, is provided below followed by a statement on implementing the policy at the University of Arkansas, Fayetteville.

Determination of Residence Status

I. Purpose

The purpose of these regulations is to enable the administrative officers of the University of Arkansas to classify students for the purpose of paying student fees, as either “in-state” or “out-of-state,” so as to accord fairness and equity to the students of the University and to the public, which provides support for the educational services provided by the University.

II. Initial Classifications

1. A student shall be admitted to the University in an “in-state” or “out-of-state” status for university fee purposes, as established under these regulations. Except as otherwise provided under these regulations, a student classified as “in-state” for university fee purposes at the time of admission must have established a bona fide domicile in Arkansas and must have resided continuously in this state for at least six consecutive months prior to the beginning of the term or semester for which fees are paid.

2. A bona fide domicile is a home of apparent true, fixed, and permanent nature, a place of actual residing for all purposes of living that may be distinguished from a temporary sojourn in this state as a student. The person claiming domicile in Arkansas must provide evidence of permanent connection with the State of Arkansas and demonstrate the expectation of remaining in this state beyond graduation. For purposes of implementing these policies, the administration is directed to articulate standards which will be applied in making the determination of residence.

3. Except as otherwise provided under these regulations, the domicile of an adult (18 years of age or older) or emancipated minor student shall be determined on the basis of his or her own domicile.

4. Except as otherwise provided under these regulations, the domicile and residence of an unemancipated minor student (less than 18 years of age) or an unmarried dependent who has not attained the age of 23 is legally that of the parents or surviving parent; or such other person legally standing in the place of a parent to the student and with whom the student in fact makes his or her home and who has been making substantial contributions to the support of the student for at least six consecutive months prior to the term or semester for which fees are paid.

5. A student who cannot satisfy the criteria for Arkansas domicile and residence will be classified as an “out-of-state” student and will pay fees and tuition accordingly. The student on a temporary visa will be classified as a foreign student and will pay non-resident tuition and fees. A student who has been granted a permanent visa and has been domiciled in Arkansas for six consecutive months following receipt of the permanent visa shall be classified as an Arkansas resident for fee purposes.

6. The responsibility for registering under a proper classification for student fee purposes is placed upon the student. It is the duty of each student at each time of registration to call any question about residency classification status to the attention of the campus.
classification review officer in a timely fashion in order that the question may be settled (see IV Procedures).

7. The six-month period required in paragraph A of these regulations may be waived for persons, their spouses, and their unmarried children (who have not yet attained the age of 23) who move to Arkansas with attendance at the University only by-product of the primary purpose of establishing domicile in this state.

8. An unmarried student who has not reached the age of 23 years having one parent residing in Arkansas (for at least six consecutive months immediately prior to the beginning of the term or semester in which the fees are to be paid) may be considered an “in-state” student for fee purposes, even if that student resided outside the state with the other parent before coming to Arkansas to attend the University.

9. Marriage is recognized as emancipation for both females and males.

10. The spouse of a person continuously domiciled in Arkansas (for at least six consecutive months immediately prior to the beginning of the term or semester in which the fees are to be paid) upon request shall be classified as “in-state” for fee purposes.

III. Reclassifications

1. The initial classification of a student will not prejudice a different classification for following terms or semesters. However, a student’s prior domicile is assumed to continue until he or she clearly establishes a new domicile in Arkansas (see IV Procedures).

2. A student previously classified as “out-of-state” may be reclassified as “in-state” for fee purposes if he or she has established a bona fide domicile in Arkansas and has resided continuously in this state in that bona fide domiciliary status for at least six consecutive months prior to his or her reclassification by the University. In order for an adult or an emancipated minor to establish a bona fide domicile in Arkansas for fee purposes, he or she must have left the parental home, must have established in this state a home of a permanent character as manifested objectively by good faith acts, and must have the expectation of remaining in this state beyond graduation. The single fact of presence in Arkansas for at least six months of attendance as a student enrolled in the University of Arkansas, or any other educational institution, neither constitutes nor necessarily precludes reclassification as one domiciled in Arkansas, but will be a factor to be considered.

IV. Procedures

1. A student shall have the burden of establishing any claim that he or she is entitled to be treated as “in-state” for fee purposes. Persuasive evidence to that effect must be presented in writing and verified under oath by the student. Mere claims of local domicile and duration of stay are of little weight. A student who knowingly gives erroneous information in an attempt to evade the payment of “out-of-state” fees may be subject to dismissal from the University.

2. All disputed classifications for student fee purposes, whether at initial enrollment or subsequent enrollments, and all disputed reclassifications will be decided initially on each campus by a classification review officer designated by each Chancellor.

3. The Chancellor of each campus will designate a campus classification appeal officer to receive petitions from decisions made by the campus classification review officer. Each campus classification appeal officer may, in his or her discretion, make investigations, receive evidence, and conduct informal hearings. After considering the case, the campus classification appeal officer will render a decision and notify the affected student of the decision in writing. Any decision of the campus classification appeal officer may be appealed to the Classification Review Officer of the University.

4. Written notice of the appeals procedure will be provided to each student raising a question about his or her status with the campus residency classification review officer.

5. Determination of domicile will be based on a review of all pertinent facts, evidence, and circumstances which collectively show, in an objective and clear manner, the actual domicile of the student.

Note: In implementing these policies, it is presumed that dependent students who are classified as non-residents based upon parent/guardian domicile outside of Arkansas do not acquire Arkansas residency under Board of Trustees Policy 520.8 unless and until their parent(s)/guardian(s) have established a domicile in Arkansas, or the student has left the parental home and established a domicile in Arkansas evidenced by proof that he or she has established a home of a permanent character as manifested objectively by good faith acts, resided in Arkansas in bona fide domiciliary status for at least six consecutive months prior to his or her reclassification as an Arkansas resident, and demonstrates the expectation of remaining in this state beyond graduation.

Reclassification Deadlines

Students who have established a bona fide domicile in Arkansas following initial classification as a non-resident must request reclassification if they want their status recognized for fee purposes. Applications and appropriate documentation must be received by the Office of the Registrar no later than the fifth class day (second class day of a summer session) of the term for which in-state fee assessment is requested. Applications received after the deadline will be considered for the next term. All fees are to be paid by published due dates. Students who receive a favorable decision after payment will be provided a refund of out-of-state fees paid. Please direct questions about residence classification review procedures to the Registrar, 146 Silas H. Hunt Hall.

Residence Status of Native Americans

Board Policy 520.1 (Revised January 29, 1989)

Native American people in other states belonging to tribes that formerly lived in Arkansas before relocation, and whose names are on the rolls in tribal headquarters, shall be classified as in-state students of Arkansas for tuition and fee purposes on all campuses of the University of Arkansas.

Tribes so identified include the Caddo, Cherokee, Chickasaw, Choctaw, Creek, Delaware, Kickapoo, Osage, Peoria, Quapaw, Shawnee, and Tunica.

Residence Status of Members of the Armed Forces and Their Dependents

Board Policy 520.7 (Revised January 18, 1985)

Effective January 1, 1975, members of the Armed Forces who are stationed in the state of Arkansas pursuant to military orders, and their unemancipated dependents, shall be entitled to classification as in-state students for fee-paying purposes (per Arkansas Stat. Ann. 80-3366).

Persons continuously domiciled in Arkansas for at least twelve consecutive months, who enter active military service from this state and who maintain Arkansas as the permanent home of record while on active military duty, and their dependents, shall be entitled to classification as in-state students for fee-paying purposes. This provision is forfeited if the
military person does not return to Arkansas within twelve months after separation, discharge, or retirement from active duty.

Persons serving in active military service who demonstrate a change of bona fide domicile from another state to Arkansas at least twelve consecutive months prior to separation, discharge, or retirement from active military duty, and their dependents, shall be entitled to classification as in-state students for fee-paying purposes. This provision is forfeited if the military person does not return to Arkansas within twelve months after separation, discharge, or retirement from active duty.

Residence Status of Students from Texarkana, Texas, and Bowie County, Texas

Board Policy 520.10 (Adopted November 16, 1984)

In accordance with the reciprocity agreement described in H.C.R. 32, signed by the Governor of Arkansas on February 12, 1965, residents of Texarkana, Texas, and Bowie County, Texas, will be classified as in-state students for university fee purposes at the University of Arkansas.
Courses of Instruction

Courses listed in this section describe all courses approved for offering by the University of Arkansas. The courses are listed alphabetically by subject with the subject code in parenthesis following. The word “course” refers to a unit of academic instruction, while the word “class” refers to a course that has been scheduled during a semester or summer session with a certain number of prescribed meetings each week. Many courses are offered as classes every semester while many others are offered less frequently. Successful completion of a class usually earns a specified number of semester hours of credit toward a degree.

To see a Schedule of Classes, which lists classes available in a specific semester, along with the instructor of record, time and place the class is being held, go to UAConnect (https://uaconnect.uark.edu/).

How to Read a Course Description

Courses listed in this section describe all courses approved for offering by the University of Arkansas. The courses are listed alphabetically by code. The word “course” refers to a unit of academic instruction, while the word “class” refers to a course scheduled during a semester or summer session with a certain number of prescribed meetings each week. Successful completion of a class usually earns a specified number of semester hours of credit toward a degree.

The Schedule of Classes lists classes available in a specific semester, along with the instructor of record, time and place the class is being held.

Course Description Explanations

A course listing comprises the following elements, in order:

**Course Prefix:** This alpha descriptor is the first identifying part of a course. This four-letter code represents the course prefix name. Usually the course prefix will be the same as the department offering the course, but occasionally the prefix is one of many different courses offered in a single department. For example, ARAB refers to Arabic courses, which are offered through the Department of World Languages, Literatures and Cultures; HIST refers to History courses.

**Course Number:** Each course is designated by a four-digit number. The first digit identifies the level of the course: 1, freshman level; 2, sophomore level; 3 and 4, junior-senior level; 5, 6, and 7, graduate level. Any exceptions to this practice are stated in the course descriptions.

Students desiring admission to courses offered at levels beyond their standing should request the instructor’s permission to enroll. (For definitions of academic level see Student Classification [http://catalog.uark.edu/undergraduatecatalog/orientationandregistration/studentclassification/].)

The second and third digits of the number identify the course within the department that offers it.

The fourth digit identifies the semester-hour value of the course. Credit for certain courses does not count toward some degrees.

Normally, courses meet once each week for 50 minutes for each hour of course credit. Laboratory, drill and other kinds of activity courses typically meet for two 50-minute periods per week for each hour of credit.

The letter ‘V’ is used in place of the last digit for those courses in which credit is variable. The minimum and maximum credit hours possible are given in parentheses after the course title.

The letter ‘X’ is used in place of the last digit for those courses in which fixed credit is ten or more hours.

The first three digits of the number are the same for corequisite courses (for example, a lecture and the corequisite lab or drill).

**Course Suffix:** A suffix to the course number further identifies the specific type of instruction:

- C - Drill or Lab Component
- L - Laboratory
- H - Honors Course
- M - Honors Laboratory

A course with no suffix is a typical lecture course (not an honors course).

**Course Title:** The title of the course is printed in bold letters.

**Course Semester Offering:** Course titles are followed by abbreviations (in parentheses) for the semester in which the course is normally offered. Cross-check with the Schedule of Classes to determine if a course is being offered. Courses marked (Sp) will be offered in the spring, courses marked (Fa) will be offered in the fall, courses marked (Su) will be offered in the summer, and courses marked (Irregular) will be offered irregularly. Consult the Schedule of Classes to verify that a course is being offered for a given term.

**Course Description:** A brief description of the course content and its major emphasis is stated. If the course is cross-listed (also offered under another course number) a “Same As” statement will be included in the description. If the course is eligible to be repeated for degree credit more than once, a statement will appear to indicate the total hours or times a course may be repeated. If no repeated statement is listed, the course may be used for degree credit only once.

**Requisites:** Requisites are requirements that must be fulfilled either before a course may be taken or at the same time a course is taken. It is the student’s responsibility to make sure the proper prerequisites have been completed before enrolling in any class. Prerequisites are courses or requirements that must be completed prior to enrolling in a certain course. Courses may have prerequisites from inside and outside the department. It is the student’s responsibility to make sure he/she has completed the proper prerequisites before enrolling in any class. Courses listed as corequisite are to be taken in the same semester as the course desired.

A course listed as both a pre- and corequisites are requirements that if not taken prior to enrolling in a course, must be taken during the same semester as the course.

Students may not enroll in courses for which they do not have the necessary requisites. Students who are in doubt concerning their eligibility to enroll in specific courses should consult with their academic adviser.

Students may be dropped from courses for which they do not have the necessary requisites.

Courses

ACCT 510V. Special Topics in Accounting. 1-3 Hour.
(Formerly ACCT 410V.) Explore current events, concepts and new developments relevant to Accounting not available in other courses. Graduate degree credit will not be given for both ACCT 410V and ACCT 510V. Prerequisite: ACCT 3723 with a grade of C or better. (Typically offered: Irregular) May be repeated for degree credit.

ACCT 5223. MBA Accounting Analysis. 3 Hours.
Highlights the role played by accounting information in managing supply chains and retail operations. Provides tools for managing cost flows, including activity-based costing, retail accounting, and operational budgeting. Focuses on improving decision making processes, and linking the impact of retail/supply chain decisions to financial statements and shareholder value. (Typically offered: Fall and Spring)

ACCT 5263. Financial Statement Analysis for Executives. 3 Hours.
This course provides a framework for understanding the intersection between business strategy, accounting, economics, and finance. Using historical financial statements as the primary information input, you will employ tools that enable you to better understand the drivers of current performance and risk, forecast future performance, and construct a value estimate. These tools can be applied in a number of contexts including equity valuation, project selection, and managerial evaluation. Not eligible for MAcc program students. Prerequisite: MBA Director consent. (Typically offered: Summer)

ACCT 535V. Professional Accounting Internship. 1-3 Hour.
This course allows a student to experience an internship within a business and benefit from the applied experience. The internship may be designed to offer a wide range of professional accounting experiences in Industry or Public Accounting. The internship must be supervised by a faculty member as well as a member of the firm. MACC Director approval required. Prerequisite: MACC Director consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ACCT 5413. Advanced Financial Accounting. 3 Hours.
Integrated course which examines the financial reporting, tax, managerial, systems and auditing aspects of major corporate restructurings arising from events such as mergers, acquisitions, spinoffs, reorganizations and downsizing. Prerequisite: ACCT 3753 or equivalent with a grade of C or better or MACC Director consent. (Typically offered: Spring)

ACCT 5433. Fraud Prevention and Detection. 3 Hours.
An examination of various aspects of fraud prevention and detection, including the sociology of fraud, elements of fraud, types of fraud involving accounting information, costs of fraud, use of controls to prevent fraud, and methods of fraud detection. (Typically offered: Irregular)

ACCT 5443. Asset Management. 3 Hours.
Managing assets to achieve corporate strategy. Included are issues such as strategy formulation, acquisition processes, internal controls, system requirements, accounting measurements, inventory models, re-engineering, capital budgeting, tax issues, and discussion of current business events that have ethical implications. (Typically offered: Irregular)

ACCT 5463. Financial Statement Analysis. 3 Hours.
This course provides a framework for understanding the current economic position and future prospects of firms using corporate financial statements. Specifically, the student will study financial statements and their related footnotes in order to understand the drivers of current performance and risk, forecast future performance, and estimate the intrinsic value implied by those forecasts. These tools can be applied in a number of contexts including equity valuation, project selection, managerial evaluation, and corporate financial statement audits. Prerequisite: ACCT 3723 or equivalent with a grade of C or better. (Typically offered: Irregular)

ACCT 5483. Financial Accounting Research and Theory. 3 Hours.
This course explores our contemporary understanding of financial reporting incentives and outcomes. The course draws upon existing research on the determinants and consequences of financial reporting and examines the roles of various constituents including investors, lenders, financial analysts, managers, regulators, and auditors within the financial reporting environment. Prerequisite: Graduate standing and MACC Director consent. (Typically offered: Irregular)

ACCT 549V. Special Topics in Accounting. 1-3 Hour.
Seminar in current topics not covered in other courses. Students may enroll in one or more units. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ACCT 5523. Advanced Accounting Information Systems. 3 Hours.
This course describes accounting systems in technologically advanced environments. Controls and other technical design considerations are described for the input, processing, storage, and reporting of accounting information. Special topics, such as expert systems and artificial intelligence applications in financial accounting, auditing, and tax also receive considerable attention. Prerequisite: MACC Director consent. (Typically offered: Irregular)

ACCT 5673. Product, Project and Service Costing. 3 Hours.
(Formerly ACCT 4673.) Cost systems with emphasis on information generation for cost management of products, projects and services. The course includes spreadsheet and other computer program analysis. Graduate degree credit will not be given for both ACCT 4673 and ACCT 5673. Prerequisite: ACCT 2023 or ACCT 3813 and ACCT 3723 each with grades of C or better. (Typically offered: Fall)
ACCT 5703. Governmental/Nonprofit Accounting. 3 Hours.
The course will critically examine current issues in governmental and non-profit accounting, financial statement compliance and control for governmental and non-profit entities, and auditing for government and other non-profit organizations. Topics will include examination of state and local government accounting and reporting; sources and applications of taxes and program resources; not-for-profit organization accounting including taxation, regulatory, performance, and compliance issues; industry specific issues in accounting for health care organizations and colleges and universities; and federal governmental accounting. The course will also examine the application processes and compliance procedures for not-for-profit organizations and grants, and will provide a brief introduction to urban planning and economics. Prerequisite: MAcc Director consent. (Typically offered: Irregular)

ACCT 5873. Advanced Taxation. 3 Hours.
In-depth coverage of the tax treatment of corporations including advanced tax issues. Introduction to tax research including the organization and authority of tax law; accessing and using the tax law; and, applying tax law to taxpayer scenarios. Prerequisite: ACCT 4203 or equivalent with a grade of C or better. (Typically offered: Fall)

ACCT 5883. Tax Planning. 3 Hours.
In-depth coverage of the tax treatment of passthrough business entities including advanced tax issues. Overview of the income tax treatment of estates and trusts. Overview of the essentials of estate and gift taxation. Prerequisite: ACCT 3843 or equivalent with a grade of C or better. (Typically offered: Spring)

ACCT 5893. Multi-Jurisdictional Tax Issues. 3 Hours.
This course provides an in-depth examination of multi-jurisdictional tax issues including U.S. federal income taxation of inbound and outbound transactions, state and local taxation, and multi-jurisdictional tax policy issues. Pre- or Corequisite: ACCT 5873. (Typically offered: Spring)

ACCT 5953. Auditing Standards. 3 Hours.
Professional aspects of financial statement auditing and registered auditors. Including ethics and legal responsibilities; internal control testing; critical evaluation of evidence; application of sampling; and reporting problems. Prerequisite: ACCT 4963 or equivalent with a grade of C or better. (Typically offered: Fall)

ACCT 5963. Audit and Assurance Services. 3 Hours.
(Formerly ACCT 4963.) Professional standards and procedures as applied to external and internal assurance engagements. Including coverage of the economic role of assurance providers, engagement planning, risk assessment, evidence gathering, and reporting. Graduate degree credit will not be given for both ACCT 4963 and ACCT 5963. Prerequisite: ACCT 3723 with a grade of C or better. (Typically offered: Fall and Spring)

ACCT 5993. Energy Accounting. 3 Hours.
(Formerly ACCT 4883.) This course covers the basic issues of accounting and financial reporting for energy issues including hydrocarbon production, processing and sales as well as accounting for wind, solar and other alternative energy sources. Covers national and international energy policy, relevant public policy, environmental and geological issues, and considers environmental law, climate and economic topics relevant to energy topics. Graduate degree credit will not be given for both ACCT 4883 and ACCT 5993. Prerequisite: ACCT 3723 and ACCT 3753 each with a grade of B or better, and admission to the MAcc program. (Typically offered: Irregular)

ACCT 6013. Graduate Colloquium. 3 Hours.
Presentation and critique of research papers and proposals. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ACCT 6033. Accounting Research Seminar I. 3 Hours.
First course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, managerial accounting and behavioral accounting. (Typically offered: Irregular)

ACCT 6133. Accounting Research Seminar II. 3 Hours.
Second course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 6233. Accounting Research Seminar III. 3 Hours.
Third course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 636V. Special Problems in Accounting. 1-6 Hour.
Special research project under supervision of a graduate faculty member. (Typically offered: Fall and Spring)

ACCT 6433. Accounting Research Seminar IV. 3 Hours.
Fourth course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 6633. Accounting Research Seminar V. 3 Hours.
Fifth course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

Adult and Lifelong Learning (ADLL)

Courses

ADLL 5113. Perspectives in Adult Education. 3 Hours.
Historical overview of the evolving field of adult education and lifelong learning in responsibilities of adult education providers and reviews the expansion of adult and lifelong learning opportunities associated with societal and demographic shifts. (Typically offered: Fall and Spring)

ADLL 5123. Principles and Practices of Adult Learning. 3 Hours.
Overview of the adult learner including characteristics, motivation for participating in learning, and strategies for developing educational programs for diverse adult populations. (Typically offered: Fall and Summer)
ADLL 5133. Curriculum Development in ABE and ASE. 3 Hours.
Curriculum development in Adult Basic Education (ABE) and Adult Secondary Education (ASE) settings including the various educational functioning levels, measures to assess student levels, selection of teaching materials, and development of curriculum utilizing instructional standards for ABE and ASE programs. (Typically offered: Fall)

ADLL 5143. Instructional Strategies and Assessment in Adult Education. 3 Hours.
Selection and utilization of materials and instructional methods for use in adult learning settings. Evaluative strategies to develop or select appropriate tools and techniques predicated upon the needs and goals of adult learners. (Typically offered: Spring)

ADLL 5153. Organization and Administration of Adult and Lifelong Learning Programs. 3 Hours.
Legal, ethical, staffing, and financial considerations for the development and implementation of programs for adult and lifelong learners in various programs including literacy centers, GED centers, community education, lifelong/leisure learning, and postsecondary education. (Typically offered: Spring)

ADLL 5163. Managing Change in Adult and Lifelong Learning. 3 Hours.
Strategies for planning, organizing, and facilitating change in programs that serve adult learners from diverse populations, across varied developmental stages and geographic locations. Discussion of social change that has impacted adult education and analysis of change models relevant to individuals, groups and organizations. (Typically offered: Fall and Summer)

ADLL 5173. Program Planning. 3 Hours.
Program development process for adult and lifelong learners. Overview of assessment, developing program objectives, identifying resources, and designing program plans. (Typically offered: Summer)

ADLL 5183. Technology and Innovation in Adult Learning. 3 Hours.
Techniques for designing, developing, implementing, and assessing technology-mediated adult and lifelong learning programs. Discussion of issues relevant to the use of innovative strategies for delivering instruction via emerging technologies and their potential impact on content and learning outcomes. (Typically offered: Summer)

ADLL 5193. Seminar in Adult and Lifelong Learning. 3 Hours.
Seminars focused on topics related to adult and lifelong learning. (Typically offered: Spring and Summer)

ADLL 5213. Adult and Lifelong Learning Internship. 3 Hours.
Internship in adult and lifelong learning settings. (Typically offered: Fall and Spring)

ADLL 5223. Adult and Lifelong Learning Applied Project. 3 Hours.
Development and Implementation of a project focused on adult and lifelong learning. Consent of advisor/instructor required. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

ADLL 5233. Independent Study. 3 Hours.
Provides students with an opportunity to pursue special study in adult and lifelong learning. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ADLL 6113. Advanced Adult Learning Theory. 3 Hours.
Advanced study of theories and models of adult and lifelong learning with an emphasis on current trends, recent research, and issues affecting the field. Issues covered will include critical theory and advancements in neuroscience and cognition as they relate to adult learning and lifespan development. (Typically offered: Irregular)

ADLL 6123. Leadership and Ethics in Adult and Lifelong Learning. 3 Hours.
This doctoral course focuses on leadership principles and ethical considerations that are critical to developing and sustaining adult education programs that benefit individuals, organizations, and communities. Course content will include case study analysis and lectures from scholar-practitioners from the field. (Typically offered: Irregular)

ADLL 6133. Analysis of International Adult and Lifelong Programs. 3 Hours.
Survey of the historical and philosophical events which have shaped adult and lifelong learning worldwide. Discussion of issues affecting adult education and lifelong learning including globalization, educational access, and variance in national policies. (Typically offered: Irregular)

ADLL 6143. Instructional Adaptation and Innovation in Adult and Lifelong Learning. 3 Hours.
An overview of teaching and learning methods, styles, and techniques which are applicable when facilitating adult learners across diverse settings. Content to include teaching and learning style assessment, accommodating learning styles, physical and learning disabilities, language differences and cultural norms. (Typically offered: Irregular)

ADLL 6153. Policy and Public Governance of Adult and Lifelong Learning Programs. 3 Hours.
Policy analysis and public governance issues in adult and lifelong learning with emphasis on state and federal programs. Discussions of how to evaluate, design, and implement policy focused on promoting adult and lifelong learning activities in a myriad of organizations. Overview of trends and current issues related to policy and public governance of adult and lifelong learning. (Typically offered: Irregular)

ADLL 6163. Adult Development and Psychology. 3 Hours.
Focus on adult developmental psychology with emphasis on lifespan development and specific issues related to learning in the various stages of adulthood. Work-life balance, meaning of work, generational issues. (Typically offered: Irregular)

ADLL 6173. Current Issues. 3 Hours.
Exploration and discussion of current issues relative to adult education and lifelong learning. Focus on the review and application of current research as it relates to practice. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ADLL 6183. Organization Development, Learning, and Change. 3 Hours.
Using a system perspective, this course examines the theories and practices associated with organization development, learning and change to understand the dynamic nature of organizational life. This course examines the structural frame, the human resource frame, the political frame, and the symbolic frame that influences organizational behavior and learning. The course investigates strategies and best practices for managing and leveraging this dynamism to build organizational capacity and improve performance. (Typically offered: Fall and Spring)

ADLL 6213. Signature Pedagogy: Teaching and Learning in Community Colleges. 3 Hours.
Using a learning-centered change model, this course examines how community colleges can shift from a traditional teaching-centered paradigm to one that is learning-centered. This course examines the context of the learning college, strategic planning for a learning-outcomes approach to governance, the role of student development and technology in the learning college, and implementing and assessing learning-centered strategies. (Typically offered: Irregular)

ADLL 6223. Workforce and Community Development. 3 Hours.
This course provides an overview of how community colleges influence workforce, economic, and community development through their education missions. The course will examine the community college's expanding role in economic and community development through workforce development programs. Emphasis will be placed on program structure, best practices in program development, and partnerships and collaboration with various stakeholders. (Typically offered: Irregular)
ADLL 6233. Survey and Significance of the American Community College. 3 Hours.
A comprehensive overview of the American community college, its history, its ever-evolving purpose and the challenges it faces. Course content will focus on the administrators and faculty who lead, the students they serve, and components such as developmental education, integrative education and transfer education. Discussion will include occupational and community education and issues related to accountability. Special attention will be paid to how this unique and complex institution remains relevant and significant to the community. (Typically offered: Irregular)

ADLL 6243. Current Trends in Community Colleges. 3 Hours.
This course examines environmental factors that influence the organization and administration of community colleges. Trends related to funding, policy, staffing, and workforce development are examined and contextualized to the evolving community college mission. (Typically offered: Irregular)

ADLL 6253. Professional Development in Adult and Lifelong Learning. 3 Hours.
This course examines career planning and development, performance management, and professional development in various settings. The focus of the course will be on concepts associated with Human Resource Development (HRD) and developing employees within an organization, as well as leading adults in transition in the community and in educational settings through the process of making career decisions. (Typically offered: Irregular)

ADLL 6313. Independent Study. 3 Hours.
Independent study of topics in adult and lifelong learning. (Typically offered: Irregular)

ADLL 6403. Quantitative Reasoning I for Adult Educators. 3 Hours.
Introduction to quantitative reasoning for educators and researchers in adult education. Topics include applying the hypothetico-deductive research process, describing data using statistical terminology, building statistical models, presenting data meaningfully, and using SPSS to analyze data from practical research problems. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or ADLL 6413 or ADLL 6423, or equivalent. (Typically offered: Spring)

ADLL 6443. Adult and Lifelong Learning Dissertation Seminar. 3 Hours.
Development of dissertation proposal. Formation of research question, selection of methodologies, development of problem statement, research questions, and identification of research variables, constructs of phenomena. Identification of data collection and data analysis procedures. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or ADLL 6413 or ADLL 6423 or ADLL 6433, or equivalent. (Typically offered: Spring)

ADLL 6463. Advanced Qualitative Reasoning in Adult and Lifelong Learning. 3 Hours.
This qualitative methods course provides students with advanced instruction in qualitative data collection, field observations, records research, data analysis, and data display. In addition to reviewing various research studies that demonstrate different qualitative research approaches, students will practice some of the activities associated with executing a qualitative research study. Prerequisite: ADLL 6423 or instructor consent. (Typically offered: Irregular)

ADLL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

African and African American Studies (AAST)
Courses
AAST 5003. Graduate Seminar in African & African American Studies. 3 Hours.
Introduction to graduate study of African & African American Studies through an interdisciplinary examination of the history of the discipline, research methods employed, and its relationship to other disciplines. (Typically offered: Irregular)

AAST 5103. Graduate Readings in African & African American Studies. 3 Hours.
An exploration of African & African American Studies topics independently with a faculty member. Topic variable with permission of faculty member. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Agricultural Economics (AGEC)
Courses
AGEC 500V. Special Problems. 1-3 Hour.
Individual reading and investigation of a special problem in agricultural economics not available under regular courses, under the supervision of the graduate faculty. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

AGEC 5011. Seminar. 1 Hour.
Presentation and discussion of graduate student research. Formal presentations are made by all graduate students. Consideration given to research design, procedures, and presentation of results. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)
AGEC 502V. Special Topics. 1-3 Hour.
Advanced studies of selected topics in agricultural economics not available in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

AGEC 503V. Internship in Agricultural Economics. 1-3 Hour.
On-the-job application of skills developed in the M.S. program. (Typically offered: Fall, Spring and Summer)

AGEC 5043. Agricultural Finance. 3 Hours.
(Formerly AGEC 4403.) Methods and procedures whereby agricultural firms acquire and utilize funds required for their successful operation. Emphasis is placed upon role of finance and financial planning and consideration is given to an understanding of financial firms serving agriculture. Graduate degree credit will not be given for both AGEC 4143 and AGEC 5043. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (AGEC 2142 or ACCT 2013 or WCOB 1023). (Typically offered: Fall)

AGEC 5053. Advanced Farm Business Management. 3 Hours.
(Formerly AGEC 4403.) Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Graduate degree credit will not be given for both AGEC 4403 and AGEC 5053. Prerequisite: AGEC 3403 and AGME 2903 or equivalent. (Typically offered: Fall)

AGEC 5063. Agricultural and Rural Development. 3 Hours.
(Formerly AGEC 4163.) Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Graduate degree credit will not be given for both AGEC 4163 and AGEC 5063. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Fall)

(Formerly AGEC 3403.) This course provides students an opportunity to gain a detailed working knowledge of how basis trading concepts and practices are applied to agricultural markets and to develop a skill set that can be put immediately into practice in any basis trading operation. Graduate degree credit will not be given for both AGEC 4373 and AGEC 5073. Prerequisite: AGEC 3373 or consent of instructor. (Typically offered: Spring and Summer)

AGEC 5083. Basis Trading: Case Study. 3 Hours.
(Formerly AGEC 4383.) This course provides an opportunity to apply principles learned in AGEC 4373 to grain merchandising using the case study approach. The course will involve in-class meetings supplemented with faculty-directed group-based learning experiences involving professional grain merchandisers. Group activities will follow the traditional case study method. Graduate degree credit will not be given for both AGEC 4383 and AGEC 5083. Prerequisite: AGEC 4373 or AGEC 5073 (formerly AGEC 4373). (Typically offered: Fall)

AGEC 5103. Agricultural Microeconomics. 3 Hours.
Masters-level training in agricultural microeconomic theory and its application to food, agriculture and the environment. The course covers behavior of firms, households and markets, in more depth and rigor than encountered in undergraduate courses. Theories are explained and then applied to relevant food, agricultural, environment and resource issues. (Typically offered: Fall)

AGEC 5113. Agricultural Prices and Forecasting. 3 Hours.
(Formerly AGEC 4113.) Price theory and techniques for predicting price behavior of general economy and price behavior of individual agricultural products will be analyzed. Provides practice in the application of economics and statistics to agricultural price analysis. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both AGEC 4113 and AGEC 5113. Prerequisite: (AGEC 1103 or ECON 2023), AGEC 2403, (AGST 4023 or STAT 2303 or WCOB 1033) and MATH 2053. (Typically offered: Spring)

AGEC 5123. Agribusiness Entrepreneurship. 3 Hours.
(Formerly AGEC 4323.) Agribusiness entrepreneurship is the process of bringing food or rural-based products and services from conceptualization to market. The course presents the opportunities, problems and constraints facing individuals and firms operating in rural or isolated markets while emphasizing the steps in conceptualization, development, marketing, and delivery-selling of agribusiness products. Graduate degree credit will not be given for both AGEC 4323 and AGEC 5123. Prerequisite: AGEC 1103 or equivalent. (Typically offered: Spring)

AGEC 5133. Agricultural and Environmental Resource Economics. 3 Hours.
An economic approach to problems of evaluating private and social benefits and costs of altering the environment. Emphasis given to the interaction of individuals, institutions, and technology in problems of establishing and maintaining an acceptable level of environmental quality. Prerequisite: Minimum of 3 hours Agricultural Economics or Economics at 3000 level or higher or PhD standing. (Typically offered: Spring)

AGEC 5143. Financial Management in Agriculture. 3 Hours.
Covers advanced topics in agricultural finance. The general focus of the course is the financial management of non-corporate firms. Covers the basic tools of financial analysis including financial arithmetic, asset evaluation under risk, and financial analysis and planning using econometric models. Such topics covered include management of current assets, capital budgeting, capital structure, and institutions involved in agricultural finance. Prerequisite: Graduate standing. (Typically offered: Fall)

AGEC 5153. The Economics of Public Policy. 3 Hours.
This class will examine the impact of public policy on agricultural and other business sectors as well as households and individuals, particular in rural areas. Emphasis will also be placed on analyzing the potential impact of future policy changes. The course will focus on the application of welfare criteria and economic analyses to the problems and policies affecting resource adjustments in agriculture and rural communities. Prerequisite: Graduate standing. (Typically offered: Spring)

AGEC 5203. Agribusiness Marketing Management. 3 Hours.
(Formerly AGEC 4303.) Marketing concepts will be developed and applied to the global food and fiber system. The course will use both commodity and product marketing principles and economic theory to analyze varied marketing situations. Case studies will be used to demonstrate the role that demand analysis and consumer behavior play in market management. Graduate degree credit will not be given for both AGEC 4303 and AGEC 5203. Prerequisite: AGEC 2303 and AGEC 3303. (Typically offered: Spring)

AGEC 5213. Agricultural Business Management. 3 Hours.
(Formerly AGEC 4313.) The planning, organizing, leading and controlling functions of management as they relate to agricultural business firms. Marketing of value-added products, budgeting, organizational structure, cost control, financial statements, capital budgeting and employee supervision and motivation. Case studies are used to teach communication and decision-making skills. Graduate degree credit will not be given for both AGEC 4313 and AGEC 5213. Prerequisite: (AGEC 2142 and AGEC 2141L) or (ACCT 2013 and AGEC 2303 or equivalent). (Typically offered: Fall)
AGEC 5223. International Agricultural Trade and Commercial Policy. 3 Hours. (Formerly AGEC 4623.) Analysis of agricultural market competition and performance in a global economy. The impact of domestic and international policies on domestic and international markets and welfare. Economic principles applied to interaction of economic events in the world food economy. Graduate degree credit will not be given for both AGEC 4623 and AGEC 5223. Prerequisite: AGEC 1103 or ECON 2023 and (AGEC 2103 or ECON 2013). (Typically offered: Spring)

AGEC 5233. Political Economy of Agriculture and Food. 3 Hours. (Formerly AGEC 4613.) Agricultural and food policies are studied from domestic and international perspectives. Laws, regulations, decisions and actions by governments and other institutions are examined in terms of rationale, content, and consequences. Economic and political frameworks are used to assess policies in terms of competitive structure, operation, and performance of farming and food systems. Graduate degree credit will not be given for both AGEC 4613 and AGEC 5233. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (PSYC 2003 or SOCI 2013 or HDF 2603). (Typically offered: Fall)

AGEC 5303. Agricultural Marketing Theory. 3 Hours. Survey of the structure of agricultural product and factor markets including a critique of theoretical analyses of industry structure, conduct and performance; and a review of market structure research in agricultural industries. Prerequisite: Graduate standing. (Typically offered: Fall)

AGEC 5403. Quantitative Methods for Agribusiness. 3 Hours. Application of quantitative techniques used to support managerial decision-making and resource allocation in agricultural firms. Provides exposure to mathematical and statistical tools (regression analysis, mathematical programming, simulation) used in economic analysis in agriculture. Emphasis is placed on computer applications with conceptual linkage to economic theory. Prerequisite: Graduate standing. (Typically offered: Fall)

AGEC 5413. Agribusiness Strategy. 3 Hours. Addresses problems of strategy formulation in agribusiness emphasizing current problems and cases in agriculture. Surveys modern and classic perspectives on strategy with applications to agribusiness. Examines the development of firm level strategies within the structure and competitive environment of agricultural firms and industries. Prerequisite: Graduate standing. (Typically offered: Fall)

AGEC 5603. Food Economics and Health. 3 Hours. This course provides an advanced overview of selected topics in food economics, food and nutrition policy and the interface between nutrition programs and health policy. Students will develop an understanding of economic and policy concepts of food, nutrition, and health. The course emphasizes analytical tools that can be applied to study issues in food, nutrition, and health facing the US and world populations. Prerequisite: Graduate standing. (Typically offered: Spring)

AGEC 5613. Econometrics. 3 Hours. Use of economic theory and statistical methods to estimate economic models. The single equation model is examined emphasizing multicollinearity, autocorrelation, heteroskedasticity, binary variables and distributed lags and model specification. Prerequisite: MATH 2043 and knowledge of matrix methods, (which may be acquired as a corequisite), and (AGEC 1103 or ECON 2023) and (AGEC 2403 or AGST 4023 or STAT 2303 or WCOB 1033). (Typically offered: Spring)

AGEC 5623. Quantitative Food and Agricultural Policy Analysis. 3 Hours. Introduction to applied analysis of domestic and international food and agricultural policies using quantitative tools. This course will provide hands-on experience with simulation modeling in microeconomics. An emphasis is placed on policy analysis through computer applications with theoretical underpinnings. Corequisite: Lab component. Prerequisite: (AGEC 5103 and AGEC 5403) or instructor consent. (Typically offered: Spring)

AGEC 5713. Food Safety Law. 3 Hours. This course provides students with an introduction to food law and policy, history of food regulation, the organization of federal food law and regulatory agencies, government inspection and enforcement powers, food safety standards, food labeling, food advertising and product liability. Web-based course. (Typically offered: Irregular)

AGEC 5723. Bioenergy and Resource Economics. 3 Hours. This course surveys the allocation and conservation of natural resources from a perspective of optimal use and the sustainability of resources. The development and distribution issues relating to energy, land, water, and other resource areas are addressed in the course, with emphasis placed on the bioproducts and bioenergy concerns. (Typically offered: Fall Even Years)

AGEC 5733. Bioenergy Economics and Sustainability. 3 Hours. This course will provide an understanding of the economic issues relating to overall supply chains producing bioenergy and bio-based products. The course will address the economic, sustainability and social dimensions of these industries. (Typically offered: Fall)

AGEC 600V. Master's Thesis. 1-6 Hour. Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

AGEC 700V. Doctoral Dissertation. 1-18 Hour. Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Agricultural Education (AGED) Courses

AGED 5001. Seminar. 1 Hour. Presentations and discussion of graduate student research as well as review of current literature and topics of current interest by students and faculty. All graduate students will make at least one formal presentation. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

AGED 5013. Advanced Methods in Agricultural Mechanics. 3 Hours. Emphasis on shop organization and management, courses of study, unit shop instruction, and development of skills in agricultural mechanics. (Typically offered: Summer Odd Years)

AGED 5033. Developing Leadership in Agricultural Organizations. 3 Hours. Organizational concepts of leadership; administrative styles and structures; leadership for boards, committees, governmental bodies, and review of societal and political processes. Prerequisite: Graduate standing. (Typically offered: Fall)

AGED 5053. Philosophy of Agricultural and Extension Education. 3 Hours. An examination and analysis of social and economic events leading to the establishment and maintenance of federal, state, county, and local agricultural education programs. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Spring)

AGED 510V. Special Problems. 1-6 Hour. Individual investigation of a special problem in agricultural education which is not available through regular courses. These will be directed by a member of the graduate faculty. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
AGED 5113. Undergraduate Researchers Improving Student Experiences. 3 Hours.
To engage students in the social sciences in action research that serves to solve a problem or answer a question within the student's academic field through scientific inquiry. All students will work with professionals, commonly outside of the university, within their discipline to conduct their action research in order to solve a problem experienced by that professional. Students may work in teams or individually to complete the overall purpose of the course. Prerequisite: AGED 5463 or HESC 5463 or other instructor approved Research Methods course. (Typically offered: Spring)

AGED 5143. Electronic Communications in Agriculture. 3 Hours.
(Formerly AGED 4143.) An overview of communication technology in the agricultural, food and life sciences. Graduate degree credit will not be given for both AGED 4143 and AGED 5143. (Typically offered: Spring Even Years)

AGED 5153. Survey of Leadership Theory in Agriculture. 3 Hours.
(Formerly AGED 4153.) An interdisciplinary analysis of current issues in the practice of leadership in a contemporary and changing society, particularly as they affect agricultural organizations and issues. Discussions of leadership theory, roles of leaders, skills for effective leadership, diversity issues, and followership will challenge students to think critically about leadership, enhance personal leadership performance and potential, and prepare for or expand leadership roles, and to become innovative and productive in dealing with challenges facing agricultural organizations today. Graduate degree credit will not be given for both AGED 4153 and AGED 5153. Prerequisite: AGED 3153. (Typically offered: Fall)

AGED 5163. Leadership Analysis Through Film. 3 Hours.
(Formerly AGED 4163.) Films are a catalyst (Clemens, 1999). They make you laugh, cry, cheer, and think. Flaum (2002) stated leadership is best learned in the leadership moment. Moreover, the principles of Andragogy advocate adult learners best learning when there is a practical application of the learning subject. Therefore, this course builds upon the study of leadership theory by allowing students to analyze, reflect, synthesize, and apply leadership theories, models and concepts in the context of film. The course materials encourage students to reflect, synthesize, analyze, and apply the information learned from major leadership theories and apply them to various scenarios and situations demonstrated in selected films. Graduate degree credit will not be given for both AGED 4163 and AGED 5163. (Typically offered: Spring and Summer)

AGED 520V. Special Topics in Agricultural and Extension Education. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in agriculture education. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

AGED 5243. Graphic Design in AFLS. 3 Hours.
(Formerly AGED 4243.) This course provides students with graphic design and software skills specific to industries in Agriculture, Food, and Life Sciences. Students will learn to use industry-standard software (InDesign, Photoshop, Illustrator, Microsoft Excel, etc.) to prepare text and graphics and package them for use in print production. Graduate degree credit will not be given for both AGED 4243 and AGED 5243. Prerequisite: AGME 2903 or ISYS 1123 or equivalent. (Typically offered: Fall, Spring and Summer)

AGED 5343. Communication Campaigns in Agriculture. 3 Hours.
(Formerly AGED 4343.) Students will develop understanding of the principles, practices and applications of social marketing, integrated marketing communications, advertising and public relations as they pertain to developing communication campaign strategies for the agricultural industry. Students will develop a communication campaign for an agricultural company and/or entity focused on a specific product or service. Graduate degree credit will not be given for both AGED 4343 and AGED 5343. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

AGED 5363. Educational Delivery Techniques. 3 Hours.
Students will learn to apply teaching and learning theory in the development of engaging instruction delivered through electronic media. The goal of the course is not to make experts in “programming” or “theory”, but rather to prepare students with the knowledge/practical skills necessary to deliver curriculum through various methods. Prerequisite: Graduate standing. (Typically offered: Irregular)

AGED 5443. Principles of Technological Change. 3 Hours.
(Formerly AGED 4443.) This course introduces a structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introduction, adoption, and diffusion of technological change. This course may be offered as a web-based course. Graduate degree credit will not be given for both AGED 4443 and AGED 5443. (Typically offered: Fall Odd Years)

AGED 5463. Research Methodology in the Social Sciences. 3 Hours.
Logical structure and the method of science. Basic elements of research design; observation, measurement, analytic method, interpretation, verification, presentation of results. Applications to research in economic or sociological problems of agriculture and human environmental sciences. Prerequisite: Graduate standing. (Typically offered: Fall) This course is cross-listed with HESC 5463.

AGED 5473. Interpreting Social Data in Agriculture. 3 Hours.
The development of competencies in analyzing, interpreting and reporting the results of analyses of social science data in agriculturally related professions. Students will select appropriate analysis techniques and procedures for various problems, analyze data, and interpret and report the results of statistical analyses in narrative and tabular form. (Typically offered: Fall)

AGED 5483. Technical Communication in the Social Sciences. 3 Hours.
This course will provide students with the basic principles and techniques in communicating social science information relevant to human subject research in agriculture, natural resources, and life sciences to the general public. Communication processes covered in the course include audience identification, writing, editing, and production of social science-based materials for popular and refereed publications. Focus will also be placed on thesis preparation and writing and research manuscript development and dissemination of social science research. Web delivered course. Prerequisite: Graduate standing. (Typically offered: Spring)

AGED 550V. College Teaching in Agriculture and Related Disciplines. 1-3 Hour.
For students who are pursuing graduate degrees where emphasis is on preparation for a research career, but who also may desire or expect to teach. Provides theory and practice in planning and executing a college-level course. (Typically offered: Irregular)

AGED 5543. Ag Publications. 3 Hours.
(Formerly AGED 4543.) Students produce a magazine through classroom study mirroring a professional magazine staff and are provided an opportunity for their writing, advertisements, photographs and artwork to be published in the magazine. By using computer applications, students integrate various skills including writing, editing and layout in agricultural publications. Graduate degree credit will not be given for both AGED 4543 and AGED 5543. (Typically offered: Spring Even Years)

AGED 5563. Thesis Proposal Development. 3 Hours.
The purpose of this course is to assist graduate students in the preparation of their thesis research proposal. Students will produce the first three chapters of their thesis by the end of the course. Prerequisite: AGED 5463 or HESC 5463. (Typically offered: Fall)
AGED 5632. Teaching Diverse Populations in Agricultural and Extension Education. 2 Hours.
(Formerly AGED 4632.) This course is designed to provide pre-service teachers of agriculture with an understanding of teaching diverse populations as applied to problems of practice in agricultural and extension education. Graduate degree credit will not be given for both AGED 4632 and AGED 5632. (Typically offered: Spring)

AGED 575V. Internship in Agricultural Education. 1-6 Hour.
Scheduled practical field experiences under supervision of a professional practitioner in off-campus secondary school systems. Emphasis includes classroom preparation, teaching, and student evaluation. (Typically offered: Fall, Spring and Summer)

AGED 5993. Global Horticulture and Human Nutrition to Enhance Community Resilience and Food Security. 3 Hours.
This course covers three broad areas (Global Horticulture, Sustainable International Development, Human Health and Nutrition) and experts on three campuses created the instruction. The course is intended to be multi-disciplinary, and students should use their contextual knowledge to add to weekly discussions. Prerequisite: Graduate standing. (Typically offered: Spring)

AGED 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Agricultural Mechanization (AGME)
Courses
AGME 500V. Special Problems. 1-6 Hour.
(Formerly AGME 400V.) Individual research or study in electrification, irrigation, farm power, machinery, or buildings. Graduate degree credit will not be given for both AGME 400V and AGME 500V. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

AGME 501V. Special Topics in Agricultural Mechanization. 1-4 Hour.
(Formerly AGME 402V.) Topics not covered in other courses or a more intensive study of special topics in agricultural mechanization. Graduate degree credit will not be given for both AGME 402V and AGME 501V. (Typically offered: Spring) May be repeated for degree credit.

AGME 5203. Mechanized Systems Management. 3 Hours.
(Formerly AGME 4203.) Selection, sizing, and operating principles of agricultural machinery systems, including power sources. Cost analysis and computer techniques applied to planning and management of mechanized systems. Graduate degree credit will not be given for both AGME 4203 and AGME 5203. (Typically offered: Spring) May be repeated for degree credit.

AGME 5973. Irrigation. 3 Hours.
(Formerly AGME 4973.) Methods of applying supplemental water to soils to supply moisture essential for plant growth, sources of water, measurement of irrigation water, pumps, conveyance structure, economics, and irrigation for special crops. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both AGME 4973 and AGME 5973. Corequisite: Lab component. (Typically offered: Spring)

Agricultural Statistics (AGST)
Courses
AGST 500V. Special Problems. 1-6 Hour.
Individual investigation of a special problem in some area of statistics applicable to the agricultural, food, environmental, and life sciences not available under existing courses. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGST 5014. Experimental Design. 4 Hours.
Types of experimental designs, their analysis and application to agricultural research. Lecture 3 hours and laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: ((AGST 4011 or AGST 5031 (formerly AGST 4011)) and (AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 4003). (Typically offered: Spring)

AGST 5023. Principles of Experimentation. 3 Hours.
(Formerly AGST 4023.) Fundamental concepts of experimental and statistical methods as applied to agricultural research. Lecture 3 hours per week. (Typically offered: Fall, Spring and Summer)

AGST 5031. SAS Programming for Agricultural Sciences. 1 Hour.
(Formerly AGST 4011.) An introduction to the SAS programming language with an emphasis on the reading and restructuring of data files, and the displaying of data in tabular and graphic forms. The course is taught using a hands-on approach. Graduate degree credit will not be given for both AGST 4011 and AGST 5031. (Typically offered: Fall and Spring)

AGST 504V. Special Topics. 1-4 Hour.
Topics not covered in other courses or a broader-based study of specific topics in statistics and related areas. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

AGST 5713. Applied Regression Analysis for Agricultural Sciences. 3 Hours.
Analysis of agricultural experiments which contain quantitative factors through regression procedures. Lecture 3 hours per week. Prerequisite: ((AGST 4011 or AGST 5031 (formerly AGST 4011)) and (AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 4003). (Typically offered: Fall)

Animal Science (ANSC)
Courses
ANSC 500V. Special Problems. 1-6 Hour.
Work in special problems of animal industry. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANSC 5013. Domestic Animal Energetics. 3 Hours.
Physical, physiological and biochemical aspects of energy metabolism of domestic animals and their applications to livestock production. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

ANSC 5023. Legal Issues in Animal Agriculture. 3 Hours.
(Formerly ANSC 4123.) An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation- from local to state to federal, depending on the issue- will be studied and discussed. Graduate degree credit will not be given for both ANSC 4123 and ANSC 5023. (Typically offered: Spring Odd Years)

ANSC 5052. Cow-Call Management. 2 Hours.
(Formerly ANSC 4252.) Systems of cow-call management including the practical application of the principles of breeding, feeding, and management to commercial and purebred beef cattle under Arkansas conditions. Graduate degree credit will not be given for both ANSC 4252 and ANSC 5052. (Typically offered: Fall)

ANSC 510V. Special Topics in Animal Sciences. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

ANSC 5123. Advanced Animal Genetics. 3 Hours.
Specialized study of animal genetics. Lecture 3 hours per week. Prerequisite: ANSC 3123. (Typically offered: Fall Even Years)

This course is cross-listed with POSC 5123.
ANSC 5133. Quantitative Inheritance. 3 Hours.
Advanced study of the genetic basis of variation and the genetic control of quantitative traits in populations. Lecture 3 hours per week. Prerequisite: ANSC 3133. (Typically offered: Spring Odd Years)

ANSC 5143. Biochemical Nutrition. 3 Hours.
Interrelationship of nutrition and physiological chemistry; structure and metabolism of physiological significant carbohydrates, lipids, and proteins; integration of metabolism with provision of tissue fuels; species differences in regulatory control of tissue and whole body metabolism of nutrients. Prerequisite: CHEM 3813. (Typically offered: Fall Even Years)
This course is cross-listed with POSC 5143.

ANSC 5152. Protein and Amino Acid Nutrition. 2 Hours.
Students will be introduced to the basic processes of protein digestion, amino acid absorption, transport, metabolism, and utilization along with how biochemical function of proteins and their dynamic state affect nutritional status for animals and man. Prerequisite: CHEM 3813. (Typically offered: Spring Even Years)
This course is cross-listed with POSC 5152.

ANSC 5163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring)
This course is cross-listed with POSC 5163.

ANSC 5253. Advanced Livestock Production. 3 Hours.
Comprehensive review of recent advances in research relative to the various phases of livestock production. (Typically offered: Irregular)

ANSC 5262. Swine Production. 2 Hours.
(Formerly ANSC 4262.) Methods in producing purebred and commercial swine with specific emphasis on the management programs needed for profitable pork production in Arkansas. Graduate degree credit will not be given for both ANSC 4262 and ANSC 5262. (Typically offered: Fall Even Years)

ANSC 5272. Sheep Production. 2 Hours.
(Formerly ANSC 4272.) Purebred and commercial sheep management emphasizing the programs of major importance in lamb and wool production in Arkansas. Graduate degree credit will not be given for both ANSC 4272 and ANSC 5272. (Typically offered: Spring Odd Years)

ANSC 5283. Horse Production. 3 Hours.
(Formerly ANSC 4283.) Production, use and care of horses and ponies including breeding, feeding, handling, and management. Lecture 2 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both ANSC 4283 and ANSC 5283. Corequisite: Lab component. (Typically offered: Spring)

ANSC 5452. Milk Production. 2 Hours.
(Formerly ANSC 4452.) Principles of breeding, feeding, and management of dairy cattle will be studied. Graduate degree credit will not be given for both ANSC 4452 and ANSC 5452. (Typically offered: Spring)

ANSC 5482. Companion Animal Management. 2 Hours.
(Formerly ANSC 4482.) The study and application of principles of domestication, nutrition, reproduction, parasitology, diseases, behavior, and husbandry management to companion animals. Dogs, cats, and exotic animals will be the species of primary interest. Practical problems of care and management of these species will be solved. Graduate degree credit will not be given for both ANSC 4482 and ANSC 5482. Prerequisite: BIOL 1543 or equivalent or consent of instructor. (Typically offered: Fall)

ANSC 5553. Forage-Ruminant Relations. 3 Hours.
Advanced chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake and digestion, and techniques of measuring forage utilization and systems analysis at the plant-animal interface. Lecture 3 hours per week. CSES 1203 recommended. Prerequisite: ANSC 3143. (Typically offered: Spring Odd Years)
This course is cross-listed with CSES 5553.

ANSC 5652. Stocker-Feedlot Cattle Management. 2 Hours.
(Formerly ANSC 4652.) Production and management systems for stocker and feed-lot cattle including practical applications of forage systems, feeding, health management and economics of production of these livestock. Graduate degree credit will not be given for both ANSC 4652 and ANSC 5652. (Typically offered: Spring)

ANSC 5743L. Advanced Analytical Methods in Animal Sciences Laboratory. 3 Hours.
Introduction into theory and application of current advanced analytical techniques used in animal research. Two 3-hour laboratory periods per week. (Typically offered: Fall)
This course is cross-listed with POSC 5743L.

ANSC 5853. Advanced Meats Technology. 3 Hours.
An intensive study of processed meats, relating the science, technology, and quality of further processed meat and poultry products. Product development, sensory and chemical analysis, microbiology, nutritional aspects, and product labeling are covered. Prerequisite: POSC 4314 or ANSC 3613. (Typically offered: Spring Even Years)

ANSC 5901. Seminar. 1 Hour.
Critical review of the current scientific literature pertaining to the field of animal science. Oral reports. Lecture 1 hour per week. Prerequisite: Senior standing. (Typically offered: Fall)

ANSC 5923. Brain & Behavior. 3 Hours.
Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory systems and the autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3032 or POSC 3032) or (ANSC 3042 or POSC 3042) or PSYC 2003 or BIOL 2213 or BIOL 2443 or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with POSC 5923.

ANSC 5932. Cardiovascular Physiology of Domestic Animals. 2 Hours.
Cardiovascular physiology, including mechanisms of heart function and excitation, and blood vessel mechanisms associated with the circulatory system in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3613 or ANSC 3032 and (ANSC 3042 or ANSC 3042). (Typically offered: Fall)
This course is cross-listed with POSC 5932.

ANSC 5942. Endocrine Physiology of Domestic Animals. 2 Hours.
Endocrine physiology, including mechanisms of hormone secretion, function, and regulation. Mechanisms associated with the endocrine system will be discussed for domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (or first 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (ANSC 3032 or POSC 3032) and (ANSC 3042 or ANSC 3042). (Typically offered: Fall)
This course is cross-listed with POSC 5942.
ANSC 5952. Respiratory Physiology of Domestic Animals. 2 Hours.
Respiratory physiology, including mechanisms of lung function and gas exchange. Mechanisms associated with the interaction of the respiratory system with other bodily systems in domestic animals and poultry will be discussed. Lecture 3 hours; drill 1 hour per week for first 8 weeks of semester. Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Spring)
This course is cross-listed with POSC 5952.

ANSC 5962. Gastrointestinal/Digestive Physiology of Domestic Animals. 2 Hours.
Gastrointestinal and hepatic physiology, including mechanisms of digestion, absorption of nutrients with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week for second 8 weeks of semester. Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Fall)
This course is cross-listed with POSC 5962.

ANSC 5972. Renal Physiology. 2 Hours.
Renal physiology, including mechanisms of renal clearance with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week for second 8 weeks of semester. Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Spring)
This course is cross-listed with POSC 5972.

ANSC 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

ANSC 6123. Advanced Food Animal Wellbeing. 3 Hours.
Advances in fundamentals of animal welfare including animal health, animal handling, food safety and productivity. Prerequisite: ANSC 2213 or BIOL 4833 or instructor consent. (Typically offered: Spring)
This course is cross-listed with POSC 6123.

ANSC 6143. Minerals in Animal Nutrition. 3 Hours.
Mineral nutrients, their sources and functions, as related to nutrition of domestic animals. Lecture 3 hours per week. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Fall; Spring Even Years)

ANSC 6243. Ruminant Nutrition. 3 Hours.
Anatomy and physiology of the rumen. The nutrient requirements of microbial organisms and the relation of microbial digestion in the rumen to the nutrition of cattle, sheep and other ruminants. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Fall Odd Years)

ANSC 6343. Vitamin Nutrition in Domestic Animals. 3 Hours.
The vitamins required by domestic animals with emphasis upon their role in animal nutrition, physiological functions, and consequences of failure to meet the requirement of the animal. Lecture 3 hours per week. Prerequisite: ANSC 3143 (or POSC 4343) and CHEM 3813. (Typically offered: Spring Even Years)
This course is cross-listed with POSC 6343.

ANSC 6833. Reproduction in Domestic Animals. 3 Hours.
Comprehensive review of current theory of reproductive function in domestic animals. Lecture 3 hours per week. Prerequisite: ANSC 3433. (Typically offered: Spring Even Years)

ANSC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Anthropology (ANTH)
Courses

ANTH 500V. Advanced Problems in Anthropology. 1-18 Hour.
Individual research at graduate level on clearly defined problems or problem areas. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

ANTH 5043. Advanced Vector Geographic Information Systems. 3 Hours.
Advanced vector operations and analysis. Topics will include topological analysis, network analysis, geocoding, conflation, implications of source and product map scale, map generation, error mapping, and cartographic production. Prerequisite: ((ANTH 4563 or ANTH 5563 (formerly ANTH 4563)) or ((GEOS 4583 or GEOS 5583 (formerly GEOS 4583)) or equivalent. (Typically offered: Irregular)
This course is cross-listed with GEOS 5033.

ANTH 5053. Quaternary Environments. 3 Hours.
An interdisciplinary study of the Quaternary Period including dating methods, deposits, soils, climates, tectonics, and human adaptation. Lecture 2 hours, laboratory 2 hours per week. (Typically offered: Fall)
This course is cross-listed with ENDY 5053, GEOS 5053.

ANTH 5063. Popular Culture. 3 Hours.
(Formerly ANTH 4033.) Study of national and international varieties of popular culture, including music, dance, fashion, and the media. Emphasis will be given to both ethnocultural approaches, which focus on the investigation of production and consumption of cultural forms and to cultural studies approaches, which view culture as a terrain of struggle. Graduate degree credit will not be given for both ANTH 4033 and ANTH 5063. (Typically offered: Irregular)

ANTH 5093. The Archaeology of Death. 3 Hours.
(Formerly ANTH 4093.) Study of the analysis and interpretation of archeological mortuary remains and sites. Key archeological and anthropological sources that have influenced major theoretical developments are reviewed. Graduate degree credit will not be given for both ANTH 4093 and ANTH 5093. (Typically offered: Irregular)

ANTH 5103. Applications of Cultural Method and Theory. 3 Hours.
Review of the nature and history of cultural anthropology; recent theories and practical implications and applications of various methods of acquiring, analyzing and interpreting cultural anthropological data. (Typically offered: Fall)

ANTH 5113. Anthropology of the City. 3 Hours.
Examines cities as both products of culture, and sites where culture is made and received. Explores the implications of several pivotal urban and cultural trends and the way in which representations of the city have informed dominant ideas about city space, function, and feel. (Typically offered: Irregular)

ANTH 5123. Ancient Middle East. 3 Hours.
(Formerly ANTH 4123.) The archeology of the ancient Middle East with emphasis upon the interaction of ecology, technology and social structure as it pertains to domestication and urbanization. Graduate degree credit will not be given for both ANTH 4123 and ANTH 5123. (Typically offered: Irregular)

ANTH 5133. Settlement Archaeology. 3 Hours.
(Formerly ANTH 4133.) Focuses on the historical development of settlement archeology, the methods of site survey and discovery within regions, ecological and social theories that underlie patterns of human land use and distribution, methods of site location analysis, and descriptive and predictive site location modeling. Graduate degree credit will not be given for both ANTH 4133 and ANTH 5133. (Typically offered: Irregular)

ANTH 5143. Ecological Anthropology. 3 Hours.
(Formerly ANTH 4143.) Anthropological perspectives on the study of relationships among human populations and their ecosystems. Graduate degree credit will not be given for both ANTH 4143 and ANTH 5143. (Typically offered: Irregular)
ANTH 5153. Topics in Anthropology. 3 Hours.
Graduate level seminar with varied emphasis on topics relating to cultural anthropology. (Typically offered: Irregular) May be repeated for degree credit.

ANTH 5203. Applications of Archeological Method and Theory. 3 Hours.
Review of the nature and history of archeology; recent theories and practical implications and applications of various methods of acquiring, analyzing, and interpreting archeological data. (Typically offered: Fall)

ANTH 5243. Archeology of the Midsouth. 3 Hours.
(Formerly ANTH 4243.) Survey of prehistoric and protohistoric cultures of the lower Mississippi Valley and adjacent regions. Graduate degree credit will not be given for both ANTH 4243 and ANTH 5243. (Typically offered: Irregular)

ANTH 5256. Archeological Field Session. 6 Hours.
(Formerly ANTH 4256.) Practical field and laboratory experiences in archeological research. Graduate degree credit will not be given for both ANTH 4256 and ANTH 5256. (Typically offered: Summer)

ANTH 5263. Indians of Arkansas and the South. 3 Hours.
Study of the traditional lifeways and prehistoric backgrounds of Indians living in the southern United States, including Arkansas. (Typically offered: Spring Odd Years)

ANTH 5273. Photography for Fieldwork. 3 Hours.
(Formerly ANTH 4273.) This class explores the use of photographic images as both data and representational tools in anthropological research, emphasizing the ethical, theoretical, and methodological issues involved. Graduate degree credit will not be given for both ANTH 4273 and ANTH 5273. (Typically offered: Irregular)

ANTH 5283. Survey in Ethnographic Film. 3 Hours.
(Formerly ANTH 4283.) Survey of the development and evolution of ethnographic film, based on class screenings to build familiarity, vocabulary, and literacy with this branch of visual anthropology. Graduate degree credit will not be given for both ANTH 4283 and ANTH 5283. (Typically offered: Irregular)

ANTH 5293. Identity and Culture in the U.S.-Mexico Borderlands. 3 Hours.
(Formerly ANTH 4293.) An exploration of the interplay between Latino/a, Mexican, Anglo, and Native American identities and cultures along the U.S.-Mexico border. Course examines identity formation, hybridity, social tension, marginalization, race and gender, from an anthropological perspective, paying special attention to the border as theoretical construct as well as material reality. Graduate degree credit will not be given for both ANTH 4293 and ANTH 5293. (Typically offered: Irregular)

ANTH 5303. Applications of Method and Theory in Biological Anthropology. 3 Hours.
Review of the nature and history of biological anthropology; recent theories and the practical implications and applications of various methods of acquiring, analyzing, and interpreting data. (Typically offered: Irregular)

ANTH 5313. Laboratory Methods in Archeology. 3 Hours.
(Formerly ANTH 4353.) Theory and practice of describing, analyzing, and reporting upon archeological materials. Graduate degree credit will not be given for both ANTH 4353 and ANTH 5313. (Typically offered: Irregular)

ANTH 535V. Topics in Physical Anthropology. 1-6 Hour.
Graduate level seminar with varied emphasis on topics relating to physical anthropology. (Typically offered: Irregular) May be repeated for degree credit.

ANTH 5363. Museums, Material Culture, and Popular Imagination. 3 Hours.
(Formerly ANTH 4363.) Museums as ideological sites and thus as sites of potential contestation produce cultural and moral systems that legitimate existing social orders. This course will focus on strategies of representation and the continuous process of negotiating social and cultural hierarchies with and through objects that are displayed. Graduate degree credit will not be given for both ANTH 4363 and ANTH 5363. (Typically offered: Fall)

ANTH 5413. Bioarcheology Seminar. 3 Hours.
Intensive coverage of bioarchaeological method and theory with the context of both academic and cultural resources management research. (Typically offered: Spring Odd Years)

ANTH 5423. Human Evolutionary Anatomy. 3 Hours.
Paleobiologists reconstruct past lifeways and systematic relationships of our ancestors using comparative studies of bony morphology and associated soft tissues. This course surveys methods and theories used to infer function and phylogeny, and details relevant aspects of the anatomy of humans, living great apes, and fossil human ancestors. Prerequisite: ANTH 1013 and BIOL 1543. (Typically offered: Irregular) This course is cross-listed with BIOL 5423.

ANTH 5443. Cultural Resource Management I. 3 Hours.
Concentrated discussion of management problems relative to cultural resources, including review and interpretation of relevant federal legislation, research vs. planning needs, public involvement and sponsor planning, and assessment of resources relative to scientific needs. No field training involved; discussion will deal only with administrative, legal, and scientific management problems. (Typically offered: Irregular)

ANTH 5473. Descriptive Linguistics. 3 Hours.
A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Fall) This course is cross-listed with WLLC 5463, ENGL 5463.

ANTH 548V. Individual Study of Anthropology. 1-6 Hour.
(Formerly ANTH 448V.) Reading course for advanced students with special interests in anthropology. Graduate degree credit will not be given for both ANTH 448V and ANTH 548V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANTH 5513. African Religions: Gods, Witches, Ancestors. 3 Hours.
(Formerly ANTH 4513.) An exploration of African religions from a variety of anthropological perspectives, exploring how religious experience is perceived and interpreted by adherents, highlighting the way in which individual and group identities are constructed, maintained and contested within religious contexts. Readings reflect the vast diversity of religious life in Africa. Graduate degree credit will not be given for both ANTH 4513 and ANTH 5513. (Typically offered: Irregular)

ANTH 5523. Dental Science. 3 Hours.
(Formerly ANTH 4523.) Introduction to the study of the human dentition including its anatomy, morphology, growth and development, and histology. Graduate degree credit will not be given for both ANTH 4523 and ANTH 5523. (Typically offered: Fall)

ANTH 5553. Introduction to Raster GIS. 3 Hours.
(Formerly ANTH 4553.) Theory, data structures, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Credit will not be given for both ANTH 4553 and ANTH 5553. (Typically offered: Fall)

ANTH 5563. Vector GIS. 3 Hours.
(Formerly ANTH 4563.) Introduction to geographic information systems (GIS) applications in marketing, transportation, real estate, demographics, urban and regional planning, and related areas. Lectures focus on development of principles, paralleled by workstation-based laboratory exercises using mainstream GIS software and relational databases. Credit will not be given for both ANTH 4563 and ANTH 5563. (Typically offered: Spring) This course is cross-listed with GEOG 5583.
ANTH 5583. Peoples and Cultures of Sub-Saharan Africa. 3 Hours.  
(Formerly ANTH 4583.) An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. Credit will not be given for both ANTH 4583 and ANTH 5583. (Typically offered: Fall)  

ANTH 5593. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.  
(Formerly ANTH 4593.) An introduction to navigation, georeferencing, and digital data collection using GPS and GNSS receivers, data loggers, and laser technology. Components of NavStar GLONASS, Beidou and other global positioning systems are used in integration of digital information into various GIS platforms with emphasis on practical applications. Credit will not be given for both ANTH 4593 and ANTH 5593. (Typically offered: Spring)  

This course is cross-listed with GEOS 5293.

ANTH 5603. Landscape Archaeology. 3 Hours.  
(Formerly ANTH 4603.) This course provides an introduction to the methods and theories of landscape archaeology. Topics include archaeological survey techniques, environmental and social processes recorded in the archaeological landscape, and analysis of ancient settlement and land use data to reveal changes in population, resource utilization, and environmental relationships. Credit will not be given for both ANTH 4603 and ANTH 5603. (Typically offered: Fall)  

ANTH 561V. Field Research in Archeology. 1-6 Hour.  
Directed graduate level archeological fieldwork. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.  

ANTH 5623. Primate Adaptation and Evolution. 3 Hours.  
(Formerly ANTH 4613.) Introduction to the biology of the order of Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Credit will not be given for both ANTH 4613 and ANTH 5623. (Typically offered: Spring)  

This course is cross-listed with BIOL 5613.

ANTH 5633. Archeological Prospecting & Remote Sensing. 3 Hours.  
(Formerly ANTH 4633.) Ground-based geophysical, aerial, and other remote sensing methods are examined for detecting, mapping, and understanding archeological and other deposits. These methods include magnetometry, resistivity, conductivity, radar, aerial photography, thermography, and multispectral scanning. Requires computer skills, field trips, and use of instruments. Credit will not be given for both ANTH 4633 and ANTH 5633. (Typically offered: Irregular)  

ANTH 5653. GIS Analysis and Modeling. 3 Hours.  
(Formerly ANTH 4653.) Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. Credit will not be given for both ANTH 4653 and ANTH 5653. (Typically offered: Spring)  

This course is cross-listed with GEOS 5653, ENDY 5043.

ANTH 5703. Mammalian Evolution and Osteology. 3 Hours.  
(Formerly ANTH 4703.) This course will focus on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Credit will not be given for both ANTH 4703 and ANTH 5703. Prerequisite: ANTH 1013 and ANTH 1011L, BIOL 1543 and BIOL 1541L, or instructor consent. (Typically offered: Irregular)  

This course is cross-listed with BIOL 5883.

ANTH 5803. Historical Archeology. 3 Hours.  
(Formerly ANTH 4803.) Review of the development of historical archeology and discussion of contemporary theory, methods, and substantive issues. Lab sessions on historic artifact identification and analysis. Graduate degree credit will not be given for both ANTH 4803 and ANTH 5803. (Typically offered: Irregular)  

ANTH 5813. Ethnographic Approaches to the Past. 3 Hours.  
(Formerly ANTH 4813.) Review of the uses of ethnographic data in the reconstruction and interpretation of past cultures and cultural processes, with particular emphasis on the relationships between modern theories of culture and archeological interpretation. Credit will not be given for both ANTH 4813 and ANTH 5813. (Typically offered: Irregular)  

ANTH 582V. Applied Visual Research. 1-6 Hour.  
(Formerly ANTH 482V.) This class provides hands-on skill and training conducting visually informed fieldwork designed to help represent unique cultural settings, experience, and heritage. Credit will not be given for both ANTH 482V and ANTH 582V. (Typically offered: Irregular)  

ANTH 5853. Quantitative Anthropology. 3 Hours.  
(Formerly ANTH 4863.) Introductory statistics course for anthropology students examines probability theory, nature of anthropological data, data graphics, descriptive statistics, probability distributions, test for means and variances, categorical and rank methods, ANOVA, correlation and regression. Lectures focus on theory methods; utilize anthropological data and a statistical software laboratory. Credit will not be given for both ANTH 4863 and ANTH 5853. (Typically offered: Irregular)  

This course is cross-listed with GEOS 5863.

ANTH 5903. Seminar in Anthropology. 3 Hours.  
(Formerly ANTH 4903.) Research, discussion, and projects focusing on a variety of topics. Credit will not be given for both ANTH 4903 and ANTH 5903. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.  

ANTH 5913. Topics of the Middle East. 3 Hours.  
(Formerly ANTH 4913.) Covers a special topic or issue. Credit will not be given for both ANTH 4913 and ANTH 5913. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.  

ANTH 600V. Master's Thesis. 1-6 Hour.  
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.  

ANTH 6033. Society and Environment. 3 Hours.  
This course examines the complex interrelationships between human societies and the natural environment. Drawing on diverse and interdisciplinary perspectives in archaeology, ethnography, history, geography, and palaeo-environmental studies, readings and discussion will explore the co-production of social and environmental systems over time. (Typically offered: Spring) May be repeated for degree credit. This course is cross-listed with ENDY 6033.

ANTH 610V. Internship. 1-18 Hour.  
Internship. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.  

ANTH 6183. Seminar: Cultural Anthropology. 3 Hours.  
Variable topics in Anthropology will be explored in depth. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.  

ANTH 6823. Seminar: Archeology. 3 Hours.  
Various topics in Archeology will be explored in depth. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.  

ANTH 6833. Seminar: Biological Anthropology. 3 Hours.  
Various topics in Biological Anthropology will be explored in depth. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
ANTH 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall and Spring) May be repeated for degree credit.

Apparel Merchandising and Product Development (AMPD)

Courses

AMPD 5003. Apparel Sourcing and Merchandising Systems in the Global Economy. 3 Hours.
Evaluation of key issues facing textiles and apparel supply chain businesses in the global economy considering economic, political, and social perspectives and professional implications. Lecture 3 hours. (Typically offered: Fall Odd Years)

AMPD 5023. Social, Psychological and Cultural Aspects of Dress. 3 Hours.
Integration of social, psychological and cultural theories as they apply to appearance and clothing behavior. Lecture 3 hours. (Typically offered: Fall Odd Years)

AMPD 5033. Issues and Trends in Textile Studies. 3 Hours.
Studies of advances in textile science and recent developments in the textile industry. Lecture 3 hours. (Typically offered: Spring Odd Years)

AMPD 5043. Theories and Practices in Apparel Merchandising. 3 Hours.
Theoretical perspectives, concepts and current practices that influence apparel merchandising. Lecture 3 hours. (Typically offered: Spring Even Years)

AMPD 5053. Survey Design and Scale Development. 3 Hours.
This course is designed to provide the expertise required to design and conduct survey research. Students will understand the instruments (scales/questionnaire) used in data collection processes and acquire the statistical skills necessary to develop and test these survey instruments. This course uses both theory and practice. Hands-on training will be provided via SPSS package for data analyses, and Qualtrics will be used for web-based surveys. Prerequisite: 3 hours of graduate-level statistics coursework and HESC 5463 or AGED 5463 or instructor consent. (Typically offered: Spring)

AMPD 5063. Advanced Apparel Production. 3 Hours.
(Formerly AMPD 4063.) An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Graduate degree credit will not be given for both AMPD 4063 and AMPD 5263. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 3003. (Typically offered: Fall and Spring)

AMPD 5093. Apparel Merchandise Planning and Inventory Control. 3 Hours.
(Formerly AMPD 4093.) Describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Follows the evolution of the merchandising function with emphasis on production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, store design, marketing, the apparel supply chain and manufacturing functions along the way. Graduate degree credit will not be given for both AMPD 4093 and AMPD 5293. Prerequisite: AMPD 3033. (Typically offered: Fall and Spring)

AMPD 5103. Evolution of Fashion and Society Through Television Media. 3 Hours.
(Formerly AMPD 4103.) This course uses television programming from its early beginnings in the 1930s through to the twenty-first century to trace major events, societal changes, and the associated evolution of fashion. The course examines television both as an innovator and diffuser of fashion trends. Graduate degree credit will not be given for both AMPD 4103 and AMPD 5103. (Typically offered: Fall and Spring)

AMPD 5111. History of Apparel Through Film from 1900 to Present. 1 Hour.
(Formerly AMPD 4111.) This course uses historic costume films to trace the evolution of clothing from 1900 to Present. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web based course. Graduate degree credit will not be given for both AMPD 4111 and AMPD 5311. (Typically offered: Fall and Spring)

AMPD 5211. History of Apparel Through Film to 1900. 1 Hour.
(Formerly AMPD 4011.) This course uses historic costume films to trace the evolution of clothing from ancient Egypt to the Twentieth Century. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web-based course. Graduate degree credit will not be given for both AMPD 4011 and AMPD 5211. (Typically offered: Fall and Spring)

AMPD 5223. Merchandising Application for the Apparel Industry. 3 Hours.
(Formerly AMPD 4023.) Application of merchandising theory and practices in a capstone class. An in depth study of innovative apparel business concepts as applied to manufacturers and retailers of apparel including apparel classification, seasonal cycles, stock emphasis, assortment strategies, target customers, and apparel trends. Includes an overview of marketing communication including advertising, personal selling, and sales promotion. Graduate degree credit will not be given for both AMPD 4023 and AMPD 5223. Prerequisite: AMPD 3033 and AMPD 3043. (Typically offered: Fall and Spring)

AMPD 5233L. Computer Aided Textile Design. 3 Hours.
(Formerly AMPD 4033.) This course is designed to give students advanced skills in textile design using industry based computer aided design (CAD) software. Lab 4 hours per week. Graduate degree credit will not be given for both AMPD 4033L and AMPD 5233L. Prerequisite: AMPD 2033 and AMPD 2053. (Typically offered: Fall and Spring)

AMPD 5253. Historic and Contemporary Apparel. 3 Hours.
(Formerly AMPD 4053.) This course traces the evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization and includes the study of contemporary fashion as a social force including the origin, scope, theory, and history of the fashion business, the materials of fashion, the fashion producers, auxiliary fashion enterprises, designers, fashion leaders, and leading market. Cultural and economic factors affecting dress, adornment and customs associated dress will be stressed. The Lecture 3 hours per week. Graduate degree credit will not be given for both AMPD 4053 and AMPD 5253. (Typically offered: Fall and Spring)

AMPD 5901. AMPD Pre-Study Tour. 1 Hour.
(Formerly AMPD 4901.) A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 591V AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 5901 is content specific to each AMPD 591V study tour and must be repeated for each study tour destination. A grade of "C" or better is required to participate in AMPD 591V. Graduate degree credit will not be given for both AMPD 4901 and AMPD 5901. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.
AMPD 591V. AMPD Study Tour. 2-6 Hour.
(Formerly AMPD 491V.) An on-site study of specific regional and international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will also be offered each May and August Intersession. Graduate degree credit will not be given for both AMPD 491V and AMPD 591V. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 24 hours of degree credit.

Applied Music (Class) (MUAC)

Courses
MUAC 5371. Teaching the High School Percussionist. 1 Hour.
(Formerly MUAC 4371.) A study of solo literature and small and large ensemble literature appropriate for the high school percussionist. Emphasis on advanced snare drum and marimba lit., timpani and the broad range of percussionist instruments. Includes study of high school band, orchestra and percussion ensemble scores. Graduate degree credit will not be given for both MUAC 4371 and MUAC 5371. Prerequisite: MUED 1371. (Typically offered: Irregular)

Applied Music (Private Instruction) (MUAP)

Courses
Private study at the graduate secondary level. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUAP 510V. Applied Voice/Instrument. 1-5 Hour.
Private study at the graduate level. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUAP 5201. Graduate Recital I. 1 Hour.
Preparation and performance of a public recital of a minimum of 30 minutes of music. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUAP 5211. Graduate Recital II. 1 Hour.
Preparation and performance of a public recital of a minimum of 30 minutes of music. (Typically offered: Fall and Spring) May be repeated for degree credit.

Arabic (ARAB)

Courses
ARAB 570V. Special Topics. 1-6 Hour.
(Formerly ARAB 470V.) May be offered in a topic not specifically covered by courses otherwise listed. Graduate degree credit will not be given for both ARAB 470V and ARAB 570V. (Typically offered: Irregular) May be repeated for degree credit.

Art (ARTS)

Courses
ARTS 5013. Graduate Drawing. 3 Hours.
Graduate level study of drawing materials and techniques. Prerequisite: Graduate standing. (Typically offered: Fall)

ARTS 5023. Figure Drawing II. 3 Hours.
(Formerly ARTS 4023.) Advanced study of the figure with emphasis on figure structure and its relationship to pictorial form in drawing. Graduate degree credit will not be given for both ARTS 4023 and ARTS 5023. Prerequisite: ARTS 2013. (Typically offered: Irregular)
ARTS 596V. Fine Arts Gallery Internship. 1-3 Hour. (Formerly ARTS 493V.) Study all aspects of operating the Fine Arts Gallery. Research and preparation for exhibitions, organize and install exhibits, care of art works, create and distribute publicity, arrange interviews with newspaper, and other media. Graduate degree credit will not be given for both ARTS 493V and ARTS 596V. (Typically offered: Fall, Spring and Summer)

ARTS 601V. Master of Fine Arts Exhibition. 1-6 Hour. Production and presentation of a one person exhibition of art work. The M.F.A. candidate will be responsible for making three acceptable slide sets of the exhibition and exhibition statements. Prerequisite: M.F.A. candidacy. (Typically offered: Fall, Spring and Summer)

ARTS 602V. Graduate Drawing. 1-6 Hour. Individual problems in drawing techniques. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARTS 6033. Graduate Drawing Studio. 3 Hours. Intensive studio practice in drawing combined with reading, writing, and discussion of relevant contemporary issues in the fields of painting and drawing. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 612V. Graduate Painting. 1-6 Hour. Individual problems in painting techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6133. Graduate Painting Studio. 3 Hours. Intensive studio practice in painting combined with reading, writing, and discussion of relevant contemporary issues in the field of painting and drawing. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 622V. Graduate Sculpture. 1-6 Hour. Individual problems in sculpture techniques. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARTS 6233. Graduate Sculpture Studio. 3 Hours. Intensive studio practice in sculpture combined with reading, writing, and discussion of relevant contemporary issues in the field of sculpture and new media. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 642V. Graduate Printmaking. 1-6 Hour. Individual problems in printmaking techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6433. Graduate Printmaking Studio. 3 Hours. Intensive studio practice in printmaking combined with reading, writing, and discussion of relevant contemporary issues in the field of printmaking. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

ARTS 652V. Graduate Ceramics. 1-6 Hour. Individual problems in ceramic techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6533. Graduate Ceramics Studio. 3 Hours. Discussion of contemporary ceramics issues in tandem with the development of a cohesive body of work. Students lead their own explorations, technically and conceptually, while working toward a professional standard of output. Includes regular critiques, with the class and individually with the instructor. Any ceramic processes may be used. Prerequisite: MFA Studio Art Graduate Standing. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 682V. Graduate Photography. 1-6 Hour. Individual problems in photography. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6833. Graduate Photography Studio. 3 Hours. Intensive studio practice with reading and discussion of contemporary issues in photography for MFA students. Prerequisite: Admission to MFA program in Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 695V. Special Topics. 1-6 Hour. Subject matter not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

Art Education (ARED) Courses

ARED 5953. Special Topics in Art Education. 3 Hours. (Formerly ARTS 4953.) Art education topics not included in regularly offered courses. Graduate degree credit will not be given for both ARED 4953 and ARED 5953. Pre- or Corequisite: ARED 3613. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARED 695V. Special Topics in Art Education, 1-6 Hour. Subject matter not covered in regularly offered courses, and relating to art education. May be repeated for different topics. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

Art History (ARHS) Courses

ARHS 5563. Pre-Columbian Art. 3 Hours. An introduction to pre-Columbian art from Mexico (3000 BC-1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)

ARHS 5573. Artists of New Spain. 3 Hours. An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)

ARHS 5763. Seminar in Critical Theory. 3 Hours. (Formerly ARHS 4763.) Study of critical theory as it relates to problems in modern and contemporary art. Graduate degree credit will not be given for both ARHS 4763 and ARHS 5763. Prerequisite: Nine credit hours of ARHS coursework. (Typically offered: Spring)

ARHS 5773. History of New Media Art. 3 Hours. (Formerly ARHS 4773.) Examines the history of “new media” art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Graduate degree credit will not be given for both ARHS 4773 and ARHS 5773. Prerequisite: ARHS 2923 and 3 hours of 3000 level and above art history coursework. (Typically offered: Irregular)

ARHS 5793. Making the Museum: History, Theory and Practice. 3 Hours. Presents a broad overview of the institutional history and the contemporary professional practice of the museum world. Features numerous visiting lectures from working professionals from the local area and nationwide institutions. (Typically offered: Spring Even Years)
ARHS 5813. The History of Photography. 3 Hours.  
(Formerly ARHS 4813.) Survey of photography from 1685 to present. Graduate degree credit will not be given for both ARHS 4813 and ARHS 5813. (Typically offered: Irregular)

ARHS 5823. History of Graphic Design. 3 Hours.  
(Formerly ARHS 4823.) Survey of graphic design history from 1850 to the present. Graduate degree credit will not be given for both ARHS 4823 and ARHS 5823. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5833. Ancient Art. 3 Hours.  
(Formerly ARHS 4833.) Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Graduate degree credit will not be given for both ARHS 4833 and ARHS 5833. Prerequisite: ARHS 2913. (Typically offered: Irregular)

ARHS 5843. Medieval Art. 3 Hours.  
(Formerly ARHS 4843.) Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Graduate degree credit will not be given for both ARHS 4843 and ARHS 5843. Prerequisite: ARHS 2913. (Typically offered: Irregular)

ARHS 5853. Italian Renaissance Art. 3 Hours.  
(Formerly ARHS 4853.) Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Graduate degree credit will not be given for both ARHS 4853 and ARHS 5853. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5863. Northern Renaissance Art. 3 Hours.  
(Formerly ARHS 4863.) Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Graduate degree credit will not be given for both ARHS 4863 and ARHS 5863. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5873. Baroque Art. 3 Hours.  
(Formerly ARHS 4873.) Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Graduate degree credit will not be given for both ARHS 4873 and ARHS 5873. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5883. 18th and 19th Century European Art. 3 Hours.  
(Formerly ARHS 4883.) Study of eighteenth- and nineteenth-century art and architecture in Europe. Graduate degree credit will not be given for both ARHS 4883 and ARHS 5883. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5893. 20th Century European Art. 3 Hours.  
(Formerly ARHS 4893.) Study of the major styles and movements of the century, including Cubism, Fauvism, German Expressionism, and Surrealism. Graduate degree credit will not be given for both ARHS 4893 and ARHS 5893. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5913. American Art to 1860. 3 Hours.  
(Formerly ARHS 4913.) The visual arts in the United States from Colonial times through 1860. Graduate degree credit will not be given for both ARHS 4913 and ARHS 5913. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5923. American Art 1860-1960. 3 Hours.  
(Formerly ARHS 4923.) The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Graduate degree credit will not be given for both ARHS 4923 and ARHS 5923. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5933. Contemporary Art. 3 Hours.  
(Formerly ARHS 4933.) Study of styles and major trends in the visual arts since 1960. Graduate degree credit will not be given for both ARHS 4933 and ARHS 5933. Prerequisite: ARHS 2923. (Typically offered: Fall)

ARHS 5953. Art Museum Studies. 3 Hours.  
(Formerly ARHS 4953.) A survey of the history and function of the art museum and an introduction to museum work. Investigation of collections and collections management, conservation, exhibitions, education and public programs, museum management, and contemporary issues which effect the museum profession. Graduate degree credit will not be given for both ARHS 4953 and ARHS 5953. Prerequisite: ARHS 2913 and ARHS 2923, or graduate Art MFA standing. (Typically offered: Irregular)

ARHS 5973. Seminar in Art History. 3 Hours.  
(Formerly ARHS 4973.) Special studies of periods and styles of art. Graduate degree credit will not be given for both ARHS 4973 and ARHS 5973. Prerequisite: 9 hours of Art History. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARHS 5983. Special Topics in Art History. 3 Hours.  
(Formerly ARHS 4983.) Subject matter not covered in regularly offered courses, and relating to the history of art before the nineteenth century. May be repeated for different topics. Graduate degree credit will not be given for both ARHS 4983 and ARHS 5983. Prerequisite: ARHS 2913 or ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 5993. Special Topics in Modern Art. 3 Hours.  
(Formerly ARHS 4993.) Subject matter not covered in regularly offered courses, and relating to the history of art from the nineteenth century to the present. May be repeated for different topics. Graduate degree credit will not be given for both ARHS 4993 and ARHS 5993. Prerequisite: ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 6413. Greek Art and Archaeology. 3 Hours.  
Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. (Typically offered: Spring Odd Years)

ARHS 6423. Roman Art and Archaeology. 3 Hours.  
Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. (Typically offered: Spring Even Years)

ARHS 6613. African Art and Society. 3 Hours.  
Situates the artistic production of modern Africa (1800-present) within a socio-cultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonization, and globalization) on the artistic practice. (Typically offered: Irregular)

ARHS 6623. African American Art History. 3 Hours.  
Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones". It then follows developments in African American art from the Antebellum Period to the present. (Typically offered: Irregular)

ARHS 6633. Contemporary African Art. 3 Hours.  
Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. (Typically offered: Irregular)

ARHS 6783. Special Topics in Contemporary Art. 3 Hours.  
Examines specialized topics within the field of contemporary art, with special attention to cutting-edge issues confronting artists today. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
ARHS 6933. Graduate Research In Art History. 3 Hours.
Independent study in specific areas of art history and criticism. (Typically offered: Irregular)

ARHS 6943. Seminar: Critical Thought in Art. 3 Hours.
Explore topics of concern to the studio artist involving underlying concepts and purposes of art as well as models and methods for the analysis of art. Course based on discussions of selected readings, prepared papers and seminar reports. Prerequisite: graduate standing. (Typically offered: Fall) May be repeated for up to 3 hours of degree credit.

Astronomy (ASTR)

Courses

ASTR 5033. Astrophysics I: Stars and Planetary Systems. 3 Hours.
An introduction to astrophysics covering stellar structure and evolution, the properties of the solar system, and extrasolar planetary systems. (Typically offered: Fall Odd Years)
This course is cross-listed with SPAC 5033.

