Geography (GEOG)

The Geography Program offers an undergraduate major leading to a Bachelor of Arts in geography. Students may choose either the normal geography degree program or the concentration in cartography and remote-sensing GIS. The program also offers two minors: geography and historic preservation.

Undergraduates who wish to major in geography should identify themselves to the department as soon as possible in order that they may develop a meaningful sequence of courses and take part in departmental activities.

Those interested in the graduate program should consult the Graduate School Catalog (http://catalog.uark.edu/graduatecatalog/programsofstudy/geosciencesdepartmentofgeos/).

Requirements for a Major in Geography: In addition to the University Core requirements (http://catalog.uark.edu/undergraduategrad/academicregulations/universitycore/) and the Fulbright College of Arts and Sciences Graduation Requirements (http://catalog.uark.edu/undergraduategrad/academicregulations/ jwilliamfulbrightcollegeofartsandsciences/), the following course requirements must be met. Bolded courses from the list below may be applied to portions of the University/state minimum core requirements.

GEOS 1123 Human Geography (ACTS Equivalency = GEOG 1113) 3
GEOS 2003 World Regional Geography (ACTS Equivalency = GEOG 2103) 3
GEOS 1113 & GEOS 1111L General Geology (ACTS Equivalency = GEOL 1114 Lecture) 4
& General Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab)
GEOS 1133 & GEOS 1131L Earth Science (ACTS Equivalency = GEOL 1124 Lecture) 4
& Earth Science Laboratory (ACTS Equivalency = GEOL 1124 Lab)
Six hours in a single world language at the 1013 Elementary II level or higher. 1 6
GEOS 3023 Introduction to Cartography 3
GEOS 3543 Geospatial Applications and Information Science 3

In addition, students must complete a minimum of 15 hours of GEOS at the 3000-level or above, classes must include one technical, two regional and two topical courses.

Total Hours 41

1 World language courses taken are dependent on placement level in sequence.

Students who expect to enter graduate school are encouraged to register for GEOS 410V their senior year. Electives in closely related fields are considered a part of the program and, upon prior approval of the department, six hours may be counted toward the major. Those planning to teach in secondary schools should note that they can both earn their degree in geography and qualify for a teaching certificate; they should consult with the department as early as possible.

Writing Requirement: The college writing requirement is to be met by completion of a term paper deemed satisfactory by the student’s adviser and instructor of an upper-level geoscience course. The college writing requirement may also be met by the completion of an honors thesis.

Geography B.A.
Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (http://catalog.uark.edu/undergraduategrad/academicregulations/ eigthesemesterdegerequivalency/) for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

Geography (GEOG)

Requirements for a Major in Geography with Cartography/Remote Sensing GIS Concentration:

This program gives students an opportunity to develop expertise in (1) cartography, map design and computer-assisted map production, (2) remote sensing and image interpretation, including photographic systems, sensor systems, and digital image processing, and (3) geographic information systems, including data sources, analytical techniques, and hardware/software systems.

To complete the concentration, a student is required to fulfill certain course requirements.

Total Units in Sequence: 120

1. Meets 40-hour advanced credit hour requirement. See College Academic Regulations (http://catalog.uark.edu/undergraduataecatalog/collegesandschools/williamfulbrightcollegeofartsandsciences/).

2. Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations (http://catalog.uark.edu/undergraduataecatalog/collegesandschools/williamfulbrightcollegeofartsandsciences/).

Writing Requirement: The college writing requirement is to be met by completion of a term paper deemed satisfactory by the student’s adviser and instructor of an upper-level geoscience course. The college writing requirement may also be met by the completion of an honors thesis.

Requirements for a Minor in Geography: 15 hours in geography to include GEOS 1123. At least 6 hours must be numbered 3000 or above and must include one regional and one topical course.

