The department of economics offers two concentrations within the business economics major:

1. Business Economics

The concentration in business economics is intended for those students who are interested primarily in business, but at the same time have a desire to understand the more advanced tools of economic analysis. Such a background is excellent preparation for careers in corporate research and planning, as well as careers with government and regulatory agencies, for graduate study in business and economics, and for law school. Students who want to pursue an advanced degree in business economics can, with appropriate planning, complete a master’s degree at the University of Arkansas within 12 months after receiving a B.S.B.A. degree. Please see the economics department chair for more information.

The international economics and business concentration is intended for students who wish to learn more about the international aspects of economics and business. It provides preparation for a broad range of careers in business, including management, marketing, and finance.

It is strongly recommended that economics majors who plan to continue their studies at the graduate level take at least two semesters of calculus (MATH 24004 and MATH 25004) and linear algebra (MATH 30803). These courses will substitute for the math courses required within Walton College core (MATH 22003 and MATH 25003).

**Economics B.S.B.A. with Business Economics Concentration**

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (http://catalog.uark.edu/undergraduategeneral/academicregulations/eightsemesterdegreecompletionpolicy/) for university requirements of the program.

Courses in BOLD must be taken in the designated semester. Although other courses listed are not required to be completed in the designated sequence, the recommendations below are preferred.