ASTR 5043. Astrophysics II: Galaxies and the Large-Scale Universe. 3 Hours.
An introduction to astrophysics covering the interstellar medium, the Milky Way galaxy, extragalactic astronomy, and introduction to cosmology. Prerequisite: ASTR 5033 or SPAC 5033. (Typically offered: Spring Even Years)

ASTR 5073. Cosmology. 3 Hours.
An introduction to modern physical cosmology covering the origin, evolution, and structure of the Universe, based on the Theory of Relativity. (Typically offered: Spring Odd Years)

Athletic Training (ATTR)

Courses

ATTR 5213. Athletic Training Clinical I - Application of Injury Prevention Devices and Techniques. 3 Hours.
This course will serve as an introduction to the athletic training clinical program. Procedures and policies of the clinical program and application of athletic preventive devices will be included as well. Corequisite: ATTR 5223. Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Summer)

ATTR 5223. Athletic Training Clinical II - Emergency Procedures. 3 Hours.
This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce and instruct new emergency procedures. Corequisite: ATTR 5213. (Typically offered: Summer)

ATTR 5232. Athletic Training Clinical III - Lower Extremity Evaluation. 2 Hours.
This course will serve as a process for monitoring student's progression of athletic training proficiencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce the evaluation skills of gait, lower extremity, and spine/pelvis. Prerequisite: ATTR 5223. (Typically offered: Fall)

ATTR 5242. Athletic Training Clinical IV - Evaluation of Upper Extremity. 2 Hours.
This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce the evaluation skills of the upper extremities, head, neck, and posture. Prerequisite: ATTR 5232. (Typically offered: Spring)

ATTR 5262. Athletic Training Clinical V - Rehabilitation Lab. 2 Hours.
This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce techniques and applications of therapeutic exercise and rehabilitation. (Typically offered: Fall)

ATTR 5272. Athletic Training Clinical VI - Athletic Training Seminar. 2 Hours.
This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and serve as a capstone course validating the athletic training clinical proficiencies and prepare students for the NATABOC certification exam and future employment. Prerequisite: ATTR 5262. (Typically offered: Spring)

ATTR 5313. Clinical Anatomy for Athletic Trainers. 3 Hours.
Instruction of human anatomy for the athletic training professional using lecture, diagrams, textbook readings, and demonstrations. Focus will be placed on anatomy of structures related to athletic injuries; and can be used in the evaluation, treatment, and rehabilitation of injuries in a variety of athletic training settings. Prerequisite: Acceptance into the graduate athletic training program or instructor consent. (Typically offered: Summer)

ATTR 5363. Evaluation Techniques of Athletic Injuries - Upper Extremity. 3 Hours.
Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the upper extremities, trunk, and head. Prerequisite: Admission to graduate athletic training program. (Typically offered: Spring)

ATTR 5373. Evaluation Techniques of Athletic Injuries - Lower Extremity. 3 Hours.
Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the hip and lower extremities. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5403. Pathophysiology and Treatment I. 3 Hours.
This course will provide knowledge, skills, and values that the entry-level athletic trainer must possess to prevent, recognize, treat, advise on medications for and, when appropriate, refer general medical conditions and disabilities of physically active individuals. Prerequisite: Admission to the athletic training program. (Typically offered: Spring)

ATTR 5413. Pathophysiology and Treatment II. 3 Hours.
This course will provide knowledge, skills, and values that the entry-level athletic trainer must possess to prevent, recognize, treat, advise on medications for and, when appropriate, refer general medical conditions and disabilities of physically active individuals. Prerequisite: ATTR 5403. (Typically offered: Fall)

ATTR 5453. Therapeutic Modalities in Athletic Training. 3 Hours.
Contemporary therapeutic modalities used in managing athletic injuries. Modalities covered are classified as thermal agents, electrical agents, or mechanical agents. Emphasis is placed on their physiological effects, therapeutic indications (and contraindications), and clinical application. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5463. Therapeutic Exercise and Rehabilitation of Athletic Injuries. 3 Hours.
A systematic approach to exercise program development, techniques, indications and contraindications of exercise, and progression as related to athletic injury, prevention, and return to play guidelines. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5473. Administration in Athletic Training. 3 Hours.
Administrative components of athletic training. Basic concepts of legal liability, leadership and management principles, financial management, day to day scheduling and supervision, maintenance, and general administration. Prerequisite: Admission to graduate athletic training program. (Typically offered: Summer)

ATTR 5483. Medical Conditions in Athletic Training. 3 Hours.
This course will provide a collection of knowledge, skills, and values that the entry-level certified athletic trainer must possess to recognize, treat, and refer, when appropriate, the general medical conditions and disabilities of athletes and others involved in physical activity. Prerequisite: Admission to the graduate athletic training program or permission of instructor. (Typically offered: Fall)
Biological Engineering (BENG) Courses

BENG 4123. Biosensors & Bioinstrumentation. 3 Hours.
Principles of biologically based sensing elements and interfacing techniques. Design and analysis methods of biosensing and transducing components in bioinstrumentation. Applications of biosensors and bioinstrumentation in bioprocessing, bioenvironmental, biomechanical and biomedical engineering. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2013 or BIOL 2533 and BENG 3113. (Typically offered: Spring Odd Years)

BENG 452V. Special Topics in Biological Engineering. 1-6 Hour.
Special topics in biological engineering not covered in other courses. Prerequisite: Engineering student. (Typically offered: Irregular) May be repeated for up to 8 hours of degree credit.

BENG 500V. Advanced Topics in Biological Engineering. 1-6 Hour.
Special problems in fundamental and applied research. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

BENG 5103. Advanced Instrumentation in Biological Engineering. 3 Hours.
Applications of advanced instrumentation in biological systems. Emphasis on updated sensing and transducing technologies, data acquisition and analytical instruments. Lecture 2 hours, lab 3 hours per week. Corequisite: Lab component. Prerequisite: BENG 3113. (Typically offered: Spring Even Years)

BENG 5253. Bio-Mems. 3 Hours.
Topics include the fundamental principles of microfluidics, Navier-Stokes Equation, bio/abio interfacing technology, bio/abio hybrid integration of microfabrication technology, and various biomedical and biological problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Lecture 3 hour per week. Prerequisite: MEEG 3503 or CVEG 3213 or CHEG 2133. (Typically offered: Irregular)
This course is cross-listed with MEEG 5253.

BENG 5613. Simulation Modeling of Biological Systems. 3 Hours.
Application of computer modeling and simulation of discrete-event and continuous-time systems to solve biological and agricultural engineering problems. Philosophy and ethics of representing complex processes in simplified form. Deterministic and stochastic modeling of complex systems, algorithm development, application limits, and simulation interpretation. Emphasis on calibration, validation and testing of biological systems models for the purposes of system optimization, resource allocation, real-time control and/or conceptual understanding. Prerequisite: ((AGST 4023 or AGST 5023 (formerly AGST 4023)) or STAT 4003 or INEG 2313). (Typically offered: Irregular)

BENG 5623. Life Cycle Assessment. 3 Hours.
This course will examine the process and methodologies associated with life cycle analysis (LCA). The course will explore the quantitatively rigorous methodology for life cycle inventory (LCI), LCA and life cycle impact assessment (LCIA). This course is offered on-line. The principal instructor will be a UA faculty member. (Typically offered: Spring)

BENG 5633. Linkages Among Technology, Economics and Societal Values. 3 Hours.
Addresses how macro-level change is influenced by the linkages among technology, economics and societal values. Three major course initiatives: 1) Developing a conceptual model for understanding how macro-level change has occurred over history; 2) Examining recorded history in order to develop a contextual appreciation for Society’s current situation; and 3) Using statistical data to identify six overriding world trends that are likely to greatly impact society’s goal of achieving sustainable prosperity and well-being in the foreseeable future. Prerequisite: Graduate standing or instructor permission. (Typically offered: Fall and Spring) This course is cross-listed with OMGT 5633.

BENG 5703. Design and Analysis of Experiments for Engineering Research. 3 Hours.
Principles of planning and design of experiments for engineering research. Propagation of experimental error. Improving precision of experiments. Analysis of experimental data for optimal design and control of engineering systems using computer techniques. Students must have an introductory background in statistics. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Irregular)

BENG 5743. Biotechnology Engineering. 3 Hours.
Introduction to biotechnology topics ranging from principles of microbial growth, mass balances, bioprocess engineering as well as emerging principles in the design of biologically based microbial and enzymatic production systems. Application areas such as biofuels, and fine and bulk chemical production. Lecture 2 hours, laboratory 3 hours per week. Students may not earn credit for both BENG 5743 and BENG 4703. Prerequisite: Graduate standing. Corequisite: Lab component. (Typically offered: Fall)

BENG 5801. Graduate Seminar. 1 Hour.
Reports presented by graduate students on topics dealing with current research in biological engineering. Prerequisite: Graduate standing. (Typically offered: Spring)

BENG 5923. Nonpoint Source Pollution Control and Modeling. 3 Hours.
Control of hydrologic, meteorologic, and land use factors on nonpoint source (NPS) pollution in urban and agricultural watersheds. Discussion of water quality models to develop NPS pollution control plans and total maximum daily loads (TMDLs), with consideration of model calibration, validation, and uncertainty analysis. Prerequisite: CVEG 3223. (Typically offered: Irregular)

BENG 5933. Environmental and Ecological Risk Assessment. 3 Hours.
Process and methodologies associated with human-environmental and ecological risk assessments. Environmental risk assessments based on human receptors as endpoints, addressing predominantly abiotic processes. Ecological risk assessments based on non-human receptors as endpoints. Approach using hazard definition, effects assessment, risk estimation, and risk management. Application of methods to student projects to gain experience in defining and quantifying uncertainty associated with human perturbation, management and restoration of environmental and ecological processes. (Typically offered: Spring)

BENG 5953. Ecological Engineering Design. 3 Hours.
Design of low impact development techniques to enhance ecological services, reduce peak runoff, and capture sediments, nutrients and other pollutants resulting from urban development. Techniques may include: bio-swales, retention basins, filter strips. Design of sustainable ecological processes for the treatment and utilization of wastes/residues. Techniques may include: direct land application to soils/crops, composting systems, lagoons and constructed wetlands. Design goals include optimization of ecological services to maintain designated uses of land, water and air; including enhancement of habitat for wildlife and recreation, and the discovery of economically viable methods for co-existence of urban and agricultural land uses. Lecture 3 hours per week. (Typically offered: Fall)
BENG 5963. Modeling Environmental Biophysics. 3 Hours.
Interactions between the biosphere and the atmosphere. Connecting the physical environment of solar energy, wind, soil, and hydrology to the biosphere through plant ecophysiology. Boundary layer meteorology, photosynthesis and boundary layer modeling strategies, and the soil-plant-atmosphere continuum. Instrumentation, measurement and modeling strategies for understanding leaf-, landscape- and regional behaviors; and, the transfer, kinetics, and balance of momentum, energy, water vapor, CO2, and other atmospheric trace gases between the landscape (vegetation and soil) and the atmosphere. Applications in sustainable agriculture, irrigation, land and water resources, and modeling plant water use and carbon uptake strategies. A working knowledge of calculus and a discipline related to the course is expected. Three hours of lecture per week. Students may not earn degree credit for both BENG 4963 and BENG 5963. Prerequisite: Instructor consent. (Typically offered: Spring Odd Years)

BENG 5973. Advanced Practice in Water Quality Monitoring and Analysis. 3 Hours.
Application of water quality principles to a real world problem. Team project experience leading and developing quality assurance project plans, designing monitoring systems, selecting chemical analysis methods, estimating loads, performing trend analysis, basic model calibration and validation, team management, and technical report writing and oral presentations. Working with various clientele to analyze water quality data in the context of evaluating real-world problems and issues. Three hours of lecture per week. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

BENG 600V. Master’s Thesis. 1-6 Hour.
Graduate standing required for enrollment. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BENG 700V. Doctoral Dissertation. 1-18 Hour.
Candidacy is required for enrollment. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Biology (BIOL)

Courses
BIOL 5001. Seminar in Biology. 1 Hour.
Discussion of selected topics and review of current literature in any area of the biological sciences. (Typically offered: Fall and Spring) May be repeated for up to 2 hours of degree credit.
This course is cross-listed with CEMB 5911.

BIOL 5003L. Laboratory in Prokaryote Biology. 3 Hours.
Laboratory techniques in prokaryote culture, identification, physiology, metabolism, and genetics. Laboratory 6 hours per week. Prerequisite: BIOL 3123. (Typically offered: Fall and Spring)

BIOL 5024. Insect Diversity and Taxonomy. 4 Hours.
(Formerly BIOL 4024.) Principles and practices of insect classification and identification with emphasis on adult insects. 2.5 hours lecture, 4 hours lab. Previous knowledge of basic entomology is necessary. Graduate degree credit will not be given for both BIOL 4024 and BIOL 5024. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall) This course is cross-listed with ENTO 5024.

BIOL 5034. Wildlife Management Techniques. 4 Hours.
(Formerly BIOL 4734.) To familiarize students with techniques used in the management of wildlife populations. Students will be exposed to field methods, approaches to data analysis, experimental design, and how to write a scientific paper. Management applications will be emphasized. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4734 and BIOL 5034. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 5053. Insect Ecology. 3 Hours.
(Formerly BIOL 4053.) Teaches important ecological concepts through study of dynamic relationships among insects and their environment. Introduces literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. 2 hours lecture/2 hours lab. Graduate degree credit will not be given for both BIOL 4053 and BIOL 5053. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall Even Years)
This course is cross-listed with ENTO 5053.

BIOL 5104. Taxonomy of Flowering Plants. 4 Hours.
(Formerly BIOL 4104.) Identifying, naming, and classifying of wildflowers, weeds, trees, and other flowering plants. Emphasis is on the practical aspects of plant identification. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4104 and BIOL 5104. Corequisite: Lab component. Prerequisite: BIOL 1613 and BIOL 1611L and BIOL 2323 and BIOL 3023. (Typically offered: Spring)

BIOL 5113. Insect Behavior and Chemical Ecology. 3 Hours.
Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Spring Even Years)
This course is cross-listed with ENTO 5113.

BIOL 5122. Food Microbiology. 2 Hours.
(Formerly BIOL 4122.) The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Graduate degree credit will not be given for both BIOL 4122 and BIOL 5122. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with FDSC 5122.

BIOL 5124. Dendrology. 4 Hours.
(Formerly BIOL 4114.) Morphology, classification, geographic distribution, and ecology of woody plants. Lecture 3 hours, laboratory 3 hours per week, and fieldtrips. Graduate degree credit will not be given for both BIOL 4114 and BIOL 5124. Prerequisite: BIOL 3863. (Typically offered: Fall)

BIOL 5133. Insect Molecular Genetics. 3 Hours.
A hands on course in insect molecular genetic techniques including molecular diagnostics and population genetics. Students will learn how to apply advanced molecular genetic methodologies and Internet database resources to insects that they are using for their graduate research. (Typically offered: Spring Even Years)
This course is cross-listed with ENTO 5133.

BIOL 5143. Advanced Methods in Microscopy. 3 Hours.
Stand alone course on laboratory methods emphasizing techniques in modern microscopy. Individual research project required. Prerequisite: Graduate standing. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

BIOL 5153. Practical Programming for Biologists. 3 Hours.
Hands-on instruction in the fundamentals of biological computing. Students learn how to set up a Unix work station, work from the command line, install software, build databases, and program in Perl, a popular scripting language for biological applications. Most examples focus on the analysis of genomic data. (Typically offered: Irregular)

BIOL 5163. Dynamic Models in Biology. 3 Hours.
(Formerly BIOL 4163.) Mathematical and computational techniques for developing, executing, and analyzing dynamic models arising in the biological sciences. Both discrete and continuous time models are studied. Applications include population dynamics, cellular dynamics, and the spread of infectious diseases. Graduate degree credit will not be given for both BIOL 4163 and BIOL 5163. Prerequisite: MATH 2554. (Typically offered: Irregular)
BIOL 5174. Conservation Genetics. 4 Hours.
Covers concepts of biodiversity identification and illustrates how genetic data are generated and analyzed to conserve and restore biological diversity. Prerequisite: BIOL 3023, BIOL 3863 and STAT 2023 (or equivalent) and graduate standing. (Typically offered: Spring)

BIOL 5213. Biological Regulation and Subcellular Communication. 3 Hours.
Combines lectures, review of primary literature, student presentations, and small group discussions to explore a diversity of topics related to mechanisms of biological regulation and subcellular communication. Prerequisite: Graduate standing. (Typically offered: Irregular)

BIOL 5223. Bacterial Lifestyles. 3 Hours.
The course will introduce students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied in more detail to identify unique strategies that bacteria employ to thrive in their respective environment, whether they are causing diseases or establishing beneficial interactions with animal or plants or coexisting with other microorganisms in diverse ecological environments. The course will also cover special adaptations that bacteria have evolved to adapt to harsh environments and how these adaptations can be harnessed to control pollution. Prerequisite: (BIOL 2013 and BIOL 2011L) or BIOL 3123. (Typically offered: Spring Odd Years)

This course is cross-listed with PLPA 5123.

BIOL 5233. Genomics and Bioinformatics. 3 Hours.
Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 or BIOL 2323. (Typically offered: Spring)

BIOL 5241L. Ichthyology Laboratory. 1 Hour.
Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 5243. Corequisite: BIOL 5243. (Typically offered: Spring Odd Years)

BIOL 5243. Ichthyology. 3 Hours.
Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Corequisite: BIOL 5241L. (Typically offered: Spring Odd Years)

BIOL 5244. Comparative Physiology. 4 Hours.
(Formerly BIOL 4234.) Comparison of fundamental physiological mechanisms in various animal groups. Adaptations to environmental factors at both the organismal and cellular levels are emphasized. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4234 and BIOL 5254. Prerequisite: BIOL 2533 and CHEM 3613 and (CHEM 3611L or CHEM 3612M). (Typically offered: Fall)

BIOL 5263. Cell Physiology. 3 Hours.
In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signaling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2323, BIOL 2533, BIOL 2531L, CHEM 3613, and PHYS 2033. (Typically offered: Fall)

BIOL 5273. Endocrinology. 3 Hours.
In endocrinology we study hormonal integration of living processes at all levels from molecule to organism. We will work with the mechanisms of hormone action, the endocrine control axes and hormones physiological role. The course will include paper discussions and student presentations on topics of special interest. (Typically offered: Spring)

BIOL 5303. Plant Physiology. 3 Hours.
Introductory course in plant physiology focusing on cellular processes that support the metabolic, developmental, and reproductive needs of plants. Prerequisite: 3 hours of cell biology or biochemistry. (Typically offered: Fall)

BIOL 5313. Molecular Cell Biology. 3 Hours.
In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)

BIOL 5323. Comparative Neurobiology. 3 Hours.
Exploration of modern research approaches to understanding the development and function of animal nervous systems, with emphasis on molecular and cellular approaches in non-human animal models commonly used in biomedical research. Format combines lectures, group discussions, and student presentations using examples from the primary neurobiology literature. Prerequisite: Graduate standing. (Typically offered: Irregular)

BIOL 5343. Advanced Immunology. 3 Hours.
Aspects of innate, cell-mediated, and humoral immunity in mammalian and avian species. Molecular mechanisms underlying the function of the immune system are emphasized. A course in Basic Immunology prior to enrollment in Advanced Immunology is recommended but not required. Lecture 3 hours per week. (Typically offered: Spring)

This course is cross-listed with POSC 5343.

BIOL 5352L. Immunology in the Laboratory. 2 Hours.
Laboratory course on immune-diagnostic laboratory techniques and uses of antibodies as a research tool. Included are cell isolation and characterization procedures, immunochrometry, flow cytometry, ELISA and cell culture assay systems. Laboratory 6 hours per week. Prerequisite: POSC 5343 or BIOL 5343. (Typically offered: Spring)

This course is cross-listed with POSC 5352L.

BIOL 5353. Ecological Genetics/genomics. 3 Hours.
This course is cross-listed with POSC 5352L.
Analysis of the genetics of natural and laboratory populations with emphasis on the ecological bases of evolutionary change. Prerequisite: BIOL 2323 and BIOL 2321L, BIOL 3023 and MATH 2554 and STAT 2023 or equivalents. (Typically offered: Fall Odd Years)

BIOL 5404. Comparative Botany. 4 Hours.
A comparative approach to organisms classically considered to be plants with emphasis on morphology, life history, development, and phylogeny. Three hours lecture, 4 hours lab per week. Corequisite: Lab component. Prerequisite: Graduate standing. (Typically offered: Fall Odd Years)

BIOL 5414. Mycology. 4 Hours.
Form and function of the fungi. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Laboratory component. (Typically offered: Irregular)

BIOL 5423. Human Evolutionary Anatomy. 3 Hours.
Paleobiologists reconstruct past lifeways and systematic relationships of our ancestors using comparative studies of bony morphology and associated soft tissues. This course surveys methods and theories used to infer function and phylogeny, and details relevant aspects of the anatomy of humans, living great apes, and fossil human ancestors. Prerequisite: ANTH 1013 and BIOL 1543. (Typically offered: Irregular)

This course is cross-listed with ANTH 5423.

BIOL 5433. Principles of Evolution. 3 Hours.
Advanced survey of the mechanisms of evolutionary change with special emphasis on advances since the Modern Synthesis. Historical, theoretical, and population genetics approaches are discussed. Recommended: BIOL 3023 and BIOL 2321L and BIOL 3861. Prerequisite: BIOL 2323 and BIOL 3863. (Typically offered: Fall Even Years)

BIOL 5463. Physiological Ecology. 3 Hours.
Interactions between environment, physiology, and properties of individuals and populations on both evolutionary and ecological scales. Prerequisite: BIOL 3863 and BIOL 4234. (Typically offered: Spring Odd Years)
BIOL 5511L. Population Ecology Laboratory. 1 Hour.
Demonstration of the models and concepts from BIOL 5513. Pre- or Corequisite: BIOL 5513. (Typically offered: Fall Even Years)

BIOL 5513. Population Ecology. 3 Hours.
Survey of theoretical and applied aspects of populations processes stressing models of growth, interspecific interactions, and adaptation to physical and biotic environments. Corequisite: BIOL 5511L. Prerequisite: BIOL 3863. (Typically offered: Fall Even Years)

BIOL 5523. Plant Ecology. 3 Hours.
To develop understanding of important ecological concepts through study of dynamics relationships among plants and their environment. To become familiar with the literature of plant ecology, and interpretation and critique of ecological research. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

BIOL 5524. Developmental Biology with Laboratory. 4 Hours.
An analysis of the concepts and mechanisms of development emphasizing the experimental approach. Students may not receive degree credit for both BIOL 5543 Developmental Biology and BIOL 5524 Developmental Biology with Laboratory. Corequisite: Lab component. (Typically offered: Fall)

BIOL 5534. Biochemical Genetics. 4 Hours.
Lectures and laboratories based on modern molecular genetic techniques for analyses of eukaryotes and manipulation of prokaryotes. A hands-on course in recombinant DNA techniques: laboratory practices in gene identification, cloning, and characterization. Lecture 2 hours, laboratory 6 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2323 (or equivalent) and CHEM 3813 (or equivalent). (Typically offered: Spring)

BIOL 5543. Developmental Biology. 3 Hours.
An analysis of the principles and mechanisms of development emphasizing the embryonic and postembryonic development of animals. Degree credit will not be allowed for both BIOL 5543 and BIOL 5524. (Typically offered: Irregular)

BIOL 5553. Astrobiology. 3 Hours.
Discusses the scientific basis for the possible existence of extraterrestrial life. Includes the origin and evolution of life on Earth, possibility of life elsewhere in the solar system (including Mars), and the possibility of life on planets around other stars. Prerequisite: Instructor consent. (Typically offered: Irregular)

This course is cross-listed with SPAC 5553.

BIOL 5563. Cancer Biology. 3 Hours.
An introduction to the fundamentals of cancer biology. Prerequisite: BIOL 2533. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

BIOL 5613. Primate Adaptation and Evolution. 3 Hours.
(Formerly BIOL 4613.) Introduction to the biology of the order Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Graduate degree credit will not be given for both BIOL 4613 and BIOL 5613. Prerequisite: BIOL 3023 or ANTH 1013. (Typically offered: Spring)

This course is cross-listed with ANTH 5623.

BIOL 5634. Wetlands Ecology and Management. 4 Hours.
To familiarize students with the ecology and management of wetlands. Students will be exposed to the characteristics of wetlands, the environmental factors that produce wetland types, and the management techniques used to meet desired wetland goals. Primary lecture topics will include: wetland definition, wetlands of the world, wetland status, trends, laws, wetland hydrology, wetland soils, wetland plants, wetland plant adaptations, wetland ecosystem development, and wetland management. Lecture 2 hours, Laboratory 3 hours per week. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 5643. Eukaryote Phylogeny. 3 Hours.
Molecular analysis of the eukaryotic tree of life, phylogenetic tree reconstruction, and eukaryote diversity and evolutionary relationships. (Typically offered: Spring Odd Years)

BIOL 5693. Forest Ecology. 3 Hours.
(Formerly BIOL 4693.) Introduction to the various biological, ecological and historical aspects of forest communities, with particular emphasis on the forests of the central and southeastern United States. Graduate degree credit will not be given for both BIOL 4693 and BIOL 5693. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 5703. Mechanisms of Pathogenesis. 3 Hours.
A survey of events causing human disease at the molecular, cellular and genetic levels. Seeks to develop an appreciation that both the tricks pathogens use and the body's own defenses contribute to pathology. (Typically offered: Fall)

BIOL 5711L. Basic Immunology Laboratory. 1 Hour.
(Formerly BIOL 4711L.) Basic immunology laboratory. Graduate degree credit will not be given for both BIOL 4711L and BIOL 5711L. Corequisite: BIOL 5713. (Typically offered: Spring)

BIOL 5713. Basic Immunology. 3 Hours.
A general overview of Immunity with emphasis on the underlying cellular, molecular and genetic events controlling immune reactions. Reading of the primary literature on disease states involving the immune system. (Typically offered: Spring)

BIOL 5723. Fish Biology. 3 Hours.
Morphology, classification, life histories, population dynamics, and natural history of fishes and fish-like vertebrates. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: 12 hours of biological sciences. (Typically offered: Spring Odd Years)

BIOL 5734. Protistology. 4 Hours.
The biology of eukaryotes other than animals, land plants, and fungi with emphasis on morphology and modern approaches to phylogenetic systematics. Three hours lecture, four hours lab/week. Involves writing term papers. Corequisite: Lab component. (Typically offered: Irregular)

BIOL 5743. Herpetology. 3 Hours.
Morphology, classification and ecology of amphibians and reptiles. Lecture 2 hours, laboratory 1 hour per week. Corequisite: Lab component. (Typically offered: Spring Even Years)

BIOL 5753. General Virology. 3 Hours.
An introduction to viral life-cycles, structure, and host cell interactions. Emphasis placed on molecular and biochemical aspects of virology. Two hour lecture and one hour discussion. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Spring)

BIOL 5763. Ornithology. 3 Hours.
Taxonomy, morphology, physiology, behavior, and ecology of birds. Lecture, laboratory, and field work. Corequisite: Lab component. Prerequisite: 10 hours of biological sciences. (Typically offered: Spring Even Years)

BIOL 5774. Biometry. 4 Hours.
(Formerly BIOL 4774.) Students learn biological statistics and experimental design by actually designing experiments and analyzing data, as well as through lecture, discussion, reading, writing, and problem solving. Lecture 3 hours, laboratory 3 hours each week. Graduate degree credit will not be given for both BIOL 4774 and BIOL 5774. Corequisite: Lab component. Prerequisite: STAT 2023 or equivalent, BIOL 3863. (Typically offered: Spring Even Years)

BIOL 5783. Mammalogy. 3 Hours.
Lectures and laboratory dealing with classification, morphology, distribution, ecology, behavior, and physiology of mammals. Two hours lecture, 4 hours laboratory. Corequisite: Lab component. (Typically offered: Fall)

BIOL 5793. Introduction to Neurobiology. 3 Hours.
(Formerly BIOL 4793.) Exploration of the neurological underpinnings of perception, action, and experience including: how sense receptors convert information in the world into electricity, how information flows through the nervous systems, how neural wiring makes vision possible, how the nervous system changes with experience, and how the system develops. Graduate degree credit will not be given for both BIOL 4793 and BIOL 5793. Prerequisite: BIOL 2533. (Typically offered: Spring)
BIOL 580V. Special Topics in Biological Sciences. 1-6 Hour.
Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

BIOL 5833. Animal Behavior. 3 Hours.
Organization, regulation, and phylogeny of animal behavior, emphasizing vertebrates. Lecture, laboratory, and field work. Corequisite: Lab component. (Typically offered: Fall Odd Years)

BIOL 5843. Conservation Biology. 3 Hours.
The study of direct and indirect factors by which biodiversity is impacted by human activity. It is a synthetic field of study that incorporates principles of ecology, biogeography, population genetics, economics, sociology, anthropology, philosophy, geology, and geography. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 5844. Community Ecology. 4 Hours.
Survey of theoretical and applied aspects of community processes stressing structure, trophic dynamics, community interactions, and major community types. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Fall Odd Years)

BIOL 5863. Analysis of Animal Populations. 3 Hours.
(Formerly BIOL 4863.) Basic principles of design and analysis for population studies of fish and wildlife species. Students will be instructed in the use of the latest software for estimating population parameters. Focus will be on both concepts and applications. Management applications of estimated parameters will be emphasized. Lecture 2 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4863 and BIOL 5863. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

BIOL 5873. Microbial Molecular Genetics and Informatics. 3 Hours.
Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: Graduate status. (Typically offered: Fall)

BIOL 5883. Mammalian Evolution and Osteology. 3 Hours.
Focuses on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Credit will not be given for both ANTH 4703 and ANTH 5703. Prerequisite: Instructor consent. (Typically offered: Fall Even Years)

BIOL 5914. Stream Ecology. 4 Hours.
Current concepts and research in lotic ecosystem dynamics. Lecture, laboratory, field work and individual research projects required. Corequisite: Lab component. Prerequisite: 3 hours of ecology-related coursework. (Typically offered: Fall Even Years)

BIOL 5933. Global Biogeochemistry: Elemental Cycles and Environmental Change. 3 Hours.
This course explores the chemical, biological, and geological processes occurring within ecosystems. An understanding of these processes is used to investigate how they form the global biogeochemical cycles that provide energy and nutrients necessary for life. Class discussions focus on global change and the effects of more recent anthropogenic influences. Prerequisite: 3 hours of chemistry or biochemistry and ecology. (Typically offered: Spring Odd Years)

BIOL 596V. Culture and Environment: Field Studies. 1-6 Hour.
(Formerly BIOL 496V.) May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. Graduate degree credit will not be given for both BIOL 496V and BIOL 596V. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

BIOL 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BIOL 6113. Insect Physiology. 3 Hours.
General and comparative physiology of insects. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Spring Even Years)
This course is cross-listed with ENTO 6113.

BIOL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Biomedical Engineering (BMEG) Courses

BMEG 5103. Design and Analysis of Experiments in Biomedical Research. 3 Hours.
An advanced course covering sample size estimation with power calculations, protection of vertebrate animals and human subjects, factorial design, multivariate analysis of variance, parametric and non-parametrics data analysis, Kaplan-meier analysis, and post-test correction of multiple comparisons as related to biomedical data. Prerequisite: MATH 2584 and BMEG 3653 or equivalents. (Typically offered: Irregular)

BMEG 5203. Mathematical Modeling of Physiological Systems. 3 Hours.
Application of numerical methods and mathematical techniques to physiological systems. Cellular physiology topics include models of cellular metabolism, diffusion, membrane potential, excitability, calcium dynamics and intercellular signalling. Cardiovascular system topics include models of blood cells, oxygen transport, cardiac output, cardiac regulation, and circulation. Other physiology topics include respiration, muscle, vision, hearing, voice, and speech. Prerequisite: MATH 2584 or BMEG 3653 or BMEG 4623 or equivalents. (Typically offered: Irregular)

BMEG 5213. Tissue Mechanics. 3 Hours.
The purpose of this course is to introduce students to non-linear biomechanics of soft tissues such as skin, bladder, blood vessels, and the brain. Topics covered: Tissue mechanics: continuum biomechanics, tensor analysis, kinematics of continua, balance laws. Governing physics of mechanics as applied to soft tissues. Various constitutive relations will be discussed: linear elastic, hyperelastic, viscoelastic, poreelastic, and inelastic materials with internal variables. Cannot receive credit for both BMEG 4213 and BMEG 5213. Prerequisite: BMEG 2813 and BMEG 4623 or equivalents. (Typically offered: Irregular)

BMEG 5313. Advanced Biomaterials and Biocompatibility. 3 Hours.
From Absorbable sutures to Zirconium alloy hip implants, biomaterials science influences nearly every aspect of medicine. This course focuses on the study of different classes of biomaterials and their interactions with human tissues. Prerequisite: BMEG 3634 and BMEG 4623 or equivalents. (Typically offered: Irregular)

BMEG 5413. Tissue Engineering. 3 Hours.
This course introduces Tissue Engineering approaches at genetic and molecular, cellular, tissue, and organ levels. Topics include cell and tissue in-vitro expansion, tissue organization, signaling molecules, stem cell and stem cell differentiation, organ regeneration, biomaterial and matrix for tissue engineering, bioreactor design for cell and tissue culture, dynamic and transportation in cell and tissue cultures, clinical implementation of tissue engineered products, and tissue-engineered devices. Students may not earn credit for both BMEG 5413 and BMEG 4413. Corequisite: Lab component. Prerequisite: BIOL 2533 and BMEG 3824. (Typically offered: Irregular)
BMEG 4523. Regenerative Medicine. 3 Hours.
The course covers five broad areas: Biological and molecular basis for regenerative medicine, tissue development, regenerative medicine and innovative technologies, clinical applications of regenerative medicine, and regulation and ethics. Prerequisite: BIOL 2533 and BMEG 3824 or equivalents. (Typically offered: Irregular)

BMEG 5513. Biomedical Optics and Imaging. 3 Hours.
This course will provide students with a fundamental understanding of various biomedical imaging modalities. Topics will include: Basics of light-tissue interaction - absorption, fluorescence, elastic and inelastic scattering; Computational and analytical models of light propagation to quantify tissue optical properties; Optical imaging techniques - spectroscopy, tomography, and laser speckle with potential clinical applications; and Clinical imaging modalities and recent advances - X-ray, Magnetic Resonance Imaging (MRI), Positron Emission Tomography (PET), Computed Tomography (CT), Ultrasound imaging, and Photoacoustic imaging. At the end of this course, students should have a good understanding of optical imaging, spectroscopy, and non-optical imaging modalities, specific anatomical sites that they are best suited for, and the trade-offs between imaging depth and resolution. Students may not receive credit for both BMEG 4513 and BMEG 5513. (Typically offered: Irregular)

BMEG 5523. Biomedical Data and Image Analysis. 3 Hours.
This course focuses on an introduction to image processing and analysis for applications in biomedical research. After a review of basic MATLAB usage, students will learn fundamental tools for processing and analyzing data from a variety of subdisciplines within biomedical engineering. Topics include: filtering, thresholding, segmentation, morphological processing, and image registration. Through exercises involving 1D, 2D, and 3D data, students will develop problem-solving skills and a knowledge base in MATLAB required for customized quantitative data analysis. Students may not receive credit for both BMEG 4523 and BMEG 5523. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 560V. Advanced Individual Study. 1-6 Hour.
Individual study and research of a topic mutually agreeable to the student and faculty member. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 570V. Advanced Special Topics. 1-6 Hour.
Consideration of current biomedical engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit.

BMEG 5713. Cardiovascular Physiology and Devices. 3 Hours.
Understanding etiology of disease while creating solutions and dedicated devices is the primary focus of biomedical engineering. This course describes an interdisciplinary approach of the clinical and engineering worlds to develop devices for treating cardiovascular disease. The first part of the course will be a thorough review of the relevant anatomic and physiological considerations important for developing devices. Understanding these considerations from an engineering perspective to inform device development will be the second part of the course. Students may not receive credit for both BMEG 4713 and BMEG 5713. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 5800. Graduate Seminar I. 0 Hours.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research. Prerequisite: BMEG 5801. (Typically offered: Fall) May be repeated for up to 0 hours of degree credit.

BMEG 5801. Graduate Seminar I. 1 Hour.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research. (Typically offered: Fall)

BMEG 5810. Graduate Seminar II. 0 Hours.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property. Prerequisite: BMEG 5811. (Typically offered: Spring) May be repeated for up to 0 hours of degree credit.

BMEG 5811. Graduate Seminar II. 1 Hour.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property. (Typically offered: Spring)

BMEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.
The course will cover the concepts of linear-elastic, elastic-plastic and time-dependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. (Typically offered: Fall and Spring) This course is cross-listed with MEEG 5953, CVEG 5953.

BMEG 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

BMEG 700V. Doctoral Dissertation. 1-6 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

Career and Technical Education (CATE)

Courses
CATE 5003. Introduction to Professionalism. 3 Hours.
This course examines the principles and concepts of professionalism in the teaching profession, with an emphasis on developing professional concepts in the profession. Added emphasis is on career and technical education organizations. Prerequisite: Admission to the CATE teacher education program. (Typically offered: Fall)

CATE 5013. Teaching Strategies. 3 Hours.
This course is designed to offer a variety of ideas and experiences concerning methods of teaching, planning and presenting instruction. (Typically offered: Fall)

CATE 5016. Cohort Teaching Internship. 6 Hours.
A minimum of 12 weeks will be spent in an off-campus school, at which time the intern will have an opportunity under supervision to observe, to teach, and to participate in other activities involving the school and the community. Prerequisite: Admission to the College of Education and Health Professions Teacher Education and CATE Master's program. (Typically offered: Spring)

CATE 5023. Classroom Management. 3 Hours.
(Formerly CATE 4023.) Theory and techniques in classroom management, including professional ethics and school policies related to students, faculty and programs. Graduate degree credit will not be given for both CATE 4023 and CATE 5023. Prerequisite: CATE 3103. (Typically offered: Fall)

CATE 5033. Assessment/Program Evaluation. 3 Hours.
An introduction to constructing, evaluating, and interpreting tests; descriptive and inferential statistics; state competency testing; and guidelines for state program evaluations. Prerequisite: Graduate standing. (Typically offered: Fall)
CHEG 5013. Membrane Separation and System Design. 3 Hours.
Theory and system design of cross flow membrane process--reverse osmosis, nanofiltration, ultrafiltration, and microfiltration--and applications for pollution control, water treatment, food and pharmaceutical processing. (Typically offered: Fall)
CHEG 5033. Technical Administration. 3 Hours.
Contemporary issues affecting the domestic and global Chemical Process Industries (CPI). Emphasis is on process economics, market and corporate strategy as well as advances in technology to improve corporate earnings while addressing the threats and opportunities in the CPI. Prerequisite: Senior or graduate standing. (Typically offered: Irregular)
CHEG 5043. Colloid and Interface Science. 3 Hours.
This course aims to provide essential knowledge about surface, interface, and molecular self-organization. At the end of this course students should understand (i) basic concepts to describe phenomena at surfaces, (ii) molecular self-organization, and (iii) basic techniques for characterization of surfaces and interfaces. (Typically offered: Spring Odd Years)
CHEG 5113. Transport Processes I. 3 Hours.
Fundamental concepts and laws governing the transfer of momentum, mass, and heat. (Typically offered: Fall)
CHEG 5133. Advanced Reactor Design. 3 Hours.
Applied reaction kinetics with emphasis on the design of heterogeneous reacting systems including solid surface catalysis, enzyme catalysis, and transport phenomena effects. Various types of industrial reactors, such as packed bed, fluidized beds, and other non-ideal flow systems are considered. (Typically offered: Spring)
CHEG 5213. Advanced Chemical Engineering Calculations. 3 Hours.
Developments of and solutions of equations and mathematical models of chemical processes and mechanisms. (Typically offered: Regular)
CHEG 5273. Corrosion Control. 3 Hours.
Qualitative and quantitative introduction to corrosion and its control. Application of the fundamentals of corrosion control in the process industries is emphasized. (Typically offered: Spring)
CHEG 5333. Advanced Thermodynamics. 3 Hours.
Methods of statistical thermodynamics, the correlation of classical and statistical thermodynamics, and the theory of thermodynamics of continuous systems (non-equilibrium thermodynamics). (Typically offered: Fall)
CHEG 5353. Advanced Separations. 3 Hours.
Phase equilibrium in non-ideal and multicomponent systems, digital and other methods of computation are included to cover the fundamentals of distillation, absorption, and extraction. (Typically offered: Irregular)

CHEG 5443. Chemical Engineering Design II. 3 Hours.
A capstone design class designed for graduate students who do not have an engineering degree. Responsibility for decision making is placed on the students in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Students may not receive credit for both CHEG 4443 and CHEG 5443. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CHEG 5513. Biochemical Engineering Fundamentals. 3 Hours.
An introduction to bioprocessing with an emphasis on modern biochemical engineering techniques and biotechnology. Topics include: basic metabolism (procaryote and eucaryote), biochemical pathways, enzyme kinetics (including immobilized processes), separation processes (e.g. chromatography) and recombinant DNA methods. Material is covered within the context of mathematical descriptions (calculus, linear algebra) of biochemical phenomenon. (Typically offered: Spring Even Years)

CHEG 5733. Polymer Theory and Practice. 3 Hours.
Theories and methods for converting monomers into polymers are presented. Topics include principles of polymer science, commercial processes, rheology, and fabrication. (Typically offered: Fall Odd Years)

CHEG 5801. Graduate Seminar. 1 Hour.
Oral presentations are given by master's candidates on a variety of chemical engineering subjects with special emphasis on new developments. Prerequisite: Graduate standing. (Typically offered: Fall and Summer) May be repeated for up to 6 hours of degree credit.

CHEG 588V. Special Problems. 1-6 Hour.
Opportunity for individual study of an advanced chemical engineering problem not sufficiently comprehensive to be a thesis. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CHEG 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall and Summer) May be repeated for degree credit.

CHEG 6123. Transport Processes II. 3 Hours.
Continuation of CHEG 5113. Prerequisite: CHEG 5113. (Typically offered: Spring)

CHEG 6203. Preparation of Research Proposals. 3 Hours.
This course will cover technical communication in both written and oral presentation. Prerequisite: Instructor consent. (Typically offered: Irregular)

CHEG 6801. Graduate Seminar. 1 Hour.
Oral presentations are given by doctoral students on a variety of chemical engineering subjects with special emphasis on new developments. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CHEG 688V. Special Topics in Chemical Engineering. 1-3 Hour.
Advanced study of current Chemical Engineering topics not covered in other courses. Prerequisite: Doctoral students only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CHEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

### Chemistry and Biochemistry (CHEM)

#### Courses

CHEM 505V. Special Topics in Chemistry. 1-4 Hour.
(Formerly CHEM 405V.) Potential topics include: advanced spectroscopic methods, bioanalytical chemistry, bioorganic chemistry, biogas-organic chemistry, biophysical chemistry, chemical sensors, drug discovery and design, nanomaterials, pharmaceutical chemistry, process analytical chemistry, and protein folding and design. Graduate degree credit will not be given for both CHEM 405V and CHEM 505V. Prerequisite: Instructor consent. (Typically offered: Irregular)

CHEM 5101. Introduction to Research. 1 Hour.
This eight week course introduces new graduate students to research opportunities and skills in chemistry and biochemistry. Meets 2 hours per week in the first half of the semester. Safety and ethics in research and scholarship are discussed. Students learn about research programs in the department to aid in choosing an advisor. (Typically offered: Fall)

CHEM 5123. Advanced Inorganic Chemistry. 3 Hours.
Reactions and properties of inorganic compounds from the standpoint of electronic structure and the periodic table. Emphasis on recent developments. Knowledge comparable to material in CHEM 3453 is recommended. (Typically offered: Fall)

CHEM 5143. Advanced Inorganic Chemistry II. 3 Hours.
Chemistry of metallic and non-metallic elements emphasizing molecular structure, bonding and the classification of reactions. Knowledge of inorganic chemistry comparable to material in CHEM 4123 and CHEM 5123 is recommended. (Typically offered: Irregular)

CHEM 5153. Structural Chemistry. 3 Hours.
Determination of molecular structure by diffraction, spectroscopic, and other techniques. Illustrative examples will be chosen from inorganic chemistry and biochemistry. (Typically offered: Irregular)

CHEM 5213. Instrumental Analysis. 3 Hours.
Provides students, especially those in the physical, agricultural, and biological sciences, with an understanding of the theory and practice of modern instrumental techniques of analysis. Lecture 3 hours per week. Knowledge comparable to material in CHEM 2263 and CHEM 3603 is recommended. (Typically offered: Spring)

CHEM 5223. Chemical Instrumentation. 3 Hours.
Use and application of operational amplifiers to chemical instrumentation; digital electronic microprocessor interfacing; software development and real-time data acquisition. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended. (Typically offered: Spring Odd Years)

CHEM 5233. Chemical Separations. 3 Hours.
Modern separation methods including liquid chromatography (adsorption, liquid-liquid partition, ion exchange, exclusion) and gas chromatography. Theory and instrumentation is discussed with emphasis on practical aspects of separation science. Prerequisite: CHEM 4213. (Typically offered: Fall Even Years)

CHEM 5243. Electrochemical Methods of Analysis. 3 Hours.
Topics will include diffusion, electron transfer kinetics, and reversible and irreversible electrode processes followed by a discussion of chronooamperometry, chronocoulometry, polarography, voltammetry, and chronopotentiometry. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended. (Typically offered: Spring Even Years)
CHEM 5253. Spectrochemical Methods of Analysis. 3 Hours.
Principles and methods of modern spectroscopic analysis. Optics and instrumentation necessary for spectroscopy is also discussed. Topics include atomic and molecular absorption and emission techniques in the ultraviolet, visible, and infrared spectral regions. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended. (Typically offered: Fall Odd Years)

CHEM 5263. Nuclear Chemistry. 3 Hours.
Nuclear structure and properties, natural and artificial radioactivity, radioactive decay processes, nuclear reaction and interactions of radiation with matter. Prerequisite: CHEM 3514. (Typically offered: Fall Odd Years)

CHEM 5273. Cosmochemistry. 3 Hours.
Laws of distribution of the chemical elements in nature, cosmic and terrestrial abundance of elements; origin and age of the earth, solar system, and the universe. Prerequisite: CHEM 3514. (Typically offered: Spring Odd Years)

CHEM 5283. Energy Conversion and Storage. 3 Hours.
Fundamental and applied concepts of energy storage and conversion with sustainability implications. Chemical reactions (kinetics, thermodynamics, mass transfer), emphasizing oxidation-reduction, electrochemical, and interfacial processes, and impact on performance of fuel and biofuel cells, batteries, supercapacitors, and photochemical conversion. (Typically offered: Fall Even Years)

CHEM 5383. Chemometrics. 3 Hours.
Chemometrics is the process of extracting relevant information from chemical data by mathematical and statistical tools. These tools allow for designing optimal experimental procedures, extracting important information from complex chemical systems, and better understanding of complex chemical systems. (Typically offered: Spring Even Years)

CHEM 5443. Physical Chemistry of Materials. 3 Hours.
Physical and chemical characteristics of materials and discussion of the science behind materials engineering and performance. Topics include theory, principles of characterization methods, modeling, and applications in the context of materials. Knowledge comparable to material in CHEM 3514 and CHEM 3504 or CHEM 3453 or CHEG 3713 or MEEG 2403 is recommended. (Typically offered: Irregular)

CHEM 5453. Quantum Chemistry I. 3 Hours.
Fundamental quantum theory: Hamiltonian formalism in classical mechanics, Schrödinger equation, operators, angular momentum, harmonic oscillator, barrier problems, rigid rotor, hydrogen atom, and interaction of matter with radiation. Knowledge of physical chemistry comparable to material in CHEM 3504 is recommended. (Typically offered: Spring Odd Years)

CHEM 5473. Chemical Kinetics. 3 Hours.
Theory and applications of the principles of kinetics to reactions between substances, both in the gaseous state and in solution. Knowledge of physical chemistry comparable to material in CHEM 3514 is recommended. (Typically offered: Spring)

CHEM 5513. Biochemical Evolution. 3 Hours.
Abiogenic synthesis of biomolecules on Earth, the origin of cells, genetic information, origin of life on Earth and elsewhere, evolution and diversification, ecological niches, bacteria, archaea, eukaryotes, novel metabolic reshaping of the environment, life being reshaped by the environment, molecular data and evolution. Prerequisite: CHEM 5913. (Typically offered: Spring Even Years)

CHEM 5573. Statistical Thermodynamics. 3 Hours.
Covers fundamentals in thermodynamics, molecular dynamics, Monte Carlo, phase transitions, behavior of gases and liquids and basic concepts in chemical kinetics and physical kinetics. Knowledge comparable to physical chemistry materials in CHEM 3514 is recommended. (Typically offered: Irregular)

CHEM 5603. Physical Organic Chemistry. 3 Hours.
Introduction to the theoretical interpretation of reactivity, reaction mechanisms, and molecular structure of organic compounds. Application of theories of electronic structure; emphasis on recent developments. Knowledge of material comparable to CHEM 3613, CHEM 3613H, CHEM 3713 and CHEM 3514 is recommended. (Typically offered: Fall)

CHEM 5633. Organic Reactions. 3 Hours.
The more important types of organic reactions and their applications to various classes of compounds. Knowledge of organic chemistry comparable to material in CHEM 3603 is recommended. (Typically offered: Irregular)

CHEM 5723. Experimental Methods in Organic Chemistry. 3 Hours.
Introduction to the application of synthetic and spectroscopic methods in organic chemistry, including mass spectrometry, infrared spectroscopy, and nuclear magnetic resonance spectrometry. Lecture 3 hours per week. Knowledge comparable to material in CHEM 3613 is recommended. (Typically offered: Fall)

CHEM 5753. Methods of Organic Analysis. 3 Hours.
Interpretation of physical measurements of organic compounds in terms of molecular structure. Emphasis on spectroscopic methods (infrared, ultraviolet, magnet resonance, and mass spectrometry). Knowledge of organic chemistry comparable to material in CHEM 3603 is recommended. (Typically offered: Fall)

CHEM 5813. Biochemistry I. 3 Hours.
The first of a two-course series covering biochemistry for graduate students in biology, agriculture, and chemistry. Topics covered include protein structure and function, enzyme kinetics, enzyme mechanisms, and nucleic acid and carbohydrate structures. Knowledge of organic chemistry comparable to material in CHEM 3613 is recommended. (Typically offered: Fall)

CHEM 5843. Biochemistry II. 3 Hours.
A continuation of CHEM 5813 covering topics including biological membranes and bioenergetics, photosynthesis, lipids and lipid metabolism, nucleic acid and amino acid metabolism, and molecular biology. Knowledge of organic chemistry comparable to material in CHEM 3613 is recommended. (Typically offered: Spring)

CHEM 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Chemistry graduate students enroll in this course as needed until all CUMES are passed and the student is officially a doctoral candidate. Prerequisite: Chemistry graduate student. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CHEM 6011. Chemistry Seminar. 1 Hour.
Weekly discussion of current chemical research. Departmental and divisional seminars in analytical chemistry, biochemistry, inorganic, organic, and physical chemistry are held weekly. Seminar credit does not count toward the minimum hourly requirements for any chemistry graduate degree. (Typically offered: Fall and Spring) May be repeated for degree credit.

CHEM 619V. Special Topics in Inorganic Chemistry. 1-3 Hour.
Topics which have been covered in the past include: technique and theory of x-ray diffraction, electronic structure of transition metal complexes, inorganic reaction mechanisms, and physical methods in inorganic chemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 6283. Mass Spectrometry. 3 Hours.
This course is devoted to the fundamental principles and applications of analytical mass spectrometry. Interactions of ions with magnetic and electric fields and the implications with respect to mass spectrometer design are considered, as are the various types of mass spectrometer sources. Representative applications of mass spectrometry in chemical analysis are also discussed. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)
CHEM 629V. Special Topics in Analytical Chemistry. 1-3 Hour.
Topics that have been presented in the past include: electroanalytical techniques, kinetics of crystal growth, studies of electrode processes, lasers in chemical analysis, nucleosynthesis and isotopic properties of meteorites, thermoluminescence of geological materials, early solar system chemistry and analytical cosmochemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 649V. Special Topics in Physical Chemistry. 1-3 Hour.
Topics which have been covered in the past include advanced kinetics, solution chemistry, molecular spectra, nuclear magnetic resonance spectroscopy, and methods of theoretical chemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 6633. Chemistry of Organic Natural Products. 3 Hours.
Selected topics concerned with structure elucidation and synthesis of such compounds as alkaloids, antibiotics, bacterial metabolites, plant pigments, steroids, terpenoids, etc. Prerequisite: CHEM 5603 and CHEM 5633. (Typically offered: Irregular)

CHEM 6643. Organometallic Chemistry. 3 Hours.
Theories and principles of organometallic chemistry. Concepts include bonding, stereochemistry, structure and reactivity, stereochemical principles, conformational, steric and stereoelectronic effects. Transition metal catalysis of organic reactions will also be described. Knowledge of material comparable to CHEM 3713 and CHEM 3514 is recommended. (Typically offered: Irregular)

CHEM 6673. Organic Reaction Mechanisms. 3 Hours.
A detailed description of the fundamental reactions and mechanisms of organic chemistry. Prerequisite: CHEM 5633. (Typically offered: Irregular)

CHEM 669V. Special Topics in Organic Chemistry. 1-3 Hour.
Topics which have been presented in the past include heterogeneous catalysis, isotope effect studies of organic reaction mechanisms, organometallic chemistry, stereochemistry, photochemistry, and carbanion chemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 6823. Physical Biochemistry. 3 Hours.
Physical chemistry of proteins, nucleic acids, and biological membranes. Ultracentrifugation, absorption and fluorescent spectrophotometry, nuclear magnetic resonance spectroscopy, x-ray diffraction, and other techniques. Prerequisite: CHEM 5813. (Typically offered: Fall Even Years)

CHEM 6863. Enzymes. 3 Hours.
Isolation, characterization, and general chemical and biochemical properties of enzymes. Kinetics, mechanisms, and control of enzyme reactions. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Fall Odd Years)

CHEM 6873. Molecular Biochemistry. 3 Hours.
Nucleic acid chemistry in vitro and in vivo, synthesis of DNA and RNA, genetic diseases, cancer biochemistry and genetic engineering. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Spring Odd Years)

CHEM 6883. Bioenergetics and Biomembranes. 3 Hours.
Cellular energy metabolism, photosynthesis, membrane transport, properties of membrane proteins, and the application of thermodynamics to biological systems. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Spring Even Years)

CHEM 700V. Doctoral Dissertation. 1-12 Hour.
Doctoral Dissertation. For chemistry graduate students who have passed all CUMES and have officially been admitted to doctoral candidacy. Prerequisite: Chemistry graduate student. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Civil Engineering (CVEG) Courses

CVEG 5000. Graduate Seminar in Civil Engineering. 0 Hours.
A weekly seminar devoted to civil engineering research topics. Appropriate grade to be "S". (Typically offered: Fall and Spring)

CVEG 5103. Geosynthetic Applications in Civil Engineering. 3 Hours.
CVEG 5103 - Geosynthetic Applications in Civil Engineering: The functional properties of various geosynthetic materials are defined as they relate to; reinforcement, separation, filtration, and drainage applications. Design procedures are developed for the use of geosynthetics in transportation, environmental and geotechnical applications. Prerequisite: CVEG 3132 and CVEG 3131L or equivalent. (Typically offered: Irregular)

CVEG 5113. Soil Dynamics. 3 Hours.
This course covers propagation of stress waves in elastic and inelastic materials, dynamic loading of soils, and stiffness and damping properties of soils. Use of field and laboratory techniques to determine shear wave velocity of soils. Also includes applications of dynamic soil properties in site stiffness characterization, geotechnical earthquake engineering, evaluation of ground improvement, and design of machine foundations. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5123. Measurement of Soil Properties. 3 Hours.
Consideration of basic principles involved in measuring properties of soils. Detailed analysis of standard and specialized soil testing procedures and equipment. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5133. Geotechnical Site Characterization. 3 Hours.
One of primary tasks of geotechnical engineers is to perform in-situ site characterization for engineering design of foundations, retaining structures, roads, bridges and other infrastructure. This course will focus on in-situ investigations performed for the purpose of collecting detailed site characterization data for direct and/or indirect use in geotechnical design. Specifically, we will study various static (e.g., SPT, CPT, VST, DMT, PMT) and dynamic (e.g., CHT, DHT, SW, GPR) in-situ tests used to obtain estimates of stratigraphy, density, strength, stress history, modulus, and permeability of geotechnical materials. We will predominantly focus on site characterization of soil sites, but will mention rock testing and design methods when appropriate. Prerequisite: CVEG 4143 or the equivalent. (Typically offered: Irregular)

CVEG 5143. Transportation Soils Engineering. 3 Hours.
Advanced study of the properties of surficial soils; soil classification systems; pedology; soil occurrence and variability; subgrade evaluation procedures; repeated load behavior of soils; soil compaction and field control; soil stabilization; soil trafficability and subgrade stability for transportation facilities. Prerequisite: CVEG 3132. (Typically offered: Irregular)

CVEG 5153. Earth Retaining Structures. 3 Hours.
This course will focus on the analysis and design of earth retaining structures. Specifically, we will discuss soil and rock property design parameter selection, lateral earth pressures for wall system design, and load and resistance factor design (LRFD) for retaining walls. Wall types discussed include gravity and semi-gravity walls, modular gravity walls, MSE walls, nongravity cantilever walls and anchored walls, and in-situ reinforced walls. Information on wall system feasibility and selection, construction materials and methods, cost information, and design and performance information will be discussed. Prerequisite: CVEG 4143 or equivalent. (Typically offered: Irregular)
CVEG 5163. Seepage and Consolidation. 3 Hours.
Investigation of the flow of water through soils and the time rate of compression of soils. Characterization of the hydraulic conductivity of soils in the field, seepage through earth dams, excavation cut-off walls, and other seepage control systems. Analytical and experimental investigations of soil volume change under hydraulic and mechanical loading. Design of earth and rock dams, well pumping, and vertical and radial consolidation in embankments. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5173. Advanced Foundations. 3 Hours.
Study of soil-supported structures. Topics include drilled piers, slope stability, pile groups, negative skin friction, foundation design from the standard penetration test and Dutch cone, and other specialized foundation design topics. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5183. Geo-Environmental Engineering. 3 Hours.
Study of the geotechnical aspects of waste containment systems and contaminant remediation applications. Analysis and measurement of flow of water and contaminants through saturated and unsaturated soils, clay mineralogy and soil-chemical compatibility, and mechanical and hydraulic behavior of geomembranes, geotextiles, and geosynthetic clay liners. Design and construction aspects of compacted clay and composite landfill liners, drainage systems, and landfill covers. Prerequisite: CVEG 3132 or graduate standing. (Typically offered: Irregular)

CVEG 5193. Geotechnical Earthquake Engineering. 3 Hours.
This course covers stress wave propagation in soil and rock; influence of soil conditions on seismic ground motion characteristics; evaluation of site response using wave propagation techniques; liquefaction of soils; seismic response of earth structures and slopes. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5203. Water Chemistry. 3 Hours.
This course provides a basis for applying principles of chemical theory to understanding the composition of natural waters and to the engineering of water and wastewater treatment processes. Topics covered include chemical equilibrium (algebraic, graphical, and computer-aided solution techniques); acid-base equilibria and buffering; oxidation and reduction reactions; and solid precipitation and dissolution. Prerequisite: Graduate standing or CVEG 3243 and instructor approval. (Typically offered: Spring)

CVEG 5213. Advanced Water Treatment Design. 3 Hours.
Design of industrial and municipal water treatment plants. Discussion of raw and treated water requirements for several uses. Prerequisite: CVEG 3243. (Typically offered: Spring)

CVEG 5224. Advanced Wastewater Treatment Design. 4 Hours.
Application of advanced techniques for the analysis of wastewater treatment facilities. Physical, chemical and biological processes for removing suspended solids, organics, nitrogen, and phosphorus. Laboratory treatability studies will be used to develop design relationships. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 4243 or graduate standing. (Typically offered: Fall)

CVEG 5233. Microbiology for Environmental Engineers. 3 Hours.
Fundamental and applied aspects of microbiology and biochemistry relating to water quality control, wastewater treatment, and stream pollution. Prerequisite: CVEG 3243. (Typically offered: Irregular)

CVEG 5243. Groundwater Hydrology. 3 Hours.
Detailed analysis of groundwater movement, well hydraulics, groundwater pollution and artificial recharge. Surface and subsurface investigations of groundwater and groundwater management, saline intrusion and groundwater modeling will be addressed. Prerequisite: CVEG 3223. (Typically offered: Irregular)

CVEG 5253. Physical-Chemical Processes for Water and Wastewater Treatment. 3 Hours.
This course provides a fundamental understanding of physical and chemical processes used in the treatment of drinking water and wastewater. Principals of mass balance are applied to understand the impact of reactor hydraulics (ideal and non-ideal flow) and reaction kinetics on process performance and identify important process variables. Chemical processes covered include disinfection, gas transfer, adsorption, and ion exchange; physical processes covered include coagulation, flocculation, sedimentation, filtration, and membranes. Prerequisite: Graduate standing and instructor consent. (Typically offered: Fall Odd Years)

CVEG 5273. Open Channel Flow. 3 Hours.
Open Channel Flow includes advanced open channel hydraulics, flow measurement techniques, a hydrology review, culvert and storm drainage facility design, natural channel classification (fluvial geomorphology) and rehabilitation, computer methods and environmental issues. Prerequisite: CVEG 3213 and CVEG 3223. (Typically offered: Irregular)

CVEG 5293. Water Reuse. 3 Hours.
CVEG 5293 is a graduate-level course that discusses topics related to water reclamation and reuse. Topics include past and current practices of water reuse, health and environmental issues related to water reuse, water technologies and systems for water reuse, and water reuse applications. Prerequisite: CVEG 3243 or equivalent course. (Typically offered: Spring Even Years)

CVEG 5303. Theory of Stability. 3 Hours.
Study of structural members subjected to compression. Analysis of compression members considering support conditions and within frame configurations. Analysis of beams considering lateral torsional buckling. AISC Steel Manual strength equations related to columns and beams are derived and discussed. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5313. Matrix Analysis of Structures. 3 Hours.
Energy and digital computer techniques of structural analysis as applied to conventional forms, space trusses, and frames. Prerequisite: CVEG 3303 (formerly CVEG 3304) or graduate standing. (Typically offered: Irregular)

CVEG 5323. Structural Dynamics. 3 Hours.
Dynamics response of single and multidegree of freedom systems. Modal analysis. Response spectra. Computer programs for dynamic analysis. Design considerations for structures subjected to time-varying forces including earthquake, wind, and blast loads. Prerequisite: CVEG 3303. (Typically offered: Irregular)

CVEG 5333. Concrete Materials. 3 Hours.
Topics include portland cement production, supplementary cementing materials, fresh and hardened concrete properties, mixture proportioning, chemical admixtures, curing, and specialty concretes. Corequisite: Lab component. Prerequisite: CVEG 4303. (Typically offered: Irregular)

CVEG 5343. Highway Bridges. 3 Hours.
Economics of spans, current design and construction specifications, comparative designs. Possible refinements in design techniques and improved utilization of materials. Prerequisite: CVEG 4313 and CVEG 4303. (Typically offered: Irregular)

CVEG 5353. Prestressed Concrete Design. 3 Hours.
Analysis and design of prestressed concrete beams. Topics include flexural analysis, prestress bond, draping and debonding, allowable stresses, shear analysis and design, camber prediction, and prestress losses. Prerequisite: CVEG 4303. (Typically offered: Irregular)

CVEG 5363. Advanced Topics in Reinforced Concrete. 3 Hours.
Analysis and design of reinforced concrete members. Topics include slender columns, one-way and two-way slab design, strut and tie design, and torsion. Prerequisite: CVEG 4303 or graduate standing. (Typically offered: Irregular)
CVEG 5373. Advanced Structural Steel Design. 3 Hours.
Design of structural steel components using the Load and Resistance Factor Design method. Intensive treatment of simple and eccentric connections, composite construction, plate girders, and plastic analysis and design. Prerequisite: CVEG 3413 or graduate standing. (Typically offered: Irregular)

CVEG 5383. Finite Element Methods in Civil Engineering. 3 Hours.
An understanding of the fundamentals of the finite element method and its application to structural configurations too complicated to be analyzed without computer applications. Application to other areas of civil engineering analysis and design such as soil mechanics, foundations, fluid flow, and flow through porous media. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5393. Advanced Strength of Materials. 3 Hours.
The course will continue from the basic material addressed in the undergraduate course and investigate in more detail stress analysis as it pertains to civil engineering type problems. Topics addressed in the course will include stress analysis (two-dimensional), constitutive relationships, solutions for two-dimensional problems, flexure, torsion, beams on elastic foundations, and energy methods. Prerequisite: CVEG 2015 (Formerly CVEG 2014) or CVEG 2023 or MEEG 3013. (Typically offered: Irregular)

CVEG 5403. Advanced Reinforced Concrete II. 3 Hours.
Design of circular and rectangular reinforced concrete tanks for fluid and granular loads. Prerequisite: CVEG 4303. (Typically offered: Irregular)

CVEG 5413. Transportation and Land Development. 3 Hours.
Study of interaction between land development and the transportation network. Application of planning, design, and operational techniques to manage land development impacts upon the transportation system, and to integrate land layout with transportation network layout. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5423. Structural Design of Pavement Systems. 3 Hours.
An introduction to the structural design of pavement systems including: survey of current design procedures; study of rigid pavement jointing and reinforcement practices; examination of the behavioral characteristics of pavement materials and of rigid and flexible pavement systems; introduction to structural analysis theories and to pavement management concepts. Prerequisite: CVEG 4433. (Typically offered: Irregular)

CVEG 5433. Traffic Engineering. 3 Hours.
A study of both the underlying theory and the use of traffic control devices (signs, traffic signals, pavement markings), and relationships to improved traffic flow and safety, driver and vehicle characteristics, geometric design, and societal concerns. Also includes methods to collect, analyze, and use traffic data. Prerequisite: CVEG 3413 or graduate standing. (Typically offered: Irregular)

CVEG 5463. Transportation Modeling. 3 Hours.
The use of mathematical techniques and/or computer software to model significant transportation system attributes. May compare model results with actual measured traffic attributes, using existing data sources and/or collecting and analyzing field data. Pre- or Corequisite: Lab component. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5473. Transportation System Characteristics. 3 Hours.
Introduction to traffic flow theory, including traffic stream interactions and capacity. Applications for planning, design, operations. Prerequisite: CVEG 3413 or graduate standing. (Typically offered: Irregular)

CVEG 5483. Transportation Management Systems. 3 Hours.
Six transportation management systems are explored: pavement, bridge, intermodal, public transportation, safety, and congestion. System approaches are presented. Techniques are introduced on how to optimally allocate resources. Pavement and bridge structure basics are discussed and their performance parameters are presented. Case studies are used to illustrate the interfaces among various modes of transportation. Safety and congestion problems in transportation are addressed. (Typically offered: Irregular)

CVEG 562V. Research. 1-6 Hour.
Fundamental and applied research. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

CVEG 563V. Special Problems. 1-6 Hour.
Special problems in CVEG. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 5863. Fundamentals of Sustainability in Civil Engineering. 3 Hours.
Qualify and quantify the economic, environmental, societal, and engineering drivers behind sustainability in Civil Engineering. Justification of the feasibility and benefits of sustainability in environmental, geotechnical, structural and transportation through verbal and written communications. Students cannot receive credit for both CVEG 4863 and CVEG 5863. Prerequisite: Graduate standing or instructor consent. (Typically offered: Irregular)

CVEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.
The course will cover the concepts of linear-elastic, elastic-plastic and time-dependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. (Typically offered: Fall) This course is cross-listed with BMEG 5953, MEEG 5953.

CVEG 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CVEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Communication (COMM)

Courses

COMM 5111. Colloquium in Communication Research. 1 Hour.
Presentation, evaluation, and discussion of research proposals or on-going research projects. Graduate students are required to register for this course each semester of residence. (Typically offered: Fall and Spring) May be repeated for degree credit.

COMM 5113. Historical and Legal Methods in Communication. 3 Hours.
Emphasizes the assumptions and procedures of historical and legal research methods in communication. (Typically offered: Fall) May be repeated for up to 3 hours of degree credit.

COMM 5123. Quantitative Research Methods in Communication. 3 Hours.
Emphasizes the assumptions and procedures of social scientific research methods in communication. (Typically offered: Fall)

COMM 5133. Media Processes & Effects. 3 Hours.
Introduction to scholarly research and theory in media processes and effects. Particular attention will be devoted to the impact of media messages on individuals and societies. Emphasis will be placed on the construction and development of theory. (Typically offered: Fall)
COMM 5143. Ethnographic Methods in Communication. 3 Hours.
This class focuses upon the fieldwork procedures and narrative writing strategies that comprise the methods of ethnographic research in communication. Students conduct fieldwork requiring in-depth interpersonal contact with members of a group or culture, and practice narrative writing skills. (Typically offered: Fall)

COMM 5163. Introduction to Communication Paradigms. 3 Hours.
Introduces the variety of modes of inquiry used in communication. Reviews the field's history and boundaries. Explores contemporary communication research. (Typically offered: Fall)

COMM 5173. Qualitative Methods in Communication. 3 Hours.
Emphasizes the assumptions and procedures of qualitative research methods in the examination of human communication behavior. (Typically offered: Spring)

COMM 5183. Interpretive Research Methods in Communication. 3 Hours.
Examines various perspectives used to analyze and critique various texts (e.g., media programming, speeches). (Typically offered: Spring)

COMM 5193. Seminar in Communication. 3 Hours.
Research, discussion, and papers focus on one of the variety of communication topics including symbolic processes in communication, philosophy of rhetoric, communication education, criticism of contemporary communication, interpersonal communication, organizational communication, and contemporary applications of rhetoric. Maximum credit is 9 semester hours. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

COMM 5303. Seminar in Rhetorical Theory. 3 Hours.
Humanistic theories of communication and rhetoric with emphasis upon the development of rhetorical theory in the classical world and upon contributions of contemporary theorists. Prerequisite: Graduate standing. (Typically offered: Fall Even Years)

COMM 5323. Seminar in Persuasion. 3 Hours.
Focus is on comparing theoretical accounts of persuasion and research evidence concerning the effects of various factors on persuasion. (Typically offered: Fall)

COMM 5333. Interpersonal Communication Theory. 3 Hours.
Survey of the theoretical orientations in interpersonal communication with primary focus on conceptual, philosophical and research issues. (Typically offered: Fall Even Years)

COMM 5343. Interpersonal Communication. 3 Hours.
Theory and research concerning the exchange of information and the mutual influencing of behavior among people. Prerequisite: Graduate standing. (Typically offered: Fall)

COMM 5353. Rhetorical Criticism. 3 Hours.
A seminar in rhetorical criticism. A study of the development of standards of rhetorical appraisal from the foundations of the art of speaking to the modern period; examination of contemporary approaches to rhetorical appraisal and practice in critical analysis of contemporary address. (Typically offered: Irregular)

COMM 5373. Content Analysis. 3 Hours.
Techniques for observing and analyzing the overt communication behavior of selected communicators. Prerequisite: Graduate standing. (Typically offered: Irregular)

COMM 5383. Seminar in Political Communication. 3 Hours.
Research seminar focusing on selected topics such as candidate imagery, diffusion of political information, or political symbolism. Prerequisite: Graduate standing. (Typically offered: Irregular)
This course is cross-listed with PLSC 5383.

COMM 5403. Organizational Communication Theory. 3 Hours.
A seminar on the historical development of theory and research into communication processes occurring within an organizational setting. Lecture, discussion, oral and written reports. Prerequisite: Graduate standing. (Typically offered: Irregular)

COMM 5413. Organizational Communication Research. 3 Hours.
A seminar on conducting applied research within an organizational setting. Prerequisite: COMM 5403 and graduate standing. (Typically offered: Summer)

COMM 5423. Seminar in Mass Media Cognition. 3 Hours.
Seminar exploring how people learn from written, aural and visual mass media messages. Topics to include attention, memory, comprehension, emotional response, arousal, unconscious processing, picture perception and person perception. Seminar will be concerned with most popular media (e.g., television radio, newspaper, and film), and with several content genres (e.g., entertainment, news, advertising). (Typically offered: Spring Even Years)

COMM 5433. Marital Communication. 3 Hours.
An exploration of the major theories and lines of research that examine marital communication in contemporary American life. (Typically offered: Irregular)

COMM 5443. Issues of Race and Gender in Interpersonal Communication. 3 Hours.
An exploration of the major theories and lines of research that examine how race and gender influence interpersonal communication in everyday life in America. (Typically offered: Spring Odd Years)

COMM 5453. Myth and Communication Criticism. 3 Hours.
Examines major theories of mythology, including archetypal and ideological perspectives, and their applications to the criticism of public communicative events. Practice in written critical analysis. Prerequisite: Graduate standing. (Typically offered: Irregular)

COMM 5463. Descriptive Linguistics. 3 Hours.
A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Fall) This course is cross-listed with WLLC 5463, ANTH 5473, ENGL 5463.

COMM 5473. Treatment of Native Americans in Film. 3 Hours.
Examines the role of Native Americans in film. Emphasis is upon the production and circulation of meanings with society, and special attention is given to the role of popular and mass media in this process. Prerequisite: Graduate standing. (Typically offered: Fall)

COMM 5503. Communication and Cultural Studies. 3 Hours.
Examines the role of communication in modern culture. Emphasis is upon the production and circulation of meanings with society, and special attention is given to the role of popular and mass media in this process. Prerequisite: Graduate standing. (Typically offered: Fall)

COMM 5513. Sustainability and Communication. 3 Hours.
Communication's role in creating and conveying an organization's environmental sustainability philosophy and initiatives. Discusses internal communication when establishing and communicating sustainability goals and initiatives. Covers communicating sustainability to external groups through websites, sustainability reports, and advocacy initiatives. For profit, nonprofit, governmental, NGOs, and/or advocacy organizations discussed. (Typically offered: Fall Even Years)

COMM 5533. Family Communication. 3 Hours.
An exploration of the major theories and lines of research that examine family communication in contemporary American life. (Typically offered: Fall Even Years)

COMM 569V. Seminar in Film Studies. 1-3 Hours.
Research, discussion, papers on a variety of film genres and areas including the new American film, the science-fiction film, directors, film comedy, the experimental film, criticism, and the film musical. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit. This course is cross-listed with ENGL 569V.
COMM 5763. Health Communication. 3 Hours.
Examines the difficulties of effective communication between health care providers and recipients including the following: issues of social support, conveying bad news, cultural issues, and identifying relevant communication skills associated with effective health care provision. Explores medical education models for training in effective patient-provider communication. (Typically offered: Irregular)

COMM 5823. Political Communication. 3 Hours.
Covers contemporary political communication theory and applies them to understand modern political campaigns. Topics covered include the rhetoric of politics, political advertising, the role of the media and public opinion, the impact of new technology, campaign speech genres, political debates, and the role of social identity in presidential campaigns. (Typically offered: Irregular)

COMM 5833. The Rhetoric of the Modern American Presidency. 3 Hours.
Study contemporary presidents' reliance on public persuasion, especially in efforts to bypass Congress and accomplish complicated political goals. Explore the origins of the concept of the "rhetorical presidency," specifically how it developed and changed the nature of the executive branch of government. Examine major genres of modern presidential rhetoric illustrating that trend. (Typically offered: Irregular)

COMM 5843. Legal Communication. 3 Hours.
Examines communication processes in the legal environment and focuses on communication skills and behaviors among judges, attorneys, litigants, and jurors. Particular attention will be given to verbal strategies and nonverbal messages related to interviews, negotiation, mediation, and litigation and to the rhetorical functions of legal pleadings and judicial opinions. (Typically offered: Irregular)

COMM 5853. American Film Survey. 3 Hours.
A survey of major American film genres, major directors and films that have influenced the development of motion pictures. (Typically offered: Fall and Summer)

COMM 5863. History and Development of International Film I. 3 Hours.
A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from its origins to 1975. (Typically offered: Irregular)

COMM 5873. History and Development of International Film II. 3 Hours.
A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from 1975 to the present. (Typically offered: Irregular)

COMM 590V. Special Problems. 1-6 Hour.
Credit by arrangement. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

COMM 5913. Internship in Communication. 3 Hours.
Internship in applied communication within public and private organizations. Prerequisite: 15 hours graduate level communication in residence. (Typically offered: Fall, Spring and Summer)

COMM 5923. Capstone Course in Communication. 3 Hours.
Students organize and synthesize knowledge developed throughout their graduate coursework into a tangible capstone product which becomes part of their professional portfolio. (Typically offered: Fall, Spring and Summer)

COMM 5993. Readings In Cultural Studies. 3 Hours.
Classic and current theoretical approaches to cultural studies. Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular)

COMM 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

Communication Disorders (CDIS)

Courses

CDIS 5103. Research Methodology in Communication Disorders. 3 Hours.
An examination of methods of research in speech-language pathology and audiology and of the use of bibliographic tools. Focuses on purposes and problems of various forms of communication disorders research, procedures and instruments employed, and reporting of research. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5113. Seminar in Early Intervention. 3 Hours.
Study of a family-centered, transdisciplinary approach to early intervention with infants and toddlers at-risk for communication disorders. Topics include early communication development, service delivery in a family context, coordination with other disciplines, legislation mandating services, and providing services to children with multiple disabilities. Prerequisite: CDIS 3223 or equivalent, and graduate standing. (Typically offered: Spring)

CDIS 5121L. Feeding and Swallowing Disorders Lab. 1 Hour.
Observation and interpretation of techniques used for assessment and remediation of feeding and swallowing disorders in children and adults. Corequisite: CDIS 5122. Prerequisite: CDIS 3213 and graduate standing. (Typically offered: Fall)

CDIS 5122. Feeding and Swallowing Disorders. 2 Hours.
Study of the etiology, assessment, and remediation of feeding and swallowing disorders in children and adults. Prerequisite: CDIS 3213 or equivalent, and graduate standing. (Typically offered: Fall)

CDIS 5143. Cognitive-Communication Development and Disorders. 3 Hours.
Study of normal cognitive development, the role of communication in this development, and shifts that may occur in conjunction with various speech, language and/or hearing disorders. Prerequisite: CDIS 3223. (Typically offered: Fall)

CDIS 5153. TBI and Right-Hemisphere Disorders. 3 Hours.
Study of the speech and language disorders commonly resulting from traumatic brain injury and right hemisphere disorders. Prerequisite: CDIS 4253 or equivalent, and graduate standing. (Typically offered: Spring)

CDIS 5163. Seminar in Language Topics. 3 Hours.
Study of selected topics in normal and disordered language acquisition and/or language use. Implications of current research are reviewed and applied to evaluation and management of language impairment(s). Prerequisite: Graduate standing. (Typically offered: Irregular)

CDIS 5173. Sign Language and Deafness. 3 Hours.
(Formerly CDIS 4103.) An introduction to American Sign Language (ASL) and the Deaf Community that uses it. This class will study expressive and sign language skills using ASL vocabulary, structure and grammar. The Deaf Community will be introduced through videotapes and readings. Corequisite: CDIS 3213. Prerequisite: Graduate standing and reporting of research. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5181. Advanced Clinical Practicum I. 1 Hour.
Pacticum activities in speech-language assessment and intervention. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5193. Seminar in Problems of Oral Communication. 3 Hours.
Investigation of research in selected problems of oral communication; recent developments in speech-language pathology and audiology; individual problems for investigation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

CDIS 5203. Introduction to Aural Rehabilitation. 3 Hours.
(Formerly CDIS 4133.) Study of the techniques used in the rehabilitation of speech and language problems of the hearing impaired including the role of amplification, auditory training, and speech reading in rehabilitation. Graduate degree credit will not be given for both CDIS 4133 and CDIS 5203. Prerequisite: CDIS 3103. (Typically offered: Spring)
CDIS 5213. Voice and Resonance Disorders. 3 Hours.
Study of disorders of phonation and resorption, including etiologies, diagnosis, and intervention strategies. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5223. Fluency Disorders. 3 Hours.
An examination of fluency disorders including theory, etiological factors, and development. In addition, the course is designed to address assessment and management of fluency disorders consistent with evidence-based practice for prospective speech-language pathologists. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5233. Speech Sound Disorders. 3 Hours.
Assessment and treatment of disorders in speech articulation. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 5253. Motor Speech Disorders. 3 Hours.
Study of motor speech production disorders related to damage to central or peripheral nervous system motor centers and pathways. Cerebral palsy, adult dysarthria, apraxia, and dysphagia are emphasized. Both theoretical and treatment considerations are addressed. Prerequisite: CDIS 4253 or equivalent, and graduate standing. (Typically offered: Spring)

CDIS 5263. Advanced Audiology. 3 Hours.
(Formerly CDIS 4263.) Study of the basic techniques used in audiological assessment of children and adults, including pure tone audiometry, speech audiometry, and special tests of hearing function. Prerequisite: CDIS 3213. (Typically offered: Fall)

CDIS 5273. Language, Learning and Literacy. 3 Hours.
An examination of language-based literacy skills, including consideration of development, disorders, assessment and intervention. (Typically offered: Summer)

CDIS 5281. Advanced Clinical Practicum II. 1 Hour.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5181. (Typically offered: Spring)

CDIS 5293. Augmentative and Alternative Communication. 3 Hours.
Approaches to communication management with the severely and profoundly handicapped child or adult, with primary emphasis on augmentative and alternative communication assessment and intervention. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5303. Clinical Assessment of Speech and Language Disorders. 3 Hours.
(Formerly CDIS 4183.) Study of the basic diagnostic procedures used in speech-language pathology. Emphasis is placed on the clinical processes of assessment, including criteria for test selection, techniques in test administration, and interpretation of test. Prerequisite: Graduate standing and CDIS 5303. Pre- or Corequisite: Prior coursework in CDIS and ANTH 1023. (Typically offered: Spring)

CDIS 5313. Introduction to Speech and Hearing Science. 3 Hours.
(Formerly CDIS 4213.) Study of the acoustic structure of oral speech and the auditory skills underlying speech perception. Prerequisite: CDIS 4213 and CDIS 5313. Pre- or Corequisite: MATH 1203 or higher. (Typically offered: Spring)

CDIS 5323. Language Disorders in Children. 3 Hours.
(Formerly CDIS 4223.) Study of disorders of language acquisition and usage in children and adolescents, with emphasis upon the nature, assessment, and treatment of such disorders. Prerequisite: Graduate standing and CDIS 5281. (Typically offered: Fall)

CDIS 5333. Neurological Bases of Communication. 3 Hours.
(Formerly CDIS 4253.) A study of the structures and functions of the central and peripheral nervous systems as they relate to human speech, language, and cognition. Prerequisite: Graduate standing and CDIS 5281. (Typically offered: Fall)

CDIS 5373. Communication Behavior and Aging. 3 Hours.
(Formerly CDIS 4273.) Study of the effects upon communication of normal aspects of the aging process, from early adulthood throughout the lifespan. Prerequisite: Graduate standing and CDIS 5281. (Typically offered: Fall)

CDIS 5381. Advanced Clinical Practicum III. 1 Hour.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5281. (Typically offered: Fall)

CDIS 5391. Clinical Practicum: Hearing Disorders. 1 Hour.
Practicum in audiology. (Typically offered: Fall, Spring and Summer)

CDIS 548V. Off-Campus Practicum: Public School Site. 1-6 Hour.
Practicum activities in speech-language disorders in a public school setting. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5511. Professional Issues I. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders. (Typically offered: Fall)

CDIS 5521. Professional Issues II. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders. (Typically offered: Fall)

CDIS 5531. Professional Issues III. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders. (Typically offered: Fall)

CDIS 5558. Internship: Clinical Site. 3-6 Hour.
Field placement in approved clinical setting for clock hours in speech-language pathology assessment and treatment. Students in the master's program must enroll in a minimum of 3 credit hours of CDIS 558V or CDIS 578V during their last semester of graduate studies. Prerequisite: Graduate standing; Completion of one semester of either CDIS 548V or CDIS 568V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 556V. Off-Campus Practicum: Clinical Site. 1-6 Hour.
Practicum activities in speech-language disorders in an off-campus clinical site. Prerequisite: Graduate standing and completion of at least 2 semesters of CDIS 5281. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
CDIS 5813. Advanced Auditory (Re)Habilitation. 3 Hours.
This course provides students with an in-depth knowledge of hearing anatomy and physiology as well as current hearing and hearing assistive technologies. The development of auditory skills across the lifespan will be discussed as well as intervention techniques to facilitate auditory, speech, and spoken language skills across the lifespan. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5823. Language Learning with Multiple Disabilities. 3 Hours.
Approaches to services (assessment and intervention) for individuals who, as a result of multiple disabilities, are in the beginning stages of language development including the preintentional and presymbolic stages. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5843. Communication and Swallowing in Dementia. 3 Hours.
This course provides an in-depth examination of the communication and feeding/swallowing factors demonstrated by patients with dementia. Etiologies, symptoms, progression, evaluation, and appropriate interventions for the most common forms of dementia are addressed. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 5883. Policies & Procedures in Educational Speech-Language Pathology. 3 Hours.
Educational Speech Pathology is designed to familiarize the student the factors related to functioning as an SLP in an educational setting, including state and federal regulations/standards, service delivery considerations, eligibility criteria, and documentation. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 590V. Special Problems. 1-6 Hour.
Special problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 599V. Seminar in Professional Issues. 1-3 Hour.
Selected topics in professional issues in speech-language pathology and audiology. (Typically offered: Fall and Spring)

CDIS 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CDIS 699V. Seminar in Communication Sciences and Disorders. 1-6 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

**Computer Science and Computer Engineering (CSCE)**

**Courses**

CSCE 5013. Advanced Special Topics in Computer Science or Computer Engineering. 3 Hours.
Consideration of current computer engineering or computer science topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

CSCE 5033. Advanced Algorithms. 3 Hours.
Design of computer algorithms, with primary emphasis on the development of efficient implementation. (Typically offered: Irregular)

CSCE 5043. Advanced Artificial Intelligence. 3 Hours.
In-depth introduction to AI. Topics include: philosophical foundations, cognition, intelligent agents, AI languages, search, genetic algorithms, first order and modal logic, inference, resolution, knowledge representation, ontologies, problem solving, planning, expert systems, uncertainty, probabilistic reasoning, fuzzy logic, machine learning, natural language processing, machine vision, and robotics. Prerequisite: CSCE 4613. (Typically offered: Irregular)

CSCE 5053. Advanced Virtual Worlds. 3 Hours.
In depth study of 3D multi-user virtual worlds covering application domains like retail and healthcare logistics, simulations, training, and gaming as well as platform architectures. Students will apply their knowledge of programming and data structures while using synthetic worlds to explore, model and script future smart worlds where computing is pervasive. (Typically offered: Irregular)

CSCE 5063. Machine Learning. 3 Hours.
An introduction to machine learning, with particular emphasis on neural network techniques. This course presents the basic principles underlying algorithms that improve with experience, and covers using them effectively for modeling data and making predictions. (Typically offered: Irregular)

CSCE 5073. Data Mining. 3 Hours.
This course surveys the most common methods used in data mining and machine learning. It involves several projects in which students will implement tools that are useful for mining knowledge from data and making predictions. The course will study both heuristic algorithms and statistical techniques. Prerequisite: CSCE 3193 and (INEG 2313 or STAT 3013). (Typically offered: Irregular)

CSCE 5114. Embedded Systems. 4 Hours.
(Formerly CSCE 4114.) The architecture, software, and hardware of embedded systems. Involves a mixture of hardware and software for the control of a system (including electrical, electro-mechanical, and electro-chemical systems). They are found in a variety of products including cars, VCRs, HDTVs, cell phones, pacemakers, spacecraft, missile systems, and robots for factory automation. Graduate degree credit will not be given for both CSCE 4114 and CSCE 5114. Corequisite: Lab component. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Fall)

CSCE 5133. Algorithms. 3 Hours.
(Formerly CSCE 4133.) Provides an introduction to formal techniques for analyzing the complexity of algorithms. The course surveys important classes of algorithms used in computer science and engineering. Graduate degree credit will not be given for both CSCE 4133 and CSCE 5133. Prerequisite: CSCE 3193 and (MATH 2603 or MATH 2803) or MATH 4423. (Typically offered: Fall)

CSCE 5173. Formal Languages and Computability. 3 Hours.
(Formerly CSCE 4323.) Finite Automata and regular languages, regular expressions, context-free languages and pushdown automata, nondeterminism, grammars, and Turing machines. Church's thesis, halting problem, and undecidability. Graduate degree credit will not be given for both CSCE 4323 and CSCE 5173. Prerequisite: CSCE 4133 or CSCE 5133 (formerly CSCE 4313). (Typically offered: Spring)

CSCE 5183. Advanced Data Structures. 3 Hours.
(Formerly CSCE 4263.) This course continues the study of data structures, algorithmic analysis for these data structures, and their efficient implementation to support standard library in programming languages. Topics include: AVL trees, Red-Black trees, Splay trees, Optimal Binary Search trees, 2-3 tree, 2-3-4 tree, B-trees, Segment trees, Leftist Heaps, Binomial Heaps, Fibonacci Heap, Disjoint Set, Hashing, and big integer with hundreds to thousands of digits. Graduate degree credit will not be given for both CSCE 4263 and CSCE 5183. Prerequisite: CSCE 3193. (Typically offered: Irregular)

CSCE 5193. Concurrent Computing. 3 Hours.
(Formerly CSCE 4253.) Programming concurrent processes; computer interconnection network topologies; loosely coupled and tightly coupled parallelized computer architectures; designing algorithms for concurrency; distributed computer architectures. Graduate degree credit will not be given for both CSCE 4253 and CSCE 5193. Prerequisite: CSCE 3193. (Typically offered: Irregular)
CSCE 5203. Advanced Database Systems. 3 Hours.
Topics include: object databases, distributed databases, XML query, data warehouses, network as database systems, peer-peer data sharing architectures, data grids, data mining, logic foundations, semantic databases, spatial and temporal databases, and knowledge bases. Prerequisite: CSCE 4523 and graduate standing. (Typically offered: Irregular)

CSCE 5213. Bioinformatics. 3 Hours.
Application of algorithmic techniques to the analysis and solution of biological problems. Topics include an introduction to molecular biology and recombinant DNA technology, biological sequence comparison, and phylogenetics, as well as topics of current interest. Prerequisite: Instructor consent. (Typically offered: Irregular)

CSCE 5223. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both CSCE 4333 and CSCE 5223. Prerequisite: ELEG 3214 or ELEG 3933 and MATH 2584. (Typically offered: Fall)

CSCE 5233. Low Power Digital Systems. 3 Hours.
(Formerly CSCE 4233.) The reduction of power consumption is rapidly becoming one of the key issues in digital system design. Traditionally, digital system design has mainly focused on performance and area trade-offs. This course will provide a thorough introduction to digital design for lower consumption at the circuit, logic, and architectural level. Graduate degree credit will not be given for both CSCE 4233 and CSCE 5233. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular)

CSCE 5253L. Integrated Circuit Design Laboratory I. 3 Hours.
Design and layout of large scale digital integrated circuits. Students design, check and simulate digital integrated circuits which will be fabricated, and tested in I.C. Design Laboratory II. Topics include computer aided design, circuit timing, and wire delay. Prerequisite: CSCE 4333. (Typically offered: Irregular)
This course is cross-listed with ELEG 5253L.