Requirements for a Minor in Historic Preservation: 18 hours from:

- GEOS 4073 Urban Geography
- or LARC 3413 History of Landscape Architecture
- ANTH 4443 Cultural Resource Management I (or equivalent class in cultural resources)
- GEOS 1133 Earth Science (ACTS Equivalency = GEOL 1124 Lecture)
- GEOS 3023 Introduction to Cartography (or equivalent class in spatial representation and visualization)
- GEOS 3033 Building Materials Field Studies

Total Hours: 18

GEOS 3033 Building Materials Field Studies is the required field capstone course that will require two weekends (Saturday and Sunday) for completion. The course has been specifically designed for this program and will discuss the nature of building materials (wood, brick, mortar and stone), their identification and properties, weathering and erosion theory, assessment and mitigation (i.e. cleaning, consolidants, innovative trends). It is suggested that this class be taken last in the program series.

One semester participation in the University of Arkansas’ Rome Program will substitute for six (6) credits from class requirements in Architectural History and Urban Studies listed above. A supplemental program internship is suggested in addition to the classes required if the student’s career path is in Historic Preservation.

Requirements for Departmental Honors in Geography: Admission to the Departmental Honors Program in Geography is open to geography majors with a minimum grade-point average of 3.5 in all their work. All honors candidates must take 12 hours, which may include 6 hours of thesis, in Honors Studies. During the fall semester of either the
junior or senior year the candidate will enroll in GEOS 399VH (no more than three hours of credit), an undergraduate seminar in geographical philosophy and methodology. During the senior year the honors candidate will complete the program by writing a senior honors paper under GEOS 399VH (no more than three hours of credit). Successful completion of the requirements will be recognized by the award of the distinction “Geography Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

Courses

GEOS 1111L. General Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab). 1 Hour.
Laboratory exercises concerning the identification of rocks and minerals, use of aerial photographs and topographic maps, and several field trips. Pre- or Corequisite: GEOS 1113. (Typically offered: Fall, Spring and Summer)

GEOS 1111M. Honors General Geology Laboratory. 1 Hour.
Survey of geological processes and products and their relationships to landforms, natural resources, living environments, and human beings. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOS 1113H. (Typically offered: Fall)
This course is equivalent to GEOS 1111L.

GEOS 1113. General Geology (ACTS Equivalency = GEOL 1114 Lecture). 3 Hours.
Survey of geological processes and products, and their relationships to landforms, natural resources, living environments and human beings. Lecture 3 hours per week. GEOS 1111L is recommended as a corequisite. (Typically offered: Fall, Spring and Summer)

GEOS 1113H. Honors General Geology. 3 Hours.
Survey of geological processes and products and their relationships to landforms, natural resources, living environments, and human beings. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOS 1113H. (Typically offered: Irregular)
This course is equivalent to GEOS 1113.

GEOS 1123. Human Geography (ACTS Equivalency = GEOG 1113). 3 Hours.
Basic course in human geography stressing the interrelationships between the natural factors of the environment and man’s activities, especially the role of geography in the understanding of social problems and economic and political activities. (Typically offered: Fall and Spring)

GEOS 1123H. Honors Human Geography (ACTS Equivalency = GEOG 1113). 3 Hours.
Basic course in human geography stressing the interrelationships between the natural factors of the environment and man’s activities, especially the role of geography in the understanding of social problems and economic and political activities. Prerequisite: Honors Candidacy (Typically offered: Fall and Spring)
This course is equivalent to GEOS 1123.

GEOS 1131L. Earth Science Laboratory (ACTS Equivalency = GEOL 1124 Lab). 1 Hour.
Laboratory exercises concerning human interactions with the physical environment including the study of earthquakes, volcanoes, flooding, erosion, mass wasting, water supply and contamination, and waste disposal. (Typically offered: Fall and Spring)

GEOS 1133. Earth Science (ACTS Equivalency = GEOL 1124 Lecture). 3 Hours.
The application of earth science principles and knowledge of problems created by human occupancy and exploitation of the physical environment. (Typically offered: Fall and Spring)

Survey of problems, development potential, and physical and human resources of the developing and developed world. (Typically offered: Fall and Spring)

GEOS 2003H. Honors World Regional Geography. 3 Hours.
Survey of problems, development potential, and physical and human resources of the developing and developed world. Prerequisite: Honors candidacy. (Typically offered: Fall and Spring)
This course is equivalent to GEOS 2003.

