Professional Licensure Disclosure Policy

In compliance with federal regulation 34 CFR 668.43 (a) (5) (v) and 34 CFR 668.43 (c), the University will disclose to a student whether the student's declared degree or certificate program leads to the ability to obtain a professional license in the state of the student's self-reported *location*. Disclosure will occur prior to the student making a *financial commitment to the institution*. To facilitate this timeline, notification will be made following the student's initial enrollment in courses in a term to which the student has been admitted or readmitted to the university.

Once enrolled in a program, if the institution makes a later determination that the program does not meet educational requirements for licensure or certification in the state where the student is located, the University of Arkansas will provide notice directly to the student within 14 calendar days of making that determination.

General disclosures on professional licensure status in each state will be maintained on the University of Arkansas website.

For the purpose of this policy, the following definitions apply:

Location means the state in which the student reports they will be physically located while completing the student's program of study, also known as the reported "local" or "campus" address. Location will be designated in the first term of enrollment in coursework and will be updated upon receipt and processing of any formal notification by the student to the university of a change in location.

Financial commitment to the institution means the payment of or agreement to pay registration related tuition, fees, and charges.