CSCE 5263. Computational Complexity. 3 Hours.
Turing machines, recursion theory and computability, complexity measures, NP-completeness, analysis on NP-complete problems, pseudo-polynomial and approximation. (Typically offered: Irregular)

CSCE 5273. Big Data Analytics and Management. 3 Hours.
Topics include principles of distributed data computing and management, design and implementation of non-relational data systems, crowd sourcing and human computation, big data analytics and scalable machine learning, real-time streaming data analysis, and social aware computing. Prerequisite: CSCE 3193 and INEG 2313. (Typically offered: Irregular)

CSCE 5283. Graph and Combinatorial Algorithms. 3 Hours.
A study of algorithms for graphs and combinatorics with special attention to computer implementation and runtime efficiency. (Typically offered: Irregular)

CSCE 5293. Computer Architecture. 3 Hours.
(Formerly CSCE 4213.) The architecture of modern scalar and parallel computing systems. Techniques for dynamic instruction scheduling, branch prediction, instruction level parallelism, shared and distributed memory multiprocessor systems, array processors, and memory hierarchies. Graduate degree credit will not be given for both CSCE 4213 and CSCE 5293. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Spring)

CSCE 5313. Advanced Operating Systems. 3 Hours.
Concurrent processes and process communication; mutual exclusion and synchronization principles; kernel philosophy; resource allocation and deadlock; and case studies of specific operating systems. Prerequisite: CSCE 3613. (Typically offered: Irregular)

CSCE 5323. Computer Security. 3 Hours.
Study of a broad selection of contemporary issues in computer security. Topics include access control, security policies, authentication methods, secure system design, and information assurance. Prerequisite: CSCE 3613. (Typically offered: Irregular)

CSCE 5333. Computer Forensics. 3 Hours.
Various methods for identification, preservation, and extraction of electronic evidence at a computer crime scene. Specific topics include auditing and investigation of network and host intrusions, computer forensics tools, resources for system administrators and information security officers, legal issues related to computer and network forensics. Prerequisite: CSCE 5323. (Typically offered: Irregular)

CSCE 5343. Advanced Software Engineering. 3 Hours.
This course is about software metrics and models. It will focus on quantitative methods and techniques for management of software projects, design of software systems, and improvement of software quality. The material covered will be metrics and models used in the software lifecycle, such as software requirements metrics, design metrics, implementation metrics, testing metrics, effort estimation model. Prerequisite: CSCE 3513. (Typically offered: Irregular)

CSCE 5353. CPLD/FPGA-Based System Design. 3 Hours.
(Formerly CSCE 4353.) Field Programmable Logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Graduate degree credit will not be given for both CSCE 4353 and CSCE 5353. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular)

CSCE 5363L. Integrated Circuit Design Laboratory II. 3 Hours.
Students test the I.C. chips they designed in I.C. Design Laboratory I, and propose design corrections where needed. Topics include bipolar chip design, gate arrays, BICMOS, memory design, design for testability, and dynamic & domino logic. Prerequisite: CSCE 5253L. (Typically offered: Irregular)
This course is cross-listed with ELEG 5263L.

CSCE 5423. Cryptography. 3 Hours.
(Formerly CSCE 4433.) This course provides a general introduction to modern cryptography. Topics include: stream ciphers, block ciphers, message authentication codes, public key encryption, key exchange, and signature schemes. Graduate degree credit will not be given for both CSCE 4433 and CSCE 5423. Prerequisite: CSCE 2014 with a grade of C or better and (MATH 2603 or MATH 2803). (Typically offered: Irregular)

CSCE 5433. Advanced Cryptography. 3 Hours.
This course provides an in-depth look into some facet of either cryptographic theory or the implementation of cryptography. Topics may include: the discrete logarithm problem, integer factorization, information theory, elliptic curves, lattices, pseudorandom number generators, zero-knowledge proofs, and quantum cryptography. Prerequisite: CSCE 4433 or instructor consent. (Typically offered: Irregular)

CSCE 5523. Database Management Systems. 3 Hours.
(Formerly CSCE 4523.) Introduction to database management systems, architecture, storage structures, indexing, relational data model, E-R diagrams, query languages, SQL, ODBC, transaction management, integrity, and security. Graduate degree credit will not be given for both CSCE 4523 and CSCE 5523. Prerequisite: CSCE 3193 or CSCE 3193H with a C or better. (Typically offered: Spring)
CSCE 5533. Advanced Information Retrieval. 3 Hours.
Study of the architecture, implementation, and evaluation of current information retrieval systems. Students will apply their knowledge of programming and data structures to implement a large system with an emphasis on efficiency and scalability. They will study current research in the field and implement individual or group projects on advanced topics. (Typically offered: Irregular)

CSCE 5543. Statistical Natural Language Processing. 3 Hours.
Introduction to statistical natural language processing (NLP). Covers the theory and algorithms needed for building NLP tools, provides broad coverage of mathematical and linguistic foundations, and detailed discussion of statistical methods for text mining and information extraction. Current research and applications of statistical NLP will be discussed. Prerequisite: CSCE 2014 and (STAT 3013 or INEG 2313). (Typically offered: Irregular)

CSCE 5553. Software Architecture. 3 Hours.
(Formerly CSCE 4543.) A study of software architecture through the use of case studies drawn from real systems designed to solve real problems from technical as well as managerial perspectives. Techniques for designing, building, and evaluating software architectures. Graduate degree credit will not be given for both CSCE 4543 and CSCE 5553. Prerequisite: CSCE 4133 or CSCE 5133 (formerly CSCE 4133) and CSCE 3513. (Typically offered: Irregular)

CSCE 5613. Artificial Intelligence. 3 Hours.
(Formerly CSCE 4613.) Introduction to intelligent agents, AI languages, search, first order logic, knowledge representation, ontologies, problem solving, natural language processing, machine vision, machine learning, and robotics. Graduate degree credit will not be given for both CSCE 4613 and CSCE 5613. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 5623. Secure Digital System Design. 3 Hours.
This course is to give graduate students an insight of contemporary security-related issues in modern digital systems. In addition to lectures, students will be practicing secure digital system design during a project. (Typically offered: Irregular)

CSCE 5633. Network Performance Evaluation. 3 Hours.
A study of performance modeling tools for telecommunication networks, computer networks, and wireless networks. Prerequisite: STAT 3013. (Typically offered: Irregular)

CSCE 5643. Computer Communications Networks. 3 Hours.
A study of computer communication networks, including the data link layer, routing, flow-control, local area networks, TCP/IP, ATM, B-ISDN, queueing analysis, and recent developments in computer communications. (Typically offered: Irregular)

CSCE 5653. Network Security. 3 Hours.
This course introduces security and secrecy in a networked environment. It is intended to familiarize students with the elements of secure communication, and how they inter-relate to provide secure networks in public and private settings. (Typically offered: Irregular)

CSCE 5663. Database Security. 3 Hours.
This is an advanced course covering security issues in database systems. Topics to be covered include discretionary and mandatory access control policies, multilevel secure database systems, auditing, data recovery, database intrusion detection, database insider threat, etc. Prerequisite: CSCE 4523. (Typically offered: Irregular)

CSCE 5673. Mobile Programming. 3 Hours.
(Formerly CSCE 4623.) An introduction to software development on mobile devices. The major topics covered in this course include underlying concepts and principles in mobile programming, as well as hands-on programming experience on mobile devices with an emphasis on smartphones. Graduate degree credit will not be given for both CSCE 4623 and CSCE 5673. Prerequisite: CSCE 3193 or CSCE 3193H. (Typically offered: Irregular)

CSCE 5683. Image Processing. 3 Hours.
The objective of this class is to give students a hands-on introduction to the fundamentals of image processing. A variety of image processing techniques and applications will be discussed including image enhancement, noise removal, spatial domain and frequency domain filtering, image restoration, color image processing, image compression, edge detection and image segmentation. Prerequisite: CSCE 4813. (Typically offered: Irregular)

CSCE 5693. Graphics Processing Units Programming. 3 Hours.
(Formerly CSCE 4643.) This course provides an introduction to massively parallel programming using Graphics Processing Units (GPUs). Topics include basic programming model, GPU thread hierarchy, GPU memory architecture, and performance optimization techniques and parallel patterns needed to develop real-life applications. Graduate degree credit will not be given for both CSCE 4643 and CSCE 5693. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 5703. Computer Vision. 3 Hours.
The objective of this course is to give students a hands-on introduction to the fundamentals of computer vision. Topics include image formation, object modeling, image processing, feature and edge detection, image segmentation, motion estimation, depth from stereo, shape description and object recognition. Prerequisite: CSCE 4813 or CSCE 5683. (Typically offered: Irregular)

CSCE 5753. Wireless Systems Security. 3 Hours.
Wireless systems such as wireless local area networks, cellular and mobile networks, and sensor networks are vulnerable to attacks. The goal of the class is for students to understand how to design secure wireless systems. Security topics include confidentiality, integrity, availability, privacy, and control of fraudulent usage of networks. Issues addressed include basic wireless theory, cryptography, threat modeling, risks, and mitigation techniques. (Typically offered: Irregular)

CSCE 5763. Privacy Enhancing Technologies. 3 Hours.
This course introduces privacy enhancing technologies and hot privacy topics in modern computing systems. Students will be exposed to many interesting privacy problems, study privacy enhancing technologies, and apply their knowledge to explore an open research problem in a research-oriented project. After completing this course, students will gain broad knowledge of the state-of-the-art privacy enhancing technologies and open research problems. They will also develop skills and enhance potentials to do research on privacy and security. (Typically offered: Irregular)

CSCE 5773. Computer Networks. 3 Hours.
(Formerly CSCE 4753.) This course is an introductory course on computer networks. Using the Internet as a vehicle, this course introduces underlying concepts and principles of modern computer networks, with emphasis on protocols, architectures, and implementation issues. Graduate degree credit will not be given for both CSCE 4753 and CSCE 5773. Prerequisite: INEG 2313. (Typically offered: Irregular)

CSCE 5813. Computer Graphics. 3 Hours.
(Formerly CSCE 4813.) Introduction to the theory and algorithms used in computer graphics systems and applications. Topics include: 2D and 3D geometric models (points, lines, polygons, surfaces), affine transformations (rotation, translation, scaling), viewpoint calculation (clipping, projection), lighting models (light-material interactions, illumination and shadow calculation). Students will implement their own graphics pipeline to demonstrate many of these techniques. Higher level computer graphics applications will be created using OpenGL. Graduate degree credit will not be given for both CSCE 4813 and CSCE 5813. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 5823. Multiprocessor Systems on Chip. 3 Hours.
This course covers the latest trends in advanced computer architecture for multiprocessor systems on chip for embedded and real time systems. Topics covered include multicore architectures, modeling abstractions, run time systems, and MIMD/SIMD heterogeneous architectures, HW/SW co-design techniques. Prerequisite: CSCE 3613 and CSCE 4213. (Typically offered: Irregular)
CSCE 5833. Computer Architecture Security. 3 Hours.
This course will cover fundamental principles and emerging implementation strategies to reason about, design and construct architecture level security capabilities in the manycore era. Coverage includes formal security models, new and emerging considerations for heterogeneous multiprocessor system on chip architectures, hardware and software implementation methods, operating systems for run time security enforcement. Prerequisite: CSCE 4213. (Typically offered: Irregular)

CSCE 5843. Reconfigurable Computing. 3 Hours.
This course will cover emerging and proposed techniques and issues in Reconfigurable Computing. Topics will include FPGA technologies, CAD/CAE tools, Hw/Sw co-design, system level synthesis, programming models and abstractions. Prerequisite: CSCE 4213 and CSCE 3613. (Typically offered: Irregular)

CSCE 5853. Information Security. 3 Hours.
(Formerly 4853.) This course covers principles, mechanisms, and policies governing confidentiality, integrity, and availability of digital information. Topics to be covered include security concepts and mechanisms, security policies, multilevel security models, system vulnerability, threat and risk assessment, basic cryptography and its applications, intrusion detection systems. Graduate degree credit will not be given for both CSCE 4853 and CSCE 5853. Prerequisite: CSCE 3193 or CSCE 3193H. (Typically offered: Irregular)

CSCE 590V. Advanced Individual Study. 1-3 Hour.
Advanced graduate level individual study directed by faculty in current research topics, state of the art, or advanced methodology in one of the major computer science or computer engineering areas. (Typically offered: Irregular)

CSCE 5914. Advanced Digital Design. 4 Hours.
(Formerly CSCE 4914.) To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Graduate degree credit will not be given for both CSCE 4914 and CSCE 5914. Corequisite: Lab component. Prerequisite: CSCE 2114 or ELEG 2904. (Typically offered: Irregular)

CSCE 5943. Computer Arithmetic Circuits. 3 Hours.
Examination of fundamental principles of algorithms for performing arithmetic operations in computers. This course provides sufficient theoretical and practical information to prepare the digital design engineer with an awareness of basic techniques for the realization of arithmetic circuits. (Typically offered: Irregular)

CSCE 5983. Application Specific Integrated Circuit Design. 3 Hours.
ASIC design is taught with emphasis on industrial preparation. Topics include ASIC technologies, design entry, simulation, and synthesis. Advanced design methods and techniques are studied for cell based and gate array ASICs. Prerequisite: CSCE 4213. (Typically offered: Irregular)

CSCE 610V. Master’s Thesis. 1-6 Hour.
Master’s thesis. (Typically offered: Fall and Spring) May be repeated for degree credit.

CSCE 620V. Post-Master’s Research. 1-18 Hour.
Post-master’s research. (Typically offered: Fall and Spring)

CSCE 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Counselor Education (CNED) Courses

CNED 5003. Counseling and Human Development. 3 Hours.
This course is intended to give students a broad overview of human nature/behavior through knowledge of lifespan developmental theory, personality development, modern & post-modern approaches to the study of human nature/behavior, and learning theory. Throughout the course, close attention will be given to human ecology or those social/historical/cultural/environmental forces furthering or impeding development. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CNED 5193. Clinical Mental Health Counseling. 3 Hours.
An introductory study of community counseling. The course content includes information concerning the educational, historical, philosophical, and psychological foundations of community counseling as well as specific traits and skills of professional community counselors. In addition, the course is designed to provide introductory level concepts and skills required for future certification and licensure as counseling professionals. Prerequisite: Graduate student status. (Typically offered: Spring)

CNED 5203. Foundations of the Counseling Profession. 3 Hours.
A study of the counseling profession applicable to school, college and community agency settings. Introduction to the basic educational, historical, philosophical foundations of counseling as well as specific traits and skills of counselors. The course is also designed to provide beginning level concepts and skills required for certification and licensure. Prerequisite: Must be taken first year in program. (Typically offered: Fall and Summer)

CNED 5213. Lifestyle & Career Development. 3 Hours.
Theories of career development and counseling, including the use of occupational information sources and career assessment tools and techniques. Prerequisite: CNED 5333. (Typically offered: Summer)

CNED 5223. Introduction to School Counseling. 3 Hours.
Philosophy, organization, and practices of a counseling program in the elementary and secondary school. The school counselor’s role as counselor, consultant, and coordinator, professional identity, and legal issues are included. Includes a significant focus on ethical standards and issues. (Typically offered: Irregular)

CNED 5303. Individual Appraisal. 3 Hours.
Analysis of concepts, methods, and procedures utilized in individual appraisal. (Typically offered: Fall)

CNED 5313. Program Organization and Information Management. 3 Hours.
This course addresses needs and strategies for effective development and management of school counseling programs and guidance curriculum. Prerequisite: CNED 5223. (Typically offered: Fall)

CNED 5323. Counseling Theory. 3 Hours.
Introductory survey and critical analysis of major alternative theoretical perspectives in counseling. (Typically offered: Fall and Summer)

CNED 5333. Basic Counseling Techniques. 3 Hours.
Introduction to basic counseling techniques and skills common to multiple theoretical perspectives. Prerequisite: Master's students in Counseling. (Typically offered: Fall and Spring)

CNED 5343. Counseling Practicum. 3 Hours.
Supervised counseling practice. CNED faculty consent required. Pre- or Corequisite: CNED 5303 and CNED 5363 and CNED 5373. Prerequisite: CNED 5203, CNED 5323, CNED 5333, CNED 5403. (Typically offered: Fall and Spring)

CNED 5353. Psychopharmacology. 3 Hours.
Study of theory, research, & practice issues pertaining to psychopharmacology for non-medical practitioners. Prerequisite: CNED 5203, CNED 5323, and CNED 5333. (Typically offered: Summer)
CNED 5363. Dynamics of Group Counseling. 3 Hours.
Therapeutic and other theoretical information is presented regarding group process
and the counselor's role in that process. An experiential group experience is
required. Prerequisite: CNED 5333 and CNED 5323. (Typically offered: Fall and
Spring)

CNED 5373. Ethical and Legal Issues in Counseling. 3 Hours.
Review of ethical and legal standards governing professional counselor training,
research, and counseling practice; including client rights; confidentiality; the
client-counselor relationship; and counseling research, training, and supervision.
Prerequisite: CNED 5003 and CNED 5203. (Typically offered: Fall)

CNED 5383. Crisis Intervention Counseling. 3 Hours.
Analysis and application of short-term counseling intervention strategies in crisis
situations, with special attention to incidents involving rape, physical, or emotional
abuse, divorce, suicidal depression, grief, marital or family instability, and violent
conflict. Prerequisite: CNED 5333. (Typically offered: Summer)

CNED 5403. Diagnosis and Treatment in Counseling. 3 Hours.
Procedures in case management utilizing both clinical and interview data in assisting
children, adolescents, and adults in educational, vocational, personal, and social
planning. Prerequisite: CNED 5303, CNED 5323 and CNED 5333. (Typically offered:
Fall and Spring)

CNED 5443. Vocational Rehabilitation Foundations. 3 Hours.
Survey of the philosophy of vocational rehabilitation, including history and legislation.
(Typically offered: Fall)

CNED 5453. Medical Aspects of Disability. 3 Hours.
Orientation to medical and medically related aspects of various disabling conditions
with emphasis on the severely disabled. (Typically offered: Spring)

CNED 5463. Rehabilitation Case Management. 3 Hours.
Counseling process in the rehabilitation setting. Focusing upon effective counseling
strategies, representative cases, and effective case management methods.
(Typically offered: Spring)

CNED 5473. Psychological Aspects of Disability. 3 Hours.
Intensive study of the psychological aspects of adjustment to atypical physique and
prolonged handicapping condition. (Typically offered: Spring)

CNED 5483. Counseling Research. 3 Hours.
An in-depth examination of counseling research methodology and issues to prepare
students to critically evaluate and use counseling research in their professional
practice. (Typically offered: Fall, Spring and Summer)

CNED 5493. Principles and Practices of Psychiatric Rehabilitation. 3 Hours.
The course introduces students to the principles and practices of recovery-oriented,
evidence-based psychiatric rehabilitation. Through lectures, guest presentations,
films, discussions, and readings, students (a) explore the clinical, psychosocial,
and vocational aspects of psychiatric disabilities and (b) examine psychiatric
rehabilitation principles and practices to facilitate community integration and
successful employment outcomes for individuals with psychiatric disabilities.
(Typically offered: Fall)

CNED 5513. Counseling and Human Diversity. 3 Hours.
Examination of human and cultural diversity, emphasizing issues of race, class, and
socioeconomic status, and how they impact our clients as individuals and as family
and society members. (Typically offered: Summer)

CNED 5523. Process and Behavioral Addictions. 3 Hours.
This course provides an overview of non-substance related addictive disorders
such as technology (e.g., video games, Internet, television), gambling, eating, sex,
shopping/buying and work as well as potential treatment options for these disorders.
(Typically offered: Summer)

CNED 5583. Placement of Persons with Disabilities. 3 Hours.
Focuses on placement theory and practice as they apply to persons who experience
disabilities. Special attention is given to RehabMark approach. (Typically offered:
Summer)

CNED 574V. Counseling Internship. 1-9 Hour.
A 600-clock-hour field placement in an approved setting over a minimum of two
continuous semesters. For students completing a counseling internship in a school
setting, successful completion of a criminal background check is required before
beginning internship. Pre- or Corequisite: CNED 5213. Prerequisite: CNED 5203,
CNED 5303, CNED 5323, CNED 5333, CNED 5343, CNED 5363, CNED 5373,
CNED 5403, CNED 5513. CNED faculty consent required. (Typically offered: Fall and
Spring) May be repeated for up to 9 hours of degree credit.

CNED 599V. Seminar. 1-6 Hour.
Seminar. (Typically offered: Irregular) May be repeated for up to 6 hours of degree
credit.

CNED 6003. Theories and Foundations of Addictions. 3 Hours.
a study of behavioral and substance addictions, including an overview of differential
treatment. Prerequisite: CNED 5323 and CNED 5333, and admission to the CNED
masters or doctoral program or departmental consent. (Typically offered: Spring and
Summer)

CNED 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for
degree credit.

CNED 6013. Advanced Counseling Theory and Methods. 3 Hours.
Critical analysis of major theoretical perspectives in counseling, including both
group and individual counseling strategies for dealing with affective, cognitive,
and behavioral dysfunction. Prerequisite: CNED doctoral standing or permission.
(Typically offered: Spring Even Years)

CNED 6023. Foundations of Marriage and Family Counseling Therapy. 3 Hours.
Comprehensive exploration of the current theories/techniques of marriage, family
and couples counseling. Prerequisite: CNED 5323 and CNED 5333 and CNED
doctoral or masters standing or permission. (Typically offered: Summer)

CNED 6033. Advanced Group Theory and Methods. 3 Hours.
Comparative study of theories and processes of group counseling. Includes
supervised experience in group facilitation with video recording and playback.
Prerequisite: CNED 5363 or equivalent and CNED doctoral or masters standing or
permission. (Typically offered: Spring Odd Years)

CNED 6043. Supervision of Counselors. 3 Hours.
Analysis, assessment, and practical application of counselor supervision techniques
in treatment and training programs. Prerequisite: CNED doctoral standing and CNED
faculty consent (Typically offered: Fall Even Years)

CNED 605V. Independent Study. 1-18 Hour.
Independent study. (Typically offered: Fall, Spring and Summer) May be repeated
for up to 18 hours of degree credit.

CNED 6073. Advanced Research in Counseling. 3 Hours.
This course involves acquiring a knowledge and understanding of the use of
research in counseling and the development of new research in the counseling
profession that has heuristic value. Prerequisite: Graduate standing. (Typically offered:
Spring)

CNED 6083. Consultation Theory and Methods. 3 Hours.
Strategies, practical application, and techniques for effective consultation with
parents, teachers, and community agencies. Prerequisite: CNED 5333 (preferred)
CNED doctoral or masters standing or permission. (Typically offered: Summer)
CNED 6093. Counseling Children and Adolescents Through Play. 3 Hours.
Introduction to counseling children and adolescents through play; including the process, theories, techniques, and materials applicable to children and adolescents in a pluralistic society. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or permission. (Typically offered: Spring)

CNED 6113. Theory to Practice: Working with Co-occurring Disorders. 3 Hours.
This course is designed to demonstrate the application of theory to practice in the treatment of co-occurring disorders. Specifically, it is intended to carefully review current research and literature on counseling individuals presenting with both a substance abuse disorder and mental-emotional challenges. Pre- or Corequisite: CNED 6003. Prerequisite: Graduate or license eligible. (Typically offered: Summer)

CNED 6123. Clinical Applications of Marriage and Family Counseling and Therapy. 3 Hours.
Advanced clinical methodology appropriate for family counseling, marriage counseling, and couples counseling (in all settings), with emphasis on solution-focused systems, Satir model and psychoeducational family work in schools. Includes supervision of clinical experience in marriage, family and couples counseling, video recording and school/community outreach. Prerequisite: CNED doctoral standing or permission. (Typically offered: Fall Odd Years)

CNED 6133. Introduction to Play Therapy. 3 Hours.
This course is an introduction to the basic concepts of child-centered play therapy (CCPT). Students will learn the conceptual framework of child-centered play therapy, as well as the attitudes and skills necessary to establish and maintain facilitative relationships with children that encourage their self-expression and facilitate change. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or consent. (Typically offered: Irregular)

CNED 6223. Foundations of Counselor Education and Supervision. 3 Hours.
This course is designed to enhance the professional development and acculturation of doctoral students in order to facilitate their success in professional leadership roles of counselor education, supervision, counseling practice, and research competencies. Prerequisite: CNED Doctoral status or permission. (Typically offered: Spring Odd Years)

CNED 6233. Employment Practices and Interventions. 3 Hours.
An intensive study of the employment experiences of workers with disabilities with emphasis on disincentives and barriers to employment and interventions to enable people with disabilities to participate in employment. Prerequisite: RHAB 5493 or equivalent. (Typically offered: Irregular)

CNED 6243. Disability Policy in the U.S.. 3 Hours.
An analysis of public policy approaches to disability in the U.S. Examines the political and philosophical origins of disability policy; reviews major disability legislation and its effects on policy stakeholders; describes recent initiatives; and analyzes evolution of disability policy within context of changing societal, economic, and political conditions. (Typically offered: Fall)

CNED 6253. Advanced Psychosocial Aspects of Disability. 3 Hours.
A theoretical and applied study of techniques that enable people to cope with major life events: disability and unemployment. (Typically offered: Fall Odd Years)

CNED 6343. Cultural Foundations and Counseling. 3 Hours.
To gain learning experiences in pedagogy relevant to multicultural issues and competencies, including social change theory and advocacy action planning. To identify current multicultural issues as they relate to social change theories, ethical and legal considerations, disability, gender, sexuality, social justice, and advocacy models. Prerequisite: CNED or RHAB Doctoral Standing or Permission. (Typically offered: Fall Even Years)

CNED 6413. Advanced Individual Appraisal. 3 Hours.
To provide advanced knowledge and experience with those psychoeducational instruments and procedures used in conducting school related assessment. Prerequisite: CNED 5303 or equivalent and CNED doctoral standing or permission. (Typically offered: Fall Odd Years)

CNED 6713. Advanced Counseling Practicum. 3 Hours.
Supervised counseling practice. A 100-clock hour approved practical counseling experience. Prerequisite: CNED doctoral standing and permission of CNED faculty and Clinical Coordinator. (Typically offered: Spring) May be repeated for up to 3 hours of degree credit.

CNED 674V. Internship. 1-18 Hour.
Supervised field placement (Clinical/Instructionship/Supervision/Research). Prerequisite: CNED doctoral standing, CNED faculty consent and CNED Clinical Coordinator consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CNED 699V. Seminar. 1-18 Hour.
Seminar. Prerequisite: CNED Doctoral standing or permission. (Typically offered: Summer) May be repeated for up to 18 hours of degree credit.

CNED 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy and consent. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Crop, Soil and Environmental Sciences (CSES)

Courses

CSES 5001. Weed Science Practicum. 1 Hour.
Training for membership on weed team, through participation. Prerequisite: Graduate standing. (Typically offered: Summer)

CSES 5013. Crop Physiology. 3 Hours.
Understanding and quantitative measurement of physiological processes, plant responses, and environmental parameters in relation to the production of crops. Prerequisite: BIOL 4303. (Typically offered: Fall Odd Years)

CSES 5023. Physiology of Herbicide and Plant Interaction. 3 Hours.
The reproduction, growth, and development of weeds and the ecological factors affecting these processes: development and mechanisms of herbicide resistance, flow of herbicide-resistance genes; and development of herbicide-resistant crops. Corequisite: Lab component. Prerequisite: CSES 4143 or CSES 5143 (formerly CSES 4143) and (BIOL 4303 or CHEM 5813). (Typically offered: Spring Odd Years)

CSES 502V. Special Problems Research. 1-6 Hour.
Original investigations on assigned problems in agronomy. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

CSES 5033. Advanced Soil Fertility and Plant Nutrition. 3 Hours.
Study of water uptake, ion absorption, translocation and metabolism in higher plants. Lecture 3 hours per week. Prerequisite: BIOL 4303 and CHEM 2613 and CHEM 2611L. (Typically offered: Spring Even Years)

CSES 504V. Special Topics. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in agronomy. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

CSES 5053. Scientific Writing. 3 Hours.
Open to graduate students, especially those in agricultural and life sciences. The course will cover searching the scientific literature, writing theses, proposals, journal articles, and other scientific documents. Emphasis on style and techniques used in scientific publication. Lecture and workshop 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Irregular)
CSES 5073. Advanced Crop Science. 3 Hours.
Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Graduate degree credit will not be given for both CSES 4013 and CSES 5073. (Typically offered: Fall)

CSES 5093. Plant Breeding. 3 Hours.
(Formerly CSES 4103.) Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4103 and CSES 5093. Corequisite: Lab component. Prerequisite: ANSC 3123 or BIOL 2323. (Typically offered: Fall Even Years)

CSES 5103. Scientific Presentations. 3 Hours.
Experience in procedures required for professional presentations of scientific papers, seminars, posters; and research findings at meetings in conferences, and with discussion groups. Instruction in organization of materials, visual aids, and good speaking habits. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Fall)

CSES 5114. Soil Fertility. 4 Hours.
Study of the soil's chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4224 and CSES 5114. Corequisite: Lab component. (Typically offered: Fall)

CSES 5133. Ecology and Morphology of Weedy and Invasive Plants. 3 Hours.
(Formerly CSES 4133.) Study of weeds as economic pests occurring in both agricultural and nonagricultural situations and including poisonous plants and other specific weed problems. Gross morphological plant family characteristics which aid identification, habitat of growth and distribution, ecology, competition, and allelopathy are discussed. Lecture 2 hours, laboratory 2 hours a week. Graduate degree credit will not be given for both CSES 4133 and CSES 5133. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003. (Typically offered: Fall)

CSES 5143. Principles of Weed Control. 3 Hours.
(Formerly CSES 4143.) Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current use. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4143 and CSES 5143. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHem 1071L. (Typically offered: Spring)

CSES 5214. Analytical Research Techniques in Agronomy. 4 Hours.
Preparation and analysis of plant and soil samples utilizing spectrophotometry, isotopes, and chromatographic separation methods. Additionally, measurements are made of photosynthesis, respiration, water relationships, light, and temperatures in whole plants. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: BIOL 4303 and CHEM 2613 and CHEM 2611L. (Typically offered: Fall Even Years)

CSES 5224. Soil Physics. 4 Hours.
Physical properties of soils and their relation to other soil properties, growth of plants and transport of water, oxygen, heat, and solutes such as pesticides and plant nutrients. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and MATH 1203. (Typically offered: Spring)

CSES 5233. Plant Genetic Engineering. 3 Hours.
Topics will be covered in the field of in vitro plant biology, transgene genetics and crop genetic engineering. Concepts and applications of transgenic plant technology will be discussed, with the emphasis on the strategies for crop improvement and gene discovery. Lecture 3 hours. (Typically offered: Spring Odd Years)

CSES 5253. Soil Classification and Genesis. 3 Hours.
(Formerly CSES 4253.) Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4253 and CSES 5253. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L. (Typically offered: Fall Odd Years)

CSES 5264. Microbial Ecology. 4 Hours.
A study of the microorganisms in soil and the biochemical processes for which they are responsible. Lecture 3 hours, laboratory 3 hours per week. Additional suggested prerequisites are BIOL 2013, CSES 2203, and ENSC 3003. Corequisite: Lab component. Prerequisite: BIOL 1543 and BIOL 3863 or ENSC 3223. (Typically offered: Fall Odd Years)

CSES 5303. Bioenergy Feedstock Production. 3 Hours.
(Formerly CSES 4303.) Overview of production and characteristics of cultivated crops, perennial grasses, and woody species as feedstocks for bioenergy. Fundamentals of plant growth factors, culture, harvest and storage, quality and improvement, and introduction to environmental impact, modeling, and resource utilization. Graduate degree credit will not be given for both CSES 4303 and CSES 5303. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203. (Typically offered: Spring)

CSES 5313. Crop Simulation Models in Research, Management and Policy. 3 Hours.
The basics of theory and practice of crop simulation models and their applications in crop research and management, and cropping systems planning and policy. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203 or consent of instructor. Courses in introductory chemistry and plant physiology are preferred. (Typically offered: Fall Even Years)

CSES 5323. Soil/Water Quality in Bioenergy Feedstock Production Systems. 3 Hours.
Examine concepts of soil and water quality in relation to bioenergy feedstock production, explore research related to biomass removal and by-product addition to soils, and examine the potential effects of proposed feedstock production systems on soil and water quality. Prerequisite: MATH 1203 and CSES 4253 or equivalent or consent of instructor, and CSES 4303 or CSES 5303 (formerly CSES 4303) preferred. (Typically offered: Fall Odd Years)

CSES 5453. Soil Chemistry. 3 Hours.
Application of the principles of chemistry to processes of agronomic and environmental importance in soils. Soil clay mineralogy, soil solution thermodynamics, structure and reactivity of humus, surface complexation and ion exchange, electro-chemical phenomena, and colloidal stability. Prerequisite: CSES 2203 and CHEM 1123 and CHEM 1121L. (Typically offered: Spring Even Years)

CSES 5533. Wetland Soils. 3 Hours.
(Formerly CSES 4553.) This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicators and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Graduate degree credit will not be given for both CSES 4553 and CSES 5533. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V. (Typically offered: Spring Odd Years)

CSES 5543. Plant Genomics. 3 Hours.
Plant genetics based on the study of whole genome sequence, transcriptome and proteome. Provides an overview of the principles and techniques of experimental and in silico genomics. Covers all areas of genome research including structural, comparative and functional genomics as well as proteomics. Prerequisite: CHEM 5843 or any graduate level genetics course. (Typically offered: Spring Even Years)
CSES 5533. Forage-Ruminant Relations. 3 Hours.
Advanced chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake and digestion, and techniques of measuring forage utilization and systems analysis at the plant-animal interface. CSES 1203 recommended. Corequisite: Lab component. Prerequisite: ANSC 3143. (Typically offered: Spring Odd Years)
This course is cross-listed with ANSC 5533.

CSES 5563. Fate and Transport of Organic Contaminants. 3 Hours.
Fate and Transport of Organic Contaminants will present an overview of the transformation and transport processes that influence the environmental fate of organic contaminants, with an emphasis on agricultural pesticides. Biotic and abiotic factors influencing the movement and behavior of organic contaminants in soil and water will be covered extensively, with an emphasis on chemical mechanisms. Prerequisite: CHEM 1123 and CHEM 1121L and CSES 2203, or instructor consent. (Typically offered: Spring Odd Years)

CSES 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CSES 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Curriculum and Instruction (CIED) Courses

CIED 5003. Elementary Education Seminar. 3 Hours.
This course is designed to synthesize the foundational content presented in the Master of Arts in Teaching core courses. It focuses on refinement of the generalized knowledge to accommodate specialized content children. Professional attitudes, knowledge and skills relevant to elementary students. Professional attitudes, knowledge and skills applicable to today's elementary educator are addressed. Prerequisite: Admission to the CHED M.A.T. (Typically offered: Spring)

An introduction to constructing, analyzing, and interpreting tests, types of research and the research process, qualitative and quantitative techniques for assessment, and descriptive and inferential statistics. (Typically offered: Summer)

CIED 5013. Measurement, Research and Statistical Concepts in the Schools. 3 Hours.
An introduction to constructing, analyzing, and interpreting tests; types of research and the research process; qualitative and quantitative techniques for assessment; and descriptive and inferential statistics. Prerequisite: Admission to graduate school. (Typically offered: Summer)

CIED 5022. Classroom Management Concepts. 2 Hours.
A number of different classroom management techniques are studied. It is assumed that a teacher must possess a wide range of knowledge and skills to be an effective classroom manager. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall)

CIED 5032. Curriculum Design Concepts for Teachers. 2 Hours.
The design and adaptation of curriculum for students in regular and special K-6 classrooms. Theoretical bases and curriculum models are reviewed. Concurrent clinical experiences in each area of emphasis are included. Prerequisite: Admission to the M.A.T. program. (Typically offered: Spring)

CIED 5043. Content Area Reading in Elementary Grades. 3 Hours.
This course teaches the integration of reading and writing in the content areas. Reading and writing as integrated strands of the language process is presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the focus on practical application. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall and Summer)

CIED 5052. Seminar: Multicultural Issues. 2 Hours.
This seminar provides an introduction to the major concepts and issues related to multicultural education. The ways in which race, class, gender, and exceptionality influence students' behavior are discussed. Prerequisite: Admission to the M.A.T. program. (Typically offered: Summer)

CIED 5053. Multicultural Issues in Elementary Education. 3 Hours.
This course provides an introduction to the major concepts and issues related to multicultural education in elementary classrooms. The ways in which race, class, gender and exceptionality influence students' behavior are discussed. Prerequisite: Admission to graduate school. (Typically offered: Spring Odd Years; Summer)

CIED 5063. Disciplinary and Interdisciplinary Literacies in Education. 3 Hours.
This course teaches the integration of reading, writing, and new literacies within the discipline and across disciplines. Theory and strategy are presented as integrated strands of the language process as presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the focus on practical application. Prerequisite: Admission to Teacher Education M.A.T. Program. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

CIED 5073. Action Research in Elementary Education. 3 Hours.
Provides the students with experience in conducting case studies and action research related to childhood education. In addition, students gain knowledge regarding practices used in ethnographic research. Prerequisite: Admission to M.A.T. program. (Typically offered: Spring)

CIED 508V. Elementary Education Cohort Teaching Internship. 1-6 Hour.
Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 5093. Methods of Instruction for Middle Level I. 3 Hours.
A study of methods and materials in the special content areas (math, science, English/language arts, and social studies). The planning of instruction, microteaching, and the development of middle school instructional materials are included. Prerequisite: Admission to M.A.T. program. (Typically offered: Summer)

CIED 5103. Advanced Middle Level Principles. 3 Hours.
An in-depth examination of recent research on the major issues, practices, and policies for middle level education. Emphasis is on analysis of cutting edge issues germane to the life, education, and welfare of the early adolescent via the integration of theory and practice. Prerequisite: Admission to Masters of Arts in Teaching program. (Typically offered: Spring)

CIED 5113. Reading in Middle Schools. 3 Hours.
An overview of methods and materials for teaching reading to early adolescents. Reflective activities and site-based field experiences are integrated with course content to provide continuity between theory and practice. Portfolio expectations will be a primary means of course evaluation. Prerequisite: Admission to the middle level education program and CIED 3113. (Typically offered: Fall, Spring and Summer)

CIED 5123. Writing Process Across the Curriculum (Middle Level). 3 Hours.
This course will provide an overview of the research, and methods for incorporating writing across all curriculum. Writing as a process will be emphasized. Reflective activities and site-based field experience will be integrated into the course content. Prerequisite: Admission to M.A.T. Program. (Typically offered: Spring)
CIED 5132. Research in Middle Level Curriculum and Instruction. 2 Hours.
An introduction to inquiry and research in middle level curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Practicum in educational research and evaluation is done as part of the class. Prerequisite: Admission to the MAT program. (Typically offered: Fall)

CIED 5143. Internship: Middle Level. 3 Hours.
The internship for middle level education is an extended field experience in which a pre-service teacher integrates knowledge and skills developed in education classes with practice in the field. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)

CIED 5153. Creativity in Daily Practice. 3 Hours.
(Formerly CIED 4083.) Arts integration course including the ideas, design, and implementation of practices in the classroom, board room, and professional field that enrich the experiences of all stakeholders while building right-brain thinking skills for the new millennium. Graduate degree credit will not be given for both CIED 4083 and CIED 5153. (Typically offered: Spring Even Years) May be repeated for up to 6 hours of degree credit.

CIED 5162. Applied Practicum. 2 Hours.
Provides laboratory experiences for CIED 5173 (Literacy Assessment and Intervention) and CIED 5183 (Readings in Early Childhood Education). Corequisite: CIED 5183 and CIED 5173. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall)

CIED 5173. Literacy Assessment and Intervention. 3 Hours.
Focuses on assessment of young children's literacy skills. Techniques discussed include informal observation, miscue analysis, and portfolio assessment. Prerequisite: Admission to graduate school. (Typically offered: Fall and Summer)

CIED 5183. Readings in Early Childhood Education. 3 Hours.
Will continue to develop understandings of classic studies and will explore the impact these have had on the most recent issues in early childhood education. Prerequisite: Admission to the CHED M.A.T. (Typically offered: Fall)

CIED 5193. Methods of Instruction for Middle School II. 3 Hours.
Second special methods course for teaching at the middle level. Emphasizes further refinement of teaching skills and methods; the integration of the sciences, mathematics, and technology; science, technology, and society (STS) issues; and the integration of social studies and English language arts. Prerequisite: CIED 5093 and admission to the M.A.T. program. (Typically offered: Fall)

CIED 5203. English Language Arts/Speech & Drama Methods of Instruction. 3 Hours.
This course provides an introduction to teaching English language arts (ELA) and speech/drama in the context of elementary, middle and high school settings. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching the content area provide the major tenets of instruction. (Typically offered: Summer)

CIED 5213. Issues and Trends in Literacy. 3 Hours.
This course provides an examination of practices to teaching literacy, broadly defined. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching the major tenets of instruction. Prerequisite: Admission to M.A.T. (EDUCMA) Secondary program or instructor consent. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

CIED 5223. Learning Theory. 3 Hours.
This course provides the student with information about foundational issues in education, including history and philosophy of American Education, psychological and social theories of education, characteristics of learners, and learning processes. Prerequisite: Admission to M.A.T. degree program. (Typically offered: Summer)

CIED 5232. Interdisciplinary Studies. 2 Hours.
Introduction to the nature of interdisciplinary study: curricular content, course planning (topics and themes), instructional strategies, and evaluation and assessment. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)

CIED 5243. The Moral Mind in Action. 3 Hours.
(Formerly CIED 4433.) The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed. Graduate degree credit will not be given for both CIED 4433 and CIED 5243. (Typically offered: Fall)

CIED 5253. Moral Courage. 3 Hours.
(Formerly CIED 4443.) Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. Graduate degree credit will not be given for both CIED 4443 and CIED 5253. (Typically offered: Spring)

CIED 5263. Assessment, Evaluation, and Practitioner Research. 3 Hours.
A study of assessment, testing, and evaluative procedures in classrooms including types of tests, abuses of tests, test construction, scoring, analysis and interpretation, statistical methods, and alternative evaluation and assessment techniques. Classroom-based data collection and analysis. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall)

CIED 5273. Research in Curriculum and Instruction. 3 Hours.
An introduction to inquiry and research in curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Qualitative method in assessment and evaluation are considered. Practicum in educational research and evaluation is done as part of the class. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)

CIED 528V. Teaching Experience. 1-6 Hour.
The teaching experience is an essential component of the Masters of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to the M. A. T. Program (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 5293. Special Methods, Interdisciplinary Section. 3 Hours.
The third and final part of the middle level special methods course. Provides interns with the knowledge, dispositions, and skills for developing an interdisciplinary course of study in conjunction with the members of their interdisciplinary team. Prerequisite: CIED 5093 and admission to M.A.T. program. (Typically offered: Spring)

CIED 5303. Adolescence and Learning. 3 Hours.
Study of the developmental characteristics (physical, emotional, social and intellectual) of early and late adolescence (ages 10-18; grades 5 to 12). The progression from early to late adolescence and the implications this evolution has for learning, motivation, instruction and classroom practices are emphasized. Prerequisite: PSYC 2003. (Typically offered: Spring)
CIED 5313. Principles of Qualitative Research in Curriculum & Instruction. 3 Hours.
Designed specifically for aspiring qualitative researchers who wish to conduct research in settings unique to curriculum and instruction. Methods of research design, data analysis, and writing for publication will be emphasized. Strongly recommended for graduate students who are considering a qualitative thesis or dissertation in curriculum and instruction. (Typically offered: Spring Odd Years)

CIED 5323. Transition Planning for Persons with Disabilities. 3 Hours.
Prepares students to plan, evaluate, and implement transition programs within both regular and special classrooms at the elementary, middle and secondary school levels. (Typically offered: Spring)

CIED 5333. Curriculum Theory and Development for Educators. 3 Hours.
The design and adaptation of curriculum for students in regular and special K-12 classrooms. Theoretical bases and curriculum models are reviewed. Concurrent clinical experiences in each area of emphasis are included. Prerequisite: Admission to the M.A.T. program. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

CIED 5353. Teaching Students with Diverse Needs in Middle Education Settings. 3 Hours.
To provide future scholar-practitioners with a knowledge base concerning the issues involved in the successful instruction of persons with special learning needs during middle school years. (Typically offered: Fall)

CIED 5363. Methods and Assessment in K-12 Online Teaching. 3 Hours.
The study of curriculum, instructional methods and assessment techniques to facilitate student learning in K-12 virtual and hybrid teaching environments. Students enrolled in the course will be required to demonstrate knowledge of prevalent and relevant models of K-12 curriculum, web-based instructional methods, assessment techniques and utilize tools for the development and implementation of effective instruction in the K-12 virtual classroom. Prerequisite: Graduate standing. (Typically offered: Fall)

CIED 5393. Introduction to Linguistics. 3 Hours.
This course is an introduction to human language. The goal is to understand what it means to speak a language, including an introduction to phonetics and phonology (specifically the sound system of American English), morphology (the rules of English at the word level), syntax (rules that govern sentence level language), semantics (meanings of words) and sociolinguistics (or the study of language use in its social context). (Typically offered: Fall)

CIED 5403. Early Childhood Education: Rationale and Curriculum. 3 Hours.
Rationale and curriculum of an early childhood education program, with special attention given curricular frameworks and professional organization policies. (Typically offered: Fall)

CIED 5423. Curriculum and Instruction: Models and Implementation. 3 Hours.
The study of models of curriculum and instruction and their implementation to facilitate student learning in a variety of instructional environments. (Typically offered: Spring)

CIED 5433. Methods and Materials for Teaching Children’s and Adolescent Literature. 3 Hours.
Issues and trends in children’s literature. Contemporary works are evaluated and reviewed based on changing social political conditions. Multicultural approach to children’s literature is emphasized. Prerequisite: Undergraduate course in children’s literature. (Typically offered: Irregular)

CIED 5443. Methods of Teaching Foreign Language K-12. 3 Hours.
Study of the methods and materials in the teaching of foreign language in K-12 settings as well as the theories of second language acquisition. Includes philosophical, cognitive, and psychological dimensions of teaching foreign languages. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the MAT program. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

CIED 5453. Evaluation Techniques. 3 Hours.
Evaluation of learning using traditional means of assessment as well as alternative or authentic assessment techniques. (Typically offered: Irregular)

CIED 5461. Capstone Research Seminar. 1 Hour.
This course provides students with basic knowledge and practical skills in understanding, utilizing and implementing a research design project with a focus in the discipline of curriculum and instruction with particular emphasis of some aspect of teaching and/or learning. As a part of this course students will design, conduct and report the results of an action research study undertaken in the teaching internship. Prerequisite: Admission to M.A.T. program. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

CIED 5483. Teaching Mathematics. 3 Hours.
Content, methods, and materials for teaching multiple strands of elementary school mathematics. Emphasis on principles and procedures of a conceptual and integrated approach to learning mathematics. Prerequisite: Undergraduate coursework in teaching elementary or early childhood mathematics. (Typically offered: Irregular)

CIED 5493. Teaching Social Studies. 3 Hours.
Purpose, content, psychology, materials, and methods for teaching the social sciences in the elementary school. Emphasis on principles and procedures for combining the social studies with other areas of the curriculum in broad unit instruction. Prerequisite: Undergraduate coursework in teaching elementary or early childhood social studies. (Typically offered: Irregular)

CIED 5503. Teaching Science. 3 Hours.
The influence of science on the community, on the home, and the child. Use of science in the living and learning of the child at school. (Typically offered: Spring and Summer)

CIED 5513. Sound System of American English. 3 Hours.
This course will study the structure and development of American English (AE). Topics include: 1) the structure/systems of American English pronunciation, 2) vowels, 3) consonant system (including such features as minimal pairs, 4) prosody, intonation, rhythm, and stress, and 5) regionalism and social varieties, and 6) pedagogical approaches to teaching the features of American English. (Typically offered: Fall)

CIED 5523. Instructional Practices in Teaching Foreign Language. 3 Hours.
A pedagogical studies course based on the theoretical and practical aspects of methods, techniques, and materials for effective teaching of foreign languages in K-12 schools. Prerequisite: Admission to M.A.T. Program. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

CIED 5533. Teaching Language Arts. 3 Hours.
The place of the language arts in the elementary curriculum. Exploration of materials, content, practices, and methods, used in reading, speaking, listening, and writing experiences. (Typically offered: Spring)

CIED 5543. Structures of American English. 3 Hours.
This course provides an introduction to the grammars of English, including (but not restricted to) traditional, structural, and transformational-generative (universal grammar). It includes approaches to the teaching of all types of grammars. (Typically offered: Spring and Summer)

CIED 5553. Social Justice and Multicultural Issues in Education. 3 Hours.
This seminar provides an introduction to the major concepts and issues related to multicultural education and social justice in education and the ways in which race, ethnicity, class, gender, and exceptionality influence students' behavior. The course also examines the intersection of teacher and student perceptions of identity, schooling, and learning and the effects on educational systems. Prerequisite: Admission to MAT. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.
CIED 5583. Teaching Internship/Action Research. 3 Hours.
During this course, Master's candidates will be provided with classroom time to prepare to teach and then will be assigned to a classroom or classrooms. During this time the candidates will have an opportunity (under supervision) to observe, to teach and to participate in classroom activities. Additionally, candidates will research some area of their own pedagogy relevant to the experience. (Typically offered: Irregular)

CIED 5573. Foundations of Literacy. 3 Hours.
Teaching of reading to children; techniques, research, and modern practices. (Typically offered: Fall, Spring and Summer)

CIED 5583. Correlates of Reading Process. 3 Hours.
The developmental program is emphasized through a student of the reading process. Learning theory and research are related to reading instruction and materials through the development and application of evaluative criteria based on an understanding of reading process. Prerequisite: CIED 5573. (Typically offered: Irregular)

CIED 5593. Advanced Diagnosis and Intervention. 3 Hours.
Emphasizes the diagnosis and remediation of reading difficulties in the classroom setting. Students are expected to become familiar with cause of reading failure, diagnosis instruments and procedures, principles of report writing, and corrective instructional methods and materials. The course is open to graduate students with instructor's consent. Enrollment limited to 20. Prerequisite: CIED 5573. (Typically offered: Irregular)

CIED 5603. Innovations in School Education. 3 Hours.
An examination of the change process in education with emphasis on those elements which support or hinder change in the schools, and the detailed study of schools innovations on national, state, and local levels. (Typically offered: Fall, Spring and Summer)

CIED 5613. Contemporary Issues in Education. 3 Hours.
A study of issues pertaining to the goals, objectives, organization, and curriculum of the schools with an analysis of the teacher's role in dealing with current concerns in these areas. (Typically offered: Fall Odd Years)

CIED 5623. The School Curriculum. 3 Hours.
General principles and techniques of selecting and organizing curricular materials. (Typically offered: Fall, Spring and Summer)

CIED 5633. Analysis of Instruction. 3 Hours.
A survey of the research and literature related to the systematic study of the field of teaching. An examination of the definitions of teaching and the knowledge base on which teaching is predicated. A study of the implications of the research of effective teaching and the key curricular and instructional issues. (Typically offered: Spring Even Years)

CIED 564V. Science Instructional Strategies. 1-6 Hour.
Methods and materials in teaching specific science content with a focus on that content and/or the pedagogical perspectives necessary for effective and engaging instruction. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CIED 5653. Methods of Middle School Instruction. 3 Hours.
Philosophy, rationale, and instructional practices of middle school instruction. Prerequisite: Graduate standing. (Typically offered: Summer)

CIED 5663. Evaluation of Instruction. 3 Hours.
Examination of methods and philosophies of evaluation. Consideration will be given to grading, techniques of grading, and construction of behavioral objectives and test items. (Typically offered: Summer Even Years)

CIED 567V. Teaching Foreign Cultures in Social Studies Curricula. 1-6 Hour.
Extensive examination of foreign cultures (West Europe, USSR, China, Latin America) and methods of teaching about them in secondary school social studies. (Typically offered: Fall, Spring and Summer)

CIED 5683. Adolescent Literature. 3 Hours.
Content course in adolescent literature including selection, reading, evaluation, and psychological basis of classic and contemporary works. (Typically offered: Fall, Spring and Summer)

CIED 5703. English Language Arts and Reading Standards: Contents and Quality. 3 Hours.
This course will (1) examine the purposes, contents, and quality of K-12 English language arts and reading standards, (2) analyze their relationship to classroom and school district curricula, student assessment, educator licensing regulations, licensure tests, and professional development, (3) and explore educational, social, and political issues raised by ELA/R standards. (Typically offered: Irregular)

CIED 5713. Integrating the Elementary Curriculum. 3 Hours.
This course focuses on meaningful integration of science, mathematics, literacy, social studies, art, and music in the elementary classroom. A strong foundation for integrating the elementary curriculum will be developed by providing students with theoretical frameworks, research, resources, and methods related to classroom practice. Strategies to coordinate the integration of these subject areas for the K-4 classroom will be modeled. (Typically offered: Summer)

CIED 5723. Nature and Needs of Persons with Mild Disabilities. 3 Hours.
Educational, psychological, and social characteristics of individuals who have mild disabilities with emphasis on educational methods and modifications. Prerequisite: CIED 3023. (Typically offered: Fall)

CIED 5793. Practicum in Literacy. 3 Hours.
Laboratory experience in which students diagnose reading difficulties and practice remedial measures under the direct supervision of the instructor. Emphasis is given to continuous diagnosis and to the use of commercially produced materials and trade books in remediation. Enrollment limited to 15. Prerequisite: CIED 5593. (Typically offered: Fall, Spring and Summer)

CIED 5803. Nature and Needs of the Gifted and Talented. 3 Hours.
Educational, psychological, and social characteristics of gifted and talented children. Prerequisite: Graduate standing. (Typically offered: Fall)

CIED 5813. Curriculum Development in Gifted and Talented. 3 Hours.
Examines various models for developing curriculum and providing services for students identified for gifted programs. Prerequisite: CIED 5803. (Typically offered: Spring)

CIED 5823. Gifted and Talented (Structured) Practicum. 3 Hours.
Supervised field experience in gifted education programs, schools, institutions, and other facilities for gifted/talented children. Prerequisite: CIED 5813. (Typically offered: Summer)

CIED 5833. Gifted and Talented (Flex) Practicum. 3 Hours.
Students design and implement an individualized practicum experience (Type III Renzulli) that provides the opportunity to refine and enhance personal attitudes, beliefs, and skills in gifted education. Prerequisite: CIED 5823. (Typically offered: Fall)

CIED 5843. Representations of American Education in Film. 3 Hours.
This course provides an examination of students, teachers, administrators, schools, and schooling as they exist on the silver screen. Of particular interest is how film representations and misrepresentations potentially affect public perceptions of education. This course draws on educational theory and the field of cultural studies. (Typically offered: Irregular)

CIED 5853. Issues in Mathematics Education. 3 Hours.
Study of research in mathematics education and applications to classroom teaching and learning. Emphasis will be given past and current research in the areas of students' cognitive development in mathematics, mathematics curriculum development, and teaching practices and assessment. (Typically offered: Irregular)
CIED 5863. Teaching Global Issues. 3 Hours.
Global interdependence and its consequent issues have become an integral part of most social studies programs in American schools. Some schools developed specific courses, required or elective, and others include them in existing history, economics, government and civic courses. Secondary social studies teachers and their students explore these issues as part of current events discussions. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

CIED 5913. Parent/Family Engagement for Culturally & Linguistically Diverse Students. 3 Hours.
Students will investigate characteristics of family-community engagement systems and models serving culturally and linguistically diverse (CLD) students and families. Identify qualities of a welcoming, accepting environment for CLD families and implement some of these characteristics in their classroom and schools. Support communication and facilitate contributions by CLD families to the school and community including leadership roles. Demonstrate knowledge, skills, best practices and resources to enhance CLD family-community engagement by developing and implementing a service-learning project in their school or community. Prerequisite: Graduate standing. (Typically offered: Summer)

CIED 5923. Second Language Acquisition. 3 Hours.
This is one of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly ESL. (Typically offered: Fall)

CIED 5933. Second Language Methodologies. 3 Hours.
This is one of a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces the basics in approaches, methodologies, techniques, and strategies for teaching second languages, especially ESL. (Typically offered: Spring)

CIED 5943. Teaching People of Other Cultures. 3 Hours.
This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course focuses on cultural awareness, understanding cultural differences, and instruction methods for integrating second cultures, especially the culture of the United States, into the curriculum. (Typically offered: Spring)

CIED 5953. Second Language Assessment. 3 Hours.
This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces basic methods for testing, assessing and evaluating second language, especially ESL, learners for placement purposes and academic performance. (Typically offered: Spring)

CIED 5963. Reading in Middle and Secondary Schools. 3 Hours.
Methods and materials of teaching reading in secondary schools with emphasis on remedial and developmental reading problems of students. (Typically offered: Irregular)

CIED 5973. Practicum in Secondary Education. 3 Hours.
Students will engage in action research in a school setting to advance their knowledge of teaching and learning venues including schools and informal learning environments. Prerequisite: Permission. (Typically offered: Fall and Spring)

CIED 5983. Practicum in Curriculum & Instruction. 3 Hours.
This course will provide degree candidates with advance knowledge of teaching in the elementary or secondary schools. This will be accomplished through a semester-long practicum during which an action research project will be designed, enacted, and reported. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CIED 599V. Special Topics. 1-18 Hour.
Special topics. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CIED 600V. Master’s Thesis. 1-6 Hour.
This course is designed for students completing a thesis at the master's level in curriculum and instruction and related programs. It may be taken multiple times for 1-6 credits but no more than 6 credits will be counted toward the degree. Prerequisite: Graduate Standing (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CIED 6013. Curriculum Theory, Development, and Evaluation. 3 Hours.
Principles and concepts of curriculum and development, with an analysis of the factors basic to planning, the aims of the educational program, the organization of the curriculum, curriculum models, and elements desirable in the curriculum of schools including evaluation. (Typically offered: Fall Odd Years)

CIED 6023. Instructional Theory. 3 Hours.
Study of psychological, anthropological, sociological, and educational theories of instruction and learning. Emphasis is placed on synthesizing a broad range of existing and emerging perspectives in understanding individual, interactional and contextual phenomena of instruction and learning. (Typically offered: Spring Every Years)

CIED 6033. Content Specific Pedagogy. 3 Hours.
This course explores the relationship between the content of courses taught in schools and the pedagogical principles that the teaching of the content requires. Students will discuss and synthesize findings from the research literature and from personal investigation. (Typically offered: Irregular)

CIED 6043. Analysis of Teacher Education. 3 Hours.
This course examines issues, problems, trends, and research associated with teacher education programs in early childhood, elementary, special education, and secondary education. Prerequisite: CIED 6023. (Typically offered: Summer Even Years)

CIED 6053. Curriculum and Instruction: Learner Assessment and Program Evaluation. 3 Hours.
This course provides an overview of designing, implementing and analyzing learner assessments as well as systemic and program evaluations in a variety of instructional environments. Prerequisite: Admissions to Ed.S. or Ph.D. program. (Typically offered: Spring Even Years)

CIED 6063. Systemic Change In Education. 3 Hours.
This course is designed to critically examine education and society and interplay their interdependence between them, to differentiate between meaningful and superficial change, and to explore the agents of change in a diverse and complex social environment. Prerequisite: Admission to Ed.S. or Ph.D. program. (Typically offered: Spring Odd Years)

CIED 6073. Seminar in Developing Creativity. 3 Hours.
A study of the facets of creativity, how they can be applied to be used in one's everyday life, how they can be applied in all classrooms, and how to encourage the development of these in students. (Typically offered: Irregular)

CIED 6083. Piaget’s Theory and Instruction. 3 Hours.
Piaget's theory has been applied to classroom instruction in various settings. This course will investigate the theory in depth, study classroom application, and students will devise application. Prerequisite: CIED 6023. (Typically offered: Spring Odd Years)

CIED 6093. Vygotsky in the Classroom. 3 Hours.
This course introduces the cultural-historical theory of L. Vygotsky and considers its complexity. The comprehensive nature of Vygotsky's heritage and the importance of the sociocultural context for understanding his work is emphasized, as well as the implications of his theories for contemporary educational settings. (Typically offered: Fall Even Years)
CIED 6113. Trends and Issues in Social Studies Education. 3 Hours.
Analysis of social studies education including an examination of the historical, political and social issues that have shaped curriculum, pedagogy and the educator's role in the increasingly complex endeavor to prepare future citizens. (Typically offered: Spring Odd Years)

CIED 6123. New Literacy Studies. 3 Hours.
In the past decade scholars have expressed an interest in the diverse literacy practices in which adolescents engage outside of school. In using new media, adolescents interweave multiple sign system, including word and image, to construct a narrative or communicate information. How do readers interpret these texts? What conventions do authors manipulate to influence the meanings they construct? This course aims to answer these and other questions. (Typically offered: Fall Odd Years) May be repeated for up to 12 hours of degree credit.

CIED 6133. Trends and Issues in Curriculum and Instruction. 3 Hours.
Analysis of trends and issues in curriculum and instruction with emphasis on political/social contexts and prevailing philosophies/theories/practices across disciplines. Prerequisite: Admittance in Ed.D, Ed.S. or Ph.D. program. (Typically offered: Fall Even Years)

CIED 6143. Differentiated Instruction for Academically Diverse Learners. 3 Hours.
Major focus of this course will be the examination of differentiated instruction, a teaching philosophy appropriate for a wide range of learners. (Typically offered: Summer Even Years)

CIED 6153. Theories of Literacy Learning. 3 Hours.
In this seminar, students consider theories of literacy learning and their implications for practice and research. Theories are viewed as historically and socially situated, and students reflect on how their own work might be situated within these theories. The ways in which theories support research methodology are also explored. (Typically offered: Spring Odd Years)

CIED 6163. Social and Emotional Components of Gifted and Talented Students. 3 Hours.
Purpose of this course is to study the theoretical and practical aspects of those affective issues, behaviors, and experiences often associated with gifted and talented students. (Typically offered: Summer Even Years)

CIED 6173. Reviews of Research in Reading Comprehension. 3 Hours.
In this online course, students will learn types of reviews of research, including qualitative systematic reviews and meta-analyses, and will conduct a review of research on a topic related to reading comprehension. Students will consider implicit and explicit definitions of comprehension and the influence various definitions have on assessment, instruction, policy and research and will examine comprehension in different contexts, disciplines, genres, and platforms. The course is a CIED Area of Study or Cognate Course (not part of the Inquiry Core). (Typically offered: Summer Even Years)

CIED 6183. Theory and Research in Arts Integration. 3 Hours.
Content course in arts integration including the pedagogy, design, and implementation of lesson plans which simultaneously address core curriculum learning targets and teach skills through the visual and performing arts in order to address the needs of the learners of the new millennium. Prerequisite: Instructor consent. (Typically offered: Spring and Summer)

CIED 6193. Teaching English Language Learners in the Content Areas. 3 Hours.
This course prepares teachers to teach English language learners in math, science, and social studies. These subject areas each have their own vocabulary that must be mastered by English language learners. The course focuses on teachers of both children and adults. (Typically offered: Spring)

CIED 6233. Organization of Reading Programs. 3 Hours.
Study of the problem of organizing the classroom, individual school, and school system, for the improvement of reading instruction. Emphasis is given to the development of program organization rationale based on requirements of the teaching-learning setting. (Typically offered: Fall, Spring and Summer)

CIED 6313. Issues, History, and Rationale of Science Education. 3 Hours.
This course is the foundation experience for those interested in the discipline of science education. It provides an overview of the fundamental issues in and vocabulary of science education. The course includes the research basis for science teaching, the literature of science education, and the issues and controversies surrounding the teaching of science. (Typically offered: Irregular)

CIED 6333. Nature of Science: Philosophy of Science for Science Educators. 3 Hours.
The Nature of Science is a hybrid arena consisting of aspects of the philosophy, history and sociology of science along with elements of the psychology of scientific observations all targeting the complete understanding of how science actually functions. Prerequisite: Admission to grad school. (Typically offered: Irregular)

CIED 6343. Advanced Science Teaching Methods. 3 Hours.
This course is designed for those educators who have had some previous instruction in science teaching methods and/or had some prior science teaching experience. Students will gain new or renewed perspectives with respect to their personal teaching ability while engaging in discussions and activities designed to assist others in professional grow in science instruction. Prerequisite: Admission to graduate school. (Typically offered: Irregular)

CIED 6443. Mixed Methods Research. 3 Hours.
This course will provide opportunities for students to acquire the skills, knowledge, and strategies necessary to design and implement a mixed methods research study. Emphasis is upon developing research questions, developing a research design, selecting a sample, and utilizing appropriate techniques for analyzing data. (Typically offered: Fall)

CIED 6503. Effective Teaching: Concepts and Processes. 3 Hours.
This course is designed to assist students in examining a variety of effective teaching practices and conditions found in classrooms and in acquiring knowledge, concepts, and ideas about ways to effectively influence the interests, learning and development of students. Prerequisite: Admission to the Ph.D. program. (Typically offered: Spring)

CIED 6533. Problem-Based Learning and Teaching. 3 Hours.
A course in the design, development, and delivery of the problem-based learning (PBL) model. Theoretical cases and curriculum models will be centered on issues and models related to PBL. (Typically offered: Irregular)

CIED 6603. Multicultural Education. 3 Hours.
This course is designed to trace, examine, discuss, and promote understanding of issues related to multicultural education, different views of multicultural education, and the impact of multicultural education upon the schooling process. Emphasis is upon schooling experiences of culturally diverse students, language issues, gender issues, and evaluation issues. Prerequisite: Admission to the Ed.S. or Ph.D. program. (Typically offered: Spring)

CIED 660V. Workshop. 1-18 Hour.
Workshop. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

CIED 6623. Research Methods and Scholarship in Curriculum and Instruction. 3 Hours.
In this course students will look at methods and practices in writing a successful dissertation proposal. Emphasis will be placed on research studies, collection of reliable and valid data, and analysis of data. Throughout the course, topics will focus on what scholarship looks like in curriculum and instruction. Prerequisite: Advanced standing in the doctoral program. (Typically offered: Fall)
CIED 674V. PhD Research Internship. 1-6 Hour.
This research internship is for doctoral level students in curriculum and instruction. The goal is provide research experience within the doctoral course of study. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 680V. Ed.S. Project. 1-6 Hour.
Instructor permission required to register. Prerequisite: Instructor permission. (Typically offered: Fall, Spring and Summer)

CIED 684V. PhD Teaching Internship. 1-6 Hour.
This teaching internship is for doctoral level students in curriculum and instruction. The goal is to provide teaching experience within the doctoral course of study. (Typically offered: Fall, Spring and Summer)

CIED 694V. Special Topics. 1-6 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Specific focus on recent developments. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CIED 695V. Independent Study. 1-6 Hour.
Independent study. (Typically offered: Fall, Spring and Summer)

CIED 699V. Doctoral Seminar. 1-3 Hour.
Doctoral seminar. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CIED 700V. Dissertation. 1-18 Hour.
Dissertation. Prerequisite: Candidacy (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Economics (ECON)

Courses

ECON 5243. Managerial Economics. 3 Hours.
This course will provide students with a strong foundation in core economics principles, with emphasis on industrial organization issues and applications geared toward the supply-chain and retail focus of the redesigned MBA program. (Typically offered: Fall and Spring)

ECON 5253. Economics of Management and Strategy. 3 Hours.
Information economics and applied game theory. (Typically offered: Irregular)

ECON 5263. Applied Microeconomics. 3 Hours.
The framework for this course is the economic way of thinking. Both the theory and application of important economics questions are presented, showing students the applicability of various economic methodologies in a number of different contexts. To gain competence in the applied side of economic analysis, students will use MS Excel or other software to apply class concepts to solve concrete problems. Prerequisite: ECON 5243 and ECON 5743. (Typically offered: Spring)

ECON 537V. Global Business. 1-3 Hour.
Integrated overview of the global business environment and the organizational challenges of a multinational firm. To enhance understanding of the business and cultural environment of prominent emerging markets, the course includes a 2-3 week overseas immersion project to fulfill a predefined goal. Project is integrated with global content upon return. (Typically offered: Fall and Spring) This course is cross-listed with MGMT 537V.

ECON 5423. Behavioral Economics. 3 Hours.
(Formerly ECON 4423.) Both economics and psychology systematically study human judgment, behavior, and well-being. This course surveys attempts to incorporate psychology into economics to better understand how people make decisions in economic situations. The course will cover models of choice under uncertainty, choice over time, as well as procedural theories of decision making. Graduate degree credit will not be given for both ECON 4423 and ECON 5423. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Spring)

ECON 5433. Experimental Economics. 3 Hours.
(Formerly ECON 4433.) The course offers an introduction to the field of experimental economics. Included are the methodological issues associated with developing, conducting, and analyzing controlled laboratory experiments. Standard behavioral results are examined and the implications of such behavior for business and economic theory are explored. Graduate degree credit will not be given for both ECON 4433 and ECON 5433. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Fall)

ECON 5743. Introduction to Econometrics. 3 Hours.
(Formerly ECON 4743.) Introduction to the application of statistical methods to problems in economics. Graduate degree credit will not be given for both ECON 4743 and ECON 5743. Prerequisite: ((ECON 2013 and ECON 2023) or (ECON 2143) and ((MATH 2043 or MATH 2554 or higher)) and (WCOB 1033 or STAT 2303). (Typically offered: Spring)

ECON 5753. Forecasting. 3 Hours.
(Formerly ECON 4753.) The application of forecasting methods to economics, management, engineering, and other natural and social sciences. The student will learn how to recognize important features of time series and will be able to estimate and evaluate econometric models that fit the data reasonably well and allow the construction of forecasts. Graduate degree credit will not be given for both ECON 4753 and ECON 5753. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and (MATH 2043 or MATH 2554) and (WCOB 1033 or STAT 2303). (Typically offered: Fall)

ECON 5763. Economic Analytics. 3 Hours.
This course provides students with a good overview of modern big data methods, including Machine Learning, along with hands-on experience of in-depth analytics projects using real data. After 3 weeks of introductory lectures on the big data methods by the instructor, students will form groups and propose research projects they will develop over the semester. Knowledge of some statistical software is recommended, including Python, R and MATLAB. Prerequisite: ECON 5743 and ECON 5783. (Typically offered: Spring)

ECON 5783. Applied Microeconometrics. 3 Hours.
This course covers the principles of causal inference. Methods include panel data models, instrumental variables, regression discontinuity designs, difference-in-differences, and matching. Emphasis on developing a solid understanding of the underlying econometric principles of the methods taught as well as on their empirical application. Prerequisite: ECON 5743. (Typically offered: Fall)

ECON 5853. International Economics Policy. 3 Hours.
An intensive analysis of the operation of the international economy with emphasis on issues of current policy interest. (Typically offered: Irregular)

ECON 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ECON 6133. Mathematics for Economic Analysis. 3 Hours.
This course will develop mathematical and statistical skills for learning economics and related fields. Topics include calculus, static optimization, real analysis, linear algebra, convex analysis, and dynamic optimization. Prerequisite: Graduate standing and MATH 2554 or equivalent. (Typically offered: Summer)

ECON 6213. Microeconomic Theory I. 3 Hours.
Introductory microeconomic theory at the graduate level. Mathematical formulation of the consumer choice, producer behavior, and market equilibrium problems at the level of introductory calculus. Discussion of monopoly, oligopoly, public goods, and externalities. (Typically offered: Fall)

ECON 6223. Microeconomic Theory II. 3 Hours.
Advanced treatment of the central microeconomic issues using basic real analysis. Formal discussion of duality, general equilibrium, welfare economics, choice under uncertainty, and game theory. (Typically offered: Spring)
ECON 6313. Macroeconomic Theory I. 3 Hours.
Theoretical development of macroeconomic models that include and explain the natural rate of unemployment hypothesis and rational expectations, consumer behavior, demand for money, market clearing models, investment, and fiscal policy. (Typically offered: Fall)

ECON 6323. Macroeconomic Theory II. 3 Hours.
Further development of macroeconomic models to include uncertainty and asset pricing theory. Application of macroeconomic models to explain real world situations. (Typically offered: Spring)

ECON 636V. Special Problems in Economics. 1-6 Hour.
Independent reading and investigation in economics. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

ECON 643V. Seminar in Economic Theory and Research I. 1-3 Hour.
Seminar. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

ECON 644V. Seminar in Economic Theory and Research II. 1-3 Hour.
Independent research and group discussion. (Typically offered: Spring)

ECON 6533. Seminar in Advanced Economics I. 3 Hours.
This seminar will cover advanced fields of current research importance in economics. This will facilitate the development of research directions for doctoral study and research. Prerequisite: Graduate standing. (Typically offered: Irregular)

ECON 6543. Seminar in Advanced Economics II. 3 Hours.
This seminar will cover advanced fields of current research importance in economics. This will facilitate the development of research directions for doctoral study and research. Prerequisite: Graduate standing. (Typically offered: Irregular)

ECON 6613. Econometrics I. 3 Hours.
Use of economic theory and statistical methods to estimate economic models. The single equation model is examined emphasizing multicollinearity, autocorrelation, heteroskedasticity, binary variables and distributed lags. Prerequisite: MATH 2043 and knowledge of matrix methods, which may be acquired as a corequisite, and ECON 2023, and an introductory statistics course or equivalent. (Typically offered: Fall)

ECON 6623. Econometrics II. 3 Hours.
Use of economic theory and statistical methods to estimate economic models. The treatment of measurement error and limited dependent variables and the estimation of multiple equation models and basic panel data models will be covered. Additional frontier techniques may be introduced. Prerequisite: ECON 6613. (Typically offered: Spring)

ECON 6633. Econometrics III. 3 Hours.
Use of economic theory and statistical methods to estimate economic models. Nonlinear and semiparametric/nonparametric methods, dynamic panel data methods, and time series analysis (both stationary and nonstationary processes) will be covered. Additional frontier techniques may be covered. Prerequisite: ECON 6613. (Typically offered: Spring)

ECON 6713. Industrial Organization I. 3 Hours.
This course will develop the theory of modern industrial organization. The latest advances in microeconomic theory, including game theory, information economics and auction theory will be applied to understand the behavior and organization of firms and industries. Theory will be combined with empirical evidence on firms, industries and markets. Prerequisite: ECON 6213 and ECON 6223. (Typically offered: Fall)

ECON 6723. Industrial Organization II. 3 Hours.
This course surveys firm decisions, including setting prices, choosing product lines and product quality, employing price discrimination, and taking advantage of market structure. It will also cover behavioral IO, which reconsiders the assumption that firms and consumers are perfectly rational and examines the role of regulation. Prerequisite: ECON 6133. (Typically offered: Spring)

ECON 6833. International Development I. 3 Hours.
A first graduate level course in development economics with a focus on foundational theoretical issues. We explore the causation, implications, and remedies for pervasive and persistent poverty in low-income countries. Emphasis will be primarily on microeconomics topics. May be taken either as a precursor to International Development Economics II or stand-alone. Prerequisite: ECON 6213, (ECON 6613 or AGEC 5613) or by instructor's permission. (Typically offered: Fall)

ECON 6843. International Development II. 3 Hours.
A second graduate level course in development economics that focuses on the empirical aspect of development in low-income countries. The course explores various microeconomics topics related to poverty, human capital accumulation, and their interactions with role of public policy. Prerequisite: ECON 6213, (ECON 6613 or AGEC 5613) or instructor consent. (Typically offered: Spring)

ECON 6913. Experimental Economics. 3 Hours.
The course develops advanced concepts in the use of controlled experiments to test economic theory and explore behavioral regularities relating to economics. The class focuses on the methodology of experimental economics while reviewing a variety of established results. Prerequisite: ECON 6213. (Typically offered: Fall)

ECON 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Education Reform (EDRE) Courses

EDRE 5053. Philosophy and History of Education and Education Reform. 3 Hours.
This course traces the historical development of the philosophical debates concerning education and its role in society as well as how those ideas and consequent demands for reform affected the educational system and its structures. (Typically offered: Spring Even Years)

EDRE 559V. Field Research. 1-6 Hour.
Directed graduate-level field research in education policy settings. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

EDRE 6023. Economics of Education. 3 Hours.
This course applies the principles of economic analysis to education and education reform. Topics include: Human capital and signaling theories; education labor markets; educational production functions; public policy and market forces. The course also features empirical evidence evaluating economic theories of education. (Typically offered: Spring Odd Years)

EDRE 6033. Politics of Education. 3 Hours.
This course explores historical and institutional forces that help shape education policymaking. Particular attention will be paid to the experience of past education reform movements as well as the influence of interest groups, federalism, bureaucracy, governance structures, public opinion, and judicial review on education policy. (Typically offered: Fall)

EDRE 6043. Finance and Education Policy. 3 Hours.
This course examines K-12 education finance from the standpoint of education reform policy. The tools of analysis include economics, public finance, law and political science. Topics include: revenue sources and fiscal federalism, standards-based reform and school finance, school funding formulas, adequacy lawsuits, the politics of school funding, school funding and markets. The course also features empirical evidence on the educational impact of education finance. (Typically offered: Spring Even Years)
EDRE 6053. Measurement of Educational Outcomes. 3 Hours.
This course will train students to consider the various types of outcome and assessment measures used for education at the K-12 level throughout the United States; further, the students will engage in analyses of research that relies on these various outcome measures. (Typically offered: Fall)

EDRE 6103. Quantitative Analytical Techniques for Education Policy. 3 Hours.
This course introduces students to the quantitative techniques required for the evaluation of education policies and interventions. The class will focus on the identification and estimation of causal effects, necessary assumptions, and how to deal with the failure of these assumptions. Major topics covered include randomized experiments, the ordinary least squares regression method, matching estimators, instrumental variable methods, regression discontinuity, difference in difference methods, and introduction to estimation strategies with panel data models. (Typically offered: Fall)

EDRE 6113. Advanced Quantitative Analytical Techniques for Education Policy. 3 Hours.
This course introduces students to advanced estimation methods and empirical models often used in education policy empirical research, such as Maximum Likelihood to estimate discrete choice models, censored models and selection models, duration models, Generalized Method of Moments to estimate dynamic panel data models, and bootstrapping of standard errors and simulation-based inference. Prerequisite: EDRE 6103. (Typically offered: Spring Odd Years)

EDRE 6213. Program Evaluation and Research Design. 3 Hours.
This course provides students with training in the methods used to generate evidence-based answers to questions regarding the efficacy and impacts of education programs. The central questions that motivate most educational program evaluations are: (1) What is the problem? (2) What policies or programs are in place to address the problem? (3) What is their effect? (4) What works better? (5) What are the relative benefits and costs of alternatives? (Typically offered: Fall)
This course is cross-listed with ESRM 6613.

EDRE 6223. Research Seminar in Education Policy. 3 Hours.
This course provides students with the opportunity to learn about education policy research by interacting directly with the leading scholars and practitioners in the field. Students will also gain a foundation in the field of education policy research by reading and discussing some of the foundering works of the field. (Typically offered: Fall)

EDRE 636V. Special Problems. 1-6 Hour.
Independent reading and investigation in education policy under faculty supervision. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

EDRE 6413. Issues in Education Policy. 3 Hours.
This course examines how K-12 education policy is designed and implemented in the United States. Students will develop a working knowledge of policymaking frameworks to examine major education policies of current interest and debate key policy issues that arise at each level of government. In great measure, the goals of the course will be accomplished through the consideration of opposing stances on key educational policy debates and issues that are of current import. (Typically offered: Spring)
This course is cross-listed with EDFD 5683.

EDRE 6423. Seminar in School Choice Policy. 3 Hours.
This course examines parental school choice - perhaps the most controversial education reform of our age. Students will be introduced to the full set of school choice policies, including charter schools and vouchers, and evaluate their benefits and drawbacks as educational interventions. (Typically offered: Fall Even Years)

EDRE 6433. Seminar in Education Accountability Policy. 3 Hours.
This course examines K-12 school and district accountability under state and Federal law (e.g. NCLB), as well as teacher and student accountability (e.g. exit exams). Topics include the theory of incentives and politics of tradeoffs, measurement issues of policy implementation, and statistical evidence on policy effects on performance. (Typically offered: Spring Odd Years)

EDRE 6443. Seminar in Education Leadership Policy. 3 Hours.
This course will examine the individual and systemic prerequisites of effective leadership of schools and school systems, and effective leadership techniques. It will consider the differences between public and private sector leadership. It will also explore ways to identify effective and ineffective leaders, and design and evaluate systems to recruit and train the former and reassign the latter. (Typically offered: Fall Odd Years)

EDRE 6453. Seminar in Teacher Quality and Public Policy. 3 Hours.
Examines how our public system of education shapes the preparation and continued professional development of K-12 teachers, and how that system has been influenced by standards-based education reform as well as efforts to enhance the quality of teaching and learning in public schools. Uses education reform legislation in several states as case studies to illustrate the successes and pitfalls of attempts to reform teacher education and licensure through public policy. (Typically offered: Spring Even Years)

EDRE 6463. Psychology of Education. 3 Hours.
This course explores psychological science findings that pertain to education research and policy with a focus on empirical evidence. Particular emphasis will be on studying individual differences in the context of education. Historical, methodological, and measurement perspectives will be introduced and psychological constructs studied and applied in educational contexts will be examined. (Typically offered: Spring Odd Years)

EDRE 674V. Internship in Education Policy. 1-6 Hour.
Internship at a public or private entity involved in the making or implementation of education policy. Paper required on a significant aspect of the internship experience. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular)

EDRE 699V. Special Topics. 1-3 Hour.
Topics vary depending on instructor. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

EDRE 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Irregular) May be repeated for degree credit.

Educational Foundations (EDFD) Courses

EDFD 5353. Philosophy of Education. 3 Hours.
Introduction to the method and attitude essential to effective analysis and interpretation of issues and values within a society reflecting cultural, ethnic, gender, and global diversity. Prerequisite: Graduate standing. (Typically offered: Irregular)

EDFD 5373. Psychological Foundations of Teaching and Learning. 3 Hours.
Psychological principles and research applied to classroom learning and instruction. Social, emotional, and intellectual factors relevant to topics such as readiness, motivation, discipline, and evaluation in the classroom. (Typically offered: Irregular)

EDFD 5573. Life-Span Human Development. 3 Hours.
Basic principles of development throughout the human life-cycle. Physical, cognitive, social, emotional, and personality development. (Typically offered: Fall, Spring and Summer)
EDFD 5673. Principles of Motivation. 3 Hours.
This course focuses on theories and concepts of human motivation. Students explore what motivates students to learn and examine strategies, techniques, and interventions that promote and sustain learner motivation. (Typically offered: Spring)

EDFD 5683. Issues in Educational Policy. 3 Hours.
This course examines how K-12 education policy is designed and implemented in the United States. Students will develop a working knowledge of policymaking frameworks to examine major education policies of current interest and debate key policy issues that arise at each level of government. (Typically offered: Fall, Spring and Summer)
This course is cross-listed with EDRE 6413.

EDFD 5773. Advanced Topics in Educational Psychology. 3 Hours.
This course provides an opportunity for advanced study of socio-cognitive variables that play a crucial role in working in administration, teaching, and the evaluation of the success of students and academic programs. Prerequisite: ESRM 6403 and EDFD 5373. (Typically offered: Fall Even Years)

**Educational Leadership (EDLE)**

**Courses**

EDLE 5003. Schools and Society. 3 Hours.
Schools and Society is an introduction to the social, structural, political and historical forces that have created the American school system. (Typically offered: Summer Even Years)

EDLE 5013. School Organization and Administration. 3 Hours.
Analysis of structure and organization of American public education; fundamental principles of school management and administration. (Typically offered: Fall; Summer Odd Years)

EDLE 5023. The School Principalship. 3 Hours.
Duties and responsibilities of the public school building administrator; examination and analysis of problems, issues, and current trends in the theory and practice of the principalship. (Typically offered: Spring and Summer)

EDLE 5033. Psychology of Learning. 3 Hours.
This course prepares educational leaders to create and sustain a learning centered environment in school settings. Students will study learning theory across the lifespan and apply it to the practice of instructional leadership, curriculum design, and staff development. (Typically offered: Spring; Summer Odd Years)

EDLE 5043. Leadership Ethics. 3 Hours.
Leadership Ethics is an experiential based course grounded in ethical decision making theory that uses case study and practice to study school based ethical dilemmas. (Typically offered: Fall; Summer Odd Years)

EDLE 5053. School Law. 3 Hours.
Legal aspects of public and private schooling: federal and state legislative statues and judicial decisions, with emphasis upon Arkansas public education. (Typically offered: Fall; Summer Odd Years)

EDLE 5063. Instructional Leadership, Planning, and Supervision. 3 Hours.
Instructional Leadership, Planning, and Supervision is designed to prepare practitioners to seize the role of educational leader at the school site level through the development of a vision that will be used to drive a data driven instructional school plan. (Typically offered: Fall; Summer Odd Years)

EDLE 5073. Research for Leaders. 3 Hours.
This course introduces research methodology that will support school leaders as consumers of educational research and supervisors of action research within their schools. Practical application of research for school leaders is emphasized. (Typically offered: Spring; Summer Odd Years)

EDLE 5083. Analytical Decision-Making. 3 Hours.
Analytical Decision Making is a performance based examination of the principles and practices related to the building administrator's role in the development, administration, and evaluation of curricular programs in public schools. This includes creating a school culture, fostering communication, aligning curriculum with state mandated standards, and staff development. (Typically offered: Spring Even Years; Summer)

EDLE 5093. Effective Leadership for School Improvement. 3 Hours.
A performance based examination of strategic planning, group facilitation and decision-making, organizational behavior and development, professional ethics and standards, student services administration, and principles of effective leadership. (Typically offered: Spring and Summer)

EDLE 574V. Internship. 1-6 Hour.
Supervised in-school/district experiences individually designed to afford opportunities to apply previously-acquired knowledge and skills in administrative workplace settings. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

EDLE 599V. Seminar. 1-6 Hour.
Important foundational topics in educational leadership that are current and critical will be taught in this Master's-level seminar. Topics range from the psychology of learning and leading to how schools and society interact in the 21st century. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EDLE 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

EDLE 6013. Problems of Practice for Educational Leaders. 3 Hours.
Problems of Practice is designed to extend and refine students' thinking, experience, and knowledge about the Education Doctorate (EdD), as well as selecting a Problem of Practice that can contribute to the following program goals: advanced analytical reasoning skills; positive impact on professional practice; and the refinement of the scholar-practitioner. (Typically offered: Summer)

EDLE 6023. School Facilities Planning and Management. 3 Hours.
School facilities planning, management, cost analysis, operations, and maintenance of the school plant. (Typically offered: Fall Odd Years)

EDLE 6053. School-Community Relations. 3 Hours.
Community analysis, politics and education; power groups and influences; school issues and public responses; local policy development and implementation; effective communication and public relations strategies. (Typically offered: Spring Even Years)

EDLE 605V. Independent Study. 1-6 Hour.
Independent study. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EDLE 6093. School District Governance: The Superintendency. 3 Hours.
Analysis of the organizational and governance structures of American public education at national, state, and local levels. (Typically offered: Fall Even Years)

EDLE 6103. School Finance. 3 Hours.
Principles, issues and problems of school funding formulae and fiscal allocations to school districts. (Typically offered: Spring Odd Years)

EDLE 6173. School Business Management. 3 Hours.
Fiscal and resource management in public schools: budgeting, insurance, purchasing, and accounting. (Typically offered: Summer Odd Years)

EDLE 6333. Advanced Legal Issues in Education. 3 Hours.
The examination and discussion of advanced legal issues affecting public school education. Prerequisite: Advanced graduate standing. (Typically offered: Fall Even Years)
EDLE 6433. Legal Aspects of Special Education. 3 Hours.
A study of litigation and legislation in special education, federal and state laws and
court cases, and due process hearings. (Typically offered: Irregular)
This course is cross-listed with SPED 6433.

EDLE 6503. Topics in Educational Research for School Administration. 3 Hours.
Application of educational research in the school setting by educational
administrators. Emphasis placed on the use of state and local school or district data,
data analysis, interpretation and reporting, hands-on experience with SPSS, and
the formal process of writing a research report. Prerequisite: Advanced graduate
standing. (Typically offered: Fall Odd Years)

EDLE 6513. Program Evaluation in Education. 3 Hours.
Program Evaluation in Education is designed to introduce students to concepts and
methods of policy and program evaluation. Emphasis will be placed on preparing
educational leadership students to conduct a program evaluation specialist project of
dissertation. (Typically offered: Summer)

EDLE 6523. Advanced Application of Educational Leadership. 3 Hours.
A review of seminal and current works on leadership as applied to the educational
setting. Provides knowledge of classic and contemporary strategies for leadership.
(Typically offered: Summer Odd Years)

EDLE 6533. Educational Policy. 3 Hours.
Examination of the research and theory related to the evolution of local, state, and
federal governance and educational policy. Emphasis given to the consideration of
procedures involving policy formulation, implementation, and analysis. (Typically offered:
Spring Odd Years)

EDLE 6543. Introduction to Qualitative Research. 3 Hours.
This course offers an introduction to the qualitative approach to research in the
Social Sciences. In particular, this course focuses on initial qualitative research
designs that support planning, problem solving, and evaluation for educational
leaders. Developing a conceptual framework, gaining an initial understanding of the
methods of data collection and analysis, and establishing credibility in qualitative
research are discussed. This course will be taught online using Blackboard and
will require synchronous online class meetings that will require a webcam and
microphone. (Typically offered: Fall)

EDLE 6553. Advanced Qualitative Methods in Educational Research. 3 Hours.
This course has been designed to provide graduate students with a more in-
depth understanding of qualitative research methods. Emphasis will be placed on
preparing educational leadership students to design a qualitative or mixed-method
dissertation study. Prerequisite: ESRM 6543 or HRWD 572V. (Typically offered:
Spring)

EDLE 674V. Internship. 1-6 Hour.
Internship. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6
hours of degree credit.

EDLE 680V. Educational Specialist Project. 1-6 Hour.
An original project, research project, or report required of all Ed.S. Degree
candidates. Prerequisite: Admission to the Ed.S. program. (Typically offered: Fall,
Spring and Summer)

EDLE 689V. Seminar. 1-6 Hour.
Seminar. Prerequisite: Advanced graduate standing. (Typically offered: Fall, Spring
and Summer) May be repeated for up to 6 hours of degree credit.

EDLE 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and
Summer) May be repeated for degree credit.

Educational Statistics and Research Methods (ESRM)

Courses
ESRM 5013. Research Methods in Education. 3 Hours.
General orientation course which considers the nature of research problems in
education and the techniques used by investigators in solving those problems.
Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

ESRM 5393. Statistics in Education and Health Professions. 3 Hours.
Applied statistics course for Master's degree candidates. Includes concepts and
operations for frequency distributions, graphing techniques, measures of central
tendency and variation, sampling, hypothesis testing, and interpretation of statistical
results. (Typically offered: Fall, Spring and Summer)

ESRM 5653. Educational Assessment. 3 Hours.
Introduction to measurement issues and basic test theory. Focus on types and
usage of assessment tools, data management, and analysis and interpretation of
data. Practical training in the utilization and interpretation of academic
achievement data in Arkansas. (Typically offered: Irregular)

ESRM 599V. Seminar. 1-6 Hour.
Seminar. (Typically offered: Irregular) May be repeated for up to 6 hours of degree
credit.

ESRM 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for
degree credit.