GEOS 2313. Mineralogy and Petrology. 3 Hours.
General principles of mineralogy and petrology, study and identification of common minerals, igneous & metamorphic rocks using hand samples. Corequisite: Lab component. Prerequisite: GEOS 1113 and CHEM 1103. (Typically offered: Fall)

GEOS 2813. Digital Earth. 3 Hours.
This course introduces the fundamental concepts and practical geospatial techniques of the digital earth initiative. Students will learn how digital geographical information is produced (also referred to as geospatial data) and utilized in a variety of economic, environmental, and scientific applications. The class will concentrate on how digital geospatial data are produced, integrated and applied in daily life and will review a variety of environmental and socioeconomic applications. (Typically offered: Fall)

GEOS 2813H. Honors Digital Earth. 3 Hours.
This course introduces the fundamental concepts and practical geospatial techniques of the digital earth initiative. Students will learn how digital geographical information is produced (also referred to as geospatial data) and utilized in a variety of economic, environmental, and scientific applications. The class will concentrate on how digital geospatial data are produced, integrated and applied in daily life and will review a variety of environmental and socioeconomic applications. Prerequisite: Honors standing. (Typically offered: Fall)
This course is equivalent to GEOS 2813.

GEOS 3013. Foundations of Geospatial Data Analysis. 3 Hours.
Basic mathematical tools applied in geospatial technology, including trigonometry in mapping, linear algebra in remote sensing, optimization in spatial decision support, and graph theory in routing. Course develops the framework for spatial data analysis and decision support. Students may receive credit for the course through testing. Prerequisite: GEOS 3943. (Typically offered: Fall and Spring)

GEOS 3023. Introduction to Cartography. 3 Hours.
Students learn basic principles of map design, cartographic theory and field surveying to produce a variety of computer-generated maps. An introductory course designed for students in a variety of different disciplines using AutoCad software and various new technologies. Field trips may be required. (Typically offered: Fall)

GEOS 3033. Building Materials Field Studies. 3 Hours.
Study of durable building materials, their availability, strength, deterioration, limitation and utility. Historic construction techniques, identification of architectural materials, architectural elements assessment, causes and mechanisms of deterioration, conservation and treatment of architectural materials, preservation philosophies and standards and creation of a practical field identification kit will also be covered. Corequisite: Lab component. (Typically offered: Irregular)

GEOS 3043. Sustaining Earth. 3 Hours.
Theory and growth of conservation and sustainability, the wise use of the major natural resources of the United States. This course meets the requirement in conservation and sustainability for teachers. Prerequisite: Junior standing. (Typically offered: Fall)

GEOS 3043H. Honors Sustaining Earth. 3 Hours.
Theory and growth of conservation and the wise use of the major natural resources of the United States. This course meets the requirement in conservation for teachers. Prerequisite: Junior standing. (Typically offered: Fall)
This course is equivalent to GEOS 3043.
GEOS 3052. Geology for Engineers. 2 Hours.
Geologic principles involved in construction, reservoir location, etc. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall)

GEOS 3062. Geology of Arkansas. 2 Hours.
A survey of the distribution, genesis, and age of the rocks, fossils, structures, landforms and geological processes of Arkansas. Equivalent to two hours of lecture per week. Field trips required. Prerequisite: GEOS 1113 or GEOS 1113H. (Typically offered: Spring)

GEOS 3103. Geospatial Technologies Computational Toolkit. 3 Hours.
Basic computational tools and processes applied in geospatial software, related computer hardware components, systems and applications software, and spatial database fundamentals. Python, including SciPy and NumPy, geospatial implementations will be emphasized. No programming experience is required. Students may receive credit for the course through testing. Prerequisite: GEOS 3543. (Typically offered: Fall and Spring)

