

University Course Requirements

The University of Arkansas requires every undergraduate degree program to include common coursework across the university's undergraduate majors. This coursework satisfies the Arkansas state minimum core (<http://catalog.uark.edu/undergraduatecatalog/gened/stateminimum/>) for a college degree and the university's general education learning outcomes (<http://catalog.uark.edu/undergraduatecatalog/gened/generaleducation/>).

Many of the courses that satisfy the state minimum core also fulfill many of the university's general education learning outcomes, although some majors specify courses beyond the state minimum to meet their specific general education learning outcomes.