ESRM 605V. Independent Study. 1-6 Hour.
Independent study. (Typically offered: Fall, Spring and Summer)

ESRM 6403. Educational Statistics and Data Processing. 3 Hours.
Theory and application of frequency distributions, graphical methods, central
tendency, variability, simple regression and correlation indexes, chi-square,
sampling, and parameter estimation, and hypothesis testing. Use of the computer for
the organization, reduction, and analysis of data (required of doctoral candidates).
Prerequisite: ESRM 5013 or equivalent. (Typically offered: Fall, Spring and Summer)

ESRM 6413. Experimental Design in Education. 3 Hours.
Principles of experimental design as applied to educational situations. Special
emphasis on analysis of variance techniques used in educational research.
Prerequisite: ESRM 6403 or equivalent. (Typically offered: Spring)

ESRM 6423. Multiple Regression Techniques for Education. 3 Hours.
Introduction to multiple regression procedures for analyzing data as applied
in educational settings, including multicollinearity, dummy variables, analysis of
covariance, curvi-linear regression, and path analysis. Prerequisite: ESRM 6403.
(Typically offered: Fall)

ESRM 6453. Applied Multivariate Statistics. 3 Hours.
Multivariate statistical procedures as applied to educational research settings
including discriminant analysis, principal components analysis, factor analysis,
canonical correlation, and cluster analysis. Emphasis on use of existing computer
statistical packages. Prerequisite: ESRM 6413. (Typically offered: Spring)

ESRM 6513. Hierarchical Linear Modeling. 3 Hours.
This course covers the theory and applications of hierarchical linear modeling (HLM)
also known as multilevel modeling. Both the conceptual and methodological issues
for analyses of nested (clustered) data in using HLM will be reviewed, including
linear models, non-linear models, growth models, and some alternative designs.
Prerequisite: ESRM 6413 and ESRM 6423. (Typically offered: Fall Even Years)
ESRM 6523. Structural Equation Modeling. 3 Hours.
This course provides a detailed introduction to structural equation modeling (SEM) based on students’ previous knowledge of multiple linear regression. Topics include path analysis, confirmatory factor analysis, full latent variable models, estimation techniques, data-model fit analysis, model comparison, and other topics, potentially equivalent models, specification searches, latent mean models, parameter invariance, multi-group models, and models of discrete data. Prerequisite: ESRM 6423. (Typically offered: Spring)

ESRM 6533. Qualitative Research. 3 Hours.
Introduction of non-quantitative methods, including data collection through interviews, field observation, records research, internal and external validity problems in qualitative research. Prerequisite: ESRM 6403. (Typically offered: Fall and Spring)

ESRM 6543. Advanced Qualitative Research. 3 Hours.
Preparation for the conduct of qualitative research, structuring, literature reviews, data collection and analysis, and reporting results. Prerequisite: ESRM 6533. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

ESRM 6553. Advanced Multivariate Statistics. 3 Hours.
Builds on the foundation provided in Multivariate and introduces techniques that extend methodological elements of canonical, discriminant, factor analytic, and longitudinal analyses, providing the mathematical and theoretical foundations necessary for these designs. Prerequisite: ESRM 6453. (Typically offered: Spring Even Years)

ESRM 6613. Evaluation of Policies, Programs, and Projects. 3 Hours.
Introduction to evaluation in social science research, including why and how evaluations of programs, projects, and policies are conducted; includes analysis of actual evaluations in a variety of disciplines. Prerequisite: ESRM 6403. (Typically offered: Spring Even Years)

This course is cross-listed with EDRE 6213.

ESRM 6623. Techniques of Research in Education. 3 Hours.
Use of scientific method in attacking educational problems. Emphasis placed on the planning and design of research studies, collection of reliable and valid data, sampling methods, and analysis and interpretation of data. Prerequisite: ESRM 6403. (Typically offered: Spring and Summer)

ESRM 6633. Survey Research Methods. 3 Hours.
The course addresses all phases of conducting a survey research study, including conceptualization, sample selection, instrument development, and analysis and reporting of findings. Prerequisite: ESRM 6403. (Typically offered: Spring Even Years)

ESRM 6653. Measurement and Evaluation. 3 Hours.
Fundamentals of measurement: scales, scores, norms, reliability, validity. Test and scale construction and item analysis. Standardized measures and program evaluation models in decision making. Prerequisite: ESRM 6403. (Typically offered: Fall)

ESRM 668V. Practicum in Research. 1-6 Hour.
Practical experience in educational research on campus, in school systems, or in other agencies in educational program development. (Typically offered: Irregular)

ESRM 6753. Item Response Theory. 3 Hours.
Topics of measurement in the psychometric field focusing on item response theory; item level and test level analyses including differential item functioning, test dimensionality, computer adaptive testing, equating, and general evaluation and usage of measurement instruments. Prerequisite: ESRM 6653. (Typically offered: Spring Odd Years)

ESRM 699V. Seminar. 1-6 Hour.
Seminar. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ESRM 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Educational Technology (ETEC) Courses

ETEC 5203. Foundations of Educational Technology. 3 Hours.
Provides learners with a comprehensive survey of the major trends, issues, people, processes, and products that have significantly affected the evolution of the field of educational technology. (Typically offered: Spring and Summer)

ETEC 5213. Educational Media. 3 Hours.
Instruction in selecting, utilizing and evaluating instructional materials and equipment. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

ETEC 5243. Instructional Design Theory & Models. 3 Hours.
A study of the instructional development process as it pertains to the design and production of instructional materials which use modern technologies. Goal analysis, objectives, evaluation, instructional strategy development, production of an educational product, and revision of the instructional materials are considered. Prerequisite: Graduate standing. (Typically offered: Fall)

ETEC 5253. Information Technologies. 3 Hours.
Students perform intensive examinations of the role of new technologies and their implications for instructional practice. Emphasis is on identification and evaluation of new technologies in instructional environments. Establishing and maintaining learning environments, exploring selected theories and concepts, assessing potential uses of IT, and utilization of new technologies will occur. (Typically offered: Irregular)

ETEC 5263. Grant Writing in Instructional Technology. 3 Hours.
Students will have an opportunity to find grant funding sources, write a grant, and submit an actual grant proposal to an agency for consideration. Will survey research in instructional media over the past 60 years and learn specific criteria for reading and evaluating research reports and articles. Will investigate current issues and topics related to research and grant writing in instructional media. (Typically offered: Fall and Summer)

ETEC 5273. Advanced Design of Educational Media. 3 Hours.
Instruction in the planning and local production of instructional materials. Prerequisite: ETEC 5213. (Typically offered: Spring)

ETEC 5283. Field Experiences in Educational Technology. 3 Hours.
Field experience in educational technology settings. Prerequisite: Graduate standing and 6 hours of graduate work in educational technology. (Typically offered: Fall, Spring and Summer)

ETEC 5303. Learning with Computers in K-12 Classrooms. 3 Hours.
Students learn how technology can be used to support K-12 classroom environments. Various learning theories and technologies will be explored and projects will be developed that utilize technologies and current learning theories in K-12 settings. Emphasis is on identification, evaluation, and the effective use of technologies to support classroom environments. Prerequisite: Graduate standing. (Typically offered: Spring)

ETEC 5313. Principles in Visual Literacy. 3 Hours.
Students gain understanding of visual literacy research and learn to create graphics that support learning. Literature in the area of visual literacy and learning theories as well as tools that facilitate effective visual literacy will be used to create visuals that are clear, communicate well, and help enhance learner performance. (Typically offered: Spring and Summer)
ETEC 5373. Web Design. 3 Hours.  
Students design, create, and analyze Web sites by applying processes, standards and techniques used to identify target audience; ensure compliance with copyright and disability laws, measure effectiveness, and coordinate Web design. Topics include copyright and fair use, user and task analysis, usability, accessibility, testing, search engine optimization, and web analytics. Prerequisite: ETEC 5213 or equivalent experience. (Typically offered: Spring) May be repeated for up to 3 hours of degree credit.

ETEC 5743. Internship. 3 Hours.  
A supervised field placement in educational technology that provides experience consistent with the student's professional goals and training emphasis. Internship experiences are planning and directed under the guidance of a faculty member. On-campus and on-site supervision is required. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ETEC 600V. Master's Thesis. 1-6 Hour.  
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ETEC 6053. Special Problems in Educational Technology. 3 Hours.  
Individually designed and conducted studies of educational technology under the guidance of a faculty member. Negotiated learning contract with supervising faculty required before enrollment. On-campus supervision required. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ETEC 6223. Strategic Planning and IDT Programs. 3 Hours.  
The course offers readings and experiences intended to develop strategic planning knowledge, values, attitudes, and skills in future instructional design and technology leaders. Topics covered include strategic planning and leadership. (Typically offered: Fall)

ETEC 6243. Advanced Instructional Design. 3 Hours.  
This course explores advanced topics in instructional design to facilitate understanding of grounded models, advanced theories, and research. This course focuses on: 1) design and development of contextualized technology-supported learning environments; 2) analysis and application of advanced theoretical foundations of design; and 3) examination and critique of instructional design research. Prerequisite: ETEC 5243 or equivalent. (Typically offered: Spring)

ETEC 6253. Distance Learning. 3 Hours.  
An intensive examination of the role of telecommunications and distance education technologies and their implications for educational practices. Emphasis is on techniques of development, utilization and evaluation of telecommunication and distance education technologies in classroom environments. (Typically offered: Spring and Summer)

ETEC 6393. Issues and Trends in Instructional Design and Technology. 3 Hours.  
Critical challenges posed as a result of the increasing infusion of technology into the school and training environments are explored. The course prepares students to make and defend policy decisions and become conversant with current trends and issues in the field. (Typically offered: Fall)

---

**Electrical Engineering (ELEG) Courses**

**ELEG 4243. Analog Integrated Circuits. 3 Hours.**  
Theory and design techniques for linear and analog integrated circuits. Current mirrors, voltage to base emitter matching, active loads, compensation, level shifting, amplifier design techniques, circuit simulation using computer-assisted design programs. Prerequisite: ELEG 3224. (Typically offered: Irregular)

**ELEG 4253. Nanotechnology in Engineering & Medicine. 3 Hours.**  
The objective of this course is to present a concise and concurrent introduction to Nanotechnology and its applications in engineering and medicine, particularly for nanoelectronics, nanosensors and nanocomputing. This course presents basic aspects of the nanotechnology, its fabrication and imaging technologies and integration of biomolecules with electronic systems for the design of devices in nanoelectronics, nanobioelectronics and Nanomedicine. Prerequisite: Senior standing or instructor consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

**ELEG 4283. Mixed Signal Test Engineering I. 3 Hours.**  
Overview of mixed signal testing, the test specification process, DC and parametric measurements, measurement accuracy, tester hardware, sampling theory, DSP-based testing, analog channel testing, digital channel testing. Prerequisite: Senior or graduate standing. (Typically offered: Irregular)

**ELEG 4303. Introduction to Nanomaterials and Devices. 3 Hours.**  
This course provides the students with an introduction to nanomaterials and devices. The students will be introduced to the quantization of energy levels in nanomaterials, growth of nanomaterials, electrical and optical properties, and devices based on these nanomaterials, such as tunneling resonant diodes, transistors, detector, and emitters. Graduate students will be given additional or different assignments. Graduate students will be expected to explore and demonstrate an understanding of the material with a greater level of depth and breadth than the undergraduates. Each group of students will have different expectations and grading systems. The instructor will prepare and distribute two distinct syllabi. Corequisite: ELEG 4203. Prerequisite: ELEG 3214 and PHYS 2074. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

**ELEG 4463L. Control Systems Laboratory. 3 Hours.**  
Experimental study of various control systems and components. The use of programmable logic controllers in the measurement of systems parameters, ladder logic applications, process-control applications, and electromechanical systems. Prerequisite: ELEG 3924 and ELEG 3124. (Typically offered: Irregular)

**ELEG 4603. Deterministic Digital Signal Processing System Design. 3 Hours.**  
Design of Digital Signal Processing systems with deterministic inputs. Sampling, quantizing, oversampling, ADC trade-offs, distortion, equalizers, anti-aliasing, coherency, frequency domain design, audio and video compression. Prerequisite: ELEG 3124. (Typically offered: Irregular)

**ELEG 4623. Communication Systems. 3 Hours.**  
Various modulation systems used in communications. AM and FM fundamentals, pulse modulation, signal to noise ratio, threshold in FM, the phase locked loop, matched filter detection, probability of error in PSK, FSK, and DPSK. The effects of quantization and thermal noise in digital systems. Information theory and coding. Pre- or Corequisite: ELEG 3143. (Typically offered: Irregular)

**ELEG 487V. Special Topics in Electrical Engineering. 1-3 Hour.**  
Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
ELEG 4963. CPLD/FPGA Based System Design. 3 Hours.
Field Programmable logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Corequisite: Lab component. Prerequisite: ELEG 4914. (Typically offered: Irregular)
This course is cross-listed with CSCE 4353.

ELEG 4983. Computer Architecture. 3 Hours.
Design of a single board computer including basic computer organization, memory subsystem design, peripheral interfacing, DMA control, interrupt control, and bus organization. Prerequisite: ELEG 3924. (Typically offered: Irregular)
This course is cross-listed with CSCE 4213.

ELEG 5173L. Digital Signal Processing Laboratory. 3 Hours.
Use of DSP integrated circuits. Lectures, demonstrations, and projects. DSP IC architectures and instruction sets. Assembly language programming. Development tools. Implementation of elementary DSP operations, difference equations, transforms and filters. Prerequisite: ELEG 3124. (Typically offered: Irregular)

ELEG 5193L. Advanced DSP Processors Laboratory. 3 Hours.
Familiarization with, and use of, advanced DSP processors. Parallel processor configurations, timing consideration, specialized programming techniques, and complex pipelines. Prerequisite: ELEG 5173L. (Typically offered: Irregular)

ELEG 5203. Semiconductor Devices. 3 Hours.
Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of p/n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5213. Integrated Circuit Fabrication Technology. 3 Hours.
Theory and techniques of integrated circuit fabrication technology; crystal growth, chemical vapor deposition, impurity diffusion, oxidation, ion implantation, photolithography and medulization. Design and analysis of device fabrication using SUPREM and SEDAN. In-process analysis techniques. Student review papers and presentations on state of the art fabrication and device technology. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Irregular)

ELEG 5223. Design and Fabrication of Solar Cells. 3 Hours.
Solar insolation and its spectral distribution/ p-n junction solar cells in dark and under illumination; solar cell parameters efficiency limits and losses; standard cell technology; energy accounting; design of silicon solar cells using simulation; fabrication of designed devices in the lab and their measurements. Students cannot receive credit for both ELEG 4223 and ELEG 5223. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Irregular)

ELEG 5243L. Microelectronic Fabrication Techniques and Procedures. 3 Hours.
The Thin-Film Fabrication course is designed to prepare students to use the thin-film equipment and processes available at the Engineering Research Center's thin-film cleanroom. The process modules to be trained on include lithography, metal deposition and etching, oxide deposition, growth and etching, reactive dry etching, tantalum anodization, photodefinable spin-on dielectric and electroplating. The related metrology modules include microscope inspection, spectrophotometric measurement of oxide, profilometry and four-point probe measurements. Prerequisite: ELEG 5273. (Typically offered: Irregular)

ELEG 5253L. Integrated Circuit Design Laboratory I. 3 Hours.
Design and layout of large scale digital integrated circuits. Students design, check, and simulate digital integrated circuits which will be fabricated and tested in I.C. Design Laboratory II. Topics include computer-aided design, more in-depth coverage of topics from ELEG 4233, and design of very large scale chips. Prerequisite: ELEG 4233 or ELEG 5923. (Typically offered: Irregular)
This course is cross-listed with CSCE 5253L.

ELEG 5273. Electronic Packaging. 3 Hours.
An introductory treatment of electronic packaging, from single chip to multichip, including materials, substrates, electrical design, thermal design, mechanical design, package modeling and simulation, and processing considerations. Credit cannot be earned for both MEEG 5273 and ELEG 5273. Prerequisite: Graduate standing. (Typically offered: Irregular)
This course is cross-listed with MEEG 5273.

ELEG 5283. Mixed Signal Test Engineering II. 3 Hours.
Focus calibrations, DAC testing, ADC testing, DIB design, Design for Test, Data Analysis, and Test Economics. Prerequisite: ELEG 4283. (Typically offered: Irregular)

ELEG 5293L. Integrated Circuits Fabrication Laboratory. 3 Hours.
Experimental studies of silicon oxidation, solid-state diffusion, photolithographical materials and techniques, bonding and encapsulation. Fabrication and testing of PN diodes, NPN transistors and MOS transistors. Prerequisite: ELEG 5213. (Typically offered: Irregular)

ELEG 5313. Power Semiconductor Devices. 3 Hours.
Carrier transport physics; breakdown phenomenon in semiconductor devices; power bipolar transistors, thyristors, power junction field-effect transistors, power field-controlled diodes, power metal-oxide-semiconductor field-effect transistors, and power MOS-bipolar devices. Prerequisite: ELEG 4203 or graduate standing. (Typically offered: Irregular)

ELEG 5323. Semiconductor Nanostructures I. 3 Hours.
This course is focused on the basic theoretical and experimental analyses of low dimensional systems encountered in semiconductor heterojunctions and nanostructures with the emphasis on device applications and innovations. Prerequisite: ELEG 4203 or instructor permission. (Typically offered: Irregular)

ELEG 5333. Semiconductor Nanostructures II. 3 Hours.
This course is a continuation of ELEG 5323 Semiconductors Nanostructures I. It is focused on the transport properties, growth, electrical and optical properties of semiconductor nanostructures, and optoelectronic devices. Prerequisite: ELEG 5323 or instructor permission. (Typically offered: Irregular)

ELEG 5343. Organic Electronics Technology. 3 Hours.
Students become familiar with recent developments in and process technology for organic material based devices and sensors in the classroom, but also gain hands on experience with fabrication processes using micro-fabrication tools in the lab. (Typically offered: Irregular)

ELEG 5353. Semiconductor Optoelectronic Devices. 3 Hours.
This course will provide graduate students a detailed background in semiconductor optoelectronic devices such as light emitting diodes and lasers, photodetectors, solar cells, modulators. The applications of these devices will also be discussed. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Spring Odd Years)

ELEG 5363. Semiconductor Material and Device Characterization. 3 Hours.
This course provides an overview of semiconductor characterization techniques in industry: Electrical measurements, Optical measurements, Electron and ion beam measurements, X-ray and probe measurements. Prerequisite: ELEG 4203 or ELEG 5203 and instructor consent. (Typically offered: Irregular)

ELEG 5383. Introduction of Integrated Photonics. 3 Hours.
This course is designed to provide junior and senior graduate students detailed knowledge of integrated photonics by using silicon photonics as an example. The course covers a cycle of design, fabrication, and testing of photonic devices by using analytic and numerical methods. The course will focus on designing an interferometer, which is widely used in communication and sensing applications. Students will be exposed to use the state-of-art design simulation tool, Numerical, to design the photonic circuits and to evaluate the performances. In the course project, students will extend the design rules to design a set of components to be used for integrated microwave photonics based on Ge on Si, SiGeSn, or Si3N4 on sapphire platform. Prerequisite: ELEG 4203 and ELEG 5353. (Typically offered: Irregular)
ELEG 5393. Electronic Materials. 3 Hours.
This is a lecture course designed to provide a fundamental introduction to materials science. Upon this fundamental basis, we will survey many of the properties and materials relevant to modern electronics. This course will cover semiconductors, but only briefly. The focus will be on properties and materials not generally well covered in other electrical engineering courses from a materials perspective. This will include, but not be limited to, metals, dielectrics, and magnetic and optical materials. Prerequisite: Graduate standing; A knowledge of quantum mechanics is helpful but not required. (Typically offered: Spring)

ELEG 5403. Control Systems. 3 Hours.
Mathematical modeling of dynamic systems, stability analysis, control systems architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems; lead, lag, PID compensators. Special topics on microprocessor implementation. Credit not given for both ELEG 4403 and ELEG 5403. Prerequisite: Graduate standing or ELEG 3124. (Typically offered: Irregular)

ELEG 5413. Modern Control Systems. 3 Hours.
A second course in linear control systems. Emphasis on multiple-input and multiple-output systems: State-space analysis, similarity transformations, eigenvalue and eigenvector decomposition, stability in the sense of Lyapunov, controllability and observability, pole placement, quadratic optimization. Credit not given for both ELEG 4413 and ELEG 5413. Prerequisite: ELEG 5403 or equivalent. (Typically offered: Irregular)

ELEG 5423. Optimal Control Systems. 3 Hours.
Basic concepts, conditions for optimality, the minimum principle, the Hamilton Jacobi equation, structure and properties of optimal systems. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5433. Digital Control Systems. 3 Hours.
Signal processing in continuous-discrete systems. System modeling using the z-transform and state-variable techniques. Analysis and design of digital control systems. Digital redesign for continuous control. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5443. Nonlinear Systems Analysis and Control. 3 Hours.
Second-order nonlinear systems. Nonlinear differential equations. Approximate analysis methods. Lyapunov and input-output stability. Design of controllers, observers, and estimators for nonlinear systems. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5453. Adaptive Filtering and Control. 3 Hours.

ELEG 5463. Biomedical Control Systems. 3 Hours.
Study of control systems analysis and design as applied to human physiological systems: Modeling and dynamics of biological processes, biomedical sensors, time and frequency domain analysis, identification of physiological systems. Overview of medical device regulations. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5473. Power System Operation and Control. 3 Hours.
Study of the control and operation of electric power systems: Modeling, dynamics, and stability of three-phase power systems. Design and implementation of control systems related to generation and transmission. Overview of the related industry and government regulations for power system protection and reliability. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5503. Design of Advanced Power Distribution Systems. 3 Hours.
ELEG 5503 Design of Advanced Power Distribution Systems. 3 credit hours. Design considerations of electric power distribution systems, including distribution transformer usage, distribution system protection implementation, primary and secondary networks design, applications of advanced equipment based on power electronics, and use of capacitors and voltage regulation. Students may not receive graduate credit for both ELEG 4503 and ELEG 5503. Prerequisite: ELEG 3304 or graduate standing. (Typically offered: Irregular)

ELEG 5513. Power Systems Analysis. 3 Hours.
Modeling and analysis of electric power systems: Energy sources and conversion; load flow analysis; reference frame transformations; symmetrical and unsymmetrical fault conditions; load forecasting and economic dispatch. Credit not given for both ELEG 4513 and ELEG 5513. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5523. Electric Power Quality. 3 Hours.
The theory and application of electric power quality for commercial, industrial and residential power systems. Specific topics include harmonics, voltage sags, wiring and grounding, instrumentation, distributed generation and power electronic systems, and site surveys. Case studies complement the theoretical concepts. Prerequisite: ELEG 3304 or graduate standing. (Typically offered: Irregular)

ELEG 5533. Power Electronics and Motor Drives. 3 Hours.
Fundamentals of power electronics, diode bridge rectifiers, inverters, general concepts on motor drives, induction motor drives, synchronous motor drives, and dc motor drives. Students may not receive credit for both ELEG 4533 and ELEG 5533. Prerequisite: Graduate standing or ELEG 3224 and ELEG 3304. (Typically offered: Irregular)

ELEG 5543. Introduction to Power Electronics. 3 Hours.
Presents basics of emerging areas in power electronics and a broad range of topics such as power switching devices, electric power conversion techniques and analysis, as well as their applications. Students may not receive credit for both ELEG 5433 and ELEG 4543. Prerequisite: ELEG 2114 and ELEG 3214, or graduate standing. (Typically offered: Irregular)

ELEG 5553. Switch Mode Power Conversion. 3 Hours.
Basic switching converter topologies, control scheme of switching converters, simulation of switching converters, resonant converters, isolated converters, dynamic analysis of switching converters. Students will not receive graduate credit for both ELEG 4553 and ELEG 5553. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5563. EMI in Power Electronics Converters: Generation, Propagation and Mitigation. 3 Hours.
Concepts of electro-magnetic-interference issues in power electronics converters. Basic concepts of EMI measurement, modeling and mitigation, with a focus on conducted EMI in power electronics converters. The course is structured with lectures and a lab session. Students can not receive credit for both ELEG 4563 and ELEG 5563. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5613. Introduction to Telecommunications. 3 Hours.
Overview of public and private telecommunication systems; traffic engineering; communications systems basics, information technology, electromagnetics, and data transmission. Prerequisite: ELEG Graduate Standing or ELEG 3124. (Typically offered: Irregular)

ELEG 5623. Information Theory. 3 Hours.
Continuous and discrete source and channel models, measure of information, channel capacity, noisy-channel coding theorem, coding and decoding techniques. Prerequisite: ELEG 3143 or ELEG 4623 or graduate standing. (Typically offered: Irregular)
ELEG 5633. Detection and Estimation. 3 Hours.
Binary and multiple decisions for single and multiple observations; sequential, composite, and non-parametric decision theory; estimation theory; sequential, non-linear, and state estimation; optimum receiver principles. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5653. Artificial Neural Networks. 3 Hours.
Fundamentals of artificial neural networks, both theory and practice. Teaches basic concepts of both supervised and unsupervised learning, and how they are implemented using artificial neural networks. Topics include the perceptron, back propagation, the competitive Hamming net, self-organizing feature maps, topological considerations, requirements for effective generalization, subpattern analysis, etc. Prerequisite: MATH 2584. (Typically offered: Irregular)

ELEG 5663. Communication Theory. 3 Hours.
Principles of communications. Channels and digital modulation. Optimum receivers and algorithms in the AWGN and fading channels. Coherent, non-coherent detectors and matched filters. Bounds on the performance of communications, and comparison of communications systems. Background in stochastic processes and probabilities, communication systems is desirable. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for credit.

ELEG 5693. Wireless Communications. 3 Hours.
Comprehensive course in fast developing field of wireless mobile/cellular personal telecommunications. Topics include cellular system structures, mobile radio propagation channels, etc. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5703. RF & Microwave Design. 3 Hours.
An introduction to microwave design principles. Transmission lines, passive devices, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as it relates to radar and communications systems will be reviewed. Selected topics for device fabrication and measurements will be covered. Cannot get credit if student has taken ELEG 4703. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 5723. Advanced Microwave Design. 3 Hours.
This course is an advanced course in microwave design building on the introduction to microwave design course. A detailed discussion of active devices, biasing networks, mixers, detectors, Microwave Monolithic Integrated Circuits (MMIC), and wideband matching networks will be provided. In addition, a number of advanced circuits will be analyzed. Prerequisite: ELEG 3704 and ELEG 4703 or ELEG 5703. (Typically offered: Irregular)

ELEG 5763. Advanced Electromagnetic Scattering & Transmission. 3 Hours.
Reflection and transmission of electromagnetic waves from a flat interface, the Poynting theorem, the complex and average power, the rectangular wave guides, TE and TM modes, radiation from antennas in free space and introduction to computational electromagnetics. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 5773. Electronic Response of Biological Tissues. 3 Hours.
Understand the electric and magnetic response of biological tissues with particular reference to neural and cardiovascular systems. Passive and active forms of electric signals in cell communication. We will develop the central electrical mechanisms from the membrane channel to the organ, building on those that are common to many electrically active cells in the body. Analysis of Nernst equation, Goldman equation, linear cable theory, and Hodgkin-Huxley Model of action potential generation and propagation. High frequency response of tissues to microwave excitation, dielectric models for tissue behavior, Debye, Cole-Cole models. Role of bound and free water on tissue properties. Magnetic response of tissues. Experimental methods to measure tissue response. Applications to Electrocardiography & Electroencephalography, Microwave Medical Imaging, RF Ablation will be discussed. Students may not receive credit for both ELEG 4773 and ELEG 5773. Prerequisite: MATH 2584, ELEG 3704 or BIOL 2533 or equivalent. (Typically offered: Irregular)

ELEG 5783. Introduction to Antennas. 3 Hours.
Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Students cannot get credit for ELEG 5783 if they have taken ELEG 4783. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 587V. Special Topics in Electrical Engineering. 1-3 Hour.
Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ELEG 588V. Special Problems. 1-6 Hour.
Opportunity for individual study of advanced subjects related to a graduate electrical engineering program to suit individual requirements. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ELEG 5903. Engineering Technical Writing. 3 Hours.
In this course, advanced graduate students (PhD candidates and selected MS students) will be trained in rephrasing and preparing technical papers, including scientific reports, Illustrations step by step will be explained. Each student is required to prepare technical papers based on their own research results and will be guided from selecting a title to a finished product. The emphasis will be placed on the structures of the articles including figures and table preparation, abstract writing, citations and references, and acknowledgments. The students will also be trained to prepare letters to the journals' editors and how to respond to reviewers' comments. Prerequisite: Graduate standing. (Typically offered: Fall)

ELEG 5914. Advanced Digital Design. 4 Hours.
To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Students may not receive credit for both ELEG 5914 and ELEG 4914 or CSCE 4914. Corequisite: Lab component. Prerequisite: ELEG 2904 or CSCE 2114. (Typically offered: Irregular)

ELEG 5923. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both ELEG 4233 and ELEG 5923. Prerequisite: ELEG 3214 or ELEG 3933 and MATH 2584. (Typically offered: Fall)

ELEG 5993. Mixed-signal Modeling and Simulation. 3 Hours.
Study of basic analog, digital & mixed signal simulation solution methods. Modeling with hardware description languages. Use of state-of-the-art simulators and HDLs. Students may not receive credit for both ELEG 4293 and ELEG 5993. Prerequisite: ELEG 3224 or graduate standing. (Typically offered: Irregular)
ELEG 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ELEG 6801. Graduate Seminar. 1 Hour.
Papers presented by candidates for the Doctor of Philosophy degree in electrical engineering on current research or design problems in the field of electrical engineering. (Typically offered: Fall, Spring and Summer)

ELEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

English (ENGL)

Courses

ENGL 5003. Composition Pedagogy. 3 Hours.
Introduction to teaching college composition. Designed for graduate assistants at the University of Arkansas. (Typically offered: Fall)

ENGL 5023. Writing Workshop: Fiction. 3 Hours.
Fiction writing workshop. Prerequisite: Creative Writing MFA students only. (Typically offered: Irregular) May be repeated for up to 24 hours of degree credit.

ENGL 5033. Writing Workshop: Poetry. 3 Hours.
Poetry writing workshop. Prerequisite: Creative Writing MFA students only. (Typically offered: Irregular) May be repeated for up to 24 hours of degree credit.

ENGL 5043. Translation Workshop. 3 Hours.
Problems of translation and the role of the translator as both scholar and creative writer; involves primarily the discussion in workshop of the translations of poetry, drama, and fiction done by the students, some emphasis upon comparative studies of existing translations of well-known works. Primary material will vary. Prerequisite: Reading knowledge of a foreign language and Creative Writing MFA students only. (Typically offered: Irregular) May be repeated for up to 24 hours of degree credit. This course is cross-listed with WLLC 504V.

ENGL 5063. English Language and Composition for Teachers. 3 Hours.
Subject matter and methods of approach for the teaching of composition in high school. (Typically offered: Fall and Spring)

ENGL 507V. Creative Non-Fiction Workshop. 1-3 Hour.
The theory and practice of the "New Journalism" with a study of its antecedents and special attention to the use of "fictional" techniques and narrative point of view to make more vivid the account of real people and real events. (Typically offered: Irregular)

ENGL 5083. Professional Topics. 3 Hours.
Specialized topics related to professional issues in the humanities, e.g. academic and alternative-academic job searches, publication workshops, public humanities, and/or the teaching of language and literature at various levels. (Typically offered: Irregular)

ENGL 510V. Readings in English and American Literature. 1-6 Hour.
Open to Honors candidates and graduate students. Prerequisite: Departmental approval and instructor approval required. (Typically offered: Irregular) May be repeated for degree credit.

ENGL 5173. Advanced Studies in Medieval Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5183. The Structure of Present English. 3 Hours.
Structural analysis of the language. (Typically offered: Spring)

ENGL 5193. Graduate Internship in English. 3 Hours.
Internship changes depending on availability and student interest. Departmental consent required. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENGL 5203. Introduction to Graduate Studies. 3 Hours.
Develop knowledge and strategies for successfully negotiating graduate work and the profession. Topics covered include, but are not limited to, scholarly habits and practices, writing and publishing skills, scholarly associations, journals, conferences, university structures, and career paths. Emphasis on the development of individual academic and professional goals. (Typically offered: Irregular)

ENGL 5213. Portfolio Workshop. 3 Hours.
Workshop designed for students in the M.A. Program in English who are using the Portfolio Option to complete the program. Instructor consent required. (Typically offered: Spring)

ENGL 5223. Advanced Studies in Renaissance Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5233. Craft of Translation: I. 3 Hours.
An examination of the principal challenges that confront translators of literature, including the recreation of style, dialect, ambiguities, and formal poetry; vertical translation; translation where multiple manuscripts exist; and the question of how literal a translation should be. (Typically offered: Irregular)

ENGL 5243. Special Topics. 3 Hours.
Designed to cover subject matter not offered in other courses. (Typically offered: Irregular) May be repeated for degree credit.

ENGL 5253. Craft of Fiction: I. 3 Hours.
Such aspects of the genre as scene, transition, character, and conflict. Discussion is limited to the novel. (Typically offered: Irregular)

ENGL 5273. Craft of Poetry: I. 3 Hours.
An examination of perception, diction, form, irony, resolution, and the critical theories of the major writers on poetry, such as Dryden, Coleridge, and Arnold. (Typically offered: Irregular)

ENGL 5283. Craft of Fiction: II. 3 Hours.
Second part of the study of the techniques of fiction. Discussion is limited to the short story. Prerequisite: ENGL 5263. (Typically offered: Irregular) May be repeated for degree credit.

ENGL 5293. Craft of Poetry: II. 3 Hours.
Second part of the study of the techniques of poetry; independent study of a poet or a problem in writing or criticism of poetry. (Typically offered: Irregular)

ENGL 5313. Introduction to Literary Theory. 3 Hours.
An advanced introductory survey of a number of theoretical approaches to literature. (Typically offered: Irregular)

ENGL 5403. Advanced Studies in Nineteenth-Century British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5413. Advanced Studies in Modern and Contemporary British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5463. Descriptive Linguistics. 3 Hours.
A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Fall) This course is cross-listed with WLLC 5463, ANTH 5473.

ENGL 5513. Document Design for Technical Writers. 3 Hours.
Focuses on the role of document design in technical and professional writing. Covers industry standard software and theories of rhetorically-centered document design. Special emphasis on creating print-ready technical documents such as manuals, catalogs, and infographics. (Typically offered: Fall Odd Years)
ENGL 5523. Technical Writing for Online Audiences. 3 Hours.
Investigates the medium-specific challenges of preparing technical documents for online audiences. Covers user-centered theory, strategies, and skills for online writing, HTML, CSS, and web standards. Specific focus on creating organizational websites with editorial workflows geared towards technical writers. (Typically offered: Fall Even Years)

ENGL 5533. Technical Writing Praxis. 3 Hours.
Focuses on the process of applying theory to situated practice in technical writing. The first portion of the course will lay out the fundamentals of technical writing theory, with the second half situating that theory within genre-specific practice. Second-half topics will vary by instructor interest and expertise. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

ENGL 5543. Advanced Studies in U.S. Latino/Latina Literature and Culture. 3 Hours.
The study of works of U.S. Latino/a literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5563. Advanced Studies in Native American Literature and Culture. 3 Hours.
The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5583. Advanced Studies in Arab American Literature and Culture. 3 Hours.
The study of works of Arab American literature and criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5593. Advanced Studies in Gender, Sexuality, and Literature. 3 Hours.
The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5603. World Literature and Culture in English. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5623. The Bible as Literature. 3 Hours.
The several translations of the Bible; its qualities as great literature; its influence upon literature in English; types of literary forms. (Typically offered: Irregular)
This course is cross-listed with WLIT 5623.

ENGL 5633. English Drama from Its Beginning to 1642. 3 Hours.
Early forms, Tudor drama, Shakespeare's contemporaries, and Stuart drama to the closing of the theatres. (Typically offered: Irregular)

ENGL 5653. Shakespeare: Plays and Poems. 3 Hours.
An introduction to a broad selection of Shakespeare's work. (Typically offered: Irregular)

ENGL 569V. Seminar in Film Studies. 1-3 Hours.
Research, discussion; papers on a variety of film genres and areas including the new American film, the science-fiction film, directors, film comedy, the experimental film, criticism, the film musical. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with COMM 569V.

ENGL 5703. Advanced Studies in American Literature and Culture Before 1900. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5723. Advanced Studies in Literature and Culture of the American South. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5753. Advanced Studies in Postcolonial Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5803. Advanced Studies in Modern and Contemporary American Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5853. Advanced Studies in African American Literature and Culture. 3 Hours.
The study of works of African American literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5923. Advanced Studies in Film and Media. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5933. Advanced Studies in Popular Culture and Popular Genres. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5943. Advanced Studies in Criticism and Literary Theory. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5953. Advanced Studies in Literary History. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5963. Advanced Studies in Technical Writing and Public Rhetorics. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. Course will cover various topics relevant to students working in Technical Writing and Public Rhetorics. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENGL 5973. Advanced Studies in Rhetoric and Composition. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6113. Seminar in Medieval Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6193. The Development of English. 3 Hours.
Intensive course in the fundamentals of linguistic study and their application to the history of English from prehistoric times to the present. (Typically offered: Fall)

ENGL 6203. Seminar in Renaissance Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6243. Seminar in Special Topics. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
ENGL 6443. Seminar in Nineteenth-Century British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6513. Seminar in Modern and Contemporary British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6543. Seminar in U.S. Latino/Latina Literature and Culture. 3 Hours.
The study of works of U.S. Latino/a literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6553. Seminar in Native American Literature and Culture. 3 Hours.
The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6563. Seminar in Arab American Literature and Culture. 3 Hours.
The study of works of Arab American literature and criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. Research paper required. No knowledge of Arabic necessary. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6593. Seminar in Gender, Sexuality, and Literature. 3 Hours.
The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6723. Seminar in American Literature and Culture Before 1900. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6733. Seminar in Literature and Culture of the American South. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6763. Seminar in Postcolonial Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6803. Seminar in Modern and Contemporary American Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6853. Seminar in African American Literature and Culture. 3 Hours.
The study of works of African American literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6883. Seminar in Postcolonial Literature and Culture. 3 Hours.
The study of works of postcolonial literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6923. Seminar in Film and Media. 3 Hours.
Extensive research into, and discussion of, a focused topic in film studies, with emphasis upon film as text. Extended project required. Course topic varies.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6933. Seminar in Popular Culture and Popular Genres. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6943. Seminar in Criticism and Literary Theory. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6953. Seminar in Literary History. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6973. Seminar in Rhetoric and Composition. 3 Hours.
Subject matter changes depending on student interest and faculty expertise.
(Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 698V. Master’s Thesis. 1-6 Hour.
Master’s thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ENGL 699V. Master of Fine Arts Thesis. 1-6 Hour.
Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ENGL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Entomology (ENTO)

Courses

ENTO 500V. Special Problems. 1-4 Hour.
Special problems. Prerequisite: Graduate standing. (Typically offered: Fall and Summer) May be repeated for up to 4 hours of degree credit.

ENTO 5013. Morphology of Insects. 3 Hours.
Origin, evolution, and functional significance of external insect structure. Structure and function of major internal systems. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. (Typically offered: Fall Odd Years)

ENTO 5024. Insect Diversity and Taxonomy. 4 Hours.
Principles and practices of insect classification and identification with emphasis on adult insects. 2.5 hours lecture, 4 hours lab. Prerequisite: ENTO 3013 or instructor consent. Corequisite: Lab component. (Typically offered: Fall) This course is cross-listed with BIOL 5024.

ENTO 5043. Apiculture. 3 Hours.
To acquaint the student with social insects in general and honey bees in particular, to promote an interest in apiculture as a hobby, occupation, and/or science, to give the students the basic knowledge of how to keep honey bees, and to increase awareness of the contribution that pollinating insects make to agriculture, natural ecosystems, and human life. Prerequisite: Instructor consent. (Typically offered: Spring Odd Years)

ENTO 5053. Insect Ecology. 3 Hours.
To develop an understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. 2 hours lecture/2 hours lab. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall Even Years) This course is cross-listed with BIOL 5053.

ENTO 510V. Special Topics. 1-3 Hour.
Topics not covered in other courses or a more intensive study of specific topics in entomology. (Typically offered: Irregular) May be repeated for degree credit.
ENTO 5113. Insect Behavior and Chemical Ecology. 3 Hours.
Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Spring Even Years)
This course is cross-listed with BIOL 5113.

ENTO 5123. Biological Control. 3 Hours.
Theoretical and practical basis for biological control of arthropod pests and weeds via parasites, predators, and pathogens. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall Odd Years)

ENTO 5133. Insect Molecular Genetics. 3 Hours.
A hands on course in insect molecular genetic techniques including molecular diagnostics and population genetics. Students will learn how to apply advanced molecular genetic methodologies and Internet database resources to insects that they are using for their graduate research. (Typically offered: Spring Even Years)
This course is cross-listed with BIOL 5133.

ENTO 5153. Insect Pest Management. 3 Hours.
Study of principles and concept of insect pest management. Areas covered include a survey of arthropod pests and damage, population dynamics, damage thresholds, physiological units, prediction models, surveillance, arthropod sampling, strategies and tactics utilized to maintain pest populations below economic injury levels. Prerequisite: Instructor consent. (Typically offered: Spring Odd Years)

ENTO 5163. Advanced Applied Entomology. 3 Hours.
Topics will include the integration of tactics, integration of disciplines and specific case histories in insect management, or use of insects to manage weeds. Prerequisite: Instructor consent. (Typically offered: Spring Even Years)

ENTO 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ENTO 6071. Seminar. 1 Hour.
Fall: special topics not covered in regular course work. Spring: critical review of research papers in entomology. Seminar will be taken by graduate student majors for both semesters. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ENTO 6113. Insect Physiology and Molecular Biology. 3 Hours.
Overview of insect physiology and modern molecular techniques to study physiological processes. Previous knowledge of basic entomology is helpful, but not required. Two lectures per week (1 hour 20 minutes each). (Typically offered: Spring Even Years)
This course is cross-listed with BIOL 6113.

ENTO 6213. Insect Toxicology. 3 Hours.
Toxicology of chemicals to insects and humans including techniques of testing collecting data, and factors that influence reactions to different classes of insecticides. Previous knowledge of organic physiological chemistry is helpful, but not required. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall Odd Years)

ENTO 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Environmental Dynamics (ENDY) Courses

ENDY 5043. GIS Analysis and Modeling. 3 Hours.
Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. (Typically offered: Spring)
This course is cross-listed with GEOS 5653, ANTH 5653.

ENDY 5053. Quaternary Environments. 3 Hours.
An interdisciplinary study of the Quaternary Period including dating methods, deposits soils, climates, tectonics and human adaptations. (Typically offered: Fall)
This course is cross-listed with ANTH 5053, GEOS 5053.

ENDY 5113. Global Change. 3 Hours.
Examines the interacting natural and anthropogenic factors involved in global change, concentrating on climate variability and change. Prerequisite: Graduate standing or instructor's approval. (Typically offered: Spring)
This course is cross-listed with GEOS 5113.

ENDY 5153. Environmental Site Assessment. 3 Hours.
Principles, problems, and methods related to conducting an environmental site assessment. An applied course covering field site assessment, regulatory documentation, and report preparation. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033). (Typically offered: Irregular)
This course is cross-listed with GEOS 5153.

ENDY 5853. Environmental Isotope Geochemistry. 3 Hours.
Introduction to principles of isotope fractionation and distribution in geological environments isotopic analytical methods, and extraction of isotope samples; application of isotopes in characterization of geologic processes and interaction with hydrologic, surficial, and biologic attenuation, paleothermometry soil and biochemical processes. (Typically offered: Spring)
This course is cross-listed with GEOS 5853.

ENDY 6013. Environmental Dynamics. 3 Hours.
Required course for ENDY doctoral candidates. Overview of Earth Systems: Lithosphere; Hydrosphere, Atmosphere, Biosphere, Cryosphere, and human interaction across Earth systems. Emphasis on understanding of processes within Earth systems and interactions across Earth Systems as they pertain to global self-regulation, secular variation, climate stability, development and sustainability of human societies. Prerequisite: Graduate standing. (Typically offered: Fall)

ENDY 6023. Seminar in Environmental Dynamics. 3 Hours.
Seminar examining specific contemporary topic of topics in Environmental Dynamics. Topics will change with each offering. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENDY 602V. Current Topics Seminar. 1-2 Hour.
Various aspects of the environment will be explored through topic specific seminars. Subject matter will change each semester addressing current environmental issues and research. Seminars will be one or two hours credit. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENDY 6033. Society and Environment. 3 Hours.
This course examines the complex interrelationships between human societies and the natural environment. Drawing on diverse and interdisciplinary perspectives in archaeology, ethnography, history, geography, and palaeo-environmental studies, readings and discussion will explore the co-production of social and environmental systems over time. (Typically offered: Spring)
This course is cross-listed with ANTH 6033.
ENDY 689V. Special Problems in Environmental Dynamics. 1-6 Hour. 
Independent study of a topic related to environmental dynamics under the guidance of an ENDY faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ENDY 6991. Environmental Dynamics Colloquium. 1 Hour. 
Weekly meetings for discussion of current research in environmental dynamics. Graduate students must register for colloquium each semester. Colloquium credit does not count towards minimum hours required for the doctorate. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ENDY 700V. Doctoral Dissertation. 1-18 Hour. 
Doctoral dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

**Ethnomusicology (MUSY)**

**Courses**

**MUSY 5113. Proseminar: Ethnomusicology. 3 Hours.** 
An introduction to ethnomusicological study, with readings and discussion of seminal writings in the field and practical experience in ethnomusicalogical analysis and description. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

**MUSY 5313. Proseminar: Topics in Asian and Middle Eastern Musics. 3 Hours.** 
Research seminars on selected topics, such as The Performing Arts in East Asia; and Music and Ritual. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

**MUSY 5323. Seminar: Topics in Asian and Middle Eastern Poetry and Music. 3 Hours.** 
Reading seminars on selected topics, such as Poetry and Music in Persian, Arabic and Turkish Cultures of the Islamic World; and Poetry and Song in Early East Asia. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

**MUSY 5343. Seminar: Special Topics in Traditional Musics and Dance of Europe and the Americas. 3 Hours.** 
Topics including, but not limited to: European Folk Music; the musical or scholarly legacy of a particular figure. (Typically offered: Irregular)

**MUSY 5413. Proseminar: Cross-cultural Performance Practices. 3 Hours.** 
A survey of performance practices from historic western art music through modern non-western music. An introductory course with readings from seventeenth- and eighteenth-century performance treatises as well as a study of written and aural traditions of non-western music. (Typically offered: Irregular)

**MUSY 6333. Advanced Studies in Ethnomusicology. 3 Hours.** 
Advanced level studies, individually tailored and supervised, including Ethnomusicology (prerequisite MUSY 5113); The Music or Dance of a Selected Area (prerequisite at least one of MUSY 5313, MUSY 5323, MUSY 5343); Historic Performance Practices (prerequisite MUSY 5413); Historical East Asian Musico (prerequisite MUSY 5313 or MUSY 5323); and Historical Central Asian or Middle- and Near-Eastern Musicology (prerequisite MUSY 5313 or MUSY 5323). (Typically offered: Irregular)

**Exercise Science (EXSC)**

**Courses**

**EXSC 5023. Advanced Teaching in Exercise Science. 3 Hours.** 
Examination and practical exposure to the principles and practices of undergraduate teaching in exercise science. Includes course planning, teaching techniques, assessment strategies, and supervised practice. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

**EXSC 5323. Biomechanics I. 3 Hours.** 
Intended to serve as in introduction to biomechanics and focuses on scientific principles involved in understanding and analyzing human motion. (Typically offered: Fall)

**EXSC 5333. Instrumentation in Biomechanics. 3 Hours.** 
The application of knowledge and skills necessary for data collection for sports analysis. Provides valuable information on instrumentation used specifically in biomechanics. Prerequisite: EXSC 5323. (Typically offered: Irregular)

**EXSC 5353. Exercise Psychology. 3 Hours.** 
Exercise Psychology is a lecture and discussion format for students interested in learning about theoretical and research information related to exercise adherence. (Typically offered: Fall)

**EXSC 5443. Seminar in Brain Injury and Behavior. 3 Hours.** 
The Brain Injury and Behavior Seminar will immerse you in specific topics pertaining to the study of human brain-behavior relationships. Emphasis will be placed on traumatic brain injury (TBI), including moderate-to-severe injuries, as well as mild TBI or concussion. The first half of the course will focus on research related to how individuals sustain and recover from TBI. The second half of the course will focus on sports-related concussion in youth, collegiate, and professional athletes, with an emphasis on how athletes sustain concussions, how concussions are assessed, treated, and managed, and how return-to-play decision are made. This course will introduce you to research in a variety of fields that include physiology, psychology, and neuropsychology through primary source material in the form of book chapters and journal articles. (Typically offered: Irregular)

**EXSC 5513. Physiology Exercise I. 3 Hours.** 
A study of the foundation literature in exercise physiology. Emphasis is placed on the muscular, cardiovascular, and respiratory systems. (Typically offered: Fall)

**EXSC 5523. Muscle Metabolism in Exercise. 3 Hours.** 
A study of the metabolic changes that occur in muscle as a result of exercise, exercise training, and other stressors. Prerequisite: EXSC 5513 or equivalent. (Typically offered: Spring)

**EXSC 5533. Cardiac Rehabilitation Program. 3 Hours.** 
An examination of the concepts, design, and implementation of cardiac rehabilitation programs. Emphasis on exercise programs but reference to nutrition, psychology, and other lifestyle interventions. (Typically offered: Spring Even Years)

**EXSC 5543. Cardiovascular Function in Exercise. 3 Hours.** 
Study of the effects of exercise training and other stressors on the cardiovascular system. Detailed study of the components of the cardiovascular system and the responses and adaptations of those components to selected stimuli. Corequisite: EXSC 5513 or equivalent. (Typically offered: Fall Even Years)

**EXSC 5593. Practicum in Laboratory Instrumentation. 3 Hours.** 
Practical experience in testing physical fitness utilizing laboratory equipment. Objective is to quantify physiological parameters, leading to the individualized exercise prescription. (Typically offered: Fall and Summer)

**EXSC 5613. Physical Dimensions of Aging. 3 Hours.** 
This course will focus on the physiological changes with healthy aging, pathophysiology of age-related diseases, testing issues, exercise interventions, and the psychosocial aspects of aging. Prerequisite: EXSC 5513. (Typically offered: Spring Odd Years)

**EXSC 5643. Advanced Psychology of Sports Injury and Rehabilitation. 3 Hours.** 
The purpose of this course is to explore and discuss factors related to the psychological aspects of athletic injuries. These factors include the sociocultural, mental, emotional, and physical dimensions of injury rehabilitation. Prerequisite: Students must be accepted into the Masters of Athletic Training graduate program. (Typically offered: Spring)
EXSC 5773. Performance and Drugs. 3 Hours.
The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. (Typically offered: Spring)

EXSC 6313. Muscle Physiology. 3 Hours.
To expand the student's knowledge of the skeletal muscle form and function. Specifically, how muscle is formed to how it can adapt as a post-mitotic tissue. This course will focus on the morphological, physiological, cellular, and molecular factors that affect skeletal muscle form and function. (Typically offered: Fall Even Years)

EXSC 6323. Biomechanics II. 3 Hours.
Analysis of human movement with emphasis on sports skills by application of principles of anatomy, kinesiology, and cinematographical analysis. Prerequisite: EXSC 5323. (Typically offered: Irregular)

EXSC 6343. Physiology of Exercise II. 3 Hours.
Detailed study of the body systems affected by exercise, the functions of these systems during exercise, the effects of age, sex, body type, and nutrition on capacity for exercise, the techniques of assessing work capacity, and a critical analysis of research literature in this area. (Typically offered: Irregular)

EXSC 6443. Thermoregulation and Fluid Balance. 3 Hours.
Comprehensive overview of human thermoregulatory responses to exercise in heat and cold. (Typically offered: Spring Even Years)

Extension Education (EXED)
Courses
EXED 5113. Program Development and Evaluation. 3 Hours.
Principles and proceedings of program development process including planning, designing, implementing, and evaluating of extension education programs. An emphasis on the framework for applying adult and non-formal education principles to the change process. (Typically offered: Irregular)

EXED 5183. Management of Volunteer Programs. 3 Hours.
(Formerly EXED 4183.) Recruiting, training, management, evaluation, and recognition of volunteers in agricultural-related agencies, non-profit organizations, community groups, and advisory committees. Graduate degree credit will not be given for both EXED 4183 and EXED 5183. (Typically offered: Irregular)

Finance (FINN)
Courses
FINN 4013. Seminar in Personal Financial Planning. 3 Hours.
Explores financial planning function, including contact, data acquisition, plan development and implementation; covers all areas of personal financial planning including investments, insurance, taxes, and estate planning; addresses planning techniques and financial planning ethical issues; emphasis on case studies. Prerequisite: FINN 4733. Prerequisite: FINN 3003, FINN 3063, FINN 3623, and ACCT 3843. (Typically offered: Spring)

FINN 410V. Special Topics in Finance. 1-6 Hour.
Explore current events, new developments and special topics in Finance not covered in other courses. Prerequisite: FINN 3043. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

FINN 5113. Corporate Financial Management. 3 Hours.
Financial analysis, planning and control; decision making and modeling for financial managers; and financial policies for management. (Typically offered: Spring)

FINN 5133. Advanced Investments. 3 Hours.
(Formerly FINN 4133.) Sound training in the principles of security analysis and portfolio management and certain advanced techniques of financial management. Modern portfolio theory and its application to portfolio management practices will be emphasized. Graduate degree credit will not be given for both FINN 4133 and FINN 5133. Prerequisite: FINN 3063. (Typically offered: Fall and Spring)

FINN 5173. Energy Finance and Risk Management. 3 Hours.
This course provides an advanced introduction to energy finance, defined as the application of finance principles to energy, energy service, and related industries, concerning all aspects of the energy value chain. Topics include: (1) physical fossil fuel markets; (2) physical electricity markets; (3) financially traded energy products; and (4) credit, counterpart, country, and enterprise risk. It also introduces students to business valuation and investment banking applications in the energy industry vertical. Prerequisite: FINN 5113 or FINN 5223. (Typically offered: Fall)

FINN 5223. Financial Markets & Valuation. 3 Hours.
Analysis of financial information by capital markets in the determination of security values with specific applications to retail and logistics companies. This course views these and other companies from the point of view of the capital markets. (Typically offered: Spring) May be repeated for degree credit.

FINN 5233. Advanced Corporate Finance. 3 Hours.
(Formerly FINN 4233.) Addresses complex and multifaceted issues and problems in financial decision-making. Graduate degree credit will not be given for both FINN 4233 and FINN 5233. Prerequisite: FINN 3063. (Typically offered: Irregular)

FINN 5303. Advanced Corporate Financial Management. 3 Hours.
Focus on financial policy issues using real situational cases. Topics include cost of capital, capital budgeting and long-term planning, value-based management, real options, as well as project financing and valuation. Prerequisite: FINN 5223. (Typically offered: Irregular)

FINN 5333. Investment Theory and Management. 3 Hours.
Integration of theory, practice of investments with solution of individual and institutional portfolio management problems; Institute of Chartered Financial Analysts' Problems; variable annuity in estate planning. Prerequisite: FINN 5223. (Typically offered: Fall)

FINN 541V. Shollmier Investment Project. 1-3 Hour.
Provide students with the opportunity to design and apply complex investment strategies used in institutional portfolio management on the Shollmier MBA Fund that can involve fixed income and equity securities as well as derivatives. Students will use top down asset allocation models, bottom up security selection, and hedge fund strategies. Prerequisite: FINN 5223 and FINN 5333. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

FINN 5433. Real Estate Finance and Investment. 3 Hours.
(Formerly FINN 4433.) Consideration of professional aspects of the real estate field. Emphasis is placed upon finance techniques and investment analysis. The focus is on commercial real estate. Brokerage, property management, appraisal, property development and current problems are also addressed. Students prepare a feasibility study on a commercial development project. Graduate degree credit will not be given for both FINN 4433 and FINN 5433. Prerequisite: FINN 3933. (Typically offered: Spring)

FINN 5443. Retail Finance. 3 Hours.
The financial success of retail product and service offerings depends on a clear understanding of the socio-economic as well as demographic and environmental factors that drive the changing patterns of consumption. This course introduces the fundamentals and use of consumer and trade area analysis tools, specifically geographic information systems (GIS) and psychographic market analysis, to make informed financial decisions. Extensive case studies are utilized throughout the course to learn concepts and best practices. Prerequisite: FINN 5223. (Typically offered: Spring)
FINN 550V. Independent Study. 1-3 Hour.  
(Formerly FINN 450V.) Permits students on an individual basis to explore selected topics in finance, with the consent of instructor. Graduate degree credit will not be given for both FINN 450V and FINN 550V. (Typically offered: Irregular)

FINN 5643. Finance Theory. 3 Hours.  
Provides a conceptual understanding of key theoretical developments in the field of financial economics, including firm decisions under risk within a world of uncertainty. (Typically offered: Irregular)

FINN 5633. Seminar in Investment Theory. 3 Hours.  
Study advanced literature in field investments, with special reference to theory of random walks, stock valuation models, portfolio management. (Typically offered: Spring)

FINN 5623. Seminar in Financial Management. 3 Hours.  
Financial management of firms with emphasis on financial theory or firm, quantitative methods used in financial analysis, planning. (Typically offered: Irregular)

FINN 5633. Empirical Research in Finance. 3 Hours.  
A study of recent empirically based research in finance. (Typically offered: Irregular)

FINN 5636V. Special Problems in Finance. 1-6 Hour.  
Case studies in investments, corporation finance, money and banking, monetary theory, international finance, public finance. By arrangement. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

FINN 5673. Seminar in Financial Markets and Institutions. 3 Hours.  
Recent developments in the literature of financial markets and institutions. Participants will be involved in the extensive study of existing theories and empirical tests of the theories. (Typically offered: Irregular)

FINN 5683V. Contemporary Issues in Doctoral Colloquium. 1-3 Hour.  
To explore and evaluate contemporary research issues in finance. Course content to reflect the most recent developments in theory and empirical research methodologies. Prerequisite: Doctoral student status and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

FINN 700V. Doctoral Dissertation. 1-18 Hour.  
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

Food Science (FDSC) Courses

FDSC 5001. Seminar. 1 Hour.  
Presentation and discussion of graduate student research. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 2 hours of degree credit.

FDSC 509V. Special Problems Research. 1-6 Hour.  
Original investigation on assigned problems in food science. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

FDSC 5111L. Food Analysis Lab. 1 Hour.  
(Formerly FDSC 4111L) Laboratory exercises providing students with experience of analytical techniques and instrumentation used in food analysis. Laboratory 3 hours per week. Graduate degree credit will not be given for both FDSC 4111L and FDSC 5111L. Corequisite: FDSC 4113 or FDSC 5113 (formerly FDSC 4113). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304) and CHEM 1123 and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

FDSC 5113. Food Analysis. 3 Hours.  
(Formerly FDSC 4113.) Methods of analysis, instrumentation, and laboratory techniques for measuring the chemical composition of raw and value-added products. Lecture 3 hours. Graduate degree credit will not be given for both FDSC 4113 and FDSC 5113. Corequisite: FDSC 4111L or FDSC 5111L (formerly FDSC 4111L). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304) and CHEM 1123 and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

FDSC 5121L. Food Microbiology Lab. 1 Hour.  
(Formerly FDSC 4121L.) A hands-on laboratory course designed to teach students microbiological techniques and certain enumeration and plating techniques of specific food spoilage and pathogenic bacteria. Graduate degree credit will not be given for both FDSC 4121L and FDSC 5121L. Pre- or Corequisite: FDSC 4122 or FDSC 5122 (formerly FDSC 4122). (Typically offered: Fall)

FDSC 5122. Food Microbiology. 2 Hours.  
(Formerly FDSC 4122.) The study of food microbiology including classification, taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Graduate degree credit will not be given for both FDSC 4122 and FDSC 5122. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)

FDSC 5223. Food Biosecurity. 3 Hours.  
This course is the study of the security of agricultural products and the protection of our food supply from intentional and accidental, domestic and international contamination. Prerequisite: Graduate standing. (Typically offered: Irregular)

FDSC 5304. Food Chemistry. 4 Hours.  
(Formerly FDSC 4304.) Water, carbohydrates, lipids, proteins, vitamins, and minerals in foods; biochemical and functional properties, enzymes, food additives (emulsifiers, pigments, colors, flavors, preservatives, and sweeteners) and texture as related to properties in food systems and during processing. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both FDSC 4304 and FDSC 5304. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Fall)

FDSC 531V. Internship in Food Science. 1-4 Hour.  
(Formerly FDSC 431V.) The Food Science Internship is a supervised practical work experience with a food industry, research program or governmental agency to gain professional experience and insight into career opportunities. Graduate degree credit will not be given for both FDSC 431V and FDSC 531V. Prerequisite: Completion of first year of graduate studies and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.
FDSC 5333. Molecular Biology Techniques Applied to Nutrition and Food Science. 3 Hours.
This course will provide advanced knowledge on current molecular biology techniques and how they can be used in nutrition and food science. A specific emphasis will be given on learning how to understand and interpret results generated through these methods. Therefore, the course is of interest to a wider audience, as such analytic skills are valuable for a diverse array of disciplines. Methods covered will include DNA and RNA-based techniques (PCR, microarrays, sequencing, genomics and metagenomics), protein-based techniques (blots, proteomics) and other molecules-based techniques (metabolomics, immunoblots). Prerequisite: Graduate standing. (Typically offered: Fall)

FDSC 5413. Sensory Evaluation of Food. 3 Hours.
(Formerly FDSC 4413.) Principles and procedures for sensory evaluation of food. Appropriate uses of specific tests are discussed, along with physiological, psychological, and environmental factors affecting sensory verdicts. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both FDSC 4413 and FDSC 5413. Corequisite: Lab component. Prerequisite: STAT 2303 or WCOB 1033 or AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 2023 or PSYC 2013. (Typically offered: Fall)

FDSC 5423. Foodborne Diseases. 3 Hours.
This course will introduce students to the major pathogens associated with foodborne diseases, their epidemiology, and approaches to outbreak investigation and control of foodborne illness. An emphasis will be placed on understanding the relationships between the host, the etiologic agent, and the environment as they relate to disease causation. The student will gain knowledge through lectures, case studies, readings, and an individual project. Prerequisite: BIOL 1543 or equivalent. (Typically offered: Summer Odd Years)

FDSC 5503. Safety and Sanitation for the Food Industry. 3 Hours.
This web-based course will provide an appreciation of the need for sanitation in food processing and increase the students' knowledge of sanitary techniques. Topics will include contamination sources, plant and equipment design, cleaners and sanitizers, HACCP, and food biosecurity. Also covered will be considerations in selecting, establishing and maintaining a sanitation program. Prerequisite: General Microbiology or Food Microbiology; General Chemistry. (Typically offered: Irregular)

FDSC 5623. Principles of Food Science. 3 Hours.
This is an introduction for graduate students to the major food science disciplines and provides core knowledge and broad appreciation of basic food science principles. The basics of food engineering, food processing, food microbiology and food safety, food chemistry, sensory science, and nutrition will be discussed. This course provides a general foundation in food science prior to more specialized food science graduate studies. The student will gain understanding through lectures, readings and class discussion. Prerequisite: Graduate standing. (Typically offered: Fall)

FDSC 5713. Product Innovation for the Food Scientist. 3 Hours.
(Formerly FDSC 4713.) This is a capstone course integrating knowledge developed in Food Science to the development of new food products. This course will take an integrated multidisciplinary approach to developing innovative food products and will provide learning experiences in new product development and Research & Development. Topics include product formulation, ingredient interactions, sensory analysis, packaging, labeling, food safety and food law. Graduate degree credit will not be given for both FDSC 4713 and FDSC 5713. Corequisite: Lab component. Pre- or Corequisite: FDSC 4113 or FDSC 5113 (formerly FDSC 4113) and FDSC 4111L or FDSC 5111L (formerly FDSC 4111L). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304), FDSC 3103, and FDSC 4413 or FDSC 5413 (formerly FDSC 4413). (Typically offered: Spring)

FDSC 5754. Engineering Principles of Food Processing. 4 Hours.
(Formerly FDSC 4754.) Basic mechanics of refrigeration, temperature controls, materials handling and mechanical problems as applied to foods and food processing. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both FDSC 4754 and FDSC 5754. Corequisite: Lab component. Prerequisite: MATH 1213, PHYS 2013, and PHYS 2011L. (Typically offered: Spring Even Years)

FDSC 5823. Principles of Food Microbiology. 3 Hours.
(Formerly FDSC 4823.) This web-based course is a study of the fundamentals of food microbiology to include its history, classifications, spores and their importance, and the most common and serious pathogenic food microorganisms. Fermentation, spoilage microorganisms and control methodology are also discussed. Graduate degree credit will not be given for both FDSC 4823 and FDSC 5823. (Typically offered: Irregular)

FDSC 5993. Global Horticulture and Human Nutrition to Enhance Community Resilience and Food Security. 3 Hours.
This course covers three broad areas (Global Horticulture, Sustainable International Development, Human Health and Nutrition) and experts on three campuses created the instruction. The course is intended to be multi-disciplinary, and students should use their contextual knowledge to add to weekly discussions. Prerequisite: Graduate standing. (Typically offered: Spring) This course is cross-listed with AGED 5993, HORT 5993.

FDSC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

FDSC 602V. Special Topics. 1-3 Hour.
Discussions focused on selected topics of particular fields of raw product physiology and food processing. chemistry, physiology, microbiology, evaluation, sensory analysis and preservation. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

FDSC 6033. Food Biochemistry. 3 Hours.
Biochemical characteristics, functions, regulation and impact of components in raw and processed foods of plant origin. Lecture/discussion 3 hours per week. Prerequisite: CHEM 3813. (Typically offered: Fall Odd Years)

FDSC 6123. Food Carbohydrate Chemistry. 3 Hours.
Focus is on carbohydrate chemistry including molecular structures and physical properties, production and food applications, analytical methods for food carbohydrates, and interactions among food polysaccharides. Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304). (Typically offered: Fall Even Years)

FDSC 6143. Advanced Food Processing and Packaging and their Environmental Impact. 3 Hours.
The course is directed to graduate students in food science and related fields. Students will learn advanced food processing technologies and packaging as well as the environmental issues associated to food production, processing, and distribution. Prerequisite: FDSC 3103 or equivalent, or food processing/engineering background with knowledge of basic food processing operations. (Typically offered: Spring Even Years)

FDSC 6323. Nutraceuticals and Functional Foods. 3 Hours.
Course will include past, present and future of nutraceuticals and functional foods, chemistry, mechanism, novel technologies, nutrigenomics, processing, healthy lifestyle, regulation, safety, marketing, international aspects, and industry project. Prerequisite: CHEM 2613 (or CHEM 3603) and CHEM 3813 and FDSC 4304 or instructor consent. (Typically offered: Spring Even Years)
FDSC 6333. Food Protein Chemistry and Functionality. 3 Hours.
This course is a study in advanced food protein chemistry, including molecular structures, characterization, physicochemical bases of food protein functionality, structure-function relationship, processing technologies to improve functionality, as well as hands-on experiences with timely, practical projects related to food proteins. Lecture and problem solving projects for 3 hours per week. Pre- or Corequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304). (Typically offered: Spring Odd Years)

FDSC 6403. Epidemiologic Principles in Food Safety and Public Health. 3 Hours.
This course will provide an introduction to epidemiologic methods used in foodborne disease outbreak investigations. The importance of surveillance systems in detecting outbreaks and in the development of effective disease prevention and control strategies will also be presented. An emphasis will be placed on understanding the relationships between the host, the etiologic agent, and the environment as they relate to disease causation. In addition, molecular methods utilized for the identification of etiologic agents will be discussed. Selected important foodborne diseases will be discussed in detail to clarify the role of epidemiology in understanding the pathogenesis of infectious processes in individuals and communities. Prerequisite: FDSC 4122 or FDSC 5122 (formerly FDSC 4122) or equivalent. (Typically offered: Fall Even Years)

FDSC 6443. Metabolism of Xenobiotics. 3 Hours.
This course is designed to provide in-depth knowledge of the integration of molecular, cellular, and physiologic aspects of xenobiotics (e.g. phytochemicals)/ micronutrients and metabolism. This course will also discuss the current understanding of the mechanism and regulation of gene expression by xenobiotics/ micronutrients. Examination of current research literature to understand how xenobiotics/micronutrients and physiological states metabolize and influence gene expression, as well as the research methodology used to address these relations. Prerequisite: CHEM 3813. (Typically offered: Fall Even Years)

FDSC 700V. Doctoral Dissertation. 1-18 Hour.
The doctoral program in food science is an interdepartmental program offered by the departments of Food Science, Animal and Poultry Sciences, and Human Environmental Sciences. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

French (FREN) Courses
FREN 5003. French Grammar and Phonetics. 3 Hours.
Systematic review of principles of French grammar and syntax; comprehensive presentation of French phonetics. (Typically offered: Irregular)

FREN 5033. Advanced French Conversation. 3 Hours.
This course will provide a small discussion environment in which graduate students will improve their command of spoken French in an interactive setting. Discussion will concentrate on current cultural issues in the French speaking world. (Typically offered: Irregular)

FREN 5213. French Culture & Civilization. 3 Hours.
An analysis of French cultural symbols and attitudes as observed in their historical, economical, political, social, educational, and linguistic aspects. (Typically offered: Irregular)

FREN 5333. Old French Literature. 3 Hours.
An intensive study of French Medieval Literature from the Chansons de Geste to Villon, including an in-depth analysis of the genres and their evolution, and of the major authors of the times. (Typically offered: Irregular)

FREN 5353. Survey of French Poetry. 3 Hours.
A comprehensive study of French poetry from the Middle Ages to the twentieth century, focusing on close readings of individual poems. This course will cover literary movements and trends of the periods and presents the terminology required to do explication de texte. (Typically offered:Irregular)

FREN 5433. French 16th-Century Literature. 3 Hours.
A survey of representative writers of the sixteenth century. (Typically offered: Irregular)

FREN 5543. French 17th-Century Literature. 3 Hours.
A survey of representative writers of the seventeenth century. (Typically offered: Irregular)

FREN 5663. French Short Story. 3 Hours.
An introduction to the French short story, focusing on close readings of a variety of contes and nouvelles from the Middle Ages through the twenty-first century. (Typically offered: Irregular)

FREN 5673. French 18th-Century Literature. 3 Hours.
French 18th-Century literature. (Typically offered: Irregular)

FREN 5703. Special Topics. 3 Hours.
May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

FREN 575V. Special Investigations. 1-6 Hour.
Special investigations. (Typically offered: Irregular) May be repeated for degree credit.

FREN 5773. Survey of Francophone Literature. 3 Hours.
A survey of representative texts in the field of sub-Saharan and North African literature concentrating on postcolonial novels using contemporary critical approaches. (Typically offered: Irregular)

FREN 5783. The French Nineteenth-Century Novel. 3 Hours.
The French Nineteenth-Century novel. (Typically offered: Irregular)

FREN 5813. French 20th-Century Theatre. 3 Hours.
French 20th-Century theatre. (Typically offered: Irregular)

FREN 5833. French 20th-Century Novel. 3 Hours.
French 20th-Century novel. (Typically offered: Irregular)

General Engineering (GNEG) Courses
GNEG 5103. Globalization and Innovation. 3 Hours.
Integration of engineering in the globalized business environment. Innovation and integration models. Global survival skills. International organizational value-chain. Conducting business with emerging nations. Case studies; field trips; guest lectures. Experiential learning design component. Taken by students participating in departmental approved study abroad programs. May not earn credit for GNEG 3103 or GNEG 4103. (Typically offered: Irregular)

GNEG 550V. Master’s Research Project. 1-3 Hour.
Required course for MSE students who wish to complete a Master’s research project as part of their degree program. Prerequisite: Instructor permission. (Typically offered: Irregular)

GNEG 5801. Parallel Cooperative Education. 1 Hour.
Part time supervised experience in industry where students apply focused, discipline specific, classroom and research skills to problems directly related to their area of study in a professional work place setting. May be repeated for up to 3 hours of non-degree credit. Prerequisite: Instructor permission. (Typically offered: Fall, Spring and Summer)
Courses

**GEOS 5003. Seminar in Geography.** 3 Hours.
Selected topics, the nature of which varies with the need. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

**GEOS 5011. Colloquium.** 1 Hour.
Weekly meetings of faculty, graduates, advanced students and guests to discuss research and trends in the field of geography. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

**GEOS 5023. Technical and Proposal Writing for the Geosciences.** 3 Hours.
Preparation of technical reports, research proposals, and manuscripts for publication in the area of geosciences. (Typically offered: Spring)

**GEOS 5033. Advanced Vector Geographic Information Systems.** 3 Hours.
Advanced vector operations and analysis. Topics will include topological analysis, network analysis, geocoding, cartography, implications of source and product maps, map generation, error mapping, and cartographic production. Prerequisite: (ANTH 4563 or ANTH 5563 (formerly ANTH 4563)) or (GEOS 4583 or GEOS 5583 (formerly GEOS 4583)) or equivalent. (Typically offered: Irregular) This course is cross-listed with ANTH 5043.

**GEOS 5043. Foundations of Geospatial Data Analysis.** 3 Hours.
Basic mathematical tools applied in geospatial technology, including trigonometry in mapping, linear algebra in remote sensing, optimization in spatial decision support, and graph theory in routing. Course develops the framework for spatial data analysis and decision support. Pre- or Corequisite: GEOS 5543. (Typically offered: Fall and Spring)

**GEOS 5053. Quaternary Environments.** 3 Hours.
An interdisciplinary study of the Quaternary Period, including dating methods, deposits, soils, climates, tectonics, and human adaptation. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: Graduate standing. (Typically offered: Fall) This course is cross-listed with ANTH 5053, ENDY 5053.

**GEOS 5073. Geospatial Technologies Computational Toolkit.** 3 Hours.
Basic computational tools and processes applied in geospatial software, related computer hardware components, systems and applications software, and spatial database fundamentals. Python, including SciPy and NumPy, geospatial implementations will be emphasized. No programming experience is required. Pre- or Corequisite: GEOS 5543. (Typically offered: Fall and Spring)

**GEOS 5083. Geospatial Data Mining.** 3 Hours.
Basic tools for analyzing, summarizing and visualizing geospatial data. Exploratory data and spatial data analysis, probability distributions and application, single and multivariate analysis and hypothesis testing, and spatial smoothing and interpolation. Emphasis will be on problem solving in geospatial settings using the R statistical language. Prerequisite: GEOS 5043 and GEOS 5073 or equivalent. (Typically offered: Fall and Spring)

**GEOS 5093. History and Philosophy of Geography.** 3 Hours.
This course familiarizes students with the history of geography, the contributions of geographers to scientific thought and theory, and research techniques that are used in geography. Emphasis is given to the integration of statistical and spatial analysis, and their applications in field research. The course includes short field-based projects in and around Northwest Arkansas. (Typically offered: Spring Even Years)

**GEOS 510V. Special Problems in Physical Geosciences.** 1-6 Hour.
Special problems in Geosciences. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

**GEOS 5113. Global Change.** 3 Hours.
Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss, urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. (Typically offered: Fall) This course is cross-listed with ENDY 5113.

**GEOS 5123. Stratigraphic Principles and Practice.** 3 Hours.
Physical and biological characteristics of sedimentary environments and their correlation in time with emphasis on the local geologic section. Corequisite: Lab component. Prerequisite: GEOS 4223 or GEOS 5323 (formerly GEOS 4223). (Typically offered: Irregular)

**GEOS 5133. Radar Remote Sensing.** 3 Hours.
Introduction to radar remote sensing and its applications in geology, geography, archeology, engineering, and agriculture. Focuses on Synthetic Aperture Radar (SAR) and advanced techniques including radar stereo, polarimetry, and interferometry. Covers Interferometric SAR (InSAR) for mapping topography and modeling Earth’s surface motions due to earthquakes, volcanic eruptions, landslides, and subsidence. Prerequisite: GEOS 3023 or equivalent. (Typically offered: Spring)

**GEOS 5143. 3D Seismic Exploration.** 3 Hours.
(Formerly GEOS 4463.) Interpretation of 3D seismic data for geological structure, stratigraphy, and pore fluid variations with emphasis on hydrocarbon exploration. Credit will not be given for both GEOS 4463 and GEOS 5143. Prerequisite: GEOS 4433 or GEOS 5433 (formerly GEOS 4433). (Typically offered: Spring)

**GEOS 5153. Environmental Site Assessment.** 3 Hours.
Principles, problems, and methods related to conducting an environmental site assessment. An applied course covering field site assessment, regulatory documentation, and report preparation. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033). (Typically offered: Irregular) This course is cross-listed with ENDY 5153.

**GEOS 5163. Hydrogeologic Modeling.** 3 Hours.
Topics include numerical simulation of ground water flow, solute transport, aqueous geochemistry, theoretical development of equations, hypothesis testing of conceptual models, limitations of specific methods, and error analysis. Emphasis on practical applications and problem solving. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033) and computer literacy. (Typically offered: Irregular)

**GEOS 5173. Urban Geography.** 3 Hours.
(Formerly GEOS 4073.) Areal patterns of modern urban regions and the focus shaping these patterns. Emphasis is placed on American urban areas and their evolution and functional areas. Field work. Graduate degree credit will not be given for both GEOS 4073 and GEOS 5173. (Typically offered: Irregular)

**GEOS 5183. Geography of the Middle East.** 3 Hours.
(Formerly GEOS 4043.) Physical and cultural landscapes, natural and cultural resources, art and architecture, land use, political history, OPEC, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Class participation, discussions, slides and films, and student presentations will round out the class. Graduate degree credit will not be given for both GEOS 4043 and GEOS 5183. (Typically offered: Fall)
GEOS 5196. Advanced Field Methods of Applied Hydrogeology. 6 Hours.
Applied field course emphasizing collection and interpretation of ground water
data. Three hours may be applied toward an M.S. degree in geology. Prerequisite:
GEOS 4033 or GEOS 5263 (formerly GEOS 4033). (Typically offered: Summer)

GEOS 520V. Special Problems in Human Geography. 1-6 Hour.
Special problems in human geography. Prerequisite: Graduate standing. (Typically
offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree
credit.

GEOS 5213. Principles of Remote Sensing. 3 Hours.
Fundamental concepts of remote sensing of the environment. Optical, infrared,
microwave, LIDAR, and in situ sensor systems are introduced. Remote sensing
of vegetation, water, urban landscapes, soils, minerals, and geomorphology is
discussed. The course includes laboratory exercises in GIS software and field
spectroscopy. (Typically offered: Fall)

GEOS 5223. Sedimentary Petrology. 3 Hours.
Sediments and sedimentary rocks. Lecture 2 hours, laboratory 2 hours per week.
Corequisite: Lab component. Prerequisite: GEOS 4223 or GEOS 5323 (formerly
GEOS 4223). (Typically offered: Fall)

GEOS 5233. Geography of Religion & Sacrality. 3 Hours.
Explores the spatial nature of the World's major faiths and religious institutions,
 focusing on the distribution and origins of these religions. Examines the religious
beliefs, rituals, architecture, demographics, and art in different societies, cultures,
and countries. Considers the tenets and practices of what is sacred and/or spiritual,
held in common by a group or community. Prerequisite: Graduate standing.
(Typically offered: Fall Odd Years)

GEOS 5243. Political Geography. 3 Hours.
(Formerly GEOS 4243.) Contemporary world political problems in their geographic
context. Development of the principles of political geography with emphasis upon
the problems of Eastern Europe, Africa, and Southeast Asia. Graduate degree credit
will not be given for both GEOS 4243 and GEOS 5243. (Typically offered: Fall Odd
Years)

GEOS 5253. Geomorphology. 3 Hours.
(Formerly GEOS 4053.) Mechanics of landform development. Lecture 2 hours,
laboratory 3 hours per week. Several local field trips are required during the
semester. Graduate degree credit will not be given for both GEOS 4053 and
GEOS 5253. (Typically offered: Spring)

GEOS 5263. Hydrogeology. 3 Hours.
(Formerly GEOS 4033.) Occurrence, movement, and interaction of water with
geologic and cultural features. Lecture 3 hours per week. Graduate degree credit will
not be given for both GEOS 4033 and GEOS 5263. Corequisite: Lab component.
Prerequisite: MATH 2043 or MATH 2554, and GEOS 3514. (Typically offered: Spring)

GEOS 5273. Principles of Geochemistry. 3 Hours.
(Formerly GEOS 4063.) Introduction to fundamental principles of geochemistry from
historical development to modern concepts. Graduate degree credit will not be given
for both GEOS 4063 and GEOS 5273. Corequisite: Lab component. Prerequisite:
CHEM 1121L, CHEM 1123 and GEOS 2313. (Typically offered: Fall)

GEOS 5283. Economic Geology. 3 Hours.
(Formerly GEOS 4083.) Introduction to mineral deposits used as economic
resources. Covers basic geology and geochemistry of mineral deposit formations
and the formation of major classes of deposits. Examines the relationship between
the distribution of ores, oil, gas, coal, and Plate Tectonics. Explores environmental
issues associated with the extraction of earth resources. Graduate degree credit
will not be given for both GEOS 4083 and GEOS 5283. Prerequisite: GEOS 2313.
(Typically offered: Irregular)

GEOS 5293. Introduction to Global Positioning Systems and Global Navigation
Satellite Systems. 3 Hours.
(Formerly GEOS 4993.) Fundamentals of navigation, mapping, and high-precision
positioning using the Navstar Global Positioning System. Topics include datum
definition and transformation, map projections, autonomous and differential
positioning using both code and carrier processing, and analysis of errors. Graduate
degree credit will not be given for both GEOS 4593 and GEOS 5293. (Typically
offered: Fall)
This course is cross-listed with ANTH 5593.

GEOS 530V. Special Problems in Regional Geography. 1-6 Hour.
Special problems in regional geography. Prerequisite: Graduate standing. (Typically
offered: Fall, Spring and Summer)

GEOS 5313. Planetary Atmospheres. 3 Hours.
Origins of planetary atmospheres, structures of atmospheres, climate evolution,
dynamics of atmospheres, levels in the atmosphere, the upper atmosphere, escape
of atmospheres, comparative planetology of atmospheres. (Typically offered:
Irregular)

GEOS 5323. Stratigraphy and Sedimentation. 3 Hours.
(Formerly GEOS 4223.) Introductory investigation of stratigraphic and
sedimentologic factors important to the study of sedimentary rocks. Lecture 2
hours, laboratory 3 hours per week. A required weekend, two-day field trip will
be conducted during the semester. Graduate degree credit will not be given for
both GEOS 4223 and GEOS 5323. Corequisite: Lab component. Prerequisite:
GEOS 3413. (Typically offered: Fall)

GEOS 534V. Internship in Physical Geography. 3-6 Hour.
(Formerly GEOS 430V.) Supervised experience in municipal, county, state or private
natural resource management agency, or any other such organization approved
by instructor. Graduate degree credit will not be given for both GEOS 430V and
GEOS 534V. (Typically offered: Fall, Spring and Summer)

GEOS 5353. Meteorology. 3 Hours.
(Formerly GEOS 4353.) Examination of the atmospheric processes that result in
multifarious weather systems. Offered as physical science. Graduate degree credit
will not be given for both GEOS 4353 and GEOS 5353. (Typically offered: Fall)

GEOS 5363. Climatology. 3 Hours.
(Formerly GEOS 4363.) Fundamentals of topical climatology followed by a study of
regional climatology. Offered as physical science. Graduate degree credit will not be
given for both GEOS 4363 and GEOS 5363. (Typically offered: Spring)

GEOS 537V. Geology Field Trip. 1-2 Hour.
(Formerly GEOS 437V.) Camping field trip to areas of geologic interest, usually
conducted during Spring Break. Graduate degree credit will not be given for both
GEOS 437V and GEOS 537V. Prerequisite: GEOS 3313. (Typically offered: Spring)
May be repeated for up to 4 hours of degree credit.

GEOS 5383. Hazard & Disaster Assessment, Mitigation, Risk & Policy. 3 Hours.
(Formerly GEOS 4383.) Comprehensive introduction to interdisciplinary approaches
to natural and environmental hazards and risk. Hazards and disaster assessment,
mitigation, and policy are the focus of the class. Graduate degree credit will not
be given for both GEOS 4383 and GEOS 5383. (Typically offered: Spring) May be
repeated for up to 6 hours of degree credit.

GEOS 5393. Mathematical Modeling of Geological Processes. 3 Hours.
This course explores a variety of topics in applied mathematics and computational
methods within the context of studying geological processes and from the
perspective of a modeling practitioner. Programming is conducted in Python.
Knowledge of Calculus II is necessary. (Typically offered: Irregular)
GEOS 5403. American Public Lands and Policy. 3 Hours.
The course examines the role of American federal public lands in 19th-21st century geography, history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America’s national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Graduate standing. (Typically offered: Irregular)

GEOS 5423. Remote Sensing of Natural Resources. 3 Hours.
Introductory digital image processing of remotely sensed data. Topics include data collection, laboratory design, scientific visualization, radiometric and geometric correction, enhancement, pattern recognition, artificial intelligence, and change detection in natural resource remote sensing. GIS-based exercises and a course project are included. Prerequisite: GEOS 4413 or GEOS 5213. (Typically offered: Spring Even Years)

GEOS 5433. Geophysics. 3 Hours.
(Formerly GEOS 4433.) Derivation from physical principles, of the geophysical methods for mapping the Earth. Computational methods of converting gravity, magnetic, radiometric, electrical, and seismic data into geologic information. Lecture 3 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both GEOS 4433 and GEOS 5433. Corequisite: Lab component. Prerequisite: MATH 2564 and PHYS 2033 and PHYS 2031L and GEOS 3514. (Typically offered: Irregular)

GEOS 5443. The Solid Earth. 3 Hours.
Modern views for the origin of the solid Earth and its structure, composition, and evolution through geologic time. Topics will include examination of relevant geophysical and geochemical constraints used to develop global models for the Earth. Prerequisite: GEOS 3313, MATH 2564, CHEM 1123, PHYS 2074 or instructor consent. (Typically offered: Irregular)

GEOS 5453. Introduction to Raster GIS. 3 Hours.
(Formerly GEOS 4553.) Theory, data structure, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Graduate degree credit will not be given for both GEOS 4553 and GEOS 5453. (Typically offered: Fall)
This course is cross-listed with ANTH 5553.

GEOS 5463. Microtectonics. 3 Hours.
Focused on the microstructural evolution of tectonite rocks and the constraints that can be gleaned from optical microscopic evaluation of rocks in petrographic thin-sections and hand samples. Results are evaluated in the context of plate tectonic theory and geodynamics. Knowledge of mineralogy and petrology equivalent to GEOS 2313 is required. Pre- or Corequisite: GEOS 5563. Corequisite: Lab component. (Typically offered: Fall)

GEOS 5473. Applied Climatology. 3 Hours.
Applied climatology involves the use of climatic data to solve a variety of social, economic and environmental problems, such as for clients in agriculture, water and energy management. The basic purpose of applied climatology is to help society, at all scales and levels, to achieve a better adjustment to the climatic environment. (Typically offered: Fall)

GEOS 5483. Severe Weather. 3 Hours.
(Formerly GEOS 4483.) Focuses on the formation and impact of weather phenomena such as blizzards, floods, tornadoes, thunderstorms, hurricanes and droughts. Covers the mechanisms and physics that control severe weather, advanced terminology, physical concepts and scientific methods used in meteorology, and the analysis and interpretation of meteorological data. Graduate degree credit will not be given for both GEOS 4483 and GEOS 5483. (Typically offered: Spring)

GEOS 550V. Internship in GIS & Cartography. 3-6 Hour.
(Formerly GEOS 440V.) Supervised experience in GIS and/or cartographic applications with municipal, county, state, or private enterprises. Graduate degree credit will not be given for both GEOS 440V and GEOS 550V. (Typically offered: Spring and Summer) May be repeated for up to 6 hours of degree credit.

GEOS 5513. Introduction to GIS Programming. 3 Hours.
This course introduces fundamentals of GIS software engineering and offers hands-on tutorials in customized applications using ArcGIS through programming ArcObjects in VBA/VA.net environment. Topics covered include ArcObjects, different programming syntax and styles, and fundamental routines and functions in ArcGIS. After completing the course, students will have the capability develop customized ArcGIS applications. (Typically offered: Fall)

GEOS 5523. Cartographic Design & Production. 3 Hours.
(Formerly GEOS 4523.) This course addresses advanced cartographic concepts (i.e. visual hierarchy, aesthetics, image cognition) and production techniques as they relate to computer-assisted mapping. Students produce a variety of maps using Adobe Illustrator (CS 4-6) software to build a map portfolio. Field trips may be required. Graduate degree credit will not be given for both GEOS 4523 and GEOS 5523. (Typically offered: Spring)

GEOS 5533. Introduction to Petroleum Geophysics. 3 Hours.
(Formerly GEOS 4533.) Introduction to seismic wave propagation and petroleum seismology with particular emphasis on seismic events, elastic waves, and seismic survey design. Credit will not be given for both GEOS 4533 and GEOS 5533. Prerequisite: MATH 2564, PHYS 2033, and GEOL 3514 or consent of instructor. (Typically offered: Fall)

GEOS 5543. Geospatial Applications and Information Science. 3 Hours.
An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. (Typically offered: Fall and Spring)

GEOS 5553. Spatial Analysis Using ArcGIS. 3 Hours.
Applications of analysis of spatial data using ArcGIS tools in map design, on-line mapping, creating geodatabases, accessing geospatial data, geo-processing, digitalization, geocoding, spatial analysis including basic spatial statistics, analysis of spatial distributions and patternning and 3D application using ArcGIS 3D Analyst. Prerequisite: GEOS 3543 or GEOS 5543. (Typically offered: Fall and Spring)

GEOS 5563. Tectonics. 3 Hours.
Development of ramifications of the plate tectonics theory. Analysis of the evolution of mountain belts. Lecture 3 hours per week. Prerequisite: GEOS 3514. (Typically offered: Fall)

GEOS 5573. Advanced Cartographic Techniques & Production. 3 Hours.
Covers advanced production and techniques in cartography, including animation, geospatial visualization, pochade, and advanced visualization. Emphasizes client relationships in creating and producing cartographic materials. Prerequisite: GEOS 4523 or GEOS 5553. (Typically offered: Irregular)

GEOS 5583. Enterprise and Multiuser GIS. 3 Hours.
GIS practice that is typical of collaborative team-based geospatial organizations. Solve real-world problems through end-to-end GIS design and implementation using ArcGIS Enterprise, extensive federal, state, and local repositories, and high quality software documentation. Includes relevant training in geospatial provenance and metadata, and in enterprise and multiuser GIS administration. Introductory-level familiarity with GIS is recommended. (Typically offered: Spring)
GEOS 5593. Introduction to Geodatabases. 3 Hours.
Fundamental concepts and applications of geospatial databases. Schema development and spatial data models for geodatabases. Spatial and attribute query and optimization, properties and structures of relational and object-oriented geodatabases. Spatial extensions of SQL, spatial indexing, measurement, and geometry. Course will use PostGIS, ESRI File Geodatabases, and MS-SQL.
Prerequisite: GEOS 3543 and GEOS 3103 or equivalent. (Typically offered: Fall and Spring)

GEOS 560V. Graduate Special Problems. 2-6 Hour.
Library, laboratory, or field research in different phases of geology. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.