GEOS 3114. Invertebrate Paleontology. 4 Hours.
Survey of the invertebrate phyla commonly preserved as fossils emphasizing their physical and biological characteristics. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 1113 or (BIOL 1543 and BIOL 1541L) or equivalent. (Typically offered: Spring)

GEOS 3213. Principles of Remote Sensing. 3 Hours.
Fundamental concepts of remote sensing of the environment. Optical, infrared, microwave, LIDAR, and in situ sensor systems are introduced. Remote sensing of vegetation, water, urban landscapes, soils, minerals, and geomorphology is discussed. The course includes laboratory exercises in GIS software and field spectroscopy. (Typically offered: Fall)
This course is equivalent to GEOS 4413.

GEOS 3313. Igneous and Metamorphic Rocks. 3 Hours.
Megascopic study and classification of igneous and metamorphic rocks. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 2313. (Typically offered: Spring)

GEOS 3333. Oceanography. 3 Hours.
The sea, its landforms; its winds and currents as related to the atmosphere, world climates, and world trade; its basin as avenues for continental drift; its waters as habitat for plant and animal life; its marine and submarine resources as presently and potentially useful to man. Offered as physical science. Prerequisite: Junior standing. (Typically offered: Spring Even Years)

GEOS 3383. Principles of Landscape Evolution. 3 Hours.
Examines the role of waves, rivers, wind, and tectonics in shaping and modifying the surface of the earth. Considers the way in which an understanding of landscape processes is essential to the effective solution of environmental problems. Lecture 3 hours. (Typically offered: Fall) May be repeated for up to 3 hours of degree credit.

GEOS 3413. Sedimentary Rocks & Fossils. 3 Hours.
An introductory study of sedimentary rocks and fossils from the standpoint of classification, field and laboratory description, genesis, and preservation. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 2313. (Typically offered: Spring)

GEOS 3514. Structural Geology. 4 Hours.
Survey of deforming features and their geological significance in the crust of the earth. Lecture 3 hours per week. Corequisite: Lab component. Prerequisite: GEOS 1113 or GEOS 3052. (Typically offered: Spring)

GEOS 3543. Geospatial Applications and Information Science. 3 Hours.
An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. (Typically offered: Fall and Spring) This course is cross-listed with ANTH 3543.

GEOS 3553. Spatial Analysis Using ArcGIS. 3 Hours.
Applications of analysis of spatial data using ArcGIS tools in map design, on-line mapping, creating geodatabases, accessing geospatial data, geo-processing, digitizing, geocoding, spatial analysis including basic spatial statistics, analysis of spatial distributions and patterning and 3D application using ArcGIS 3D Analyst. Prerequisite: GEOS 3543. (Typically offered: Fall and Spring)

GEOS 3563. Geospatial Data Mining. 3 Hours.
Basic tools for analyzing, summarizing and visualizing geospatial data. Exploratory data and spatial data analysis, probability distributions and application, single and multivariate analysis and hypothesis testing, and spatial smoothing and interpolation. Emphasis will be on problem solving in geospatial settings using the R statistical language. Prerequisite: GEOS 3013 and GEOS 3103 or equivalent. (Typically offered: Fall and Spring)

GEOS 3593. Introduction to Geodatabases. 3 Hours.
Fundamental concepts and applications of geospatial databases. Schema development and spatial data models for geodata. Spatial and attribute query and optimization, properties and structures of relational and object-oriented geodatabases. Spatial extensions of SQL, spatial indexing, measurement, and geometry. Prerequisite: GEOS 3543, GEOS 3013 and GEOS 3103. (Typically offered: Fall and Spring)

GEOS 360V. Undergraduate Special Problems. 1-6 Hour.
Library, laboratory, or field research in different phases of geology. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

GEOS 3901. Junior Honors Course. 1 Hour.
Special honors research in geology. One hour credit each semester. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)

GEOS 3911. Junior Honors Course. 1 Hour.
Special honors research in geology. One hour credit each semester. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)

GEOS 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in geology or geography). (Typically offered: Irregular) May be repeated for degree credit.

