LAWW 53901. Effective Corporate Compliance. 1 Hour.

This course provides a high-level overview of the importance and structure of an effective compliance program within a business, with the purpose of mitigating legal risk. The Federal Sentencing Guidelines specify the elements of an effective compliance program, and some federal agencies like have interpreted these or implemented them through regulation. Corporations are facing an ever-changing regulatory environment in a multitude of sectors, and this course prepares students with a foundational level of how compliance professionals build effective compliance programs, using a relevant fact pattern to bring the course material to life. Students who choose to work for a corporation (even in the legal department) will need to be familiar with how that corporation implements the elements of an effective compliance program, so as to effectively defend or advise the corporation. (Typically offered: Irregular)

LAWW 54002. Legislation. 2 Hours.

Law in the United States increasingly comes from written texts -- statutes, ordinances, and administrative regulations. This course will introduce the primary tools that lawyers use when interpreting these texts. It will begin with an overview of various theories and methodological approaches to interpretation. Then it will turn to the ways that lawyers and courts discern the meaning of legal texts (including through canons of interpretation) and construe those texts in light of external sources of authority (including legislative history and other texts). At various points during the course, students will apply these tools to hypothetical and real-world problems. (Typically offered: Irregular)

Also discussed are issues associated with environmental torts, such as imputed liability, and defenses. Review remedies for damage to property and individuals. (Typically offered: Irregular)

LAWW 5470V. State and Local Government. 2-3 Hour.

As citizens, much of our interaction with the law is local. Local governments determine the location of our nearest grocery store, how high (or low) property taxes will be, whether to maintain a public library, how late bars can serve alcohol, and even whether it is lawful to keep a pet python. Local government activity is significant, immediate, and pervasive. Despite the importance of local government law and institutions, most law school courses focus only on federal and state sources of law with little or no mention of local government. This course aims to address this void by providing a useful overview of core legal doctrines affecting the structure, authority, financing, and liabilities of local government in the United States. The course also covers the theoretical and empirical research underlying those doctrines, and is structured to provide a broad understanding of local government relevant to most United States jurisdictions. (Typically offered: Irregular)

LAWW 5480V. Privacy Law. 1-3 Hour.

Information Privacy and Security Law will explore the principles underlying the emerging law of informational privacy in the context of significant U.S. data privacy legislation with relevant comparisons to certain international data privacy regimes.. (Typically offered: Irregular)

LAWW 57802. Introduction to Banking & Creditors' Rights Litigation. 2 Hours.

Students in this course will learn how to protect and enforce the creditors' rights through litigation by drafting demand letters, petitions, motions, settlement agreement, proposed judgments, and other filings before and after bankruptcy. Students will simulate the representation of a creditor with a defaulted loan and will be expected to enforce the applicable instruments within the Model Rules of Professional Conduct as well as the structures of the Bankruptcy Code. Through the simulated filings and oral arguments, students will be introduced to enforcement and bankruptcy concepts and will be better prepared to practice in the creditors' rights realm. (Typically offered: Irregular)

LAWW 57903. Arbitration. 3 Hours.

Arbitration is an increasingly popular method of resolving civil disputes, including employment, securities regulation, construction, and insurance disputes. Although arbitration is the result of an agreement between parties, a developing legal regime governs its use. Federal and state laws such as the Federal Arbitration Act govern what disputes are covered by an arbitration agreement, when arbitration is prohibited, and whether a court can review the award. This course provides an overview of those laws and the court decisions interpreting them so that the students understand an area of law that they are likely to encounter in their varied careers. This course will also provide an opportunity to review important principles of contract law, conflicts of law, jurisdiction, and other subjects that will appear on the bar exam. (Typically offered: Spring)

LAWW 58003. NCAA Governance, Legislation, & Compliance. 3 Hours.

This course examines NCAA governance and both the NCAA legislative and infractions process. As familiarity with the knowledge of the NCAA legislation becomes increasingly important within the college athletics industry, a purpose of the course is to examine the NCAA's operative bylaws (11-17). The course will incorporate NCAA infractions cases as a method to learn application of the legislation. An overarching objective is to increase appreciation of NCAA rules compliance yet encourage critical thought of both the infractions process and legislative content. The course also covers the NCAA's status as a private organization, the results of the fact that it is not a state actor, and Supreme Court cases including *Alston*, *Board of Regents*, and *NCAA v. Tarkanian*. (Typically offered: Fall and Summer)

This course is cross-listed with RESM 58003.

LAWW 5810V. Regulation of Cryptotransactions. 1-3 Hour.

This is an upper-level elective designed to introduce students to the regulatory environment in which cryptotransactions currently operate. While the focus is on U.S. law, international developments will also be mentioned more briefly. Class will start with an overview of terms and concepts, along with the history of money and blockchain developments. Then regulation of crypto as currency, as a commodity, and as a security under federal law will be covered. State laws and international law will illustrate a variety of alternative regulatory approaches. Taxation of crypto will not be covered in any depth. There are no pre-requisites. (Typically offered: Fall, Spring and Summer)