GEOS 5612. Research Methods in Geosciences. 2 Hours.
Survey of research methodologies used in both geology and geography, with an emphasis on quantitative analysis. Preparation of research proposals and presentations in the field of geosciences. Prerequisite: Graduate standing. (Typically offered: Fall)

GEOS 5643. Introduction to Internet GIS. 3 Hours.
This course introduces Internet computing and Web GIS and offers hands-on tutorials in customized applications using ArcGIS Server JavaScript API. Topics covered include Internet protocols and Web standards, Web services, and fundamental routines and functions in Arc GIS server development. Students will have the capability to develop customized ArcGIS server applications. Prerequisite: GEOS 5513 or equivalent. (Typically offered: Spring)

GEOS 5653. GIS Analysis and Modeling. 3 Hours.
(Formerly GEOS 4653.) Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. Graduate degree credit will not be given for both GEOS 4653 and GEOS 5653. (Typically offered: Spring)

GEOS 5663. Low-Temperature Geochemistry of Natural Waters. 3 Hours.
(Formerly GEOS 4663.) Covers the low-temperature geochemistry of waters and their associated minerals at Earth's surface. Examines the controls on the chemical composition of natural waters and the minerals precipitated from them. Topics covered will include water-rock interactions, pH, redox, the carbonate-water system, clay minerals and exchange, heavy metals, and a brief introduction to stable isotopes and geomicrobiology. Credit will not be given for both GEOS 4663 and GEOS 5663. Prerequisite: CHEM 1121L, CHEM 1123, GEOS 1113, and GEOS 1111L. (Typically offered: Fall)

GEOS 5673. Volcanology. 3 Hours.
A broad introduction to volcanic processes and their associated hazards. Emphasis will be placed on applying basic physical and chemical principles to understanding volcanic systems. Prerequisite: GEOS 2313. (Typically offered: Irregular)

GEOS 5693. Environmental Justice. 3 Hours.
(Formerly GEOS 4693.) This course deals with the ethical, environmental, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. Credit will not be given for both GEOS 4693 and GEOS 5693. (Typically offered: Spring)

GEOS 5713. Geology of Our National Parks. 3 Hours.
(Formerly GEOS 4663.) This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Credit will not be given for both GEOS 4653 and GEOS 5713. Prerequisite: GEOS 1113. (Typically offered: Fall)

GEOS 5743. Petroleum Geology. 3 Hours.
(Formerly GEOS 4253.) Distribution and origin of petroleum. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both GEOS 4253 and GEOS 5743. Corequisite: Lab component. Prerequisite: Admission to the Geology graduate program. (Typically offered: Fall)

GEOS 5753. Karst Hydrogeology. 3 Hours.
(Formerly GEOS 4153.) Assessment of ground water resources in carbonate rock terrains; relation of ground water and surface water hydrology to karst; quantification of extreme variability in karst environments; data collection rationale. Field trips required. Graduate degree credit will not be given for both GEOS 4153 and GEOS 5753. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033). (Typically offered: Irregular)

GEOS 5783. Geography of Europe. 3 Hours.
(Formerly GEOS 4783.) Geographic regions of the area with emphasis on their present development. Graduate degree credit will not be given for both GEOS 4783 and GEOS 5783. (Typically offered: Irregular)

GEOS 5793. Geospatial Unmanned Aircraft Systems. 3 Hours.
Geospatial unmanned aircraft systems (UAS) are becoming key technologies in a number of disciplines. This course will introduce safe and legal operation of UAS in aerial photography, multispectral, thermal and LIDAR applications, geodetic control, photogrammetric and computer vision processing, and the creation of accurate 2D and 3D digital information products. Pre- or Corequisite: (GEOS 4413 or GEOS 5213 (formerly GEOS 4413)) and (GEOS 4593 or GEOS 5293 (formerly GEOS 4593)) or equivalent. (Typically offered: Fall)

GEOS 5853. Environmental Isotope Geochemistry. 3 Hours.
This course is cross-listed with ENDY 5853.

GEOS 5863. Quantitative Techniques in Geosciences. 3 Hours.
(Formerly GEOS 4683.) An introduction to the application of standard quantitative and spatial statistical techniques to geoscientific analysis. Students will use both micro and large system computers in the course. Graduate degree credit will not be given for both GEOS 4683 and GEOS 5863. (Typically offered: Spring)

GEOS 5873. Geological Data Analysis. 3 Hours.
(Formerly GEOS 4783.) Quantitative methods and techniques for analysis and interpretation of geological data. Credit will not be given for both GEOS 4783 and GEOS 5873. Corequisite: Lab component. Prerequisite: MATH 2564 and GEOS 3514. (Typically offered: Spring)

GEOS 5924. Earth System History (ACTS Equivalency = PHSC 1104). 4 Hours.
(Formerly GEOS 4924.) Physical and biological events that form the history of the earth from its formation to the beginning of the historical era. Credit will not be given for both GEOS 4924 and GEOS 5924. Graduate enrollment only with departmental permission. Corequisite: Lab component. Prerequisite: GEOS 3514. (Typically offered: Spring)
GEOS 5933. Ancient Forest Science and Sustainability. 3 Hours.
Ancient forests preserve beautiful habitat with high ecological integrity. This course will examine the development, spatial distribution, and ongoing destruction of ancient forests worldwide, and how science can contribute to the understanding and sustainable management of these valuable resources. (Typically offered: Fall Odd Years)

GEOS 5973. Seminar in Geoinformatics. 3 Hours.
Geographic information science and technology research topics of particular interest to the graduate student class. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

GEOS 5993. Dynamics of Sediment Transport. 3 Hours.
The course will give aspiring geologists and civil engineers tools for solving sedimentological problems in their fields. Starting from a grounding in fluid mechanics, we will learn how sediment is transported and stratigraphy accumulated. This will be applied to problems in sedimentology at all scales. (Typically offered: Fall Odd Years)

GEOS 600V. Master's Thesis. 1-6 Hour.
Master's thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

GEOS 700V. Doctoral Dissertation. 1-9 Hour.
Dissertation research. Prerequisite: Graduate standing and Ph.D. candidacy (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

German (GERM)

Courses

GERM 470V. Special Topics. 1-3 Hour.
May be offered in a topic not specifically covered by courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GERM 5013. Germany and the Holocaust: The Significance of the Holocaust in Differentiated Contexts. 3 Hours.
(Formerly GERM 4013.) Taught in English. Topics covering the role of the Holocaust in German history, culture, art, language and German Studies. Equal emphasis will be placed on historical competence and philosophical/theoretical inquiry, addressed from a variety of media and primary and secondary sources. Graduate degree credit will not be given for both GERM 4013 and GERM 5013. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GERM 5043. German Cinema. 3 Hours.
(Formerly GERM 4043.) Presents a range of German films in cultural-historical context; vocabulary and structures for discussing film, film history, and film theory in German. Graduate degree credit will not be given for both GERM 4043 and GERM 5043. Prerequisite: GERM 3003. (Typically offered: Irregular)

GERM 5123. The German Novella. 3 Hours.
An intensive study of the novella as a genre from its origin to the present. Prerequisite: GERM 3013. (Typically offered: Irregular)

GERM 5133. The German Drama. 3 Hours.
A study of the development of the forms and themes of the German drama from the middle ages to the present. Prerequisite: GERM 3013. (Typically offered: Irregular)

GERM 5143. German Lyric Poetry. 3 Hours.
A study of the forms and themes of German lyric poetry from the middle ages to the present. (Typically offered: Irregular)

GERM 5223. Early German Literature: Middle Ages to the Enlightenment. 3 Hours.
Early German literature. (Typically offered: Irregular)

GERM 5273. German Literature: Enlightenment, Storm and Stress, and Classicism. 3 Hours.
German literature. (Typically offered: Irregular)

GERM 5343. Early Modern German Literature: Late 19th and Early 20th Century. 3 Hours.
Early modern German literature. (Typically offered: Irregular)

GERM 5363. German Literature after 1945. 3 Hours.
German literature after 1945. (Typically offered: Irregular)

GERM 5703. Special Topics. 3 Hours.
May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Graduate Education Courses (GRSD)

Courses

GRSD 400V. Research Experience Undergraduate Internship. 1-6 Hour.
Internship for students participating in an undergraduate research experience. (Typically offered: Summer) May be repeated for up to 12 hours of degree credit.

GRSD 5003. The Professoriate: Teaching, Learning and Assessment. 3 Hours.
Designed to introduce the future academic professional to the expectations of the faculty teaching role in higher education. Topics include techniques of effective teaching and learning, dealing with a variety of institutional expectations, course management issues, and using models of effective teaching across a broad spectrum of class sizes and levels. (Typically offered: Spring)

GRSD 5013. Practicum for Future Faculty. 3 Hours.
This course is designed to follow GRSD 5003 and to give participants opportunities to apply theories and methods learned in that course. To accomplish these goals, the course instructor helps the participant arrange a mentoring opportunity as part of this course. Prerequisite: GRSD 5003. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GRSD 502V. Special Topics in Preparing Future Faculty. 1-3 Hour.
Seminar on selected topics for those anticipating a career teaching in higher education. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GRSD 5033. The Professoriate: Research and Service. 3 Hours.
Designed to complement GRSD 5003 by focusing on topics of interest to future academic professionals beyond those related to instruction. Topics include developing a research statement, strategies for securing an academic position the general nature of employment and service expectations in higher education, research ethics, and funding issues, including grant proposal writing. (Typically offered: Fall)

GRSD 5041. Graduate Enrollment. 1 Hour.
Internship for students participating in an undergraduate research experience. This course allows a degree-seeking graduate student to continue as an active graduate student. Students should enroll in this course only when they are not enrolled in credit-bearing academic courses. This course cannot be counted for degree credit. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Greek (GREK)

Courses

GREK 5003. Greek Lyric Poetry. 3 Hours.
(Formerly GREK 4003.) Readings from selected Greek lyric poems, to be chosen from several appropriate authors from the 7th through the 5th centuries BCE: Archilochus, Hippox, Sappho, Alcaeus, Trytlaeus, Mmmmerus, Semonides, Solon, Xenophanes, Theognis, Pindar, Bacchylides. Graduate degree credit will not be given for both GREK 4003 and GREK 5003. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)
GREEK 5013. Greek Epic Poetry. 3 Hours.  
(Formerly GREK 4013.) Study of the primary works of Greek hexameter poetry, including Homer, Hesiod, and/or the Homeric Hymns, with special attention to issues of oral composition and performance. Graduate degree credit will not be given for both GREK 4013 and GREK 5013. Prerequisite: GREK 2013. (Typically offered: Irregular)

GREEK 5023. Greek Philosophy. 3 Hours.  
(Formerly GREK 4023.) Study of representative works of Greek philosophy, including those of the Pre-Socratics, Plato, and/or Aristotle. Graduate degree credit will not be given for both GREK 4023 and GREK 5023. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREEK 5033. Herodotus or Thucydides. 3 Hours.  
(Formerly GREK 4033.) Readings of Herodotus, Book VII, and Thucydides, Book VI; collateral readings on the Persian and Peloponnesian Wars. Graduate degree credit will not be given for both GREK 4033 and GREK 5033. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREEK 5043. Greek Drama. 3 Hours.  
(Formerly GREK 4043.) Readings of two tragedies and one comedy: a study of the Greek theatre. Graduate degree credit will not be given for both GREK 4043 and GREK 5043. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREEK 5053. Greek Syntax and Composition. 3 Hours.  
(Formerly GREK 4053.) Greek syntax and composition. Graduate degree credit will not be given for both GREK 4053 and GREK 5053. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREEK 5063. Hellenistic Poetry. 3 Hours.  
(Formerly GREK 4063.) Selections from significant post-classical authors, including Callimachus, Theocritus, Bion, Moschus, Herondas, Apollonios of Rhodes, and/or poets of the Greek Anthology. Special attention to archaic and classical influences, contemporary Hellenistic culture, and Roman responses. Graduate degree credit will not be given for both GREK 4063 and GREK 5063. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREEK 5073. Ancient Greek Novel. 3 Hours.  
(Formerly GREK 4073.) Study of the development of the Greek novel including the works of Lucian, Longus, Heliodorus, and/or Achilles Tatius. Graduate degree credit will not be given for both GREK 4073 and GREK 5073. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREEK 5083. Greek Epigraphy. 3 Hours.  
(Formerly GREK 4083.) Study of inscriptions, especially Attic, in their historical and social contexts, from the 8th century BCE to the Hellenistic/Roman period. Training in epigraphical conventions and symbols. Graduate degree credit will not be given for both GREK 4083 and GREK 5083. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREEK 5093. Biblical and Patristic Greek. 3 Hours.  
(Formerly GREK 4093.) Selected readings from appropriate texts, varying by semester, including the Septuagint, New Testament, Apostolic Fathers, and other patristic literature to the 5th century CE. Reading and discussion of selected texts in major genres. Graduate degree credit will not be given for both GREK 4093 and GREK 5093. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREEK 5103. Greek Oratory. 3 Hours.  
(Formerly GREK 4103.) Readings from selected speeches, to be chosen from one or more appropriate authors: Lysias, Antiphon, Demosthenes, Isocrates, Andocides. Study of sophism and rhetoric of Athens in the 5th and 4th centuries BCE. Graduate degree credit will not be given for both GREK 4103 and GREK 5103. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREEK 575V. Special Investigations. 1-6 Hour.  
Special investigations. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

Health, Human Performance and Recreation (HHPR) Courses

HHPR 5333. Research in Health, Human Performance and Recreation. 3 Hours.  
Methods and techniques of research in health, human performance and recreation including an analysis of examples of their use and practice in their application to problems of interest to the student. (Typically offered: Fall, Spring and Summer)

HHPR 560V. Workshop. 1-6 Hour.  
Workshop. (Typically offered: Irregular)

HHPR 6233. Management in HHPR. 3 Hours.  
Deals with principles, procedures, relationships, problems, and current practices in the supervision of health education and kinesiology. Includes management of facilities, programs, personnel, and processes. (Typically offered: Irregular)

HHPR 6333. Measurement in HHPR. 3 Hours.  
Competencies for analysis and application of evaluation and measurement in HHPR. (Typically offered: Fall Odd Years)

HHPR 689V. Directed Research. 1-6 Hour.  
Laboratory investigations, in basic and applied research. (Typically offered: Fall, Spring and Summer)

HHPR 699V. Seminar. 1-3 Hour.  
Seminar. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

HHPR 700V. Doctoral Dissertation. 1-18 Hour.  
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
Health, Sport and Exercise Science

Degree Offered:
Ph.D. in Health, Sport and Exercise Science (HSES)

The Ph.D. program in the Department of Health, Human Performance and Recreation is a research-focused degree that is designed to prepare scholars in advanced study to contribute to the field through teaching, research, and service.

The department is comprised of four divisions and offers the Ph.D. degree with a concentration in each corresponding program area:

1. Exercise Science
2. Health Behavior and Health Promotion
3. Kinesiology Pedagogy
4. Recreation and Sport Management

Ph.D. in Health, Sport and Exercise with Exercise Science Concentration

Admission to Ph.D. Degree Program:

The applicant must have 1) completed a master’s degree or its equivalent in a field related to their specialization area to which they are applying, 2) meet general admission requirements of the Graduate School, 3) a GPA of at least 3.00 on all graduate course work; and 4) an acceptable score on the Graduate Record Examinations (GRE). Admission will be based on the willingness and ability of a graduate faculty member to accept a new student. Additional prerequisites may be prescribed after review of application materials.

Applications must include the following:

1. Curriculum vitae.
2. Statement of purpose and research interest, including specification of the area of concentration to which you are applying.
3. Academic transcripts
4. Three letters of recommendation

Requirements for the Doctor of Philosophy Degree:

A minimum of 60 graduate semester hours, including 18 hours of dissertation, is required after admission into the Ph.D. program. In the event required courses for the Ph.D. program have been taken during a student’s master’s degree program, they will need to substitute another graduate course in lieu of the required course. A doctoral advisory committee will be established by the student in consultation with the Coordinator of Graduate Study during the first semester of enrollment subsequent to acceptance into the degree program. The student, in conjunction with the advisory committee, will define the program of study. The degree program requires successful completion of qualifying examinations, dissertation, and an oral defense of the dissertation. These last requirements are described elsewhere in this catalog.

HHPR 5353 Research in Health, Human Performance and Recreation 3
ESRM 5393 Statistics in Education and Health Professions 3
HHPR 700V Doctoral Dissertation 18

Research and Statistical Requirements

A minimum of 18 hours approved by doctoral advisory committee. 18

Total Hours 42

Requirements also include the area of concentration presented below.

Requirements for Exercise Science Concentration:

Exercise Science Core
EXSC 5323 Biomechanics I 3
EXSC 5513 Physiology Exercise I 3
EXSC 5593 Practicum in Laboratory Instrumentation 3

Cognate
The student, in consultation with the doctoral advisory committee, will identify hours of further course work comprising a field of study in an area of interest. Course work may be selected from several related disciplines or a single discipline.

Electives
Students must complete 36 hours of graduate electives as approved by the doctoral advisory committee.

Total Hours 54

Ph.D. in Health, Sport and Exercise Science with Health Behavior and Health Promotion Concentration

Admission to Ph.D. Degree Program:

The applicant must have 1) completed a master’s degree or its equivalent in a field related to their specialization area to which they are applying, 2) meet general admission requirements of the Graduate School, 3) a GPA of at least 3.00 on all graduate course work; and 4) an acceptable score on the Graduate Record Examinations (GRE). Admission will be based on the willingness and ability of a graduate faculty member to accept a new student. Additional prerequisites may be prescribed after review of application materials.

Applications must include the following:

1. Curriculum vitae.
2. Statement of purpose and research interest, including specification of the area of concentration to which you are applying.
3. Academic transcripts
4. Three letters of recommendation

Requirements for the Doctor of Philosophy Degree:

A minimum of 60 graduate semester hours, including 18 hours of dissertation, is required after admission into the Ph.D. program. In the event required courses for the Ph.D. program have been taken during a
student’s master’s degree program, they will need to substitute another
graduate course in lieu of the required course. A doctoral advisory
committee will be established by the student in consultation with the
Coordinator of Graduate Study during the first semester of enrollment
subsequent to acceptance into the degree program. The student, in
conjunction with the advisory committee, will define the program of
study. The degree program requires successful completion of qualifying
examinations, dissertation, and an oral defense of the dissertation.
These last requirements are described elsewhere in this catalog.

**Research and Statistical Requirements**
A minimum of 18 hours approved by doctoral advisory committee. 18

Total Hours 42

Requirements also include the area of concentration presented below.

**Requirements for the Health Behavior and Health Promotion Concentration:**

The Health Behavior and Health Promotion concentration trains health
behavior researchers for academic positions in university settings, for
positions in federal health agencies such as the Centers for Disease
Control and Prevention and the National Institutes of Health, and for post-
doctoral research fellowships.

**Health Behavior Core**

**PBHL 5533** Theories of Social and Behavioral Determinants of Health 3

**PBHL 5563** Public Health: Practices and Planning 3

**PBHL 5573** Principles of Health Education 3

**PBHL 5613** Epidemiology 3

**Cognate**
The student, in consultation with the doctoral advisory committee, will identify hours of further course work comprising a field of study in an area of interest. Course work may be selected from several related disciplines or a single discipline.

**Electives**
Students must complete 36 hours of graduate electives as approved by the doctoral advisory committee. 36

Total Hours 54

**Ph.D. in Health, Sport and Exercise Science with Kinesiology Pedagogy Concentration**

**Admission to Ph.D. Degree Program:**
The applicant must have 1) completed a master’s degree or its equivalent in a field related to their specialization area to which they are applying, 2) meet general admission requirements of the Graduate School, 3) a GPA of at least 3.00 on all graduate course work; and 4) an acceptable score on the Graduate Record Examinations (GRE). ### Research and Statistical Requirements

A minimum of 18 hours approved by doctoral advisory committee.  
18

Total Hours  
42

Requirements also include the area of concentration presented below.

**Courses**

**EXSC 5023. Advanced Teaching in Exercise Science. 3 Hours.**
Examination and practical exposure to the principles and practices of undergraduate teaching in exercise science. Includes course planning, teaching techniques, assessment strategies, and supervised practice. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

**EXSC 5323. Biomechanics I. 3 Hours.**
Intended to serve as an introduction to biomechanics and focuses on scientific principles involved in understanding and analyzing human motion. (Typically offered: Fall)

**EXSC 5333. Instrumentation in Biomechanics. 3 Hours.**
The application of knowledge and skills necessary for data collection for sports analysis. Provides valuable information on instrumentation used specifically in biomechanics. Prerequisite: EXSC 5323. (Typically offered: Irregular)

**EXSC 5353. Exercise Psychology. 3 Hours.**
Exercise Psychology is a lecture and discussion format for students interested in learning about theoretical and research information related to exercise adherence. (Typically offered: Fall)

**EXSC 5443. Seminar in Brain Injury and Behavior. 3 Hours.**
The Brain Injury and Behavior Seminar will immerse you in specific topics pertaining to the study of human brain-behavior relationships. Emphasis will be placed on traumatic brain injury (TBI), including moderate-to-severe injuries, as well as mild TBI or concussion. The first half of the course will focus on research related to how individuals sustain and recover from TBI. The second half of the course will focus on sports-related concussion in youth, collegiate, and professional athletes, with an emphasis on how athletes sustain concussions, how concussions are assessed, treated, and managed, and how return-to-play decision are made. This course will introduce you to research in a variety of fields that include physiology, neurology, and neuropsychology through primary source material in the form of book chapters and journal articles. (Typically offered: Irregular)

**EXSC 5513. Physiology Exercise I. 3 Hours.**
A study of the foundation literature in exercise physiology. Emphasis is placed on the muscular, cardiovascular, and respiratory systems. (Typically offered: Fall)

**EXSC 5523. Muscle Metabolism in Exercise. 3 Hours.**
A study of the metabolic changes that occur in muscle as a result of exercise, exercise training, and other stressors. Prerequisite: EXSC 5513 or equivalent. (Typically offered: Spring)

**EXSC 5533. Cardiac Rehabilitation Program. 3 Hours.**
An examination of the concepts, design, and implementation of cardiac rehabilitation programs. Emphasis on exercise programs but reference to nutrition, psychology, and other lifestyle interventions. (Typically offered: Spring Even Years)

**EXSC 5543. Cardiovascular Function in Exercise. 3 Hours.**
Study of the effects of exercise training and other stressors on the cardiovascular system. Detailed study of the components of the cardiovascular system and the responses and adaptations of those components to selected stimuli. Corequisite: EXSC 5513 or equivalent. (Typically offered: Fall Even Years)

**EXSC 5593. Practicum in Laboratory Instrumentation. 3 Hours.**
Practical experience in testing physical fitness utilizing laboratory equipment. Objective is to quantify physiological parameters, leading to the individualized exercise prescription. (Typically offered: Fall and Summer)

**EXSC 5613. Physical Dimensions of Aging. 3 Hours.**
This course will focus on the physiological changes with healthy aging, pathophysiology of age-related diseases, testing issues, exercise interventions, and the psychosocial aspects of aging. Prerequisite: EXSC 5513. (Typically offered: Spring Odd Years)
EXSC 5643. Advanced Psychology of Sports Injury and Rehabilitation. 3 Hours.
The purpose of this course is to explore and discuss factors related to the
psychological aspects of athletic injuries. These factors include the sociocultural,
mental, emotional, and physical dimensions of injury rehabilitation. Prerequisite:
Students must be accepted into the Masters of Athletic Training graduate program.
(Typically offered: Spring)

EXSC 5773. Performance and Drugs. 3 Hours.
The pharmacological and physiological effects of ergogenic aids upon the athlete
and performance coupled with the ethical and moralistic viewpoints of drug taking.
Practical laboratory experiences are provided with pertinent statistical surveys of
athletes; their drug taking habits and relevant psychological impact on performance.
(Typically offered: Spring)

HIED 5003. Overview-American Higher Education. 3 Hours.
A basic course in the study of higher education open to all students seeking careers
in colleges and universities. Serves as an introduction to the programs, problems,
issues, and trends in higher education. (Typically offered: Fall)

HIED 5033. Student Affairs in Higher Education. 3 Hours.
Study of origins, functions, and policies in student personnel services in
contemporary 2- and 4-year colleges and universities with emphasis on the student
and student development. (Typically offered: Fall Even Years)

HIED 5043. Student Development in Higher Education. 3 Hours.
Provides those who work or plan to work in post secondary educational institutions
with an understanding of the student population in contemporary colleges and
universities. (Typically offered: Spring)

HIED 504V. Practicum in Higher Education. 1-6 Hour.
Students are assigned to a department or agency within or outside the university
for professional experience under the joint supervision of on-site personnel and
university faculty. Periodic meetings are scheduled for evaluation, discussion, and
examination of techniques. (Typically offered: Fall, Spring and Summer)

HIED 5053. The Community College. 3 Hours.
An overview of the community college. Topics include the history and philosophy
of the community college movement, students, curriculum, state and local campus
governance, teaching, student personnel work, finance and issues, problems, and
trends. (Typically offered: Irregular)

HIED 5063. Diversity in Higher Education. 3 Hours.
Broadly explores how sociocultural contexts influence diversity at colleges and
universities. Focuses on the responsibilities of higher education leaders to be
multiculturally competent professionals who foster inclusive practices for diverse
student populations. (Typically offered: Irregular)

HIED 5073. Management of Higher Education Institutions. 3 Hours.
Principles and concepts of management and their application in college and
university settings. (Typically offered: Fall and Summer)

HIED 5083. History and Philosophy of Higher Education. 3 Hours.
An examination of the history and development of higher education including the
study of the philosophy, objectives, and functions of various types of institutions.
(Typically offered: Spring)

HIED 5093. Research in Higher Education and Student Affairs. 3 Hours.
This course provides master's students an overview of research and literature
applicable to the discipline; teaches students how to understand academic literature
and use empirical evidence to inform practices and policies at colleges and
universities. Prerequisite: MEd students in the Higher Education Program. (Typically
offered: Fall, Spring and Summer)

HIED 5103. Higher Education in International Contexts. 3 Hours.
Explores various systems of higher education around the world. Equips students
with the knowledge and skills to work in the increasingly internationalized field
of higher education. (Typically offered: Irregular)

HIED 5303. Non-Profit Fundraising. 3 Hours.
Non-Profit Fundraising examines the theory and practice of the professional field
of fundraising and development, which is dedicated to attracting philanthropic support
from constituents for colleges, universities, health organizations, hospitals, non-
profit organizations, museums and other philanthropic endeavors. (Typically offered:
Irregular)

HIED 5643. Reflective Practice in Higher Education and Student Affairs. 3
Hours.
Provides students an opportunity to work in a functional area of higher education,
reflect on how their experiences inform their career goals as higher education
professionals, and learn job search strategies in higher education. (Typically offered:
Fall, Spring and Summer)
HIED 6083. Management Skills for Effective Leadership. 3 Hours.
Development of management skills that enhance leadership includes understanding yourself, managing yourself, team building, personnel selection, group and individual decision-making, problem solving, managing conflict, developing valid performance appraisal systems, conducting performance appraisal interview, and other topics of current interest. Prerequisite: Doctoral students in Higher Education or permission of the instructor. (Typically offered: Irregular)

HIED 6093. Leading Change. 3 Hours.
An in-depth examination of leadership, change, and culture in postsecondary education. (Typically offered: Irregular)

HIED 6183. Organization Development and Change in Higher Education. 3 Hours.
An examination of the theory and practice of organization development as it relates to planned change in colleges and universities. (Typically offered: Irregular)

HIED 6303. Advancement in Higher Education. 3 Hours.
Advancement in Higher Education examines the theory and practice of the professional field and function referred to as "institutional advancement", which is dedicated to attracting philanthropic support as well as building attitudinal and behavioral support among key constituents for colleges and universities. (Typically offered: Irregular)

HIED 6323. Design and Evaluation of College Teaching. 3 Hours.
Theory and practice of effective college teaching. Emphasis is placed on preparation and evaluation of instruction. (Typically offered: Irregular)

HIED 6333. Curriculum Design in Higher Education. 3 Hours.
Types of undergraduate curricula and their supporting philosophies; approaches to curricula planning and assessment; curricular reforms; and factors influencing curricular policy making. (Typically offered: Irregular)

HIED 6343. Strategies for Effective College Teaching. 3 Hours.
An examination of traditional and innovative instructional strategies for use in college teaching. (Typically offered: Irregular)

HIED 6353. The College and University Presidency. 3 Hours.
The course explores the basic elements of the presidency of an academic institution and examines the critical issues facing the college and university presidents/chancellors. (Typically offered: Irregular)

HIED 6423. Trends, Issues and Problems in Higher Education. 3 Hours.
A study of the current problems and trends related to the field of higher education. (Typically offered: Irregular)

HIED 6483. Strategic Enrollment Management. 3 Hours.
An examination of admissions marketing strategies, communications plans, branding, and forecasting as well as how other areas (financial aid, honors, scholarships, and student affairs) contribute to successful recruitment efforts. Other key enrollment management areas of focus for the class include academic records, registration, degree audits, FERPA, student support, and most importantly, retention. Major state and federal legislation that underscores any of these activities will be discussed as well. (Typically offered: Irregular)

HIED 6533. Assessment of Institutional Effectiveness in Higher Education. 3 Hours.
The course examines the fundamentals of assessment of learning outcomes and institutional effectiveness and introduces assessment as a tool to inform strategic planning and data-driven decision-making in higher education. (Typically offered: Irregular)

HIED 6643. College Students in the United States. 3 Hours.
Students will engage with the leading theoretical and empirical scholarship related to college students and use this information to engage in class discussion, complete course assignments, consider implications for practice, and contemplate opportunities for new scholarship. Prerequisite: Doctoral student in the Higher Education Program or instructor consent. (Typically offered: Irregular)

HIED 6653. Legal Aspects of Higher Education. 3 Hours.
An examination of the legal status of higher education in the United States; the rights and responsibilities of educators and students including fair employment; due process; torts liability and contracts; student rights, landmark court decisions; federal and state legislation having an impact on education. (Typically offered: Fall and Spring)

HIED 6663. Finance and Fiscal Management. 3 Hours.
Higher education finance and budgeting practices: problems, issues, trends, and policy issues in higher education. (Typically offered: Irregular)

HIED 6683. Governance and Policy Making in Higher Education. 3 Hours.
An analysis of governance and policy making affecting the control of colleges and universities. Attention is given to policy generation, governing board supervision, and the impact of institutional, professional, and regional groups as well as community, state, and federal pressures. (Typically offered: Irregular)

HIED 6693. Research Techniques in Higher Education. 3 Hours.
Techniques of research applicable to Higher Education. (Typically offered: Irregular)

HIED 674V. Internship. 1-6 Hour.
Supervised field experiences in student personnel services, college administration, college teaching, institutional research, development, or other areas of college and university work. (Typically offered: Fall, Spring and Summer)

HIED 699V. Seminar. 1-6 Hour.
A series of seminars for specialized study into areas of current significance in postsecondary education, such as leadership and planning; organization, development, and change; human resource development and appraisal; the student in higher education; etc. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HIED 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

History (HIST)

Courses

HIST 5003. Democratic Athens. 3 Hours.
(Formerly HIST 4003.) History of the Athens from the sixth century BCE to the end of the fourth. Topics include origins and evolution of democracy, the Persian wars, the rise and fall of the Athenian Empire, and the development of historiography, literature, art, and philosophy during the period. Graduate degree credit will not be given for both HIST 4003 and HIST 5003. (Typically offered: Irregular)

HIST 5013. Alexander the Great and the Hellenistic World. 3 Hours.
(Formerly HIST 4013.) A survey of the achievements of Alexander and the culture of the new world he created. The personality and career of Alexander are examined as well as the rich diversity of the Hellenistic world: trade with India, religious syncretism, and the development of Hellenistic science and philosophy. Graduate degree credit will not be given for both HIST 4013 and HIST 5013. (Typically offered: Irregular)

HIST 5033. Roman Empire. 3 Hours.
(Formerly HIST 4033.) History of Rome from the Emperor Augustus to Constantine, ca. 30 BCE - 337 CE. Topics include the sources for imperial Rome, the organization of imperial government, the provinces of Rome and provincial government, art and literature under the empire, the rise of Christianity, and the conversion of the Empire. Graduate degree credit will not be given for both HIST 4033 and HIST 5033. (Typically offered: Irregular)

HIST 506V. Readings in European History. 1-6 Hour.
Directed readings in the field of European history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
HIST 507V. Readings in American History. 1-6 Hour.
Readings. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HIST 508V. Research Problems in European History. 1-6 Hour.
Research problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

HIST 509V. Research Problems in American History. 1-6 Hour.
Research problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

HIST 511V. Research Problems in Latin American History. 1-6 Hour.
Research problems in Latin American history. (Typically offered: Irregular)

HIST 517V. Readings in Asian History. 1-6 Hour.
Readings. Prerequisite: Graduate standing. (Typically offered: Irregular)

HIST 518V. Research Problems in Asian History. 1-18 Hour.
Research problems in Asian history. Prerequisite: Graduate standing. (Typically offered: Irregular)

HIST 5193. Great Britain, 1901-2001. 3 Hours.
(Formerly HIST 4193.) Examines the history of the British Isles from the death of Queen Victoria in 1901 to the re-election of Prime Minister Tony Blair in 2001. Special attention is given to the collapse of the British Empire, the birth of the welfare state, and the challenges inherent in the decline of British world power. Graduate degree credit will not be given for both HIST 4193 and HIST 5193. (Typically offered: Spring Odd Years)

HIST 5203. History of the Holocaust. 3 Hours.
(Formerly HIST 4203.) Examines the origins, history, and legacies of the European Holocaust. Traces the origins of anti-Semitism in Europe, the rise of Nazism in Germany, the path to genocide during World War II, and the role of victims, perpetrators, rescuers, and bystanders. Considers issues of memory and justice in the postwar era. Graduate degree credit will not be given for both HIST 4203 and HIST 5203. (Typically offered: Irregular)

HIST 522V. Readings in Latin America History. 1-6 Hour.
Readings in Latin American history. (Typically offered: Irregular)

HIST 524V. Readings in African History. 1-6 Hour.
Readings in African history. (Typically offered: Irregular)

HIST 525V. Research Problems in African History. 1-6 Hour.
Research problems in African history. (Typically offered: Irregular)

HIST 526V. Readings in Middle Eastern History. 1-6 Hour.
Readings in Middle Eastern history. (Typically offered: Irregular)

HIST 527V. Readings in Medieval History. 1-6 Hour.
Readings in Medieval history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 528V. Research Problems in Middle Eastern History. 1-6 Hour.
Research problems in Middle Eastern history. (Typically offered: Irregular)

HIST 529V. Research Problems in Medieval History. 1-6 Hour.
Research problems in Medieval history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 530V. Readings in British History. 1-6 Hour.
Directed readings in the field of British history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

HIST 533V. Readings in Ancient History. 1-6 Hour.
Readings in Ancient history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 534V. Research Problems in Ancient History. 1-6 Hour.
Research problems in Ancient history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 5393. Early Modern Islamic Empires, 1300-1750. 3 Hours.
(Formerly HIST 4393.) An examination of the historical development of the three great Islamic empires in the early modern period: the Ottomans, the Safavids of Iran, and the Mughals of India. Special attention given to imperial expansion, administrative structures, religious-legal establishment, and the formation of distinct traditions in political ideology, historiography, and the arts and sciences. Graduate degree credit will not be given for both HIST 4393 and HIST 5393. (Typically offered: Spring Odd Years)

HIST 5403. Islam in Asia. 3 Hours.
(Formerly HIST 4403.) Introduces students to the history of Islam in East and Southeast Asia over the past 1,200 years. It focuses on the 18th-21st centuries when Muslims were part of everyday life in Asia and participated in the formation of majority and minority identities in the region. Graduate degree credit will not be given for both HIST 4403 and HIST 5403. (Typically offered: Irregular)

HIST 545V. Readings in Caribbean History. 1-6 Hour.
Graduate readings in Caribbean history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 546V. Research Problems in Caribbean History. 1-6 Hour.
Independent research in Caribbean history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 547V. Readings in Atlantic History. 1-6 Hour.
Graduate readings in Atlantic world history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HIST 5483. African American Biographies. 3 Hours.
(Formerly HIST 4483.) Introduction to the history and intellectual development of famous and not-so-famous African Americans. Graduate degree credit will not be given for both HIST 4483 and HIST 5483. (Typically offered: Irregular)

HIST 5493. Religion in America to 1860. 3 Hours.
(Formerly HIST 4493.) History of religion in early America, primarily from a social and cultural perspective. Topics will include region, social class, growth of institutions, slavery, print culture, and social reform in traditions including Protestantism, West African religion, Catholicism, Native American religion, and Judaism. Graduate degree credit will not be given for both HIST 4493 and HIST 5493. (Typically offered: Irregular)

HIST 5503. History of Political Parties in the United States, 1789-1896. 3 Hours.
(Formerly HIST 4503.) Origin and development of the American party system from the implementation of the constitution to the election of McKinley. Graduate degree credit will not be given for both HIST 4503 and HIST 5503. (Typically offered: Fall Even Years)

HIST 5513. History of Political Parties in the United States Since 1896. 3 Hours.
(Formerly HIST 4513.) Response of the party system to America's emergence as an industrial nation and world power from the election of 1896 to present. Graduate degree credit will not be given for both HIST 4513 and HIST 5513. (Typically offered: Spring Odd Years)

HIST 5523. Roman Republic. 3 Hours.
(Formerly HIST 4023.) History of Rome from its origins in the eighth century BCE to the fall of the Republic in the first century BCE. Topics include the sources for Roman history, the development, functioning, and ultimate failure of republican government, the Roman army, and Roman imperialism in Italy and the Mediterranean. Graduate degree credit will not be given for both HIST 4023 and HIST 5523. (Typically offered: Irregular)

HIST 5543. American Social and Intellectual History Since 1865. 3 Hours.
(Formerly HIST 4543.) Survey of thought and society since the Civil War. Graduate degree credit will not be given for both HIST 4543 and HIST 5543. (Typically offered: Spring Odd Years)
HIST 5553. The Recluse in Early East Asia. 3 Hours.
(Formerly HIST 4553.) A cross-cultural study of those who chose or needed to leave the world of officialdom for the world of nature in early East Asia. Graduate degree credit will not be given for both HIST 4553 and HIST 5553. (Typically offered: Fall Even Years)

HIST 5563. The Old South, 1607-1865. 3 Hours.
(Formerly HIST 4563.) Survey of the political, social, and economic development of the antebellum South. Graduate degree credit will not be given for both HIST 4563 and HIST 5563. (Typically offered: Fall Odd Years)

HIST 5573. The New South, 1860 to the Present. 3 Hours.
(Formerly HIST 4573.) Survey of the development of the Civil War and postwar South to the present. Graduate degree credit will not be given for both HIST 4573 and HIST 5573. (Typically offered: Fall Even Years)

HIST 5583. Arkansas in the Nation. 3 Hours.
(Formerly HIST 4583.) Designed to provide advanced undergraduate and graduate students with a comprehensive understanding of the full sweep of Arkansas history. The focus will be on social, economic and political history, and historiography. Graduate degree credit will not be given for both HIST 4583 and HIST 5583. (Typically offered: Irregular)

HIST 5593. The Colonial French in the Mississippi Valley. 3 Hours.
(Formerly HIST 4593.) This course focuses on the French Colonial Mississippi Valley from 1689 until 1763. Activities for both French and non-French speaking students provide a rich environment to discuss encounters, subsistence strategies, and warfare faced by native peoples, missionaries, explorers, and colonists alike. Students will examine primary handwritten, transcribed, or translated sources. Graduate degree credit will not be given for both HIST 4593 and HIST 5593. (Typically offered: Spring)

HIST 5603. U.S. Labor History to 1877. 3 Hours.
(Formerly HIST 4603.) Examines the changing nature of work in U.S. history from 1607 until 1877 including the ways that workers—individually and collectively—understand the meanings of their labor and to the ways that notions of class, gender, ethnicity, and race inform these understandings. Graduate degree credit will not be given for both HIST 4603 and HIST 5603. (Typically offered: Fall Odd Years)

HIST 5613. Colonial America 1600-1763. 3 Hours.
(Formerly HIST 4613.) History of colonial America from 1600 to the end of the Seven Years War emphasizing economic, social, and cultural perspectives. Topics include Native American, French, Spanish, English, Dutch, and Russian interactions in North America and the larger Atlantic World. Graduate degree credit will not be given for both HIST 4613 and HIST 5613. (Typically offered: Irregular)

HIST 5623. Revolutionary America, 1763 to 1789. 3 Hours.
(Formerly HIST 4623.) History of revolutionary America emphasizing economic, social, and cultural perspectives. Topics include historical interpretations of the causes of the war, the impact of war on African Americans, women, loyalists, elite, and poor Americans. The course also examines the formation of the new national government. Graduate degree credit will not be given for both HIST 4623 and HIST 5623. (Typically offered: Irregular)

HIST 5633. Heian Japan 794-1192. 3 Hours.
(Formerly HIST 4633.) A study of courtly culture and the religious world of Heian Japan. Graduate degree credit will not be given for both HIST 4633 and HIST 5633. (Typically offered: Irregular)

HIST 5643. Early American Republic, 1789-1828. 3 Hours.
(Formerly HIST 4643.) History of the early United States emphasizing social and cultural perspectives. Topics addressed will include westward expansion, slavery, religion, and economic change. Graduate degree credit will not be given for both HIST 4643 and HIST 5643. (Typically offered: Irregular)

HIST 5653. Antebellum America, 1828-1850. 3 Hours.
(Formerly HIST 4653.) History of antebellum U.S. emphasizing social and cultural perspectives. Topics addressed will include slavery, religion, gender, the market economy, regionalism, and political developments. Graduate degree credit will not be given for both HIST 4653 and HIST 5653. (Typically offered: Irregular)

HIST 5663. Rebellion to Reconstruction, 1850-1877. 3 Hours.
(Formerly HIST 4663.) A survey of political, social, and economic issues from the late antebellum period through Reconstruction. Emphasis is placed on the causes of the Civil War and the problems of postwar America. A brief examination of the Civil War is included. Graduate degree credit will not be given for both HIST 4663 and HIST 5663. (Typically offered: Irregular)

HIST 5673. The American Civil War. 3 Hours.
(Formerly HIST 4673.) An intensive study of the political, social, military, and economic aspects of the American Civil War period. Graduate degree credit will not be given for both HIST 4673 and HIST 5673. (Typically offered: Fall)

HIST 5683. The American Civil Rights Movement. 3 Hours.
(Formerly HIST 4383.) Introduction to the history and development of the civil rights movement in the United States. Graduate degree credit will not be given for both HIST 4383 and HIST 5683. (Typically offered: Spring Odd Years)

HIST 570V. Special Topics. 1-6 Hour.
Special topics. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

HIST 5723. America Between the Wars, 1917-1941. 3 Hours.
(Formerly HIST 4723.) The impact of World War I, the 1920s, and the Great Depression upon American society and culture. Graduate degree credit will not be given for both HIST 4723 and HIST 5723. (Typically offered: Irregular)

HIST 573V. Readings in Global History. 1-6 Hour.
Directed readings in the field of Global history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

HIST 5753. Diplomatic History of the United States, 1776-1900. 3 Hours.
(Formerly HIST 4753.) Survey of American foreign relations from the American Revolution through the Spanish-American War. Principal topics include isolationism, freedom of the seas, manifest destiny and continental expansion, overseas expansion, and the diplomacy of war and peace. Emphasis on the relationship between domestic politics and foreign affairs. Graduate degree credit will not be given for both HIST 4753 and HIST 5753. Prerequisite: HIST 2003. (Typically offered: Fall Even Years)

HIST 5763. Diplomatic History of the United States, 1900-1945. 3 Hours.
(Formerly HIST 4763.) America's development as a world power. The course examines U.S. relations with Europe, Latin America, and East Asia, plus America's first approach to the Middle East. Particular emphasis is placed on America's involvement in World War I and World War II. Graduate degree credit will not be given for both HIST 4763 and HIST 5763. Prerequisite: HIST 2013. (Typically offered: Spring Odd Years)

HIST 5773. Diplomatic History of the US, 1945 to Present. 3 Hours.
(Formerly HIST 4773.) U.S. involvement in world affairs since WWII. The Cold War from an international perspective, including strategies, nuclear deterrence, conflicts, economic developments, cultural relations among allies and adversaries. Post-Cold War scenarios, including war on terrorism. Graduate degree credit will not be given for both HIST 4773 and HIST 5773. (Typically offered: Fall Odd Years)
HIST 5783. History of Modern Mexico. 3 Hours.
(Formerly HIST 4783.) This course examines the history of Mexico from the wars of independence to the present. Emphasis will be placed on the turbulent nineteenth century and the Mexican Revolution. Themes covered include colonial legacies, national identities, popular culture, emigration, and relations with the United States. Graduate degree credit will not be given for both HIST 4783 and HIST 5783. (Typically offered: Spring Odd Years)

HIST 5793. Colonial India, 1758-1948. 3 Hours.
(Formerly HIST 4793.) Examines the course of Indian history from the 1758 Battle of Plassey to eventual independence from Great Britain in 1948. Special attention is given to India’s place within the British Empire, particularly the East Indian Company, the Indian Mutiny, the Raj, the rise of Gandhi, and India’s independence movement. Graduate degree credit will not be given for both HIST 4793 and HIST 5793. (Typically offered: Irregular)

HIST 5803. Modern Scandinavia. 3 Hours.
(Formerly HIST 4803.) Examines the history of the Nordic lands, including Denmark, Finland, Iceland, Norway, and Sweden, from 1500 to the present. Graduate degree credit will not be given for both HIST 4803 and HIST 5803. (Typically offered: Irregular)

HIST 5813. Africans and Slavery in Colonial Latin America. 3 Hours.
(Formerly HIST 4813.) Explores the diverse experiences of slaves and free Blacks in colonial Spanish and Portuguese America from 1500 to around 1888, demonstrating that bondage and the practice of African slavery was a pillar of political authority in colonial Latin America. Graduate degree credit will not be given for both HIST 4813 and HIST 5813. (Typically offered: Irregular)

HIST 5823. Black Freedom in the Age of Emancipation. 3 Hours.
(Formerly HIST 4823.) This course centers on the comparative study of Atlantic world freedom movements from the perspective of the African Diaspora. It focuses on the histories, meanings, legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them. Graduate degree credit will not be given for both HIST 4823 and HIST 5823. (Typically offered: Spring)

HIST 5833. Social and Cultural History of the Modern Middle East. 3 Hours.
(Formerly HIST 4433.) An analysis of Middle East history in the 17th-20th centuries which focuses on the social transformation of urban and rural life. Particular emphasis is given to the roles of economics, genealogy, art, and popular culture. Graduate degree credit will not be given for both HIST 4433 and HIST 5833. (Typically offered: Irregular)

HIST 5843. The Atlantic World, 1400-1850. 3 Hours.
(Formerly HIST 4233.) Explores the political, economic, cultural, and social engagements of Africans, Europeans, and Native Americans across the Atlantic from 1400 to 1850. It uses a comparative lens to understand how interactions between Europe, Africa, and the Americas created enduring ties throughout the Atlantic Basin. Graduate degree credit will not be given for both HIST 4233 and HIST 5843. (Typically offered: Irregular)

HIST 5853. Early Chinese Empires: Mythology, Archeology, and Historiography. 3 Hours.
(Formerly HIST 4853.) A critical introduction to the most important sources and major themes, both textual and archeological, for the study of early China. Graduate degree credit will not be given for both HIST 4853 and HIST 5853. (Typically offered: Spring)

HIST 5863. Classical Thought in East Asia. 3 Hours.
(Formerly HIST 4863.) Introduces the major East Asian philosophical and religious traditions including Confucianism, Daoism, Buddhism, and Shintoism. Read original sources in translation, such as Analects, and explore perspectives that stem from the traditions as they bear on contemporary global issues. Graduate degree credit will not be given for both HIST 4863 and HIST 5863. (Typically offered: Fall)

HIST 5873. Germany since 1945. 3 Hours.
(Formerly HIST 4873.) Examines the history of Germany since the end of the Second World War including political division and economic recovery, dissident movements in East Germany and alternative cultures in West Germany, reunification in 1990, and the legacy of Nazism and the Holocaust. Graduate degree credit will not be given for both HIST 4873 and HIST 5873. (Typically offered: Irregular)

HIST 5883. Health and Disease: 1500 to the Present. 3 Hours.
(Formerly HIST 4883.) Explores the emergence of epidemics against the backdrop of the nation state and anxieties over women, the lower classes, and other marginalized groups. The rise of modern health programs illuminates the cultural construction of medicine, the biases of scientific inquiry, and the tensions among paternalism, liberty, and prejudice. Graduate degree credit will not be given for both HIST 4883 and HIST 5883. (Typically offered: Irregular)

HIST 5893. Germany, 1918-1945. 3 Hours.
(Formerly HIST 4253.) Study of German history from advent of the Weimar Republic to the end of the Third Reich with emphasis upon the failure of democratic government in the 1920s and the rise and fall of the National Socialist dictatorship. Graduate degree credit will not be given for both HIST 4253 and HIST 5893. (Typically offered: Irregular)

HIST 5903. Music and the Arts of Edo Japan 1600-1868. 3 Hours.
(Formerly HIST 4903.) A music and arts view of urban and popular culture of the Edo period of Japan (1600-1868). Readings drawn from history, literature, aesthetics, religion and science. Graduate degree credit will not be given for both HIST 4903 and HIST 5903. (Typically offered: Irregular)

HIST 5913. Reading Japanese Noh as Cultural History. 3 Hours.
(Formerly HIST 4913.) A historical, sociocultural, and inter-arts approach to the medieval lyrical-drama Japanese Noh, a form of masked theater with roots reaching beyond the 14th century. Graduate degree credit will not be given for both HIST 4913 and HIST 5913. (Typically offered: Irregular)

HIST 5923. Song China 960-1279. 3 Hours.
(Formerly HIST 4923.) Examination of the Song dynasty (960-1279) concentrating on the education and role of the scholar-official and the literatus. Readings drawn from history, literature, personal diaries, travel accounts, political memoranda, and scientific writings. Graduate degree credit will not be given for both HIST 4923 and HIST 5923. (Typically offered: Irregular)

HIST 5933. Ad Paradisum: Utopias, imaginary places, and the afterlife in East Asia. 3 Hours.
(Formerly HIST 4933.) Confucian, Daoist, and Buddhist ideas of ideal communities ('utopias'), of imaginary places ('paradise islands'), and of the afterlife ('heaven and hell') in East Asia will be traced in a broad sweep across literature, painting, and the performing arts. Graduate degree credit will not be given for both HIST 4933 and HIST 5933. (Typically offered: Irregular)

HIST 5943. U.S. Labor History, from 1877-present. 3 Hours.
(Formerly HIST 4943.) This course will examine the changing nature of work in U.S. history from 1877 until the present. It will pay particular attention to the ways that workers--individually and collectively--understand the meanings of their labor and to the ways that notions of class, gender, ethnicity, and race inform these understandings. Graduate degree credit will not be given for both HIST 4943 and HIST 5943. (Typically offered: Spring Even Years)

HIST 5953. The History of Sub-Saharan African Women. 3 Hours.
(Formerly HIST 4953.) Introduction to the history of women in Sub-Saharan Africa, starting in the early 18th century through the 20th century. Focus on women and the transatlantic slave trade, women's influence in pre-colonial religious, political, and cultural institutions, and women's experiences under colonial rule and in post-colonial Africa. Graduate degree credit will not be given for both HIST 4953 and HIST 5953. (Typically offered: Irregular)
HIST 5963. Third World Underdevelopment and Modernization. 3 Hours. (Formerly HIST 4963.) Examines key issues related to societal change in the Third World, including various views and theories of international development and modernization. Other major issues explored include social inequalities, food and hunger, population, environment, trade and globalization, international aid, and the roles of state, market, and civil society. Graduate degree credit will not be given for both HIST 4963 and HIST 5963. (Typically offered: Irregular)

HIST 5973. The Civilization of the Renaissance in Italy. 3 Hours. Important trends in Italian culture between the 14th and 16th centuries, including the birth of humanism, new understandings of the past, "new" political ideologies, scientific innovation, and famous art produced in the Western tradition. (Typically offered: Irregular)

HIST 5983. Intellectual History of Europe Since the Enlightenment. 3 Hours. (Formerly HIST 4143.) A survey of the major developments in European thought and culture since the emergence of Romanticism. Topics include Romanticism, Darwinism, Marxism, and Modernism. Graduate degree credit will not be given for both HIST 4143 and HIST 5983. (Typically offered: Fall Even Years)

HIST 600V. Master's Thesis. 1-6 Hour. Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

HIST 6013. The Era of the French Revolution. 3 Hours. (Formerly HIST 4213.) France from the salons of the Enlightenment to the Napoleonic Wars. The French Revolution will be explored in terms of politics and personalities, ideas and symbols, class and gender relations, and violence and terror. Graduate degree credit will not be given for both HIST 4213 and HIST 6013. (Typically offered: Fall Odd Years)

HIST 6033. Society and Gender in Modern Europe. 3 Hours. (Formerly HIST 4133.) Changing values and attitudes toward childhood, family life, sexuality, and gender roles in Europe from the Renaissance to the present. The social impact of the Industrial Revolution, urbanization, demographic change, and the two world wars. Graduate degree credit will not be given for both HIST 4133 and HIST 6033. (Typically offered: Spring Odd Years)

HIST 6063. Tudor-Stuart England, 1485-1714. 3 Hours. (Formerly HIST 4163.) Examines the history of the British Isles from the ascension of Henry VII and the Tudor dynasty until the close of the Stuart Era in 1714. Special attention is given to the English Reformation, the Elizabethan years, the 17th Century Revolutions, and the birth of an overseas Empire. Graduate degree credit will not be given for both HIST 4163 and HIST 6063. (Typically offered: Spring Even Years)

HIST 6073. Archaic Greece. 3 Hours. (Formerly HIST 4113.) History of Greece from the late Bronze Age to the end of the Persian Wars. This class will focus particularly on the sources involved with reconstructing early Greek history, especially Herodotus and Homer, on the development of the Greek city-state or polis, and on the interaction between the Greeks and Near-eastern civilizations during this period, culminating in the wars between the Greeks and the Persian Empire. Graduate degree credit will not be given for both HIST 4113 and HIST 6113. (Typically offered: Irregular)

HIST 6113. The Latin American City. 3 Hours. (Formerly HIST 4173.) This course examines the social, political, and cultural aspects of the modern Latin American city from an interdisciplinary perspective. The course includes an introduction to urban studies concepts, and each semester is organized around a specific set of case studies. Graduate degree credit will not be given for both HIST 4173 and HIST 6113. (Typically offered: Irregular)

HIST 6133. Society and Gender in Modern Europe. 3 Hours. (Formerly HIST 4103.) Examines the history and culture of the Byzantine Empire from the reign of Constantine I to the fall of Constantinople in 1453. Topics include the development of Christianity and the schism with the western church, the crusades, and Byzantine influence on Islam, Russia, the Ottomans, and the Renaissance. Graduate degree credit will not be given for both HIST 4103 and HIST 6133. (Typically offered: Fall Even Years)

HIST 6203. Byzantine Empire. 3 Hours. (Formerly HIST 4103.) Examines the history and culture of the Byzantine Empire from the late Bronze Age to the end of the Persian Wars. This class will focus particularly on the sources involved with reconstructing early Greek history, especially Herodotus and Homer, on the development of the Greek city-state or polis, and on the interaction between the Greeks and Near-eastern civilizations during this period, culminating in the wars between the Greeks and the Persian Empire. Graduate degree credit will not be given for both HIST 4113 and HIST 6113. (Typically offered: Irregular)

HIST 6223. France Since 1815. 3 Hours. (Formerly HIST 4223.) Survey of French history from the overthrow of Napoleon to the 5th Republic, with emphasis on French politics, society, and culture. Graduate degree credit will not be given for both HIST 4223 and HIST 6223. (Typically offered: Spring Even Years)

HIST 6233. Early Modern Europe, 1600-1800. 3 Hours. (Formerly HIST 4083.) Begins with the upheaval of the reformation, moves through the crisis of the 17th century and culminates with the democratic revolution of the 18th century. Examines the consolidation of the European state system, the propagation of modern science, discovery of overseas worlds, and the advent of the Industrial Revolution. Graduate degree credit will not be given for both HIST 4083 and HIST 6083. (Typically offered: Spring Odd Years)

HIST 6093. The History of African Americans and Social Justice. 3 Hours. (Formerly HIST 4093.) Explores how the United States has extended social justice to African Americans during the nation's history. Examines social justice for blacks and the impact of historic policies and practices on black life today. Graduate degree credit will not be given for both HIST 4093 and HIST 6093. (Typically offered: Irregular)
HIST 6293. Latin American Environmental History. 3 Hours.
Explores the challenges, debates, and ecologies of Latin America in order to understand the historical roots of current environmental crises. It engages a historiography on ecosystems found in the region. Uses environmental history texts and scholarly articles to build a layered and transnational approach. (Typically offered: Irregular)

HIST 6303. Transatlantic Relations, 1919-Present. 3 Hours.
(Formerly HIST 4303.) US-Western European Relations, from the Wilsonian era to the present, covering strategic, economic, and academic aspects. Graduate degree credit will not be given for both HIST 4303 and HIST 6303. (Typically offered: Irregular)

HIST 6333. Modern Islamic Thought. 3 Hours.
(Formerly HIST 4333.) Main currents in Islamic theology and political philosophy from the Ottoman Empire to the end of the twentieth century. Graduate degree credit will not be given for both HIST 4333 and HIST 6333. (Typically offered: Irregular)

HIST 6343. Golden Age Portugal and Spain. 3 Hours.
(Formerly HIST 4343.) This course will examine the diverging and converging paths of Portugal and Spain during the early modern period (15th-17th centuries). We will chart their rise as global imperial powers and their initial declines. We'll explore the political, social, and religious contexts in which Golden Age Iberia flourished. Graduate degree credit will not be given for both HIST 4343 and HIST 6343. (Typically offered: Irregular)

HIST 6463. The American Frontier. 3 Hours.
(Formerly HIST 4463.) American westward expansion and its influence on national institutions and character. Emphasis on the pioneer family and the frontier's role in shaping American society, culture, economy, and politics. Topics include exploration, the fur trade, the cattle kingdom and the mining, farming, and military frontiers. Graduate degree credit will not be given for both HIST 4463 and HIST 6463. (Typically offered: Fall Odd Years)

HIST 6473. Environmental History. 3 Hours.
(Formerly HIST 4473.) Examines the interactions between human culture and the natural environments: Concepts of nature in the West and elsewhere, dynamics of the Physical Environment, case studies in Regional Environmental History and the Politics of Environmental movements. Graduate degree credit will not be given for both HIST 4473 and HIST 6473. (Typically offered: Irregular)

HIST 6513. New Women in the Middle East. 3 Hours.
(Formerly HIST 4413.) This course covers the transformation of social and cultural roles of women in the Middle East since the 19th Century. Emphasizes political emancipation, religious reformation, artistic representation, and gendered re-definition. Graduate degree credit will not be given for both HIST 4413 and HIST 6513. (Typically offered: Irregular)

HIST 6523. Wars of Religion: From the Crusades to 9/11. 3 Hours.
(Formerly HIST 4323.) Examines the place of religion in combat across the centuries. A case study approach is used to explore different conflicts from the twelfth century crusades against Muslim forces to 9/11. Investigates how religious motivations may or may not be related to other political, social, cultural, economic concerns. Graduate degree credit will not be given for both HIST 4323 and HIST 6523. (Typically offered: Irregular)

HIST 6543. Late Antiquity and the Early Middle Ages. 3 Hours.
(Formerly HIST 4043.) This course examines the political, spiritual, intellectual, and social-economic developments of European history, c. 300-1000 CE. Special topics include the Christianization of the late Roman Empire and Byzantium, as well as the formation of Celtic and Germanic Kingdoms in the West. Graduate degree credit will not be given for both HIST 4043 and HIST 6543. (Typically offered: Fall Even Years)

HIST 6563. The Middle East since 1914. 3 Hours.
(Formerly HIST 4363.) Middle East since 1914 addresses European colonialism, the rise of new social elites, independence, revolution, globalization, economic self-determination, persistent regional conflicts and ongoing battles over "cultural authenticity". Graduate degree credit will not be given for both HIST 4363 and HIST 6563. (Typically offered: Irregular)

HIST 6623. Africa and the Trans-Atlantic Slave Trade. 3 Hours.
(Formerly HIST 4123.) Examines the trans-Atlantic slave trade with a primary focus on the role of Africa and Africans in creating the unique economy and culture of the trans-Atlantic world. Graduate degree credit will not be given for both HIST 4123 and HIST 6623. (Typically offered: Irregular)

HIST 6643. Frontiers and Borderlands in Colonial Latin America. 3 Hours.
(Formerly HIST 4443.) This course examines frontiers and borderlands in colonial Latin America and focuses on the regions of California, New Mexico, Texas, Brazil, and the Rio de la Plata. It demonstrates that frontiers and borderlands are defined by the absence of a hegemonic European power and associated with the prevalence of Indigenous norms. Graduate degree credit will not be given for both HIST 4443 and HIST 6643. (Typically offered: Irregular)

HIST 6703. Emergence of Modern America, 1876-1917. 3 Hours.
(Formerly HIST 4703.) A survey of the impact of the Industrial Revolution, Imperialism, and progressivism upon American life and institutions. Graduate degree credit will not be given for both HIST 4703 and HIST 6703. (Typically offered: Fall Odd Years)

HIST 6733. Recent America, 1941 to the Present. 3 Hours.
(Formerly HIST 4733.) A general survey of American history since World War II with emphasis upon the presidency, reform movements, the Cold War, and cultural developments. Graduate degree credit will not be given for both HIST 4733 and HIST 6733. (Typically offered: Irregular)

HIST 6743. The Cold War in Latin America: Revolutions, Violence, and Politics. 3 Hours.
(Formerly HIST 4743.) This course will trace the rise of the ideological and political struggles over social and economic development and the security regimes designed to thwart socialist revolution and political mobilization. The influence of the United States in Latin American security regimes and "containment" activities will receive special attention. Graduate degree credit will not be given for both HIST 4743 and HIST 6743. (Typically offered: Irregular)

HIST 6843. Global History of Soccer. 3 Hours.
Prompts students to explore the various historical processes related to the global diffusion of and engagement with soccer. Examines the ways soccer has reflected the broader, ongoing process of globalization, with players, ideas, tactics, and wealth circulating throughout the globe. (Typically offered: Irregular)

HIST 6993. History of the Ottoman Empire, 1300-1923. 3 Hours.
History of the Ottoman Empire from its emergence as frontier principality in Anatolia ca. 1300, through its heyday as a major imperial power on three continents in the fifteenth through the eighteenth centuries, ending with its encounter with western imperialism and nationalism in the nineteenth and early twentieth centuries. (Typically offered: Irregular)

HIST 700V. Doctoral Dissertation. 1-18 Hour.
Independent research and writing leading to the completion of a doctoral dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

HIST 7023. Historical Methods. 3 Hours.
(Formerly HIST 5023.) Practical introduction to historical research and writing. Consists of lecture, library reading, and class criticism of research papers. Prerequisite: Graduate standing. (Typically offered: Fall)
HIST 7043. Historiography. 3 Hours.
(Formerly HIST 5043.) Survey of the history of historical writing and a study of the important schools and historical interpretation. Prerequisite: Graduate standing. (Typically offered: Irregular)

HIST 7053. Reading Seminar in Asian History. 3 Hours.
(Formerly HIST 5053.) Concentrated reading in selected specialized areas of Asian history. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7103. Reading Seminar in American History. 3 Hours.
(Formerly HIST 5103.) Historiographical and bibliographical study of special areas of U.S. history, such as Antebellum America, the Civil War, etc. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7123. Research Seminar in American History. 3 Hours.
(Formerly HIST 5123.) Research projects in selected fields of American history, such as the Civil War, Antebellum America, etc. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7133. Reading Seminar in European History. 3 Hours.
(Formerly HIST 5133.) Historiographical and bibliographical study of special periods in European history, such as the Roman Empire, the late Middle Ages, the French Revolution, etc. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7143. Research Seminar in European History. 3 Hours.
(Formerly HIST 5143.) Research projects in selected fields of European history, such as the French Revolution, humanism, etc. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7153. Reading Seminar in British History. 3 Hours.
(Formerly HIST 5153.) Historiographical and bibliographical study of selected periods of British history. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7163. Research Seminar in British History. 3 Hours.
(Formerly HIST 5163.) Research projects in selected fields of British history. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7213. Reading Seminar in Middle Eastern History. 3 Hours.
(Formerly HIST 5213.) Historiographical and bibliographical study of special areas of Middle Eastern history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7233. Research Seminar in Middle Eastern History. 3 Hours.
(Formerly HIST 5233.) Research projects in selected fields of Middle Eastern history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7313. Reading Seminar in Latin American History. 3 Hours.
(Formerly HIST 5313.) Historiographical and bibliographical study of special areas in Latin American history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7323. Research Seminar in Latin American History. 3 Hours.
(Formerly HIST 5323.) A research seminar for the production of a major research project in Latin American history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7353. Reading Seminar in Medieval History. 3 Hours.
(Formerly HIST 5353.) Historiographical and bibliographical study of special areas in medieval history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7363. Research Seminar in Medieval History. 3 Hours.
(Formerly HIST 5363.) A research seminar for the production of a major research project in medieval history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7373. Reading Seminar in Ancient History. 3 Hours.
(Formerly HIST 5373.) Historiographical and bibliographical study of special areas in ancient history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7383. Research Seminar in Ancient History. 3 Hours.
(Formerly HIST 5383.) A research seminar for the production of a major research project in ancient history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7413. Reading Seminar in African History. 3 Hours.
(Formerly HIST 5413.) Historiographical and bibliographical study of selected periods and/or topics in African history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7423. Research Seminar in African History. 3 Hours.
(Formerly HIST 5423.) A seminar for the production of a major research project in selected fields of African history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7433. Reading Seminar in Caribbean History. 3 Hours.
(Formerly HIST 5433.) Historiographical and bibliographical study of special areas in Caribbean history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7443. Research Seminar in Caribbean History. 3 Hours.
(Formerly HIST 5443.) A research seminar for the production of a major research project in Caribbean history. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 30 hours of degree credit.

HIST 7453. Reading Seminar in Global History. 3 Hours.
Graduate seminar adopting global perspectives on Europe, US, Asia, Africa, Latin America. Decentering narratives focusing on regional approaches, the course examines the global implications of various historical developments. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Horticulture (HORT)

Courses

HORT 5001. Seminar. 1 Hour.
Review of scientific literature and oral reports on current research in horticulture. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

HORT 501V. Special Topics in Horticulture, Turf or Landscape. 1-6 Hour.
(Formerly HORT 401V.) Topics related to horticulture, turfgrass or landscape science or management not covered in other courses or a more intensive study of a specific topic. Graduate degree credit will not be given for both HORT 401V and HORT 501V. (Typically offered: Irregular) May be repeated for degree credit.

HORT 502V. Horticulture Judging and Competition Activity. 1-6 Hour.
(Formerly HORT 402V.) Training for and participation on horticultural identification, judging and competitive teams. Graduate degree credit will not be given for both HORT 402V and HORT 502V. Prerequisite: HORT 2003. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HORT 503V. Special Problems Research. 1-6 Hour.
Original investigations on assigned problems in horticulture. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HORT 5043. Advanced Plant Breeding. 3 Hours.
Application of genetic principles to the improvement of crop plants. Presentation of conventional plant breeding methods and special techniques such as polyploidy, interspecific hybridization and induced mutation. Lecture 3 hours per week. Prerequisite: BIOL 2323 and BIOL 2321L or (ANSC 3123 and CSES 4103). (Typically offered: Spring Odd Years)
HORT 5103. Plant Growth and Development. 3 Hours.
This course will focus on environmental and developmental processes of plant growth and development. A student completing this course should have an understanding of the developmental processes of plant growth and how environmental factors interact to affect and control plant growth and development. (Typically offered: Fall)

HORT 5113. Fruit Production Science and Technology. 3 Hours.
(Formerly HORT 4103.) The management technologies and cultural practices of fruit crops including (but not limited to) blueberries, blackberries, raspberries, strawberries, grapes, peaches, and apples will be presented. The underlying scientific principles of crop genetics, nutrition, and physiology will be presented as a basis for making management decisions in fruit crop productions. Graduate degree credit will not be given for both HORT 4103 and HORT 5113. Corequisite: Lab component. Prerequisite: HORT 2003. (Typically offered: Spring Odd Years)

HORT 5143. Professional Landscape Management. 3 Hours.
Principles and practices of landscape management and maintenance. Topics include low maintenance and seasonal color design, pruning and hazard tree management, water and fertilizer management, pesticide use, and other maintenance activities. Basic elements of marketing, specifications and contracts, estimating, personnel management, and equipment selection and acquisition relevant for landscape services will be introduced. Preparatory training in agribusiness or business is suggested. Prerequisite: HORT 2003 and HORT 3103. (Typically offered: Fall Odd Years)

HORT 5203. Temperature Stress Physiology. 3 Hours.
This course will teach students how to apply biological, chemical and physical principles to models of how plants are damaged by temperature extremes and how they change to increase resistance. Student will apply these principles to better understand plant responses to other environmental challenges, including both biotic and abiotic stresses. (Typically offered: Spring)

HORT 530V. Special Problems. 1-6 Hour.
(Formerly HORT 400V.) Original investigations on assigned problems in horticulture. Graduate degree credit will not be given for both HORT 400V and HORT 530V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HORT 5333. Professional Landscape Installation and Construction. 3 Hours.
(Formerly HORT 4033.) Principles and practices involved in landscape installation and construction. Topics covered include sequencing construction activities, protecting existing trees, landscape soils, selecting plants, planting and transplanting plant materials, wood construction, cement and masonry construction, and low-voltage lighting. Lecture 3 hours per week. Preparatory training in agribusiness or business is suggested. Graduate degree credit will not be given for both HORT 4033 and HORT 5333. Prerequisite: HORT 2003. (Typically offered: Fall Even Years)

HORT 5403. Plant Propagation. 3 Hours.
(Formerly HORT 4403.) Principles of plant propagation using seeds, cuttings, grafting, budding, layering, and tissue culture. The physiological basis of propagation is described. Knowledge of plant growth and physiology is needed. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both HORT 4403 and HORT 5403. Corequisite: Lab component. Prerequisite: BIOL 1613 and BIOL 1611L. (Typically offered: Spring)

HORT 5413. Horticulture Physiology. 3 Hours.
(Formerly HORT 4413.) This course provides students with a background into the physiological processes of plants with an emphasis on horticultural crops and how the processes relate to horticultural crop production practices. Among the topics covered are photosynthesis, respiration, water relations and morphogenesis. Graduate degree credit will not be given for both HORT 4413 and HORT 5413. Prerequisite: HORT 2003 and CHEM 1073. (Typically offered: Spring)

HORT 5503. Sustainable Nursery Production. 3 Hours.
(Formerly HORT 4503.) This course addresses issues and practices involved in production of quality woody nursery crops (e.g. trees and shrubs produced in open field and containerized systems). Graduate degree credit will not be given for both HORT 4503 and HORT 5503. (Typically offered: Spring Even Years)

HORT 5701L. Greenhouse Management and Controlled Environment Horticulture Laboratory. 1 Hour.
(Formerly HORT 4701L.) Laboratory involving hands-on experiments designed to demonstrate principles discussed in the lecture section. Includes field trips. Graduate degree credit will not be given for both HORT 4701L and HORT 5701L. Corequisite: HORT 5703. (Typically offered: Fall Odd Years)

HORT 5703. Greenhouse Management and Controlled Environment Horticulture. 3 Hours.
(Formerly HORT 4703.) Operation and management of greenhouses and other controlled environments used in horticultural production. Emphasis on system design and construction, control of light intensity and photoperiod, heating and cooling systems, substrates, mineral nutrition, water quality and irrigation systems. Graduate degree credit will not be given for both HORT 4703 and HORT 5703. Prerequisite: HORT 2003 and CHEM 1073. (Typically offered: Fall)

HORT 5801L. Greenhouse Crops Production Laboratory. 1 Hour.
(Formerly HORT 4801L.) Laboratory involving hands-on experiments designed to demonstrate principles discussed in the lecture section. Includes field trips. Graduate degree credit will not be given for both HORT 4801L and HORT 5801L. Corequisite: HORT 5803. (Typically offered: Spring Even Years)

HORT 5803. Greenhouse Crops Production. 3 Hours.
(Formerly HORT 4803.) Principles and practices of production and marketing of crops commonly grown in controlled environments including flowering containerized herbaceous species, geophytes, annual and perennial bedding plants, hydroponic vegetables and herbs. Graduate degree credit will not be given for both HORT 4803 and HORT 5803. Prerequisite: HORT 4703 or HORT 5703 (formerly HORT 4703). (Typically offered: Spring Even Years)

HORT 5903. Golf and Sports Turf Management. 3 Hours.
(Formerly HORT 4903.) Turf management techniques for golf courses, and athletic fields including species selection, root-zone construction and modification, fertilization, mowing, irrigation and pest control. Graduate degree credit will not be given for both HORT 4903 and HORT 5903. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L and (HORT 2303 or HORT 3403). (Typically offered: Fall Odd Years)

HORT 5913. Rootzone Management for Golf and Sports Turf. 3 Hours.
(Formerly HORT 4913.) An overview of the fundamental concepts of the physical and chemical properties of rootzones as related to construction and turfgrass management. Graduate degree credit will not be given for both HORT 4913 and HORT 5913. Prerequisite: HORT 2303. (Typically offered: Spring Odd Years)

HORT 5921. Golf Course Operations. 1 Hour.
(Formerly HORT 4921.) This course is designed to cover specific aspects of golf course operations that would not be included in traditional turfgrass management courses. Topics will include budgeting, personnel management, tournament setup and operation, dealing with golf club committees, communication, and other relevant topics related to managing a golf course maintenance operation. Graduate degree credit will not be given for both HORT 4921 and HORT 5921. Prerequisite: HORT 4903 or HORT 5903 (formerly HORT 4903). (Typically offered: Fall Even Years)
HESC 5932. Turf Best Management Practices. 2 Hours.
(Formerly HORT 4932.) The course covers the impacts of turfgrass management practices on turf quality and the environment. In addition, the identification, biology, and control practices for the major insects, diseases, and weeds that infest turf will be covered. Emphasis will be placed on management strategies that include both chemical and non-chemical approaches to the prevention and control of common turfgrass pests. Graduate degree credit will not be given for both HORT 4932 and HORT 5932. Prerequisite: HORT 2303 and 6 hours selected from CSES 2003, PLPA 3004, and ENTO 3013. (Typically offered: Spring Odd Years)

HESC 5993. Global Horticulture and Human Nutrition to Enhance Community Resilience and Food Security. 3 Hours.
This course covers three broad areas (Global Horticulture, Sustainable International Development, Human Health and Nutrition) and experts on three campuses created the instruction. The course is intended to be multi-disciplinary, and students should use their contextual knowledge to add to weekly discussions. Prerequisite: Graduate standing. (Typically offered: Spring)
This course is cross-listed with AGED 5993, FDSC 5993.

HESC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

HESC 602V. Special Topics in Horticulture. 1-3 Hour.
Discussion and advanced studies on selected topics in genetics, plant breeding, physiology and culture of horticultural crops. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

HESC 6033. Molecular Plant Breeding. 3 Hours.
In-depth study of genetic improvement and techniques. Covers both current and classical literature. Topics to be discussed: haploidy, genetic control of pairing, somatic instability, tissue culture and protoplast fusion, and male sterility. Lecture discussion 3 hours per week. Prerequisite: BIOL 2323 and BIOL 2321L (or ANSC 3123 and CSES 4103 or equivalent). (Typically offered: Fall)

Human Environmental Sciences (HESC)

HESC 500V. Special Problems. 1-6 Hour.
(Formerly HESC 400V.) Special problems. Graduate degree credit will not be given for both HESC 400V and HESC 500V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HESC 502V. Special Problems Research. 1-6 Hour.
Individual study or research for graduates in the field of human environmental sciences. (Typically offered: Fall, Spring and Summer)

HESC 5111. Introduction to Graduate Program. 1 Hour.
Overview of graduate program in the School of Human Environmental Sciences. 1 hour. Topics include master's program requirements; graduate student responsibilities; timetable for academic year; forms and deadlines; scheduling and time management; library searches; fundamentals of writing literature reviews; quantitative, qualitative, and mixed research methods; secondary data analyses; and tips for research presentations. Prerequisite: Departmental Consent. (Typically offered: Fall)

HESC 5211. Professional Development. 1 Hour.
Discussion of current literature and research. 1 hour. Topics include diverse research topics and methods in Human Environmental Sciences, professional development, and career opportunities in academia and industry. Prerequisite: HESC 5111 or Departmental Consent. (Typically offered: Fall)

HESC 5233. Childhood Obesity: Context and Preventions. 3 Hours.
A multidisciplinary course that focuses on the context and prevention of childhood obesity. Directed readings and discussion will center on an ecological approach: identifying the problem(s) and behavioral and environmental factors and their interactions, as well as predisposing, enabling, and reinforcing factors, and action plan(s). The issue is addressed from a multidisciplinary perspective, including economics, marketing, child development, nutrition, and health behavior. (Typically offered: Summer)

HESC 5463. Research Methodology in Social Sciences. 3 Hours.
Logical structure and the method of science. Basic elements of research design; observation, measurement, analytic method, interpretation, verification, presentation of results. Applications to research in the economic and sociological problems of agriculture and Human Environmental Sciences. Prerequisite: Graduate standing. (Typically offered: Fall)
This course is cross-listed with AGED 5463.

HESC 555V. Special Topics in Human Environmental Sciences. 1-3 Hour.
Topics not covered in other courses or a more intensive study of specific topics in the specializations of human environmental sciences. (Typically offered: Irregular)

HESC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

HESC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Human Resource and Workforce Development Education (HRWD) Courses

HRWD 5113. Foundations of Human Resource & Workforce Development. 3 Hours.
An overview of human resource and workforce development (HRWD) in organizations. Focus on the integration of training and development, career development, and organization development. Topics include strategic planning for human resource and workforce development, needs assessment, program development, application of workplace learning theories, career development theories and methods, and application of organization learning theories. (Typically offered: Fall, Spring and Summer)

HRWD 5123. Career Transitions. 3 Hours.
This advanced level course is intended for career development professionals and/or subject-matter experts interested in improving their career development skills within a structured or unstructured learning environment. The emphasis in this course is on gaining career development techniques and planning formal and informal career development strategies for the individual or the organization. (Typically offered: Spring)

HRWD 5133. HRWD Diversity Issues. 3 Hours.
This course emphasis is on current trends and case studies of diversity in the workplace. Prerequisite: Graduate standing. (Typically offered: Fall)

HRWD 5213. Organizational Analysis. 3 Hours.
This course introduces the analysis process in organizations. The instruction and activities will enable students to develop skills in conducting organizational needs analysis (OA) as a basis for performance improvement in the workplace. (Typically offered: Spring and Summer)
HRWD 5223. Strategic Human Resource and Workforce Development Education. 3 Hours.
A comprehensive examination of the issues, topics, principles, theories, philosophies and concepts facing tomorrow's HRD professionals. Includes the transformation of strategic HRD; the role of strategic HRD leaders as change agents; the principles of strategic HRD; professional practice domains of strategic HRD; organizational learning, performance, and change; and analysis, design, and evaluation of HPI interventions. Students will identify practices for informing decisions related to the formation of strategic HRD planning and implementation efforts. (Typically offered: Spring Even Years)

HRWD 5233. HRWD Employment, Legal, and Ethical Issues. 3 Hours.
This course focuses on employment, legal and ethical issues within the workplace. Students will gain knowledge that should enable them to be effective in understanding current employment concerns, equal employment opportunity (EEO) laws, and ethical practices within the workplace and how these employment concerns, laws, and practices impact society. (Typically offered: Spring)

HRWD 5313. Facilitating Learning in the Workplace. 3 Hours.
Facilitation of learning and performance improvement in the workplace. Application of instructional methods, formal and informal learning strategies, coaching, team building, and formal and informal on-the-job learning tactics. Focus on facilitating individual and group learning to affect organizational change. (Typically offered: Spring)

HRWD 5332. International HRWD. 3 Hours.
Exploration of how globalization and culture affect the workplace and the human resource development profession. Difference between global HRD and HRD practiced in a single country. Impact of culture on every aspect of HRD implementation and practice. Examination of HRD practices in different regions of the world. (Typically offered: Fall)

HRWD 5333. HRWD Technological Resources. 3 Hours.
This course provides students with the tools and abilities to evaluate and understand technology resources used in HRWD. Primary course elements are instructional design characteristics of technology, theoretical and practical uses of technology resources to facilitate and manage learning, and selecting the best or most appropriate technological resources. The course uses online technologies and learning experiences. (Typically offered: Fall)

HRWD 5433. HRWD Capstone. 3 Hours.
This course is the final course for the degree in Human Resource and Workforce Development. Students will be assessed on their overall knowledge and understanding of the field. The focus of this course will be research and analysis of classic works and current trends. Pre- or Corequisite: 27 MED credit hours completed. (Typically offered: Fall, Spring and Summer)

HRWD 571V. Independent Study. 1-3 Hour.
Independent study. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

HRWD 572V. Workshop. 1-3 Hour.
Workshop. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

HRWD 573V. Experiential Learning. 1-18 Hour.
This course is designed for the student to attain paid or unpaid experiential development. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

HRWD 6313. Project and Program Evaluation. 3 Hours.
This course is a doctoral level course designed as an introduction to project and program evaluation in human resource and workforce development. Emphasis is on (a) project design and development, (b) program development and improvement, and (c) the integration of evaluation with strategic planning and performance improvement. (Typically offered: Spring Even Years)

HRWD 6323. Qualitative Research Design and Analysis. 3 Hours.
This course is designed to introduce HRWD students to qualitative research design, data collection and data analysis. Course content includes data collection through interviews, field observation, records research, ethical issues associated with conducting research in organizational settings, and internal and external validity problems. Prerequisite: ESRM 5013 and ESRM 6403. (Typically offered: Spring Even Years)

HRWD 6333. Quantitative Research Design and Analysis. 3 Hours.
This course provides HRWD students with the tools and abilities to design and implement an original research project using quantitative measures. Primary course elements are research design application, theoretical settings of research, and nesting research within an appropriate literature base. The course uses online technologies and on-campus learning experiences. Prerequisite: ESRM 5013 and ESRM 6403. (Typically offered: Fall Even Years)

HRWD 6434. Principles and Techniques of Research in HRWD. 3 Hours.
This course addresses the principles and techniques underlying organizational research, both experimental and non-experimental. It covers the basic philosophy of science and research methods and gives attention to the practical problems of design, data collection sampling, and data analysis. Prerequisite: ESRM 5013 and ESRM 6403. (Typically offered: Fall Even Years)

HRWD 6413. Career Theory and Decision Making. 3 Hours.
This course focuses on comprehensive understanding of career theory and decision making to enhance career development that emphasizes technology, cross-cultural issues, practical application, and the global economy. Career development in both the private and public sectors will be explored. Students will gain knowledge that should enable them to be effective in developing their careers and those of others using multicultural considerations and a global perspective. (Typically offered: Fall)

HRWD 6423. Practicum. 3 Hours.
PRACTicum is designed to allow doctoral students in workforce development education an opportunity to apply the theoretical knowledge, skills and abilities to training, teaching, or research projects. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HRWD 6513. Organization Development. 3 Hours.
This course teaches development of organization activities that intervene in the interaction of people systems to increase the effectiveness of using a variety of applied behavioral sciences. It includes the dynamics of organizations, the genesis of organizational theory and evolution of organizational dynamics, including examination of system structure, chaos theory, group dynamics and interaction, leadership theories, diversity issues impacting organizations, and techniques of change agent intervention. (Typically offered: Summer Odd Years)

HRWD 6523. Leadership Models and Concepts. 3 Hours.
This doctoral course concentrates on using commonly accepted principles of leadership to develop skills needed in workforce development education settings. (Typically offered: Fall Odd Years)

HRWD 6533. HRWD Ethical and Legal Issues. 3 Hours.
Focuses on ethical and legal issues within the workplace and behavioral science research. Students gain knowledge that should enable them to be effective in understanding ethical and legal issues within their workplace and how they can impact society. (Typically offered: Fall)

HRWD 6613. Learning and Teaching Theories. 3 Hours.
Models and philosophies of important theorists in the field of teaching and learning. (Typically offered: Spring Odd Years)
HRWD 6833. Technology Systems in Human Resource and Workforce Development. 3 Hours.
This course provides students with the tools and abilities to evaluate and understand technology systems in HRWD. Primary course elements are instructional design characteristics of technology systems, theoretical and practical settings that use technology systems to facilitate and manage learning, and selecting the best or most appropriate system for organizational use. The course uses online technologies and learning experiences. (Typically offered: Fall Odd Years)

HRWD 6643. History and Foundations of HRWD. 3 Hours.
This course focuses on the history of human resource development as a practice and a profession. Particular emphasis in this course is placed on the influence of philosophy on developing HRD theory and practice. As students progress through this course they can expect to gain greater understanding of how HRD developed as a profession, the historical root of its theory and practice, and an understanding of how to evaluate the philosophical assumptions of current HRD theory and practice. (Typically offered: Fall Odd Years)

HRWD 6713. HRWD Curriculum Design. 3 Hours.
Determining principles of curriculum development, implementation, and evaluation with emphasis in human resource development education. (Typically offered: Summer)

HRWD 6723. Entrepreneurial Development. 3 Hours.
An advanced graduate-level course examining the history, economics, theory and practice of developing Entrepreneurial enterprises. This course presents an overview of the business and organizational systems with which an entrepreneur should be familiar. (Typically offered: Irregular)

HRWD 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Industrial Engineering (INEG) Courses

INEG 5123. Industrial Engineering in the Service Sector. 3 Hours.
Review of the development of industrial engineering into the service sector, e.g., health care systems, banking, municipal services, utilities, and postal service. Emphasizes those principles and methodologies applicable to the solutions of problems within the service industries. Prerequisite: Graduate standing. (Typically offered: Irregular)
This course is cross-listed with OMGT 5133.

INEG 513V. Master’s Research Project and Report. 1-6 Hour.
Required course for students electing the report option. (Typically offered: Fall, Spring and Summer)

INEG 514V. Special Topics in Industrial Engineering. 1-3 Hour.
Consideration of current industrial engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

INEG 515V. Individual Study in Industrial Engineering. 1-3 Hour.
Opportunity for individual study of advanced subjects related to a graduate industrial engineering program to suit individual requirements. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

INEG 5163. Introduction to Modern Statistical Techniques for Industrial Applications. 3 Hours.
This application-oriented course is driven by real problems arising from industry and focuses on problem solving using both modern and classic statistical methods. For both senior undergraduate and graduate students, the main goal of this course is to provide a comprehensive introduction to those most popular statistical learning methods and tools (such as R and Apache Spark) which are widely used in industry today. For graduate students, this course will also cover the fundamental theory behind some of the methodologies. Students will not receive credit for both INEG 4103 and INEG 5103. Prerequisite: INEG 2333. (Typically offered: Spring)

INEG 5243. Automated Manufacturing. 3 Hours.
Introduction to manufacturing processes and concurrent engineering in the electronics industry. Survey of electronics components and products and the processes of fabrication and assembly. Principles of design, productivity, quality, and economics. Emphasis on manufacturability. (Typically offered: Irregular)

INEG 5253. Leadership Principles and Practices. 3 Hours.
The course is designed to expose students to multiple approaches to leadership in a wide variety of settings. Leadership styles, the knowledge areas and competencies expected of today’s leaders, the challenges leaders face, the historical and philosophical foundations of leadership, the relationships among leadership theory, leadership practice, and the moral-ethical aspects of leadership are among the topics covered in the course. A number of respected regional, national, and international leaders share “lessons learned” in their leadership journeys. Plus, a number of highly regarded leadership books and case studies on leadership are read and discussed. Students may not receive credit for INEG 4253 and INEG 5253/OMGT 5253. (Typically offered: Fall)
This course is cross-listed with OMGT 5253.

INEG 5263. Engineering Statistics. 3 Hours.
A graduate level engineering statistics course covering functions of random variables, properties and distributions of random samples, theory of statistical inference, and rationales of testing hypotheses and constructing confidence intervals. Prerequisite: MATH 2574 and INEG 2313. (Typically offered: Fall)

INEG 5313. Engineering Applications of Probability Theory. 3 Hours.
Introduction to probability, discrete random variables, continuous random variables, multiple random variables, sequences of Bernoulli trials. Applications of these topics from inventory, reliability, quality control. (Typically offered: Fall)

INEG 5323. Engineering Applications of Stochastic Processes. 3 Hours.
Renewal processes, Poisson processes, discrete-time Markov chains, continuous-time Markov chains. Applications of these topics from inventory, reliability, quality control, queuing. (Typically offered: Spring)

INEG 5333. Design of Industrial Experiments. 3 Hours.
Statistical analysis as applied to problems and experiments in engineering and industrial research; experiment design and analysis; probability; and response surface analysis. Prerequisite: INEG 2313 or equivalent. (Typically offered: Irregular)

INEG 5343. Advanced Quality Control Methods. 3 Hours.
Acceptance sampling by attributes; single, double, sequential, and multiple sampling plans; sampling plans; sampling plans of Department of Defense; acceptance sampling by variables; Bayesian acceptance sampling; rectifying inspection for lot-by-lot sampling; control charts; special devices; and procedures. Prerequisite: INEG 2313. (Typically offered: Irregular)

INEG 5373. Repairable Systems Modeling. 3 Hours.
Applications of probability, statistics, simulation and optimization to problems related to 1) modeling the performance of repairable equipment; 2) designing optimal inspection and maintenance policies for repairable equipment; and 3) optimizing the allocation of maintenance resources. (Typically offered: Irregular)
INEG 5383. Risk Analysis for Transportation and Logistics Systems. 3 Hours. Fundamentals of modeling risk, analyzing risk, and managing risk in a variety of industrial and government decision-making settings. Risk measurement and model building, uncertainty quantification, and multi-objective trade-offs. Credit cannot be earned for both INEG 4383 and INEG 5383. (Typically offered: Irregular)

INEG 5393. Applied Regression Analysis for Engineers. 3 Hours. Present concepts and applications to introduce statistical tools for discovering relationships among variables. Focus on fitting and checking linear and nonlinear regression models. Practical tools for engineers. (Typically offered: Irregular)

INEG 5423. Advanced Engineering Economy. 3 Hours. (Formerly INEG 4423.) Preparation of feasibility studies, including cost estimation, risk and uncertainty, sensitivity analysis and decision making. Effects of taxes, depreciation and financing costs on cash flows. Graduate degree credit will not be given for both INEG 4423 and INEG 5423. Prerequisite: INEG 2313 and INEG 2413. (Typically offered: Irregular)

INEG 5433. Cost Estimation Models. 3 Hours. Overview of cost estimation techniques and methodologies applied to manufacturing and service organizations. Accomplished through detailed analysis of the cost estimation development process and various cost estimation models. Topics include data collection and management, learning curves, activity based costing, detailed and parametric estimation models, and handing risk and uncertainty. Prerequisite: INEG 2313. (Typically offered: Irregular)

This course is cross-listed with OMGT 5433.