GEOS 399VH. Honors Course. 1-6 Hour.
Honors course. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GEOS 4033. Hydrogeology. 3 Hours.
Occurrence, movement, and interaction of water with geologic and cultural features. Lecture 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 2043 or MATH 2554, and GEOS 3514. (Typically offered: Spring)

GEOS 4043. Geography of the Middle East. 3 Hours.
Physical and cultural landscapes, natural and cultural resources, art and architecture, land use, political history, OPEC, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Class participation, discussions, slides and films, and student presentations will round out the class. Prerequisite: Junior standing. (Typically offered: Fall)

GEOS 4043H. Honors Geography of the Middle East. 3 Hours.
Physical and cultural landscapes, natural and cultural resources, art and architecture, land use, political history, OPEC, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Class participation, discussions, slides and films, and student presentations will round out the class. Prerequisite: Junior standing. (Typically offered: Irregular) This course is equivalent to GEOS 4043.
GEOS 4053. Geomorphology. 3 Hours.
Mechanics of landform development. Lecture 2 hours, laboratory 3 hours per week. Several local field trips are required during the semester. Corequisite: Lab component. Prerequisite: GEOS 1113 or GEOS 3052. (Typically offered: Spring)

GEOS 4063. Principles of Geochemistry. 3 Hours.
Introduction to fundamental principles of geochemistry from historic development to modern concepts. Prerequisite: CHEM 1121L, CHEM 1123 and GEOS 2313. (Typically offered: Fall)

GEOS 4073. Urban Geography. 3 Hours.
Areal patterns of modern urban regions and the forces shaping these patterns. Emphasis is placed on American urban areas and their evolution and functional areas. Field work. Prerequisite: Junior standing. (Typically offered: Spring)

GEOS 4083. Economic Geology. 3 Hours.
Introduction to mineral deposits used as economic resources. Covers basic geology and geochemistry of mineral deposit formations and the formation of major classes of deposits. Examines the relationship between the distribution of ores, oil, gas, coal, and Plate Tectonics. Explores environmental issues associated with the extraction of earth resources. Prerequisite: GEOS 2313. (Typically offered: Irregular)

GEOS 4093. History and Philosophy of Geography. 3 Hours.
This course familiarizes students with the history of geography, the contributions of geographers to scientific thought and theory, and research techniques that are used in geography. Emphasis is given to the integration of statistical and spatial analysis, and their applications in field research. The course includes short field-based projects in and around Northwest Arkansas. (Typically offered: Spring Even Years)

GEOS 410V. Special Problems in Geosciences. 1-6 Hour.
Designed to meet the needs of students who wish to study one particular geographic topic in some detail. Prerequisite: Junior standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

GEOS 410VH. Honors Special Problems in Geosciences. 1-6 Hour.
Designed to meet the needs of students who wish to study one particular geographic topic in some detail. Prerequisite: Junior standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

This course is equivalent to GEOS 410V.

GEOS 4113. Global Change. 3 Hours.
Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss, urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. (Typically offered: Spring)

GEOS 4113H. Honors Global Change. 3 Hours.
Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss, urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. Prerequisite: Honors candidacy. (Typically offered: Spring)

This course is equivalent to GEOS 4113.

GEOS 4133. Radar Remote Sensing. 3 Hours.
Introduction to radar remote sensing and its applications in geology, geography, archeology, engineering, and agriculture. Focuses on Synthetic Aperture Radar (SAR) and advanced techniques including radar stereo, polarimetry, and interferometry. Covers Interferometric SAR (InSAR) for mapping topography and modeling Earth’s surface motions due to earthquakes, volcanic eruptions, landslides, and subsidence. Prerequisite: GEOS 3023 or equivalent. (Typically offered: Spring)

GEOS 4153. Karst Hydrogeology. 3 Hours.
Assessment of ground water resources in carbonate rock terrains; relation of ground water and surface water hydrology to karst; quantification of extreme variability in karst environments; data collection rationale. Field trips required. Prerequisite: GEOS 4033. (Typically offered: Irregular)