INEG 5443. Decision Models. 3 Hours. Focus on quantitative decision models for technical and managerial problems for private and public organizations. Topics include shareholder value, stakeholder value, Value-Focused Thinking, axioms of decision analysis, decision making challenges, decision traps, cognitive biases, decision processes, decision framing, influence diagrams, value hierarchy structuring, designing creative alternatives, singe objective models, multiobjective additive value model, swing weights, sensitivity analysis, portfolio decision models with binary linear programming, probability elicitation, Bayes Law, decision trees, Monte Carlo simulation, expected value, dominance (deterministic and stochastic), tornado diagrams, value of information, risk preference, utility models, expected utility, and communicating analysis insights. Prerequisite: INEG 2313. (Typically offered: Irregular)

This course is cross-listed with OMGT 5443.

INEG 5453. Systems Engineering and Management. 3 Hours. (Formerly INEG 4433.) Overview of the fundamental concepts underlying the management of engineering. Reviews the engineering decision process within the life cycle. Examines implementation of basic management functions in technical organizations and development of strategy tools within a complex organization. Graduate degree credit will not be given for both INEG 4433 and INEG 5453. Prerequisite: INEG 2403. (Typically offered: Fall)

INEG 5463. Project Management. 3 Hours. (Formerly INEG 4443.) Analysis of the strategic level of project management including planning, organizing, and staffing for successful project execution. Professional creativity, motivation, leadership, and ethics are also explored. At the tactical level, project selection, control, and systems management are analyzed. Systems development and decision support tools for project management are studied. Graduate degree credit will not be given for both INEG 4443 and INEG 5463. (Typically offered: Irregular)

INEG 5523. Topics in Automated Systems. 3 Hours. To understand current developments in applications of flexible automation to industrial processes. Robotics, machine vision and other sensors, human machine interface, AML/2 and V+ programming languages. (Typically offered: Irregular)

INEG 5533. Network Optimization in Transportation Logistics. 3 Hours. Focus on quantitative modeling and analysis of network optimization problems and their application in logistics system design and operation. Topics include network design and routing and location analysis, with emphasis on the application of both exact and heuristic solution techniques for large-scale instances of such problems. Prerequisite: INEG 5613. (Typically offered: Spring)

INEG 5543. Distribution Center Design & Operations. 3 Hours. To introduce the student to the field of facility logistics, as applied to distribution centers (DCs). The fundamental areas of facility design and operations (material handling systems) will be covered. Prerequisite: INEG 5613. (Typically offered: Irregular)

INEG 5563. Industrial Robotics. 3 Hours. An interdisciplinary treatment of industrial robotics; manipulator anatomy, control, and programming; end-of arm tooling; sensors & sensing; system integration and safety; current research topics. Graduate-level lab assignments and examinations. Significant literature review and writing assignments. Not open to students with credit for INEG 4563. Prerequisite: Graduate standing or instructor consent. (Typically offered: Fall)

INEG 5613. Introduction to Optimization Theory. 3 Hours. A graduate level introduction to the foundational rationales of numerical optimization methods including linear programming, integer programming, network flows, and discrete dynamic programming. Model formulation and tractability, search strategies, characterization of optimal solutions, duality and sensitivity, outcome justification. Prerequisite: Graduate standing. (Typically offered: Fall)

INEG 5623. Analysis of Inventory Systems. 3 Hours. Elements of production and inventory control, economic lot size models, price breaks models using Lagrangian method, deterministic dynamic inventory model, probabilistic one-period and multi-period models, zero and positive lead time models, and continuous review models. Prerequisite: INEG 5313. (Typically offered: Irregular)

INEG 5643. Optimization Theory II. 3 Hours. Classical optimization theory, Lagrangian and Jacobian methods, Kuhn-Tucker theory and constraint qualification, duality in nonlinear problems; separable programming, quadratic programming, geometric programming, stochastic programming, steepest ascent method, convex combinations method, SUMT, Fibonacci search, and golden section method. Prerequisite: INEG 5613. (Typically offered: Irregular)

INEG 5653. Modeling and Analysis of Semiconductor Manufacturing. 3 Hours. Introduction to front end of semiconductor manufacturing process, wafer processing. Topics include an introduction to wafer processing, factory and equipment capacity modeling, automated material handling, simulation, cost modeling, and production scheduling. Prerequisite: INEG 2313. (Typically offered: Irregular)

INEG 5663. Analysis of Queuing Systems. 3 Hours. Poisson axioms, pure birth and death model, queue disciplines (M/M/1) and (M/M/c) models, machine servicing model, Pollazek-Khintchine formula, priority queues, and queues in series. Markovian analysis of (GI/M/K) (M/G/1) models, and bulk queues. Reneging, balking, and jockeying phenomena. Transient behavior. Prerequisite: INEG 5313. (Typically offered: Irregular)

INEG 5683. Nonlinear Programming. 3 Hours. An introduction to the theory and methodology of nonlinear programming. Focus on engineering and management science applications of nonlinear optimization. Both single and multi-variable as well as unconstrained and constrained problems are addressed. (Typically offered: Irregular)

INEG 5693. Heuristic Optimization. 3 Hours. Theory and applications of methodological approaches explicitly addressed to heuristic or approximate optimization of integer and combinatorial models. Prerequisite: INEG 5613. (Typically offered: Irregular)
INEG 5803. Simulation. 3 Hours.
The development and use of discrete-event simulation models for the analysis and design of systems found in manufacturing, distribution, and service contexts. Coverage includes conceptual modeling, model translation to computer form, statistical input models, random number generation and Monte Carlo methods, experimentation and statistical output analysis, and queuing analysis. Includes the use of modern computer simulation languages. Cannot receive credit for both INEG 3623 and INEG 5803. Corequisite: Drill component. (Typically offered: Irregular)

INEG 5813. Introduction to Simulation. 3 Hours.
Development and use of discrete-event simulation models for the analysis and design of systems found in manufacturing, distribution, and service contexts. Coverage includes conceptual modeling, model translation to computer form, statistical input models, random number generation and Monte Carlo methods, experimentation and statistical output analysis, and queuing analysis. For off-campus, distance education students only. (Typically offered: Irregular)

INEG 5823. Systems Simulation I. 3 Hours.
Random number generation, random variate generation, timekeeping in simulations, discrete event modeling, construction of digital simulation models, statistical analysis of simulation results, and analysis of simulation experiments utilizing a computer programming language. (Typically offered: Irregular)

INEG 5833. Introduction to Database Concepts for Industrial Engineers. 3 Hours.
(Formerly INEG 4833.) An introduction to the basic principles of database modeling and technologies for industrial engineers. Coverage includes analyzing user requirements, representing data using conceptual modeling techniques (e.g., UML, ERD), converting conceptual models to relational implementations via database design methodologies, extracting data via structured query language processing, and understanding the role of database technology in industrial engineering application areas such as inventory systems, manufacturing control, etc. The application of a desktop database application such as Access will be emphasized. Graduate degree credit will not be given for both INEG 4833 and INEG 5833. (Typically offered: Irregular)

INEG 5843. Scheduling and Sequencing I. 3 Hours.
An introduction to constructive algorithms and various operations research approaches for solving sequencing and scheduling problems. The NP-completeness of most scheduling problems leads to a discussion of computational complexity, the use of heuristic solution methods, and the development of worst case bounds. Prerequisite: INEG 3613 and computer programming proficiency. (Typically offered: Irregular)

INEG 600V. Master’s Thesis. 1-9 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

INEG 6113. Linear Optimization. 3 Hours.
A precise treatment of linear programming. Theory of convex sets, linear inequalities; development of the simplex method; duality theory; post optimality application and interpretation. Variants of the simplex methods and interior-point algorithms are discussed. Prerequisite: INEG 5613. (Typically offered: Fall)

INEG 614V. Special Topics for Doctoral Students in Industrial Engineering. 1-3 Hour.
Consideration of current industrial engineering topics at the doctoral level that are not covered in other courses. Prerequisite: PhD student in Industrial Engineering or consent of the instructor. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

INEG 6213. Integer Programming. 3 Hours.
This course offers the theory needed to model and efficiently solve large-scale binary, mixed and general integer programs. The tools needed to assess the computational complexity of these problems will be fully studied. Additional topics include the conceptual foundation required for the development of cutting plane, branch-and-price, Lagrange relaxation and constraint programming approaches. Implementation considerations specific to preprocessing, valid inequality generation and solution methodology convergence will be emphasized. Prerequisite: INEG 6113. (Typically offered: Spring)

INEG 6213. Network Optimization. 3 Hours.
A theorem-proof based advanced study providing rigorous exposition of foundational network optimization concepts including relevant optimization theory, algorithm development techniques, complexity analysis, data structures, and important applications. Prerequisite: INEG 6113. (Typically offered: Fall)

INEG 6363. Generalized Linear Models. 3 Hours.
Introduce the generalized linear model (GLM), inference, likelihood and diagnostics. Apply log linear and logistic models. Develop techniques for growth curves, and longitudinal and survival data. Cover spatial and normal linear models, and dynamic GLM for dependent data. (Typically offered: Irregular)

INEG 6443. Advanced Decision Analysis. 3 Hours.
The purpose of this course is to prepare the student to perform PhD and MS level research and analysis using advanced decision analysis concepts and techniques. The course topics include the history of decision analysis, foundations of decision analysis, structuring decision problems, assessing probabilities, probability management, Bayesian networks, utility, risk preference, risk analysis for engineering applications, intelligent adversary risk analysis, behavioral and organizational context for decision analysis, and major decision analysis applications. Prerequisite: INEG 5443. (Typically offered: Spring)

INEG 6823. Systems Simulation II. 3 Hours.
Advanced topics in computer simulation including experimental design, simulation optimization, variance reduction, and statistical output analysis techniques applied to discrete event simulation. Prerequisite: INEG 5823. (Typically offered: Irregular)

INEG 6843. Scheduling Theory and Algorithms. 3 Hours.
The course will cover the theory and solution methods for scheduling several tasks over time. Topics include terminology, measures of performance, single machine sequencing, flow shop scheduling, the job shop problem, and priority dispatching. Side constraints within scheduling, such as precedence, release dates, and due dates are addressed. Integer programming, dynamic programming, and heuristic approaches to various problems are also presented. Prerequisite: INEG 5613 or equivalent, computer programming proficiency, and exposure to proofs. (Typically offered: Irregular)

INEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Information Systems (ISYS) Courses
ISYS 5103. Data Analytics Fundamentals. 3 Hours.
Fundamental knowledge and skills in several major areas of business data analytics. Emphasis on the management and use of data in modern organizations, intermediate & advanced spreadsheet topics; relational databases & SQL; and programming (such as Python). Prerequisite: MIS Director approval. (Typically offered: Fall)
ISYS 511V. IT Toolkit & Skills Seminar. 1-3 Hour.
Seminar in Information Systems solutions and concepts (such as applications development, VB.NET, analysis of problems and design of solutions via application systems, etc.) designed for students entering the MIS program—may not be used for MIS degree credit. Prerequisite: MIS Director approval. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ISYS 5133. Blockchain and E Business Development. 3 Hours.
This course explores various blockchain and e-business development technologies and then utilizes these technologies for developing a realistic application. Students will also learn strategies and use a varied web stack to build web pages that interact with blockchain platforms. Pre- or corequisite: ISYS 5173. (Typically offered: Fall)

ISYS 516V. Independent Study. 1-3 Hour.
(Formerly ISYS 450V.) Permits students on individual basis to explore selected topics in data processing and/or Quantitative Analysis. Graduate degree credit will not be given for both ISYS 450V and ISYS 516V. (Typically offered: Fall and Spring)

ISYS 5173. Blockchain Fundamentals. 3 Hours.
This course provides the fundamental concepts underpinning blockchain technologies. The focus is on blockchain applications for business. Students will learn about the overall blockchain landscape, including investments, the size of markets, major players and the global reach, as well as the potential business value of blockchain applications and the challenges that must be overcome to achieve that value. Students will learn enough about the underlying technologies to speak intelligently to technology experts and will be well-prepared to develop blockchain applications in future courses. Prerequisite: Graduate standing and departmental consent. (Typically offered: Fall and Spring)

ISYS 5203. Experimental Design. 3 Hours.
ANOVA, experimental design, introduction to basis of statistics. Prerequisite: Graduate standing and WCOB 1033 or equivalent. (Typically offered: Fall)

ISYS 5213. ERP Fundamentals. 3 Hours.
An introduction to enterprise resource planning systems. Students should gain an understanding of the scope of these integrated systems that reach across organizational boundaries and can change how a company does business. Implementation issues are covered, including the importance of change management. Prerequisite: Graduate standing. (Typically offered: Fall and Summer)

ISYS 5223. ERP Configuration and Implementation. 3 Hours.
The process of configuring and implementing an enterprise resource planning system. Business process analysis and integration. Students will develop a company and set up several modules in SAP for use. Develop understanding of how the business processes work and integrate. Prerequisite: ISYS 5213 or equivalent. (Typically offered: Fall and Spring)

ISYS 5233. Seminar in ERP Development. 3 Hours.
ERP administration and system development practices. Advanced system support issues related to Enterprise Resource Planning systems that are used in global organizations. Basic ABAP programming. In addition, students will learn how to provide basic systems administration support of the operating system, database, and application systems software levels of ERP systems. Pre- or Corequisite: ISYS 5223. Prerequisite: ISYS 5213. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

ISYS 5243. Current Topics in Computer Information. 3 Hours.
(Formerly ISYS 4243.) Intensive investigation of selected developments in computer information systems hardware, software, and organization having current impact on computer information systems design and application. Offering an extension of lower-level CIS courses through individual student research and faculty team-teaching of advanced topics. Topical selection made with each course offering. Graduate degree credit will not be given for both ISYS 4243 and ISYS 5243. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ISYS 535V. Internship Experience. 1-6 Hour.
This course allows a student to experience an internship within a business and benefit from the work experience. The internship focuses on applications and business problems and is supervised by a faculty member as well as a member of the company/firm. Prerequisite: MIS Director approval is required. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ISYS 5363. Business Analytics. 3 Hours.
This course in managerial business analytics provides future managers with the key concepts of decision modeling and information technology management concepts. Students will learn to utilize real time operational business data, as well as quickly process and effectively leverage information. In addition, students will exercise strategic IT deployment skills for supply chain and marketing processes as well as develop strong decision modeling abilities. (Typically offered: Spring)

ISYS 5373. Application Development with Java. 3 Hours.
(Formerly ISYS 4373.) This course covers object-oriented programming concepts and illustrates them via an appropriate object-oriented programming language. Students will be exposed to the design of software objects, creation of software objects, and the use of objects in constructing an information system. Graduate degree credit will not be given for both ISYS 4373 and ISYS 5373. Prerequisite: ISYS 3293 with a grade of C or better. (Typically offered: Fall)

ISYS 5403. Quantitative Methods and Decision Making. 3 Hours.
Utilization of information, quantitative techniques, and computer application in decision making and problem solving for managers. (Typically offered: Irregular) This course is cross-listed with SCMT 5133.

ISYS 5423. Seminar in Systems Development. 3 Hours.
Advanced study of structured systems development. Emphasis on strategies and techniques of structured analysis and structured design for producing logical systems specifications and for deriving physical systems designs. Coverage of methodologies for dealing with complexity in the development of information systems. Prerequisite: ISYS 511V. (Typically offered: Fall)

ISYS 5433. Enterprise Systems. 3 Hours.
Enterprise Systems comprises the entire class of information technology and systems that support the mission of the company including decision support and business processes. This managerial enterprise systems course focuses on strategic issues of information technology. Students study the various elements and integration of an organization's business processes; as a result, students gain an understanding and working knowledge of systems used to support these business processes and their use in decision making. In addition, students will study concepts and develop skills needed to utilize decision-centric business intelligence and knowledge management applications. (Typically offered: Spring)

ISYS 5453. Blockchain and Enterprise Data. 3 Hours.
The focus of this course is to expose students to working with distributed and service oriented architectures for different applications as well as the IT infrastructure needed. The course provides the opportunity for students to gain valuable insight into blockchain as a distributed system and cloud architecture platforms with the goal of developing enterprise applications. Prerequisite: ISYS 5133. (Typically offered: Spring)

ISYS 5463. Enterprise Transaction Systems. 3 Hours.
Being able to accurately capture and store business transactions is an important processing function in many businesses. For many large companies with high volume processing, the tools of choice for transaction processing are applied. This course provides students with the necessary understanding and skills to develop advanced applications in mainframe environment. Pre- or Corequisite: ISYS 5453 or equivalent or MIS Director approval. (Typically offered: Irregular)
ISYS 5503. Decision Support and Analytics. 3 Hours.
Analysis of the highest level of information support for the manager-user. A study of systems providing analytics-based information derived from databases within and/or external to the organization and used to support management in the decision making. Application of tools in business analytics, problem solving, and decision making. Prerequisite: MIS Director approval. (Typically offered: Fall)

ISYS 5603. Analytics and Visualization. 3 Hours.
This course focuses on how to discern and tell your story visually using data based on traditional graphical data representation as well as the latest data and information technologies. Coverage includes both visualization theory and hands-on exercises using appropriate computing tools. The course will also include visualization of predictive, clustering, and association models. The opportunities and challenges of Big Data visualization will be explored. Prerequisite: (ISYS 5503) or (ISYS 5133 and departmental consent). (Typically offered: Fall)

ISYS 5613. Business Applications of Nonparametric Techniques. 3 Hours.
Consideration of business and economic research related to sampling and experimental design, testing of hypothesis, and using nonparametric tests. Prerequisite: ISYS 5203 or equivalent. (Typically offered: Spring)

ISYS 5623. Multivariate Analysis. 3 Hours.
Principal component analysis, regression analyses. Prerequisite: ISYS 5203. (Typically offered: Spring)

ISYS 5713. Seminar in IS Topics. 3 Hours.
Intensive seminar in selected information systems topics. Topical selection made with each course offering. Prerequisite: ISYS 511V or MIS Director approval. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ISYS 5723. Advanced Multivariate Analysis. 3 Hours.
Factor analysis and other advanced techniques. Prerequisite: ISYS 5623. (Typically offered: Irregular)

ISYS 5833. Data Management Systems. 3 Hours.
Investigation and application of advanced database concepts include database administration, database technology, and selection and acquisition of database management systems. Data modeling and system development in a database environment. Prerequisite: ISYS 5103. (Typically offered: Spring)

ISYS 5843. Seminar in Business Intelligence and Knowledge Management. 3 Hours.
Business intelligence focuses on assessing and creating information and knowledge from internal and external sources to support business decision making process. In this seminar, data mining and information retrieval techniques will be used to extract useful knowledge from data, which could be used for business intelligence, and knowledge management. Pre- or Corequisite: ISYS 5833 or equivalent. Prerequisite: ISYS 5503 or equivalent. (Typically offered: Spring)

ISYS 5933. Global Technology and Analytics Seminar. 3 Hours.
This course is designed to provide an updated, comprehensive, and rigorous treatment of emerging global topics. Includes, but is not limited to, global study experiences, business insights, and foundational perspectives; examines significant issues from global perspectives. Prerequisite: Graduate standing and MIS Director approval. (Typically offered: Summer)

ISYS 5943. Management of Information Technology Seminar. 3 Hours.
Presented in a way that allows you to play an active role in the design, use, and management of information technology. Using IT to transform the organization, as competitive strategy, and creating new relationship with other firms is included. Pre- or Corequisite: ISYS 5833. Prerequisite: ISYS 5423. (Typically offered: Spring)

ISYS 599V. Practicum Seminar. 3-6 Hour.
This course is designed to introduce and engage the student in the practice, application, and problem solving in the business environment. Hands-on application of a business problem. Students will gain experience working on, making decisions about, and developing solutions for business applications. Topics include but not limited to analytics, data, and information technology. Prerequisite: Graduate standing and MIS Director approval. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ISYS 601V. Graduate Colloquium. 1-6 Hour.
Presentation and critique of research papers and proposals. (Typically offered: Fall and Spring)

ISYS 6133. Survey of IS Research. 3 Hours.
This is an introductory seminar in information systems research for doctoral students. Its objective is to introduce participants to major streams of IS research and discuss many of the important roles and responsibilities of an IS researcher. Also, this course will play the important role of introducing participants to the research of the current IS faculty. (Typically offered: Fall)

ISYS 6233. IS Research Projects. 3 Hours.
The students will understand the ideas underlying a scientific contribution; understand the practical challenges in designing and executing a study; Design and execute a study; Write an empirical journal article. (Typically offered: Irregular)

ISYS 6333. Individual-level Research in IS. 3 Hours.
This course aims to expose students to individual-level research in IS. It provides a window into major streams of individual-level research in IS and reference disciplines. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

ISYS 635V. Special Problems. 1-6 Hour.
Independent reading and research under supervision of senior staff member. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ISYS 6423. Structural Equation Modeling. 3 Hours.
Structural equation modeling using current tools, such as AMOS. (Typically offered: Irregular) This course is cross-listed with SCMT 6423.

ISYS 6433. Team-level Research in IS. 3 Hours.
This course aims to expose students to team-level research in IS. It provides a window into major streams of team-level research in IS and reference disciplines. (Typically offered: Irregular)

ISYS 6533. Macro- and Meso-level IS Research. 3 Hours.
This course aims to expose students to research at the macro- and meso-levels. For example, it could provide a window into major streams of organizational-level research in IS and reference disciplines. Topics could also include: change management, ERP research models, implementation, applications, and successes/failures, and ERP simulation models. Other topics that fall within the purview of the course are: large-scale technology and process innovations in organizations—e.g., software development process innovations and RFID will be examined at various levels (e.g., organizational). (Typically offered: Irregular)

ISYS 6633. Systems Development. 3 Hours.
The course provides an in-depth study of systems development as an area of research, understanding of the theoretical and conceptual foundations, insight into the current state of the research area, utilizes both IS and reference discipline literature as appropriate, guidance for conducting research projects and producing publishable research, an opportunity to work on cutting-edge research. (Typically offered: Irregular)

ISYS 6733. Emerging Topics. 3 Hours.
Various emerging topics, such as RFID applications and RFID supply chain, ethical decision models, behavioral modeling, privacy and privacy issues, and virtual worlds. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit.
ISYS 6833. Theory Development. 3 Hours.
To acquire theory development and writing skills, to understand challenges in developing and writing theory sections of papers, and to discuss approaches to writing good empirical journal articles. This course is suited for all social sciences students and is particularly appropriate for students conducting behavioral research in the business disciplines. (Typically offered: Irregular)

ISYS 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Japanese (JAPN) Courses
JAPN 5313. Language and Society of Japan. 3 Hours.
(Formerly JAPN 4313.) The primary objective of this course is to investigate the way the Japanese language reflects the beliefs and customs of the Japanese people as a social group. For comparison purposes, this course makes reference to studies in American language and culture. Proficiency in Japanese not required. Graduate degree credit will not be given for both JAPN 4313 and JAPN 5313. (Typically offered: Fall)

JAPN 5333. Professional Japanese I: Business Writing. 3 Hours.
(Formerly JAPN 4333.) This course aims to familiarize the students with formats, vocabulary, and expressions in Japanese business correspondence. Emphasizes career-ready Japanese language proficiency. Graduate degree credit will not be given for both JAPN 4333 and JAPN 5333. Prerequisite: JAPN 3116 or equivalent Japanese proficiency. (Typically offered: Spring)

Journalism (JOUR) Courses
JOUR 5003. Advanced Reporting. 3 Hours.
Stresses public affairs coverage, interpretive, investigative, and analytic journalism, involving research, work with documents, public records, and budgets and specialized reporting. (Typically offered: Irregular)

JOUR 5013. Advanced Radio News Reporting. 3 Hours.
(Formerly JOUR 4033.) Intensive training in the production of in-depth, public radio style news stories. Graduate degree credit will not be given for both JOUR 4033 and JOUR 5013. Prerequisite: JOUR 2032 and JOUR 2031L, each with a grade of C or better. (Typically offered: Spring)

JOUR 5023. Journalism Theory. 3 Hours.
Examination of the major journalism and mass media theories and conceptual perspectives regarding journalism, news, mass media, advertising and public relations relevant to industry and academic researchers and professionals. (Typically offered: Fall)

JOUR 5033. Critical and Opinion Writing and Commentary. 3 Hours.
Experience in writing and analyzing columns, editorials, criticism, and other forms of opinion and commentary in the media and in examining the media’s role as a forum for opinion and commentary and its impact and influence. (Typically offered: Irregular)

JOUR 5043. Research Methods in Journalism. 3 Hours.
Research methods of utility in journalism. Emphasis on survey research, electronic data base searching, and traditional library research. Prerequisite: Graduate standing or honors program standing. (Typically offered: Spring)

JOUR 5063. Issues in Advertising and Public Relations. 3 Hours.
Seminar course involving the critical examination of the major cultural, social, political, economic, ethical, and persuasion theories and/or issues relevant to advertising and public relations affecting individuals, organizations, societies. Prerequisite: Graduate standing. (Typically offered: Fall)

JOUR 5073. Propaganda and Public Opinion. 3 Hours.
Examines and analyzes the means of influencing and measuring public opinion, with an emphasis on survey research and polling. (Typically offered: Irregular)

JOUR 508V. Graduate Journalism Internship. 1-3 Hour.
Credit for practical experience gained through a journalistic internship. Must have completed 6 hours of graduate course credit. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

JOUR 5093. Business Journalism. 3 Hours.
Examines how the U.S. economy works and how to find news in business, market and government data sources. Focuses on the role of corporations, financial markets, and regulators, and benefiting students interested in sports, entertainment, political and investigative journalism. (Typically offered: Spring)

JOUR 5133. Ethics in Journalism. 3 Hours.
A seminar examining the professional ethical principles and ethical performance in the journalism field. The ethical performance of the mass media dedicated to news, public relations and advertising is evaluated based on ethical theories and industry standards. Prerequisite: Graduate standing. (Typically offered: Fall)

JOUR 5163. Computer-Assisted Publishing. 3 Hours.
(Formerly JOUR 4063.) In-depth, hands-on exploration of computer hardware and software in the design and production of media messages. Examination of developing media technologies and the computer’s influence on design and conceptualization. Graduate degree credit will not be given for both JOUR 4063 and JOUR 5163. (Typically offered: Irregular)

JOUR 5173. Social Media and Journalism. 3 Hours.
(Formerly JOUR 4073.) Social Media and Journalism teaches conceptual knowledge and skills to develop news judgment and use changing technological tools to disseminate news quickly and to different audiences. The value of interacting with sources and the audience is stressed as are ethical, legal and accuracy issues. Graduate degree credit will not be given for both JOUR 4073 and JOUR 5173. Prerequisite: JOUR 2013 or JOUR 2032 with a grade of C or better. (Typically offered: Fall)

JOUR 5183. International Mass Communications. 3 Hours.
Examination of national media systems, issues in international communications, the role of the media in coverage of international affairs, and the impact of new technologies on mass communications. (Typically offered: Irregular)

JOUR 5193. Professional Journalism Seminar. 3 Hours.
Examination of complex problems encountered by professional journalists with focus on research and analysis of the role of journalism in major social, economic, and political developments. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

JOUR 5233. Media and Public Policy. 3 Hours.
Focuses on the interaction between media, politics, government, and public policy, particularly on the impact and influence of the media on the public policy agenda. (Typically offered: Irregular)

JOUR 5283. Data Journalism. 3 Hours.
Provides an in-depth experience of combining street reporting and data analysis to tell a story of significant societal importance. Students are introduced to techniques in data analysis, management, visualization and production of data-driven articles and multimedia presentations. Prerequisite: Instructor permission. (Typically offered: Fall)

JOUR 5313. Literature of Journalism. 3 Hours.
A study of superior works of non-fiction journalism, past and present. Includes authors from Daniel Defoe to John McPhee. (Typically offered: Irregular)
JOUR 5323. Documentary Production I. 3 Hours.
In-depth study of documentary film as non-fiction, long form journalism. Covers subject, funding, research and development, pre-production planning, field production, talent, music, post production, promotion, broadcast and distribution. Required trip to Hot Springs Documentary Film Festival. (Typically offered: Fall)

JOUR 5333. Documentary Production II. 3 Hours.
A continuation of JOUR 5323. Documentary Production I. Students photograph, write, and edit a documentary begun in the fall semester. Prerequisite: JOUR 5323. (Typically offered: Spring)

JOUR 5463. Campaigns. 3 Hours.
(Formerly JOUR 4463.) Applying advertising principles and techniques to preparation of a complete campaign; determining agency responsibilities, marketing objectives and research, media mix, and creative strategy. Emphasis also given to campaign presentation delivery, utilizing audio and visual techniques. Graduate degree credit will not be given for both JOUR 4463 and JOUR 5463. Prerequisite: JOUR 3723 and JOUR 3743, each with a grade of B or better, and 2.5 overall GPA. (Typically offered: Fall, Spring and Summer)

JOUR 5473. Account Planning. 3 Hours.
An introduction to applied advertising research and account planning. Integrate consumers’ perspectives into creative strategy to developing brand stories for clients. Write creative briefs, positioning statements and prepare copy-testing research instruments to evaluate messages. Utilize consumer research for creating messages for diverse cultures. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

JOUR 5503. Magazine Writing. 3 Hours.
(Formerly JOUR 4503.) This intensive writing and reporting course is for students with proven feature-writing skills and an interest in the human-interest stories found in such leading magazines as The New Yorker, Esquire, Harper’s, the Atlantic, and others. Students will compose magazine-length nonfiction stories on timely subjects under deadline. Stories are submitted for contests and publication, when possible. Graduate degree credit will not be given for both JOUR 4503 and JOUR 5503. Prerequisite: JOUR 2013 with a grade of C or better. (Typically offered: Spring)

JOUR 5883. Advanced Television News Production. 3 Hours.
(Formerly JOUR 4883.) Continuation of JOUR 4873. Students prepare and present television newscasts for air. Laboratory component arranged. Graduate degree credit will not be given for both JOUR 4883 and JOUR 5883. Corequisite: Lab component. Prerequisite: JOUR 4873 with a grade of C or better. (Typically offered: Spring)

LATN 5003. Roman History. 3 Hours.
(Formerly LATN 4003.) Selections from Sallust, Livy, Tacitus, or Suetonius. An overview of Roman Historiography through the critical study of complete works in translation and secondary works. Graduate degree credit will not be given for both LATN 4003 and LATN 5003. Prerequisite: LATN 3013 or equivalent. (Typically offered: Fall and Spring)

LATN 5013. Roman Satire. 3 Hours.
(Formerly LATN 4013.) Selections from the satires of Horace, Juvenal, Persius, or Seneca. An overview of Roman humor and the genre of satire through the critical study of complete works in translation and secondary works. Graduate degree credit will not be given for both LATN 4013 and LATN 5013. Prerequisite: LATN 3013 or equivalent. (Typically offered: Fall)

LATN 5023. Roman Didactic Epic. 3 Hours.
(Formerly LATN 4023.) Selections from Virgil’s Georgics, Lucretius’ De Rerum Natura, or Manilius’ Astronomica. An overview of Roman philosophical poetry through the critical study of complete works in translation and secondary works. Graduate degree credit will not be given for both LATN 4023 and LATN 5023. Prerequisite: LATN 3013 or equivalent. (Typically offered: Fall)
LATN 5033. Roman Drama. 3 Hours.
(Formerly LATN 5033.) Selections from Plautus, Terence, or Seneca. An overview of Roman theater through the critical study of complete works in translation and secondary works. Graduate degree credit will not be given for both LATN 4033 and LATN 5033. Prerequisite: LATN 3013 or equivalent. (Typically offered: Irregular)

LATN 5043. Roman Elegy. 3 Hours.
(Formerly LATN 4043.) Selections from Propertius, Tibullus, or Ovid. An overview of the genre through the critical study of complete works in translation and secondary works. Graduate degree credit will not be given for both LATN 4043 and LATN 5043. Prerequisite: LATN 3013 or equivalent. (Typically offered: Irregular)

LATN 5063. Roman Pastoral and Lyric. 3 Hours.
(Formerly LATN 4063.) Selections from Catullus, Virgil's Eclogues, Horace's Odes, or Calpurnius Siculus. An overview of the two genres through the critical study of complete works in translation and secondary works. Graduate degree credit will not be given for both LATN 4063 and LATN 5063. Prerequisite: LATN 3013 or equivalent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

LATN 5073. Roman Novel. 3 Hours.
(Formerly LATN 4073.) Selections from Petronius or Apuleius. An overview of the genre through the critical study of complete works in translation and secondary works. Graduate degree credit will not be given for both LATN 4073 and LATN 5073. (Typically offered: Irregular)

LATN 5083. Roman Oratory. 3 Hours.
(Formerly LATN 4083.) Selections from the orations and theoretical works of Cicero, Seneca the Elder, or Quintilian. An overview of the genre through the critical study of complete works in translation and secondary works. Graduate degree credit will not be given for both LATN 4083 or LATN 5083. Prerequisite: LATN 3013 or equivalent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

LATN 5093. Roman Philosophy. 3 Hours.
(Formerly LATN 4093.) Selections from the philosophical works of Cicero or Seneca. An overview of Roman philosophy through the critical study of complete works in translation and secondary works. Graduate degree credit will not be given for both LATN 4093 and LATN 5093. Prerequisite: LATN 3013 or equivalent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

LATN 5633. Medieval Latin. 3 Hours.
Selections from medieval writers from the 4th to the 17th century. Prerequisite: LATN 3003 or equivalent. (Typically offered: Irregular)

LATN 575V. Special Investigations. 1-6 Hour.
Special investigations. (Typically offered: Irregular) May be repeated for degree credit.

Management (MGMT) Courses

MGMT 5213. Business Foundations for Entrepreneurs. 3 Hours.
Introduction to the fundamental business concepts an entrepreneur needs to know to evaluate and launch a successful new venture. Topic areas include recruitment, selection, motivation and management of employees, market analysis and the marketing mix, financial strategies and accounting for funds, economic considerations, and the management of operations. Prerequisite: Graduate standing. (Typically offered: Spring)

MGMT 5223. Business Leadership and Ethics. 3 Hours.
Management for a global environment. The class will cover interpersonal workplace skills such as leadership and motivation, along with the management of human capital through well designed recruitment, selection, performance evaluation, compensation, and quality control systems. (Typically offered: Fall) May be repeated for degree credit.

MGMT 5313. Strategic Management. 3 Hours.
Strategy formulation, strategy implementation, and other topics related to the long-term success of the firm. Includes role of the general manager, international issues, and the impact of management fads on decision making. (Typically offered: Summer)

MGMT 5323. New Venture Development. 3 Hours.
Focuses on the identification and analysis of new venture opportunities and how entrepreneurs acquire the human and financial resources needed to develop successful businesses. Topics include market analysis, development of products and services, negotiation, developing and executing business plans, and new venture financing. Students are required to complete summer assignments before the course begins in the fall semester. Prerequisite: MGMT 5213 or an undergraduate degree in business or permission of the instructor. (Typically offered: Fall)

MGMT 5363. Innovation & Creativity. 3 Hours.
This class will provide a framework for developing, assessing and implementing innovations in start-ups and established businesses. Focus is on creative decision making, managing for innovation, strategic analysis of innovations, and implementation of innovations. Aimed at entrepreneurs, brand managers, and managers in industries where innovation is a key strategic capability. (Typically offered: Spring)

MGMT 537V. Global Business. 1-3 Hour.
Integrated overview of the global business environment and the organizational challenges of a multinational firm. To enhance understanding of the business and cultural environment of prominent emerging markets, the course includes a 2-3 week overseas immersion project to fulfill a predefined goal. Project is integrated with global content upon return. (Typically offered: Summer)
This course is cross-listed with ECON 537V.

MGMT 5391. Business History and Practice. 1 Hour.
This course provides students with an overview of how businesses evolve over the years, and how they are run today. Using examples from research and practitioner articles, it allows students to learn about hands on concepts such as business models, Integrative Performance, Organization Structure, Competitive Advantage, Value Networks, and Business Obligations in an experiential manner. (Typically offered: Fall and Spring)

MGMT 5413. New Venture Development II. 3 Hours.
A large-scale, real world, 10 week project involving hands-on work addressing issues faced by managers in partnering firms. Corequisite: Instructor consent. Prerequisite: MGMT 5223. (Typically offered: Spring)

MGMT 5602. Introduction to Strategy. 2 Hours.
An introduction to the value chain concept, the underlying framework of the Managerial MBA program. Topics include the primary value chain activities of inbound logistics, operations, outbound logistics, marketing and sales, and service, as well as the support activities of procurement, technology development, human resource management and firm infrastructure. (Typically offered: Fall)

MGMT 5613. Leadership and Organizational Behavior. 3 Hours.
Managing in a global workforce, including human resource issues, motivation, performance evaluation, quality concepts, transformational leadership, and selection/recruitment/development of employees. (Typically offered: Summer)

MGMT 5993. Entrepreneurship Practicum. 3 Hours.
Hands-on management of an actual on-going business. Students will gain experience working in, making decisions about, and managing a competitive business. Students will be required to analyze the business in a term paper or other integrative assignment. Entrance by application only. (Typically offered: Fall, Spring and Summer)

MGMT 6011. Graduate Colloquium. 1 Hour.
Presentation and critique of research papers and proposals. (Typically offered: Fall and Spring) May be repeated for degree credit.
MGMT 6113. Seminar in Organizational Behavior. 3 Hours.
Survey of theoretical and empirical literature in organizational behavior. Stresses topics relating to motivation, individual differences, job attitudes, social influence processes, and group dynamics. Prerequisite: Admission to a Ph.D. program. (Typically offered: Irregular)

MGMT 6123. Seminar in Organization Theory. 3 Hours.
This Ph.D.-level seminar presents an overview and introduction into organization theory literature. Emphasis on the development of relevant schools of thought, changes in the content of the traditional or ‘mainstream’ themes, current topics, schools of thought, and future directions are examined. Prerequisite: Admission to a Ph.D. program. (Typically offered: Irregular)

MGMT 6133. Seminar in Strategy Research. 3 Hours.
This Ph.D.-level seminar presents an overview and introduction into the strategy management literature. Emphasis on both the content and process of the extant research. Relevant theory, methods, ‘mainstream’ themes, current topics, schools of thought, and future directions are examined. Prerequisite: Admission to a Ph.D. program. (Typically offered: Irregular)

MGMT 6213. Seminar in Research Methods. 3 Hours.
Familiarizes students with the principles and techniques underlying research in management and organizations. Issues of basic philosophy of science and research methods are covered. Special attention given to the practical problems of research design, measurement, data collection, sampling, and interpretation in conducting research in management and in organizations. Prerequisite: Admission to a Ph.D. program. (Typically offered: Irregular)

MGMT 6223. Seminar in Management Topics. 3 Hours.
Seminar in special research topics in management. Topics vary depending upon instructor. Prerequisite: Admission to a Ph.D. program. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

MGMT 6233. Seminar in Human Resource Management. 3 Hours.
Provides an overview of major issues in human resource management. Designed to familiarize students with the seminal research in human resource management, and to provide them with the conceptual and methodological tools necessary to do research in the area. Prerequisite: Admission to a Ph.D. program. (Typically offered: Irregular)

MGMT 636V. Special Problems in Management. 1-12 Hour.
Individual reading and research. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

MGMT 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

Marketing (MKTG) Courses

MKTG 5103. Introduction to Marketing. 3 Hours.
Introduction to marketing concepts and practices as applied to the retail consumer environment. Focuses on the strategic development, positioning, and management of products, promotion, distribution, pricing, and store environments in building customer relationships from retailer and supplier perspectives. (Core) (Typically offered: Fall and Spring) May be repeated for degree credit.

MKTG 5223. Marketing. 3 Hours.
Product management, market research, marketing communications, retailing and distribution, consumer behavior, and social and ethical implications of marketing. (Typically offered: Fall)

MKTG 5333. Retailing Strategy and Processes. 3 Hours.
Strategic planning and operation of retailing organizations. Investigation of the various types of retailing with emphasis on both the strategic and functional aspects in retail processes. (Typically offered: Spring)

MKTG 5433. Consumer and Market Research. 3 Hours.
Modern marketing research methods and analyses applied to consumers, shoppers, and buyers of goods and services sold in competitive retail environments. Attention is given to both quantitative and qualitative methods, analyses, interpretation, and decision making. Prerequisite: MKTG 5103. (Typically offered: Fall)

MKTG 5523. Marketing Analytics. 3 Hours.
This course is intended to teach students how to use data analytics to improve marketing decision making at every stage of the Strategic Marketing Process. The focus will be on the skills and tools needed to obtain, process, and analyze data to formulate and answer critical marketing questions and make managerial recommendations. This is a hands-on course that employs real-world databases, lectures, cases, and exercises. Prerequisite: MKTG 5103. (Typically offered: Spring)

MKTG 5533. Strategic Category Management. 3 Hours.
Strategic planning and management of brands and product categories from both manufacturing and retailing perspectives. Focus is on the product brand development, pricing, distribution, and promotion of brands and their strategic and functional roles in the product mix. (Typically offered: Summer)

MKTG 5543. Category Analysis and Management. 3 Hours.
Analysis and management of brands and product categories from supplier and retailing strategic perspectives. Focus is on brand and category strategic and functional roles in the merchandising mix as well as their development, pricing, distribution, promotion, and in-store placement. (Typically offered: Irregular) May be repeated for degree credit.

MKTG 5553. New Product Development and Strategy. 3 Hours.
Behavioral and social science concepts applied to retail shoppers, buyers, and consumers of products and services. Attention is given to research on the cognitive, affective, and experiential aspects involved in the acquisition, consumption, and disposal of products and services by individuals and households. Prerequisite: MKTG 5103. (Typically offered: Fall and Spring)

MKTG 5563. Retail Strategy. 3 Hours.
The purpose of this course is to investigate the changing landscape of the retail industry. It should be noted that “retail” is an incredibly broad topic covering everything from consumer insights to supply chain to sales management. Retail is currently experiencing somewhat of a revolution as companies experiment with new technology, innovative ways to make shopping more enjoyable, or ways of engaging the customer in a way they are not likely to forget. This course will be based on identification and discussion of new trends that emerge in the retail environment. Prerequisite: MKTG 5223. (Typically offered: Spring)

MKTG 636V. Special Problems in Marketing. 1-6 Hour.
Individual research problems. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

MKTG 6413. Special Topics in Marketing. 3 Hours.
Seminar in special topics in marketing. Topics vary depending upon the instructor. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

MKTG 6433. Seminar in Research Methods. 3 Hours.
Extensive review of literature illustrative of marketing research studies. Focuses upon theoretical foundations of research design, methodology, and analysis as well as interpretation of univariate, bivariate, and multivariate data in marketing theory exploration. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.
MKTG 6443. Seminar in Marketing Theory. 3 Hours.
Comprehensive survey and critical review of the history of marketing thought and contemporary schools of thought in marketing discipline. In-depth research, review, synthesis, and a research proposal will be required in a selected topic from the perspectives of advancing marketing theory. (Typically offered: Irregular)

MKTG 6453. Seminar in Transportation and Business Logistics. 3 Hours.
Underlying theories and problems related to the development of logistical systems in the U.S. Attention focused on transport economics, the role of government in providing transportation facilities, and managerial issues related to integrating transportation, inventory control, warehousing, customer service levels, and facility location. (Typically offered: Irregular)

MKTG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

Master of Business Administration (MBAD) Courses

MBAD 5241. Ethical Decision Making. 1 Hour.
Business Ethics will address business ethics issues from a personal, professional, and organizational perspective. We will cover basic ethical decision-making frameworks to help inform students' personal moral frameworks, ethical issues that are most relevant to managers of modern organizations, and the role of business in society. (Typically offered: Fall)

MBAD 535V. MBA Internship. 1-3 Hour.
This course allows a student to experience an internship within a business and benefit from the applied experience. The internship may be designed to offer a wide range of business experiences. The internship must be supervised by a faculty member as well as a member of the firm. MBA Director approval required. (Typically offered: Summer) May be repeated for up to 3 hours of degree credit.

MBAD 536V. Study Abroad-Special Problems. 1-3 Hour.
Provides MBA students with the opportunity to explore a business problem in depth under the guidance of a graduate faculty member. MBA Director approval required. (Typically offered: Summer) May be repeated for degree credit.

MBAD 5433. Capstone Project. 3 Hours.
A large-scale project integrating various business topics. Prerequisite: MGMT 5313. (Typically offered: Summer)

MBAD 5511. Professional Development -- Special Topics In Business. 1 Hour.
A concentrated emphasis on one business topic. Corequisite: MBAD 5212, MBAD 5122 and MBAD 5232. (Typically offered: Fall and Spring) May be repeated for up to 5 hours of degree credit.

MBAD 5773. China Business Law, Regulations, and Ethics. 3 Hours.
Business law in China that is relevant to managers; Chinese regulations particularly relevant to consumer products and retail; business ethics in China. (Typically offered: Irregular)

MBAD 591V. Capstone Project Definition. 1-3 Hour.
Identification of business processes for capstone project, including: estimation of the size of the opportunity, identification of key decisions, and proposal write up. (Typically offered: Irregular)

MBAD 592V. Capstone Project Plan. 1-3 Hour.
Second estimation of the size of the project benefit, identification of how the current process operates, assumptions identified, literature investigated, performance metrics, and Gantt chart for project. (Typically offered: Irregular)

MBAD 593V. Capstone Project Management. 1-3 Hour.
Management of the project, including frequent updates, milestone accomplishment, strategies to overcome challenges, and creation of an implementation plan. (Typically offered: Irregular)

MBAD 594V. Capstone Project Final Deliverables. 1-3 Hour.
Write up of entire capstone project, presentation of project, estimates of value, implementation plan, performance metrics, and change management plan. (Typically offered: Irregular)

Mathematics (MATH) Courses

MATH 5013. Abstract Algebra with Connections to School Mathematics. 3 Hours.
Basic structures of abstract algebra (rings, fields, groups, modules and vector spaces) with emphasis on rings and fields as generalizations of the ring of integers and field of rational numbers. Degree credit will not be awarded for both MATH 4113 (or MATH 5123) plus MATH 5001 and for MATH 5013. Prerequisite: Graduate standing or departmental consent. (Typically offered: Irregular)

MATH 5023. Geometry with Connections to School Mathematics. 3 Hours.
School geometry from an advanced perspective including conformity to the Common Core State Standards for Mathematics. Study will include historical developments and geometry based on transformations of two- and three-dimensional space. Prerequisite: Graduate standing. (Typically offered: Fall Odd Years)

MATH 5033. Advanced Calculus with Connections to School Mathematics Teaching. 3 Hours.
Rigorous development of the real numbers, continuity, differentiation, and integration. Degree credit will not be awarded for both MATH 4513 (or MATH 5503) plus MATH 5001 and for MATH 5033. Prerequisite: Departmental consent. (Typically offered: Irregular)

MATH 504V. Special Topics for Teachers. 1-6 Hour.
Current topics in mathematics of interest to secondary school teachers. Prerequisite: Graduate standing or departmental consent. (Typically offered: Irregular) May be repeated for degree credit.

MATH 5053. Probability & Statistics with Connections to School Mathematics. 3 Hours.
An advanced perspective of probability and statistics as contained in the high school mathematics curriculum with connections to other components of school mathematics. The content is guided by the content of the high school probability and statistics of the Common Core State Standards for Mathematics. Prerequisite: Graduate Standing. (Typically offered: Spring)

MATH 507V. Mathematical Seminar. 1-3 Hour.
Validated participation in professional development mathematics workshops or institutes sanctioned by national or international educational organizations such as the College Board, International Baccalaureate Program, and the National Board for Professional Teaching Standards. Prerequisite: Enrollment in Secondary Mathematics Teaching. MA degree program or departmental consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

MATH 510V. Mathematical Seminar. 1-3 Hour.
Members of the faculty and advanced students meet for presentation and discussion of topics. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.
MATH 5113. Introduction to Abstract Algebra II. 3 Hours.  
(Formerly MATH 4113.) Topics in abstract algebra including finite abelian groups, linear groups, factorization in commutative rings and Galois theory. Graduate degree credit will not be given for both MATH 4113 and MATH 5113. Prerequisite: MATH 3113. (Typically offered: Spring)

MATH 5123. Algebra I. 3 Hours.  
What the beginning graduate student should know about algebra: groups, rings, fields, modules, algebras, categories, homological algebra, and Galois Theory. Prerequisite: MATH 3113, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall)

MATH 5133. Algebra II. 3 Hours.  
Continuation of MATH 5123. Prerequisite: MATH 5123, and graduate standing in mathematics or statistics. (Typically offered: Spring)

MATH 5153. Advanced Linear Algebra. 3 Hours.  
(Formerly MATH 4103.) Linear functionals, matrix representation of linear transformations, scalar product, and spectral representation of linear transformations. Graduate degree credit will not be given for both MATH 4103 and MATH 5153. Prerequisite: Graduate standing. (Typically offered: Fall)

MATH 5163. Dynamic Models in Biology. 3 Hours.  
(Formerly MATH 4163.) Mathematical and computational techniques for developing, executing, and analyzing dynamic models arising in the biological sciences. Both discrete and continuous time models are studied. Applications include population dynamics, cellular dynamics, and the spread of infectious diseases. Graduate degree credit will not be given for both MATH 4163 and MATH 5163. Prerequisite: MATH 2554. (Typically offered: Irregular)

MATH 5213. Advanced Calculus I. 3 Hours.  
(Formerly MATH 4513.) The real and complex number systems, basic set theory and topology, sequences and series, continuity, differentiation, and Taylor's theorem. Emphasis is placed on careful mathematical reasoning. Graduate degree credit will not be given for both MATH 4513 and MATH 5213. Prerequisite: Graduate standing. (Typically offered: Fall)

MATH 5223. Advanced Calculus II. 3 Hours.  
(Formerly MATH 4523.) The Riemann-Stieltjes integral, uniform convergence of functions, Fourier series, implicit function theorem, Jacobians, and derivatives of higher order. Graduate degree credit will not be given for both MATH 4523 and MATH 5223. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513). (Typically offered: Spring)

MATH 525V. Internship in Professional Practice. 1-3 Hour.  
(Formerly MATH 405V.) Professional work experience involving significant use of mathematics or statistics in business, industry or government. Graduate degree credit will not be given for both MATH 405V and MATH 525V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

MATH 5263. Symbolic Logic I. 3 Hours.  
(Formerly MATH 4253.) Rigorous analyses of the concepts of proof, consistency, equivalence, validity, implication, and truth. Full coverage of truth-functional logic and quantification theory (predicate calculus). Discussion of the nature and limits of mechanical procedures (algorithms) for proving theorems in logic and mathematics. Informal accounts of the basic facts about infinite sets. Graduate degree credit will not be given for both MATH 4253 and MATH 5263. Prerequisite: MATH 2603, MATH 2803, or PHIL 2203. (Typically offered: Fall) This course is cross-listed with PHIL 5253.

MATH 5303. Ordinary Differential Equations. 3 Hours.  
Existence, uniqueness, stability, qualitative behavior, and numerical solutions. Prerequisite: MATH 2584 and MATH 4513, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall)

MATH 5313. Partial Differential Equations. 3 Hours.  
Laplace's equation, Heat equation, Wave Equation, Method of Characteristics. Prerequisite: MATH 4423, MATH 4513, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall)

MATH 5323. Partial Differential Equations II. 3 Hours.  
Fourier Transforms, Sobolev Spaces, Elliptic Regularity. Prerequisite: MATH 5313 and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring)

MATH 5333. Mathematical Modeling. 3 Hours.  
(Formerly MATH 4153.) Mathematical techniques for formulating, analyzing, and criticizing deterministic models taken from the biological, social, and physical sciences. Techniques include graphical methods, stability, optimization, and phase plane analysis. Graduate degree credit will not be given for both MATH 4153 and MATH 5333. Prerequisite: MATH 2584. (Typically offered: Irregular)

MATH 5363. Scientific Computation and Numerical Methods. 3 Hours.  
An introduction to numerical methods used in solving various problems in engineering and the sciences. May not earn credit for this course and MATH 4353 or MATH 4363. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall) This course is cross-listed with PHYS 5363.

MATH 5373. Finite Element Methods and Solution of Sparse Linear. 3 Hours.  
Provides an in-depth understanding of numerical methods for the solution of partial differential equations using Finite Element Methods, Direct and Iterative Methods for the Sparse Linear Systems. Prerequisite: MATH 4353. (Typically offered: Spring)

MATH 5383. Numerical Analysis. 3 Hours.  
(Formerly MATH 4363.) General iterative techniques, error analysis, root finding, interpolation, approximation, numerical integration, and numerical solution of differential equations. Graduate degree credit will not be given for both MATH 4363 and MATH 5383. Prerequisite: Graduate standing. (Typically offered: Fall)

MATH 5393. Numerical Linear Algebra. 3 Hours.  
(Formerly MATH 4353.) Numerical methods for problems of linear algebra, including the solution of very large systems, eigenvalues, and eigenvectors. Graduate degree credit will not be given for both MATH 4353 and MATH 5393. Prerequisite: Graduate standing. (Typically offered: Spring)

MATH 5403. Numerical Linear Algebra II. 3 Hours.  
Provides an in-depth understanding of numerical methods for the solution of large scale eigenvalue problems arising in science and engineering applications including theory, implementation and applications. Prerequisite: MATH 5393. (Typically offered: Fall)

MATH 5423. Introduction to Partial Differential Equations. 3 Hours.  
Matrices, Fourier analysis, and partial differential equations. Does not count towards degree credit in MATH. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

MATH 5443. Complex Variables. 3 Hours.  
(Formerly MATH 4443.) Complex analysis, series, and conformal mapping. Graduate degree credit will not be given for both MATH 4443 and MATH 5443. Prerequisite: MATH 2603 or MATH 2803, and MATH 2584 or MATH 2584C. (Typically offered: Fall)

MATH 5453. Functional Analysis I. 3 Hours.  
Banach Spaces, Hilbert Spaces, operator theory, compact operators, dual spaces and adjoints, spectral theory, Hahn-Banach, open mapping and closed graph theorems, uniform boundedness principle, weak topologies. Prerequisite: MATH 5513, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring Odd Years)
MATH 5503. Theory of Functions of a Real Variable I. 3 Hours.
Real number system, Lebesque measure, Lebesque integral, convergence theorems, differentiation of monotone functions, absolute continuity and the fundamental theorem of calculus L^p spaces, Holder and Minkowski inequalities, and bounded linear functionals on the L^1 spaces. Prerequisite: MATH 5423 or MATH 5223 (formerly MATH 4523), and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall)

MATH 5513. Theory of Functions of a Real Variable II. 3 Hours.
Measure and integration on abstract measure spaces, signed measures, Hahn decomposition, Radon-Nikodym theorem, Lebesque decomposition, measures on algebras and their extensions, product measures, and Fubini's theorem. Prerequisite: MATH 5503, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring)

MATH 5523. Theory of Functions of a Complex Variable I. 3 Hours.
Complex numbers, analytic functions, power series, complex integration, Cauchy's Theorem and integral formula, maximum principle, singularities, Laurent series, and Mobius maps. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513). (Typically offered: Fall)

MATH 5533. Theory of Functions of a Complex Variable II. 3 Hours.
Riemann Mapping Theorem, analytic continuation, harmonic functions, and entire functions. Prerequisite: MATH 5523, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring)

MATH 5603. Differential Geometry. 3 Hours.
(Formerly MATH 4503.) Topics include: classical differential geometry of curves and surfaces in 3-space, differential forms and vector fields. Graduate degree credit will not be given for both MATH 4503 and MATH 5603. Prerequisite: MATH 2574 or MATH 2574C. (Typically offered: Irregular)

MATH 5703. Topology I. 3 Hours.
An introduction to topology. Topics include metric spaces, topological spaces and general point-set topology, homotopy and the fundamental group, covering spaces, the classification of surfaces. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513), and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall Even Years)

MATH 5713. Topology II. 3 Hours.
The continuation of Topology I. Topics include: advanced homotopy and covering spaces, the Seifert-van Kampen theorem, homology and the Mayer-Vietoris sequence. Prerequisite: MATH 5703, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring Odd Years)

MATH 5723. Differential Topology I. 3 Hours.
An introduction to the topology of smooth manifolds; applications of the inverse function theorem to smooth maps, Sard's theorem, transversality, intersection theory, degrees of maps, vector fields and differential forms on manifolds, integration on manifolds. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513) and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall Odd Years)

MATH 5733. Differential Topology II. 3 Hours.
The continuation of Differential Topology I, with additional advanced topics. Possible advanced topics may include: Morse theory, de Rham cohomology theory, Poncare duality, Riemannian geometry, and Lie groups and Lie algebras. Prerequisite: MATH 5723 and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring Even Years)

MATH 5803. Introduction to Point-Set Topology. 3 Hours.
(Formerly MATH 4703.) A study of topological spaces including continuous transformations, connectedness and compactness. Graduate degree credit will not be given for both MATH 4703 and MATH 5803. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513). (Typically offered: Irregular)

MATH 599V. Research Topics in Mathematics. 1-3 Hour.
(Formerly MATH 499V.) Current research interests in mathematics. Graduate degree credit will not be given for both MATH 499V and MATH 599V. Prerequisite: Departmental consent. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

MATH 609V. Topics in Math Education. 1-6 Hour.
Topics in mathematics education research including curriculum, teacher education, learning theory, and assessment. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

MATH 610V. Directed Readings. 1-6 Hour.
Directed readings. Prerequisite: Departmental consent. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

MATH 619V. Topics in Algebra. 1-6 Hour.
Current research interests in algebra. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

MATH 6203. Theory of Probability. 3 Hours.
A rigorous mathematical treatment based on measure theory of the fundamental notions and results of the theory of probability. Topics covered include laws of large numbers, central limit theorems, conditional expectations. Additional topics that may be covered include martingales, Markov chains, Brownian motion and stochastic integration. Prerequisite: MATH 5513. (Typically offered: Fall)

MATH 6213. Mathematical Statistics. 3 Hours.
A rigorous mathematical treatment of the fundamental principles and results in the theory of Statistics. Topics include exponential families of distributions, estimation of unknown parameters, the classical theory of theory of hypothesis testing, Large sample approximations, large sample properties of estimators. Prerequisite: MATH 6203. (Typically offered: Spring)

MATH 659V. Topics in Analysis. 1-6 Hour.
Current research interests in analysis. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

MATH 679V. Topics in Topology. 1-6 Hour.
Current research interest in topology. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

MATH 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Doctoral candidacy in mathematics. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

Mechanical Engineering (MEEG) Courses

MEEG 5033. Advanced Mechanics of Materials I. 3 Hours.
Combined stress, theories of failure, thick-walled cylinders, bending of unsymmetrical sections, torsion in noncircular section, plate stresses, and strain energy analysis. Prerequisite: MEEG 2013 and MEEG 3013. (Typically offered: Irregular)

MEEG 5123. Finite Elements Methods II. 3 Hours.
Development and application of finite element (FE) methods used to solve transient and two-dimensional boundary value problems. Applications are taken from solid and fluid mechanics, heat transfer, and acoustics. Emphasis is placed on the FE methodology in order to make accessible the research literature and commercial software manuals, and to encourage responsible use and interpretation of FE analysis. Prerequisite: MEEG 4123 and graduate standing or consent. (Typically offered: Irregular)
MEEG 5143. Advanced Machine Design. 3 Hours.
Application of advanced topics such as probability theory, fracture mechanics, and computer methods to the design and analysis of complex mechanical systems. Prerequisite: MEEG 4103 and graduate standing. (Typically offered: Irregular)

MEEG 5153. Fundamentals of Mechanical Design. 3 Hours.
(Formerly MEEG 4153.) This class is designed to provide engineering students with a head start in industry as design engineers or working in an engineering related function. The course contents cover machine design and analysis experiences as related to working in industry and performing consulting work. Major topics include the design process, design procedures, fasteners, general design and numerous consulting experiences. A concept design exercise and two special design projects will be assigned to the students as homework. Graduate degree credit will not be given for both MEEG 4153 and MEEG 5153. Prerequisite: MEEG 4103. (Typically offered: Fall)

MEEG 5163. Advanced Product Design. 3 Hours.
This course provides an in-depth and comparative study on the theories of engineering design and equips students to understand and utilize the tools and methodologies founded on those theories. (Typically offered: Fall)

MEEG 5203. Robot Modeling and Simulation. 3 Hours.
This is a graduate level course in Robotics dealing with the behavioral study of robots. Topics covered in this course will include but not limited to the following: mathematical modeling of robots, rigid motions and homogeneous transformation, forward/reverse kinematics of robots, velocity kinematics, path and trajectory planning, robot dynamics, joint control, PD/PID control, and multivariable control. Advanced topics may include passivity-based motion control, geometric nonlinear control, computer vision, vision-based control, and sensor fusion. Prerequisite: Graduate standing in MEEG or ELEG and consent of the instructor. (Typically offered: Spring)

MEEG 5253. Bio-Mems. 3 Hours.
Topics include the fundamental principles of microfluidics, Navier-Stokes Equation, bio/abio interfacing technology, bio/abio hybrid integration of microfabrication technology, and various biomedical and biological problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Lecture 3 hours per week. Prerequisite: MEEG 3503 or CVEG 3213 or CHEG 2133. (Typically offered: Spring)
This course is cross-listed with BENG 5253.

MEEG 5263. Introduction to Micro Electro Mechanical Systems. 3 Hours.
A study of mechanics and devices on the micro scale. Course topics will include: introduction to micro scales, fundamentals of microfabrication, surface and bulk micromachining, device packaging, device reliability, examples of micro sensors and actuators. Recitation three hours per week. (Typically offered: Fall)

MEEG 5273. Electronic Packaging. 3 Hours.
An introductory treatment of electronic packaging from single chip to multichip including materials, electrical design, thermal design, mechanical design, package modeling and simulation, processing considerations, reliability, and testing. Credit cannot be earned for both MEEG 5273 and ELEG 5273. Prerequisite: (ELEG 3214 or ELEG 3933) and MATH 2584. (Typically offered: Irregular)
This course is cross-listed with ELEG 5273.

MEEG 5303. Physical Metallurgy. 3 Hours.
Physical and chemical properties of solids and the application of materials in commerce. Prerequisite: MEEG 2303. (Typically offered: Irregular)

MEEG 5323. Physical and Chemical Vapor Deposition Processes. 3 Hours.
Fundamental principles of materials behavior in the deposition of films by PVD/CVD. Topics include kinetic theory of gases, statistical mechanics, plasmas, diagnostics, reaction rate theory, nucleation and growth, crystal structures and defects in thin films, advanced characterization techniques for thin films, and applications in microelectronics, tribology, corrosion, bio- and nano-materials. Prerequisite: Graduate standing in Engineering or consent of instructor. (Typically offered: Irregular)

MEEG 5333. Introduction to Tribology. 3 Hours.
A study of science and technology of interacting surfaces in relative motion. Topics include solid surface characterization, contact between solid surfaces, adhesion, friction, wear, lubrication, micro/nanotribology, friction and wear screening test methods, and tribological components and applications. Students may not earn credit for both MEEG 5333 and MEEG 4313. Prerequisite: Graduate standing. (Typically offered: Irregular)

MEEG 5343. Computational Material Science. 3 Hours.
This course provides students with an overview of different modeling techniques in material science. Applications will be presented on a broad range of modeling techniques including atomistic simulation methods, Monte Carlo techniques, molecular mechanics, and molecular dynamics. Prerequisite: Graduate standing. (Typically offered: Irregular)

MEEG 5403. Advanced Thermodynamics. 3 Hours.
An in-depth review of classical thermodynamics, including availability analysis, combustion, and equilibrium, with an introduction to quantum mechanics and statistical thermodynamics. Prerequisite: Graduate standing in Engineering or consent of instructor. (Typically offered: Spring)

MEEG 5423. Statistical Thermodynamics. 3 Hours.
Concepts and techniques for describing high temperature and chemically reactive gases from a molecular point of view. Introductory kinetic theory, chemical thermodynamics, and statistical mechanics applied. Prerequisite: MEEG 2403 and MATH 2574. (Typically offered: Irregular)

MEEG 5433. Combustion. 3 Hours.
Introduction to combustion of solid, liquid, and gaseous fuels. Equilibrium and kinetics of hydrocarbon oxidation, laminar and turbulent flames, premixed and non-premixed combustion processes, ignition, quenching, stability, emissions and diagnostics. Prerequisite: Graduate standing in Engineering or consent of instructor. (Typically offered: Irregular)

MEEG 5453. Advanced Heat Transfer. 3 Hours.
More in-depth study of topics covered in MEEG 4413, Heat Transfer, and coverage of some additional topics. Prerequisite: MEEG 4413 or equivalent. (Typically offered: Fall)

MEEG 5473. Radiation Heat Transfer. 3 Hours.
Spectral analysis, radiant exchange in gray and non-gray enclosures, gas radiation, and multi-mode heat transfer. Prerequisite: MEEG 5453 or equivalent. (Typically offered: Summer Even Years)

MEEG 5483. Thermal Systems Analysis and Design. 3 Hours.
(Formerly MEEG 4483.) Analysis design and optimization of thermal systems and components with examples from such areas as power generation, refrigeration, and propulsion, Availability loss characteristics of energy systems and availability conservation methods. Graduate degree credit will not be given for both MEEG 4483 and MEEG 5483. Prerequisite: MEEG 4413. (Typically offered: Fall and Summer)

MEEG 5503. Advanced Fluid Dynamics I. 3 Hours.
A basic survey of the characteristics of fluid flow under a variety of conditions with examples. Begins with a derivation of the Navier-Stokes equations and an evaluation of the dimensionless groups found from these equations. Topics to be covered include viscous laminar and turbulent boundary layers, jets and wakes, Stokes flow, inviscid flows with and without free surfaces and turbulence. Prerequisite: MEEG 3503 and MATH 2584. (Typically offered: Spring)
MEEG 5513. Introduction to Flight. 3 Hours.
(Formerly MEEG 4503.) The course will provide understanding in basic aerodynamics, airflow design and characteristics, and flight control surfaces. Graduate degree credit will not be given for both MEEG 4503 and MEEG 5513. Prerequisite: MATH 2584, MEEG 3503. (Typically offered: Fall)

MEEG 5523. Astronautics. 3 Hours.
(Formerly MEEG 4523.) Study of spacecraft design and operations. Graduate degree credit will not be given for both MEEG 4523 and MEEG 5523. Prerequisite: MEEG 2013 and MEEG 2403 or consent of instructor. (Typically offered: Irregular)

MEEG 5533. Fundamentals of Aerodynamics. 3 Hours.
A study of external-flow fluid mechanics applied to Aerodynamics. Topics include integral and differential forms of the basic fluid equations (continuity, momentum, and energy), potential flow, and supersonic flow. Prerequisite: MEEG 3503. (Typically offered: Spring)

MEEG 5633. Additive Manufacturing. 3 Hours.
This course provides an overview of developing opportunities and critical challenges of additive manufacturing (AM, also known as 3-D printing). It covers existing and emerging additive manufacturing processes in the context of product design, materials selection and processing, and industrial and consumer applications. Students may not receive credit for both MEEG 4633 and MEEG 5633. Prerequisite: MEEG 2101, MEEG 2303, MEEG 3013, and MEEG 3503 or instructor consent. (Typically offered: Spring)

MEEG 5733. Advanced Numerical Methods. 3 Hours.
Numerical methods for the solution of linear and non-linear ordinary and partial differential equations; initial and boundary value problems; one-step and multi-step methods; predominantly finite difference but also finite element and control volume techniques; and computer applications. Graduate standing in Engineering or consent of instructor. (Typically offered: Irregular)

MEEG 5833. Aerospace Propulsion. 3 Hours.
(Formerly MEEG 4433.) Principles, operation, and characteristics of gas turbine and rocket engines. Brief study of novel spacecraft propulsion systems. Graduate degree credit will not be given for both MEEG 4433 and MEEG 5833. Prerequisite: MEEG 3503. (Typically offered: Irregular)

MEEG 5853. Industrial Waste and Energy Management. 3 Hours.
(Formerly MEEG 4453.) Applications of thermodynamics, heat transfer, fluid mechanics, and electric machinery to the analysis of waste streams and energy consumption for industrial facilities. Current techniques and technologies for waste minimization and energy conservation including energy-consuming systems and processes, utility rate analysis, economic analysis and auditing are taught. Graduate degree credit will not be given for both MEEG 4453 and MEEG 5853. Prerequisite: MEEG 4413. (Typically offered: Irregular)

MEEG 5873. Indoor Environmental Control. 3 Hours.
(Formerly MEEG 4473.) Gives student a thorough understanding of the fundamental theory of air conditioning design for commercial buildings, including calculating heating and cooling loads along with the proper selection and sizing of air conditioning equipment. Graduate degree credit will not be given for both MEEG 4473 and MEEG 5873. Prerequisite: MEEG 4413. (Typically offered: Irregular)

MEEG 591V. Special Topics in Mechanical Engineering. 1-6 Hour.
Consideration of current advanced mechanical engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

MEEG 592V. Individual Study in Mechanical Engineering. 1-3 Hour.
Opportunity for individual study of advanced subjects related to a graduate mechanical engineering program to suit individual requirements. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

MEEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.
The course will cover the concepts of linear-elastic, elastic-plastic and time-dependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. (Typically offered: Fall and Spring)
This course is cross-listed with BMEG 5953, CVEG 5953.

MEEG 5963. Advanced Fracture Mechanics and Structural Integrity. 3 Hours.
This course provides an in-depth treatment of advanced topics in fracture mechanics such as stress analysis of cracks under elastic-plastic loading, crack initiation and growth under elastic-plastic and time-dependent creep and creep-fatigue conditions. The course emphasizes fundamental underpinnings of nonlinear fracture mechanics and its use in material evaluation and life prediction methodology for structural components. Micro-mechanics of fracture and crack growth processes are also covered. Prerequisite: MEEG 5953, or BMEG 5953, or CVEG 5953 or equivalent, or instructor consent. (Typically offered: Fall and Spring)

MEEG 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

MEEG 6800. Graduate Seminar. 0 Hours.
A periodic seminar devoted to mechanical engineering research topics. Course includes letter grades A, B, C, D, and F as well as CR. (Typically offered: Fall and Spring)

MEEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Microelectronics-Photonics (MEPH)

Courses

MEPH 5253. Emerging Technologies in Industry. 3 Hours.
Business leaders present technologies used by their companies. Focusing on Arkansas-based companies, technology needs for the industry and innovative ideas for solutions or advancements are discussed. Students work to develop solutions to address company needs or further develop a company's current technology. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

MEPH 5383. Research Commercialization and Product Development. 3 Hours.
This survey course examines research commercialization through analysis of IP, technology space, market space, manufacturability, financials, and business plans. Entrepreneurial behaviors and product development within large companies are also discussed. A case study using a current UA faculty member's research commercialization effort will be developed. Prerequisite: Graduate Standing. (Typically offered: Spring)

MEPH 5393. Product Development Process. 3 Hours.
Demonstration of a student's technical and management knowledge integration by creating a commercially viable product development process to meet a new societal need, with the technical solution based on micro to nanoscale technology. Final grade based on a detailed written report and oral presentation to a panel. Non-thesis students only. Pre- or Corequisite: MEPH 5383. Prerequisite: Instructor permission. (Typically offered: Spring)
MEPH 5513. Applied Research in External Technical Organizations. 3 Hours.
A one semester narrow focus graduate level research effort while working at an external technical organization's site. Requires a final report of style and quality suitable for journal submission. This course available only to Professional Path M.S. microEP students, and may substitute for an MEPH 588V External Internship. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

MEPH 5523. Applied On-Campus Collaborative Research with External Technical Organizations. 3 Hours.
A one semester narrow focus graduate level on-campus research effort performed in collaboration with an external technical organization. Requires a final report of style and quality suitable for journal submission. This course available only to Professional Path M.S. microEP students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

MEPH 555V. Internship in External Technical Organization. 1-3 Hour.
Used to document a microEP grad student internship experience in an external technical organization for a minimum duration of six weeks (6-9 weeks=one hour, 10-12 weeks=two hours, and 13-15 weeks=three hours). It may not be used to meet the research requirements of a M.S. degree. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

MEPH 5611. Research Communication Seminar of MS Students. 1 Hour.
This course serves as a forum for MS students to develop oral presentation skills and to exchange research ideas. Research presentations will be on various topics in the area of micro to nanoscale materials, processing, and devices, with research management and planning also being addressed. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

MEPH 5713. Advanced Nanomaterials Chemistry. 3 Hours.
Science and engineering graduates are using more nanomaterials, and modern industry demands that its scientists and engineers have materials chemistry knowledge. Materials from the micro to nanoscale will be examined in this course from the perspective of fundamental chemistry principles to build a picture of tomorrow's materials. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

MEPH 573L. Fabrication at the Nanoscale. 3 Hours.
This hands-on lab course will cover the disciplines needed to make active electronic and photonic devices utilizing nanoscale structures and fabrication techniques presently used in research and industry. Prerequisite: Graduate standing and permission of the instructor. (Typically offered: Spring)

MEPH 5742. Transmission Electron Microscopy Theory and Operation. 2 Hours.
This new laboratory course will introduce students to practical electron microscopy and to the operation of the Titan S/TEM for examination of sub-angstrom examination of materials. Students will learn how to conduct a TEM study, how to operate the TEM, and how to extract and interpret useful information. Prerequisite: Graduate standing. (Typically offered: Spring)

MEPH 5811. 1st Year Operations Seminar - Infrastructure Management. 1 Hour.
Weekly seminar for 1st year Microelectronics-Photonics graduate students to discuss issues that increase professional performance in technology-centered organizations. The discussions will focus on issues that affect organizational infrastructure, career planning, organizational structures, and may include examples from current events. Prerequisite: Graduate standing. (Typically offered: Fall)

MEPH 5821. Ethics for Scientists and Engineers. 1 Hour.
This course will introduce methods useful in the practice of ethical decision making in the high technology academic and industrial workplace. An emphasis will be placed on applying the methods discussed in the text to student and instructor past professional experiences. Prerequisite: graduate standing. (Typically offered: Summer)

MEPH 5832. Proposal Writing and Management. 2 Hours.
This course introduces factors that affect proposal success in both the academic and industrial arenas; demonstrates different approaches to writing successful proposals; and introduces students to the legal responsibilities and ramifications of proposal management. Students will write two proposals for peer review and formal evaluation. Prerequisite: Graduate standing. (Typically offered: Summer)

MEPH 587V. Special Topics in Microelectronics-Photonics. 1-4 Hour.
Consideration of current microelectronic-photonic topics not covered in other courses. One section will be created for each topic only after a syllabus is submitted to the microEP office by the faculty member teaching the course. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

MEPH 588V. Special Problems in Microelectronics-Photonics. 1-3 Hour.
Opportunity for individual study of advanced subjects related to a graduate degree in Microelectronics-Photonics to suit individual requirements. One section will be created for each student only after a syllabus is submitted to the microEP office by the supervising faculty member. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

MEPH 5911. 1st Year Operations Seminar - Personnel Management. 1 Hour.
Weekly seminar for 1st year Microelectronics-Photonics graduate students to discuss issues that increase professional performance in technology-centered organizations. The discussions will focus on issues that affect personnel management, team building and structures, and may include examples from current events. Prerequisite: Graduate standing. (Typically offered: Spring)

MEPH 592V. Emerging Technologies in Industry Practicum. 1-3 Hour.
Students engage in demand-driven research projects inspired by Arkansas companies as part of the interdisciplinary IGNITE (Industry Generating New Ideas and Technology through Education) program. These projects, which often result from interactions with companies during MEPH 5253, include visiting company locations; developing project goals, budgets, and timelines; and performing research. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

MEPH 6611. Research Communication Seminar of PhD Students. 1 Hour.
This course serves as a forum for Ph.D. students to develop oral presentation skills and to exchange research ideas. Research presentations will be on various topics in the area of micro to nanoscale materials, processing and devices, with research management and planning also being addressed. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

MEPH 66911. 2nd Year Operations Seminar - Management and Leadership. 1 Hour.
Weekly seminar for 2nd year Microelectronics-Photonics graduate students to discuss issues that increase professional performance in technology-centered organizations. The discussions will focus on issues that affect management and leadership effectiveness and efficiency, and may include examples from current events. Prerequisite: Graduate standing. (Typically offered: Fall)

MEPH 66911. 2nd Year Operations Seminar - Advanced Management and Leadership. 1 Hour.
Weekly seminar for 2nd year Microelectronics-Photonics graduate students to discuss advanced issues that increase professional performance in technology-centered organizations. The discussions will focus on the complex issues that affect management and leadership effectiveness and efficiency, and may include examples from current events. Prerequisite: Graduate standing. (Typically offered: Spring)
Music Education (MUED)

Courses

MUED 5513. Seminar: Resources in Music Education. 3 Hours.
Study of the analytical and writing skills necessary for academic research in music education. Each student identifies one problem specific to music education, finds and reviews related literature and sources, develops a comprehensive bibliography, and writes a paper which synthesizes the research. Open to graduate students and undergraduates in honors in music education. (Typically offered: Irregular)

MUED 5653. Seminar: Issues in Music Education. 3 Hours.
A seminar exploring the relationships between the profession of teaching music and selected views about learning theories, teaching methods, philosophy, psychology, and other selected topics relevant to contemporary music education. (Typically offered: Irregular)

MUED 5733. Music Education in the Elementary School. 3 Hours.
Concepts of elementary music education; methods, materials, curriculum design, and supervision in elementary school music. (Typically offered: Irregular)

MUED 5743. Characteristics of Special Needs Students in the Music Classroom. 3 Hours.
A review of characteristics and behaviors of students in the music classroom that have identified or unidentified disabilities in learning. Prerequisite: Admittance into Music Education for Special Needs Students Graduate Certificate. (Typically offered: Fall)

MUED 5753. Teaching Music to Students with Special Needs. 3 Hours.
Instructs students how to construct and implement curriculum and assessments for students with special needs in a music classroom. Prerequisite: MUED 5743. (Typically offered: Spring)

MUED 5763. Practicum in Teaching Music to Students with Special Needs. 3 Hours.
Students will utilize and evaluate designed curriculum and assessment from MUED 5753 in a music classroom. Prerequisite: MUED 5743. Corequisite: MUED 5753. (Typically offered: Spring)

MUED 577V. Special Topics in Music Education. 1-4 Hour.
(Formerly MUED 477V.) Subject matter not covered in other sources. With permission, may be repeated for credit if topics are different. Graduate degree credit will not be given for both MUED 477V and MUED 577V. (Typically offered: Irregular) May be repeated for degree credit.

MUED 5811. Curriculum Design in Music. 1 Hour.
Goals and objectives in music education. Student will develop a curriculum for an actual or hypothetical music education program. (Typically offered: Irregular)

An in-service training workshop for elementary music teachers. (Typically offered: Irregular)

MUED 5862. Marching Band Techniques. 2 Hours.
Includes the place of the marching band in the school program, types of formations used, and selecting, arranging or writing the musical score. (Typically offered: Irregular)

MUED 5973. Tests and Measurement in Music. 3 Hours.
This course will address the psychometric concepts of tests and measurement of music achievement, aptitude, attitude, and self-assessment. The course will focus on the teaching and assessment of musical skills, musical responses, and will critically examine existing aptitude tests (Seashore, Watkins Farnum, Gordon, etc.). Basic statistical concepts and data analysis used in common testing scenarios will be introduced. Prerequisite: Graduate standing in music. (Typically offered: Irregular)

MUED 5983. Psychology of Music Behavior. 3 Hours.
This course is an introduction to the psychology of music, and will adopt an interdisciplinary view toward the field, covering such topics as philosophical and sociological questions about the nature and function of music, the physiology of the ear, the physical and perceptual properties of sounds (acoustics), performance anxiety, preference and taste research, social and pedagogical attributes of performance, and behavioral musical responses. Prerequisite: Graduate standing. (Typically offered: Irregular)

MUED 600V. Master's Thesis. 1-6 Hour.
Preparation of a master's thesis as partial fulfillment of the requirement for the master's degree. (Typically offered: Irregular) May be repeated for degree credit.

MUED 605V. Independent Study. 1-6 Hour.
Provides students with an opportunity to pursue special study of problems in music education. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Music Ensemble (MUEN)

Courses

MUEN 5401. Opera Theatre. 1 Hour.
Study of opera through performances of scenes, chamber and major operatic production. Admission with director's approval. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5411. Men's Chorus. 1 Hour.
Performance-based choral ensemble designed to improve individual and collective vocal skills, develop sight-reading skills, improve the individual's grasp of the essential elements of music, and expose students to repertory of the greater men's chorus canon. Admission is open to any male student on campus. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5421. Inspirational Chorale. 1 Hour.
Performance of African-American literature with particular emphasis on Negro spirituals, traditional/contemporary gospel music and sacred world music. Rehearsal 3 hours per week. (Typically offered: Fall and Spring) May be repeated for up to 2 hours of degree credit.

MUEN 5431. Symphony Orchestra. 1 Hour.
Rehearsal 3 hours per week with extra rehearsals at director's discretion. Admission with director's approval. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5441. Marching Band. 1 Hour.
Rehearsal 8 hours per week. Admission with director's approval. (Typically offered: Fall) May be repeated for degree credit.

MUEN 5451. Schola Cantorum. 1 Hour.
Vocal ensemble limited to the more experienced singers. Rehearsal 5 hours per week. Admission with director's approval. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5461. Wind Symphony. 1 Hour.
Rehearsal 3 to 5 hours per week. Admission by audition and approval of the conductor. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5471. Jazz Performance Laboratory. 1 Hour.
Training in the various styles of jazz and popular music. Rehearsal 3 hours per week. Admission by audition. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5481. Campus Band. 1 Hour.
Rehearsal 3 hours per week. Admission by audition and approval of the conductor. (Typically offered: Spring) May be repeated for degree credit.
MUEN 5941. Concert Band. 1 Hour.
Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public may be required. Admission is by audition or special approval. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

MUEN 5501. Chamber Music. 1 Hour.
Performance of small ensemble music for any combination of instruments and/or voice. Rehearsal 3 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5511. Symphonic Band. 1 Hour.
Rehearsal 3 hours per week. Admission by audition and approval of the conductor. (Typically offered: Spring) May be repeated for degree credit.

MUEN 5521. Woodwind Quintet. 1 Hour.
Study and performance of music for woodwind quintet. Weekly coaching will emphasize intonation, blend, stylistic awareness, and ensemble precision. Repertoire ranges from the 18th to the 20th centuries. 3 hours of rehearsals weekly. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5541. Accompanying. 1 Hour.
Piano accompanying of vocal and instrumental soloists. Rehearsal 2 hours per week. Pre- or Corequisite: MUAP 510V. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5551. Percussion Ensemble. 1 Hour.
Study and performance of ensemble music for multiple percussion instruments. Rehearsal 2 hours per week. (Typically offered: Spring and Summer) May be repeated for degree credit.

MUEN 5561. Musical Theater Orchestra. 1 Hour.
Instrumental ensemble with focus on the preparation and performance of musical theater pit orchestra music, in conjunction with UA Theater's mainstage musical. Admission by audition or director's approval. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

MUEN 5591. Women's Chorus. 1 Hour.
Select performance-based choral ensemble designed to improve individual and collective vocal skills, develop sight-reading skills, improve the individual's grasp of the essential elements of music, and expose students to repertory of the greater treble chorus canon. (Typically offered: Fall and Spring) May be repeated for up to 2 hours of degree credit.

MUEN 5691. Wind Ensemble. 1 Hour.
Large ensemble setting performing orchestral wind and symphonic band literature with emphasis on high performance standards through style and interpretation. Concerts of high artistic merit which serve the campus community and general public are required. Admission is by audition. (Typically offered: Fall and Spring) May be repeated for up to 2 hours of degree credit.

MUEN 5711. Flute Ensemble. 1 Hour.
Study and performance of music for multiple flutes, including trios, quartets, quintets, and flute choir. Rehearsal 2 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5721. Clarinet Ensemble. 1 Hour.
Study and performance of music for multiple clarinets, including trios, quartets, quintets, and clarinet choir. Rehearsal 2 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5731. Saxophone Ensemble. 1 Hour.
Study and performance of music for multiple saxophones, including trios, quartets, quintets, and saxophone choir. Rehearsal 3 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5751. Trumpet Ensemble. 1 Hour.
Study and performance of music for multiple trumpets, including trios, quartets, quintets, and trumpet choir. Rehearsal 2 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5761. New Music Ensemble. 1 Hour.
Small, select ensemble with emphasis on music written in the last hundred years, especially by important living composers. Focus on audience engagement through high performance standards, unconventional settings, and programs unique to the region. Off-campus appearances and outreach activities are required. Admission by consent. (Typically offered: Fall and Spring)

MUEN 5771. Trombone Ensemble. 1 Hour.
Study and performance of music for multiple trombones, including trios, quartets, quintets, and trombone choir. Rehearsal 2 hours per week. (Typically offered: Irregular) May be repeated for degree credit.

MUEN 5781. Tuba Ensemble. 1 Hour.
Study and performance of music for multiple combinations of tuba and euphonium, including trios, quartets, quintets, and low brass choir. Rehearsal 2 hours per week. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUEN 5881. Chamber Choir. 1 Hour.
Continuation of Chamber Choir V for graduate students. Study and performance of vocal chamber music. Rehearsal 2 hours per week for 1 hour of credit. (Typically offered: Fall and Spring)

Music History (MUHS)

Courses

MUHS 5253. Special Topics in Music History. 3 Hours.
(Formerly MUHS 4253.) Specialized topics not extensively covered in MUHS 3703 or MUHS 3713. Satisfactory completion of the term paper in this class will fulfill the Fulbright College writing requirement. Graduate degree credit will not be given for both MUHS 4253 and MUHS 5253. Prerequisite: MUHS 3703 and MUHS 3713. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUHS 5563. Collaborative Piano Literature I, Woodwind and Brass Repertoire. 3 Hours.
Survey of collaborative literature for piano and wind or brass instruments. Focus on music for the collaborative duo (instrument and piano) including sonatas and concerti. (Typically offered: Fall Even Years)

MUHS 5573. Collaborative Piano Literature II, String Repertoire. 3 Hours.
Survey of collaborative literature for the piano. Focus on the repertoire of sonatas, concerti and concert works for the piano and instrument (violin, viola, cello, and double bass). (Typically offered: Spring Odd Years)

MUHS 5633. Survey of Symphonic Literature. 3 Hours.
(Formerly MUHS 4733.) A survey of the symphonic literature from its beginning to the present. Graduate degree credit will not be given for both MUHS 4733 and MUHS 5633. (Typically offered: Spring Even Years)

MUHS 5673. Survey of Vocal Literature I, 2 Hours.
Survey of vocal literature for the solo voice. Graduate degree credit will not be given for both MUHS 4773 and MUHS 5673. Prerequisite: MUHS 4763. (Typically offered: Spring Odd Years)

MUHS 5693. Band Literature. 3 Hours.
(Formerly MUHS 4793.) A study of literature written for performance by concert band, symphonic band, and wind ensemble, representative of the following five periods in Music History: Renaissance (1420-1600), Baroque (1600-1750), Classical (1750-1820), Romantic (1820-1900), and Contemporary (1900-present). Graduate degree credit will not be given for both MUHS 4793 and MUHS 5693. (Typically offered: Irregular)
MUHS 5703. Survey of String Literature. 3 Hours.  
(Formerly MUHS 4703.) A survey of solo and chamber music literature involving stringed instruments. Graduate degree credit will not be given for both MUHS 4703 and MUHS 5703. Prerequisite: MUAP 110V and MUTH 3613. (Typically offered: Fall Even Years)

MUHS 5722. Directed Studies in Music Literature I. 2 Hours.  
Research in music literature in the performance field of the individual student. (Typically offered: Fall and Spring)

MUHS 5732. Directed Studies in Music Literature II. 2 Hours.  
Research in music literature in the performance field of the individual student. Prerequisite: MUHS 5722. (Typically offered: Fall and Spring)

MUHS 5753. Seminar in Medieval & Early Renaissance. 3 Hours.  
Intensive studies in music of Western Europe from early Christian times through the 15th century. (Typically offered: Irregular)

MUHS 5763. Survey of Vocal Literature I. 3 Hours.  
(Formerly MUHS 4763.) A survey of concert literature for the solo voice. Graduate degree credit will not be given for both MUHS 4763 and MUHS 5763. (Typically offered: Fall Even Years)

MUHS 5773. Seminar in Music of the 18th Century. 3 Hours.  
Intensive study of the late Baroque and Classical music. (Typically offered: Irregular)

MUHS 5783. Seminar in Music of the 19th Century. 3 Hours.  
Intensive studies in music of the 19th century. (Typically offered: Spring Odd Years)

MUHS 5793. Seminar in Music of the 20th Century. 3 Hours.  
Intensive studies in 20th century music. (Typically offered: Fall Even Years)

MUHS 5803. Survey of Keyboard Literature I. 3 Hours.  
(Formerly MUHS 4803.) A survey of the piano works of outstanding composers. Graduate degree credit will not be given for both MUHS 4803 and MUHS 5803. Prerequisite: MUAP 110V. (Typically offered: Fall Even Years)

MUHS 5813. Survey of Keyboard Literature II. 3 Hours.  
(Formerly MUHS 4813.) A survey of the piano works of outstanding composers. Graduate degree credit will not be given for both MUHS 4813 and MUHS 5813. Prerequisite: MUHS 4803. (Typically offered: Spring Odd Years)

MUHS 589V. Seminar in Music History. 1-4 Hour.  
(Formerly MUHS 489V.) Subject matter not covered in other courses. With permission, may be repeated for credit if topics are different. Graduate degree credit will not be given for both MUHS 489V and MUHS 589V. (Typically offered: Irregular) May be repeated for degree credit.

MUHS 5903. Seminar in Musicology. 3 Hours.  
Focuses on specialized topics and repertoires within the history of Western music and introduces students to musicological approaches to these subjects. Prerequisite: MUHS 5973 or instructor consent. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUHS 5943. Seminar in Opera. 3 Hours.  
Intensive studies in operatic literature. (Typically offered: Irregular)

MUHS 5952. Choral History and Literature I. 2 Hours.  
Detailed study of choral history and literature from Gregorian chant to J.S. Bach. (Typically offered: Irregular)

MUHS 5962. Choral History and Literature II. 2 Hours.  
Detailed study of choral history and literature from J.S. Bach to the present. (Typically offered: Irregular)

MUHS 5973. Seminar in Bibliography and Methods of Research. 3 Hours.  
A survey of the methods and materials of musical research, including bibliography, methods of analysis, and style in the presentation of research results. Open to graduate students and to juniors in Honors. (Typically offered: Fall)

MUHS 600V. Master's Thesis. 1-6 Hour.  
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Music Pedagogy (MUPD) Courses

MUPD 5202. Voice Pedagogy I. 2 Hours.  
Graduate-level study of the techniques and materials of teaching voice. (Typically offered: Irregular)

MUPD 5763. Piano Pedagogy. 3 Hours.  
(Formerly MUPD 4863.) Analytical study and discussion of the various approaches to piano pedagogy and its application in individual/class instruction. Involves demonstration of principles through actual teaching of beginning, intermediate and upper level students. Graduate degree credit will not be given for both MUPD 4863 and MUPD 5763. (Typically offered: Spring Even Years)

MUPD 577V. Special Topics in Pedagogy. 1-6 Hour.  
(Formerly MUPD 477V.) Subject matter not covered in other sources. With permission, may be repeated for credit if topics are different. Graduate degree credit will not be given for both MUPD 477V and MUPD 577V. (Typically offered: Irregular) May be repeated for degree credit.