GEOS 4223. Stratigraphy and Sedimentation. 3 Hours.
Introductory investigation of stratigraphic and sedimentologic factors important to the study of sedimentary rocks. Lecture 2 hours, laboratory 3 hours per week. A required weekend, two-day field trip will be conducted during the semester. Corequisite: Lab component. Prerequisite: GEOS 3413. (Typically offered: Fall)

GEOS 4233. Geography of Religion & Sacrality. 3 Hours.
Explores the spatial nature of the World’s major faiths and religious institutions, focusing on the distribution and origins of these religions. Examines the religious beliefs, rituals, architecture, demographics, and art in different societies, cultures, and countries. Considers the tenets and practices of what is sacred and/or spiritual, held in common by a group or community. Prerequisite: Junior or senior standing. (Typically offered: Irregular)

GEOS 4243. Political Geography. 3 Hours.
Contemporary world political problems in their geographic context. Development of the principles of political geography with emphasis upon the problems of Eastern Europe, Africa, and Southeast Asia. Prerequisite: Junior standing. (Typically offered: Fall Odd Years)

GEOS 4253. Petroleum Geology. 3 Hours.
Distribution and origin of petroleum. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: Geology major and senior standing. (Typically offered: Fall)

GEOS 430V. Internship in Physical Geography. 3-6 Hour.
Supervised experience in municipal, county, state or private natural resource management agency, or any other such organization approved by instructor. (Typically offered: Fall, Spring and Summer)

GEOS 4353. Meteorology. 3 Hours.
Examination of the atmospheric processes that result in multifarious weather systems. Offered as physical science. Prerequisite: Junior standing. (Typically offered: Fall)

GEOS 4363. Climatology. 3 Hours.
Fundamentals of topical climatology followed by a study of regional climatology. Offered as physical science. Prerequisite: GEOS 1133 or GEOS 4353. (Typically offered: Spring)

GEOS 437V. Geology Field Trip. 1-2 Hour.
Camping field trip to areas of geologic interest, usually conducted during Spring Break. Prerequisite: GEOS 3313. (Typically offered: Spring) May be repeated for up to 4 hours of degree credit.

GEOS 4383. Hazard & Disaster Assessment, Mitigation, Risk & Policy. 3 Hours.
Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the class. Prerequisite: Junior or senior standing. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

GEOS 4383H. Honors Hazard & Disaster Assessment, Mitigation, Risk & Policy. 3 Hours.
Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the class. Prerequisite: Junior or senior standing. (Typically offered: Spring)

This course is equivalent to GEOS 4383.

GEOS 4393. American Public Lands & Policy. 3 Hours.
The course examines the role of American federal public lands in 19th-21st century geography, history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America's national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Junior or senior standing. (Typically offered: Irregular)
GEOS 4393H. Honors American Public Lands & Policy. 3 Hours.
The course examines the role of American federal public lands in 19th-21st century geography, history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America’s national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Honors standing and Junior or senior standing. (Typically offered: Fall Even Years)
This course is equivalent to GEOS 4393.

GEOS 440V. Internship in GIS & Cartography. 3-6 Hour.
Supervised experience in GIS and/or cartographic applications with municipal, county, state, or private enterprises. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

GEOS 4433. Geophysics. 3 Hours.
Derivation from physical principles, of the geophysical methods for mapping the Earth. Computational methods of converting gravity, magnetic, radiometric, electrical, and seismic data into geologic information. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: MATH 2564 and PHYS 2033 and PHYS 2031L and GEOS 3514. (Typically offered: Irregular)

GEOS 4443. The Solid Earth: Structure, Composition and Evolution. 3 Hours.
Modern views for the origin of the solid Earth and its structure, composition, and evolution through geologic time. Topics will include examination of relevant geophysical and geochemical constraints used to develop global models for the Earth. Prerequisite: CHEM 1123, GEOS 3313, MATH 2564, PHYS 2074 or instructor consent. (Typically offered: Irregular)