MUPD 582V. Conducting. 1-4 Hour.  
Private lessons of 1/2 hour and 1 hour conducting laboratory each week. Development of skills in conducting symphony, choral, opera, oratorio, ballet, and band repertoire. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

MUPD 584V. Opera Workshop Techniques. 1-2 Hour.  
A basic course in every phase of opera production, including staging, set design, music coaching, voice casting, and translation. (Typically offered: Fall and Spring)

MUPD 586V. Woodwind Techniques. 1-2 Hour.  
A continuation of the undergraduate courses in techniques and materials for elementary and secondary school music teaching. Prerequisite: One year of similar class instruction in the field on the undergraduate level. (Typically offered: Fall and Spring)

MUPD 587V. Brass Techniques. 1-2 Hour.  
A continuation of the undergraduate class brass instrument course. Emphasis is placed on teaching methods, techniques, concepts, and materials. Prerequisite: One year of similar class instruction in the field on the undergraduate level. (Typically offered: Irregular)

MUPD 599V. Special Workshop in Music. 1-6 Hour.  
Presented by visiting master artist-teacher in various fields of music performance, teaching and composition. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

Music Theory (MUTH) Courses

MUTH 5322. Score Reading. 2 Hours.  
(Formerly MUTH 4322.) A conductor's approach to the technique of score reading and analysis of orchestra, band, and choral scores for the purpose of preparing composition for rehearsal and performance. Graduate degree credit will not be given for both MUTH 4322 and MUTH 5322. (Typically offered: Fall)

MUTH 5343. Analytical Techniques. 3 Hours.  
An intensive study of selected works from music literature. Schenkerian analysis, rhythmic analysis, and set theory analytical techniques will be studied and employed in addition to traditional harmonic and formal analysis. Prerequisite: MUTH 3613 or equivalent and graduate standing. (Typically offered: Irregular)
MUTH 5612. Orchestration. 2 Hours.
(Formerly MUTH 4612.) A continuation of study of the capabilities of the various orchestral and band instruments and their use in arrangement for ensembles, band, and orchestra. Scoring for orchestra. Graduate degree credit will not be given for both MUTH 4612 and MUTH 5612. Prerequisite: MUTH 3613. (Typically offered: Spring)

MUTH 5623. Pedagogy of Theory. 3 Hours.
Detailed study of methods of teaching undergraduates courses in music theory and aural perception. Prerequisite: Graduate standing. (Typically offered: Irregular)

MUTH 5631. Music Theory Teaching Practicum. 1 Hour.
Supervised teaching of an undergraduate course in music theory or aural perception, including lesson plan and examination preparation and in-class observation. (Typically offered: Irregular)

MUTH 5643. Analysis of 20th Century Music. 3 Hours.
Study of 20th century music and analytic techniques including pitch class set theory and serial techniques. Prerequisite: Graduate standing. (Typically offered: Irregular)

MUTH 5662. Instrumental Arranging. 2 Hours.
A practical course in arranging for the various small ensembles including keyboard. Review of instrumental ranges and capabilities. Study of current trends in instrumental ranges and arranging. (Typically offered: Irregular)

MUTH 5672. Advanced Orchestration. 2 Hours.
A study of advanced principles of orchestral writing through individual projects in scoring and analysis. Prerequisite: MUTH 4612 or MUTH 5612 (formerly MUTH 4612) or equivalent. (Typically offered: Irregular)

MUTH 568V. Composition. 1-4 Hour.
Private lessons of one-half hour, and one hour of composition laboratory session each week. Development of skills in creative musical expression specifically for composition-theory majors - others admitted by consent. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUTH 5703. Writing Music Analysis. 3 Hours.
(Formerly MUTH 4703.) Analysis of music with an emphasis on analytical writing skills and the use of library source materials. Graduate degree credit will not be given for both MUTH 4703 and MUTH 5703. Prerequisite: MUTH 3603. (Typically offered: Spring)

MUTH 577V. Special Topics in Music Theory. 1-4 Hour.
(Formerly MUTH 477V.) Subject matter not covered in other courses. Graduate degree credit will not be given for both MUTH 477V and MUTH 577V. Prerequisite: Instructor consent. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

MUTH 599V. Independent Study in Music Theory. 1-6 Hour.
Provides students with an opportunity to pursue special study of topics in music theory. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

MUTH 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Nursing (NURS) Courses

NURS 5003. Theoretical and Scientific Foundations for Nursing Practice. 3 Hours.
The course utilizes the critical reasoning process to examine the element of nursing knowledge. Emphasis is placed on concept analysis and the evaluation of nursing theories. Identification of the links between theory and empirical indicators is examined. The clinical relevance of mid-range and practice theories is explored. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Fall)

NURS 5033. Scientific Foundations and Role Development in Advanced Practice Nursing. 3 Hours.
Examines development of the advanced practice nursing role and evolution of the Doctor of Nursing Practice (DNP). Concepts include scientific foundations of practice, role development, interdisciplinary collaborative strategies, advanced scope of practice, patient advocacy, and legal/ethical principles in the advanced practice role. Pre- or Corequisite: NURS 5003. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Fall)

NURS 5043. Concepts of Health Promotion Within Diverse Populations. 3 Hours.
Provides a theoretical base for health promotion, risk reduction and disease prevention at the individual, family and community levels. A cross-disciplinary approach to achieve or preserve health is identified. Focuses on holistic plans and interventions that address the behavioral and social factors that contribute to morbidity and mortality in diverse populations. Provides opportunity to develop, implement, and evaluate health promotion interventions for selected clients. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Fall)

NURS 5053. Evidence-Based Practice and Innovation in Nursing. 3 Hours.
Examines models and strategies for leadership in evidence-based practice and innovation, outcomes management, and translational scholarship. The emphasis of this course is on problem identification, information retrieval, critical appraisal, and synthesis of a body of evidence. It provides the student with the foundation for the DNP evidence-based practice project. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Spring)

NURS 5063. Health Care Policy. 3 Hours.
Provides knowledge and understanding needed to participate in policy development analysis and implementation. Provides and overview of the political process, health care policy, advocacy, leadership roles, legislative and regulatory issues, health care financing, and evaluating outcomes. Access, cost, and quality of health care are major foci in this course. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Summer)

NURS 5073. Curriculum Design and Development in Nursing Education. 3 Hours.
This course provides the essential elements that define and operationalize the process of curriculum design and development. Students will examine curriculum theories, models, and concepts from the perspective of nursing education. They will analyze factors that influence program and curriculum development. Historical and philosophical foundations of nursing practice and educational principles are examined. The application and synthesis of curriculum theory and their application to nursing is emphasized. The role of the educator in the dynamic relationship between the practice setting, research, and curriculum is examined. Students will participate in the design of curriculum which reflects professional nursing practice, standards, theory, and research. Prerequisite: Admission to the Graduate Program or departmental consent. Completion of all general and research core classes or approval of the MSN Education Program Coordinator. (Typically offered: Fall and Spring)

NURS 5083. Methods of Assessment and Evaluation in Nursing Education. 3 Hours.
This course is one of four offered in the nursing education concentration in preparation for the role of educator in academic and clinical settings. Students explore theories, models, and evidence for best practice in assessing learning - including constructing exam items and creating tools for assessing writing assignments. Students discuss grading and other concepts related to assessment and evaluation as it relates to nursing education. Pre- or Corequisite: Completion of NURS 5073 or NURS 5093. Prerequisite: Admission to the Masters of Science in Nursing or the Doctor of Nursing Practice Program. (Typically offered: Summer)
NURS 5093. Instructional Design and Delivery in Nursing Education. 3 Hours.
This course is one of four offered in the nursing education concentration in preparation for the role of educator in academic and clinical settings. Students explore teaching and learning theories and other evidence to guide practice in the advanced role of the educator. Students gain competencies in the knowledge and skills necessary for delivering evidence-based teaching and learning strategies in a variety of learning environments. Prerequisite: Admission to the Graduate Program or departmental consent. (Typically offered: Spring)

NURS 5101. Advanced Health Assessment and Diagnostic Reasoning. 1 Hour.
Applies health assessment, physical examination techniques, clinical decision making, and diagnostic reasoning to formulate a culturally-sensitive, individualized plan of care, which includes health promotion and disease prevention. Corequisite: NURS 5112. (Typically offered: Fall)

NURS 5112. Advanced Health Assessment and Diagnostic Reasoning Clinical Practicum. 2 Hours.
Focus is on the application of clinical decision making, diagnostic reasoning, and advanced physical examination techniques to develop differential diagnoses, problem list, and a plan of care for individual clients. Corequisite: NURS 5101. (Typically offered: Fall)

NURS 5123. Pharmacotherapeutics. 3 Hours.
Provides advanced concepts and application of pharmacology for broad categories of agents used in disease management. Establishes the relationship between pharmacologic agents and physiologic/pathologic responses. It assists students with the development of knowledge and skills to prescribe and manage a client's health in a safe, high quality, and cost-effective manner. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Summer)

NURS 5143. Advanced Pathophysiology. 3 Hours.
Provides a comprehensive understanding of normal physiologic and pathologic mechanisms of disease that serves as a foundation for clinical assessment, decision making, and management of individuals. Includes mechanisms of disease, genetic susceptibility, and immune responses in selected disorders. This course includes concepts of pathophysiology across the lifespan. Prerequisite: Admission to the graduate program or by permission of the instructor. (Typically offered: Summer)

NURS 5272. Clinical Practicum: Interpretive Diagnostic Reasoning. 2 Hours.
Application of principles of pathologic mechanisms of disease, pharmacotherapeutics, and pharmacokinetics to refine and synthesize skills for history taking, physical examination, clinical assessment, diagnostic reasoning, and decision making for adult and geriatric individuals. Pre- or Corequisite: NURS 5101, NURS 5112, NURS 5143 and NURS 5123. (Typically offered: Spring)

NURS 5303. Foundations of Nursing Education. 3 Hours.
Considers the principles, philosophies, theories, and strategies of teaching, learning, and evaluation needed in nursing education. (Typically offered: Fall)

NURS 5313. Curriculum and Evaluation in Nursing Education. 3 Hours.
Considers knowledge and skills needed for curriculum and program development and evaluation for a variety of nursing education settings. (Typically offered: Summer)

NURS 5323. Teaching in Nursing Practicum. 3 Hours.
Supervised experience in the nurse educator role in both classroom and clinical settings. (Typically offered: Fall)

NURS 5332. Common Problems in Acute Care in Adult and Gerontology Populations Clinical Practicum. 2 Hours.
Focuses on the management of adult-gerontology patients with common acute illnesses. Emphasizes the application of principles of pathologic mechanisms of disease, history taking, physical examination, and clinical decision making. Corequisite: NURS 5434. Prerequisite: (Completion of core courses: NURS 5003, NURS 5033, NURS 5043, NURS 5053, NURS 5143, NURS 5063, NURS 5523), and (completion of specialty clinical courses: NURS 5101 and NURS 5112). (Typically offered: Spring)

NURS 5343. Specialty Development I. 3 Hours.
This course will include two foci. There will be readings focused on current topics in a specialty area. A focused field experience will allow student to integrate knowledge and skills in a specialty area of nursing in preparation for the nurse educator role. (Typically offered: Spring)

NURS 5353. Specialty Development II. 3 Hours.
Building on the Independent Study: Specialty Development I, this course will include two foci. There will be readings focused on current topics in a specialty area. A focused field experience will allow student to integrate knowledge and skills in a specialty area of nursing in preparation for the nurse educator role. Prerequisite: NURS 5343. (Typically offered: Fall)

NURS 5403. Scholarly Writing. 3 Hours.
This course will focus on the fundamentals of academic writing at the graduate level with the goal of honing students' critical reading and writing skills. Attention will be given to mechanics, usage, and style, as well as to handling and citing sources. The emphasis throughout is on creative thinking and precise, scholarly writing. Prerequisite: Completion of a baccalaureate degree and acceptance into the graduate program. (Typically offered: Fall and Summer)

NURS 5413. Executive Leadership in Nursing. 3 Hours.
This course focuses on the health care structures and processes, human capital management, health and public policy, communication principles and styles, negotiations, leadership effectiveness, strategic visioning, ethics and advocacy, and innovation. Learning will enable the professional nurse executive to lead complex health care environments applying an advanced skill set in each of the focus areas. Prerequisite: NURS 5403, NURS 5523, NURS 5043, NURS 5053, NURS 5063, MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403. (Typically offered: Spring)

NURS 5423. Health Systems Operations. 3 Hours.
This course focuses on the complex practice environment. Enables the professional nurse leader to demonstrate knowledge of care management and delivery, professional practice environment and models, and quality monitoring and improvement. Professional practice and health care delivery models and settings, role delineation, laws and regulations, accreditation, and professional practice standards will be emphasized. Prerequisite: NURS 5403, NURS 5523, NURS 5043, NURS 5053, NURS 5063, MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403. (Typically offered: Fall)

NURS 5434. Common Problems in Acute Care in Adult and Gerontology Populations. 4 Hours.
Examine principles of pathologic mechanisms of disease, refine skills for history taking, physical examination, and clinical decision making for adult and geriatric individuals with common acute illnesses. Corequisite: NURS 5443. Prerequisite: (Completion of core courses: NURS 5003, NURS 5033, NURS 5043, NURS 5053, NURS 5143, NURS 5063, NURS 5523), and (completion of specialty clinical courses: NURS 5101 and NURS 5112). (Typically offered: Spring)

NURS 5443. Chronic Health Problems in Adult and Gerontology Populations. 3 Hours.
Explores evidence-based models for the management of selected chronic conditions, focusing on assessment and treatment of individuals and families. Utilizes advanced theories, concepts, knowledge, and skill in the care of diverse adult and geriatric populations with complex chronic health problems. Corequisite: NURS 5454. Prerequisite: Completion of NURS 5434, and NURS 5332. (Typically offered: Fall)
NURS 5454. Chronic Health Problems in Adult and Gerontology Populations
Clinical Practicum. 4 Hours.
Focuses on the management of adult-gerontology populations with complex, chronic
health problems. Emphasis is on the application of theoretical concepts, assessment
skills, clinical decision making, and evidence-based standards to formulate
diagnoses, clinical impressions, treatment, and evaluation plans in the acute or
out-patient setting. Pre- or Corequisite: NURS 6123. Corequisite: NURS 5443.
Prerequisite: (Completion of core courses: NURS 5003, NURS 5033, NURS 5043,
NURS 5053, NURS 5143, NURS 5063, NURS 5523), and (completion of specialty
clinical courses NURS 5101, NURS 5112, NURS 5434, and NURS 5332). (Typically
offered: Fall)

NURS 5463. Acute and Critical Illness in Adult and Gerontology Populations. 3
Hours.
Provides an in-depth knowledge of management of acutely and critically ill adults.
Emphasis is on the use of evidence-based knowledge to formulate diagnoses,
treatment, evaluation plans, and referral for adults who have complex acute or
critical health problems, or are at high risk for developing complications. Corequisite:
NURS 5475. Prerequisite: NURS 5101, NURS 5112, NURS 5434, NURS 5332,
NURS 5443, and NURS 5454. (Typically offered: Spring)

NURS 5475. Acute and Critical Illness in Adult and Gerontology Populations
Clinical Practicum. 5 Hours.
Experiences allow the student to apply safe, scientifically sound, cost effective,
legal and ethical management strategies to the care of adults with complex acute
and critical illness. Emphasis is on the development of advanced clinical skills in
acute and critical care settings. Corequisite: NURS 5463. Prerequisite: NURS 5101,
NURS 5112, NURS 5443 and NURS 5454. (Typically offered: Spring)

NURS 5483. Common Problems in Primary Care. 3 Hours.
Examines principles of pathological mechanisms of disease, refines knowledge for
thorough history taking, physical examination, and clinical decision-making for men,
women, and families with common illnesses treated in primary care. Corequisite:
NURS 5495. Prerequisite: NURS 5101, NURS 5112, NURS 5443, and NURS 5683.
(Typically offered: Fall)

NURS 5495. Common Problems in Primary Care Clinical Practicum. 5 Hours.
Clinical component to 5483 Common Problems Primary Care. Refines skills for
thorough history taking, physical examination, and clinical decision-making for men,
women, and families with common illnesses treated in primary care. Pre- or
Corequisite: NURS 5483. Prerequisite: NURS 5101, NURS 5112, NURS 5443, and
NURS 5683. (Typically offered: Spring)

NURS 5523. Healthcare Informatics. 3 Hours.
Explores standards and principles for selecting, using, and evaluating information
systems. Discusses the application of computer programs relevant to nursing
administration, education, research, and practice. Assists the student in managing
individual and aggregate information, and assessing the efficacy of patient care
technology appropriate to a specialized area of nursing practice. Prerequisite:
Admission to the graduate program or by permission of the instructor. (Typically
offered: Fall)

NURS 5543. Primary Care of Children. 3 Hours.
Focuses on evidence-based models for the management of children from diverse
cultures with common conditions in primary care. Includes anticipatory guidance,
health promotion, and disease prevention. Emphasis on application of theoretical
concepts, assessment skills, clinical decision-making, and evidence-based
standards to formulate differential diagnoses, clinical impressions, treatment, and
evaluation plans in primary care. Corequisite: NURS 5683. Prerequisite: NURS 5101
and NURS 5112. (Typically offered: Spring)

NURS 5553. Specialty Development I: Nurse Executive Leader. 3 Hours.
This course will focus on microsystem level operations within the healthcare
environment and issues faced by nurse administrators. Learning will enable the
professional nurse to participate in operations surrounding the delivery of care in
various health care organizations. This course will facilitate the application of learned
theories and organizational principles. Prerequisite: NURS 5403, NURS 5523,
NURS 5503, NURS 5063, MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403.
(Typically offered: Fall)

NURS 5563. Specialty Development II: Nurse Executive Leader. 3 Hours.
Students will complete a scholarly project or thesis synthesizing knowledge and
skills from previous courses in program of study. Applied learning will focus on the
development of a systems approach to nurse executive leadership and inquiry.
Focus is on public and private health care delivery systems, alliances with internal
and external environments, and strategic decision making and implementation
in the rapidly evolving global arena of nursing leadership and practice. This
course prepares professional nurses to apply leadership and evidence-based
practice principles in the evaluation of quality processes encountered across health
care industries. 135 contact hours. Corequisite: NURS 579V and NURS 600V.
Prerequisite: NURS 5403, NURS 5523, NURS 5043, NURS 5053, NURS 5063,
MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403, NURS 5343, NURS 5553, and
NURS 5423. (Typically offered: Spring)

NURS 5583. Primary Care of Children Clinical Practicum. 3 Hours.
NURS 5583 is the clinical component to NURS 5543 and focuses on the
management of women and children in the clinical setting with emphasis on holistic
assessment and treatment of these populations and their families. Students will
engage in the assessment, diagnosis and treatment of conditions common to
primary practice in women’s health and pediatric clinics. This course will consist of
135 contact hours, 80 in the pediatric setting and 55 in the women’s health setting.
Corequisite: NURS 5543. Prerequisite: NURS 5101 and NURS 5112. (Typically
offered: Spring)

NURS 579V. Independent Study. 1-3 Hour.
Independent study designed by student with faculty advisor. May be completed as
alternative to thesis. (Typically offered: Fall, Spring and Summer)

NURS 5873. Complex Problems in Primary Care. 3 Hours.
Focuses on application of health promotion and chronic disease management in
complex adult patients. Students will utilize evidence-based approaches to
health promotion, assessment, differential diagnosis and disease management.
Emphasizes clinical decision making, chronic care models, coordination of care,
poly-drug therapy and information systems. Corequisite: NURS 5884. Prerequisite:
NURS 5101, NURS 5112, NURS 5543, NURS 5683, and NURS 5495. (Typically
offered: Spring)

NURS 5884. Complex Problems in Primary Care Clinical Practicum. 4 Hours.
Clinical component to NURS 5873 Complex Problems in Primary Care. Offers
the student an opportunity to exercise critical judgment and implement theoretical
knowledge in the management of care of adults experiencing complex health
problems. Corequisite: NURS 5873. Prerequisite: NURS 5101, NURS 5112,
NURS 5683, NURS 5495, and NURS 5483. (Typically offered: Spring)

NURS 598V. Nursing Special Topics. 1-6 Hour.
Special Topics course to fulfill national accrediting body for Family Nurse
Practitioner. Prerequisite: NURS6DP major. (Typically offered: Irregular) May be
repeated for up to 6 hours of degree credit.

NURS 599V. Seminar. 1-3 Hour.
Selected topics in nursing explored in discussion format. (Typically offered: Irregular)

NURS 600V. Master’s Thesis. 1-3 Hour.
Student research to fulfill degree requirement for the MSN. Prerequisite:
NURS 5053. (Typically offered: Fall, Spring and Summer) May be repeated for
degree credit.
NURS 6123. Evaluation Methods and Translational Research for Evidence-based Practice. 3 Hours.  
The translation of evidence into practice, including theoretical and practical challenges, is analyzed through the use of case studies and proposals. Uses methods of inquiry for systematic appraisal of nursing practice or healthcare programs to identify practice outcomes and create an environment to support and sustain changes. Pre- or Corequisite: ESRM 6403. Prerequisite: NURS 5053.  
(Typically offered: Fall)

NURS 6224. DNP Clinical Practicum I. 4 Hours.  
Provides an opportunity to synthesize advanced knowledge and role behaviors within a specialty concentration. Designed to apply nursing theory, translational research, epidemiologic principles, ethical/legal principles, outcome evaluations, healthcare systems thinking, and economics into a specialized clinical practice role and setting. Depending upon specialty and experience, may require travel to campus. Prerequisite: Completion of NURS 5443, NURS 5454, NURS 5463, and NURS 5475; or by permission of the instructor.  
(Typically offered: Summer)

NURS 6223. Healthcare Economics and Finance. 3 Hours.  
Provides economic, financial, and business knowledge and skills required for a leadership role in financial planning and decision making within healthcare delivery systems. Prerequisite: Admission to the graduate program or by permission of the instructor.  
(Typically offered: Spring)

NURS 6244. DNP Clinical Practicum II. 4 Hours.  
Allows for the continuation of specialty role development and an advanced approach to care delivery, systems thinking, and leadership. Allows for the total number of practice hours required for certification and/or degree. Prerequisite: NURS 6224.  
(Typically offered: Fall)

NURS 6263. Organization Management and Systems Leadership. 3 Hours.  
Facilitates understanding of how to lead, advocate, and manage innovative responses to organizational needs and challenges. Emphasizes development and evaluation of care delivery models that meet the needs of targeted patient populations by enhancing accountability for effective and efficient healthcare, quality improvement, and patient safety. Prerequisite: Admission to the graduate program or by permission of the instructor.  
(Typically offered: Summer)

NURS 628V. DNP Clinical Practicum III. 1-3 Hours.  
Allows for the continuation of specialty role development and an advanced approach to care delivery, systems thinking, and leadership. Allows for the total number of practice hours required for certification and/or degree. Pre- or Corequisite: NURS 6244.  
(Typically offered: Spring) May be repeated for up to 8 hours of degree credit.

NURS 6343. Analytic Methods and Epidemiology for Health Care. 3 Hours.  
This course will examine the role of epidemiology and statistics in advanced nursing practice. The student will learn how the concepts of epidemiology are used to measure and describe the health of individuals and populations and apply statistical concepts and analytical methods to data encountered in practice. Major topics to be covered include sources of data, study designs, analytical strategies and interpretation of data related to disease causality, risk, and prevalence. Prerequisite: ESRM 5393.  
(Typically offered: Fall and Summer)

NURS 7113. Capstone Seminar I. 3 Hours.  
Designed to unify and organize the student’s field of inquiry for the final Capstone Project. Emphasis is on the application of an evidence-based intervention suitable to their area of focus that involves appropriate methodology and application with the goal for change in practice or outcome analysis. Prerequisite: Completion of NURS 6224 and/or permission of the instructor.  
(Typically offered: Fall)

NURS 7122. DNP Project Implementation I. 2 Hours.  
Provides necessary support and elements for students to begin execution of the Capstone Project in collaboration with the sponsoring site.  
(Typically offered: Fall)

NURS 7132. Capstone Seminar II. 2 Hours.  
Focuses on data exploration and analysis for the organization and refinement of all aspects of Capstone Project, emphasizing implementation and evaluation of the evidence-based intervention. Allows student to finalize the scholarly written and oral report for dissemination of results. Corequisite: NURS 7113 and NURS 7122.  
(Typically offered: Spring)

NURS 7142. DNP Project Implementation II. 2 Hours.  
Provides an avenue for students to showcase the Final Capstone Project. Allows students the opportunity to synthesize and demonstrate the ability to employ effective communication and collaboration skills, leadership roles, influence healthcare quality and safety, evaluate practice, and successfully negotiate change in healthcare delivery for individuals, families, populations, or systems. Prerequisite: NURS 7122.  
(Typically offered: Spring)

Operations Management (OMGT) Courses

OMGT 5003. Introduction to Operations Management. 3 Hours.  
Provides an overview of the functional activities necessary for the creation/delivery of goods and services. Topics covered include: productivity; strategy in a global business environment; project management; quality management; location and layout strategies; human resources management; supply chain and inventory management; material requirements planning; JIT; maintenance and reliability; and other subjects relevant to the field. Required course. Pre- or Corequisite: OMGT 4853. Prerequisite: OMGT 4333, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. MSE or MSEM students may take the course with advisor consent.  
(Typically offered: Fall and Spring)

OMGT 5013. Supply Chain Management for Operations Managers. 3 Hours.  
Focuses on the development and application of decision models in supply chains with emphasis on supply chain performance, cost, and metrics; demand forecasting; aggregate planning; inventory management; supply chain design and distribution; transportation modeling and analysis; supply chain coordination; the role of information technology; and sourcing decisions. Spreadsheet tools and techniques will be used to analyze supply chain performance. Prerequisite: OMGT 4333, OMGT 4853 and admitted to OPMGMS, EMGTMS, ENGRME or OMPMGC Graduate Certificate Program, or departmental consent.  
(Typically offered: Fall, Spring and Summer)

OMGT 5113. Human Resource Management. 3 Hours.  
A review of Human Resources Management functions as they apply in today’s business setting with specific emphasis on regulatory compliance, total rewards systems, recruitment, training, and employment practices. The course is designed both for HR professionals and for line managers/professionals who need to understand the roles and responsibilities of HR as a business partner. Prerequisite: OMGT 4313, OMGT 5003 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.  
(Typically offered: Fall, Spring and Summer)

OMGT 5123. Finance for Operations Managers. 3 Hours.  
Examines the scope and environment of finance for operations managers. Topics include financial markets, interest rates, financial statements, cash flows, and performance evaluation. Valuation of financial assets, using time value of money; the meaning and measurement of risk/return; capital-budgeting, cost of capital, capital structure, dividend policy, and working capital management are also covered. Required course (may substitute OMGT 5463). Pre- or Corequisite: OMGT 5003.  
Prerequisite: OMGT 4323, OMGT 4853 and admitted to OPMGMS, EMGTMS, ENGRME, or OMPMGC Graduate Certificate Program, or departmental consent.  
(Typically offered: Fall, Spring and Summer)
OMGT 5133. Operations Management in the Service Sector. 3 Hours.
Review of the role of the operations management in the service sector, e.g., health care services, banking, municipal services, utilities, and postal service and others. Emphasizes the principles and methodologies applicable to the solution of problems within the service industries. Pre- or Corequisite: OMGT 5003. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5143. Strategic Issues in Human Resource Management. 3 Hours.
Explores the concept of Strategic Human Resource Management with emphasis on effective partnering by various HR functions with all levels of management to support the large-scale, long-range goals of achieving success in the organization’s chosen markets. Internal and external impacts on and of HR in all areas will be examined. Students will analyze case studies to build on basic concepts acquired in OMGT 5113. Prerequisite: OMGT 5003, OMGT 4313, OMGT 5113 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5253. Leadership Principles and Practices. 3 Hours.
The course is designed to expose students to multiple approaches to leadership in a wide variety of settings. Leadership styles, the knowledge areas and competencies expected of today’s leaders, the challenges leaders face, the historical and philosophical foundations of leadership, the relationships among leadership theory, leadership practice, and the moral-ethical aspects of leadership are among the topics covered in the course. A number of respected regional, national, and international leaders share “lessons learned” in their leadership journeys. Plus, a number of highly regarded leadership books and case studies on leadership are read and discussed. Students may not receive credit for INEG 4253 and INEG 5253/OMGT 5253. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Fall, Spring and Summer)

This course is cross-listed with INEG 5253.

OMGT 5303. Health Care Policies and Issues. 3 Hours.
Explores health care management strategies and policy development with emphasis on health insurance, Medicare, Medicaid and managed care, as well as employee health benefits. The roles of government and business in policy formulation are addressed, as are the problems of financing health care, legal and ethical considerations, current healthcare issues, and quality measures. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5373. Quality Management. 3 Hours.
Introduces students to quality management concepts and their use in enhancing organizational performance and profitability. History of the quality movement, its philosophical foundations of leadership, the relationships among leadership theory, leadership practice, and the moral-ethical aspects of leadership are among the topics covered in the course. A number of respected regional, national, and international leaders share “lessons learned” in their leadership journeys. Plus, a number of highly regarded leadership books and case studies on leadership are read and discussed. Students may not receive credit for INEG 4253 and INEG 5253/OMGT 5253. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Fall, Spring and Summer)

OMGT 5403. Industrial Safety and Health Administration. 3 Hours.
Based on Federal Regulations for Occupational Safety and Health, the course examines current regulations, as well as their commonsense application. Covers various standards, such as those for material handling, personal protective equipment, toxic substances, and machine guarding. Uses case studies and real world scenarios to present topics and demonstrate their application. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5423. Operations Management & Global Competition. 3 Hours.
Studies of principles and cases in business/industrial administration in global competition. Survey of markets, technologies, multi-national corporations, cultures, and customs. Discussion of ethics, professionalism, difference valuing, human relations skills, and other topics relevant to global practice. Pre-or Corequisite: OMGT 5003. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Spring)

OMGT 5433. Cost Estimation Models. 3 Hours.
An examination of the methodologies for estimating and forecasting manufacturing costs. Types of cost recovery systems, work progress functions, product improvement curves, determination of hourly rates, parametric estimating systems, and the development of software for computer-assisted estimating systems. Pre- or Corequisite: OMGT 5003. Prerequisite: INEG 3513 or OMGT 4853, OMGT 4323 and OMGT 4333, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

This course is cross-listed with INEG 5433.

OMGT 5443. Decision Models. 3 Hours.
Focus on quantitative decision models for technical and managerial problems for private and public organizations. Topics include shareholder value, stakeholder value, Value-Focused Thinking, axioms of decision analysis, decision making challenges, decision traps, cognitive biases, decision processes, decision framing, influence diagrams, value hierarchy structuring, designing creative alternatives, single objective models, multiobjective additive value model, swing weights, sensitivity analysis, portfolio decision models with binary linear programming, probability elicitation, Bayes Theorem, decision trees, Monte Carlo simulation, expected value, dominance (deterministic and stochastic), tornado diagrams, value of information, risk preference, utility models, expected utility, and communicating analysis insights. Prerequisite: (OMGT 5003, OMGT 4333, and OMGT 4853) or INEG 2313, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

This course is cross-listed with INEG 5443.

OMGT 5463. Economic Decision Making. 3 Hours.
Principles of economic analysis with emphasis upon discounted cash flow criteria for decision-making. Comparison of criteria such as rate of return, annual cost, and present worth for the evaluation of investment alternatives. Required course (may be substituted by OMGT 5123). Prerequisite: OMGT 5003, OMGT 4323 and OMGT 4853, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)
OMGT 5473. Lean Six Sigma. 3 Hours.

This course covers the application of lean principles to manufacturing, service and government processes in order to improve productivity, increase value and eliminate waste as well as the use of the Six Sigma problem solving methodology to reduce variation and improve quality. Students will gain experience with the tools and analysis methods used in both approaches. The topics covered include: methods for creating Lean processes, proven lean problem-solving methodologies, managing a lean transformation, implementing a Six Sigma initiative, and executing the five phases of the Six Sigma DMAIC process, and communicating results to stakeholders and decision-makers. Prerequisite: (OMGT 5003 or departmental consent), and admitted to the (Master of Science in Operations Management Program, or the Project Management Graduate Certificate Program, or be a non-degree seeking graduate student with departmental consent). (Typically offered: Fall, Spring and Summer)

OMGT 5493. Advanced Lean Six Sigma. 3 Hours.

With an emphasis on application, this course builds upon the Lean Six Sigma and Quality Management courses and covers analysis techniques for Lean Six Sigma problem solving in the Analyze, Improve, and Control phases of the DMAIC process. The topics covered include descriptive versus inferential statistics, sampling, Hypothesis Testing with Normal and Non-Normal Data, regression analysis, design of experiments, and control charts. Prerequisite: OMGT 5473 and OMGT 5373. (Typically offered: Fall, Spring and Summer)

OMGT 5503. Maintenance Management. 3 Hours.

Principles and practices of maintenance department organization, prevention procedures, and typical equipment problems. Includes related topics such as plant protection, preventative and plant maintenance. Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4333 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5613. Lean Production and Inventory Control. 3 Hours.

Defines analytical methods used to support inventory replenishment for the production of goods and services. Operational problems of production systems are examined, including objective/subjective forecasting methods, aggregate planning of work force and production under seasonal demand; and inventory models of EOQ for known and unknown demand. Supply chain management and lean manufacturing concepts are also discussed. Prerequisite: OMGT 4333 and OMGT 5003, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5623. Strategic Management. 3 Hours.

Examines strategic management, which is defined as the art and science of formulating, implementing, and evaluating cross-functional decisions that enable an organization to achieve its long-term objectives. Principles of strategic management will be covered in conjunction with case studies to provide opportunity for analysis and experience in applying these principles in an operations management environment. Required course. Prerequisite: OMGT 5003 and OMGT 4313, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5633. Linkages among Technology, Economics and Societal Values. 3 Hours.

Addresses how macro-level change is influenced by the linkages among technology, economics and societal values. Three major course initiatives: 1) Developing a conceptual model for understanding how macro-level change has occurred over history; 2) Examining recorded history in order to develop a contextual appreciation for Society's current situation; and 3) Using statistical data to identify six overriding world trends that are likely to greatly impact society's goal of achieving sustainable prosperity and well being in the foreseeable future. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

This course is cross-listed with BENG 5633.

OMGT 5653. Introduction to Data Analytics for Operations Managers. 3 Hours.

Introduces data science and data analytics. Provides basic skill instruction in the statistical data analysis programming language R. Provides experience building and interpreting descriptive and predictive data analytics models. Provides operations managers with the skill and tools to use and understand advanced data analytics methods. Provides practice communicating those results to senior stakeholders and decision makers. Prerequisite: OMGT 5003 or EMGT 5033, must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5673. Principles of Operations Research. 3 Hours.

Surveys the mathematical models used to design and analyze operational systems. Includes linear programming models, waiting line models, computer simulation models, and management science. Students will be introduced to applications of operations research and solution methods, using spreadsheet software. Pre- or Corequisite: OMGT 5003 and OMGT 4853. Prerequisite: OMGT 4333 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5733. Human Behavior Analysis. 3 Hours.

Examination of the principal drivers of individual and group behavior in organizations with coverage of practical applications of concepts in organizational behavior for operations managers. In addition to group behavior and organizational processes, the course explores people management challenges that result from external pressures on stakeholders (e.g. competitive, economic, social, political, and regulatory impacts). Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4313 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 577V. Special Problems. 1-3 Hour.

Application of previous course work knowledge to problems encountered in military base and civilian operations. Problems are proposed by students according to individual interests and needs. Used for courses in specific concentration, certificate or focus areas with parenthetical titles. Maybe used for courses in development. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.
OMGT 5783. Project Management for Operations Managers. 3 Hours.
An introduction to the Critical Path Method and Program Evaluation and Review Technique. Covers project planning and control methods; activity sequencing; time-cost trade-offs; allocation of manpower and equipment resources; scheduling activities and computer systems for PERT/CPM with emphasis on MS project. Case studies include topical issues combining methodologies and project management soft skills, such as conflict management, negotiation, presentations to stakeholders, and team building. Required course. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5793. Risk Management. 3 Hours.
Students will learn to apply tools to identify, assess, communicate and manage risk. Course work includes methods to identify risks, develop risk models, assess risk, and evaluate risk management options. Case studies are used to understand risk management challenges in systems development in complex organizations. Prerequisite: OMGT 5003 or OMGT 5033, must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5823. Information Technology for Operations Managers. 3 Hours.
Information Technology for the management and control of information systems and processes used in operations management. Topics covered include e-Business and e-Commerce Systems, Management Information Systems (MIS), Data Resource Management, Networking, Decision Support, Information Security, Enterprise and Global IT, and IT Strategies and Solutions for Operations Managers. Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4853 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5833. Decision Support Application Development for Operations Management. 3 Hours.
Students will utilize Microsoft Excel and will write programming code in Visual Basic for Applications to develop custom solutions to challenging operations management problems. Emphasis will be placed on computing productivity in a spreadsheet-based setting to develop practical, useful decision support applications and computer programs to support operations management. Assumes basic knowledge of programming. Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4853 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5873. Organizing for Change. 3 Hours.
Provides an overview of fundamental management functions, organizational decision-making authority, structures and controls to support managing change. Topics include leadership, strategy and ethical perspectives on change management. Pre- or Corequisite: OMGT 5003. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5903. Operations Management of Unmanned Aircraft Systems. 3 Hours.
Course focuses on the fundamentals of UAS operations and the applications of UAS systems in research, government and business applications. Modules cover government compliance, licensing/certification requirements, University Policy and current events in the UAS field. Prepares students to participate in research or UAS operational roles. Discusses policy and process issues in society and considerations for ethical UAS use. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 5933. Cybersecurity for Operations Managers. 3 Hours.
The cybersecurity for operations managers course introduces strategic and tactical processes to implement the National Institute of Standards and Technology (NIST) Risk Management Framework (RMF). Additionally, the Body of Knowledge for the American Society of Industrial Security is applied to each process and procedure. Managers and Leaders responsible for cybersecurity, with or without an IT background, are provided a logical RMF to establish an effective cybersecurity program in their organization. (Typically offered: Fall, Spring and Summer)

OMGT 5983. Advanced Project Management. 3 Hours.
This course builds upon the project management for operations managers' course and offers students an opportunity to apply advanced project management tools to manage troubled projects. Topics include determining the project status using the schedule baseline, cost estimations, and earned value management techniques. Students will learn how to perform a project assessment/audit and will create a troubled project recovery plan. The course includes presentations of case study assignments to gain experience in communicating the status and recovery of failed and troubled projects. Prerequisite: OMGT 5783 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Fall, Spring and Summer)

OMGT 5993. Homeland Security for Operations Managers. 3 Hours.
Introduces concepts of Homeland Security in industry and government settings. Covers basic legal and compliance programs and risk management processes. Explains the continuity between critical infrastructure, government and private sector roles. Focuses on system design and understanding of the National Incident Management System protecting the homeland. Introduces cybersecurity and intelligence analysis concepts. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. (Typically offered: Irregular)

OMGT 600V. Master's Thesis. 1-6 Hour.
Master's thesis option for OMGT students. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Philosophy (PHIL)

Courses
PHIL 5003. Ancient Greek Philosophy. 3 Hours.
(Formerly PHIL 4003.) Pre-Socratics, Socrates, Plato, and Aristotle. Graduate degree credit will not be given for both PHIL 4003 and PHIL 5003. Prerequisite: Three hours of philosophy coursework. (Typically offered: Fall)

PHIL 5013. Platonism and Origin of Christian Theology. 3 Hours.
(Formerly PHIL 4013.) The study of Plato, Middle Platonism, and Neoplatonism, including Philo, Plotinus, and Proclus, and the influence of Platonism on the Greek church fathers of the 2nd-5th centuries, principally Origen and Gregory of Nyssa and also Pseudo-Dionysius. Graduate degree credit will not be given for both PHIL 4013 and PHIL 5013. Prerequisite: Three hours of philosophy coursework. (Typically offered: Irregular)

PHIL 5023. Medieval Philosophy. 3 Hours.
(Formerly PHIL 4023.) Includes Augustine, Bonaventure, Aquinas, Scotus, and Ockham. Graduate degree credit will not be given for both PHIL 4023 and PHIL 5023. (Typically offered: Irregular)

PHIL 5033. Modern Philosophy-17th and 18th Centuries. 3 Hours.
(Formerly PHIL 4033.) British and Continental philosophy, including Bacon, Descartes, Spinoza, Leibniz, Hobbes, Locke, Berkeley, Hume, and Kant. Graduate degree credit will not be given for both PHIL 4033 and PHIL 5033. (Typically offered: Spring)
PHIL 5043. Nineteenth Century Continental Philosophy. 3 Hours.
(Formerly PHIL 4043.) Study of major Continental European philosophers of the 19th century including Hegel, Marx, Kierkegaard, Schopenhauer, Nietzsche. Emphasis on the nature of persons, the question of freedom, and the importance of self-expression, as well as views on knowledge, reality, and the nature of philosophy. Graduate degree credit will not be given for both PHIL 4043 and PHIL 5043. Prerequisite: 3 hours of Philosophy. (Typically offered: Irregular)

PHIL 5063. Twentieth Century Continental Philosophy. 3 Hours.
(Formerly PHIL 4063.) Study of major figures (e.g. Husserl, Heidegger, Sartre, Foucault, Derrida) and trends (phenomenology, existentialism, hermeneutics, critical theory, deconstruction) in 20th century French and German thought. Topics include human beings and their place in the world, the role of history and culture, and the possibility of critical reflection. Graduate degree credit will not be given for both PHIL 4063 and PHIL 5063. (Typically offered: Irregular)

PHIL 5073. History of Analytic Philosophy. 3 Hours.
(Formerly PHIL 4073.) From Frege to recent figures, including Russell, Moore, Wittgenstein, Schlick, Carnap, Ayer, Ryle, Strawson, Quine, including a representative sample of works on the logical analysis of language, logical positivism, and ordinary language analysis. Graduate degree credit will not be given for both PHIL 4073 and PHIL 5073. Prerequisite: 3 hours of philosophy. (Typically offered: Irregular)

PHIL 5093. Special Topics in Philosophy. 3 Hours.
(Formerly PHIL 4093.) This course will cover subject matter not covered in regularly offered courses. Graduate degree credit will not be given for both PHIL 4093 and PHIL 5093. Course cannot be repeated when topic is the same as one for which the student has been previously enrolled. (Typically offered: Irregular) May be repeated for degree credit.

PHIL 5103. Modern Jewish Thought. 3 Hours.
(Formerly PHIL 4103.) A survey of the main trends in Jewish thought from the seventeenth through the nineteenth century. Graduate degree credit will not be given for both PHIL 4103 and PHIL 5103. (Typically offered: Irregular)

PHIL 5113. Social and Political Philosophy. 3 Hours.
(Formerly PHIL 4113.) Selected philosophical theories of society, the state, social justice, and their connections with individuals. Graduate degree credit will not be given for both PHIL 4113 and PHIL 5113. (Typically offered: Irregular)

PHIL 5123. Classical Ethical Theory. 3 Hours.
(Formerly PHIL 4123.) Study of classical texts in the history of philosophical ethics from Plato to Nietzsche. Philosophers covered may include Plato, Aristotle, Butler, Hume, Kant, and Mill. Graduate degree credit will not be given for both PHIL 4123 and PHIL 5123. Prerequisite: 3 hours of philosophy. (Typically offered: Irregular)

PHIL 5133. Contemporary Ethical Theory. 3 Hours.
(Formerly PHIL 4133.) A study of contemporary texts in philosophical ethics from G.E. Moore to the present. Philosophers covered may include Moore, Stevenson, Hare, Foot, and Rawls. Graduate degree credit will not be given for both PHIL 4133 and PHIL 5133. Prerequisite: 3 hours of philosophy. (Typically offered: Irregular)

PHIL 5143. Philosophy of Law. 3 Hours.
(Formerly PHIL 4143.) A philosophical consideration of the nature of law, theory of adjudication, concepts of legal responsibility, liberty and the limits of law, and selected moral-legal issues (abortion, affirmative action, punishment, etc.). Graduate degree credit will not be given for both PHIL 4143 and PHIL 5143. (Typically offered: Irregular)

PHIL 5183. Kant’s Critique of Pure Reason. 3 Hours.
(Formerly PHIL 4183.) In his Critique of Pure Reason, one of the most important works in the history of philosophy, Kant describes how the mind works and claims to solve the major problems of metaphysics. The course is aimed at coming to a basic understanding of Kant’s thought and at thinking critically about his claims. Graduate degree credit will not be given for both PHIL 4183 and PHIL 5183. (Typically offered: Irregular)

PHIL 5203. Theory of Knowledge. 3 Hours.
(Formerly PHIL 4203.) An examination of skepticism, the nature and structures of knowledge and epistemic justification, human rationality, and the justification of religious belief. Graduate degree credit will not be given for both PHIL 4203 and PHIL 5203. Prerequisite: 3 hours of philosophy. (Typically offered: Irregular)

PHIL 5213. Philosophy of Science. 3 Hours.
(Formerly PHIL 4213.) Examination of issues related to scientific explanation, empirical foundations of science, observation and objectivity, nature of laws and theories, realism and instrumentalism, induction and confirmation, models, causation, and simplicity, beginning with historical survey set in the context of the history of science but emphasizing works from the 1930s to the current period, often including issues in recent physics. Graduate degree credit will not be given for both PHIL 4213 and PHIL 5213. (Typically offered: Irregular)

PHIL 5233. Philosophy of Language. 3 Hours.
(Formerly PHIL 4233.) A survey of mainstream philosophical theories of meaning, reference, truth, and logical form. Attention given to the views of such figures as Frege, Russell, Tarski, Searle, Dumett, and the advocates of possible world’s semantics. Graduate degree credit will not be given for both PHIL 4233 and PHIL 5233. (Typically offered: Irregular)

PHIL 5253. Symbolic Logic I. 3 Hours.
(Formerly PHIL 4253.) Rigorous analyses of the concepts of proof, consistency, equivalence, validity, implication, and truth. Full coverage of truth-functional logic and quantification theory (predicate calculus). Discussion of the nature and limits of mechanical procedures (algorithms) for proving theorems in logic and mathematics. Informal accounts of the basic facts about infinite sets. Graduate degree credit will not be given for both PHIL 4253 and PHIL 5253. Prerequisite: PHIL 2203 or MATH 2663. (Typically offered: Fall)
This course is cross-listed with MATH 5263.

PHIL 5303. Philosophy of Religion. 3 Hours.
(Formerly PHIL 4303.) Types of religious belief and critical examination of their possible validity, including traditional arguments and contemporary questions of meaning. Graduate degree credit will not be given for both PHIL 4303 and PHIL 5303. (Typically offered: Irregular)

PHIL 5313. Contemporary Jewish Thought. 3 Hours.
(Formerly PHIL 4313.) A survey of trends in Jewish thought in the twentieth and twenty-first centuries, focusing on the ways in which Jewish thinkers have responded to the events affecting Jews and the conditions of Jewish life from approximately 1900 to the present. Graduate degree credit will not be given for both PHIL 4313 and PHIL 5313. (Typically offered: Irregular)

PHIL 5403. Philosophy of Art. 3 Hours.
(Formerly PHIL 4403.) Varieties of truth and value in the arts and aesthetic experience, focusing on the creative process in the art and in other human activities. Graduate degree credit will not be given for both PHIL 4403 and PHIL 5403. (Typically offered: Spring)

PHIL 5423. Philosophy of Mind. 3 Hours.
(Formerly PHIL 4423.) An examination of such topics as the relationship between mind and body, the mentality of machines, knowledge of other minds, the nature of psychological explanation, the relationships between psychology and the other sciences, mental representation, the nature of the self, and free will and determinism. Graduate degree credit will not be given for both PHIL 4423 and PHIL 5423. (Typically offered: Irregular)

PHIL 5503. Metaphysics. 3 Hours.
(Formerly PHIL 4603.) Theory and critical analysis of such basic metaphysical problems as mind and body, universals and particulars, space and time, determinism and free will, self-identity and individualism, with emphasis on contemporary perspectives. Graduate degree credit will not be given for both PHIL 4603 and PHIL 5603. Prerequisite: 3 hours of philosophy. (Typically offered: Irregular)
PHIL 5823. Seminar: Spinoza. 3 Hours.
Seminar: Spinoza (Typically offered: Irregular)

PHIL 5883. Seminar: Wittgenstein. 3 Hours.
Seminar: Wittgenstein (Typically offered: Irregular)

PHIL 5933. Seminar: Philosophical Theology. 3 Hours.
Seminar: Philosophical Theology (Typically offered: Irregular)

PHIL 5983. Philosophical Seminar. 3 Hours.
Various topics and issues in historical and contemporary philosophy. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

PHIL 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PHIL 690V. Graduate Readings. 1-6 Hour.
Supervised individual readings in historical and contemporary philosophy. (Typically offered: Fall, Spring and Summer)

PHIL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

**Physical Education (PHED) Courses**

PHED 5243. Sport Skill Assessment and Instructional Strategies. 3 Hours.
The focus of this course is practical assessment techniques and instructional strategies in the area of sport and physical education activities. (Typically offered: Summer Odd Years)

PHED 5253. The Physical Education Curriculum. 3 Hours.
Principles, problems, procedures, and the influence of educational philosophy on programs in physical education and their application in the construction of a course of study for a specific situation. (Typically offered: Fall Even Years)

PHED 5273. Professional Issues in Physical Education and Sport. 3 Hours.
a review of contemporary research literature informing effective teaching practices in physical education settings. Students gain experience in critically reviewing literature and discussing current issues. (Typically offered: Fall Even Years)

PHED 5313. Risk Management in Physical Education & Athletics. 3 Hours.
This course is designed to provide opportunities for the student to acquire an understanding of how to reduce the risk of injuries and eliminate hazards that may contribute to injuries associated with physical education and athletics. (Typically offered: Summer Even Years)

PHED 5553. Scientific Principles of Movement and Performance. 3 Hours.
This course focuses on theoretical information about sport biomechanics and movement principles, with practical applications to the physical education of coaching profession. (Typically offered: Summer Odd Years)

PHED 5643. Motor Learning. 3 Hours.
Concepts of motor learning and control are presented. Attention is given to an analysis of the literature in movement control, motor behavior, and motor learning. (Typically offered: Fall and Spring)

PHED 5753. Sport Psychology. 3 Hours.
Investigation of historical and contemporary research in sport psychology. (Typically offered: Fall and Summer)

PHED 5803. Measurement Concepts for K-12 Physical Education Teachers. 3 Hours.
This course focuses on techniques that physical education teachers can use to monitor student progress in a K-12 environment. (Typically offered: Summer)

PHED 6363. Supervision in Physical Education. 3 Hours.
The focus of this course is instructional supervision as a set of complex processes in which the supervisor works within accepted guidelines and functions to effectively supervise a teacher's pedagogical development. The Physical Education Instructional Supervision (PEIS) Model will be used to help facilitate this process. (Typically offered: Fall Odd Years)

PHED 6723. Project Implementation and Data Analysis. 3 Hours.
This course is designed to expose students to the rigors of research and will be the culminating experience of their degree program. The students will spend the majority of time developing a research topic. The research topic will be expanded into a complete research study in which the students will seek approval from the University of Arkansas IRB committee to conduct the study and then collect data. The data will be analyzed and presented at the conclusion of the class. (Typically offered: Spring and Summer)

**Physics (PHYS) Courses**

PHYS 500V. Laboratory and Classroom Practices in Physics. 1-3 Hour.
The pedagogy of curricular materials. Laboratory and demonstration techniques illustrating fundamental concepts acquired through participation in the classroom as an apprentice teacher. (Typically offered: Fall) May be repeated for up to 3 hours of degree credit.

PHYS 5011. Introduction to Current Physics Research Seminar. 1 Hour.
This seminar course introduces new Physics graduate students to the faculty of the Physics department and their current research efforts. In addition, the students will be introduced to scientific ethics, and learn communication skills. (Typically offered: Fall)

PHYS 502V. Individual Study in Advanced Physics. 1-4 Hour.
Guided study in current literature. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

PHYS 5041. Journal Club Seminar. 1 Hour.
In this seminar, the students will present talks based on published research articles. The goal of the course is to develop oral communication skills in the students. Effective literature search techniques will also be covered. (Typically offered: Spring)

PHYS 5073. Mathematical Methods for Physics. 3 Hours.
This course merges the mathematics required in classical mechanics, electromagnetostatics, and quantum mechanics into a single course. The goal is to develop physics problem-solving skills, a strong mathematical foundation, and a more unified picture of physics. (Typically offered: Fall)

PHYS 5083. Mathematical Methods of Physics II. 3 Hours.
Applications of matrices, tensors, and linear vector spaces to problems in physics. Introduction to groups and their representations, and symmetry principles in modern physics. Prerequisite: PHYS 5073. (Typically offered: Irregular)

PHYS 5093. Applications of Group Theory to Physics. 3 Hours.
Application of group theory to topics in physics, especially to atomic/molecular and solid-state physics. Prerequisite: PHYS 5073. (Typically offered: Irregular)

PHYS 5103. Advanced Mechanics. 3 Hours.
Dynamics of particles and rigid bodies. Hamilton's equations and canonical variables. Canonical transformations. Small oscillations. Prerequisite: PHYS 5073. (Typically offered: Fall)

PHYS 5111. Research Techniques Through Laboratory Rotations. 1 Hour.
Graduate students will be introduced to detailed operational aspects of two Physics research laboratories through extensive observation of those laboratory's operations during a six week rotation through each lab. Planning for starting a research project in the summer will take place in the final three week rotation period. (Typically offered: Spring)
PHYS 5213. Statistical Mechanics. 3 Hours.
Classical and quantum mechanical statistical theories of matter and radiation. Prerequisite: PHYS 5413. (Typically offered: Spring)

PHYS 5263L. Experiment and Data Analysis. 3 Hours.
This course is devoted to learning some of the frequently used experimental techniques and methods by which experimental data are analyzed to extract quantitative information on physical parameters. Students will perform experiments, analyze data, and write lab reports. Pre- or Corequisite: PHYS 5423. Prerequisite: Graduate standing or instructor consent. (Typically offered: Fall)

PHYS 5313. Advanced Electromagnetic Theory I. 3 Hours.
Electrostatics, boundary-value problems in electrostatics, electrostatics in a medium, magnetostatics, and Faraday's Law. (Typically offered: Spring)

PHYS 5323. Advanced Electromagnetic Theory II. 3 Hours.
Maxwell equations, conservation laws, wave propagation, waveguides, radiating systems, scattering, special relativity, and radiation by moving charges. (Typically offered: Fall)

PHYS 5363. Scientific Computation and Numerical Methods. 3 Hours.
An introduction to numerical methods used in solving various problems in engineering and the sciences. May not earn credit for this course and MATH 4353 or MATH 4363. (Typically offered: Fall Even Years)

PHYS 5413. Quantum Mechanics I. 3 Hours.
Non-relativistic quantum mechanics; the Schroedinger equation; the Heisenberg matrix representation; operator formalism; transformation theory; spinors and Pauli theory; the Dirac equation; applications to atoms and molecules; collision theory; and semiclassical theory of radiation. (Typically offered: Fall)

PHYS 5423. Quantum Mechanics II. 3 Hours.
Continuation of PHYS 5413 Prerequisite: PHYS 5413. (Typically offered: Spring)

PHYS 5513. Atomic and Molecular Physics. 3 Hours.
Survey of atomic and molecular physics with emphasis on the electronic structure and spectroscopy of 1 and 2 electron atoms and diatomic molecules. Includes fine and hyperfine structure, Zeeman and Stark mixing of states, collision phenomena, radiative lifetimes, and experimental techniques. Prerequisite: PHYS 5413. (Typically offered: Spring)

PHYS 5523. Theory of Relativity. 3 Hours.
Conceptual and mathematical structure of the special and general theories of relativity with selected applications. Critical analysis of Newtonian mechanics; relativistic mechanics and electrodynamics; tensor analysis; continuous media; and gravitational theory. (Typically offered: Fall Even Years)

PHYS 5563. Introduction to Biophysics and Biophysical Techniques. 3 Hours.
Origins of biophysics, biological polymers and polymer physics, properties of DNA and proteins, techniques to study DNA and proteins, biological membrane and ion channels, biological energy, experimental techniques to study single DNA and proteins. Two experiments are included: (1) DNA Gel electrophoresis; (2) Measurement of double-stranded DNA melting point. (Typically offered: Spring)

PHYS 5583. Physics of 2D Materials. 3 Hours.
The course covers the Drude theory and the Sommerfeld theory of metals, crystal lattices, reciprocal lattices, X-ray diffraction, Bloch's theory of electrons in periodic potential, formation of band gap, lattice vibration, and cohesive energy in solids. Prerequisite: PHYS 5413. (Typically offered: Fall)

PHYS 5723. Physics at the Nanoscale. 3 Hours.
This is a cross-disciplinary course that is focused on teaching nanoscience and engineering by studying surface science, the building and analysis of quantum-confined structures, and related nano manufacturing processes. Students will achieve an integrated knowledge of the concepts of surface science, quantum mechanics, nano processing and manipulation, and techniques of materials research. (Typically offered: Irregular)

PHYS 5734. Laser Physics. 4 Hours.
A combined lecture/laboratory course covering the theory of laser operation, laser resonators, propagation of laser beams, specific lasers such as gas, solid state, semiconductor and chemical lasers, and laser applications. (Typically offered: Spring Odd Years)

PHYS 5753. Applied Nonlinear Optics. 3 Hours.
Topics include: practical optical processes, such as electro-optic effects, acousto-optic effects, narrow-band optical filters, second harmonic generation, parametric amplification and oscillation, and other types of nonlinear optical spectroscopy techniques which are finding current practical applications in industry. (Typically offered: Irregular)

PHYS 5756. Experimental Methods for Nanoscience. 3 Hours.
Fundamentals of the selected techniques suitable for characterization on the nanoscale. Focus on diverse methods such as x-ray and neutron spectroscopy, scanning probe microscopies, optical methods, electron diffraction methods and more. (Typically offered: Irregular)

PHYS 5773. Introduction to Optical Properties of Materials. 3 Hours.
This course covers crystal symmetry optical transmission and absorption, light scattering (Raman and Brillouin) optical constants, carrier mobility, and polarization effects in semi-conductors, quantum wells, insulators, and other optically important materials. (Typically offered: Spring Even Years)

PHYS 5783. Physics of 2D Materials. 3 Hours.
Introduction to the structures of all known layered materials, followed by mechanical, electronic, spin, optical, and topological properties of two-dimensional materials. Discussion of theoretical concepts and examination of experimental manifestations of those concepts are interwoven throughout the semester. Knowledge of solid state physics is required. Pre- or Corequisite: PHYS 5413. (Typically offered: Fall Odd Years)

PHYS 588V. Selected Topics in Physics. 1-3 Hour.
Selected topics in experimental or theoretical physics at the advanced level. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

PHYS 600V. Master of Science Thesis. 1-6 Hour.
Master of Science Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

PHYS 6413. Quantum Mechanics III. 3 Hours.
Relativistic quantum mechanics, second quantization, with applications to quantizing electromagnetic fields and to many-body theory. Introduction to Feynman diagrams. Prerequisite: PHYS 5423. (Typically offered: Irregular)

PHYS 6513. Theoretical Biophysics. 3 Hours.
Introduction to biology as a complex system, networks and information theory, negative and positive feedback systems, gene regulation, noise, and noise propagation, cell signaling pathways, intercellular interactions, and emergence of cooperativity in biological systems. Prerequisite: PHYS 5613. (Typically offered: Fall Even Years)

PHYS 6613. Quantum Optics. 3 Hours.
Properties of light and its interaction with atoms, particular attention given to the laser and recent experiments. Classical theory of resonance; Optical Bloch Eqs.; 2 level atoms in steady fields; pulse propagation; semiclassical theory of the laser, coherent states and coherent functions; gas, solid, and dye lasers; photon echoes and superradiance; quantum electrodynamics and spontaneous emission. Prerequisite: PHYS 5413 or equivalent. (Typically offered: Irregular)
PLPA 4304 and PLPA 5324. (Typically offered: Irregular)

Lecture 3 hours per week. Prerequisite: PLPA 3004 and graduate standing. (Typically offered: Spring Even Years)

PLPA 5333. Biotechnology in Agriculture. 3 Hours.
(Formerly PLPA 4333.) Discussion of the techniques, applications, and issues of biotechnology as it is being used in modern agriculture. Coverage includes the basics of molecular biology, production of transgenic plants and animals, and new applications in the agricultural, food, and medical marketplace. Lecture and discussion, 3 hours per week. Graduate degree credit will not be given for both PLPA 4333 and PLPA 5333. (Typically offered: Fall)

PLPA 5404. Diseases of Economic Crops. 4 Hours.
Diagnosis and management of important diseases of cotton, fruits, rice, trees, soybeans, wheat, and vegetables will be covered in a lecture, laboratory, and field format. Lecture 2 hours, laboratory 4 hours per week. Four 1-day field trips will be involved. Corequisite: Lab component. Prerequisite: PLPA 3004. (Typically offered: Summer)

PLPA 5603. Plant Pathogenic Fungi. 3 Hours.
Plant Pathogenic Fungi is structured as an integrated lecture/laboratory class designed for students that are interested in developing an understanding and appreciation for taxonomy, biology, and ecology of plant pathogenic fungi and related saprophytic fungi. Corequisite: Lab component. Prerequisite: PLPA 3004 or BIOL 4423 or BIOL 4424 or graduate standing. (Typically offered: Fall Odd Years)

PLPA 5001. Seminar. 1 Hour.
Review of scientific literature and oral reports on current research in plant pathology. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

PLPA 502V. Special Problems Research. 1-6 Hour.
Original investigations of assigned problems in plant pathology. Prerequisite: Graduate standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

PLPA 504V. Special Topics. 1-18 Hour.
Lecture topics of current interest not covered in other courses in plant pathology or other related areas. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

PLPA 5123. Bacterial Lifestyles. 3 Hours.
The course will introduce students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied in more detail to identify unique strategies that bacteria employ to thrive in their respective environment, whether they are causing diseases or establishing beneficial interactions with animal or plants or coexisting with other microorganisms in diverse ecological environments. The course will also cover special adaptations that bacteria have evolved to adapt to harsh environments and how these adaptations can be harnessed to control pollution. Prerequisite: (BIOL 2013 and BIOL 3123) or BIOL 3123. (Typically offered: Spring Odd Years)

This course is cross-listed with BIOL 5223.

PLPA 5223. Plant Disease Control. 3 Hours.
(Formerly PLPA 4223.) Principles, methods and mechanics of plant disease control. Emphasis is given to the integration of control measures and epidemiology of plant diseases. Lecture 3 hours per week. Graduate degree credit will not be given for both PLPA 4223 and PLPA 5223. (Typically offered: Fall)

PLPA 5303. Advanced Plant Pathology: Host-Pathogen Interactions. 3 Hours.
Presentation of important contemporary concepts relative to disease resistance and the physiology, biochemistry, and molecular biology of plant-pathogen interactions. Lecture 3 hours per week. Prerequisite: PLPA 3004 or equivalent and graduate standing. (Typically offered: Spring Odd Years)

PLPA 5313. Advanced Plant Pathology: Ecology and Epidemiology. 3 Hours.
Presentation of important contemporary concepts relative to the ecology and epidemiology of foliar and soil-borne plant pathogens. Lecture 3 hours per week. Prerequisite: PLPA 3004 and graduate standing. (Typically offered: Spring Even Years)

PLPA 5324. Applied Plant Disease Management. 4 Hours.
(Formerly PLPA 4304.) A plant pathology course emphasizing practical understanding of the concepts and principles of agronomic and horticultural crop disease management, including disease diagnosis, monitoring, and using models to forecast disease events. Graduate degree credit will not be given for both PLPA 4304 and PLPA 5324. (Typically offered: Irregular)

PLPA 5404. Diseases of Economic Crops. 4 Hours.
Diagnosis and management of important diseases of cotton, fruits, rice, trees, soybeans, wheat, and vegetables will be covered in a lecture, laboratory, and field format. Lecture 2 hours, laboratory 4 hours per week. Four 1-day field trips will be involved. Corequisite: Lab component. Prerequisite: PLPA 3004. (Typically offered: Summer)

PLPA 5603. Plant Pathogenic Fungi. 3 Hours.
Plant Pathogenic Fungi is structured as an integrated lecture/laboratory class designed for students that are interested in developing an understanding and appreciation for taxonomy, biology, and ecology of plant pathogenic fungi and related saprophytic fungi. Corequisite: Lab component. Prerequisite: PLPA 3004 or BIOL 4423 or BIOL 4424 or graduate standing. (Typically offered: Fall Odd Years)

PLPA 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PLPA 6203. Plant Virology. 3 Hours.
Lecture emphasizing discussion of recent advances in plant virology. Laboratory concerned with techniques and equipment used in plant virus studies, including transmission of viruses, characterization utilizing ultracentrifugation, spectrophotometry, electrophoresis, electron microscopy, and serology. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CHEM 5813 or CHEM 5843 or CHEM 6873 or consent of instructor. (Typically offered: Fall Even Years)

PLPA 6303. Plant Nematology. 3 Hours.
Nematodes and their relationship to plant diseases, with consideration of identification, morphology, biology, distribution, association with disease complexes and control. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: Graduate standing. (Typically offered: Fall Even Years)

PLPA 6503. Plant Bacteriology. 3 Hours.
Current concepts and techniques in plant bacteriology, including taxonomic, ecological and molecular aspects of plant pathogenic bacteria and their interactions with hosts. Lecture 2 hours, laboratory 2 hours per weeks. Corequisite: Lab component. Prerequisite: BIOL 2013 and BIOL 2011L. (Typically offered: Spring Odd Years) May be repeated for up to 3 hours of degree credit.

Plant Sciences (PTSC)

Courses

PTSC 6101. Colloquium in Plant Sciences. 1 Hour.
Advanced discussion of topics in plant science on a participatory basis. Topics in plant pathology, horticulture and forestry will be treated. Prerequisite: Graduate standing. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

PTSC 6203. Laboratory Instrumentation in Plant Science. 3 Hours.
Principles, capabilities, and operation of laboratory instrumentation utilized in plant science research. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Irregular)

PTSC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
Political Science (PLSC)

Courses

PLSC 500V. Special Topics. 1-3 Hour.
(Formerly PLSC 400V.) Topics in political science not usually covered in other courses. Graduate degree credit will not be given for both PLSC 400V and PLSC 500V. (Typically offered: Irregular) May be repeated for degree credit.

PLSC 5043. The U.S. Constitution I. 3 Hours.
(Formerly PLSC 4253.) United States Supreme Court decisions involving the functions and powers of Congress, the Supreme Court, and the President and federalism. Graduate degree credit will not be given for both PLSC 4253 and PLSC 5043. Prerequisite: PLSC 2003. (Typically offered: Spring)

PLSC 5053. Creating Democracies. 3 Hours.
(Formerly PLSC 4513.) Analyses of the creation of democracies in Europe, South America, Asia, Africa, the Middle East, East Europe, and the former Soviet Union. Graduate degree credit will not be given for both PLSC 4513 and PLSC 5053. Prerequisite: PLSC 2013. (Typically offered: Fall Even Years)

PLSC 5083. The Middle East in World Affairs. 3 Hours.
An analysis of geo-political and socio-economic characteristics of Middle Eastern societies and their impact on world economic and political order. Special attention to such issues as the Arab-Israeli conflict, the promotion of lasting peace in the region, impact of oil on world politics, the involvement of superpowers, rehabilitation of Palestinian refugees and the role of the United Nations. (Typically offered: Spring)

PLSC 5103. Human Behavior in Complex Organizations. 3 Hours.
Review of the fundamental literature and a systematic analysis of various theories and research focusing on organization and behavior in public administration, including the discussion of organizational development, human motivation, leadership, rationality, efficiency and conflict management in public organizations. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years; Summer)

PLSC 5113. Seminar in Human Resource Management. 3 Hours.
Intensive study of public personnel policies and practices, including legal foundations, classification and compensation plans, recruitment and selection processes, training, employment policies and morale, employee relations and organization. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years; Summer)

PLSC 5123. Public Budgeting and Finance. 3 Hours.
Focuses on the budgeting process and governmental fiscal policy formulation, adoption, and execution. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5133. Nonprofit Management. 3 Hours.
This course provides an overview of the principal management functions in public and nonprofit organizations. Topics include financial management, HR development, program development. The relationships among volunteer boards of trustees, fund raising, public relations, and program personnel are analyzed, and the complex environments with service sector agencies are explored. (Typically offered: Fall)

PLSC 5143. Administrative Law. 3 Hours.
A seminar which examines the constitutional and statutory basis and authority of public organizations. Special attention focuses on the nature of the rule-making and adjudicatory powers of public agencies and on executive, legislative, and judicial restraints on such activities. Also considered are the role, scope, and place of public regulatory activities. Prerequisite: Graduate standing. (Typically offered: Spring)

PLSC 5153. Environmental Politics and Policy. 3 Hours.
Surveys recent patterns of environmentalism in the U.S. and explores the nature of policy making with regard to environmental and economic development issues. Several debates are presented, such as conservation vs. preservation, multiple use vs. sustainability, intergovernmental policy implementation, incentives, and free market environmentalism. (Typically offered: Fall Even Years)

PLSC 5163. Public Policy. 3 Hours.
Seminar examining the study of public policy making in complex organizations. Attention given to different theories and frameworks explaining public policy making. Prerequisite: Graduate standing. (Typically offered: Spring)

PLSC 5173. Community Development. 3 Hours.
Community development encompasses the political, social, and economic issues that shape contemporary communities. The seminar examines substantive issues in community development, related theories, and techniques. A major focus of the course will be on low-income and minority neighborhoods and efforts to create more inclusive communities in the U.S. and abroad. (Typically offered: Fall)

PLSC 5183. Comparative Governance Systems. 3 Hours.
With an emphasis on international policy settings, students are encouraged to test extant policy models and discuss policy innovations that could produce improved policy outcomes. Introduces concepts of institutional logics and how organizations and individual actors experience and respond to the presence of multiple logics prevalent in many policy fields. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

PLSC 5193. Seminar in Public Administration. 3 Hours.
Introduction to and synthesis of public administration theory, functions, history, public accountability and management concerns, economic impact of administrative decisions, current problems, and issues in the public sector. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5203. Seminar in American Political Institutions. 3 Hours.
Research seminar dealing with selected aspects of the major governmental institutions in the United States. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5213. Seminar in American Political Behavior. 3 Hours.
Reading seminar surveying major works on representative processes in American national politics, including political opinion, political leadership, political participation, voting behavior, political parties, and interest groups. Prerequisite: Graduate standing. (Typically offered: Spring)

PLSC 5223. The American Chief Executive. 3 Hours.
Study of the origin, background, and evolution of the Office of the President of the United States, with a review of the president's powers in the areas of politics, administration, and legislation. (Typically offered: Spring Odd Years)

PLSC 5243. Seminar in State Politics and Policy. 3 Hours.
Research seminar dealing with selected aspects of state political institutions and politics such as policy diffusion, institutional professionalization, and representation. Prerequisite: Graduate standing. (Typically offered: Fall Even Years)

PLSC 5253. Politics of Race and Ethnicity. 3 Hours.
Reviews identity, political action and concepts of political activity by minority groups, focusing on contemporary political behavior, the incorporation of minority groups into the U.S. political system. (Typically offered: Spring)

PLSC 5273. The U.S. Constitution I. 3 Hours.
United States Supreme Court Decisions involving the powers and functions of Congress, the Supreme Court and the President and federalism. (Typically offered: Spring)

PLSC 5283. Federalism and Intergovernmental Relations. 3 Hours.
(Formerly PLSC 4283.) Analysis of changes in intergovernmental relations in the American federal system. Discussions will focus on political, economic/fiscal and administrative aspects of policy changes of the pre-and post-Reagan eras. Graduate degree credit will not be given for both PLSC 4283 and PLSC 5283. (Typically offered: Spring Even Years)
PLSC 5343. Money and Politics. 3 Hours.
Familiarizes students with the world of money and politics in the United States. Examines the function of money in elections, the legal aspects, and the consequences of the regulatory environment. Provides a means to gain analytic computer skills and a strong foundation for further study of political science. (Typically offered: Fall)

PLSC 5373. Political Communication. 3 Hours.
(Formerly PLSC 4373.) Study of the nature and function of the communication process as it operates in the political environment. Graduate degree credit will not be given for both PLSC 4373 and PLSC 5373. (Typically offered: Spring Even Years)

PLSC 5383. Seminar in Political Communication. 3 Hours.
Research seminar focusing on selected topics such as candidate imagery, diffusion of political information, or political symbolism. Prerequisite: Graduate standing. (Typically offered: Irregular)
This course is cross-listed with COMM 5383.

PLSC 5503. Comparative Political Analysis. 3 Hours.
A selection of topics to provide the theoretical, conceptual and methodological foundation for the analysis of contemporary political systems. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5513. Seminar in Politics of the Middle East. 3 Hours.
Explores the major lines of inquiry on the politics of the state and society in the context of endogenous and exogenous forces that have influenced conceptions of power, legitimacy, and identity. Prerequisite: Graduate standing. (Typically offered: Irregular)

PLSC 5563. Government and Politics of Russia. 3 Hours.
(Formerly PLSC 4563.) Study of Russian and Soviet politics after 1917 and of the democratization of Russia and the other successor states. Graduate degree credit will not be given for both PLSC 4563 and PLSC 5563. Prerequisite: PLSC 2003 or PLSC 2013. (Typically offered: Spring Even Years)

PLSC 5583. Political Economy of East Asia. 3 Hours.
(Formerly PLSC 4583.) Development strategies and policies of major economies in East Asia. Topics include theories for East Asia’s economic growth, dynamics and process of East Asian political and economic developments, strengths and limits of the East Asian development model, Asian values and their implications for Asian-style democracy, and dynamics of regional cooperation. Graduate degree credit will not be given for both PLSC 4583 and PLSC 5583. (Typically offered: Spring)

PLSC 5593. Islam and Politics. 3 Hours.
Compares contemporary Islamist political movements. Seeks to explain causes, debates, agendas, and strategies of Islamists in the political realm. Addresses sovereignty, the rule of law, visions of the good state and society, and relations between nationalism, religion and political development. Focus on Middle East with comparative reference to other cases. (Typically offered: Fall)

PLSC 5703. Research Design in Political Science and Public Policy. 3 Hours.
This course is designed to introduce graduate students to fundamental research issues in the realm of applied social science while developing the ability to apply basic skills for conducting research. (Typically offered: Fall)

PLSC 5803. Seminar in International Politics. 3 Hours.
Research seminar providing intensive coverage of selected topics in theories of international relations, the comparative study of foreign policy making, and international organizations. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5833. Seminar in Contemporary Problems. 3 Hours.
Seminar with concentrated reading in selected and specialized areas of contemporary international relations. Prerequisite: Graduate standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

PLSC 5843. International Legal Order. 3 Hours.
Analysis of distinctive characteristics of contemporary international law. Topics include role of legal order in controlling the use of force in international relations and the impact of social and political environment on growth of international law and relations among international political systems. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 5863. Political Psychology and International Relations. 3 Hours.
Examines psychological approaches to international relations and examines how these perspectives advance the study of world politics. (Typically offered: Irregular)

PLSC 5873. Inter-American Politics. 3 Hours.
An analysis of the political themes, regional organization, and hemispheric relations that constitute the inter-American system, with special emphasis on conflict and cooperation in the hemispheric policies of the American republics. (Typically offered: Irregular)

PLSC 5883. Politics of International Law. 3 Hours.
This course examines the interaction between law and politics in the international system, focusing on international law. (Typically offered: Irregular)

PLSC 590V. Directed Readings in Political Science. 1-3 Hour.
Directed readings in Political Science. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

PLSC 5913. Research Methods in Political Science. 3 Hours.
Methods relevant to research in the various fields of political science. Required of all graduate students in political science. Prerequisite: Graduate standing. (Typically offered: Fall)

PLSC 592V. Internship in Political Science. 1-6 Hour.
Internship in a local, state, regional, or federal agency. Paper required on a significant aspect of internship experience. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

PLSC 593V. Special Topics. 1-3 Hour.
Topics in political science not usually covered in other courses. Prerequisite: Graduate Standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

PLSC 5943. Advanced Research Methods in Political Science. 3 Hours.
Provides a firm theoretical foundation in, and an ability to apply, various multivariate statistical methods that are most commonly used for empirical analysis of politics and policy. Prerequisite: PLSC 5913 or equivalent. (Typically offered: Fall)

PLSC 595V. Research Problems in Political Science. 1-3 Hour.
Research problems in Political Science. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

PLSC 5983. Mixed Methods Research Design. 3 Hours.
An advanced overview of a particular type of multi-point research design. Mixed methods research combines quantitative and qualitative research strategies in a single research project. (Typically offered: Spring)

PLSC 5993. African American Political Ideology. 3 Hours.
A survey course designed to identify and examine characteristics and functions of several variants of black political ideology/thought. (Typically offered: Spring Odd Years)

PLSC 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
Poultry Science (POSC)

Courses

POSC 500V. Special Problems. 1-6 Hour.
Work in special problems of poultry industry. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

POSC 5033. Statistical Process Control in the Food Industry. 3 Hours.
(Formerly POSC 4033.) Analysis of processing data related to compliance with regulatory limits, quality and safety limits and internal and external customer specifications. Emphasizes statistical process control chart development, including understanding data and chart selection, calculating statistical limits, and interpreting process performance. Graduate degree credit will not be given for both POSC 4033 and POSC 5033. Prerequisite: Instructor consent. (Typically offered: Irregular)

POSC 510V. Special Topics in Poultry Sciences. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in poultry science. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

POSC 5113. Food Toxicology and Contaminants. 3 Hours.
During this course, the student will learn basic concepts of food toxicology, study the different physiological processes involved in food borne intoxications, and learn about potential health problems associated with exposure to these compounds. Prerequisite: Graduate study. (Typically offered: Irregular)

POSC 5123. Advanced Animal Genetics. 3 Hours.
Specialized study of animal genetics. Lecture 3 hours per week. Prerequisite: POSC 3123 or ANSC 3123. (Typically offered: Fall Even Years)
This course is cross-listed with ANSC 5123.

POSC 5143. Biochemical Nutrition. 3 Hours.
Interrelationship of nutrition and physiological chemistry; structure and metabolism of physiological significant carbohydrates, lipids, and proteins; integration of metabolism with provision of tissue fuels; specie differences in regulatory control of tissue and whole body metabolism of nutrients. Prerequisite: CHEM 3813. (Typically offered: Fall Even Years)
This course is cross-listed with ANSC 5143.

POSC 5152. Protein and Amino Acid Nutrition. 2 Hours.
Students will be introduced to the basic processes of protein digestion, amino acid absorption, transport, metabolism, and utilization along with how biochemical function of proteins and their dynamic state affect nutritional status for animals and man. Prerequisite: CHEM 3813. (Typically offered: Spring Even Years)
This course is cross-listed with ANSC 5152.

POSC 5163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring)
This course is cross-listed with ANSC 5163.

POSC 5213. Integrated Poultry Management Systems. 3 Hours.
(Formerly POSC 4213.) Major managerial systems in the integrated commercial poultry industry. Development of an understanding of the basic decision making processes of poultry companies and the factors influencing those decisions. Graduate degree credit will not be given for both POSC 4213 and POSC 5213. Prerequisite: POSC 2353 and AGEC 1103 and AGEC 2303. (Typically offered: Spring)

POSC 5233. Value Added Muscle Foods. 3 Hours.
An intense study of muscle structure and how it relates to the development of further processed meat products. Muscle ultrastructure, protein functionality, product development, and quality analysis will be covered. In class hands on activities will also be included to allow students to obtain experience of producing processed meat products. (Typically offered: Spring Even Years)

POSC 5243. Legal Issues in Animal Agriculture. 3 Hours.
(Formerly POSC 4123.) An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation from local to state to federal, depending on the issue will be studied and discussed. Graduate degree credit will not be given for both POSC 4123 and POSC 5243. (Typically offered: Spring Odd Years)

POSC 5254. Egg and Meat Technology. 4 Hours.
(Formerly POSC 4314.) Study of the science and practice of processing poultry meat and egg products; examination of the physical, chemical, functional and microbiological characteristics of value added poultry products; factors affecting consumer acceptance and marketing of poultry products and the efficiency of production. Graduate degree credit will not be given for both POSC 4314 and POSC 5254. Corequisite: Lab component. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1073 and CHEM 1071L) and BIOL 1543 and BIOL 1541L. (Typically offered: Fall)

POSC 5313. Domestic Animal Bacteriology. 3 Hours.
A study of bacteria pathogenic for domestic animals. Lecture 3 hours per week. (Typically offered: Fall)

POSC 5333. Poultry Breeding. 3 Hours.
(Formerly POSC 4333.) Application of new developments in poultry breeding for efficient egg and meat production. Not intended for students interested in a career in veterinary sciences. Lecture 3 hours per week. Graduate degree credit will not be given for both POSC 4333 and POSC 5333. (Typically offered: Fall Odd Years)

POSC 5343. Advanced Immunology. 3 Hours.
Aspects of innate, cell-mediated, and humoral immunity in mammalian and avian species. Molecular mechanisms underlying the function of the immune system are emphasized. A course in Basic Immunology prior to enrollment in Advanced Immunology is recommended but not required. Lecture 3 hours per week. (Typically offered: Spring)
This course is cross-listed with BIOL 5343.

POSC 5352L. Immunology in the Laboratory. 2 Hours.
Laboratory course on immune-diagnostic laboratory techniques and uses of antibodies as a research tool. Included are cell isolation and characterization procedures, immunohematology, flow cytometry, ELISA and cell culture assay systems. Laboratory 6 hours per week. Prerequisite: POSC 5343 or BIOL 5343 or BIOL 4713. (Typically offered: Spring)
This course is cross-listed with BIOL 5352L.

POSC 5443. Poultry Nutrition. 3 Hours.
(Formerly POSC 4433.) Principles of nutrition as applied to the formulation of practical chicken and turkey rations. Lecture 3 hours per week. Graduate degree credit will not be given for both POSC 4433 and POSC 5443. Prerequisite: CHEM 2613 or CHEM 3603. (Typically offered: Spring)

POSC 5742. Advanced Poultry Diseases. 2 Hours.
An in-depth coverage of the most important diseases of poultry with a focus on understanding mechanisms of pathogenesis, diagnostic techniques and principles of prevention. Lecture/discussion 2 hours per week. Prerequisite: POSC 3223. (Typically offered: Spring Odd Years)
POSC 5743L. Advanced Analytical Methods in Animal Sciences Laboratory. 3 Hours.
Introduction into theory and application of current advanced analytical techniques used in animal research. Two 3-hour laboratory periods per week. (Typically offered: Fall)
This course is cross-listed with ANSC 5743L.

POSC 5873. Molecular Analysis of Foodborne Pathogens. 3 Hours.
Course topics will include molecular detection and identification of foodborne pathogens, the molecular response of foodborne pathogens to their environments, functional genomic approaches, and analysis of complex microbial communities. Lecture/discussion 3 hours per week. (Typically offered: Fall)

POSC 5901. Graduate Seminar. 1 Hour.
Critical review of the current scientific literature pertaining to the field of poultry science. Oral reports. Recitation 1 hour per week. Prerequisite: Senior standing. (Typically offered: Fall and Spring)

POSC 5923. Brain and Behavior. 3 Hours.
Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory and autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042, or PSYC 2003, or BIOL 2213, or BIOL 2443, or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with ANSC 5923.

POSC 5932. Cardiovascular Physiology of Domestic Animals. 2 Hours.
Cardiovascular physiology, including mechanisms of heart function and excitation, and blood vessel mechanisms associated with the circulatory system in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042. (Typically offered: Fall)
This course is cross-listed with ANSC 5932.

POSC 5942. Endocrine Physiology of Domestic Animals. 2 Hours.
Endocrine physiology, including mechanisms of hormone secretion, function, and regulation. Mechanisms associated with the endocrine system will be discussed for domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 or POSC 3042. (Typically offered: Fall)
This course is cross-listed with ANSC 5942.

POSC 5952. Respiratory Physiology of Domestic Animals. 2 Hours.
Respiratory physiology, including mechanisms of lung function and gas exchange. Mechanisms associated with the interaction of the respiratory system with other bodily systems in domestic animals and poultry will be discussed. Lecture 3 hours; drill 1 hour per week for first 8 weeks of semester, Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042. (Typically offered: Spring)
This course is cross-listed with ANSC 5952.

POSC 5962. Gastrointestinal/Digestive Physiology of Domestic Animals. 2 Hours.
Gastrointestinal and hepatic physiology, including mechanisms of digestion, absorption of nutrients with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042. (Typically offered: Fall)
This course is cross-listed with ANSC 5962.

POSC 5972. Renal Physiology of Domestic Animals. 2 Hours.
Renal physiology, including mechanisms of renal clearance with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042. (Typically offered: Spring)
This course is cross-listed with ANSC 5972.

POSC 600V. Thesis. 1-6 Hour.
Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

POSC 6123. Advanced Food Animal Wellbeing. 3 Hours.
Advances in fundamentals of animal welfare including animal health, animal handling, food safety and productivity. Prerequisite: ANSC 2213 or BIOL 4833 or instructor consent. (Typically offered: Spring)
This course is cross-listed with ANSC 6123.

POSC 6343. Vitamin Nutrition in Domestic Animals. 3 Hours.
The vitamins required by domestic animals with emphasis upon their role in animal nutrition, physiological functions, and consequences of failure to meet the requirement of the animal. Lecture 3 hours per week. Prerequisite: (ANSC 3143 or POSC 4433) and CHEM 3813. (Typically offered: Spring Even Years)
This course is cross-listed with ANSC 6343.

POSC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Psychology (PSYC)

Courses

PSYC 4053. Psychological Tests. 3 Hours.
Nature and theory of individual and group tests of intelligence, personality, interests, and attitudes. Prerequisite: Nine hours of psychology, including a C or better in PSYC 2013. (Typically offered: Irregular)

PSYC 4073. Psychology of Learning. 3 Hours.
Theories and representative research on basic principles of learning and memory in both animals and humans. Prerequisite: Six hours of psychology, not including PSYC 2013. (Typically offered: Spring)

PSYC 5013. Advanced Developmental Psychology. 3 Hours.
Critical examination of the research relevant to the psychological factors influencing the growth processes of the individual from birth to maturity. (Typically offered: Spring)

PSYC 5023. Neuropsychological Assessment. 3 Hours.
Introduction to the principles, techniques, and tools of assessment in clinical neuropsychology. Includes training in the interpretation, integration, and reporting of results. Prerequisite: PSYC 5043 and enrollment in the Psychology graduate program. (Typically offered: Irregular)

PSYC 5033. Psychopathology Theory & Assessment. 3 Hours.
Psychological and somatic factors contributing to pathological behavior. Interrelations of these factors will be analyzed in terms of how they lead to differential abnormal states. Includes guidelines for using structured interviews in the diagnosis and clinical assessment of major psychological disorders. Prerequisite: PSYC 3023 and enrollment in the Graduate Program in Psychology, or instructor consent. (Typically offered: Fall)

PSYC 5043. Assessment of Intellectual and Cognitive Abilities. 3 Hours.
Training in the theory, administration and interpretation of individual tests of intelligence and mental ability. Prerequisite: PSYC 4053 and enrollment in the Psychology Graduate Program. (Typically offered: Fall)
PSYC 5063. Advanced Social Psychology. 3 Hours.
Theory, methodology, and contemporary research in the major areas of social psychology. Topics include attitude theory and measurement, group processes, social and cultural factors. (Typically offered: Spring)

PSYC 5073. Introduction to Clinical Practice: Core Skills and Ethical Guidelines. 3 Hours.
An introduction to clinical practice focusing on a) interview methods and techniques and b) ethical principles and guidelines. Includes an introduction to clinic policies and procedures. Prerequisite: Enrollment in the Psychology graduate program. (Typically offered: Spring)

PSYC 5080. Observational Practicum. 0 Hours.
Observation of senior therapists in the provision of psychodiagnostic and psychotherapeutic techniques. Pre- or Corequisite: Doctoral students only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 0 hours of degree credit.

PSYC 5113. Theories of Learning. 3 Hours.
Major concepts in each of the important theories of learning. (Typically offered: Fall)

PSYC 5123. Cognitive Psychology. 3 Hours.
Contemporary theories and research on human information processing including topics such as memory, language, thinking, and problem solving. (Typically offered: Spring Even Years)

PSYC 5133. Inferential Statistics for Psychology. 3 Hours.
Inferential statistics, including representative parametric tests of significance. Special emphasis on analysis of variance, covariance, and component variance estimators as applied to psychological research. Prerequisite: PSYC 2013. (Typically offered: Fall)

PSYC 5143. Advanced Descriptive Statistics for Psychology. 3 Hours.
Special correlation techniques followed by a survey of representative nonparametric tests of significance. Major emphasis on advanced analysis of variance theory and designs. Prerequisite: PSYC 5133. (Typically offered: Spring)

PSYC 5153. Advanced History and Systems of Psychology. 3 Hours.
Advanced examination of the concepts, methods, and systems which have contributed to the development of modern psychology. (Typically offered: Fall)

PSYC 5163. Personality: Theory & Assessment. 3 Hours.
An introduction to empirically based theories of personality and personality disorders with an emphasis on standardized instruments in the assessment of normative and pathological personality. Includes training in the interpretation, integration, and reporting of results. Pre- or Corequisite: PSYC 5043. Prerequisite: Enrollment in the Psychology graduate program or instructor consent. (Typically offered: Spring)

PSYC 5223. Perception. 3 Hours.
(Formerly PSYC 4123.) Theories and representative research in the areas of sensation and perception. Graduate degree credit will not be given for both PSYC 4123 and PSYC 5223. Prerequisite: Six hours of psychology, not including PSYC 2013. (Typically offered: Irregular)

PSYC 523V. Research Practicum. 1-3 Hour.
Presentation, evaluation, and discussion of on-going research proposals. Required of all experimental graduate students in the first 2 years of their program. (Typically offered: Fall and Spring)

PSYC 5313. Introduction to Clinical Science: Research Design and Ethical Guidelines. 3 Hours.
Provides a) guidelines for designing and conducting empirical research in clinical psychology, b) ethical principles that regulate clinical research, and c) supervised opportunities to develop a clinical research proposal. Prerequisite: Enrollment in the Psychology graduate program. (Typically offered: Fall)

PSYC 5463. Descriptive Linguistics. 3 Hours.
This course aims to approach a scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Irregular) This course is cross-listed with WLLC 5463, ANTH 5473, ENGL 5463.