GEOS 4463. 3D Seismic Exploration. 3 Hours.
Interpretation of the spatial component of three-dimensional seismic data in geologic structure and stratigraphy with emphasis on hydrocarbon exploration. Prerequisite: GEOS 3514 or instructor consent. (Typically offered: Spring)

GEOS 4473. Applied Climatology. 3 Hours.
Applied climatology involves the use of climatic data to solve a variety of social, economic and environmental problems, such as for clients in agriculture, water and energy management. The basic purpose of applied climatology is to help society, at all scales and levels, to achieve a better adjustment to the climatic environment. (Typically offered: Fall)

GEOS 4473H. Honors Applied Climatology. 3 Hours.
Applied climatology involves the use of climatic data to solve a variety of social, economic and environmental problems, such as for clients in agriculture, water and energy management. The basic purpose of applied climatology is to help society, at all scales and levels, to achieve a better adjustment to the climatic environment. (Typically offered: Fall)
This course is equivalent to GEOS 4473.

GEOS 4483. Severe Weather. 3 Hours.
Focuses on the formation and impact of weather phenomena such as blizzards, floods, tornadoes, thunderstorms, hurricanes and droughts. Covers the mechanisms and physics that control severe weather, advanced terminology, physical concepts and scientific methods used in meteorology, and the analysis and interpretation of meteorological data. Prerequisite: GEOS 1133 and GEOS 1131L. (Typically offered: Spring)

GEOS 4493. Geography of Political Violence. 3 Hours.
This seminar focuses on the rise of civil conflict in the post-World War II world. We are particularly interested in understanding the institutional challenges facing countries that experience such conflict. The class will develop a contextually-informed understanding of the international system and how it is shaped by civil war. Pre- or Corequisite: INST 2013. Prerequisite: Junior or senior standing. (Typically offered: Fall Even Years)
This course is cross-listed with INST 4103.
GEOS 4583. Enterprise and Multiuser GIS. 3 Hours.
GIS practice that's typical of collaborative team-based geospatial organizations. Solve real-world problems through end-to-end GIS design and implementation using ArcGIS Enterprise, extensive federal, state, and local repositories, and high quality software documentation. Includes relevant training in geospatial provenance and metadata, and in enterprise and multiuser GIS administration. (Typically offered: Spring)

GEOS 4593. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.
Fundamentals of navigation, mapping, and high-precision positioning using the Navstar Global Positioning System. Topics include datum definition and transformation, map projections, autonomous and differential positioning using both code and carrier processing, and analysis of errors. Prerequisite: GEOS 3543 or GEOS 5543. (Typically offered: Fall)
This course is cross-listed with ANTH 4593.

GEOS 4653. GIS Analysis and Modeling. 3 Hours.
Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. (Typically offered: Spring)
This course is cross-listed with ANTH 4653.

GEOS 4653H. Honors GIS Analysis and Modeling. 3 Hours.
Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. (Typically offered: Spring)
This course is cross-listed with GEOS 4653, ANTH 4653.

GEOS 4663. Low-Temperature Geochemistry of Natural Waters. 3 Hours.
Covers the low-temperature geochemistry of waters and their associated minerals at Earth's surface. Examines the controls on the chemical composition of natural waters and the minerals precipitated from them. Topics covered will include water-rock interactions, pH, redox, the carbonate-water system, clay minerals and exchange, heavy metals, and a brief introduction to stable isotopes and geomicrobiology. Prerequisite: CHEM 1121L, CHEM 1123, GEOS 1113, and GEOS 1111L. (Typically offered: Fall)

GEOS 4673. Volcanology. 3 Hours.
A broad introduction to volcanic processes and their associated hazards. Emphasis will be placed on applying basic physical and chemical principles to understanding volcanic systems. Prerequisite: GEOS 2313. (Typically offered: Irrregular)

GEOS 4686. Geology Field Camp. 6 Hours.
A professional course taught off campus emphasizing occurrence, description, mapping, and interpretation of major rock types. May not be taken for graduate credit. Prerequisite: GEOS 3413 and GEOS 3514. (Typically offered: Summer)

GEOS 4693. Environmental Justice. 3 Hours.
This course deals with the ethical, environmental, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. (Typically offered: Spring)

GEOS 4693H. Honors Environmental Justice. 3 Hours.
This course deals with the ethical, environmental, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. (Typically offered: Spring)
This course is equivalent to GEOS 4693.