PSYC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PSYC 602V. Seminar: Teaching Psychology. 1-3 Hour.
Survey of the literature on teaching of psychology in college. Includes: planning the course, method, examining and advising students. Prerequisite: Teaching assistant. (Typically offered: Fall and Spring)

PSYC 607V. Clinical Practicum III. 1-3 Hour.
Provides supervised experience in the application of the more complex and lesser known psychodiagnostic techniques and training and experience in psychotherapeutic techniques with the more severe functional disorders, with special topics in these domains emphasized across sections. Prerequisite: PSYC 5073; Enrollment in the Psychology graduate program. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PSYC 609V. Clinical Graduate Seminar. 1-3 Hour.
Provides intensive coverage of specialized clinical topics. Open to all graduate students. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

PSYC 611V. Individual Research. 1-18 Hour.
Individual research. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

PSYC 6133. Advanced Behavioral Neuroscience. 3 Hours.
Examination of the biological basis of behavior, with emphasis on underlying neural mechanisms. (Typically offered: Fall)

PSYC 6163. Psychotherapy. 3 Hours.
A conceptual overview of psychotherapy, with emphasis on a) common mechanisms, and b) cognitive, affective, and interpersonal approaches. Prerequisite: PSYC 5033. (Typically offered: Fall)

PSYC 6213. Psychotherapy Outcomes. 3 Hours.
Provides a critical evaluation of theory and research on empirically supported programs and interventions for major psychological disorders. Prerequisite: Enrollment in the Psychology graduate program. (Typically offered: Spring)

PSYC 6323. Seminar in Developmental Psychology. 3 Hours.
Discussion of selected topics in the area of human development. Emphasis will be on a review of current theory and empirical research. Topics selected for discussion could range from early development (child psychology), to later development (psychology of adulthood and aging-gerontology), to current attempts to integrate the field (life-span developmental psychology). (Typically offered: Fall Odd Years)

PSYC 6343. Seminar in Quantitative Methods. 3 Hours.
Discussion of selected mathematical approaches to theorizing and research in psychology. Emphasis will be on generalization of a given approach across several content areas of psychology. Hence, while each area must be treated in reasonable depth, current thinking and research spanning more than one content area will be stressed. (Typically offered: Irregular)

PSYC 6353. Seminar in Learning/Memory/Cognition. 3 Hours.
Discussion of selected topics in learning, memory, or cognition. Emphasis on current theory and empirical research. Topics selected for discussion may be in the areas of learning, memory, problem solving, or language. (Typically offered: Spring Odd Years)
PSYC 6373. Seminar in Personality and Social Psychology. 3 Hours.
Discussion of selected topics in social psychology and personality. Current
theoretical positions and recent research findings are emphasized. Topics selected
for discussion will be in areas of intrapersonal processes, interpersonal processes,
group processes or any of various areas of personality. (Typically offered: Fall)

PSYC 6413. Seminar in Physiological Psychology. 3 Hours.
Discussion of selected topics in physiological psychology. Emphasis will be on a
review of current theory and empirical research. Each offering of the seminar will
examine the biological basis of a specific aspect of behavior, utilizing both animal
and human data. (Typically offered: Spring Odd Years)

PSYC 698V. Field Work. 1-3 Hour.
Provides academic credit for field work in multidisciplinary setting, involving
supervised experiences in assessment and psychotherapy. (Typically offered: Fall,
Spring and Summer) May be repeated for degree credit.

PSYC 699V. Clinical Psychology Internship. 1-3 Hour.
Supervised experience in a multidisciplinary setting of assessment and
psychotherapy. (Typically offered: Fall, Spring and Summer) May be repeated for
degree credit.

PSYC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring
and Summer) May be repeated for degree credit.

Public Administration (PADM)

Courses

PADM 5803. Quantitative Methods Analysis. 3 Hours.
Data analysis techniques, including descriptive and inferential statistics and
packaged computer programs. Prerequisite: Graduate standing. (Typically offered: Fall)

PADM 5813. Managing Information Technologies in Public Affairs. 3 Hours.
Examines digital interactions between citizens, institutions, and political interests
from the perspective of analysts, civic leaders, and professional non-technical
administrators. Explores timely issues related to public information transactions,
ethics and best practices of public information management, and the strategic
positioning of public information assets. Prerequisite: Graduate standing. (Typically
offered: Spring)

PADM 5823. Grant Writing for the Social Sciences. 3 Hours.
This course will teach students the fundamentals of obtaining grants from local, state
and federal agencies. (Typically offered: Irregular)

PADM 5833. Urban Planning. 3 Hours.
Reviews the many forms, functions, and purposes of American cities. Covers basic
planning theories, surveys the various sub-fields of planning, discusses trends in the
planning field, and utilizes computer simulations. (Typically offered: Fall)
This course is cross-listed with PLSC 4103.

PADM 5853. Performance Measurement in the Public and Nonprofit Sectors. 3 Hours.
Provides a hands-on approach for measuring organizational performance and
using performance information of decision making. Addresses components and key
issues of performance measurement, such as steps in the measurement process,
methods of data gathering, and analysis. Prerequisite: PLSC 5193. (Typically
offered: Summer)

PADM 5863. Issues in Public and Nonprofit Management. 3 Hours.
Explores current developments and issues in the theory and practice of public
and nonprofit management. Covers a range of contemporary issues in the field,
such as managing collaborative networks, e-government, and managing for results.
Emerging trends are intensively discussed at the juncture of theory and practice.
(Typically offered: Spring)

PADM 587V. Professional Development. 1-6 Hour.
Encompasses internships, professional projects if individual is employed full-time
and not eligible for an internship, conference and workshop participation, and other
activities conducive to the students development as a public service professional.
(Typically offered: Fall, Spring and Summer)

PADM 588V. Directed Readings. 1-3 Hour.
Directed readings. Prerequisite: Graduate standing. (Typically offered: Fall, Spring
and Summer)

PADM 589V. Independent Research. 1-3 Hour.
Independent Research. Prerequisite: Graduate standing. (Typically offered: Fall,
Spring and Summer)

PADM 5903. Risk and Public Policy. 3 Hours.
Examines how concepts of risk serve to justify and shape public policies and risk
management practices. (Typically offered: Spring)

PADM 5913. Policy Analysis: Theory and Practice. 3 Hours.
Provides a firm theoretical foundation in, and an ability to apply, the general
instruments necessary for professional practice of policy analysis. (Typically offered: Fall)

Public Health (PBHL)

Courses

PBHL 5023. Teaching in Community Health Promotion. 3 Hours.
Examination and practical exposure to the principles and practices of undergraduate
teaching in public health. Includes course planning, teaching techniques,
assessment strategies, and supervised practice. Prerequisite: Admission to the
M.S. or Ph.D. program in Community Health Promotion. (Typically offered: Fall and
Spring) May be repeated for up to 3 hours of degree credit.

PBHL 5213. Evaluation of Public Health Programs. 3 Hours.
This seminar style course is designed to provide students with exposure to different
types of program evaluation, including needs assessment, formative evaluation,
process evaluation, and outcome and impact evaluation. The course covers
theoretical frameworks supporting evaluation, ethics in evaluation, methods for data
collection, reporting evaluation findings, and strengths and limitations of conducting
program evaluation. Prerequisite: PBHL 5563 and HHPR 5353. (Typically offered: Fall)

PBHL 5353. Health Counseling. 3 Hours.
A review of the role and function of the health counselor including a focus on
problem solving approaches for coping with daily problems of living, decision
making, and life style planning. (Typically offered: Fall Odd Years)

PBHL 5533. Theories of Social and Behavioral Determinants of Health. 3 Hours.
This course will provide a basic foundation in the social and behavioral sciences
relevant to public health. Students will learn the role of social and behavioral
determinants in the health of individuals and of populations. Then, students will learn
models and theories of health behavior, both generally and specifically. Generally,
the student will learn how to identify, analyze, and use theoretical constructs
and principles with particular attention to the use of theory in professional public
health practice. Specifically, the student will learn the constructs and principles of
several theories commonly used in public health behavior research and intervention
design. The course will cover the four major individual that focus on intrapersonal
factors (i.e., Health Belief Model, Transtheoretical Model, Theory of Reasoned
Action/Planned Behavior, and Social Cognitive Theory) as well as several social,
organizational, and community theories that are beyond the individual level.
(Typically offered: Fall)

PBHL 5543. Contemporary Issues in Human Sexuality. 3 Hours.
Indepth analysis of the social, biological, and behavioral factors associated with the
development of one’s sexuality. (Typically offered: Irregular)
PBHL 5563. Public Health: Practices and Planning. 3 Hours.
Acquaints the student with the structure, functions, and current problems in public health and with the role of education in public health. Prevention and control practices and planning will be emphasized. Prerequisite: PBHL 5573. (Typically offered: Spring)

PBHL 5573. Principles of Health Education. 3 Hours.
Current trends, basic issues, controversial issues, and fundamental principles of health education. (Typically offered: Fall)

PBHL 5613. Epidemiology. 3 Hours.
This course will present principles and practices related to the prevention and control of health-related conditions in the human population. Emphasis will be placed on understanding the concepts of epidemiology, including aspects of disease distribution, epidemiologic methods, risk of disease and injury, descriptive and analytic epidemiologic methods and study designs, and application of epidemiologic data to the prevention and control of disease. Format will include lecture and small group seminars. (Typically offered: Fall)

PBHL 5623. Human Diseases. 3 Hours.
(Formerly PBHL 4623.) An examination of the variety, behavior, distribution, and management of both infectious and noninfectious diseases in human populations. Graduate degree credit will not be given for both PBHL 4623 and PBHL 5623. (Typically offered: Irregular)

PBHL 5633. Health Services Administration. 3 Hours.
Emphasis is on an examination of administrative factors related to health services. Administrative and professional authority, boards, consumers, delivery of services, federal role, and cost containment will also be addressed. (Typically offered: Irregular)

PBHL 5643. Multicultural Health. 3 Hours.
Through lecture, discussion, simulations, and case studies, students will develop an appreciation for the cultural traditions and practices of different groups. The importance and implications of these traditions on health outcomes and health status will be examined. Particular attention will be paid to the role of the public health educator in mediating the impact of health disparities, including advocacy. Students will develop skills of cultural competence that are essential for public health practitioners today. Prerequisite: Graduate standing or consent. (Typically offered: Spring Even Years)

PBHL 574V. Internship. 1-6 Hour.
Internship in health behavior and health promotion. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

PBHL 589V. Independent Research. 1-6 Hour.
Development, implementation, and completion of graduate research project. Prerequisite: M.S. degree in Community Health Promotion and HHPR 5353 and ESRM 5393. (Typically offered: Fall, Spring and Summer)

PBHL 600V. Master's Thesis. 1-6 Hour.
Thesis in health behavior and health promotion. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

PBHL 6013. Advanced Directed Research. 3 Hours.
This course is intended for doctoral students who wish to pursue research under the direction of a faculty member. In this course, doctoral students will work independently and collaborate with faculty member(s) and fellow students to conduct research in a specified area of interest. The purpose of the course is for the student to develop knowledge in her/his own domain, strengthen her/his research skills, and work collaboratively on research projects. The course will aim for students to present research findings at conferences and/or publish research findings in peer reviewed journals. The directed research course places more emphasis on the students’ role as a researcher in an academic setting. Prerequisite: Admission to the Ph.D. program in Community Health Promotion. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

PBHL 605V. Independent Study. 1-6 Hour.
Provides students with an opportunity to pursue special study of education problems. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

PBHL 6333. Health Behavior Research. 3 Hours.
A review of human behavior and its relationship to health and wellbeing. Focuses on contemporary health behavior research and instrumentation. (Typically offered: Fall Even Years)

PBHL 6553. Environmental Health. 3 Hours.
An analysis and evaluation of the various environmental factors that influence our health. Causes of problem factors are identified and solutions proposed for improving environmental conditions. (Typically offered: Spring)

PBHL 6733. Health and the Aging Process. 3 Hours.
An overview of the health-related issues facing elderly populations with in-depth study of the biological and behavioral changes associated with aging. (Typically offered: Irregular)

PBHL 6833. Principles of Epidemiology II. 3 Hours.
Provides students with knowledge and skills necessary to design, conduct, and interpret observational epidemiological concepts, sources of data, prospective cohort studies, retrospective cohort studies, case-control studies, cross-sectional studies, methods of sampling, estimating sample size, questionnaire design, and effects of measurement error. Corequisite: ESRM 5393 or ESRM 6403. (Typically offered: Spring and Summer)

PBHL 699V. Seminar. 1-6 Hour.
Discussion of selected topics and review of current literature in community health promotion. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

Public Policy (PUBP)

Courses

PUBP 6001. Pro-Seminar. 1 Hour.
An introduction to the field of public policy and to the program. The seminar will address topics such as the meaning of public policy, policy research, the dissertation process, and particular issues of public policy concern. Prerequisite: Admission to program. (Typically offered: Fall)

PUBP 6013. Theories of Public Policy. 3 Hours.
This seminar introduces doctoral students to the major concepts, frameworks, and theories of public policy. Emphasis is on the usefulness and limitations of these frameworks and theories in empirical research. Prerequisite: Graduate standing. (Typically offered: Fall)

PUBP 6023. Law and Public Policy. 3 Hours.
This course focuses on the legal aspects of public policy, with emphasis on the regulatory process and its legal constraints. Also considered are the process of administrative decision making, judicial review, legislative oversight, and public access to government information. (Typically offered: Fall)
PUBP 6033. Community Development Policy and Practice. 3 Hours.
This course examines multiple community development definitions, the community
capitals framework as well as theories, conceptual frameworks and processes and
how these are linked, both historically and currently, to broad-based US public policy
and specifically, housing and workforce development policies. (Typically offered: Summer)

PUBP 604V. Special Topics in Public Policy. 1-6 Hour.
Designed to cover specialized topics not usually presented in depth in regular
courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

PUBP 6103. Policy Planning, Implementation, and Evaluation. 3 Hours.
This interdisciplinary seminar will explore the relationship between policy, public
administration, and organizations in the community. Stakeholder groups will be
considered as part of the newer approaches to practice-driven scholarship. The
class will examine innovative approaches to decision making, strategic management
and policy leadership in complex interorganizational and interagency settings.
(Typically offered: Irregular)

PUBP 6113. Agenda Setting and Policy Formulation. 3 Hours.
Introduces agenda and policy formation focusing on the classic theoretical and
empirical literature. The course is designed to introduce graduate students to a
variety of theories typologies, concepts, and ideas relating to the study of public
policy. (Typically offered: Fall)

PUBP 612V. Research Problems in Policy. 1-6 Hour.
Research problems. (Typically offered: Fall, Spring and Summer) May be repeated
for up to 6 hours of degree credit.

PUBP 6134. Capstone Seminar in Public Policy. 4 Hours.
This course is intended to integrate various policy interests in a specific community
based project. Prerequisite: Instructor permission required. (Typically offered: Fall and Spring)

PUBP 6143. Mixed Method Research Design. 3 Hours.
Mixed method research is a multi-point research strategy that combines quantitative
and qualitative research strategies into a single research project. (Typically offered: Irregular)

PUBP 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Recreation and Sport Management (RESM)
Courses

RESM 5023. Outdoor Adventure Leadership. 3 Hours.
(Formerly RESM 4023.) This course considers the values and scope of outdoor
recreation programs, leadership and skill development with practical experience in a
wilderness environment. The course will include a canoe trip through the wilderness,
and skill training in such areas as orienteering and rock climbing; and leadership
development in interpersonal and processing skills. The graduate portion of the class
is geared toward leading and trip planning for taking college age and older students
into remote areas. Graduate degree credit will not be given for both RESM 4023 and
RESM 5023. (Typically offered: Summer)

RESM 5273. The Intramural Sports Program. 3 Hours.
(Formerly RESM 4273.) Historical development, aim and objectives, organization,
administration, units of competition, program of activities, schedule making, scoring
plans, rules and regulations, awards, and special administrative problems. Graduate
degree credit will not be given for both RESM 4273 and RESM 5273. (Typically offered: Fall Odd Years)

RESM 5283. History and Application of American Sport. 3 Hours.
This survey course will explore the historical development of sport in American
culture and the processes of change in American culture and sport from the 15th
century to the present. Students will learn how to apply historical concepts to current
issues in recreation and sport management. (Typically offered: Irregular)

RESM 5293. Athletics and Higher Education. 3 Hours.
This course features an examination of the historical development of athletics within
American institutions of higher learning with an emphasis upon concepts and ideals
that underlie the developments and the major problems affecting contemporary
intercollegiate athletics. The purpose of this course is to teach the learner about the
development of intercollegiate athletics from the mid-19th century to today. A second
purpose of this course is to examine the major issues facing sport administrators
within intercollegiate athletics today. (Typically offered: Spring and Summer)

RESM 5333. Sport Media and Public Relations. 3 Hours.
The course will explore the relationship between media organizations and sport
organizations, with an emphasis on the business of media rights, as well as public
relations theories such as two-way symmetrical communication and agenda setting.
Finally, the course will examine practical communication tactics employed by public
relations practitioners such as image repair and crisis communications, and the
issues presented by forms of new media. (Typically offered: Fall)

RESM 5463. Sports Facilities Management. 3 Hours.
Considers basic elements and procedures in the planning, design, construction,
operation, and maintenance of sport facilities; management considerations in
conducting various types of events. (Typically offered: Summer)

RESM 560V. Workshop. 1-3 Hour.
Workshop. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

RESM 574V. Internship. 1-3 Hour.
This experiential-based course requires 135 hours per semester of work in a
recreation or sport setting. (Typically offered: Fall, Spring and Summer)

RESM 5813. Social Issues in Sport. 3 Hours.
Using sociological theories and scholarship to examine social and cultural influences
on sport and physical activity. Course is based on a social justice framework and a
cultural studies perspective. (Typically offered: Fall and Summer)

RESM 5833. Recreation and Sport for Special Populations. 3 Hours.
Skills, knowledge, and concepts within recreation and sport which are appropriate
to planning and implementing recreation and sport programs and services for the
handicapped. (Typically offered: Irregular)

RESM 5843. Tourism. 3 Hours.
Explores major concepts of tourism to discover what makes tourism work, how
tourism is organized, and its social and economic effects. (Typically offered: Spring)

RESM 5853. Capstone in Recreation and Sport Management. 3 Hours.
Capstone course where students utilize program courses to solve administrative
issues which may arise in an organization. Attention is given to how departmental
organization, administrative practices and policies, strategic planning, personnel
management, finances, and legal areas are integrated to create solutions to broad-
based contemporary issues. (Typically offered: Spring)

RESM 5873. Leadership in Recreation and Sport Management Services. 3 Hours.
Considers research, theory, and practical applications of leadership principles
utilized in the provision of recreation and sport management services. Focus is
on motivation, attitude, communication, group dynamics, and problem solving.
(Typically offered: Fall and Summer)

RESM 5883. Recreation and Sport Services Promotion. 3 Hours.
Examines specific strategies for promoting recreation and sport programs in the local
community. (Typically offered: Summer)
Rehabilitation Education (RHAB) Courses

RHAB 534V. Supervised Rehabilitation Counseling. 1-3 Hour.
Gives the student practice in counseling under supervision with rehabilitation clients in selected settings and agencies. (Typically offered: Fall, Spring and Summer)

RHAB 5363. Employer Relations and Placement Practicum. 3 Hours.
Students address the placement needs of rehabilitation agencies and their clients by implementing the RehabMark approach to employer development. Prerequisite: RHAB 5493. (Typically offered: Fall, Spring and Summer)

RHAB 5373. Multicultural/Gender Issues in Rehabilitation. 3 Hours.
This course examines multicultural and gender issues of importance to rehabilitation practice and research, including study of women and men with disabilities within different minority cultures. The course uses a power analysis and a minority model of disability as a basis for understanding the relationship between disability, gender, race and ethnicity. (Typically offered: Summer)

RHAB 5383. Theories and Foundations of Addiction. 3 Hours.
This course will introduce students to the field of addictions by defining clinical models of addiction, to include alcohol and other drugs, gambling, food, sex, criminal behavior and other types of addiction. This course will also introduce students to (a) key concepts of pharmacology, assessment, and diagnosis, (b) methods of prevention, intervention, treatment and care, (c) the impact of addiction on the family system, (d) ethics principles, and (e) the 12 core functions of practice for rehabilitation and clinical mental health professionals. (Typically offered: Spring)

RHAB 5493. Vocational Evaluation and Adjustment. 3 Hours.
An in-depth examination of theories and techniques related to evaluation of vocational potential and work adjustment of people with disabilities. (Typically offered: Spring)

RHAB 5513. Professional and Legal Issues in Addiction Counseling. 3 Hours.
This course introduces students to key ethical principles and values within the field of addictions treatment and counseling. The history of the implementation of ethical principles and standards as well as specific professional codes of ethics relevant to the field of addiction (i.e., APA, CRCC, NAADAC) are thoroughly covered. (Typically offered: Irregular)

RHAB 5523. Clinical Assessment and Treatment in Addictions. 3 Hours.
This course introduces students to the process of screening, evaluation/assessment, and treatment processes within the field of addiction. This course will also address special issues related to assessment and treatment such as co-occurring disorders, cultural and gender factors, and pharmacological treatment options. (Typically offered: Irregular)

RHAB 5543. Family Constructs and Addictions Counseling. 3 Hours.
This course analyzes the impact of addictions on the family system and introduces students to the theory of marriage and family approaches used in addictions counseling. Special topics covered in the course include but are not limited to counseling women, employment issues, multicultural issues, ethics, and trauma. (Typically offered: Irregular)

RHAB 5574V. Internship. 1-9 Hour.
Internship. (Typically offered: Fall, Spring and Summer)

RHAB 5643. Advanced Rehabilitation Research. 3 Hours.
An advanced doctoral level course to facilitate the application of scientific values, research skills, and behavior to the generation of rehabilitation knowledge and problem solving. (Typically offered: Spring)

RHAB 575V. Internship. 1-18 Hour.
Advanced supervised practice in a rehabilitation setting. (Typically offered: Fall, Spring and Summer)

RHAB 600V. Master's Thesis. 1-18 Hour.
Independent study. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

RHAB 605V. Independent Study. 1-3 Hour.
Independent study. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

RHAB 6243. Advanced Rehabilitation Research. 3 Hours.
An advanced doctoral level course to facilitate the application of scientific values, research skills, and behavior to the generation of rehabilitation knowledge and problem solving. (Typically offered: Spring)

RHAB 625V. Teaching Internship in Rehabilitation. 1-18 Hour.
Graduate teaching experience in the rehabilitation counseling curriculum. Under the supervision of a faculty member, will participate in the development of syllabi, course materials and examinations. Will team teach graduate rehabilitation courses with the faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

RHAB 6263. Clinical Supervision of Practicum Students. 3 Hours.
The study and practice of supervising master's rehabilitation counseling students in a clinical practicum setting. Prerequisite: Doctoral standing. (Typically offered: Summer)

RHAB 675V. Internship. 1-18 Hour.
Advanced supervised practice in a rehabilitation setting. (Typically offered: Fall, Spring and Summer)

RHAB 699V. Seminar. 1-18 Hour.
Discussion of pertinent topics and issues in the rehabilitation field. Prerequisite: Advanced graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

RHAB 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
Rural Sociology (RSOC)

Courses
RSOC 500V. Special Problems. 1-6 Hour.
Gives experience in executing research and in analyzing a sociological problem of agriculture. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

RSOC 5603. Community and Natural Resources. 3 Hours.
Introduction to the breadth of considerations involved in community resource management, including theoretical frameworks, methodological investigations and applied practices to enhance the ability of community development professionals to work with their communities to plan, develop and monitor the conservation and development of natural resources with multiple functions. (Typically offered: Irregular)

RSOC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

RSOC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Russian (RUSS)

Courses
RUSS 5123. Survey of Russian Literature from Its Beginning to the 1917 Revolution. 3 Hours.
(Formerly RUSS 4123.) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English. Graduate degree credit will not be given for both RUSS 4123 and RUSS 5123. (Typically offered: Irregular)

RUSS 5133. Survey of Russian Literature Since the 1917 Revolution. 3 Hours.
(Formerly RUSS 4133.) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English with readings in English. Graduate degree credit will not be given for both RUSS 4133 and RUSS 5133. (Typically offered: Irregular)
This course is cross-listed with WLIT 5133.

RUSS 575V. Special Investigations. 1-6 Hour.
Special investigations. (Typically offered: Fall and Spring) May be repeated for degree credit.

Social Work (SCWK)

Courses
SCWK 5003. Foundations of Culturally Competent Social Work Practice. 3 Hours.
The purpose of this course is the acquisition and demonstration of beginning graduate-level social work values and ethics, knowledge, and skills necessary for cultural competence in work with individuals, families, groups, organizations, communities, and global contexts. A multi-systems life-course conceptual framework is used. Prerequisite: Admission to the two-year or part-time MSW program. (Typically offered: Fall)

SCWK 5013. Bridge Course: Evidenced Based Social Work. 3 Hours.
This course prepares MSW students to transition from the foundation course to the advanced concentration courses. Students will become familiar with the mission and conceptual framework underlying the advanced concentration and develop beginning knowledge of traditional and alternative approaches to client system assessment. Prerequisite: Admission into the advanced standing MSW program or completion of foundation courses. (Typically offered: Summer)

SCWK 505V. Special Topics in Social Work. 1-6 Hour.
(Formerly SCWK 405V.) Comprehensive study of various topics of importance in contemporary social welfare and social work practice. Graduate degree credit will not be given for both SCWK 405V and SCWK 505V. (Typically offered: Irregular) May be repeated for degree credit.

SCWK 5073. Social Work Research and Technology II. 3 Hours.
This course is intended to build the advanced research skills necessary to develop a research proposal and complete a thesis or capstone project. Students will plan the project, collect and analyze data and write a research report of their findings. Projects will focus on systematic evaluation of service delivery and personal professional practice. Corequisite: SCWK 6000L. Prerequisite: Completion of year one for two-year students or summer semester for advanced standing students. (Typically offered: Fall)

SCWK 5083. Social Work With Elders. 3 Hours.
(Formerly SCWK 4183.) Survey of theories of gerontology, service programs and unmet needs of the aging citizen. Graduate degree credit will not be given for both SCWK 4183 and SCWK 5083. (Typically offered: Irregular)

SCWK 5093. Human Behavior and the Social Environment I. 3 Hours.
(Formerly SCWK 4093.) Provides a conceptual framework for knowledge of human behavior and the social environment with a focus on individuals. Social systems, life-course, assets, and resiliency-based approaches are presented. Special attention is given to the impact of discrimination and oppression on the ability to reach or maintain optimal health and well-being. Graduate degree credit will not be given for both SCWK 4093 and SCWK 5093. Prerequisite: COMM 1313, PSYC 2003, SOCI 2013, SCWK 2133, and SCWK 3193 and (BIOL 1543 and BIOL 1541L, or ANTH 1013 and ANTH 1011L). (Typically offered: Fall and Spring)

SCWK 5103. Human Behavior and the Social Environment II. 3 Hours.
(Formerly SCWK 4103.) This course applies the basic framework for creating and organizing knowledge of human behavior and the social environment acquired in HBSE I to the understanding of family, group, organizational, community, and global systems. Attention is given to discrimination, oppression, the impact of technology, and poverty at each system level. Graduate degree credit will not be given for both SCWK 4103 and SCWK 5103. Prerequisite: SCWK 4093 or SCWK 5093 (formerly SCWK 4093) and SCWK 4153 or SCWK 5353 (formerly SCWK 4153). (Typically offered: Fall and Spring)

SCWK 5143. Global Social and Economic Justice and Oppression. 3 Hours.
The role and responsibilities of the social work profession are examined in an international comparative context. Particular emphasis is given to social workers' responsibilities to advance global social and economic justice and reduce human oppression through community, social, economic, and organizational development strategies. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5153. Children, Youth, and Family. 3 Hours.
This course focuses on the development, revision, and impact of policy and practice in children, youth, and family services. Current issues in policy and practice will be examined. Students will interact with community agencies and utilize class assignments to advocate improvements in current policy and practice. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)
SCWK 5163. Social Work Management, Administration and Supervision. 3 Hours.
This course develops advanced skills in management, administration, and supervision in social work organizations. Emphasis is placed on developing leadership skills in ethics, budgeting, finance, resource development, information management, evaluation, staff hiring, supervision and development, and the use of technology in organizational leadership, development, and maintenance. Prerequisite: Graduate standing and SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5173. Advanced Practice with Families and Couples. 3 Hours.
The purpose of this course is to provide advanced understanding of the knowledge, skills and values needed to assess and intervene effectively with traditional and non-traditional families and couples. The course will examine social systems and life-course strengths approaches to understand how families and couples function. Students will design interventions. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5183. Advanced Practice with Individuals. 3 Hours.
This course develops advanced skills in social work practice on a micro level. Students learn to analyze and compare practice models. They gain skills in selecting a practice model and integrating multiple models based on client needs. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5193. Advanced Practice and Policy in Aging. 3 Hours.
This course focuses on social work practice with, and policies for, older persons. Current, past, and future practices and policies for older persons across systems and the life course are explored. Emphasis is placed on the influences of personal, social, economic, and cultural diversity on the well-being of older persons. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5213. Advanced Practice in Behavioral and Mental Health. 3 Hours.
This advanced course prepares students to identify mental disorders, plan intervention strategies with clients from a strengths perspective, and understand mental health programs through which services are delivered. Differential diagnosis and the impact of socioeconomic status, gender, race, and sexual orientation on diagnosis and treatment decisions are addressed. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5253. Spirituality and Social Work Practice. 3 Hours.
This course prepares students to respond competently and ethically to diverse spiritual and religious perspectives. Utilizing social work ethics and values as a guide, students will develop a comparative, critically reflective approach to practice. Prerequisite: SCWK 4103 or SCWK 5103 (formerly SCWK 4103) or SCWK 5003 or SCWK 5013. (Typically offered: Fall and Spring)

SCWK 5273. Social Work Research and Technology I. 3 Hours.
(Formerly SCWK 4073.) An overview of forms and sources of social work research including existing social data, techniques for collecting original social data, and techniques of organization, interpretation, and presentation of data. Students will also become proficient in the use of current technology for social work research and practice. Graduate degree credit will not be given for both SCWK 4073 and SCWK 5273. Prerequisite: SCWK 4093 or SCWK 5093 (formerly SCWK 4093) and SCWK 4153 or SCWK 5333 (formerly SCWK 4153). Pre- or Corequisite: One of the following: STAT 2303, SOCI 3303 and SOCI 3301L, PSYC 2013, or ESRM 2403. (Typically offered: Fall and Spring)

SCWK 5333. Social Work Practice I. 3 Hours.
(Formerly SCWK 4333.) This is the first in the sequence of practice courses introducing students to the generalist approach to micro social work. This course focuses on developing a solid foundation for practice with individuals, including learning basic communication and helping skills, values, principles, and the connection of theory to practice. Graduate degree credit will not be given for both SCWK 4333 and SCWK 5333. Prerequisite: SCWK 4093 or SCWK 5093 (formerly SCWK 4093) and SCWK 4153 or SCWK 5333 (formerly SCWK 4153). Pre- or Corequisite: SCWK 4103 or SCWK 5103 (formerly SCWK 4103). (Typically offered: Fall and Spring)

SCWK 5343. Advanced Practice with Groups. 3 Hours.
This course provides advanced knowledge, skills, and values needed to assess and intervene effectively with populations seen in the social work practice of group therapy. This course examines group dynamics, life-course and strengths perspectives, and client-centered assessment of needs and their application in agency settings. Prerequisite: SCWK 5003 or SCWK 5013. (Typically offered: Irregular)

SCWK 5353. Social Welfare Policy. 3 Hours.
(Formerly SCWK 4153.) Describes and analyzes the policies and services rendered by local, state, regional, national, and international agencies as well as the policy implications for social work practice. Students prepare to advocate social policy changes designed to improve social conditions, promote social and economic justice, and to empower at-risk populations. Graduate degree credit will not be given for both SCWK 4153 and SCWK 5353. Prerequisite: COMM 1313, PLSC 2003, SCWK 2133, and SCWK 3193. (Typically offered: Fall and Spring)

SCWK 5412. Foundation Field Seminar. 2 Hours.
A required course for MSW students without an accredited undergraduate degree in social work. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to learn peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 5434. (Typically offered: Spring and Summer)

SCWK 5434. Foundation Field Internship. 4 Hours.
This course is required of all graduate students entering the MSW program without an accredited undergraduate degree in social work. Minimum of 330 clock hours of agency-based professional social work practicum experience, supervised by a licensed MSW, is required. Corequisite: SCWK 5412. Prerequisite: SCWK 5003, SCWK 5333 (formerly SCWK 4333), SCWK 5273 (formerly SCWK 4073), SCWK 5093 (formerly SCWK 4093), and SCWK 5353 (formerly SCWK 4153). (Typically offered: Spring and Summer)

SCWK 5442. Field Seminar III. 2 Hours.
This seminar is required of all graduate students entering the MSW program with advanced standing. Students integrate classroom content with experiences in the field, learn peer supervision and consultation, and learn from the experience of other students in the field. Corequisite: SCWK 5444. Prerequisite: Admission to graduate program with advanced standing. (Typically offered: Summer)

SCWK 5444. Field Internship III. 4 Hours.
This course is required of all graduate students entering the MSW program with advanced standing. A minimum of 240 clock hours of agency-based professional social work practicum experience, supervised by a licensed MSW, is required. Corequisite: SCWK 5442. Prerequisite: Admission to graduate program with advanced standing. (Typically offered: Summer)

SCWK 5543. Social Work Practice II. 3 Hours.
(Formerly SCWK 4343.) This is the second course in the social work practice sequence, emphasizing theories, models, and techniques related to generalist practice with families and groups. The course elaborates on system theory as it impacts groups and families, and use of experiential teaching methods. Graduate degree credit will not be given for both SCWK 4343 and SCWK 5543. Prerequisite: SCWK 4103 or SCWK 5103 (formerly SCWK 4103) and SCWK 4333 or SCWK 5333 (formerly SCWK 4333). (Typically offered: Fall and Spring)
SCWK 5733. Social Work Practice III. 3 Hours.
(Formerly SCWK 4733.) Students acquire and practice the skills, knowledge, and values necessary for culturally competent generalist social work practice with organizations and communities. Special attention is given to the implications of discrimination and oppression for attaining social and economic justice. Graduate degree credit will not be given for both SCWK 4733 and SCWK 5733. Prerequisite: SCWK 4333 or SCWK 5333 (formerly SCWK 4333). Pre- or Corequisite: SCWK 4103 or SCWK 5103 (formerly SCWK 4103) and SCWK 4343 or SCWK 5543 (formerly SCWK 4343). (Typically offered: Fall and Spring)

SCWK 596V. Independent Study. 1-6 Hour.
Independent study designed to meet the particular needs of individual graduate students. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SCWK 6000L. Thesis Laboratory. 0 Hours.
This laboratory is required for completion of the thesis, which is developed through components of the graduate Research & Technology sequence. Other courses in the graduate curriculum provide support for the conceptualization and development of the thesis. (Typically offered: Fall and Spring)

SCWK 6003. Advanced Social Work Practice Using the MSLC Perspective. 3 Hours.
Advanced Social Work Practice Using the Multi-Systems Life Course (MSLC) perspective teaches advanced practice behaviors with individuals, families, groups, organizations, and communities. This course focuses on integrating the arenas of advanced theory, research, policy practice, direct practice, required competencies and advanced practice behaviors using the MSLC perspective. Prerequisite: Admission into the advanced standing MSW program or completion of foundation courses. (Typically offered: Fall)

SCWK 6233. Advanced Social Work Practice With Children And Youth Using the MSLC Perspective. 3 Hours.
This course focuses on the development, revision, and impact of practice with children and youth from a Multi-Systems Life Course (MSLC) perspective. Historical trends as well as current practices will be examined with a focus on learning and improving social work practice skills. Prerequisite: SCWK 6003. (Typically offered: Spring)

SCWK 6243. Advanced Social Work Practice With Adults Using the MSLC Perspective. 3 Hours.
This course focuses on the development, revision, and impact of practice with adults from a Multi-Systems Life Course (MSLC) perspective. Historical trends as well as current practices will be examined with a focus on learning and improving social work practice skills. Prerequisite: SCWK 6003. (Typically offered: Spring)

SCWK 6442. Advanced Field Seminar I. 2 Hours.
The first of two advanced field seminars required of all students in the MSW program. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to practice peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 6444. Prerequisite: SCWK 5412 or SCWK 5442. (Typically offered: Fall)

SCWK 6444. Advanced Field Internship I. 4 Hours.
This is the first of two advanced field internships required of all graduate students in the MSW program. A minimum of 330 clock hours of agency-based professional social work practicum experience supervised by a licensed MSW is required. Corequisite: SCWK 6442. Prerequisite: SCWK 5434 or SCWK 5444. (Typically offered: Fall)

SCWK 6452. Advanced Field Seminar II. 2 Hours.
This is the second of two advanced field seminars required of all students in the MSW program. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to demonstrate peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 6454. Prerequisite: SCWK 6442. (Typically offered: Spring)

SCWK 6454. Advanced Field Internship II. 4 Hours.
This is the second of two advanced Field Internship courses required of all graduate students in the MSW program. A minimum of 330 clock hours of agency-based professional social work practicum experience supervised by a licensed MSW is required. Corequisite: SCWK 6452. Prerequisite: SCWK 6442. (Typically offered: Spring)

Sociology (SOCI)

SOCI 5001. Proseminar. 1 Hour.
An informal forum for graduate students and faculty to present and discuss ongoing research interests as well as the current state of the discipline. Prerequisite: Graduate standing. (Typically offered: Fall)

SOCI 500V. Advanced Problems in Sociology. 1-3 Hour.
Individual research on problems or problem areas. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

SOCI 5013. Advanced Social Research. 3 Hours.
An examination of experimental and quasi-experimental designs used in the analysis of sociological data with focus upon appropriate units of analysis and design selection, sampling, interview techniques, and questionnaire construction. Prerequisite: Graduate standing or instructor consent. (Typically offered: Fall)

SOCI 503V. Special Topics. 1-6 Hour.
Designed to cover specialized topics not usually presented in depth in regular courses. Prerequisite: Graduate Standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SOCI 5043. Public Policy, Children and Families. 3 Hours.
The study of the impact of public policy on children and families, and the ways in which policies are created, modified, and changed. Includes the history of public policy concerning children and families. Prerequisite: Graduate standing. (Typically offered: Irregular)

SOCI 5083. Applied Qualitative Research. 3 Hours.
An introduction to research strategies including intensive interviewing, participant observational fieldwork, content analysis, historical analysis, and comparative research. Emphasis on the practical aspects of designing and executing research involving multiple methods of data gathering and analysis. Prerequisite: Graduate standing. (Typically offered: Fall)

SOCI 5113. Seminar in Social Inequality. 3 Hours.
Major theories of stratification; types of stratification systems, comparisons of modern and traditional systems; emergent trends. Prerequisite: Graduate standing. (Typically offered: Irregular)

SOCI 5133. The Community. 3 Hours.
A sociological analysis of the theory, methods and materials used in the study of the community. Prerequisite: Graduate standing. (Typically offered: Irregular)

SOCI 5153. Sociological Perspective on Social Psychology. 3 Hours.
Principles, concepts and methods used in analyzing effects of social structures and processes on the self and interaction. Topics include exchange theory, role analysis, symbolic interactionism, social construction of reality, socialization, interpersonal competence, organizational and leadership development, social dislocation, and stress. Prerequisite: Graduate standing. (Typically offered: Irregular)

SOCI 5233. Theories of Deviance. 3 Hours.
A survey of major theories-classical, developmental, ecological, functionalist, conflict, subcultural, control, and phenomenological-explaining morally condemned differences in society. Particular emphasis is on practical implications of each perspective for policy and social control. Prerequisite: Graduate standing. (Typically offered: Irregular)
SOCI 5253. Classical Social Theory. 3 Hours.
A survey of social theory up to the late 20th century. An introduction to the classical sociological themes that continue to inform research, analysis, and policy formation. Major issues will include the relationship between the individual and the community, and the sources of stability, conflict, and change. Prerequisite: Graduate standing. (Typically offered: Fall)

SOCI 5263. Contemporary Social Theory. 3 Hours.
Analysis of contemporary social theories & major theoretical debates. Emphasis is on critical evaluation & application of theoretical perspectives to current social issues affecting families and communities. Prerequisite: Graduate standing. (Typically offered: Spring)

SOCI 5311L. Applied Data Analysis Laboratory. 1 Hour.
Provides instruction for data transformations required for the advanced statistical procedures used in the Statistical Package for the Social Sciences (SPSS). Also provides instruction in the use of advanced statistical procedures covered in SOCI 5313. Prerequisite: Graduate standing. (Typically offered: Spring)

SOCI 5313. Applied Data Analysis. 3 Hours.
Covers basic concepts and applications of the general linear model to a variety of sociological research issues and problems. Also provides an introduction to binary dependent and multivariate categorical data analysis for sociological research. Prerequisite: Graduate standing. Familiarity with statistical computer programs is assumed. (Typically offered: Spring)

SOCI 5413. Seminar in Criminological Theory. 3 Hours.
An examination of the causation of crime, focusing primarily on sociological theories. Prerequisite: Graduate standing. (Typically offered: Spring)

SOCI 5423. Research in Criminology. 3 Hours.
Examination of empirical research in criminology, focusing on methodological problems, strategies, and findings. Prerequisite: Graduate standing. (Typically offered: Fall)

SOCI 5433. Victimization. 3 Hours.
Study of the causes, correlates, and consequences of victimization, focusing on theories of victimization and the role of victims in the criminal justice system. Prerequisite: Graduate standing. (Typically offered: Fall)

SOCI 5443. Seminar in Terrorism. 3 Hours.
Examination of the causes and consequences of terrorism. Prerequisite: Graduate standing. (Typically offered: Regular)

SOCI 5453. Social Control. 3 Hours.
Study of sociological theories and research on formal social control, primarily institutional responses to criminal behavior. Prerequisite: Graduate standing. (Typically offered: Regular)

SOCI 5463. White Collar Crime. 3 Hours.
Study of the nature of white collar, professional, and corporate crime. Prerequisite: Graduate standing. (Typically offered: Regular)

SOCI 5473. Crime and Community. 3 Hours.
Examination of how neighborhood structural characteristics and social organization affect crime, as well as how the presence of crime and disorder in a community can affect neighborhood social organization. Prerequisite: Graduate standing. (Typically offered: Regular)

SOCI 5503. Research Internship. 3 Hours.
Supervised research experience. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

SOCI 5603. Environmental Sociology. 3 Hours.
(Formerly SOCI 4603.) The course provides a social perspective on environmental issues. It examines the linkage between society, ecological systems and the physical environment. It provides conceptual framework(s) for analyzing environmental issues, considers the role of humans in environmental issues, and enhances understanding the complexity of the relationship between societal organization and environmental change. Graduate degree credit will not be given for both SOCI 4603 and SOCI 5603. (Typically offered: Spring)

This course is cross-listed with HDFS 5603.

SOCI 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Space and Planetary Sciences (SPAC)

Courses

SPAC 5033. Astrophysics I: Stars and Planetary Systems. 3 Hours.
Stellar structure and evolution, the properties of the solar system, and extrasolar planetary systems. (Typically offered: Fall Odd Years)
This course is cross-listed with ASTR 5033.

SPAC 5111L. Space and Planetary Lab. 1 Hour.
Laboratory course in space and planetary sciences consisting of experiments in the five major areas of space and planetary sciences: planetary astronomy, planetary geology, planetary atmospheres, origin and evolution of life and orbital mechanics and astronautics. Intended for students enrolled in the graduate programs in space and planetary sciences. (Typically offered: Fall)

SPAC 5123. Internship. 3 Hours.
Internship for graduate students in the space and planetary sciences graduate degree programs and concentrations in the graduate programs in physics, biology, geosciences and mechanical engineering. Students conduct a phase of their research, normally for one month, at a national or industrial laboratory in North America or overseas. (Typically offered: Fall and Spring)

SPAC 5161. Seminar. 1 Hour.
Seminars organized by the Arkansas-Oklahoma Center for Space and Planetary Sciences covering topics on the cutting edge of research in the field for graduate students conducting research with a faculty member in the space and planetary sciences as part of their graduate degree programs or concentrations in the graduate programs in physics, biology, geology, geography and mechanical engineering. (Typically offered: Fall and Spring)

SPAC 5211. SPAC Proseminar. 1 Hour.
Introductory course consisting of discourses and case studies in ethics, communications and public policy in the administration of space and planetary sciences. Prerequisite: Admission to program or instructor consent. (Typically offered: Spring)

SPAC 5313. Planetary Atmospheres. 3 Hours.
Origins of planetary atmospheres, structures of atmospheres, climate evolution, dynamics of atmospheres, levels in the atmosphere, the upper atmosphere, escape of atmospheres, and comparative planetology of atmospheres. (Typically offered: Regular)

SPAC 5413. Planetary Geology. 3 Hours.
Exploration of the solar system, geology and stratigraphy, meteorite impacts, planetary surfaces, planetary crusts, basaltic volcanism, planetary interiors, chemical composition of the planets, origin and evolution of the Moon and planets. (Typically offered: Spring Even Years)
Spanish (SPAN)

Courses

SPAN 5073. Introduction to Hispanic Linguistics. 3 Hours.
Depends students’ knowledge of the Spanish language through an introduction to the discipline of Linguistics, which is the field of science that studies human language. Areas of Hispanic linguistics that will be covered include phonology (sound system), morphology (word structure), and syntax (sentence structure). (Typically offered: Irregular)

SPAN 5203. Medieval Spanish Literature. 3 Hours.
From the ‘Jarchas’ to the Celestina. (Typically offered: Irregular)

SPAN 5233. Golden Age Novel. 3 Hours.
Major works of Spanish prose fiction from the 16th and 17th centuries, with close reading of major works. (Typically offered: Irregular)

SPAN 5243. Golden Age Poetry and Drama. 3 Hours.
History and development of those genres in the 16th and 17th centuries, with close reading of major works. (Typically offered: Irregular)

SPAN 5253. Colonial Literature and Culture. 3 Hours.
An introductory course to the history, culture and literature of colonial Spanish America from 1492 until 1810. The course will cover representative colonial and indigenous texts and their contexts including Renaissance, Baroque, and travel literature of the Eighteenth Century. The course will be taught in Spanish. (Typically offered: Irregular)

SPAN 5273. Survey of 19th Century Spanish Literature. 3 Hours.
A graduate-level survey of Spanish literature from Neoclassicism to the Generation of 1898. (Typically offered: Irregular)

SPAN 5283. Survey of Contemporary Spanish Literature. 3 Hours.
A graduate-level survey of Spanish literature from the Transition to the present. (Typically offered: Irregular)

SPAN 5343. Survey of 20th Century Spanish Literature. 3 Hours.
A graduate-level survey of Spanish literature from the Generation of 1898 to the Transition. Prerequisite: Graduate standing. (Typically offered: Irregular)

SPAN 5393. 19th Century Spanish American Literature. 3 Hours.
Study of representative literary works from Independence (1810) to 1900’s. The course covers Neoclassicism, Romanticism, Realism/Naturalism, and Modernism and the role of literature in the nation-building process. The course will be taught in Spanish. (Typically offered: Irregular)

SPAN 5403. Spanish American Theatre. 3 Hours.
Historical examination of the theatre in Spanish America, with close analysis of particular of representative works and movements in the 20th century. (Typically offered: Irregular)

SPAN 5433. Cervantes: Don Quijote. 3 Hours.
A close reading of Spain’s greatest literary masterpiece. (Typically offered: Irregular)

SPAN 5453. Cinema and Literature. 3 Hours.
This course examines several Latin American and Spanish texts and their film adaptations as well as the main film making trends in the Hispanic world. (Typically offered: Irregular)

SPAN 5463. 20th Century Spanish American Literature. 3 Hours.
Critical survey of major movements and outstanding representative works in 20th century prose and poetry, from the Mexican Revolution and the avant-garde to the contemporary boom and post-boom. (Typically offered: Irregular)

SPAN 5563. Latino Youth Biliteracy Service Learning Project. 3 Hours.
The Latino Youth Biliteracy Project is a service learning course for students in Spanish and Latin American and Latino Studies. Readings on Latino education policies and challenges, bilingualism, and the immigrant experience. Students commit from 15 to 30 hours of mentoring Latino youth at local schools during the semester (in addition to class meeting times) and complete a research project on Latino education. Prerequisite: Graduate standing. (Typically offered: Irregular)

SPAN 5703. Special Topics. 3 Hours.
May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

SPAN 575V. Special Investigations. 1-6 Hour.
Special investigations. (Typically offered: Irregular) May be repeated for degree credit.

SPAN 5773. Indigenismo Literature. 3 Hours.
A study of ‘indigenismo’, an intellectual and literary tradition in Latin America examining the history of exploitation and marginalization of indigenous peoples. Readings include texts by Mariategui, Icaza, Andrade, Asturias, Arguedas, Castellanos, and also ‘indigenista’ works in music and the plastic arts. (Typically offered: Irregular)

SPAN 5883. Indigenous Literatures. 3 Hours.
A study of native oral narratives, literary texts and other writing forms in the Americas, from ancient times to the present, including the Andean Khipus, Mesoamerican Codices, and Amazonian mythic narratives. (Typically offered: Irregular)

SPAN 5943. U.S. Latino/a Literatures and Cultures. 3 Hours.
Explores the construction and negotiation of Latino/a identities through the study of literary and filmic texts. Theoretical concepts (e.g. latinidad, latinization, intra-latio, cultural remittances) will also be studied. Topics of discussion may include: transnationalism, bilingualism, and interactions between different Latino groups. Taught in Spanish. Prerequisite: Graduate standing. (Typically offered: Irregular)

Statistics (STAT)

Courses

STAT 5001L. Statistics Methods Laboratory. 1 Hour.
(Formerly STAT 4001L.) Introduction to the statistical software SAS, including its use for common statistical analyses. A practical complement to the statistical methodology covered in STAT 4003. Graduate degree credit will not be given for both STAT 4001L and STAT 5001L. (Typically offered: Fall and Spring)
STAT 5003. Statistical Methods. 3 Hours.  
(Formerly STAT 4003.) Describing Data, Basic Probability, Random variables, Uniform, Normal and Binomial Distributions, Sampling Distributions, Confidence Intervals, Hypothesis testing, Correlation and Regression, Contingency table, Comparing two populations, ANOVA. Graduate degree credit will not be given for both STAT 4003 and STAT 5003. (Typically offered: Fall and Spring)

STAT 5033. Nonparametric Statistical Methods. 3 Hours. 
(Formerly STAT 4033.) Chi square tests. Kolmogorov-Smirnov goodness-of-fit tests, the Mann-Whitney and Wilcoxon 2-sampling tests, and various nonparametric measures of association. Graduate degree credit will not be given for both STAT 4033 and STAT 5033. (Typically offered: Fall, Spring and Summer)

STAT 5043. Sampling Techniques. 3 Hours. 
(Formerly STAT 4043.) Considers optimum techniques of simple random, stratified random, cluster, systematic and multistage sampling from finite populations subject to cost precision constraints. Wide range of applications. Graduate degree credit will not be given for both STAT 4043 and STAT 5043. Prerequisite: STAT 4003. (Typically offered: Fall, Spring and Summer)

STAT 505V. Internship in Professional Practice. 1-3 Hour. 
(Formerly STAT 405V.) Professional work experience involving significant use of mathematics or statistics in business, industry or government. Graduate degree credit will not be given for both STAT 405V and STAT 505V. Prerequisite: Departmental consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

STAT 5103. Introduction to Probability Theory. 3 Hours. 
Fundamentals of probability, distribution theory, and random variables; expected value, moments, and generating functions; classic parametric families of distributions; central limit theorems, inequalities, and laws of large numbers. Prerequisite: MATH 2574 and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall) May be repeated for degree credit.

STAT 5113. Statistical Inference. 3 Hours. 
Statistical theory of estimation and testing hypothesis. Prerequisite: STAT 5103 and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring) May be repeated for degree credit.

STAT 5121L. Introduction to R. 1 Hour. 
(Formerly STAT 4101L.) A hands-on introduction to R software, a free and open-source computing environment used for data manipulation and analysis across a broad spectrum of subject areas. Intended for new users. Content begins with simple data manipulation, then complex data structures and common statistical procedures are covered. Graduate degree credit will not be given for both STAT 4101L or STAT 5121L. (Typically offered: Fall) May be repeated for degree credit.

STAT 5313. Regression Analysis. 3 Hours. 
Review of matrix algebra, parameter estimation in linear models, regression diagnostics, collinearity, variable selection, nonparametric regression, Bayesian regression. Prerequisite: STAT 4003 or departmental consent. (Typically offered: Spring) May be repeated for degree credit.

STAT 5333. Analysis of Categorical Responses. 3 Hours. 
Statistical tools to analyze univariate and multivariate categorical responses. Emphasis is given to Generalized Linear Models, including logistic regression and loglinear models. Prerequisite: STAT 4003 or departmental consent. (Typically offered: Spring) May be repeated for degree credit.

STAT 5343. Stochastic Processes. 3 Hours. 
Markov chains, branching processes, birth-death processes, queuing theory with application. Prerequisite: STAT 5103, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

STAT 5353. Methods of Multivariate Analysis. 3 Hours. 
Statistical tools to analyze multivariate datasets. Topics include the multivariate linear model, principal component analysis, factor analysis, linear discriminant analysis, clustering, classification and regression trees, support vector machines, nonlinear dimensionality reduction. Prerequisite: STAT 5313, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Spring) May be repeated for degree credit.

STAT 5373. Experimental Design. 3 Hours. 
(Formerly STAT 4373.) Topics in the design and analysis of planned experiments, including randomized block, Latin square, split plot, and BIB designs, use of fractional factorial replication, and repeated measures. Graduate degree credit will not be given for both STAT 4373 and STAT 5373. Prerequisite: STAT 4003. (Typically offered: Spring) May be repeated for degree credit.

STAT 5383. Time Series Analysis. 3 Hours. 
Identification, estimation and forecasting of time series. Spectral analysis including the fast Fourier transform computational aspects are emphasized. Prerequisite: STAT 5103, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

STAT 5413. Spatial Statistics. 3 Hours. 
Applied spatial statistics, covering univariate spatial modeling (kriging), multivariate spatial modeling (cokriging), methods of estimation and inference, and spatial sampling designs. Special relevance to remote sensing. Prerequisite: STAT 5313, and graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Fall) May be repeated for degree credit.

STAT 5443. Computational Statistics. 3 Hours. 
In-depth introduction to computer-based algorithms used for inference and forecasting. Course content may vary by semester. Possible algorithms covered could include: resampling methods (bootstrap), Markov chain Monte Carlo, variable selection in high-dimensional regression (LASSO and LARS), artificial neural networks, ensemble methods (boosting, bagging, random forests), and kernel methods. Prerequisite: STAT 5113 or departmental consent. (Typically offered: Spring) May be repeated for degree credit.

STAT 550V. Statistical Consulting. 1-3 Hour. 
Designed to give students a statistical consulting practicum. Students meet with clients, analyze data and prepare reports for the clients. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

STAT 610V. Research in Statistics. 1-4 Hour. 
Research in statistics. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Irregular) May be repeated for degree credit.

STAT 630V. Topics in Statistics. 1-3 Hour. 
Current state of the art on methodology in one of the topics: multivariate analysis, time series analysis, sequential analysis, factor analysis, or biostatistics. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. (Typically offered: Irregular) May be repeated for degree credit.

Statistics and Analytics (STAN) Courses

STAN 501V. Special Topics in Statistics and Analytics. 1-6 Hour. 
Designed to cover specialized topics not usually presented in depth in regular courses. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

STAN 502V. Research Problems in Statistics and Analytics. 1-6 Hour. 
Designed to allow focused study into student's research area. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

STAN 600V. Master's Thesis. 1-6 Hour. 
Master’s Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
Theatre (THTR)

Courses

THTR 5123. Theatrical Design Rendering Techniques. 3 Hours.
Investigation of drawing and painting methods and materials useful to theatrical designers. Integration of graphic communication with overall production conceptualization will be explored through examination of various theatre styles and periods. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

THTR 5133. Design Portfolio Development. 3 Hours.
Exploration and practice of the skills and techniques used to prepare and present a professional design portfolio and materials in order to successfully interview for a career in the theatre. Prerequisite: Graduate Standing in Theatre or by instructor permission. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

THTR 5143. History of Decor for the Stage. 3 Hours.
An overview of architectural decoration and its application to theatrical design from the Predynastic Period (4400-3200 B.C.) through the Art Deco period with references to contemporary decor. Prerequisite: Graduate standing. (Typically offered: Irregular)

THTR 5161. Musical Theatre Orchestra. 1 Hour.
A music ensemble class made up of students from all majors who will rehearse together and perform as the pit orchestra for the musical produced by the Department of Theatre. Instrumentation and musical styles vary from show to show. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

THTR 5173. Drafting for the Designer. 3 Hours.
Focuses on industry standard practices of drafting. Students will study and execute design drafting packages for the theatre, including but not limited to Designer Drawings, Painter’s Elevations, Props Packages, Lighting Plots and Sections. Prerequisite: Graduate Standing in Theatre or by instructor permission. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

THTR 5183. Scene Design Studio. 3 Hours.
Individual and advanced projects in designing scenery for various theatrical genres as well as non-theatrical applications with emphasis on the design process involving playscript analysis, text analysis, and research. Collaboration skills and advanced rendering techniques will be explored. Contributes to on-going portfolio development. Prerequisite: THTR 4653 or THTR 5653 (formerly THTR 4653) or instructor consent. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

THTR 5193. Scene Technology Studio. 3 Hours.
Individual and advanced projects in scenic techniques with emphasis on scene painting, drafting, rendering, properties design, or scenic crafts as determined by student need. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

THTR 5213. Costume Design. 3 Hours.
Advanced study of the art and practice of stage costume design. Emphasis on the expression of character through costume. Development of rendering and research skills. Portfolio development. (Typically offered: Irregular)

THTR 5283. Costume Design Studio. 3 Hours.
Individual and advanced projects in designing costumes for various theatrical genres with emphasis on the design process involving text interpretation, character analysis, and research. Collaboration skills and advanced rendering techniques will be explored. Contributes to on-going portfolio development. Prerequisite: THTR 5213 or THTR 5213 or instructor consent. (Typically offered: Fall) May be repeated for up to 9 hours of degree credit.

THTR 5293. Costume Technology Studio. 3 Hours.
Individual and advanced projects in costume construction and techniques with emphasis on flat pattern, draping, corsetry, tailoring or costume crafts as determined by student need. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

THTR 5353. Stage Lighting Technology. 3 Hours.
The thorough examination of the technology of equipment that supports the art of stage lighting design: theory, operating principles and specification of lamps, fixtures, control systems and special effect hardware will be explored. Prerequisite: Graduate standing. (Typically offered: Irregular)

THTR 5383. Lighting Technology Studio. 3 Hours.
Individual and advanced projects in lighting technology with emphasis on light sources, lighting control, equipment design and specification and the mechanics of lighting. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

THTR 5393. Lighting Design Studio. 3 Hours.
Individual projects in lighting design with emphasis on the design process involving script interpretation, design aesthetics and research. Lighting design applications to a variety of venues will be studied. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

THTR 5413. African American Theatre History -- 1950 to Present. 3 Hours.
(Formerly THTR 4463.) A chronological examination of African-American theatre history from 1950 to the present through the study of African-American plays and political/social conditions. Upon completion of this course the student should be familiar with the major works of African-American theatre and have a deeper understanding of American History. Graduate degree credit will not be given for both THTR 4463 and THTR 5413. (Typically offered: Spring)

THTR 542V. Graduate Acting Studio. 1-3 Hour.
Provides actors with intensive opportunities to explore specific aspects of their craft. Sample topics include characterization, Chekhov, Pinter, Brecht, improvisation and mask work. Topics vary each semester. Prerequisite: Graduate standing in Theatre. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

THTR 5432. Graduate Voice and Speech I. 2 Hours.
Teaches how to build clear vocal production using proper breath support, grounded in the Alexander technique. Emphasis on the connection between breath and thought, learning to undo inadequate vocal habits, and vocal hygiene. Prerequisite: Graduate standing in Theatre. (Typically offered: Fall) May be repeated for up to 4 hours of degree credit.

THTR 5443. Graduate Acting: Period Styles. 3 Hours.
Styles of acting in relation to French and English Dramatic Literature (16th-19th Centuries). This course also examines the historical and cultural influences that shaped each genre. A period dance component is included. Prerequisite: Graduate standing in Theatre. (Typically offered: Spring)

THTR 545V. Musical Theatre Performance. 1-3 Hour.
Theory and techniques of performing a singing role for the theatre. Integrates acting and vocal techniques and examines the relationship between score and text. Prerequisite: Graduate standing in Theatre. (Typically offered: Spring)

THTR 5463. Audition Techniques. 3 Hours.
A thorough study and practical application of audition skills and techniques. This course will equip the student with prepared audition pieces and experience in cold reading, on-camera work, and improvisation. The course also explores the practical needs of the actor; from how to get an audition to how to prepare a resume. Prerequisite: Graduate standing in Theatre. (Typically offered: Fall, Spring and Summer)
THTR 5473. Graduate Acting: Shakespeare. 3 Hours.
Analysis of Shakespeare for performance. Work will include the plays of Shakespeare and his contemporaries, including cultural and theatrical contexts required for understanding the scripts. Prerequisite: Graduate standing in Theatre.
(Typically offered: Irregular)

THTR 548V. Meisner Technique I. 1-3 Hour.
Acting theory and exercises of Sanford Meisner, including repetition work, connecting with partner, three moment game, activities, and emotional preparation. Prerequisite: Graduate standing in Theatre.
(Typically offered: Irregular)

THTR 549V. Meisner Technique II. 1-3 Hour.
Continuation of Meisner Technique I. Incorporation of theory and advanced exercises of the Meisner Technique into the playing of text. Prerequisite: THTR 548V.
(Typically offered: Irregular)

THTR 5511. Alexander Technique Lessons. 1 Hour.
Students will become aware of habitual patterns of tension and how these patterns interfere with performance, learning, and overall health. The Technique offers practical skills for improving coordination and re-gaining a sense of ease of movement in all activities. Prerequisite: Graduate standing in Theatre. Prerequisite: Graduate standing in Theatre. Prerequisite: Graduate standing in Theatre. May be repeated for up to 6 hours of degree credit.

THTR 5523. Writing for Television and Screen. 3 Hours.
Advanced study and practice in writing for the small and big screen, with focus on writing for television. This writing workshop is an investigation into the form, structure, and vocabulary of writing for television, designed to give students tools, strategies, and practice in writing for television. Prerequisite: Graduate standing in Theatre. May be repeated for up to 9 hours of degree credit.

THTR 5533. Graduate Playwriting: Special Projects. 3 Hours.
Advanced study and practice in the area of playwriting. The area of concentration will be determined by the student's specific writing project(s). Prerequisite: Graduate standing. Prerequisite: Graduate standing in Theatre. May be repeated for up to 18 hours of degree credit.

THTR 5543. Creating a One-Person Show. 3 Hours.
Actors learn to use compelling personal experiences and interests in the creation of a unique one-person show. Includes exploration in characterization, staging and playwriting. Culminates in the public presentation of a short one-person show. Prerequisite: Graduate standing in Theatre. May be repeated for up to 18 hours of degree credit.

THTR 5552. Graduate Voice and Speech II. 2 Hours.
A continuation of Graduate Voice and Speech I, exploring more closely the connection between breath support and volume, pitch, range, resonance and articulation. Prerequisite: THTR 5432. Prerequisite: Graduate standing in Theatre. Prerequisite: Graduate standing in Theatre. May be repeated for up to 9 hours of degree credit.

THTR 5563. Creating a One-Person Show. 3 Hours.
Continuation of Graduate Voice and Speech II, focusing on the classification of vowels and consonants according to the International Phonetic Alphabet (IPA). Prerequisite: THTR 5552. Prerequisite: Graduate standing in Theatre. May be repeated for up to 12 hours of degree credit.

THTR 5572. Graduate Voice and Speech IV. 2 Hours.
Continuation of Graduate Voice and Speech III. Extension of the application of the IPA to the analysis of different accents of individuals for whom English is a second language. Approximately eight dialects of English will be examined. Prerequisite: THTR 5562. Prerequisite: Graduate standing in Theatre. May be repeated for up to 9 hours of degree credit.

THTR 5593. Acting and Directing Absurdist Theatre. 3 Hours.
This course focuses on a particular dramatic style that developed following World War II: Absurdism. In scene presentation projects, students will grapple with the unusual challenges acting and directing these plays, as well as explore the cultural contexts, philosophies and theatrical traditions that led to their invention. Prerequisite: Graduate standing in Theatre. May be repeated for up to 12 hours of degree credit.

THTR 5613. Graduate Directing Principles. 3 Hours.
Theory and technique of directing realistic drama: script analysis; spatial considerations of composition and picturization; development in production of the Aristotelian concepts of plot, character, thought, diction, music (sound), and spectacle. Prerequisite: Graduate standing. Prerequisite: Graduate standing in Theatre. May be repeated for up to 12 hours of degree credit.

THTR 5643. Devised Theatre. 3 Hours.
Explores performer-created works developed through group dynamics, with emphasis on innovative source materials and inventive theatrical approaches. Prerequisite: Graduate standing in Theatre. May be repeated for up to 12 hours of degree credit.

THTR 5653. Scene Design. 3 Hours.
Offers directors practice in the adaptation and staging of non-theatrical prose, poetry and current events. Individual projects in collaboration with actors. Prerequisite: Graduate standing in Theatre. May be repeated for up to 12 hours of degree credit.

THTR 5663. Directing Modern Drama. 3 Hours.
Studio course exploring the challenges of directing post-19th Century dramatic literature. Individual projects in collaboration with actors. Sample dramatic literature includes styles such as Realism, Expressionism, Absurdism, post-Modernism and Epic Theatre. Topics vary each semester. Prerequisite: Graduate standing in Theatre. May be repeated for up to 12 hours of degree credit.

THTR 5673. Adapting and Directing Non-Theatrical Texts. 3 Hours.
Offers directors practice in the adaptation and staging of non-theatrical prose, poetry and current events. Individual projects in collaboration with actors. Prerequisite: Graduate standing in Theatre. May be repeated for up to 12 hours of degree credit.

THTR 5683. Directing Studio. 3 Hours.
Hands-on exploration into the direction of historical and contemporary texts and styles, including Greek, Roman, Shakespeare, Realism, American and international scripts and the adaptation of non-theatrical material. Topics vary each semester. Includes discussion and investigation of the theatrical arts and collaborative and production processes. Prerequisite: MFA Directing student or instructor consent. Prerequisite: MFA Directing student or instructor consent. Prerequisite: MFA Directing student or instructor consent. May be repeated for up to 12 hours of degree credit.

THTR 5691. Scene Study for Directing Studio. 1 Hour.
Participation as an actor in scenes presented for the graduate Directing Studio course. Varying historical and contemporary texts and styles each semester. Class meets one hour each week, plus outside rehearsals, depending on casting. Prerequisite: Instructor consent. Prerequisite: Instructor consent. Prerequisite: Instructor consent. May be repeated for up to 4 hours of degree credit.

THTR 5713. Directing Classics. 3 Hours.
Explores the challenges of directing classic texts. Individual projects in collaboration with actors on a wide variety of pre-20th Century dramatic literature. Topics vary each semester. Prerequisite: Graduate standing in Theatre. May be repeated for up to 12 hours of degree credit.

THTR 5723. History of the Theatre I. 3 Hours.
A comprehensive study of the theatre in different cultures and ages, as an institution, as an art, and as a vision of life. Prerequisite: Graduate standing in Theatre. Prerequisite: Graduate standing in Theatre. Prerequisite: Graduate standing in Theatre. May be repeated for up to 12 hours of degree credit.

THTR 5733. History of the Theatre II. 3 Hours.
A continuation of THTR 5723. Prerequisite: Graduate standing in Theatre. Prerequisite: Graduate standing in Theatre. Prerequisite: Graduate standing in Theatre. May be repeated for up to 12 hours of degree credit.

THTR 5763. Dramatic Criticism. 3 Hours.
Analysis of critical theories from Aristotle to the present; interrelationships of theatre disciplines as well as the influence of the church, state, and press on dramatic criticism. Prerequisite: Senior or graduate standing. Prerequisite: Senior or graduate standing. Prerequisite: Senior or graduate standing. May be repeated for up to 6 hours of degree credit.
UACS 501V. Special Topics in Public Service. 1-3 Hour.
Designed to cover specialized topics not usually presented in depth in regular courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

UACS 502V. Advanced Problems in Public Service. 1-3 Hour.
Provides an opportunity for individual study. (Typically offered: Irregular)

UACS 5101. Ethical and Legal Dimensions of Public Service. 1 Hour.
This course will provide an overview of the primary ethical principles and legal concepts that guide decisions in the public realm. Traditional academic study of ethical and legal theory will be combined with practical approaches to problem solving. Students will explore issues of economic, political, and social justice through case studies of current issues. Students will construct cases that are relevant to their own fields and present them to the class, identifying ethical and legal constraints on decision-making and implementation. (Typically offered: Irregular)

UACS 5303. Communication Processes and Conflict Transformation. 3 Hours.
The course is designed to increase the student's personal communication effectiveness as a leader and public servant, and to enable students to understand the application of communication processes in the public arena. (Typically offered: Irregular)

UACS 5313. Dynamics of Social Change. 3 Hours.
The course deals with the elements of social change in a democratic society, and how these intersect with and are affected by economic and political forces. A critical examination of the various justifications for promoting or discouraging social change will be undertaken, and the inherent strengths and weaknesses of these various approaches will be analyzed. Real-world cases will be used, and a culminating exercise will be a strategic assessment of the Lower Mississippi Delta. (Typically offered: Irregular)

UACS 5323. Leadership in Public Service. 3 Hours.
This course is designed to increase students' knowledge of leadership concepts and best practices, provide opportunities and experiences that improve leadership skills and techniques, and enhance capabilities in organizational management. Students will assess their leadership strengths and weaknesses, as well as develop an action plan to match their career goals. They will improve knowledge and skills in building diverse teams, in initiating/managing change, in addressing uncertainty, and in leading non-governmental organizations. At the end of the course, students should be able to design leadership strategies to successfully address a spectrum of issues in public service and in promoting the community good. (Typically offered: Irregular)

UACS 5333. Analysis for Decision Making In Public Service. 3 Hours.
This course is intended to provide students with analytical tools that enhance their skills in diagnosing problems and formulating solutions within organizations and communities. Instruction will focus on evaluating community assets as a balance to assessing community need. Underlying values of social justice and collaborative problem-solving provide a benchmark for these activities. Students, working in teams, will be challenged to apply their skills to cases related to affordable housing and homelessness. (Typically offered: Irregular)

Walton College of Business (WCOB)

Courses

WCOB 5023. Sustainability in Business. 3 Hours.
The course focuses on theoretical and practical bases for pursuing sustainability in business and society. (Typically offered: Fall and Spring)

WCOB 510V. Special Topics in Business. 1-3 Hour.
Special business topics of an interdisciplinary nature. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WCOB 5843. Cross-Sector Collaboration for Sustainability. 3 Hours.
This course explores how organizations in the three sectors of society work together in value creation by addressing social and environmental problems. Focusing on business and nonprofit organizations, we investigate the forces that bring about and influence these collaborations from practical and theoretical perspectives, and managerial responses to collaboration challenges. Prerequisite: Graduate Status. (Typically offered: Irregular)

WCOB 6111. Seminar in Business Administration Teaching I. 1 Hour.
This course in college level teaching is designed for graduate students and new college teachers with specific emphasis on the Business Administration learning and classroom management. The purpose of this course is to introduce graduate students to principles of teaching and learning and to prepare these future teachers to lifelong learners in the classroom as teachers. Prerequisite: Graduate standing. (Typically offered: Fall)
World Languages, Literatures and Cultures (WLLC)

Courses

WLLC 5023. Languages, Cultures, and Teaching with Technology. 3 Hours.
This course provides graduate students with innovative ways to teach and communicate through the use of modern technologies as applied to second languages. Topics of discussion include instructional systems design, Web 2.0 technologies, presentation technologies, online facilitation, and pedagogical strategies for using technological tools in language and culture courses. Prerequisite: Graduate standing. (Typically offered: Fall)

WLLC 5033. Languages, Cultures and Teaching with Video. 3 Hours.
This course provides graduate students with the knowledge and skills needed to teach and communicate through the use of video as applied to second languages. Topics of discussion include instructional systems design, development of strong pedagogical strategies for teaching with film, analysis of research focused on subtitling, learning strategies, mental effort, and language and culture development, as well as some videotaping and editing. Prerequisite: Reading knowledge of a foreign language. (Typically offered: Irregular)

WLLC 504V. Translation Workshop. 1-6 Hour.
Problems of translation and the role of the translator as both scholar and creative writer; involves primarily the discussion in workshop of the translations of poetry, drama, and fiction done by the students, some emphasis upon comparative studies of existing translations of well-known works. Primary material will vary. Prerequisite: Reading knowledge of a foreign language. (Typically offered: Irregular)

This course is cross-listed with ENGL 5043.

WLLC 5063. Teaching Foreign Languages on the College Level. 3 Hours.
Focus on basic methodological concepts and their practical application to college foreign language instruction. (Typically offered: Irregular)

WLLC 5463. Descriptive Linguistics. 3 Hours.
A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Fall)

This course is cross-listed with ANTH 5473, ENGL 5463.

WLLC 5723. Language Learning Research and Theory. 3 Hours.
Introduces research and theory in the field of second language learning and acquisition. Develops the ability to critically read and assess published research, while connecting with current theories of how languages are learned. Also introduces the process of carrying out research in language learning. A research project proposal is required. (Typically offered: Irregular)

WLLC 575V. Special Investigations. 1-6 Hour.
Special investigations in world languages, literatures and cultures. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WLLC 6553. Applied Linguistics Seminar. 3 Hours.
Research and discussion in areas of applied linguistics ranging from discourse analysis, literacy, language pedagogy, and language planning to translation theory. Subject matter changes depending on student interest and faculty expertise. Prerequisite: WLLC 5463 or equivalent introduction to linguistics. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

World Literature (WLIT)

Courses

WLIT 5123. Survey of Russian Literature from Its Beginning to the 1917 Revolution. 3 Hours.
(Formerly WLIT 4123.) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English. Graduate degree credit will not be given for both WLIT 4123 and WLIT 5123. (Typically offered: Irregular)

WLIT 5133. Survey of Russian Literature Since the 1917 Revolution. 3 Hours.
(Formerly WLIT 4133.) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English with readings in English. Graduate degree credit will not be given for both WLIT 4133 and WLIT 5133. (Typically offered: Irregular)

This course is cross-listed with RUSS 5133.

WLIT 5193. Introduction to Comparative Literature. 3 Hours.
Literary theory, genres, movements, and influences. (Typically offered: Irregular)

WLIT 5253. The Quran as Literature. 3 Hours.
The Quran as literary text; its style and form, historical context, translation, issues, communities of interpretation, and comparative perspectives. Course's integrated approach includes translations of literature originally in Arabic. All readings in English; students with reading abilities in Arabic encouraged to read original text. (Typically offered: Irregular)

WLIT 5623. The Bible as Literature. 3 Hours.
The several translations of the Bible; its qualities as great literature; its influence upon literature in English; types of literary forms. (Typically offered: Irregular)

This course is cross-listed with ENGL 5623.

WLIT 575V. Special Investigations on World Literatures and Cultures. 1-6 Hour.
Independent study of a special topic in world literatures and cultures. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WLIT 5993. African Literature. 3 Hours.
(Formerly WLIT 4993.) A study of modern African fiction, drama, poetry, and film from various parts of Africa in their cultural context. Works are in English or English translation. Graduate credit will not be given for both WLIT 4993 and WLIT 5993. (Typically offered: Irregular)

WLIT 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

WLIT 603V. Special Studies in Comparative Literature. 1-6 Hour.
Special studies in comparative literature. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

WLIT 6703. Psychoanalysis and Culture. 3 Hours.
Readings of key texts in Psychoanalytic thought and cultural criticism including Freud, Lacan, Kristeva, Certeau, Zizek, and others. Selections of Psychoanalytic approaches to literature, film and gender and trauma studies. (Typically offered: Irregular)

WLIT 6713. Literature of Spain, 711-1615 C.E.. 3 Hours.
Examines the multiple cultural traditions of Spain between 711-1615 C.E. and train to produce scholarship pertinent to the field. Integrated approach includes English translations of literature originally in Arabic (50%+ of content), Hebrew, Spanish, French. Students with reading abilities in original languages encouraged to read original text. (Typically offered: Irregular)
WLIT 6803. Postcolonial Theory and Subaltern Studies. 3 Hours.
Seminar examining the geopolitical (imperial, colonial and national) implications of
knowledge and culture. Selected readings of early postcolonial texts by Cesaire,
Fanon, and Fernandez Retamar, as well as more recent texts by Said, Spivak,
Bhabha, Mignolo, Beverly and Chakrabarty among others. (Typically offered:
Irregular) May be repeated for up to 6 hours of degree credit.

WLIT 690V. Seminar. 1-6 Hour.
Seminar. (Typically offered: Irregular) May be repeated for up to 6 hours of degree
credit.

WLIT 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated
for degree credit.
**Glossary**

**Academic Dismissal.** An academic status (http://catalog.uark.edu/undergraduatecatalog/academicregulations/academicprobationsuspensionanddismissal/) resulting from unsatisfactory grades in which students are not permitted to enroll at the university until approved through an appeal process.

**Academic Probation.** An academic status (http://catalog.uark.edu/undergraduatecatalog/academicregulations/academicprobationsuspensionanddismissal/) resulting from unsatisfactory grades.

**Academic Suspension.** An academic status (http://catalog.uark.edu/undergraduatecatalog/academicregulations/academicprobationsuspensionanddismissal/) for unsatisfactory grades in which students are not permitted to register for courses for a specified time period.

**Act 1052/467.** Section 21 of Arkansas Act 467 of 1989 specifies that all first-time entering freshmen who are enrolled in a bachelor’s degree program will be placed in either college-level credit courses in English and mathematics or developmental courses in English composition, reading, and mathematics on the basis of their scores on specified tests. Find out more in the Registration (http://catalog.uark.edu/undergraduatecatalog/orientationandregistration/) section of the catalog.

**Activity Course.** Course devoted to participation in, knowledge of, or performance of some form of physical activity.

**Add.** See Drop/Add below.

**Additional Major.** Students fulfilling all requirements for the B.S., B.S.W., B.F.A. and B.M. degrees, including all core requirements and at least one major in these degree programs, may also claim an additional major in a humanistic discipline, social science, or interdisciplinary program associated with a B.A. degree. Upon completion of all major requirements of the additional discipline, the additional major will be made part of the student’s transcript; however, a B.A. degree is not awarded. This is also an option in German for any non-arts and science student.

**Advance Registration.** A period of time scheduled during a regular (fall or spring) semester that allows currently enrolled students to register for the next regular semester. In addition, advance registration for the summer sessions is scheduled during the spring semester.

**Applied Instruction.** A course that integrates both the teaching and hands-on application of knowledge or information; attends to the practical and utilitarian function of the subject (distinguished from theoretical). Examples may include: livestock judging team, music and art courses, cooperative education, and experiential learning.

**Apprenticeship/Externship.** Experiential learning opportunity to give students practical exposure and training in a career field. This is generally off-campus, supervised, and designed to prepare students for the transition from school to career.

**Area Studies.** Interdisciplinary study of geographical or cultural areas. Topics include the history, geography, politics, culture, language, and literature of the area. Generally, an area study is offered as a minor or a second major.

**Audit.** To take a course without credit.

**Adviser.** A faculty or staff member assigned to a student to advise that student on academic matters that include degree requirements and selection of courses.

**Certification Requirements.** The set of course, hour, and other academic requirements that must be completed to receive certification.

**Class Schedule.** List of courses and sections for a specific semester, including names of instructors; day, hour, and place of class meetings; and detailed registration procedures. The class schedule is available online.

**Clinical Rotation/Instruction.** Course that takes place in a clinical setting, including practice labs, hospitals, and other agencies; students apply methods and principles of a clinical discipline.

**College or School.** One of ten major divisions within the university that offers specialized curricula.

**Combined Major.** A combination of subsets of two primary discipline specific requirements, each of which is typically 15 to 24 hours and less than the number required for a major, which together constitute the major in a program of study leading to one bachelor’s degree with a combined major in two disciplines.

**Concentration.** A subset of requirements within the discipline specific requirements of a program of study (graduate field of study or undergraduate major) leading to a graduate or bachelor’s degree.

**Consent.** A prerequisite that requires the student to obtain approval from the instructor or the department before he or she will be allowed to register for the course.

**Core.** A core of required coursework may be specified for students at the university level, the college or school level, the department level, and the program or area level. A core is what is required for all students at that level or in that program. Core and major requirements are usually stated either in terms of specific required courses or of lists of courses from which any course chosen will meet the requirement. The “list” may actually be a defined set such as lower-level courses or upper-level courses; courses in the department, in the program, or in the college; or courses identified by one or more course, program, or department codes. Elective courses may involve a greater or lesser degree of student choice. A general elective course could be one that is needed to complete the number of hours required for the degree when no other requirements remain to be met. A free elective course may be one that is not needed to complete either course requirements or hour requirements. See University Core below.

**Corequisite.** A course that must be taken at the same time as the course described.

**Correspondence.** See Self-Paced (Correspondence) below.

**Course.** A unit of academic instruction.

**Course Deficiencies.** Lacking required units of study in high school. Find out more in the Placement and Proficiency portion (http://catalog.uark.edu/undergraduatecatalog/enrollmentservices/placementandproficiencytests/) of the Enrollment Services section of the catalog.

**Course Load.** The number of semester credit hours a student may schedule in a given term.
Credit Hour. See Academic Policy 1200.40 (https://provost.uark.edu/policies/120040.php) for university's credit hour definition.

Cumulative Grade-Point Average. An average computed by dividing the total number of grade points earned by the total number of credit hours attempted in all courses for which grades (rather than marks) are given.

Curriculum. A program of courses comprising the formal requirements for a degree in a particular field of study.

Degree Program. A program of study defined by sets of academic requirements that lead to a degree which the university is authorized to offer. Undergraduate degree requirements are typically stated in terms of numbers of credit hours and specific courses at the university, college or school, and discipline levels. Graduate degree requirements are typically stated in terms of number of credit hours and specific courses at the discipline level.

Department. Division of faculty or instruction within a college, such as Department of Accounting within the Sam M. Walton College of Business.

Dependent Major. See Second Major below.

Dissertation/Thesis Research. Research conducted and submitted in support of candidature for a degree or professional qualification; a formal treatise presenting the results of study submitted in partial fulfillment of the requirements of an advanced degree; process requires intensive interaction between student and professor.

Double Degree Program. A program of study that includes one set of university requirements and two sets of college or school and primary discipline-specific requirements and leads to two different bachelor’s degrees with two different majors.

Double Major. The two complete sets of primary discipline-specific requirements, typically consisting of a minimum of 30 hours each, constituting the two majors within a program of study leading to one bachelor’s degree with two complete majors.

Drill. Supplemental instruction or practice using repetition or discussion.

Drop/Add. Dropping or adding of select courses while still remaining enrolled in the university. This can only be done during specified times as published in the academic calendar (http://registrar.uark.edu/academic-dates/academic-semester-calendar/). See also Withdrawal below.

Eight-Semester Degree Completion Program. Most majors offered by the University of Arkansas can be completed in eight semesters, and the university provides plans that show students which classes to take each semester in order to finish in eight semesters. A few undergraduate majors either require a summer internship or fieldwork or are five-year professional programs, and may therefore not qualify for the eight-semester degree completion program.

Elective. Elective courses may involve a greater or lesser degree of student choice. A general elective course could be one that is needed to complete the number of hours required for the degree when no other requirements remain to be met. A free elective course may be one that is not needed to complete either course requirements or hour requirements.

Equivalent. A course allowed in place of a similar course in the same academic discipline. May require approval by an academic dean.

Externship. See Apprenticeship/Externship above.

Fees. Charges, additional to tuition, that cover specific university services, programs, facilities, activities and/or events. Find out more in the undergraduate Fee and Cost Estimates (http://catalog.uark.edu/undergraduatecatalog/feeandcosts/) section or the graduate Fee and Cost Estimates (p. 421) section.

Field of Study. The primary discipline-specific (or multidisciplinary or interdisciplinary) set of requirements in a graduate program of study. The field of study typically consists of a minimum of 30 hours at the master’s degree level, of 30 hours beyond the master’s degree at the educational specialist level, and of 96 hours for the doctor of education degree. Field of study hour requirements vary more widely for the doctor of philosophy degree, but 60 hours is typical.

Field Studies. Hands-on study undertaken outside the laboratory or place of learning, usually in a natural environment or among the general public. Examples may include archeological and geological field studies.

Focused Studies. A set of courses that a student may elect to take as part of the major requirements and which provides focus in a particular area related to the major. Completing a focused study is not required for the major, but serves as a guide for students who want to further specialize their studies. Focused studies do not need Arkansas Department of Higher Education approval and do not appear on the transcript.

Grade Points. Points per semester hour assigned to a grade (not a mark), indicating numerical value of the grade. The grade-point average indicates overall performance and is computed by dividing the total number of grade points earned by the number of semester hours attempted.

Grade Sanction(s). A penalty for academic dishonesty. Grade sanctions may consist of either a grade of zero or a failing grade on part or all of a submitted assignment or examination or the lowering of a course grade, or a failing grade of XF to denote failure by academic dishonesty.

Hazing. Any activity that is required of an individual that may cause mental or physical stress and/or embarrassment when in the process of joining or belonging to any organization.

Independent Study. Project collaboratively designed by the instructor and student to pursue an area of study not covered by the established curriculum; typically completed without class attendance but through formal supervision by an instructor.

Internship. A formal program that provides practical experience in an occupation or profession; applied, monitored, and supervised, field-based learning experience for which the student may or may not be paid; may include field work/experience, supervised courses, student teaching, and cooperative education; provides opportunities for students to gain experience in a career field.

Intersession. A two-week mini-session that is held at the beginning of the regular fall, spring, and summer terms. Coursework during an intersession is very concentrated and intensive. Intersession classes are not available to new freshmen.

Laboratory. Course meeting in a defined physical setting for the hands-on application of methods and principles of a discipline; credit-bearing section which requires a registration separate from the lecture component of the course.

Lecture. A class session in which an instructor speaks on a specific topic.
Lecture/laboratory. Lecture course which integrates a lab component as part of the same course registration.

Major. The primary set of discipline-specific (or multidisciplinary or interdisciplinary) requirements in an undergraduate program of study. The major typically consists of a minimum of 30 hours and identifies by name a specific degree area.

Minor. The lesser set of discipline-specific (or multidisciplinary or interdisciplinary) requirements in an undergraduate program of study. The minor typically consists of a minimum of 15 hours or more in a designated discipline.

Noncredit Course. A course for which no credit is given. (Some credit courses will not count toward degrees.)

Overload. A course load of more semester hours than a student is normally permitted to schedule in a given period.

Practicum. Involves supervised activities emphasizing practical application of theory, especially one in which a student gains exposure to a field of study; generally required as part of the program curriculum.

Pre-Professional Requirements. The set of course, hour, and other academic requirements that must be completed before entry into a school, a program of study, or an advanced level of a program of study, either at the U of A or at another institution.

Prerequisite. A course or requirement that must be completed before the term when the described course is taken.

Private Study. Involves individual instruction with regular meetings; one-to-one demonstration, performance critique, music, fine arts or performing arts are examples.

Readings. A course where the instructor assigns readings and facilitates discussion at regular class meetings.

Registration. Enrollment at the beginning or prior to the beginning of a semester, including selection of classes and payment of fees and tuition.

Research. Research conducted that is independent of that done for a dissertation or thesis.

Sanction(s). The penalty for noncompliance to a policy. Usually a response that will redirect the individual or group’s inappropriate behavior, encourage responsible judgment and ethical reasoning, protect the community’s property and rights, and affirm the integrity of the institution’s conduct standards.

Section. A division of a course for instruction. A course may be taught in one or more sections or classes or at different times, depending on enrollment in the course.

Second Major. (Also referred to as a Dependent Major.) A second complete set of primary discipline-specific requirements in a discipline in which only a second or dependent major may be earned. A second major must be earned in a degree program in which the first major is one authorized to be given independently. Typically a minimum of 30 hours is earned in each major area or discipline.

Self-Paced (Correspondence). Course in which instruction is web-based and students are physically separated from the instructor. Interaction between instructor and student is not regular or substantive, and is primarily initiated by the student. These courses are self-paced and are not distance education. Students are not required to be admitted to the University of Arkansas to take a self-paced course.

Semester Credit Hour. Unit of measure of college work. One semester credit hour is normally equivalent to one hour of class work or from two to six hours of laboratory work per week for a semester.

Seminar. Involves a small group of students engaged in advanced study and original research under a member of the faculty and meeting regularly to exchange information and hold discussions; highly focused and topical course; may include student presentations and discussions of reports based on literature, practices, problems, or research.

Special Problems. Individualized investigation of topics or case studies in a specific field under the supervision of an instructor for the purpose of enhancing or illuminating the regular curriculum.

Special Topics. An organized course devoted to a particular issue in a specific field; course content is not necessarily included in the regular curriculum for the major.

State Minimum Core. See University Core below.

Student Number. A number given to each student as a permanent identification number for use at the university.

Studio Course. Involves the application of design and theory in a defined physical setting; students explore and experiment under the guidance of an instructor.

Summer Sessions. Periods of time during the summer when course work is offered. (Go to the Academic Calendar (p. 10) for specific times and dates.)

Syllabus. An outline or summary of the main points of a course of study, lecture, or text.

Telecommunications. Course that utilizes technology in conveying teaching material. This only includes courses that use technology as the primary delivery method of course content, not courses that simply use technology to support another delivery method. These are distant education courses that generally: Uses one or more of the following technologies to deliver instruction to students who are separated from the instructor and to support regular and substantive interaction between the students and the instructor, synchronously or asynchronously. The technologies used may include:

- The Internet;
- One-way and two-way transmissions through open broadcast, closed circuit, cable, microwave, broadband lines, fiber optics, satellite, or wireless communications devices;
- Audio-conferencing, etc.; or
- Videocassettes, DVDs, and CD-Roms, if the videocassettes, DVDs, or CD-Roms are used in conjunction with any of the technologies listed in the first three options

Track. A subdivision of a concentration or certificate, which a student must select and fulfill to complete the requirements of the concentration or certificate.
Transcript. A complete record of the student’s enrollment and academic history at the University of Arkansas, including all undergraduate, graduate, and law courses.

Tuition. The charge for university enrollment and registration, calculated per credit hour each semester. Tuition rates may vary depending on a student’s resident status, undergraduate or graduate standing, and college affiliation. Tuition does not include cost of room and board. Additional charges will apply depending on student status. See the entry for Fees above.

UAConnect (https://uaconnect.uark.edu/). The online database that maintains student, faculty and staff records and class schedules.

Undeclared Major. Designation indicating students who have not selected a major.

Undergraduate Study. Work taken toward earning an associate or a baccalaureate degree.

University Core. The state of Arkansas specifies a number of core courses that students must successfully pass to obtain a degree. These are also sometimes referred to as the State Minimum Core. Find out more in the Requirements for Graduation (http://catalog.uark.edu/undergraduatecatalog/academicregulations/requirementsforgraduation/) and University Core (http://catalog.uark.edu/undergraduatecatalog/academicregulations/universitycore/) portions of the Academic Regulations section.

Withdrawal. Official withdrawal (http://registrar.uark.edu/registration/withdrawal.php) from all courses during a semester at the university.