GEOS 4783. Geography of Europe. 3 Hours.
Geographic regions of the area with emphasis on their present development. Prerequisite: Junior standing. (Typically offered: Spring)

GEOS 4793. Geospatial Unmanned Aircraft Systems. 3 Hours.
Geospatial unmanned aircraft systems (UAS) are becoming key technologies in a number of disciplines. This course will introduce safe and legal operation of UAS in aerial photography, multispectral, thermal and LIDAR applications, geodetic control, photogrammetric and computer vision processing, and the creation of accurate 2D and 3D digital information products. Pre- or Corequisite: GEOS 4413 and GEOS 4593 or equivalent. (Typically offered: Fall)

GEOS 4793H. Honors Geospatial Unmanned Aircraft Systems. 3 Hours.
Geospatial unmanned aircraft systems (UAS) are becoming key technologies in a number of disciplines. This course will introduce safe and legal operation of UAS in aerial photography, multispectral, thermal and LIDAR applications, geodetic control, photogrammetric and computer vision processing, and the creation of accurate 2D and 3D digital information products. Pre- or Corequisite: Honors standing, GEOS 4413 and GEOS 4593 or equivalent. (Typically offered: Fall)
This course is equivalent to GEOS 4793.

GEOS 481V. Cooperative Education Program. 1-6 Hour.
Credit for off-campus, compensated work experience related to geology arranged through the Cooperative Education Office and Department of Geology. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

GEOS 4863. Quantitative Techniques in Geosciences. 3 Hours.
An introduction to the application of standard quantitative and spatial statistical techniques to geoscientific analysis. Students will use both micro and large system computers in the course. (Typically offered: Spring)
This course is cross-listed with ANTH 4863.

GEOS 4873. Geological Data Analysis. 3 Hours.
Quantitative methods and techniques for analysis and interpretation of geological data. Corequisite: Lab component. Prerequisite: MATH 2564 and GEOS 3514. (Typically offered: Spring)

GEOS 4924. Earth System History (ACTS Equivalency = PHSC 1104). 4 Hours.
Physical and biological events that form the history of the earth from its formation to the beginning of the historical era. Graduate enrollment only with departmental permission. Corequisite: Lab component. Prerequisite: GEOS 3514. (Typically offered: Spring)

GEOS 4933. Ancient Forest Science and Sustainability. 3 Hours.
Ancient forests preserve beautiful habitat with high ecological integrity. This course will examine the development, spatial distribution, and ongoing destruction of ancient forests worldwide, and how science can contribute to the understanding and sustainable management of these valuable resources. (Typically offered: Spring)

GEOS 4972H. Senior Honors Course I. 2 Hours.
Special honors research in geology. Two hours of credit each semester. Prerequisite: Junior honors. (Typically offered: Fall, Spring and Summer)

GEOS 4982H. Senior Honors Course II. 2 Hours.
Special honors research in geology. Two hours of credit each semester. Prerequisite: Junior honors. (Typically offered: Fall, Spring and Summer)
GEOS 4993. Dynamics of Sediment Transport. 3 Hours.
This is a course focused on how fluids transport sediment and construct stratigraphy. Lectures will develop environmental fluid mechanics and sediment transport from first principles so they can be used to evaluate sedimentological and stratigraphic problems. This framework will be applied to a sedimentological problem using original data and analysis. Pre- or Corequisite: GEOS 4223. Prerequisite: GEOS 3413. (Typically offered: Fall Odd Years)
